EXECUTIVE SUMMARY

The City of Salinas Safe Routes to Schools Plan describes community-identified needs and recommendations to be considered for infrastructure projects and programs that support walking, bicycling, and carpooling to 45 schools in Salinas. The plan also identifies possible funding sources and implementation priorities. The recommendations in this plan are aimed at supporting a healthy community, improving affordable transportation options for low-income and vulnerable residents, and helping the City of Salinas achieve its Vision Zero goal and statewide goals to address climate change by reducing vehicle miles traveled.

This plan was funded with a Sustainable Communities Transportation Planning Grant from the California Department of Transportation (Caltrans) and Measure X local matching funds, and it is aligned with the regional and statewide plans and concepts that are included in the Caltrans District 5 Active Transportation Plan.

PLAN CONTENTS_

Chapter 1: Introduction. The first chapter describes the purpose of the plan, the benefits of walking and biking to school, and the plan's relationship to other local planning efforts.

Chapter 2: Existing Conditions. This chapter outlines current conditions in the City of Salinas, including community demographics, commute trends, existing bicycle and pedestrian facilities, existing transit services, collision data, and current projects and programs.

Chapter 3: Outreach. The third chapter describes the public outreach process. It also includes community survey data from the two temporary infrastructure demonstrations that were installed as part of the planning process.

Chapter 4: Citywide Infrastructure and Program

Recommendations. This chapter includes goals related to walking, bicycling, and carpooling to school in Salinas and the process of developing the recommendations in this plan. It also contains recommendations that affect multiple schools, including the network of citywide routes that are recommended for future improvements, streets that have been identified as Safe Routes to Schools corridors, and programmatic recommendations that address education, encouragement, engagement, and equity.

Chapter 5: School Profiles. This chapter contains profiles of each of the 45 school sites, with information on the existing conditions at each school and infrastructure recommendations to make it easier and safer to walk and bike to school. It also includes a guide to the types of infrastructure that are recommended in this plan.

Chapter 6: Implementation and Maintenance. The final chapter discusses opportunities to fund and construct the recommended projects and programs and provides a high-priority project list. It also includes a list of funding sources that the City of Salinas can use to finance the recommended projects and programs, and the methods the City will use to maintain current and future pedestrian and bicycle infrastructure.

Appendices: The appendices include outreach materials, survey data from the parent survey and the temporary installations, the complete project list for all 45 schools, and public comments received for all school sites.

PLAN GOALS

ENCOURAGEMENT:

The majority of children will arrive at school by foot, bicycle, scooter, skateboard, bus, or carpool

Zero collisions involving bikes or pedestrians that result in injury or death

DUCATION:

All children in Salinas will receive traffic safety education

ENGAGEMENT:

Engage the greater community to create safe environments around schools

Ensure all community members have equitable access to schools and Safe Routes to Schools programming

GOALS AND OBJECTIVES

The City of Salinas and partner agencies have set the following goals and objectives for the future of Safe Routes to Schools, to be accomplished through the projects and programs in this plan.

Goal 1. Encouragement: The majority of children will arrive at school by foot, bicycle, scooter, skateboard, bus, or carpool.

- Objective 1.1: Identify and promote a broad spectrum of projects to provide a connected network of active transportation options along Safe Routes to Schools corridors and connections.
- Objective 1.2: Design and construct street improvements that are accessible and comfortable for all ages and abilities. Incorporate tree planting into active transportation projects to provide shade for people who are walking and bicycling and address City goals for increasing the urban tree canopy.
- Objective 1.3: Transportation Agency for Monterey County (TAMC), schools, and the City will support events that encourage active transportation to school, such as "Walk & Roll to School," at least twice each year.
- Objective 1.4: Work with schools and Safe Routes to Schools partners to provide walking school buses at all elementary schools.
- Objective 1.5: Work with schools and Safe Routes to Schools partners to promote Safe Routes to Schools corridors as the preferred routes to school.

Goal 2. Safety: Zero collisions involving bikes or pedestrians that result in injury or death

- Objective 2.1: Prioritize Safe Routes to Schools projects that address fatal and severeinjury crashes.
- Objective 2.2: Enhance low-stress route alternatives to high-stress corridors.
- Objective 2.3: Prioritize safety over travel delays, speed, congestion, and convenience in project design.
- Objective 2.4: Crossing guards will be present at all elementary schools.

Goal 3. Education: All children in Salinas will receive traffic safety education

- Objective 3.1: Incorporate bicycle and pedestrian safety education into the curriculum in all elementary schools.
- Objective 3.2: By second grade, all children will receive pedestrian safety training in school; by fifth grade, all children will receive bike safety training in school.
- Objective 3.3: By high school, students will know the basics of bike maintenance and have opportunities to practice these skills at school or in the community.

Goal 4. Engagement: Engage the greater community to create safe environments around schools

- Objective 4.1: Run annual community-wide campaigns that encourage neighbors to keep eyes on the streets and drivers to reduce speeds around schools.
- Objective 4.2: Enforce traffic laws in school zones without overburdening offenders. One example would be a diversion program that requires school zone traffic offenders to assist with crossing guard duties (Austin, TX program model).
- Objective 4.3: Recruit volunteers from the community to assist with Safe Routes to Schools programs such as walking school buses and crossing guards.

Goal 5. Equity: Ensure all community members have equitable access to schools and Safe Routes to Schools programming.

- Objective 5.1: Prioritize infrastructure projects that will serve transportationdisadvantaged and special-needs populations.
- Objective 5.2: Provide opportunities for a diverse group of community members to take leadership roles in the development and implementation of Safe Routes to Schools projects and programs. An example would be participation in a Safe Routes to Schools steering committee.
- Objective 5.3: Provide access to active transportation and safety equipment such as bicycles, scooters, helmets, and lights.

OUTREACH SUMMARY.

Public input was the foundation of the process for creating the Safe Routes to Schools Plan. The planning team developed an outreach plan and sought input from community members to understand school transportation needs and barriers and refine the draft recommendations. Parent and student surveys, presentations at parent meetings, and walking audits with school staff all contributed input on the barriers to walking and biking to schools in Salinas and the types of improvements that community members would like to see.

Parent Outreach

- 140 presentations at virtual parent meetings.
- 2,425 responses to online parent survey
- 1,341 responses to draft recommendations survey
- 35,000+ parents reached through Parentsquare or social media

Student Outreach

- 474 responses to student survey
- 17 elementary schools distributed a traffic-safety scavenger hunt activity to students.

Temporary Installations

2 demonstration projects on East Alisal Street and McKinnon Street

SUMMARY OF RECOMMENDATIONS

The recommendations for the 45 school sites in Salinas include the following. All recommendations require additional planning and feasibility evaluation.

- 10 miles of Class IV separated bikeway
- 15.8 miles of bicycle boulevards
- 17 roundabouts
- 13 rectangular rapid flashing beacons
- 180 intersections upgraded to high-visibility crosswalks

Class III Bike Boulevard

Class IV separated bikeway

High-visibility Crosswalks

CITYWIDE CORRIDOR **RECOMMENDATIONS**

The map on page 17 shows existing bicycle and pedestrian facilities along with recommendations for bicycle and pedestrian corridor improvements throughout the City of Salinas. A description of each facility type can be found below.

BIKE BOULEVARD

Streets with traffic speed and volume management, designed to create low-stress conditions. In ideal conditions, cyclists share the road with motor vehicles. Bike boulevards manage speeds and volumes using traffic-calming features like diverters, medians, chicanes, and traffic circles. Bike boulevards are usually marked by signs and "sharrows" and may include branding and wayfinding signs to local destinations and other low-stress routes.

CLASS I SHARED-USE PATH

Paved rights-of-way that are completely separated from streets where motor vehicle traffic is prohibited. Shared-use paths are designed for people who are using wheelchairs, walking, bicycling, or skateboarding, or taking other forms of active transportation. Bike paths should offer opportunities not provided by the road system, such as recreational opportunities or direct high-speed commute routes if crossflow by motor vehicles and pedestrian conflicts can be minimized. The most common applications for shared-use paths are along waterfronts, canals, utility rights-of-way, abandoned railroad rights-of-way, within school campuses, and within and between parks. There may also be situations in which such facilities can be provided as part of planned developments.

CLASS II BICYCLE LANE

On-street facilities that use striping and stencils to designate space for bicycle travel. Bike lanes are intended to delineate the right-of-way assigned to bicyclists and motorists and to provide for more predictable movements by each user. A more important reason for constructing bike lanes is to better accommodate bicyclists through corridors where there is not sufficient room for side-by-side sharing of streets by motorists and bicyclists. This can be accomplished by reducing the number of lanes, reducing lane width, or prohibiting or reconfiguring parking to delineate bike lanes. In addition, other things can be done on streets with bike lanes to improve the situation for bicyclists that might not be possible on all streets (e.g., improvements to the surface, augmented sweeping programs, special signal facilities). In general, pavement markings alone will not measurably improve bicycling conditions.

CLASS IIB BUFFERED BICYCLE LANE

Buffered bike lanes are conventional bicycle lanes paired with designated buffer spaces separating them from adjacent motor vehicle travel lanes or parking lanes. Buffered bike lanes provide a greater distance between bicyclists and motor vehicle traffic and space for bicyclists to pass each other without encroaching into the motor vehicle lane. Buffered bike lanes appeal to a wider cross-section of users and abilities than conventional bike lanes.

CLASS III BICYCLE ROUTE

Routes designated for bicycle travel, with shared-use pavement markings, that are shared with motor vehicles. Shared lane markings help bicyclists with lateral positioning to reduce their chances of hitting the open door of a parked vehicle, to alert road users of the locations bicyclists are likely to occupy in the roadway, and to encourage safe passing of bicyclists by motorists. Shared-use markings are only feasible on streets with speed limits of 35 mph or less. Bike routes are identified through signage and shared-lane bicycle markings or "sharrows."

CLASS IV CYCLE TRACK

Class IV facilities are protected bike facilities designated for the exclusive use of bicyclists. Cycle tracks are bike facilities separated from motor vehicle traffic by a physical barrier and are distinct from sidewalk and pedestrian areas. Cycle tracks may be one-way or two-way, and may be at street level, at sidewalk level, or at an intermediate level. If at sidewalk level, a curb or median separates them from motor vehicle traffic, and different pavement colors or textures separate them from the sidewalk. If at street level, they can be separated from motor vehicle traffic by raised curbs or barriers. By separating cyclists from motor vehicle traffic, cycle tracks can offer greater security than bike lanes and are attractive to a wider spectrum of the public. However, cycle tracks can constrain the bikeway and limit the ability of bicyclists to pass each other.

Citywide Corridor Recommendations

Class II or Bike Boulevard

- - Class IIB Buffered

- - Class IIB or Class IV

- - Class III Bike Route

Class IV Separated

Bikeway

- - - Class IV or Class I

SAFE ROUTES TO SCHOOLS CORRIDORS

Safe Routes to Schools corridors are streets that have been identified as key routes to Salinas schools. These streets may be good candidates for corridor-level improvements in the future to slow traffic speeds, improve intersections and crossings, and create a safe and comfortable environment for students to walk to school. Class I shared-use paths are completely separated from motor vehicles and offer the most comfortable environment for walking and biking. Existing and recommended shared-use paths are highlighted as Safe Routes to Schools corridors in the map below.

Safe Routes to Schools Corridors

- - Recommended Safe Routes to Schools Corridor
- - Recommended Class I Shared Use Path
- Existing Class I Shared Use Path

PROJECT PRIORITIZATION

This prioritized project list is meant to help decisionmakers and City staff prioritize projects and identify the most competitive projects for various grant funding opportunities. The recommended projects were evaluated using five criteria that are aligned with the vision and goals of this plan and with common grant application criteria. Equity scores are based on the Healthy Places Index map, which shows data on health indicators such as education, income, transportation, and housing. Each project was assigned a number from 0 to 100 based on the criteria in Table 1.

Table 1: Criteria for Project Prioritization

| CRITERIA | DESCRIPTION | MAXIMUM POINTS | |
|---|---|-------------------|--|
| Safety | The following points are awarded for bicycle and pedestrian collisions in the last 5 years within 150 ft of the project, for a max score of 30 points: 5 points per fatal collision 7 points per severe-injury collision 1 point per complaint-of-pain collision | 30 | |
| Access to Key Destinations | 10 points for every school and 5 points for every park, library, and recreation center within 500 ft of the project, for a max of 15 points. | 15 | |
| Connectivity and Low Stress Network | 15 points if the project closes a gap in the existing bicycle or pedestrian network or upgrades an existing facility to a class IV bikeway or class I path. | 15 | |
| | 20 points if the project is located within an area designated as <10% most disadvantaged. | | |
| Equity | 10 points if the project is located within an area designated as 10%–25% most disadvantaged. | 20 | |
| | 0 points if the project is not located in a disadvantaged area (>25%). | | |
| Community- | 20 points if the project or location was identified by members of the community during project outreach. 10 points if the project or location was identified in one or more community planning documents. | | |
| Identified Need | | | |
| | Total | 100 | |

PRIORITIZED PROJECT LIST ____

The table below shows the top ten high-priority projects for the City of Salinas. The full project list, including project prioritization scoring, can be found in Appendix E. Tables 3 and 4 show the highest-scoring projects in the small and medium project categories as defined by the California Active Transportation Program, which is one of the primary grant funding sources for active transportation projects.

Table 2: High-Priority Project List

| RANK | SCHOOL | PROJECT NO. | RECOMMENDATION | STREET | CROSS ST 1 | CROSS ST 2 | TOTAL | EST. COST |
|------|--|------------------|---|----------------------|------------------|-------------------|-------|--------------|
| 1 | Sherwood Elementary/El Sausal Middle | SE013/ ESM001 | Consider protected pedestrian phases at Alisal/Woods, Alisal/Madeira, and Alisal/Hebbron. Install high-visibility crosswalks and protected bike lanes as outlined in Alisal Vibrancy Plan*. Remove on-street parking in front of El Sausal, and shift bus drop-off from Towt to Alisal. | E Alisal St | Kern St | Skyway Blvd | 100 | \$2,717,020 |
| 2 | Dr. Martin Luther King Jr. Elementary/ Jesse G. Sanchez Elementary | MLKA008 | Short term: Install Class II bike lanes between Laurel and Del Monte. Long term: Widen sidewalk to create multi-use path from Laurel to Garner. Install bike-conflict markings at recreation center entrance and exit driveways. Install raised median with pedestrian refuge islands. | Sanborn Rd | Del Monte Ave | Laurel Dr | 90 | \$1,799,520 |
| 3 | Carr Lake Community Day/Mount Toro High/El Puente | CLCD005 | Consolidate bike lanes to one side of the road for a two-way cycle track or multi-use path. Upgrade bike lanes on Natividad between Bernal and Boronda to Class IV separated bikeways and install protected intersection treatments at Bernal to facilitate transition to cycle track. | Sherwood Dr | Bernal St | Rossi St | 86 | \$12,541,180 |
| 4 | Creekside Elementary | CE016 | Upgrade Class II bike lane to Class IV. | Constitution Blvd | Boronda Rd | Indepen- dence | 85 | \$5,458,680 |

^{*}Further planning and feasibility evaluation of the Alisal Vibrancy Plan is currently underway. The final preferred alternative for E Alisal Street has not been determined.

CHAPTER 1 INTRODUCTION

The City of Salinas Safe Routes to

Schools Plan describes community-identified needs and recommendations for infrastructure projects and programs that support walking, bicycling, and carpooling to 45 schools in Salinas. The plan also identifies possible funding sources and implementation priorities. The recommendations in this plan are aimed at supporting a healthy community, improving affordable transportation options for low-income and vulnerable residents, and helping the City of Salinas achieve its Vision Zero goal and statewide goals to address climate change by reducing vehicle miles traveled.

Public input was the foundation of the planning process to identify transportation needs and opportunities. The recommendations in this plan were developed exclusively through engagement with school staff, parents, and other stakeholders. The recommendations in this report are a reflection of the community outreach. All of the recommendations in this report require additional planning and evaluation to determine if they are appropriate and feasible.

This plan was funded with a Sustainable
Communities Transportation Planning Grant
from the California Department of Transportation
(Caltrans) and Measure X local matching funds, and
it is aligned with the regional and statewide plans
and concepts that are included in the Caltrans
District 5 Active Transportation Plan. Some of the
recommended improvement opportunities are

within Caltrans's right of way, and as the owner and operator of the state highway system, Caltrans will require further analysis of these planning-level concepts and final approval if the City of Salinas seeks implementation.

BENEFITS OF SAFE ROUTES TO SCHOOLS

The simple act of traveling to school can have a tremendous positive impact on the health of students and families. Salinas faces challenges from traffic around schools, youth obesity rates, and collisions involving youths who are walking or bicycling. More carpooling and active-transportation¹ trips will provide the following benefits:

- Healthier students: Walking or riding a bike, scooter, or skateboard to school is good exercise, improves fitness, and has been demonstrated to improve academic performance.
- <u>Safer trips</u>: Shifting trips to walking, biking, or carpooling reduces traffic congestion and increases safety.
- Lower transportation costs: Carpooling, walking, and biking provide low- or no-cost alternatives to driving.
- Cleaner air and environment: Transportation is the largest source of greenhouse gas emissions in California.² Shifting car trips to walking and biking improves air quality around schools and helps our planet.

¹ Active-transportation trips are any trips made by human-powered transporation, including walking, bicycling, and riding scooters and skateboards.

² California Air Resources Board: https://ww2.arb.ca.gov/ghg-inventory-data.

VISION ZERO

Vision Zero is a strategy for eliminating severe traffic injuries and fatalities while increasing safe, healthy, and equitable mobility, and it has been implemented in cities around the world. Vision Zero starts with the belief that traffic deaths are preventable and brings together traffic engineers, policymakers, and public health professionals to work toward engineering and enforcement solutions. The Salinas City Council adopted a Vision Zero policy in 2020 and adopted a Vision Zero Action Plan in 2021. The action plan identifies the city streets with the highest concentrations of fatal and severe-injury collisions, and actions that can be taken to reduce those. Learn more here:

https://www.cityofsalinas.org/our-city-services/public-works/current-projects/vision-zero

THE SIX E'S OF SAFE ROUTES TO SCHOOLS

This plan's recommendations are grouped into the Six E's of Safe Routes to Schools, as defined by the Safe Routes Partnership. The Six E's are a nationally recognized framework for increasing walking and biking to schools.

- **Engagement**: Start the process of developing Safe Routes to Schools initiatives by listening to families, students, teachers, and other community members, and include ongoing opportunities for participation in program structures.
- **Equity**: Ensure that Safe Routes to Schools initiatives benefit everyone, with particular attention to low-income students, students of color, students with disabilities, and other transportation-disadvantaged populations.
- Engineering: Make physical improvements to streets and neighborhoods that improve traffic flow near schools and make walking and biking safer, more comfortable, and more convenient.
- **Education**: Provide students and families with the skills to get to school safely, and inform them on the wide range of transportation options.
- **Encouragement**: Provide events, activities, and programs that raise awareness and build support for safe and healthy transportation such as walking and biking.
- **Evaluation**: Regularly assess which approaches to Safe Routes to Schools are more and less successful.

RELATIONSHIP TO OTHER PLANS.

As part of the development of this Safe Routes to Schools Plan, other relevant plans were consulted to ensure consistency with their recommendations. Consistency with these plans is discussed below.

2022 MONTEREY COUNTY REGIONAL TRANSPORTATION PLAN

The 2022 Regional Transportation Plan (RTP) was produced by the Transportation Agency for Monterey County (TAMC). The RTP identifies transportation needs for the county, estimates the available funding through 2045, and sets goals for the future of our transportation system. This Safe Routes to Schools Plan is aligned with the vision and goals of the RTP, including access and mobility, safety and health, and equity.

MONTEREY COUNTY ACTIVE TRANSPORTATION PLAN (ATP)

The 2018 Monterey County ATP, developed by TAMC, identifies gaps in the bicycle and pedestrian network and areas of opportunity for improving the design of bicycle facilities. The ATP is used to pursue grant funding for bicycle and pedestrian projects and to prioritize projects that are funded through Measure X, the Monterey County transportation sales tax measure.

The Safe Routes to Schools Plan aligns with the goals of the ATP, including increased active-transportation trips, improved safety for people who are walking and biking, and equitable access to active-transportation facilities. The ATP project list was reviewed during the development of this plan, and some ATP projects were incorporated into the project list.

CITY OF SALINAS GENERAL PLAN

The Safe Routes to Schools Plan is aligned with the goals of the 2002 General Plan, including the goal of providing a safe and extensive bicycle network and providing safe routes to schools and other destinations for people who are walking. The City of Salinas is currently updating its general plan, and the updated plan will be released after the completion of this Safe Routes to Schools Plan. The recommendations of the Safe Routes to Schools Plan support the guiding principles for the updated general plan as described in Visión Salinas, including goals for connectivity, access, and mobility.

SALINAS BIKEWAYS PLAN

The 2002 Bikeways Plan describes existing and proposed bicycle facilities within the city, some of which have been installed since the plan was published. Although the TAMC Active Transportation Plan has updated the proposed bicycle network, the Bikeways Plan was also reviewed and used for context during the development of this Safe Routes to Schools Plan.

SALINAS CROSSWALK POLICY GUIDELINES

The Salinas Crosswalk Policy provides a methodology for responding to crosswalk requests and lays out the criteria for the installation of a marked crosswalk. It also includes a toolbox of treatments that can be used to enhance crosswalks. All the recommendations for new marked crosswalks in this plan require further analysis and must meet the guidelines of the crosswalk policy in order to be installed.

SALINAS NEIGHBORHOOD TRAFFIC MANAGEMENT PROGRAM

The Neighborhood Traffic Management Program sets policies for traffic calming in residential neighborhoods and lays out the process for residents to request traffic-calming treatments in their neighborhoods. Neighborhood support and cost-sharing are required for new traffic-calming measures to be installed. The document also includes a toolbox of approved traffic-calming measures. The traffic-calming measures recommended in this Safe Routes to Schools Plan are aligned with the approved measures from the Neighborhood Traffic Management Program. Learn more here: https://www.cityofsalinas.org/our-city-services/public-works/current-projects/traffic-calming

SALINAS PEDESTRIAN PLAN

The 2004 Pedestrian Plan outlines goals and strategies for improving walkability in Salinas and reducing collisions with people who are walking. The proposed walking districts and project list were reviewed and used for context during development of this Safe Routes to Schools Plan.

SPECIFIC AREA AND NEIGHBORHOOD PLANS

Specific plans for various areas of the city were reviewed during the preparation of the Safe Routes to Schools Plan, and relevant bicycle and pedestrian projects were incorporated into the plan's project list. The plans reviewed included the following:

- Alisal Vibrancy Plan
- Central Area Specific Plan
- Downtown Vibrancy Plan
- East Alisal Street Corridor Plan
- Salinas Bike Lane VMT Banking Projects
- Urban Greening Plan
- West Area Specific Plan

COORDINATION WITH NEIGHBORING JURISDICTIONS

The City of Salinas Safe Routes to Schools Plan includes recommendations for roadways in unincorporated Monterey County. All recommendations for county roadways were reviewed with County staff.

CHAPTER 2 EXISTING CONDITIONS

This chapter discusses current conditions in Salinas related to walking, bicycling, and transit use. This includes citywide demographics and commute trends, land use and community destinations, existing bicycle and pedestrian facilities, current transit options, collision data related to walking and bicycling, bicycle and pedestrian projects that are currently in progress, and existing programs.

DEMOGRAPHICS

Salinas is the largest city in the Monterey Bay region and was home to an estimated 160,206 residents in 2021. The city has a large youth population, with 31% of residents being under the age of 18.2 Seniors represent a smaller proportion of city residents, with 9% of residents being over the age of 65.2 The median age of the residents is 30.5, which is lower than the median age for Monterey County as a whole.²

Among Salinas residents, 13% identify as white, 80% as Hispanic or Latino, and 6% as Asian. Forty-one percent of residents did not finish high school, and 23% completed high school as their highest level of education. About one-third of residents have at least some higher education, and 13% have either a bachelor's or a graduate degree.2

Active transportation investments are especially important in disadvantaged communities, which tend to have higher rates of walking and bicycling. According to the California Department of Education, 81% of students in Salinas public

schools qualify for free and reduced meals, which is a sign of low-income status.3 Thirty-nine percent of households have incomes of less than \$50,000 per year, and 20% of families with children under the age of 18 have incomes below the poverty level.4

COMMUTE TRENDS

An estimated 67,399 Salinas residents over the age of 16 are employed, and nearly three-quarters of those drive to work alone. Salinas has a higher rate of driving to work alone than the neighboring City of Monterey but a similar rate to Monterey County as a whole.5

Overall, 10% of Salinas residents carpool to work, and 1.1% walk to work. Fewer than 1% bike to work or take public transit. Before the covid-19 pandemic, nearly 3% of residents worked from home, and that number is assumed to have increased since 2020.5

Although some Salinas commuters travel outside Monterey County for work, the majority (91%) stay within the county for their work trips. The average commute time to places of employment for Salinas residents is 24 minutes. Twenty-six percent of commuters travel for more than 30 minutes daily, and 10% of commuters travel for 45 minutes or more.5

Although commute trips offer the best available data on travel modes, they represent only a percentage of trips. Comprehensive data on the percentage of Salinas residents walking or bicycling for other daily trips are not available.

LAND USE AND COMMUNITY DESTINATIONS

Public K–12 schools are located throughout the City of Salinas, and there are several colleges and universities within the city. Commercial areas are located along North Main Street, East Alisal Street, and Sanborn Road, and in the historic downtown. Other key destinations include parks and recreation centers, libraries, transit centers, and medical facilities.

EXISTING BICYCLE NETWORK

There are currently four types of bicycle facilities in Salinas: Class I shared-use paths, Class II bicycle lanes, Class IIB buffered bike lanes, and Class IV separated bikeways. Other streets have been designated as Class III bicycle routes or regional routes. See below for definitions of each type of bicycle facility.

CLASS I SHARED-USE PATH

Paved rights-of-way that are completely separated from streets, and where motor vehicle traffic is prohibited. Shared-use paths are designed for people who are using wheelchairs, walking, bicycling, or skateboarding, or taking other forms of active transportation. Bike paths should offer opportunities not provided by the road system, such as recreational opportunities or direct high-speed commute routes if cross-flow by motor vehicles and pedestrian conflicts can be minimized. The most common applications for shared-use paths are along waterfronts, canals, utility rights-of-way, and abandoned railroad rights-of-way, within school campuses, and within and between parks. There may also be situations in which such facilities can be provided as part of planned developments.

CLASS II BICYCLE LANE

On-street facilities that use striping and stencils to designate space for bicycle travel. Bike lanes are intended to delineate the rights-of-way assigned to bicyclists and motorists and to provide for more predictable movements by each user. A more important reason for constructing bike lanes is to better accommodate bicyclists in corridors where there is insufficient room for sideby-side sharing of streets by motorists and bicyclists. This can be accomplished by reducing the number of lanes, reducing lane width, or prohibiting or reconfiguring parking to delineate bike lanes. In addition, other things can be done on streets with bike lanes to improve the situation for bicyclists that might not be possible on all streets (e.g., improvements to the surface, augmented sweeping programs, special signal facilities). In general, pavement markings alone do not measurably enhance bicycling conditions.

CLASS IIB BUFFERED BICYCLE LANE

Buffered bike lanes are conventional bicycle lanes paired with designated buffer spaces separating them from adjacent motor vehicle travel lanes or parking lanes. Buffered bike lanes provide a greater distance between bicyclists and motor vehicle traffic and space for bicyclists to pass each other without encroaching on the vehicle lane. Buffered bike lanes appeal to a wider cross-section of users and abilities than conventional bike lanes.

CLASS III BICYCLE ROUTE

Routes designated for bicycle travel, with shared-use pavement markings, that are shared with motor vehicles. Shared-lane markings help bicyclists with lateral positioning to reduce their chances of hitting the open door of a parked vehicle, to alert road users to the locations bicyclists are likely to occupy in the roadway, and to encourage safe passing of bicyclists by motorists. Shareduse markings are only feasible on streets with speed limits of 35 mph or less. Bike routes are identified with signage and sharedlane bicycle markings or "sharrows."

CLASS IV CYCLE TRACK

Class IV facilities are protected facilities designated for the exclusive use of bicyclists. Cycle tracks are separated from motor vehicle traffic by a physical barrier and are distinct from sidewalk and pedestrian areas. Cycle tracks may be one-way or two-way, and may be at street level, at sidewalk level, or at an intermediate level. If at sidewalk level, a curb or median separates them from motor vehicle traffic, and different pavement colors or textures separate them from sidewalks. If at street level, they can be separated from motor vehicle traffic by raised curbs or barriers. By separating cyclists from motor vehicle traffic, cycle tracks offer greater security than bike lanes and are attractive to a wider spectrum of the public. However, cycle tracks can constrain bikeways and limit the ability of bicyclists to pass each other.

REGIONAL BIKE ROUTES

The Transportation Agency for Monterey County (TAMC) developed a Pedestrian and Bicyclist Wayfinding Plan for Monterey County in 2016, which identified a network of regional bicycle routes. Regional routes connect key destinations within the county and either currently have Class I, Class II, or Class III bicycle facilities, or are planned to have bicycle facilities in the future.

Class I shared-use paths in Salinas are mostly located within parks and open spaces, including the Rossi Rico Linear Parkway, Cesar Chavez Community Park, Constitution Soccer Complex, Natividad Creek Community Park, and the Gabilan Creek Wilderness Sanctuary. There are also several short connectors, such as the path connecting North Salinas High School with Chaparral Street and paths adjacent to East Market Street between Front Street and Sherwood Drive. The Creekbridge neighborhood is especially well-served by Class I paths, with four paths connecting schools, parks, and wilderness areas.

Class II bicycle lanes are located primarily on arterial streets, including Boronda Road, McKinnon Street, Independence Boulevard, Davis Road, and Blanco Road. Over the last five years, the City of Salinas has also installed buffered bicycle lanes on several streets, including Alvin Drive, Linwood Drive, East Rossi Street, John Street, Bardin Road, Constitution Boulevard, portions of Sherwood Drive, Monte Bella Boulevard, Blanco Road, Boronda Road, and East Alisal Street. The City also installed the first parking separated Class IV separated bikeway on East Market Street in front of Fremont Elementary in 2017.

Class III bicycle routes in Salinas have been identified primarily for wayfinding purposes to guide people on bikes to preferred routes when there are no streets with bicycle lanes. Many streets near schools, including Acacia Street, Towt Street, Las Casitas Drive, and Van Buren Avenue, have been identified as bicycle routes.

EXISTING PEDESTRIAN NETWORK

The City of Salinas has good sidewalk coverage, with sidewalk present on nearly all roadways. There is missing sidewalk on some roadways on the edge or outside of city limits, such as East Blanco Road between North Main Street and Blanco Circle, Natividad Road north of Boronda Road, and San Juan Grade Road north of Boronda Road. Natividad Road and San Juan Grade Road have seen increased pedestrian traffic since the construction of Rancho San Juan High School, which is located on the northern edge of Salinas city limits.

The City of Salinas conducted a sidewalk conditions analysis in 2017 to determine whether existing sidewalks met Americans with Disabilities Act (ADA) standards. Factors such as obstructions, vegetation, and slope were used to score each segment of sidewalk, and these data were used to prioritize sidewalk repair projects.

Curb ramps provide access between the sidewalk and the street for people with disabilities, children on bicycles, and people pushing strollers. Under the ADA, upgraded curb ramps must include warnings that are detectable by people with vision impairments. As the City repaves streets and installs roadway improvements, upgraded curb ramps are installed at intersections to comply with ADA standards.

In addition to sidewalks, Salinas contains 8.2 miles of Class I shared-use paths. These paths are mostly located in parks and open spaces, including the Rossi Rico Linear Parkway, Cesar Chavez Community Park, Constitution Soccer Complex, Natividad Creek Community Park, and the Gabilan Creek Wilderness Sanctuary. There are also several short connectors, such as the path connecting North Salinas High School with Chaparral Street and paths adjacent to East Market Street between Front Street and Sherwood Drive. The Creekbridge neighborhood is especially well-served by Class I paths, with four paths connecting schools, parks, and wilderness areas.

EXISTING TRANSIT SERVICES_

Each of the four school districts in Salinas has a different policy on school busing, though all the districts provide transportation for students with disabilities.

Salinas Union High School District (SUHSD) offers busing to students who live more than two miles away from their home school, including service to rural areas outside Salinas. Regular service is offered to all SUHSD schools except for La Paz Middle, where all students lived within two miles of the school as of the 2021-22 school year.

Salinas City Unified School District offers bus transportation for students who live more than 1.25 miles from school. El Gabilan, Kamman, Laurel Wood, Lincoln, Mission Park, and Sherwood Elementary Schools are not served by regular bus routes because all students at those schools lived within the 1.25-mile boundary during the 2021-22 school year.

Santa Rita Union School District offers bus service to all students in grades K-3 who live more than 0.75 miles from school, and all students in grades 4–8 who live more than one mile from their school. Bus routes serve all Santa Rita schools except Santa Rita Elementary, where all students live within one mile of the school. Routes include service to rural neighborhoods north and east of the Bolsa Knolls neighborhood.

Alisal Union Elementary School District provides transportation to students in grades K-3 who live at least one mile from their school, and to all students in grades 4-6 who live at least 1.5 miles from school.

In addition to transportation offered by school districts, Monterey-Salinas Transit offers bus transportation to the public, including some students traveling to school in Salinas. Youths aged 18 and younger receive discounted fares for all trips. In summer 2022, bus routes included service to about half of the middle and high schools. Rancho San Juan High School, Gutierrez Middle School, Gavilan View Middle School, Mount Toro High School, El Puente, Carr Lake Community Day School, and Washington Middle were not served directly by MST routes.

ACTIVE TRANSPORTATION SAFETY

Bicycle and pedestrian-related collision data can be used to identify high-level collision trends and locations with high rates of bicycle and pedestrian collisions. This analysis uses data from UC Berkeley's Transportation Injury Mapping System (TIMS) over the ten-year period from 1/1/2010 to 12/31/2019. It is important to note that the TIMS data include reported injury collisions only. Many bicycle and pedestrian collisions are not reported and therefore are not represented in this analysis.

Salinas has high rates of collisions involving both bicyclists and pedestrians, with 554 pedestrian collisions and 385 bicyclist collisions between 2010 and 2019.⁶ In the 2018 California Office of Traffic Safety crash rankings report, Salinas ranked among the top ten for pedestrian collisions and third-worst for pedestrian collisions involving youths under 15, among cities of similar size.⁷ Salinas also ranked in the top ten for bicycle collisions involving youths under 15 and was one of the top five cities for alcohol-related collisions, again in comparison to cities of a similar size.⁷

People walking and bicycling in Salinas are disproportionately involved in collisions relative to people who are driving. Data from the Salinas Vision Zero Action Plan show that between 2009 and 2018, 38% of serious-injury and fatality collisions in Salinas involved pedestrians and 11% involved bicyclists. This is disproportionate to walking and biking rates in the city; less than 2% of work trips are made by walking or bicycling. Youth in Salinas are also disproportionately involved in collisions while walking and biking. Youths aged 19 or younger are involved in 36% of pedestrian and bicycle collisions.

In response to these high collision rates, the Salinas City Council adopted a Vision Zero policy in 2020 and developed a Vision Zero Action Plan later that year. The action plan identifies the city streets with the highest concentrations of fatal and severe-injury collisions and actions that can be taken to reduce those collisions. Vision Zero is a strategy for eliminating severe traffic injuries and fatalities while increasing safe, healthy, and equitable mobility, and brings together traffic engineers, policymakers, and public health professionals to work toward education, engineering, and enforcement solutions.

⁹ Census American Community Survey 2015–2019 Commuting Characteristics by Sex, Table SO801.

PEDESTRIAN SAFETY

Over the ten-year study period, there were 554 pedestrian collisions in Salinas, with an average of 55 per year. The number increased to 76 in 2018, but the upward trend did not continue in 2019. There were 37 fatal pedestrian collisions in the tenyear period. One hundred collisions caused severe injuries, 228 resulted in some "other visible injury," and 189 resulted in a "complaint of pain."

 $\bar{}$ City Limits

PEDESTRIAN COLLISION TRENDS

Pedestrian collision locations are shown in Map 3. Key takeaways of the analysis include the following:

- 46% of fatality collisions in Salinas involved people walking, though only 12% of collisions in total involved pedestrians. Pedestrians are more likely to be killed in collisions than people who are driving.
- 36% of pedestrian collisions involve youths **aged 19 or younger**. People in this age group were more than twice as likely to be involved in a pedestrian collision as people in their 20s. Twenty-two percent of collisions involved youths under 14.
- North Main Street was the location with the most pedestrian collisions, with 10% of all pedestrian collisions occurring on North Main Street. East Market Street and North Sanborn Road were the second- and third-most common pedestrian collision locations.

- North Main Street was the top locations for fatal pedestrian collisions, followed by East Laurel Drive and Highway 101.
- The most common type of violation, according to the reporting law enforcement officer, was driver failure to yield to pedestrians at a marked or unmarked crosswalk, which accounted for 40% of all collisions. The second most common violation was pedestrian failure to yield rightof-way to vehicles when crossing outside of a marked or unmarked crosswalk, which accounted for 30% of collisions. The third most common violation was driver speed, which accounted for 3% of collisions.

Figure 3. Severity of Pedestrian Collisions

Existing Conditions // 44

BICYCLE SAFETY

Over the ten-year study period, there were 385 bicycle-related injury collisions in Salinas, with an average of 38 collisions per year. The number of collisions increased to 61 in 2013, but this trend did not continue in subsequent years. In 2018, the number of bicycle-involved collisions increased again, and more data monitoring will be needed to see whether this trend continues.

There were five fatal bicycle collisions within the ten-year period. Thirty-eight collisions caused severe injuries, 179 resulted in an "other visible injury," and 163 resulted in a "complaint of pain."

Figure 4. Severity of Bicycle Collisions

BICYCLE COLLISION TRENDS

Bicycle-related collision locations are shown in Map 4. Key takeaways from the analysis include the following:

- 11% of collisions resulting in severe injury or fatality in Salinas involved people on bikes. Although bicycle trips make up only a small percentage of the trips in Salinas, cyclists are disproportionally involved in severe-injury and fatal collisions.
- North Main Street was the location with the most bicycle-related collisions, with 15% of collisions taking place on this major arterial street, East Alisal Street and East Market Street were the second and third most common collision locations.
- The top five streets for bicycle collisions were all major arterials that did not have complete bicycle lanes in 2019. Thirty percent of collisions took place on these five streets: North Main Street, East Alisal Street, East Market Street, John Street, and East Alvin Drive.
- Youths aged 19 or younger were involved in **36% of bicycle collisions**. Youths aged 15–19 were the top age group for bicycle collisions and were involved in 21% of collisions. Male cyclists were much more likely to be involved in collisions and made up 73% of crash victims.
- The three most common bicycle collision factors, according to the reporting law enforcement officer, were riding or driving on the wrong side of the road (37%), automobile right-of-way violations (21%), and traffic signals and signs (13%).

Bicycle Collisions, 2010 - 2019

CURRENT AND RECENTLY COMPLETED PROJECTS

There are several major projects that have been completed recently or are underway to provide new bicycle and pedestrian facilities in Salinas. The City of Salinas continues to apply for and be awarded grant funding for Safe Routes to Schools improvements.

ALVIN DRIVE/LINWOOD DRIVE SAFE ROUTES TO SCHOOLS PROJECT

The City of Salinas received a grant to make improvements along the Alvin Drive and Linwood Drive corridors, which are routes to four schools. On Alvin Drive, the project included reducing the number of vehicle lanes from four to two and installing buffered bike lanes, green bicycle boxes and conflict markings, high-visibility crosswalks, rectangular rapid flashing beacons, pedestrian curb ramps, and new traffic signals with pedestrian countdown signal heads. The project also included new bicycle lanes or buffered bicycle lanes and highvisibility crosswalks on Linwood Drive, Maryal Drive, and Chaparral Street. The project started construction in 2020 and was completed in 2021.

BARDIN ROAD SAFE ROUTES TO SCHOOLS PROJECT

The City of Salinas received federal and local grant funding to redesign Bardin Road near Bardin Elementary and East Alisal Street near the Hartnell College East campus. The project includes two roundabouts, which slow down traffic and reduce the crossing distance for pedestrians. On Bardin Road, the project also includes a reduction in vehicle lanes from four to two, buffered bicycle lanes, high-visibility crosswalks, curb extensions, pedestrian curb ramps, and a rectangular rapid flashing beacon. On East Alisal Street, the project includes buffered bike lanes, high-visibility crosswalks, curb extensions, a rectangular rapid flashing beacon, and a new pedestrian path between the Hartnell College driveway and Sconberg Parkway. The project also includes a new two-lane drop-off and pick-up area in front of Bardin Elementary School. The project started construction in spring 2021 and is expected to be completed in fall 2022.

BORONDA ROAD CONGESTION RELIEF PROJECT

The City of Salinas is planning a project to widen East Boronda Road and install bicycle lanes and a landscaped median. The project also includes four roundabouts at the intersections of Boronda Road with McKinnon Street, El Dorado Drive, Natividad Road, and Independence Boulevard. These projects include protected-intersection treatments and high-visibility crosswalks and are intended to increase safety for people walking and biking to McKinnon Elementary School and Everett Alvarez High School. This project is in the design and permitting phase, with construction anticipated in the next few years.

DOWNTOWN COMPLETE STREETS PROJECT

The City of Salinas received federal and local grant funding to redesign the West Alisal Street and Lincoln Street corridors in downtown Salinas. The West Alisal Street phase of the project included a reduction in vehicle lanes from four to two, buffered bicycle lanes, high-visibility crosswalks, and signal improvements. This project provides an improved route for people walking and biking to Roosevelt Elementary, Washington Middle School, and Salinas High School. Construction started in 2020 and finished in spring 2021.

The second phase of the project is planned for Lincoln Street and will include buffered bicycle lanes and high-visibility crosswalks on this key route to Salinas High School. Construction is planned for Lincoln Street in summer 2022.

EAST LAUREL DRIVE AND CONSTITUTION BOULEVARD SIDEWALK AND NATIVIDAD TRAIL IMPROVEMENTS

This project was initiated by community members who saw a need for pedestrian improvements on East Laurel Drive near the soccer fields. The project includes new sidewalks, bike paths, lighting, and crosswalk enhancements on East Laurel Drive, and new sidewalk and curb ramps on Constitution Boulevard. This project started construction in spring 2021 and completed construction in fall 2021.

PEDESTRIAN CROSSING ENHANCEMENTS PROJECT

The City of Salinas received state grant funding for improvements to existing uncontrolled crossings: Sanborn Road at Buckhorn Drive, Natividad Road at Pacheco Street, West Laurel Drive at Parkside Street, Wood Street at Santa Maria Street, and Iverson Street at Lang Street. These crossings provide access to Oscar Loya Elementary, Kamman Elementary, Sherwood Elementary, and Washington Middle School. Improvements will include highvisibility striping, signage, and rectangular rapid flashing beacons. This project is expected to start construction in winter 2022.

WILLIAMS ROAD RESURFACING AND PEDESTRIAN HYBRID BEACON

The City of Salinas is planning to repave Williams Road, which is a route to Alisal High School and Alisal Community School. The project will add buffered bicycle lanes on Williams Road, bicycle-conflict markings, high-visibility crosswalks, and a loading zone in front of Alisal High. This project is planned to start construction in 2023.

The uncontrolled crosswalk across from the Alisal High football field is planned to be removed until a pedestrian hybrid beacon can be installed in late 2023. Pedestrian hybrid beacons are overhead beacons that flash red when pedestrians are crossing and signal drivers to stop. This treatment will increase the safety of students crossing at the current crosswalk location.

VISION ZERO INTEGRATED INTO MAINTENANCE (VZIM) PROGRAM

Vision Zero Integrated into Maintenance (VZIM) is one of the most cost-effective ways the City can invest in traffic safety. Vision Zero is a multidisciplinary approach to eliminating severe and fatal collisions, but an often-overlooked program with a substantial opportunity to make incremental safety improvements in the City's pavement maintenance program. What is the difference between the City's capital improvement program (CIP) and its maintenance program? Reconstructing roads often involves moving flow lines, upgrading drainage systems, rebuilding sidewalks, relocating utilities, and planting trees, all of which are very expensive. Resurfacing, restoration, and rehabilitation projects are typically regularly planned maintenance projects initiated on the basis of current or anticipated pavement conditions. Maintenance funds are already programmed, and additional striping changes have only a nominal cost to the City. Because of the low additional cost, VZIM is one of the most cost-effective approaches to improving traffic safety.

When a resurfacing, restoration, and rehabilitation project is planned, the City is given a blank canvas to determine how best to restripe the roadway. This is an opportunity to implement desired traffic-safety improvements, reduce crash frequency and severity, and improve traffic operations. Recent improvements have included road diets with buffered bike lanes on the following streets:

- John Street between Wood Street and East Alisal Street
- East Rossi Street between Main Street and Sherwood Drive
- Madrid Street between Northridge Mall and Main Street
- West Alisal Street between Front Street and Blanco Road

Other recent projects have installed narrower lanes and added buffered bike lanes on Blanco Road between San Vincente Avenue and Main Street, and on Constitution Boulevard between East Laurel Drive and East Boronda Road.

EXISTING PROGRAMS

The City of Salinas offers programs for residents seeking sidewalk repair or traffic calming in their neighborhoods. In addition, a variety of program offerings provide activetransportation education and encouragement to Salinas residents. Some programs are focused on school-aged youths, but there are also programs offering safety information, encouragement, and events for the general public.

CITY PROGRAMS City Neighborhood Traffic Management Program

The City of Salinas has an adopted the Neighborhood Traffic Management Program to address concerns about traffic speeds and other safety issues on Salinas residential streets. The program is driven by neighbors and requires that the residents themselves support the traffic calming plan. It requires a petition from the community to begin the process and support of at least 50% of neighbors for the proposed changes. Learn more here: https://www.cityofsalinas.org/our-city-services/public-works/current-projects/ traffic-calming

City Sidewalk Repair Program

Homeowners in the City of Salinas, like those in many communities in California, are responsible for maintaining the sidewalk fronting their property. Some funding is available from the City for a 50/50 sidewalk repair program, in which the City will pay half the cost of curb, gutter, and sidewalk repair, up to a maximum of \$2,500. The City also allocates maintenance funds for sidewalk repair through its capital improvement program and pursues funding for sidewalk repair through other sources. Public Works staff members respond to maintenance requests in the order that services are requested. There is currently a nineteen-year backlog for sidewalk repairs. Learn more here: https://www.cityofsalinas.org/our-city-services/public-works/pw-maintenance-services/ document-lists/sidewalk-repair

EDUCATION AND ENCOURAGEMENT PROGRAMS

Active Transportation Support Program

The Transportation Agency for Monterey County (TAMC) provides free racks for bicycle and skateboard parking, bike lockers, and bicycle repair stands to businesses, organizations, and schools throughout Monterey County. The goal of the program is to increase the amount of secure bicycle parking and ensure that it is distributed equitably throughout the county. Interested businesses and others can apply for funding to purchase a rack at any time here:

https://www.tamcmonterey.org/bicycle-secure-program.

Bike Smart and Walk Smart

The Bike Smart and Walk Smart programs, led by Ecology Action, provide on-the-ground training in safe walking and bicycling to second- and fifth-grade students, with the goal of empowering students and parents to walk and bike and to reduce collisions. Learn more here:

https://ecoact.org/about-us/community-engagement/youth-programs

Blue Zones Project Monterey County

Blue Zones Project is a national organization that works with communities to encourage changes that lead to healthier options for residents. Blue Zones works with governments, employers, restaurants, and school sites to encourage healthy eating, exercise, and community building. Blue Zones was launched in Monterey County in 2019 and works with schools throughout Salinas to encourage healthy habits. Learn more here: https://info.bluezonesproject.com/montereycounty

Ciclovía Salinas

Ciclovía Salinas is an annual event held on East Alisal Street that creates space for walking and biking, connecting with community and local organizations, and supporting local businesses. Ciclovía events began in Bogotá, Colombia, and have spread around the world. Ciclovía Salinas is the only fully youth-led Ciclovía event and is currently in its ninth year. Learn more here: https://cicloviasalinas.org/

Go 831

Go831 is a free transportation-demand management program led by the Transportation Agency for Monterey County. The program is offered countywide and provides resources and incentives for commute trips made by biking, walking, carpooling, vanpooling, or public transit. Go831 also provides resources for employers who want to start incentive programs to reduce drive-alone commute trips. Learn more here: http://www.go831.org/

Measure X Safe Routes to Schools Program

Local sales tax Measure X, which was approved by Monterey County voters in 2016, includes \$20 million for Safe Routes to Schools projects and programs through 2040. The Transportation Agency for Monterey County has developed a comprehensive Safe Routes to Schools program that offers tools, programming, and resources to schools, guardians, and communities aimed at improving safety and traffic around schools. Learn more here: https://saferoutesmonterey.org/

CHAPTER 3 OUTBEAGH

Public input was the foundation of the process of creating the Safe Routes to Schools Plan. The planning team developed an outreach plan and sought input from community members to accomplish the following outreach goals:

- Adapt outreach strategies during covid-19: Outreach for this plan took place in fall 2020 and spring 2021, during the covid-19 pandemic. The planning team shifted its outreach strategies away from in-person outreach to virtual parent meetings and online surveys.
- **Understand school transportation needs and barriers:** Parent and student surveys, presentations at parent meetings, and walking audits with school staff all contributed input on the barriers to walking and biking to schools in Salinas and the types of improvements that community members would like to see. This helped the planning team understand the key issues around each school site and the gaps in the biking and walking networks.
- Refine draft recommendations: Maps of the draft recommendations for each school site were sent out to parents along with a short survey asking for their feedback. Each school was also offered a presentation opportunity at an already-planned parent meeting to share the draft recommendations and hear feedback from parents and school staff. Finally, the planning team hosted two temporary demonstration projects to test the draft recommendations and get feedback from the community. This feedback was used to adjust the draft recommendations and add new recommendations for locations that were brought up by community members.
- **Collect representative community input:** All outreach materials were provided in English and Spanish, and most parent presentations were given in Spanish. The planning team worked closely with school staff to reach parent communities and provide opportunities for input.

PUBLIC OUTREACH

Public outreach was originally planned to start in spring 2020 and to focus on in-person community meetings. That strategy was adjusted due to the covid-19 pandemic to focus on presentations at virtual parent meetings and digital parent surveys. Walking audits were held at each school site to review current infrastructure conditions and discuss safety issues with school staff. Finally, the planning team hosted two temporary demonstration projects to test the draft recommendations and get feedback from the community.

WALKING AUDITS

Walking audits were held at each of the 45 schools in fall 2020 and spring 2021. Typically, audits are held during school drop-off or pick-up to observe traffic conditions. This was not possible because school was happening remotely due to covid-19, so instead the planning team met with school staff to observe infrastructure conditions around the school and discuss key safety issues. School principals, community liaisons, and crossing guards shared information on typical traffic patterns and safety issues for people walking and biking. These meetings were held outside, and covid-19 protocols were maintained to ensure participants' safety.

PARENT MEETINGS

At the beginning of the planning process, the team contacted school staff to request time on the agendas of pre-scheduled virtual parent meetings, such as coffee klatches, site councils, and the English Learner Advisory Committee (ELAC). During the presentations, staff members shared information about the planning process and asked parents and school staff for input on any safety issues or challenges with biking and walking around the school. After the draft recommendation list was developed, another round of presentations at virtual parent meetings was conducted to get feedback on the draft recommendations. In total, 140 virtual presentations were given to all 45 schools.

PARENT AND STUDENT SURVEYS

An initial survey was shared with parents through school communication channels, the project website, and on social media and received 2,425 responses. The survey asked about how students typically traveled to school before covid, top concerns about letting students walk or bike to

school, and current barriers to traveling to school safely. A similar survey was sent to high school students, and 474 responses were received. After the draft recommendation list was developed, recommendations maps in English and Spanish were shared with parents along with a short survey asking for their feedback. 1,341 responses were received with feedback on the draft recommendations.

TEMPORARY INSTALLATIONS

After the draft recommendations were developed, the planning team selected two locations for temporary installation projects. These installations were designed to test the draft project recommendations, see how the designs worked in practice, and get feedback from the community on whether they should be made permanent. The first installation took place on East Alisal Street near Sherwood Elementary from October 14 to October 25, 2021, and the second took place on McKinnon Street and Westminster Drive near Harden Middle School from April 20 to May 18, 2022.

DEMONSTRATION PROJECTS

on East Alisal Street and McKinnon Street

TEMPORARY INSTALLATION SURVEY RESULTS _____

Highlights of the community survey data for the East Alisal Street and McKinnon Street installation projects are provided below. The full survey data can be found in Appendix B.

East Alisal Street

The temporary installation on East Alisal Street was located between Griffin Street and North Hebbron Avenue, a section that connects nearby residents with Sherwood Elementary School. East Alisal Street is one of the top streets for pedestrian and bicycle collisions in Salinas, with 25 pedestrian and 16 bicycle collisions between 2010 and 2019. East Alisal Street was also identified as a priority during the planning process for the Alisal Vibrancy Plan, which was developed with extensive community input starting in 2017. The design of the temporary installation was based on a concept plan from the Alisal Vibrancy Plan.

At the time of the installation, there were no bicycle facilities along this section of East Alisal Street. The speed limit was 30 mph, but public comments indicated that drivers frequently travelled faster. The temporary installation included a Class IIB buffered bike lane on one side of the street and a Class IV separated bikeway on the other. The Class IV bikeway was separated from motor vehicles by construction barrels, wave delineators, and decorative planters that were painted by Los Padres Elementary students. To create space for bicycle facilities, the road was narrowed from two travel lanes in each direction to one, with a center turn lane. Green conflict markings were installed at intersections to alert drivers when they crossed bike lanes. The installation also included high-visibility crosswalks at the intersections of East Alisal Street at South Wood Street and Hebbron Avenue, which were installed permanently by the City.

The East Alisal installation ended early and was in place for less than two weeks before it was damaged by heavy rain. The planning team received 114 community survey responses during the East Alisal Street installation. The following methods were used to promote the project and collect survey responses:

- Distribution of fliers and a survey link through Sherwood Elementary, Los Padres Elementary, and El Sausal Middle School.
- Community ribbon-cutting event, which had approximately 30 attendees.
- Door-to-door distribution of fliers with the survey link to neighborhood businesses.
- Mass mailings to nearly 5,000 households in the neighborhoods around the demonstration.
- Social media posts.
- Pre-stamped surveys placed along the installation route.

Survey Results

- Nearly 40% of survey respondents walked through the installation, and 74% experienced the installation in a car. Twelve percent of respondents bicycled through the installation.
- More than two-thirds of respondents reported having a positive experience with the high-visibility crosswalks, and approximately half had a positive experience with the buffered bike lane and separated bikeway.
- Just over half of respondents said that they walked or biked more because of the temporary installation.
- Nearly 60% indicated that they would like to see the temporary changes made permanent
- 61% said that they would either definitely or probably use the new facility if it became permanent.

Figure 6. East Alisal Street Installation Survey Data Would you like to see the temporary improvements made permanent?

Figure 7. East Alisal Street Installation Survey Data How likely would you be to walk or bike through this area if the changes became permanent?

East Alisal Street: Next Steps

Before implementing any changes to roadway design, the City of Salinas will conduct additional planning for the East Alisal Street corridor, including additional community outreach. In spring of 2022, the City received grant funding for improvements on East Alisal Street, including litter abatement, new street trees and landscaping, wayfinding signage, public art, sidewalk art to highlight safe routes through the neighborhood, and community education programming. Improvements are expected to be implemented in 2023.

McKinnon Street and Westminster Drive

McKinnon Street and Westminster Drive were selected as the second installation location to test out concepts that were being considered for a possible grant application. McKinnon Street and Westminster Drive provide routes to Harden Middle School, North Salinas High, and McKinnon Elementary, and to McKinnon Park and El Dorado Park.

At the time of the installation, McKinnon Street was a two-lane roadway with sidewalks and Class II bicycle lanes. The speed limit was 35 mph, but public comments indicated that drivers frequently travelled faster. Westminster Drive was a two-lane residential street with on-street parking on both sides. For the temporary installation on McKinnon Street, the bike lanes on both sides were upgraded to Class IV separated bikeways, which have barriers between the motor vehicle lanes and the bicycle lanes. The temporary installation also included green conflict markings at intersections and driveways along McKinnon Street, and curb extensions and high-visibility crosswalks at two intersections along Westminster Drive.

The McKinnon Street installation was in place for a month, and the planning team received 251 community survey responses. The following methods were used to promote the project and collect survey responses:

- Distribution of fliers and survey links through Harden Middle School, North Salinas High, and Natividad Elementary.
- Mailer distribution with the survey link to approximately 2,700 households in the neighborhoods around the demonstration.
- Virtual community meeting to explain the purpose of the demonstration, what to expect, and how to give input.
- Social media campaign.
- Pre-stamped surveys placed along the installation route.
- In-person outreach to parents and students around Harden Middle School.

Survey Results

Two-thirds of survey respondents drove through the installation, 41% walked, and 22% bicycled.

- Nearly 70% of respondents had a positive response to both the high-visibility crosswalks and the separated bikeways, saying either "I love it" or "I like it" to those temporary changes.
- Just under half of respondents said that they walked or biked more because of the temporary installation.
- 60% indicated that they would like to see the temporary changes made permanent.
- 64% said that they would either definitely or probably use the new facility if it became permanent.

Figure 8. McKinnon Street Installation Survey Data Would you like to see the temporary improvements made permanent?

Figure 9. McKinnon Street Installation Survey Data How likely would you be to walk or bike through this area if the changes became permanent?

McKinnon Street: Next Steps

McKinnon Street is scheduled for resurfacing in the next few years, and the City of Salinas plans to implement striping changes during that project, including buffered bicycle lanes and high-visibility crosswalks. Because of the positive response to the temporary demonstration, the City has also applied for grant funding to install Class IV separated bikeways on McKinnon Street and a multi-use path on Harden Parkway.

CHAPTER 4 CHAPTE

This chapter contains recommendations that affect multiple schools in the City of Salinas. These include recommendations for new biking and walking facilities, and programmatic recommendations that address education, encouragement, engagement, equity, and maintenance. The maps in this chapter show the network of citywide routes that are recommended for future improvements to this plan and streets that serve as key routes to school, which have been identified as Safe Routes to Schools corridors.

The vision for all students and families following the implementation of the City of Salinas Safe Routes to Schools Plan is as follows:

- I can walk or bike to school safely.
- I know that my trip to school helps our environment, builds healthy habits, and saves my family money.
- I am more connected to my neighborhood and community through my trip to school.
- I have the skills and confidence I need to travel to school safely without using a car.

GOALS AND OBJECTIVES

The City of Salinas and partner agencies have set the following goals and objectives for the future of Safe Routes to Schools, to be accomplished through the projects and programs in this plan.

Goal 1. Encouragement: The majority of children will arrive at school by foot, bicycle, scooter, skateboard, bus, or carpool.

- Objective 1.1: Identify and promote a broad spectrum of projects to provide a connected network of active transportation options along Safe Routes to Schools corridors and connections.
- Objective 1.2: Design and construct street improvements that are accessible
 and comfortable for all ages and abilities. Incorporate tree planting into active
 transportation projects to provide shade for people who are walking and bicycling and
 address City goals for increasing the urban tree canopy.

- Objective 1.3: Transportation Agency for Monterey County (TAMC), schools, and the City will support events that encourage active transportation to school, such as "Walk & Roll to School," at least twice each year.
- Objective 1.4: Work with schools and Safe Routes to Schools partners to provide walking school buses at all elementary schools.
- Objective 1.5: Work with schools and Safe Routes to Schools partners to promote Safe Routes to Schools corridors as the preferred routes to school.

Goal 2. Safety: Zero collisions involving bikes or pedestrians that result in injury or death

- Objective 2.1: Prioritize Safe Routes to Schools projects that address fatal and severeinjury crashes.
- Objective 2.2: Enhance low-stress route alternatives to high-stress corridors.
- Objective 2.3: Prioritize safety over travel delays, speed, congestion, and convenience in project design.
- Objective 2.4: Crossing guards will be present at all elementary schools.

Goal 3. Education: All children in Salinas will receive traffic safety education

- Objective 3.1: Incorporate bicycle and pedestrian safety education into the curriculum in all elementary schools.
- Objective 3.2: By second grade, all children will receive pedestrian safety training in school; by fifth grade, all children will receive bike safety training in school.
- Objective 3.3: By high school, students will know the basics of bike maintenance and have opportunities to practice these skills at school or in the community.

Goal 4. Engagement: Engage the greater community to create safe environments around schools

- Objective 4.1: Run annual community-wide campaigns that encourage neighbors to keep eyes on the streets and drivers to reduce speeds around schools.
- Objective 4.2: Enforce traffic laws in school zones without overburdening offenders. One example would be a diversion program that requires school zone traffic offenders to assist with crossing guard duties (Austin, TX program model).
- Objective 4.3: Recruit volunteers from the community to assist with Safe Routes to Schools programs such as walking school buses and crossing guards.

Goal 5. Equity: Ensure all community members have equitable access to schools and Safe Routes to Schools programming.

- Objective 5.1: Prioritize infrastructure projects that will serve transportation-disadvantaged and special-needs populations.
- Objective 5.2: Provide opportunities for a diverse group of community members to take leadership roles in the development and implementation of Safe Routes to Schools projects and programs. An example would be participation in a Safe Routes to Schools steering committee.
- Objective 5.3: Provide access to active transportation and safety equipment such as bicycles, scooters, helmets, and lights.

PLAN GOALS

ENCOURAGEMENT:

The majority of children will arrive at school by foot, bicycle, scooter, skateboard, bus, or carpool

Zero collisions involving bikes or pedestrians that result in injury or death

All children in Salinas will receive traffic safety education

Engage the greater community to create safe environments around schools

Ensure all community members have equitable access to schools and

Safe Routes to Schools programming

RECOMMENDATIONS PROCESS

The recommendations in this Safe Routes to Schools Plan were developed in response to public input on the barriers to getting to each school site safely. Public comments from parent surveys, parent meetings, and walking audits were reviewed and recommendations were developed based on the community input. This process included the evaluation of existing conditions around each school. All of the recommendations in this report require additional planning and evaluation to determine if they are appropriate and feasible.

After the draft recommendations were developed, recommendation maps in English and Spanish were shared with each school site along with a short survey asking for feedback. Each school was also offered another round of bilingual parent presentations to share the draft recommendations and collect feedback from parents and school staff. The planning team reviewed the feedback on the draft recommendations and adjusted the recommendations where feasible.

All recommendations are planning-level and require further analysis prior to construction.

CITYWIDE CORRIDOR RECOMMENDATIONS

The map on page 75 shows existing bicycle and pedestrian facilities along with recommendations for bicycle and pedestrian corridor improvements throughout the City of Salinas. A description of each facility type can be found below.

BIKE BOULEVARD

Streets with traffic speed and volume management, designed to create low-stress conditions. In ideal conditions, cyclists share the road with motor vehicles. Bike boulevards manage speeds and volumes using traffic-calming features like diverters, medians, chicanes, and traffic circles. Bike boulevards are usually marked by signs and "sharrows" and may include branding and wayfinding signs to local destinations and other low-stress routes.

CLASS I SHARED-USE PATH

Paved rights-of-way that are completely separated from streets where motor vehicle traffic is prohibited. Shared-use paths are designed for people who are using wheelchairs, walking, bicycling, or skateboarding, or taking other forms of active transportation. Bike paths should offer opportunities not provided by the road system, such as recreational opportunities or direct high-speed commute routes if cross-flow by motor vehicles and pedestrian conflicts can be minimized. The most common applications for shared-use paths are along waterfronts, canals, utility rights-of-way, abandoned railroad rights-of-way, within school campuses, and within and between parks. There may also be situations in which such facilities can be provided as part of planned developments.

CLASS II BICYCLE LANE

On-street facilities that use striping and stencils to designate space for bicycle travel. Bike lanes are intended to delineate the right-of-way assigned to bicyclists and motorists and to provide for more predictable movements by each user. A more important reason for constructing bike lanes is to better accommodate bicyclists through corridors where there is not sufficient room for side-by-side sharing of streets by motorists and bicyclists. This can be accomplished by reducing the number of lanes, reducing lane width, or prohibiting or reconfiguring parking to delineate bike lanes. In addition, other things can be done on streets with bike lanes to improve the situation for bicyclists that might not be possible on all streets (e.g., improvements to the surface, augmented sweeping programs, special signal facilities). In general, pavement markings alone will not measurably improve bicycling conditions. The City of Salinas will look for future opportunities to convert Class II bicycle lanes to Class IV separated bikeways or Class I paths.

CLASS IIB BUFFERED BICYCLE LANE

Buffered bike lanes are conventional bicycle lanes paired with designated buffer spaces separating them from adjacent motor vehicle travel lanes or parking lanes. Buffered bike lanes provide a greater distance between bicyclists and motor vehicle traffic and space for bicyclists to pass each other without encroaching into the motor vehicle lane. Buffered bike lanes appeal to a wider cross-section of users and abilities than conventional bike lanes.

CLASS III BICYCLE ROUTE

Routes designated for bicycle travel, with shared-use pavement markings, that are shared with motor vehicles. Shared lane markings help bicyclists with lateral positioning to reduce their chances of hitting the open door of a parked vehicle, to alert road users of the locations bicyclists are likely to occupy in the roadway, and to encourage safe passing of bicyclists by motorists. Shared-use markings are only feasible on streets with speed limits of 35 mph or less. Bike routes are identified through signage and shared-lane bicycle markings or "sharrows."

CLASS IV CYCLE TRACK

Class IV facilities are protected bike facilities designated for the exclusive use of bicyclists. Cycle tracks are bike facilities separated from motor vehicle traffic by a physical barrier and are distinct from sidewalk and pedestrian areas. Cycle tracks may be one-way or two-way, and may be at street level, at sidewalk level, or at an intermediate level. If at sidewalk level, a curb or median separates them from motor vehicle traffic, and different pavement colors or textures separate them from the sidewalk. If at street level, they can be separated from motor vehicle traffic by raised curbs or barriers. By separating cyclists from motor vehicle traffic, cycle tracks can offer greater security than bike lanes and are attractive to a wider spectrum of the public. However, cycle tracks can constrain the bikeway and limit the ability of bicyclists to pass each other.

SAFE ROUTES TO SCHOOLS CORRIDORS

Safe Routes to Schools corridors are streets that have been identified as key routes to Salinas schools. These streets may be good candidates for corridor-level improvements in the future to slow traffic speeds, improve intersections and crossings, and create a safe and comfortable environment for students to walk to school. Class I shared-use paths are completely separated from motor vehicles and offer the most comfortable environment for walking and biking. Existing and recommended shared-use paths are highlighted as Safe Routes to Schools corridors in the map below.

Safe Routes to Schools Corridors

- Recommended Safe Routes to Schools Corridor
- Recommended Class I Shared Use Path
- Existing Class I Shared Use Path

POLICY AND PROGRAM RECOMMENDATIONS

The recommendations below are for all school sites and are arranged by implementing agency and type of program. Some recommendations are listed under multiple organizations that could take the lead on implementation.

TRANSPORTATION AGENCY FOR **MONTEREY COUNTY (TAMC)**

Education

- Support the Street Smarts traffic-safety education campaign, including information on how to use new infrastructure like roundabouts, Class IV separated bikeways, and pedestrian hybrid beacons.
- Install traffic gardens at elementary schools and parks to provide space for traffic safety education.
- Promote the TAMC program that allows citizens to report sidewalk and bicycle facility hazards on Salinas roadways.

Encouragement

- Work with schools districts to develop SchoolPool carpooling programs, with incentives for participation such as priority parking spaces and drop-off lanes.
- Support development and programming for walking school buses at Monterey County schools.

- Develop a bar-code scanner program that notifies parents when students arrive at school.
- Develop a pilot program to structure school drop-off times and locations by grade level and align it with education programs.
- Promote the TAMC Safe Routes website (https://saferoutesmonterey.org/) as a community resource for establishing walking school buses, finding safety information, etc.
- Continue to provide bike and skateboard racks to schools, libraries, parks, and community centers through the Active Transportation Support program.

Equity

- Design and implement public outreach and engagement that is broadly accessible and provides means for all to participate.
- Provide an equitable share of transportation investments to underserved, racially diverse communities to improve their health, safety, and quality of life.

SCHOOL DISTRICTS

Education

- Incorporate traffic safety education into school curriculums.
- Partner with TAMC and other Safe Routes to Schools partners to provide bicycle and pedestrian safety education and training at every elementary school.

Encouragement

- Adopt a district-wide policy supporting active transportation projects and programs.
- Establish a Safe Routes to Schools contact at the district level to act as the point person for education, programs, and events.
- Provide orientation for principals and school staff on Safe Routes to Schools programs and best practices, including traffic management.
- Where a bus stop for one school is near another school, relocate the bus stop or adjust pick-up times to reduce school congestion.
- Promote events that encourage active transportation, such as Walk and Bike to School Day.
- Use the TAMC Bicycle Secure program to provide secure bike, scooter, and skateboard parking at each school site.
- Consider the use of electric school buses.

Engagement

 Reassess crossing guard funding and recruiting structures to allow at least one crossing guard per school for both morning drop-off and afternoon pick-up times, or develop a volunteer crossing guard program to recruit and motivate volunteers.

CITY OF SALINAS: POLICE, RECREATION AND COMMUNITY SERVICES, AND PUBLIC WORKS DEPARTMENTS

Education

- Continue Police Department programming to educate students and community members about bicycle and pedestrian safety.
- Train police officers to teach traffic safety, with a focus on driver safety, and accurately report collisions involving bicyclists or pedestrians.
- Incorporate bike/walk safety trainings or helmet giveaways into Recreation and Community Services Department messaging, after-school programs, and events.
- Promote the Salinas Connect app and website, which allows citizens to report sidewalk and bicycle facility hazards on city roadways.

Encouragement

- Incorporate tree planting into active transportation projects to provide shade for people who are walking and bicycling and address City goals for increasing the urban tree canopy.
- Support and promote bike and pedestrian encouragement activities such as Bike Month, Ciclovía, and Walk and Bike to School Day.
- Apply for Bicycle Friendly Community designation through the League of American Bicyclists (could involve city staff and community volunteers).

SCHOOL SITES

Education

- Distribute a traffic circulation plan and bike and pedestrian safety information to parents with the goal of promoting positive behavior during dropoff and pick-up. Distribute information at the beginning of the school year through all possible communication channels (email, handouts, parent meetings, back to school nights, etc.).
- Hold school safety assemblies for students at the beginning of the school year to go over safe walking, biking, and drop-off practices.
- Pass out bike maps, resource lists, and bike cage information to students every fall, and conduct annual bike safety clinics.
- Incorporate active transportation into social and emotional learning curriculums.
- Incorporate Chalk Your Walk programs into arts curriculums.
- Develop a curriculum for teaching students about the climate impacts of transportation, transportation infrastructure, and the built environment.
- For high school students, promote bus routes for school transportation, develop carpool incentive programs, and offer bike maintenance courses through a Regional Occupation Center (ROP) program.
- For high school students, expand health leadership groups to include active transportation issues, such as student bike/ pedestrian counts, active transportation projects, and Safe Routes to Schools support for younger students.
- Provide information to school staff about activetransportation and carpooling options, including electric bikes.

Encouragement

- Incorporate active transportation and support for Walk and Bike to School Day into existing school health policies.
- Designate an administrative staff member as the Safe Routes to Schools contact at each school.
- Work to achieve Blue Zones Project school certification.
- Host biannual Walk and Bike to School Day events.
- Develop walking and rolling school bus programs with incentives for participation.
- Develop SchoolPool carpooling programs with incentives for participation, including priority parking spaces and drop-off lanes.
- Establish and encourage use of Park and Walk/Ride locations.
- Promote and incentivize middle- and high-school bike clubs, mountain bike clubs, and skateboard clubs.
- Promote and incentivize family walking and biking groups to encourage more eyes on the street, potentially through existing parent groups.
- Stagger school start times between grade levels to disperse drop-off traffic.
- Stagger school start times for schools within two blocks of each other.
- Adjust school delivery times to avoid drop-off periods.
- Develop partnerships with arts programs to install public art along routes to schools.
- Add active-transportation information to school staff signatures.
- Pursue grant funding through the Specialized Outride program to bring bikes and bike education to middle schools.

Engagement

- When possible, have school staff or volunteers help with traffic control in school parking lots for 15 minutes before and after school.
- Pursue the AAA School Safety Patrol program to engage students in transportation safety (Monterey Park Elementary is a model).
- Non-Profits and Monterey County Health Department

NON-PROFITS AND MONTEREY COUNTY HEALTH DEPARTMENT

Education

- Develop an annual crossing guard training program.
- Develop programs and events to provide parents and guardians with traffic safety education, such as the following:
 - Community traffic safety education events on weekends.
 - Traffic safety messaging at established parent meetings and events, such as back-to-school nights and spring open houses.
 - Locate traffic-safety education staff members at schools to talk to parents during drop-off.
 - Work with parent leaders to develop parentdriven programs.
 - Provide training and tips on using the school drop-off loop.
- Provide driver safety training targeting youths and seniors. Consider partnering with the Salinas Police Department or insurance companies to provide discounts for participation.
- Provide bike and pedestrian safety training during after-school programs, such as the YMCA and the Boys and Girls Club.
- Provide pedestrian safety education and training for second graders, including classroom education and on-blacktop or neighborhood walking instruction.
- Provide bicycle safety education and training for fifth graders, including classroom education and on-bike safety rodeos taught by certified safety instructors.

- Develop a vertical education program with specific safety messaging for every grade level.
- Develop programs or events to provide familyfocused bike- and walk-safety trainings.
- Pass out bike maps, resource lists, and bike cage information to students every fall, and conduct annual bike safety clinics. Work with Family Resource Centers to offer bike and pedestrian education and support.
- Develop a curriculum for teaching students about the climate impacts of transportation, transportation infrastructure, and the built environment.
- For high school students, promote bus routes for school transportation, develop carpool incentive programs, and offer bike maintenance courses through an ROP program.
- For high school students, expand health leadership groups to include active transportation issues, such as student bike/ pedestrian counts, active transportation projects, and Safe Routes to Schools support for younger students.
- Support the Street Smarts traffic safety education campaign, including information on how to use new infrastructure like roundabouts and sharrows.
- Promote the Salinas Connect app which allows citizens to report sidewalk hazards.

Encouragement

- Provide orientation for principals and school staff on Safe Routes to Schools programs and best practices.
- Develop year-round walking or rolling school bus programs with incentives for participation.
- Develop a walking/rolling school bus toolkit and training presentation for parent volunteers.
- Develop SchoolPool carpooling programs, with incentives for participation such as priority parking spaces and drop-off lanes.
- Develop a social media campaign focused on students and school staff to encourage more biking and walking.
- Consider a program to provide free bus passes to students.
- Offer middle- and high-school bike clubs, mountain bike clubs, scooter clubs, and skateboard clubs.
- Coordinate family walking and biking groups to encourage more eyes on the street.
- Develop and promote earn-a-bike or bikeloan programs in which students earn a bike by riding frequently or maintaining perfect attendance. Explore partnerships with the Salinas Police Department to provide abandoned bikes to students.
- Organize helmet giveaway events for students and families.
- Develop programs to install public art along routes to schools.
- Consider a neighborhood grant program to support programs such as walking school buses.
- Partner with local bike shops on bike encouragement programs.

Equity

- Include members of disadvantaged communities as stakeholders, and consider language accessibility in program development. Emphasize the relationship between health and active transportation in all program messaging.
- Provide bilingual materials and staff for all programs.
- Conduct an audit of past policies that have limited access to safe transportation options, and propose new policies to address these inequities.

MONTEREY-SALINAS TRANSIT (MST)

Encouragement

- Consider a program to provide free bus passes to students.
- Expand bus routes to serve middle and high schools that are not currently served by MST, including Rancho San Juan High School, Gutierrez Middle School, Gavilan View Middle School, and Mount Toro High School.

MAINTENANCE RECOMMENDATIONS

Maintenance is a continual challenge for the City of Salinas, and there is currently insufficient funding to maintain all streets, sidewalks, and bicycle facilities to the level desired by staff and community members. This plan recommends pursuing additional funding for roadway maintenance to ensure that bicycle and pedestrian facilities throughout the city are safe and accessible. See Chapter 6 for current maintenance funding sources. This plan also recommends that the City of Salinas finalize and implement the Salinas Reconfiguration of Street Sweeping Routes and Signage Plan. The City will sweep residential streets two times monthly and commercial streets four times monthly. No parking signs shall be installed to provide the street sweeper with curb access during designated street sweeping days.

Any complete streets improvements built on Caltrans rights-of-way should be maintained by the State of California.

SCHOOL PROFILES

The school-level infrastructure recommendations listed in this chapter are the core of the Safe Routes to Schools Plan. They were designed to address the specific challenges at each school site, with the goal of increasing the safety of families walking and biking and encouraging more active-transportation trips to school. This chapter includes information on the current conditions at each school, observations from the walking audit, and the list of infrastructure recommendations. Schools are organized alphabetically. School-specific non-infrastructure recommendations are also listed under each school's profile. Citywide non-infrastructure recommendations are listed in Chapter 4.

A guide to the various types of infrastructure treatments included in this chapter starts on page 88.

RECOMMENDATIONS PROCESS

The recommendations in this Safe Routes to Schools Plan were developed in response to public input on the barriers to getting to each school site safely. Public comments from parent surveys, parent meetings, and walking audits were reviewed and recommendations were developed based on the community input. This process included an evaluation of the existing conditions around each school. All of the recommendations in this report require additional planning and evaluation to determine if they are appropriate and feasible.

After the draft recommendations were developed, recommendation maps in English and Spanish were shared with each school site along with a short survey asking for feedback. Each school was

also offered another round of bilingual parent presentations to share the draft recommendations and collect feedback from parents and school staff. The planning team reviewed the feedback on the draft recommendations and adjusted them where feasible.

All recommendations are planning-level and require further analysis before construction. All recommendations of new marked traffic-control devices, including crosswalks, require further analysis and must meet the guidelines of the California Manual of Uniform Traffic Control Devices and City of Salinas policies in order to be installed.

All traffic-calming recommendations in this plan are subject to the Neighborhood Traffic Management Program, which addresses concerns about traffic speeds and other safety issues on Salinas residential streets. This program is driven by neighbors and requires that the residents themselves support the traffic-calming plan. It requires a petition from the community to begin the process and support from at least 50% of neighbors for the proposed changes. City staff prioritizes streets with higher traffic speeds and volumes.

There are several recommendations in this plan for new curb markings to create loading zones near schools. The City has an established program and procedure available for new special curb markings, and schools can begin the process by submitting an application to the City. The cost of installing and maintaining special curb markings is paid by the applicant. There is a fee for the application and an annual renewal fee to refresh the markings. All curb markings require Transportation and Traffic Commission and city council approval to be legitimate and enforceable.

GUIDE TO BICYCLE & PEDESTRIAN INFRASTRUCTURE RECOMMENDATIONS

Bicycle boulevards are streets with low traffic volumes and speeds where full bike lanes are not feasible and cyclists share the road with motor vehicles. Bike boulevards are usually marked by signs and shared-use pavement markings, or "sharrows," and include traffic-calming measures like diverters, medians, chicanes, and traffic circles.

Bike lane conflict markings are used to highlight "conflict zones," or places where traffic lanes and bike lanes cross. This helps drivers know where to expect people on bikes.

Center medians provide space to locate pedestrian safety features, traffic-control devices, amenities, and landscaping, and they can provide traffic calming.

Class I shared-use paths are paved rights-of-way, completely separated from streets, which support multi-use recreation and transportation opportunities for walkers, bicyclists, skaters, and wheelchair users.

Class II bike lanes are on-street bicycle facilities that use striping and stencils to designate space for bicycle travel.

Class IIB buffered bicycle lanes include a striped buffer between the bike lane and the vehicle lane, which provides greater separation and comfort for people biking.

Class III bicycle routes are designated for bicycle travel with signage and shared-use pavement markings, or "sharrows," and are shared with motor vehicles.

Class IV separated bikeways or cycle tracks include a physical barrier such as parked cars, planters, or plastic posts between the bicycle lane and the vehicle lane, providing separation and safety for cyclists.

Curb extensions are installed at intersections or mid-block crosswalks to shorten the crossing distance for people walking and make them more visible to people driving.

High-visibility crosswalks, or "ladder style" crosswalks, are more visible to drivers than crosswalks consisting of just two lines.

Leading pedestrian intervals
allow pedestrians to start crossing
an intersection a few seconds
before cars are given a green
light, making them more visible to
drivers who are making a left turn.

Pedestrian countdown signal heads allow pedestrians to see how many seconds remain before the light changes and whether there is enough time to cross safely.

Pedestrian hybrid beacons are lights used to control traffic at unsignalized locations to help pedestrians cross the street. They are often used on larger roadways with three or more lanes.

Pedestrian refuge islands are protected spaces in the center of a crosswalk that reduce the pedestrians' crossing distance and exposure to vehicle traffic.

Protected intersections keep people who are biking separate from motor vehicles up until the intersection. They have been shown to improve safety for people walking and biking.

Protected pedestrian signal phases are traffic signals that direct people walking to cross at different times from drivers who are making left turns.

Raised crosswalks are higher sections of pavement with marked crosswalks. They are used to encourage drivers to slow down and to make people walking more visible to drivers.

Rectangular rapid flashing beacons (RRFBs) are used at
uncontrolled intersections or midblock crosswalks to alert drivers
to people who are waiting to cross
the street.

Roundabouts are circular intersections where drivers travel counterclockwise around a center island. They have been shown to reduce crashes and improve safety for people walking.

Shared-lane markings ("sharrows") are used on streets where bicycles and motor vehicles share the same travel lane. Sharrows direct bicyclists to the safest position in the roadway, alert drivers that bicyclists may be sharing the lane, and encourage safe passing of bicyclists by motorists.

Speed feedback signs are a traffic-control device used to reduce vehicle speeds by giving drivers who are traveling over the posted or advisory speed a targeted message, such as "YOUR SPEED XX".

Traffic calming consists of various measures, such as speed humps, traffic circles, and chicanes, used to slow vehicle traffic on residential streets and improve safety and conditions for walkers and cyclists. Traffic-calming measures must be requested and supported by neighborhood residents in order to be installed.

Traffic circles are small roundabouts installed on neighborhood streets to slow traffic and create a safer and more comfortable environment for people walking and biking.

ALISAL COMMUNITY SCHOOL

Alisal Community School is located in East Salinas, adjacent to Alisal High School, and draws students primarily from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Alisal Community School parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 107 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 10, below.

Figure 10. Parents' top concerns about letting children walk or bike to and from school.

Alisal Community School

CURRENT INFRASTRUCTURE CONDITIONS

Motorist Conditions

- At the time of the audit, Alisal Community
 School had a small drop-off loop off Del Monte
 Avenue and a parking lot off Williams Road.
 Parking spaces in the lot were reserved for staff.
 The school had plans to develop a larger drop-off loop off Del Monte Avenue.
- At the time of the audit, drop-off took place in the employee parking lot, which was not intended for drop-off traffic. As a result, there was severe congestion before and after school. Drop-off will move in the future to Del Monte Avenue.

- School bus drop-off takes place on Del Monte Avenue.
- Williams Road is a major arterial street, part of the city's truck route network, and a primary emergency response route. There is traffic congestion on Williams Road before and after school.
- Some of the drop-offs occur on-street along Del Monte Avenue and Williams Road.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100–500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Parents expressed concerns about the intersection of Williams Rd and Del Monte Ave

The intersection of Del Monte Ave and Towt St is used by large numbers of pedestrians and drivers

Pedestrian Conditions

- There are complete sidewalks on both sides of Del Monte Avenue and Williams Road.
- The intersection of Del Monte Avenue and Williams Road is signalized and has standard striped crosswalks.
- There are no marked crosswalks across Del Monte Avenue between Williams Road and Towt Street.

Bicycling Conditions

 There are Class II bike lanes on both sides of Williams Road. There are no bicycle facilities on Del Monte Avenue or other neighborhood streets.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND ALISAL COMMUNITY SCHOOL

The following table lists recommendations for Alisal Community School, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|--|---|-----------|------------------------|
| AC001 | Williams Rd at Del Monte Ave | Large numbers of vehicles and pedestrians at intersection. Parents do not feel safe crossing. | Install yellow high-visibility crosswalks per planned redesign of Williams Rd. Implement lead pedestrian interval, and install pedestrian countdown signal heads. | \$218,140 | City |
| AC002 | Del Monte Ave from Williams Rd to Towt St | Reports of speeding. | Install traffic calming (chicanes and removal of parking at those locations), sharrow markings, and bike route signage. | \$652,800 | City |
| AC003 | Del Monte Ave at Towt St | High pedestrian volumes traveling to multiple schools. | Upgrade crosswalks to high- visibility, construct curb extensions with ramps. | \$268,000 | City |
| AC004 | Del Monte Ave from Williams Rd to Towt St | Additional school signage needed. | Install additional school zone signage assembly A. | \$3,400 | City |
| AC005 | Del Monte Ave between Williams Rd and Burke St | Students crossing outside of marked crosswalks. | Consider pedestrian crossing enhancements per city policy. | \$10,000 | City |
| AC007 | Del Monte Ave at Dallas Ave | Low pedestrian visibility at side streets. | Install high-visibility yellow crosswalk across Dallas Ave. | \$4,000 | City |
| AC008 | Del Monte Ave at New Deal Ave | Low pedestrian visibility at side streets. | Install high-visibility yellow crosswalk across New Deal Ave. | \$4,000 | City |
| AC009 | Del Monte Ave at Burke St | Low pedestrian visibility at side streets. | Install high-visibility yellow crosswalk across Burke St. | \$4,000 | City |
| AC010 | Del Monte Ave from Williams Rd to Towt St | Low pedestrian visibility at side streets. | Perform intersection sight distance analysis and consider installation of red curb at intersections. | \$700 | City |
| AC011 | Towt St at Cortez St | Low pedestrian visibility at side streets. | Install high-visibility crosswalk and curb extension across Cortez St. | \$204,000 | City |
| AC012 | Dallas Ave from Del Monte Ave to Cortez St | Key pedestrian route to school, reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$157,800 | City |
| AC013 | New Deal Ave from Del Monte Ave to Cortez St | Key pedestrian route to school, reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$157,800 | City |

ALISAL HIGH SCHOOL

Alisal High is located in east Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Alisal High parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 74 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 11, below.

Figure 11. Parents' top concerns about letting children walk or bike to and from school.

Freedom Parkway is a four-lane roadway that some students cross to get to school

CURRENT INFRASTRUCTURE CONDITIONS

Motorist Conditions

- Alisal High is located on Williams Road, a fivelane roadway with parking on both sides.
 Williams Road is a major arterial street and is very congested before and after school.
- There is a drop-off area and parking lot on the school campus. There is a parking lot on the west side of campus that is reserved for staff. Left turns are permitted out of the school parking lot.
- The morning sun creates visibility problems for eastbound traffic at certain times of the year.
- Bus drop-off takes place on school campus, in the long drop-off area between the two parking lots.
- As of the writing of this plan, the speed limit in front of the school is 35 miles per hour.

Pedestrian Conditions

- There are sidewalks on both sides of Williams Road near the school.
- There are standard yellow crosswalks across two legs of the intersection of Williams Road and Monte Bella Boulevard.
- There is a standard yellow mid-block crosswalk on Williams Road near the school's football field.
- There are no marked crosswalks on Freedom Parkway between Sanborn Road and Williams Road.
- There are curb ramps in place at intersections surrounding the school.
- There is a pedestrian pathway to the school campus from Camarillo Court, and another path connecting Tecopa Way to Williams Road near the entrance to campus.
- The back entrance to campus, off Camarillo Court, has lots of traffic before and after school from both Alisal High and Cesar Chavez Elementary.

Bicycling Conditions

 There are Class II bike lanes on Williams Road near the school and on Freedom Boulevard.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND **ALISAL HIGH SCHOOL**

The following table lists recommendations for Alisal High, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|---|---|-----------|------------------------|
| AH001 | Williams Rd from Del Monte Ave to Freedom Parkway | High traffic volumes and speeds. | Install planned Class IIB buffered bike lanes on Williams Rd between Freedom and Bardin. Allow for loading and unloading only, and restrict long-term parking on Williams Rd in front of Alisal High. Install raised median with street trees between Del Monte Ave and Monte Bella Blvd. Replace missing street trees. | \$513,380 | City |
| AH002 | Williams Rd at Del Monte Ave | Large numbers of vehicles and pedestrians at intersection. Parents do not feel safe crossing. | Install yellow high-visibility crosswalks per redesign of Williams Rd. Implement lead pedestrian interval, and install pedestrian countdown signal heads. | \$218,140 | City |
| AH003 | Williams Rd at Monte Bella Blvd | Large numbers of vehicles and pedestrians at intersection. Restricting left turns removes conflict point. | Upgrade existing crosswalks with high-visibility yellow crosswalk. Continue to restrict left turns into the high school at Monte Bella Blvd from Williams Rd. | \$14,000 | City |
| AH004 | Williams Rd at existing mid- block crosswalk | Collision history in crosswalk. | Enhance crosswalk with pedestrian hybrid beacon and pedestrian refuge island. Note: Crosswalk markings should be removed until the planned enhancements are installed and operational. | \$800,000 | City |
| AH005 | Williams Rd at Freedom Parkway | Large numbers of vehicles and pedestrians at intersection. Reports of drivers not respecting pedestrians. | Conduct intersection control evaluation analysis to study installation of roundabout. Upgrade to yellow high-visibility crosswalks. | \$60,000 | City |
| AH006 | Williams Rd at Freedom Parkway | Drivers may not know they're in a school zone until they are very close to campus. | Install additional school zone signage assembly A. | \$1,700 | City |
| AH007 | Freedom Parkway from Constitution Blvd to Williams Rd | Large four-lane roadway with low traffic volume. Student was hit crossing at Torona Way and Cougar Drive. | Upgrade existing Class II bike lane to buffered bike lanes. Evaluate for potential reduction in the number of lanes, Class IV cycle track, and pedestrian crossing locations. | \$426,740 | City |
| AH008 | Freedom Parkway at Williams Rd | Transition across right turn lane is challenging for people on bikes. | Install bike-lane conflict striping across right turn lane transition, and conflict striping across the intersection to match the receiving buffered bike lane. | \$18,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|--|--|-----------|------------------------|
| AH009 | Burke St/back entrance to school | Entrance is not currently ADA accessible. | Improve lighting and connection from Burke to make it ADA accessible. | \$39,000 | School |
| AH011 | Freedom Parkway at Estrella Way | Students walking to Alisal High and La Paz Middle | Install high-visibility crosswalk, and construct curb extensions with curb ramps across Estrella. | \$130,000 | City |
| AH012 | School parking lot | No dedicated space for students to walk into campus from the east. | Construct formal pedestrian pathway through eastern driveway into campus. Consider removing parking spaces next to portables, and repurpose space for pedestrian path. | \$10,000 | School |
| AH013 | School parking lot | Difficult for drivers to leave the school parking lot, conflicts with pedestrians crossing. | Consider creating a new right- turn-only lane from the school parking lot and closing driveway access at Monte Bella Blvd to reduce conflicts with students crossing. Evaluate Williams Rd crosswalk location and signal operations with any changes to lane configurations. Direct drop- off to school campus. | \$11,700 | School |
| AH014 | Camarillo Court at Moreno Dr | Traffic from both Alisal High and Cesar Chavez Elementary | Add bike route signage, sharrow striping, and traffic calming if requested and supported by neighborhood residents. | \$550,800 | City |
| AH015 | Gaviota Dr from Paseo Grande to Tecopa Way | Key drop-off location, reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$214,200 | City |
| AH016 | Camarillo Court at back entrance | Low visibility for students walking after dark. | Add pedestrian-scale lighting to improve back entrance to school. | \$83,200 | School |

BARDIN ELEMENTARY

Bardin Elementary is located at the eastern edge of Salinas. Most Bardin students live in the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Bardin parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 75 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 12, below.

Bardin Elementary School

CURRENT INFRASTRUCTURE CONDITIONS

Motorist Conditions

- At the time of the audit, Bardin Elementary had one small drop-off loop at the front of campus off Bardin Road and a side entrance through the school parking lot.
- Drivers have been observed coming southbound on Bardin Road and making U-turns past the median at the intersection of Bardin Road and East Alisal Street to get back on northbound Bardin Road and enter the school drop-off loop.
- Drivers have been observed parking along Bardin Road and dropping students off at the curb.
- As of the writing of this plan, the speed limit in front of the school is 35 miles per hour.

Pedestrian Conditions

- A complete sidewalk is in place on the northeast side of Bardin Road, adjacent to the school campus.
- There is no sidewalk or pedestrian facility on the southwest side of Bardin Road directly across the street from campus.

- The intersection of Bardin Road and East Alisal Street is a minor-street stop-controlled T-intersection. A project is currently in construction to replace the intersection with a roundabout.
- At the time of the audit, there was one faded standard crosswalk on the north leg of the Bardin Road/East Alisal Street intersection, which led directly to the front of school.
- There are several pedestrian gates into campus, including one at Bardin Road and another through the school's main parking lot.

Bicycling Conditions

- At the time of the audit, there were no bicycle facilities on Bardin Road. The project currently in construction includes buffered bike lanes on Bardin Road, which are included in the recommendation table and map below.
- At the time of the audit, there were Class II bicycle lanes on East Alisal Street near the school. The current project will upgrade these to buffered bicycle lanes.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND BARDIN ELEMENTARY

The following table lists recommendations for Bardin, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|--|-------------------|------------------------|
| BE001 | Alisal Rd at school parking lot entrance | Conflict point between pedestrians and vehicles | Install high-visibility yellow crosswalk across entrance. | \$4,000 | School |
| BE002 | E Alisal St at Bardin Rd | Project currently in construction. | Install double roundabout configuration at intersection, and include new striping plan and roadway reconfiguration per Alisal Vibrancy Plan and current Bardin SRTS project. | Project Funded | City |
| BE003 | E Alisal St from Sconberg Parkway to Tampa St | Project currently in construction. | Install new sidewalk on the south side of the roadway and Class I shared-use path between Margaret St and Bardin Rd, per Bardin SRTS project. Long term: Extend shared-use path from Margaret St to Skyway Blvd. | Project Funded | City |
| BE004 | E Alisal St from Bardin Rd to Skyway Blvd | Project currently in construction. | Install buffered bike lanes, per Bardin SRTS project. | Project Funded | City |
| BE005 | E Alisal St at Margaret St | Project currently in construction. | Install high-visibility crosswalk, curb extensions, and rectangular rapid flashing beacon, along with appropriate yield signage and striping. | Project Funded | City |
| BE006 | Bardin Rd from Sconberg Parkway to Williams Rd | Project currently in construction. | Reconfigure roadway to one lane in each direction with a center turn lane, per Bardin SRTS project. | Project Funded | City |
| BE007 | Bardin Rd at school drop-off loop | Parents parking in drop-off loop. | Install no-parking signage to reduce parent parking in loop. | \$850 | School |
| BE008 | Bardin Rd from Alisal Rd to Williams Rd | Project currently in construction. | Install high-visibility crosswalk across side streets with curb extensions and curb ramps, per Bardin SRTS project. Install marked crosswalks across Bardin Rd at Toro Ave and Countryside Drive. | Project Funded | City |
| BE009 | Bardin Rd at Williams Rd | Project currently in construction. | Install high-visibility crosswalks and upgrade curb ramps at three of the corners. Include curb extensions at southwest corners, and remove dedicated right turn pocket/lane per Bardin SRTS plan. Install conflict-area striping for the buffered bike lane approach to the intersection. Evaluate intersection for lead pedestrian interval feasibility. | Project Funded | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|--|---|-------------------|------------------------|
| BE010 | Bardin Rd from Alisal Rd to Williams Rd | Project currently in construction. | Install Class II buffered bikeway along with accompanying striping, per Bardin SRTS project. | Project Funded | City |
| BE011 | Paloma Ave from Quilla St to Margaret St | Reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$754,800 | City |
| BE012 | Paloma Ave from Market St to Toro Ave | Reports of speeding, complex intersection. | Work with neighborhood residents to develop access control plan that includes pedestrian-safety improvements and additional intersection control. | \$40,000 | City |
| BE013 | Sconberg Parkway from Alisal Rd to Monte Bella Blvd | No bicycle connection to Monte Bella neighborhood. | Install Class II bike lane and signage (extended project further with new development). | \$46,580 | City |

BORONDA MEADOWS ELEMENTARY

Boronda Meadows is located at the western edge of Salinas and draws most of its students from the surrounding neighborhoods. Many students must cross North Davis Road to reach the school, and some must cross Highway 101 (see map on the following page).

PARENT SURVEY

Boronda Meadows parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 83 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 13, below.

Figure 13. Parents' top concerns about letting children walk or bike to and from school.

A Class I path is recommended on Davis Rd south of the school

Boronda Meadows Elementary School Salinas Safe Route to School Plan

Motorist Conditions

- Boronda Meadows is located off North Davis Road, a four-lane arterial roadway that runs the length of western Salinas. North Davis Road is congested before and after school.
- There is a large, two-lane drop-off area on the school campus. There are two parking lots on the north side of campus that are reserved for staff and visitors. Left turns out of the school parking lot are allowed at the intersection of North Davis Road and Larkin Street. There is an additional exit from the school parking lot that allows right turns only onto North Davis Road.
- Bus drop-off takes place in a smaller loading area on the east side of campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 500–100 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Larkin Street and North Davis Road near the school.
 The sidewalk ends on the west side of North Davis Road south of the school campus at West Rossi Street.
- There are standard white crosswalks on all legs of the Larkin Street and North Davis Road intersection to the east of the school driveway entrance. All crosswalk stripes are faded.
- There are curb ramps at the Larkin Street and North Davis Road intersection, but they are not updated to current ADA standards.

Bicycling Conditions

- There are Class II bicycle lanes on North Davis Road. Bike lane striping is faded.
- There are no bicycle facilities on Larkin Street or other residential roadways near the school.

The central intersection on the school campus is large and requires several staff to manage traffic

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND BORONDA MEADOWS ELEMENTARY

The following table lists recommendations for Boronda Meadows, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|----------------------------|--|--|-----------|------------------------|
| BME001 | School parking lot | Large and complex intersection requiring several school staff members to manage. | Consider installing a roundabout in the school parking lot intersection. | \$195,000 | School |
| BME002 | N Davis Rd at Larkin St | High traffic volumes at intersection, congestion before and after school. | Conduct traffic analysis at this intersection. Upgrade crosswalks to yellow high-visibility. | \$18,750 | City |
| BME003 | N Davis Rd | Connection to regional bike route. | Install Class I shared-use path on west side of Davis Road to connect to Marina/Salinas multi-modal corridor. Consider street trees and landscaping. | \$235,000 | City |

CARR LAKE COMMUNITY DAY SCHOOL

Carr Lake is an alternative middle and high school located in central Salinas. The school has a small number of students who live throughout the city (see map on the following page).

PARENT SURVEY

Carr Lake parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, but no responses were received.

There is missing sidewalk on the north side of Sherwood Place

to School Plan

School Profiles

Motorist Conditions

- Carr Lake School is located on Sherwood Place, a two-lane roadway with some parking on both sides of the street. Sherwood Place is very congested before and after school.
- There are several schools on Sherwood Place, and there are multiple drop-off areas and parking lots among their campuses. There is a parking lot on the north side of campus that is shared with staff and visitors. Left turns are permitted out of the school parking lot.
- Bus drop-off takes place on the back side of the school campus. Bus transportation is offered only to students who live outside a two-mile radius.
- At the time of the audit, the traffic lines on Sherwood Drive were faded and need repainting.
- The area in front of the school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 500–100 ft from the school boundary and have either 15 mph or 25 mph speed limits.

Pedestrian Conditions

- There are sidewalks on the south side of Sherwood Place but none on the north side.
- There are sidewalks on both sides of the street on Sherwood Drive between East Bernal Drive and Highway 101. South of the highway, there is missing sidewalk on the west side of Sherwood Drive to Rossi Street.
- There are no high-visibility yellow crosswalks near the school campus. There is a standard white crosswalk on Sherwood Place near the entrance to the Mount Toro High parking lot.
- There are curb ramps at the intersection of Sherwood Drive and Sherwood Place.
- Some students cut through the surrounding fields to get to campus.
- Mount Toro High is not served by a MST bus route.

Bicycling Conditions

- There are no bicycle facilities on Sherwood Place.
- There are buffered Class II bicycle lanes on Sherwood Drive between Sherwood Place and East Laurel Drive, and Class II bicycle lanes south of the school to East Rossi Street.
- There are dashed green conflict markings on Sherwood Drive at the intersection of Sherwood Place.

School Profiles

::1

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND CARR LAKE COMMUNITY DAY SCHOOL

The following table lists recommendations for Carr Lake, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|--|---|--|--------------|------------------------|
| CLCD001 | Sherwood Pl | Missing sidewalk | Fill in sidewalk gaps on north side near Sherwood Dr. | \$60,000 | City |
| CLCD002 | Sherwood Pl | Flooding during rainy season. | Upgrade stormwater retention and runoff reduction along Sherwood Pl. | \$2,000,000 | City |
| CLCD003 | Sherwood Pl at existing mid-block crosswalk | Connection to regional bike route. | Install Class I shared-use path on west side of Davis Road to connect to Marina/Salinas multi-modal corridor. Consider street trees and landscaping. | \$235,000 | City |
| CLCD004 | Sherwood Dr | MST bus blocks traffic turning right onto Sherwood Pl. | Relocate bus stop to north side of Sherwood Pl to enhance visibility at intersection, and construct bus pullout on north side of intersection. | \$75,000 | City |
| CLCD005 | Sherwood Dr from Bernal St and Rossi St | Large four-lane roadway with high traffic volumes and speeds. | Consolidate bike lanes to one side of the road for a two-way cycle track or shared-use path. Upgrade bike lanes on Natividad between Bernal and Boronda to Class IV separated bikeways, and install protected intersection treatments at Bernal to facilitate transition to cycle track. | \$12,541,180 | City |
| CLCD006 | Sherwood Dr at Sherwood Pl | Difficult for drivers to turn in and out of Sherwood Pl. | Re-evaluate intersection control evaluation analysis to study options for intersection control. | \$40,000 | City |
| CLCD007 | Behind school | Students walking across agricultural fields to reach the schools. | Install trails or shared-use paths to connect to Sherwood, Laurel Dr, and Madeira Ave. | \$2,100,000 | City |
| CLCD008 | Service roads near canal between Rossi St and Main St and Main St and Sherwood Dr | Sherwood Dr over Hwy 101 has high traffic volumes and speeds. | Create Class I shared-use path on service roads/ROW adjacent to canal, as identified in Urban Greening Plan. | \$1,800,000 | City |
| CLCD009 | Service road near canal at Main St | If a shared-use path were installed, a connection would be needed across North Main St. | Consider redesign of Casentini St/ Main St intersection to incorporate bicycle crossing. Consider removing parking and installing a raised shared-use path on both sides of Main St to connect the Class I path to the Casentini intersection. | \$305,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|--------------------------------|--|---|-----------|------------------------|
| CLCD010 | El Puente Campus | No marked crosswalk for people walking to campus. | Install high-visibility crosswalk to connect sidewalk with front of campus. | \$4,000 | City |
| CLCD011 | Sherwood Drive at Bernal St | Main crossing point for people walking from neighborhoods northwest of school. | Install lead pedestrian interval and conduct counts to determine whether protected phase is needed. | \$240,000 | City |

CESAR CHAVEZ ELEMENTARY

Chavez Elementary is located in east Salinas. The campus is adjacent to La Paz Middle School to the north and Soberanes Park to the east. Most of its students live in surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Chavez parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 49 surveys were received back. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 14, below.

Figure 14. Parents' top concerns about letting children walk or bike to and from school.

Bike lanes are recommended on Towt St between Freedom Parkway and Paseo Grande

Cesar E. Chavez Elementary School

Motorist Conditions

- Cesar Chavez Elementary is located on Towt Street, a two-lane collector street with low traffic volumes.
- Most drop-off takes place in the school's drop-off loop adjacent to its main parking lot.
- Some drop-off also occurs on Towt Street in front of the school.

Pedestrian Conditions

- There are complete sidewalks on both sides of Towt Street.
- There are standard yellow crosswalks on three legs of the intersection of Towt Street and Mae Avenue at the west end of the school, and on all legs of the intersection of Towt Street and Paseo Grande in front of Soberanes Park.
- Students walking to school can enter through the front on Towt Street or through the side entrance off Mae Avenue.

- The south side of Towt Street directly across from school has a wall separating it from the residential neighborhood along Moreno Drive. Students walking out of this neighborhood do so using either Moreno Way or Paseo Grande.
- Towt Street and Del Monte Avenue carry school traffic to several schools in the area. The intersection of Towt and Del Monte is heavily used by families walking to school.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 500–100 ft from the school boundary and have either 15 mph or 25 mph speed limits.

Bicycling Conditions

- There are no bicycle facilities on Towt Street or other residential roadways near the school.
- There are Class II bicycle lanes on Freedom Parkway.

The intersection of Towt St and Moreno St is recommended for high-visibility crosswalks and curb extensions

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND CHAVEZ ELEMENTARY

The following table lists recommendations for Chavez Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|--|--|---|-----------|------------------------|
| CECE001 | Towt St from Freedom Parkway to Del Monte Ave | No bike facilities, key route to multiple schools | Install traffic calming if requested and supported by neighborhood residents. | \$510,000 | City |
| CECE002 | Towt St at Moreno St | Primary school crossing. High volumes of pedestrians and vehicles. | Upgrade crosswalks to high- visibility, and construct curb extensions with ramps. | \$268,000 | City |
| CECE003 | Towt St at Del Monte Ave | High volumes of pedestrians and vehicles traveling to multiple schools. | Upgrade crosswalks to high- visibility, and construct curb extensions with ramps. | \$268,000 | City |
| CECE004 | Towt St at Paseo Grande | High volumes of pedestrians and vehicles. | Upgrade crosswalks to high- visibility, and construct curb extensions with ramps. | \$268,000 | City |
| CECE005 | Towt St at Freedom Parkway | Route for students walking to Cesar Chavez and Alisal High. | Construct curb extensions with curb ramps across Towt St. Include appropriate yield signage and striping. | \$128,850 | City |
| CECE006 | Towt St from Freedom Parkway to Paseo Grande | No bike facilities, limited demand for parking. | Install Class II bike lanes. | \$42,240 | City |
| CECE007 | Mae Ave at Del Monte Ave | Key pedestrian route to school. | Install high-visibility crosswalks, and construct curb extensions across Mae Ave. | \$208,000 | City |
| CECE008 | Mae Ave at C St | Key pedestrian route to school. | Install raised high-visibility crosswalk across C St, and construct curb ramps. | \$175,000 | City |
| CECE009 | Mae Ave at D St | Key pedestrian route to school. | Install raised high-visibility crosswalks across D St, and construct curb ramps. | \$175,000 | City |
| CECE010 | Josephine St at D St | Key pedestrian route to school. | Upgrade crosswalks to high visibility, and construct curb extensions with ramps. | \$268,000 | City |
| CECE011 | Gallindo St at C St | Key pedestrian route to school. | Install high-visibility crosswalk across C St, and construct curb ramps. | \$30,000 | City |
| CECE012 | Gallindo St at D St | Key pedestrian route to school. | Install high-visibility crosswalk across D St, and construct curb ramps. | \$30,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|----------------------------------|---|---|-----------|------------------------|
| CECE013 | Josephine St at C St | Key pedestrian route to school. | Install raised high-visibility crosswalk across Josephine St, and construct curb ramps. | \$175,000 | City |
| CECE014 | Kilbreth Ave at Del Monte Ave | Key pedestrian route to school. | Install high-visibility crosswalk, and construct curb extensions with curb ramps across Kilbreth Ave. | \$130,000 | City |
| CECE015 | Galindo St at Del Monte Ave | Key pedestrian route to school. | Install high-visibility crosswalk, and construct curb extensions with curb ramps across Galindo. | \$130,000 | City |
| CECE016 | School campus | Traffic in school loops backs up through school parking lot onto Towt St. | Implement valet program or park and walk program | N/A | School |

CREEKSIDE ELEMENTARY

Creekside is located in northeast Salinas and draws students primarily from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Creekside parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 63 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 15, below.

Figure 15. Parents' top concerns about letting children walk or bike to and from school.

Opening a back entrance to school is recommended to reduce traffic on Kittery St

Creekside Elementary School

Motorist Conditions

- Creekside Elementary is located on Kittery Street, a two-lane residential street. The school is immediately adjacent to Creekbridge Neighborhood Park.
- There is a drop-off loop at the front of the school campus. Parents also drop students off in the staff parking lot next to the drop-off loop.
- There is a bus drop-off loop on the south side of campus off Beacon Hill Drive.
- There are speed bumps in front of the school on Kittery Street.
- The area in front of the school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100–500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Bicycling Conditions

 There are no bicycle facilities on residential roadways near the school. There are Class II buffered bicycle lanes on Constitution Boulevard.

Pedestrian Conditions

- There is continuous sidewalk on both side of Kittery Street, Beacon Hill Drive, and other residential roadways around the campus.
- There is a yellow high-visibility crosswalk across Kittery Street at Crestview Street, in front of the school. There is also a regular yellow crosswalk across Crestview at Kittery.
- There is a crosswalk on the school campus where the drop-off loop and staff parking lot meet, which connects to the crosswalk across Kittery Street.
- There are regular crosswalks across Snug Harbor Street and Newington Street at Kittery Street, and across two legs of the intersection of Kittery Street and Beacon Hill Drive.
- There is a shared-use path running between Nantucket Boulevard and Crestview Street.
- There are no marked crossings at the eastern intersection of Beacon Hill and Constitution.
 This is a route to school for many families.
- There is a shared-use path running between Nantucket Boulevard and Crestview Street.

There is not currently a marked crosswalk for people walking to school from the Massachusetts Dr neighborhood

include a physical barrier such as parked cars, planters, or plastic posts between the bicycle lane and the vehicle lane. providing separation and safety for cyclists.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND **CREEKSIDE ELEMENTARY**

The following table lists recommendations for Creekside Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|---|-----------|------------------------|
| CE001 | Kittery St at Crestview St | Need to update school signage. | Install school crossing signs on both sides of Kittery St (crossing assembly A). | \$1,700 | City |
| CE002 | Beacon Hill Dr from Declaration St to Kittery St | Traffic congestion on Kittery St in front of school. | Add loading-zone curb markings and signage for drop-off and pick-up (on side adjacent to the school). | \$4,100 | School/City |
| CE003 | Beacon Hill Dr from Constitution Blvd to Constitution Blvd | Reports of speeding. | Install sharrow markings, signage, and traffic calming if requested and supported by neighborhood residents. | \$244,800 | City |
| CE004 | Beacon Hill Dr from Constitution Blvd to Constitution Blvd | Key pedestrian route to school. | Add high-visibility crosswalks to all side streets. | \$112,000 | City |
| CE005 | Beacon Hill Dr from Declaration St to Kittery St | Reports of speeding. | Add speed feedback sign. | \$10,700 | City |
| CE006 | Fitzgerald St at greenway path crossing | No marked crosswalks for greenway path. | Install raised crosswalk with high visibility, yield signage, and striping. | \$154,700 | City |
| CE007 | Snug Harbor St at greenway path crossing | No marked crosswalks for greenway path. | Install raised crosswalk with high visibility, yield signage, and striping. | \$154,700 | City |
| CE008 | Freedom Parkway at Williams Rd | Transition across right turn lane is challenging for people on bikes. | Install bike-lane conflict striping across right turn lane transition, and conflict striping across the intersection to match the receiving buffered bike lane. | \$154,700 | City |
| CE009 | Newington St at greenway path crossing | No marked crosswalks for greenway path. | Install raised crosswalk with high visibility, yield signage, and striping. | \$154,700 | City |
| CE010 | Kittery St at Snug Harbor | Key pedestrian route to school. | Upgrade crosswalk to high- visibility, and construct curb extensions across side street. | \$104,000 | City |
| CE011 | Kittery St at Crestview St | Key pedestrian route to school. | Upgrade crosswalk to high- visibility, and construct curb extensions across side street. | \$104,000 | City |
| CE012 | Kittery St at Newington St | Key pedestrian route to school. | Upgrade crosswalk to high- visibility, and construct curb extensions across side street. | \$104,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|---|-------------|------------------------|
| CE013 | Nantucket at Declaration St | Key pedestrian route to school. | Upgrade crosswalks to high- visibility, and construct curb extensions (where not in conflict with bike lanes or future Class IV). | \$216,000 | City |
| CE014 | Constitution Blvd | No marked crossing for people walking to school from Massachusetts Dr neighborhood. | Evaluate pedestrian crossing opportunities between Massachusetts Dr neighborhood and Creekbridge neighborhood. Install conflict striping across intersections to connect bike lanes or future Class IV. | \$22,660 | City |
| CE015 | Beacon Hill Dr at Constitution (west intersection) | Large intersection, concerns with safety, and reports of speeding traffic. | Install conflict striping across intersections to connect bike lanes or future Class IV. Install pedestrian refuge island on north leg. Consider for protected intersection treatments. | \$1,412,660 | City |
| CE016 | Constitution Blvd from Boronda Rd to Independence | Large four-lane roadway with high traffic volumes and speeds. | Upgrade Class II bike lane to Class IV. | \$5,458,680 | City |
| CE017 | Freedom Parkway at Constitution Blvd | People walking from Massachusetts Drive neighborhood have to go out of their way to cross Constitution. | Install crossing on third leg of intersection to connect to trail that connects to Massachusetts Drive. Add pedestrian refuge island and conflict striping across intersection. | \$105,000 | City |
| CE018 | Constitution Blvd at Cape Cod Way | Long crossing distance for pedestrians. | Install high-visibility crosswalk and curb extensions across Cape Cod Way, and install conflict striping for bike lane or future Class IV. | \$110,720 | City |
| CE019 | Crestview St from Kittery St to Great Island St | No bicycle facilities to connect to greenway path | Create bicycle boulevard by installing traffic calming, sharrow markings, and signage, and connect to greenway path. | \$244,800 | City |
| CE020 | School campus | Limited bike parking on campus. | Upgrade bike racks and bike cage on campus | \$8,000 | School |
| CE021 | School campus | Traffic congestion on Kittery St in front of school. | Provide access to the school from the back side of campus to let students avoid school drop-off traffic. | \$8,500 | School |
| CE022 | Kittery St at Fitzgerald St | Key pedestrian route to school. | Install high-visibility crosswalk and curb extensions across Fitzgerald. Upgrade to high- visibility crosswalk, and install curb extensions across Kittery St. | \$112,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|-------------------------------------|--|---|-----------|------------------------|
| CE024 | Kittery St at Beacon Hill Dr | Key pedestrian route to school. | Install high-visibility crosswalks and curb extensions on three legs of intersection. | \$162,000 | City |
| CE025 | Creekbridge Neighborhood Park | Traffic congestion on Kittery St in front of school. | Install path to connect back entrance to school with Declaration Street. | \$20,000 | City |

DR. MARTIN LUTHER KING ACADEMY

King Academy is located in east Salinas. The campus is adjacent to the Alisal Union District offices and Jesse G. Sanchez Elementary. The two schools draw students from surrounding neighborhoods (see map on the following page).

PARENT SURVEY

King Academy parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 108 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 16, below.

Figure 16. Parents' top concerns about letting children walk or bike to and from school.

Dr. Martin Luther King Jr. Elementary School

Motorist Conditions

- North Sanborn Road is a major arterial street with high traffic volumes.
- Drivers enter the drop-off loop off North Sanborn Road and turn right for Martin Luther King Jr. Academy or left for Sanchez Elementary. Staff members assist with traffic flow in the drop-off loops during school drop-off and pick-up.
- The other entrance to the King Academy parking lot is on Acosta Plaza. Drivers are encouraged to exit the school parking lot here.
- There is a speed feedback sign on Sanborn Road near Mohar Street. Parents reported issues with speeding and drivers making U-turns around the center medians on Sanborn Road to access the school parking lot.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100–500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Families cross Garner Ave at Pacific Ave

Pedestrian Conditions

- The school has pedestrian access points from North Sanborn Rd and Acosta Plaza.
- There is continuous sidewalk on both sides of Sanborn Road between East Laurel Drive and Garner Ave, and on nearby residential streets.
 There is some broken sidewalk on Acosta Plaza behind the school.
- Acosta Plaza west of the school campus is a private road with narrow sidewalks on both sides.
- The streets across from the school (Kimmel Street, Alma Avenue, Montana Street, and Mohar Street) have rolled curbs on both sides of the street. Drivers sometimes park on the landscape strip or sidewalk.
- There is a standard yellow crosswalk across two legs of the signalized intersection of Sanborn Road and Kimmel Street. There are no other striped crosswalks on Sanborn Road between Acosta Street and Garner Avenue.

- ADA ramps have been installed at the intersection of Sanborn Road and Kimmel Street.
- There is a pedestrian entrance to campus from the parking lot on Acosta Plaza.
- The "Breadbox" Recreation Center, which is next to the school, is another place where parents drop off and pick up students. There have been conflicts reported between drivers pulling into the recreation center parking lot and pedestrians crossing the entrance and exit driveways.
- Parents with students have been seen crossing Sanborn Road outside of marked crosswalks to get to school between Mohar Street and Montana Street.
- A crossing guard is present before and after school at Sanborn Road and Kimmel Street.

Bicycling Conditions

 There are no bicycle facilities on North Sanborn Road or other residential streets near the school.

Class II bike lanes are recommended for Sanborn Ave

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND DR. MARTIN LUTHER KING ACADEMY

The following table lists recommendations for King Academy, and the map below shows their locations in relation to the school.

driveways.

| MLKA001 | Garner Ave at Pacific Ave | Pedestrians crossing Garner Ave at Pacific. No marked crosswalk, reports of speeding and of drivers not yielding. | Install planned all-way stop with high-visibility crosswalks and nearside bus bulbouts/curb extensions. | \$119,400 | City |
| MLKA002 | Garner Ave at Atlantic St | Key pedestrian route to school. | Install new high-visibility yellow crosswalk across Atlantic. | \$4,000 | City |
| MLKA003 | Garner Ave at Sieber St | Key pedestrian route to school. | Install new high-visibility yellow crosswalk across Sieber St. | \$4,000 | City |
| MLKA004 | Garner Ave at Sanborn Rd | Key pedestrian route to school. Not enough space for pedestrians at northeast corner. | Upgrade to high-visibility yellow crosswalk on all legs. Install curb extension at northeast corner to reduce crossing distance on Garner Ave. | \$66,000 | City |
| MLKA005 | Sanborn Rd at Alma Ave | Key pedestrian route to school. | Upgrade to high-visibility yellow crosswalk across Alma. | \$4,000 | City |
| MLKA006 | Sanborn Rd at Kimmel St | Key pedestrian crossing to school. Students don't have enough time to cross. | Optimize signal timing and improve coordination with nearby signals. Upgrade to high-visibility crosswalks for both legs. Install leading pedestrian interval and consider protected left turn from Sanborn to Kimmel. | \$188,000 | City |
| MLKA007 | Sanborn Rd at Montana St | Key pedestrian route to school. | Upgrade to high-visibility yellow crosswalk across Montana. | \$4,000 | City |
| MLKA008 | Sanborn Rd from Del Monte Ave to Laurel Dr | No bicycle facilities. | Short term: Install Class II bike lanes between Laurel and Del Monte. Long term: Widen sidewalk to create shared-use path between Laurel and Garner. Install bike conflict markings at recreation center entrance and exit driveways. Install raised median with pedestrian refuge islands. | \$1,799,520 | City |
| MLKA009 | Garner Ave from Sanborn Rd to end of street (to the north) | No bicycle facilities, reports of speeding. | Install traffic calming, sharrow markings, and bicycle boulevard signage. | \$938,400 | City |
| MLKA010 | Acosta Plaza from Garner Ave back entrance to school | Key pedestrian route to school, broken sidewalk. | Repair sidewalk. | \$180,000 | City |

DR. OSCAR F. LOYA ELEMENTARY

Loya Elementary is located at the eastern edge of Salinas next to Williams Park. Its students come primarily from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Loya Elementary parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 59 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 17, below.

Figure 17. Parents' top concerns about letting children walk or bike to and from school.

STUDENTS USING ACTIVE TRANSPORTATION (BASED ON 59 SURVEY RESPONSES)

The school has had a hard time retaining crossing guards at the intersection of Sanborn Rd and Buckhorn Dr

Dr. Oscar F. Loya Elementary School

Motorist Conditions

- The main entrance to Loya elementary is on Cougar Drive. Drivers have the option of pulling into the drop-off loop or dropping off on Cougar Drive in front of the school.
- There is a gate at the side of the school where the bus drop-off loop is located on Elk Drive.
 There is also a back entrance to campus through the park, from Falcon Drive.
- Badger Way and Falcon Drive are the nearest access points in and out of this residential neighborhood.
- The school has a small parking lot that is shared between parents and staff. Many staff members use on-street parking.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are complete sidewalks on Cougar Drive, Elk Drive, and other residential roadways near the school.
- There are standard yellow crosswalks across two legs of the intersection of Cougar Drive at Badger Way in front of the school.
- There is a high-visibility crosswalk on the school campus where the drop-off loop and the staff parking lot meet. This crosswalk connects pedestrians coming from the street into the school frontage.
- There is a paved pathway on the north side of the campus (back of the school) that connects Falcon Drive and the school through Williams Park.
- Many students cross Sanborn Road at Buckhorn Drive. Sanborn Road is a five-lane roadway with a 35-mph speed limit at Buckhorn Drive.

Bicycling Conditions

- There are no bicycle facilities on Cougar Drive, Falcon Drive, Elk Drive, or other residential roadways near the school.
- There are Class II bike lanes on North Sanborn Road, East Boronda Road, Williams Road, and Freedom Parkway, which surround the school on four sides.

Encouraging parent drop-off on Elk Dr and Falcon Dr would help reduce traffic in front of the school

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND LOYA ELEMENTARY

The following table lists recommendations for Loya Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|---|---|---|-------------|------------------------|
| DOLA001 | Buckhorn Dr at Bison Way | Key pedestrian route to school. | Install raised high-visibility crosswalk and curb extension across Bison Way. | \$249,000 | City |
| DOLA002 | Buckhorn Dr from Rider Ave to Falcon Dr | Key route to school, no bicycle facilities. | Install traffic calming and create bike boulevard. | \$1,081,200 | City |
| DOLA003 | Buckhorn Dr from Saguaro Dr to Sanborn Rd | Key pedestrian route to school. | Install raised crosswalks and high-visibility crosswalks on side streets | \$1,043,000 | City |
| DOLA004 | Cougar Dr from Freedom Parkway to Elk Dr | Reports of speeding. | Install traffic calming if requested and supported by neighborhood residents, and additional school zone signage. | \$122,400 | City |
| DOLA005 | Cougar Dr at Badger Way | Key pedestrian route to school. | Install curb extensions to improve crossing. | \$100,000 | City |
| DOLA006 | Cougar Dr at Badger Way | Updated signage needed. | Install school crossing signage (assembly B). | \$1,700 | City |
| DOLA007 | Cougar Dr at Elk Dr | Key pedestrian route to school. | Install curb extensions across Elk. | \$100,000 | City |
| DOLA008 | Cougar Dr at Cougar Way | Key pedestrian route to school. | Install curb extensions across Cougar Way. | \$100,000 | City |
| DOLA009 | Cougar Dr at Raven Ct | Key pedestrian route to school. | Install curb extensions across Raven Ct, both legs. | \$200,000 | City |
| DOLA010 | Elk Dr and Falcon Dr | Traffic congestion on Cougar Dr in front of school during drop-off and pick-up. | Add loading-zone signage on Elk Drive and Falcon Drive, and encourage drop-off on these streets. | \$850 | School/City |
| DOLA011 | Falcon Dr at Buckhorn Dr | Back entrance to school. Reports of speeding and drivers doing donuts in the intersection. | Evaluate all-way stop or consider traffic circle. | \$200,000 | City |
| DOLA012 | Falcon Dr at Elk Dr | Key pedestrian route to school. | Install curb extensions across Elk. | \$100,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|---|--|---|-------------|---------------------|
| DOLA013 | Falcon Dr from Bison Way to Buckhorn Dr | Reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$122,400 | City |
| DOLA014 | School loop on Cougar Drive | Parents entering through parking lot exit. | Upgrade "Do Not Enter" sign at parking lot exit to standard sign. | \$850 | School |
| DOLA015 | School loop on Cougar Dr | Traffic congestion on Cougar Dr in front of school during drop-off and pick-up. | Consider working with parent volunteers or PTA on a valet dropoff program in the main school loop. Close middle entrance/exit to loop to shift traffic away from main school crosswalk. | \$8,500 | School |
| DOLA016 | Sanborn Rd at Buckhorn Dr | Key pedestrian route to school. Sanborn is a five-lane roadway at this intersection. Reports of speeding and drivers not yielding to pedestrians. | Install planned pedestrian hybrid beacon, and upgrade to high- visibility yellow crosswalk across Buckhorn Drive. | \$708,000 | City |
| DOLA017 | Sanborn Rd at Buckhorn Dr | Difficult to find crossing guards who are willing to work this intersection. | Continue recruiting for crossing guard support. | N/A | School |
| DOLA018 | Sanborn Rd from Freedom Parkway to Boronda Rd | Large four-lane roadway with high traffic volumes and speeds. | Install Class IV separate bikeway or Class IIB buffered bike lanes and conflict striping. | \$1,665,360 | City |
| DOLA019 | Sanborn Rd at Boronda Rd | Planned city project. | Install roundabout. | \$2,500,000 | City |
| DOLA020 | Williams Rd from Freedom Parkway to Boronda Rd | Large four-lane roadway with high traffic volumes and speeds. | Install Class II buffered bikeway and conflict striping. Consider upgrading to Class IV bikeway. | \$1,850,400 | City |

DUAL IMMERSION ACADEMY OF SALINAS (DIAS)

Dual Immersion Academy of Salinas (DIAS) is located on the western edge of Salinas and draws students from throughout the city. Only a few live in the surrounding neighborhoods, and most live more than one mile from the school (see map on the following page).

PARENT SURVEY

DIAS parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 13 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 18, below.

Figure 18. Parents' top concerns about letting children walk or bike to and from school.

STUDENTS QUALIFYING FOR FREE OR REDUCED MEALS

55.6%

STUDENTS USING ACTIVE TRANSPORTATION (BASED ON 13 SURVEY RESPONSES)

Access to the pedestrian bridge over Calle Del Adobe goes through school property and is currently closed

DIAS Boronda School

Motorist Conditions

- DIAS is located on Fontes Lane, a two-lane residential roadway with no parking allowed on either side of the street along school frontage.
- The campus is in a residential neighborhood and is separated from the rest of Salinas by North Davis Road and Highway 101. Calle Del Adobe is the main route to the school.
- There is a drop-off loop in the school parking lot, along with parking for visitors and staff.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There is continuous sidewalk on both sides of Fontes Lane and Addington Lane.
- Some sidewalk segments are narrow and obstructed by mailboxes and utility posts.
- Several intersections around the school have upgraded ADA ramps.
- The pedestrian overpass behind the school on Calle del Adobe is closed due to vandalism.
 Pedestrians have been seen crossing Calle
 Del Adobe near the overpass; there are no pedestrian crossing facilities across Calle Del Adobe at this location.

Bicycling Conditions

- There are no bicycle facilities on Fontes Lane, Addington Lane, Calle Del Adobe, or other roadways surrounding the school.
- The nearest bicycle facilities are Class II bike lanes on North Davis Road.

There are bus stops for other schools at the intersection of Fontes Ln and Addington Ln

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND DUAL IMMERSION ACADEMY OF SALINAS

The following table lists recommendations for DIAS, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|---|--|--|-----------|---------------------|
| DIAS001 | Parking lot | Drivers who want to park contribute to congestion in the school loop. No pathway for pedestrians into campus. | Restripe parking lot to allow access to parking spaces adjacent to the street without driving through the loop adjacent to the school. Establish a preferred walking route through the parking lot with painted walkways, quickbuild materials, or constructed sidewalk. | \$104,000 | School |
| DIAS002 | Empty parcel behind school | The school does not want a pedestrian overcrossing to provide access to the campus. Bridge is currently closed due to vandalism. | Reconstruct fencing and establish a path through the empty lot to allow bridge access without accessing school property. Explore potential to expand staff parking lot. Pursue easement to allow access to Apostolic Lane if necessary. | \$24,450 | County |
| DIAS003 | Back entrance | Bridge provides access for students who want to cross Calle Del Adobe. The school does not want a pedestrian overcrossing to provide access to campus. | Install gate connecting school campus to foot bridge. | \$8,500 | School |
| DIAS004 | Fontes/ Addington | Bus stops for Boronda Meadows and North Salinas High are located here. No marked crosswalks, buses block visibility. | Install curb extensions and marked crossings over Addington Lane and Fontes Lane. Alternative recommendation: Shift bus stops to Calle Del Adobe. | \$112,000 | County |
| DIAS005 | Fontes Lane | Vegetation obstructing sidewalk. | Work with neighboring property owners to cut back vegetation to remove sidewalk obstructions. | \$3,800 | School |
| DIAS006 | Fontes/Nancy, Jennifer, and Randall | Key pedestrian route to school. | Install or update curb ramps, and install marked crossings on side streets. | \$22,000 | School |

EL GABILAN ELEMENTAR

El Gabilan is located in north Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

El Gabilan parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 85 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 19, below.

Figure 19. Parents' top concerns about letting children walk or bike to and from school.

STUDENTS QUALIFYING FOR FREE OR REDUCED MEALS

STUDENTS USING ACTIVE **TRANSPORTATION** (BASED ON 85 SURVEY RESPONSES)

El Gabilan Elementary School

Motorist Conditions

- El Gabilan is located on Linwood Drive, a twolane residential roadway with a center median and parking on both sides of the street.
- There are a recently upgraded drop-off loop and a small parking lot along the school frontage.
 Left turns are not allowed out of the school drop-off loop. There is an additional parking lot on the north side of campus that is reserved for staff.
- Parents drop students off on the west side of Linwood Drive, and they walk across the street to the school campus.
- Some students travel on Laurel Drive to reach the school campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There is continuous sidewalk on both sides of Linwood Drive and other residential streets near the school.
- There is a high-visibility yellow crosswalk across Linwood Drive at Sequoia Street.
- At the time of the audit, there were faded white crosswalks on two legs of the intersection of Linwood Drive and East Laurel Drive.
- There are missing curb ramps at many intersections surrounding the school.
- The school has placed signs in the median discouraging pedestrians from walking over the median and across Linwood Drive, but many pedestrians ignore them.

Bicycling Conditions

 At the time of the audit, there were no bicycle facilities on Linwood Drive or other residential roadways near the school. The Linwood Drive Safe Routes to Schools project installed buffered bike lanes on Linwood Drive in 2021.

Buffered bike lanes and high-visibility crosswalks were recently installed on Linwood Drive

School Profiles

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND EL **GABILAN ELEMENTARY**

The following table lists recommendations for El Gabilan, and the map below shows their locations in relation to the school.

| | C | | | | |
|--------|---|--|--|---|---------------------|
| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
| EGE001 | Linwood Dr | No bicycle facilities. Vegetation obstructing school signage. | Install planned buffered bike lanes and traffic calming on Linwood. Plant trees in the median for street enclosure and tree canopy. Trim vegetation that obstructs school speed limit signs. | Bike lanes funded. Remaining cost \$10,000 | City |
| EGE002 | Linwood Dr at Sequoia St | Key pedestrian crossing to school. | Install pedestrian refuge island and yellow high-visibility crosswalk across Linwood, and high-visibility crosswalk across Sequoia. Install school assembly signage. | \$4,850 | City |
| EGE003 | Williams Rd at Moa Linwood Dr at Chaparral St nte Bella Blvd | Key pedestrian crossing to school. | Install yellow, high-visibility crosswalks on all four legs of intersection, with pedestrian refuge islands at both Linwood Dr crossings. Install school assembly signage. | \$216,850 | City |
| EGE004 | Linwood Dr at Rainier Dr | Key pedestrian crossing to school. | Upgrade crosswalks to yellow high-visibility. | \$16,000 | City |
| EGE005 | Linwood Dr at Elwood St | Key pedestrian route to school, reports of speeding. | Install yellow, high-visibility crosswalks on three legs of the intersection with pedestrian refuge island at the Linwood Dr crossing. Install school assembly signage. | \$112,850 | City |
| EGE006 | Laurel Dr at Linwood St | Key pedestrian route to school. Reports of drivers not yielding to pedestrians. | Upgrade crosswalks to high- visibility and reconstruct pedestrian curb ramps. Install pedestrian refuge island at Linwood Dr crossing. Implement leading pedestrian interval. | \$299,000 | City |
| EGE007 | Laurel Dr at Maryal Dr | Pedestrian route to school. | Install protected pedestrian signal phasing | \$200,000 | City |
| EGE008 | West Laurel Drive | Four-lane roadway with higher traffic volumes and speeds. | Install Class IIB buffered or separated bike lanes. | \$17,069,940 | City |
| EGE009 | Natividad Rd | Six-lane roadway with higher traffic volumes and speeds. | Install separated bikeway. | \$19,429,200 | City |
| EGE010 | Natividad Rd at Pacheco St | Six-lane roadway with higher traffic volumes and speeds. Route to soccer complex. | Install planned crosswalk improvements (rectangular rapid flashing beacon and pedestrian refuge island). | \$160,000 | City |

EL PUENTE SCHOOL

El Puente is an alternative middle and high school located in central Salinas. The school draws students from throughout the city (see map on the following page).

PARENT SURVEY

El Puente parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 5 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 20, below.

Figure 20. Parents' top concerns about letting children walk or bike to and from school.

Salinas Safe Routes to School Plan

Motorist Conditions

- El Puente School is located on Sherwood Place, a two-lane roadway with some parking on both sides. Sherwood Place is very congested before and after school.
- There are several schools located on Sherwood Place, with multiple drop-off areas and parking lots throughout their campuses. There is a parking lot on the north side of campus that is shared with staff and visitors. Left turns are permitted out of the school parking lot.
- Bus drop-off takes place on the back side of the school campus. Bus transportation is offered only to students who live outside a two-mile radius.
- At the time of the audit, traffic lines on Sherwood Dr were faded and need repainting.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on the south side of Sherwood Place but none on the north side.
- There are sidewalks on both sides of Sherwood Drive between East Bernal Drive and Highway 101. South of the highway, there is sidewalk missing on the west side of Sherwood Drive to Rossi Street.
- There are no high-visibility yellow crosswalks near the school campus. There is a standard white crosswalk on Sherwood Place near the entrance to the Mount Toro High parking lot.
- There are curb ramps at the intersection of Sherwood Drive and Sherwood Place.
- Some students cut through the surrounding fields to get to campus.
- El Puente is not served by a MST bus route.

Bicycling Conditions

- There are no bicycle facilities on Sherwood Place.
- There are buffered Class II bicycle lanes on Sherwood Drive between Sherwood Place and East Laurel Drive, and Class II bicycle lanes south of the school to East Rossi Street.
- There are dashed green conflict markings on Sherwood Drive at the intersection of Sherwood Place.

A high-visibility crosswalk is recommended to connect the sidewalk with the school campus

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND EL **PUENTE SCHOOL**

The following table lists recommendations for El Puente, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|---|--|--------------|------------------------|
| EP001 | Sherwood Pl | Missing sidewalk | Fill in sidewalk gaps on north side near Sherwood Dr. | \$60,000 | City |
| EP002 | Sherwood Pl | Flooding during rainy season. | Upgrade stormwater retention and runoff reduction along Sherwood Pl. | \$2,000,000 | City |
| EP003 | Sherwood Pl at existing mid- block crosswalk | Connection to regional bike route. | Install Class I shared-use path on west side of Davis Road to connect to Marina/Salinas multi-modal corridor. Consider street trees and landscaping. | \$235,000 | City |
| EP004 | Sherwood Dr | MST bus blocks traffic turning right onto Sherwood Pl. | Relocate bus stop to north side of Sherwood PI to enhance visibility at intersection, and construct bus pullout on north side of intersection. | \$75,000 | City |
| EP005 | Sherwood Dr from Bernal St and Rossi St | Large four-lane roadway with high traffic volumes and speeds. | Consolidate bike lanes to one side of the road for a two-way cycle track or shared-use path. Upgrade bike lanes on Natividad between Bernal and Boronda to Class IV separated bikeways, and install protected intersection treatments at Bernal to facilitate transition to cycle track. | \$12,541,180 | City |
| EP006 | Sherwood Dr at Sherwood Pl | Difficult for drivers to turn in and out of Sherwood Pl. | Re-evaluate intersection control evaluation analysis to study options for intersection control. | \$40,000 | City |
| EP007 | Behind school | Students walking across agricultural fields to reach the schools. | Install trails or shared-use paths to connect to Sherwood, Laurel Dr, and Madeira Ave. | \$2,100,000 | City |
| EP008 | Service roads near canal between Rossi St and Main St and Main St and Sherwood Dr | Sherwood Dr over Hwy 101 has high traffic volumes and speeds. | Create Class I shared-use path on service roads/ROW adjacent to canal, as identified in Urban Greening Plan. | \$1,800,000 | City |
| EP009 | Service road near canal at Main St | If a shared-use path were installed, a connection would be needed across North Main St. | Consider redesign of Casentini St/ Main St intersection to incorporate bicycle crossing. Consider removing parking and installing a raised shared-use path on both sides of Main St to connect the Class I path to the Casentini intersection. | \$305,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|-----------------------------|--|---|-----------|------------------------|
| EP010 | El Puente Campus | No marked crosswalk for people walking to campus. | Install high-visibility crosswalk to connect sidewalk with front of campus. | \$4,000 | City |
| EP011 | Sherwood Drive at Bernal St | Main crossing point for people walking from neighborhoods northwest of school. | Install lead pedestrian interval and conduct counts to determine whether protected phase is needed. | \$240,000 | City |

EL SAUSAL MIDDLE

El Sausal is located in east Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

El Sausal parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 26 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 21, below.

Figure 21. Parents' top concerns about letting children walk or bike to and from school.

Motorist Conditions

- El Sausal is located on East Alisal Street, a fivelane roadway with parking on both sides. East Alisal Street is very congested before and after school.
- There is a drop-off area at the school frontage.
 There is a parking lot on the west side of campus that is reserved for staff. Left turns are permitted out of the school parking lot.
- Bus drop-off takes place on Towt Street, adjacent to the school campus.
- As of the writing of this plan, the speed limit in front of the school is 30 miles per hour.

Pedestrian Conditions

- There are sidewalks on both sides of East Alisal Street near the school.
- There is a high-visibility yellow crosswalk across Towt Street to the east of the school frontage, and another on Towt Street and 1st Avenue.
 There is also a marked yellow crosswalk across East Alisal Street at Towt Street, and updated curb ramps and a curb extension to reduce crossing distances.
- There are yellow crosswalks across Eucalyptus
 Drive at East Alisal Street and at Connely Street.
- There are missing curb ramps at many intersections surrounding the school.

Bicycling Conditions

- There are no bicycle facilities on East Alisal Street or other residential roadways near the school.
- A recent Safe Routes to Schools project installed separated bikeways on East Market Street, on the backside of the school.

Students cross East Alisal at Eucalyptus Dr to go to the grocery stores after school

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND EL SAUSAL MIDDLE

The following table lists recommendations for El Sausal, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|---|-------------|---------------------------------------|
| ESM001 | E Alisal St | Five-lane roadway with higher traffic volumes and speeds. Heavy traffic congestion before and after school. | Install roadway reconfiguration and Class IV bikeway per Alisal Corridor Plan. Remove on-street parking in front of school, and shift bus drop-off from Towt St to E Alisal St. | \$1,236,340 | City |
| ESM002 | Eucalyptus Dr at school parking lot driveway | School parking area has rolled curb and no defined entrances and exits. | Install stop or yield signs at driveway exits. | \$1,700 | School |
| ESM003 | Eucalyptus Dr from Parkway Rd to E Alisal St | Heavy congestion on East Alisal before and after school. Space is available for drop-off on Towt St and Eucalyptus Dr, but is limited by resident parking. | Install loading-zone curb markings and signage along the east side of Eucalyptus Dr for drop-off and pick-up. Install formal pedestrian entrance to campus from Eucalyptus Dr. Consider shade trees, landscaping, and wider sidewalk. | \$185,165 | School /sity |
| ESM004 | Eucalyptus Dr at Connely St | Reports of drivers not yielding to pedestrians in the crosswalk. | Install raised crosswalk with yellow high-visibility crossing. Construct curb extensions to tighten corner turning radius, and add marked crossings on Connely St. Add school crossing signage on both sides of the street. | \$159,700 | City |
| ESM005 | Eucalyptus Dr | Reports of speeding. | Resurface street. Install traffic calming and create bike boulevard. | \$2,021,925 | City |
| ESM006 | Eucalyptus Dr at E Alisal St | Students running across E Alisal St after being dropped off or to go to the grocery store after school. | Consider pedestrian facility, per city policy. Consider median to restrict left turns out of Eucalyptus Dr. Upgrade crosswalk on Eucalyptus Dr to high-visibility, and construct curb extensions. | \$114,500 | City |
| ESM007 | Eucalyptus Dr at school parking lot driveway | Limited parking on campus. Parking area has rolled curb and no defined entrances or exits. | Reconstruct driveway entrances to staff parking lot, and redesign parking lot with reconfigured stalls restricted to teachers. Due to the rolled curb, the street or sidewalk may need to be reconfigured as well. | \$96,600 | School |
| ESM008 | General | Heavy congestion on East Alisal before and after school. | Work with nearby churches, such as Vineyard Christian and Iglesia Bautista Del Sur, to establish park- and-walk programs. | N/A | School/TAMC/ nonprofit partners |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|---|---|--|-----------|------------------------|
| ESM009 | Towt St at E Alisal St | Key pedestrian route to school. | Upgrade crosswalk on E Alisal St with yellow high-visibility markings. | \$8,000 | City |
| ESM010 | Towt St at 1st Ave | Key pedestrian route to school. | Add school crossing signage on both sides of the street. | \$1,700 | City |
| ESM011 | Towt St at Myrtle St | Key pedestrian route to school. | Install curb extensions and formalize pedestrian island to narrow the intersection. Install high-visibility crosswalks and curb ramps across Myrtle. | \$230,000 | City |
| ESM012 | Towt St from E Alisal St to Market St | Heavy congestion on East Alisal before and after school. Space is available for drop-off on Towt St and Eucalyptus Dr but is limited by resident parking. Reports of speeding. | Install traffic calming and speed humps, and create bike boulevard. Install loading-zone curb markings and signage along the west side of Towt St for dropoff and pick-up. Install a formal pedestrian entrance to campus from Towt St. Consider shade trees, landscaping, and wider sidewalk. | \$957,295 | City/school |

EVERETT ALVAREZ HIGH

Alvarez High is located in north Salinas and draws students from the surrounding neighborhoods and from east Salinas between Sanborn Road and Natividad Creek (see map on the following page).

PARENT SURVEY

Alvarez High parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 51 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 22, below.

Everett Alvarez High School

Motorist Conditions

- Alvarez High is located on Independence
 Boulevard, a four-lane roadway that narrows to
 two lanes south of Nantucket Boulevard. There
 is no parking on either side of Independence
 Boulevard near the school. Independence
 Boulevard is very congested before and
 after school.
- There is a drop-off loop and two large parking lots on the school campus. The northern parking lot, on the west side of campus, is reserved for staff and visitors, and the southern lot is reserved for students. Left turns are permitted out of the school parking lot onto Coventry Street.
- Bus drop-off takes place on the campus. Buses enter from Nantucket Boulevard and exit onto Independence Boulevard at Coventry Street.
- As of the writing of this plan, the speed limit in front of the school is 30 miles per hour.

Pedestrian Conditions

- There are sidewalks on both sides of Independence Boulevard and Nantucket Boulevard near the school.
- There are high-visibility yellow crosswalks on two legs of the intersection of Independence Boulevard and Danbury Street.
- There are yellow crosswalks on all legs of the intersection of Independence Boulevard and Nantucket Boulevard.
- There are curb ramps at many intersections surrounding the school.

Bicycling Conditions

 There are Class II bicycle lanes on Independence Boulevard and Nantucket Boulevard near the school.

Large numbers of students cross Nantucket Blvd after school

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND EVERETT ALVAREZ HIGH

The following table lists recommendations for Alvarez High, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|---|---|---|-------------|------------------------|
| EAH001 | Boronda Rd from Natividad Rd to Hemingway Dr | Arterial street with higher traffic volumes and speeds. | Upgrade bike lanes to buffered bike lanes or Class IV separated bikeway. | \$4,626,000 | City |
| EAH002 | Boronda Rd at Natividad Rd | Traffic congestion at intersection. | Install planned roundabout. | \$5,000,000 | City |
| EAH003 | Gabilan Creek from Boronda Rd to Lexington Dr | Project identified in Urban Greening Plan. | Install a Class I shared-use path along Gabilan Creek. Include a crossing at Danbury St. | \$1,200,000 | City |
| EAH004 | Independence Blvd from Boronda Rd to Constitution Blvd | Four-lane roadway. Reports of speeding. Drivers drop off students in bike lanes on both sides of the street. | Consider reducing roadway to two lanes and upgrading bike lanes to Class IV separated bikeway. Conduct queueing analysis and bicycle and pedestrian counts, and consider options, including installation of right turn lane for northbound traffic into school loop, and drop-off lane adjacent to school frontage. | \$512,3340 | City |
| EAH005 | Independence Blvd at Boronda Rd | Traffic congestion at intersection. Difficult for drivers to reach left turn lane during school dropoff and pick-up. | Install planned roundabout. | \$8,000,000 | City |
| EAH007 | Independence Blvd at Danbury St | High volumes of pedestrians and motor vehicles. Difficult for vehicles to exit school campus, drivers not yielding to pedestrians in the crosswalk. | Conduct warrant study for traffic signal or pedestrian hybrid beacon. If traffic signal is warranted, install marked crosswalks on all legs of intersection. Allow right-turn access only in and out of Danbury St. Evaluate for additional lighting at intersection | \$83,850 | City |
| EAH008 | Independence Blvd at Nantucket Blvd | Key pedestrian route. Traffic congestion before and after school. | Consider roundabout to improve traffic flow and pedestrian safety. | \$195,000 | City |
| EAH009 | Nantucket Blvd between Independence Blvd and Hemingway Dr | Large numbers of students crossing at school bus driveway entrance, near New Haven Way. | Consider pedestrian facility, per city policy. | \$10,000 | City |
| EAH0010 | Nantucket Blvd | Key pedestrian route to school. | Install additional school signage. | \$3,400 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|---|-------------|------------------------|
| EAH011 | Nantucket Blvd | Parents parked in bike lanes on both sides of street before and after school. Difficult for buses to go around parked cars to enter campus. Students biking on sidewalk. | Upgrade bike lanes to buffered bike lanes or Class IV separated bikeway | \$3,700,800 | City |
| EAH012 | Nantucket Blvd at Hemingway Dr | Reports of speeding, drivers not yielding to pedestrians, and drivers doing donuts in the intersection. | Consider roundabout or traffic circle at Nantucket and Hemingway as future development is constructed. | \$2,500,000 | City |
| EAH013 | Trail network behind Steinbeck Elementary from Snug Harbor to school | Pedestrians walking down steep dirt path to reach New Salem Drive. | Evaluate pedestrian demand and consider formalized connection between Crestview St and Provincetown Dr. | \$1,000,000 | City |
| EAH014 | School | Heavy traffic congestion on Independence Blvd before and after school | Consider installing additional entrance to school parking lot from Nantucket Blvd. | \$8,500 | School |
| EAH015 | Inglewood St and Coventry St | Heavy traffic congestion at intersection of Danbury/Independence Blvd. Right-turn-only not feasible without removing traffic diverters. | Remove the traffic diverters on Inglewood and Coventry Streets to enable right-turn-only at Danbury and Independence Streets. Conduct neighborhood outreach prior to changes, and consider traffic-calming measures if requested and supported by neighborhood residents. | \$30,000 | City |

The intersection of Independence Blvd and Danbury St has high volumes of people walking and driving before and after school

FRANK PAUL ELEMENTARY

Frank Paul Elementary is located next to Frank Paul Park in a residential area in northeast Salinas. It draws students from the surrounding neighborhood (see map on the following page).

PARENT SURVEY

Frank Paul parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 41 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 23, below.

Figure 23. Parents' top concerns about letting children walk or bike to and from school.

Analysis for a stop sign or rectangular rapid flashing beacon is recommended for the crosswalk on Rider Ave. at Mazatlan Wy.

Frank Paul Elementary School

Motorist Conditions

- There is a small drop-off loop on the school campus off Rider Avenue.
- There is a small parking lot designated for staff off Rider Avenue. Parents have been observed using this lot for student drop-off and pick-up.
- There is a bus drop-off zone on Rider Avenue in front of the school. There is on-street parking on the rest of Rider Avenue and Antigua Avenue.
- There is a newer drop-off loop and parking lot at the back of campus off Antigua Avenue.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are continuous sidewalks on Rider Avenue, Antigua Avenue, and other roadways near the school.
- There are high-visibility crosswalks across Rider Avenue at Mimbrera Way and Mazatlan Way.
- Pedestrians have been observed walking across unmarked areas of Rider Avenue between Mazatlan Way and Mimbrera Way.
- There is no pedestrian access from Frank Paul Park to the school campus.

Bicycling Conditions

- There are no bicycle facilities on Rider Avenue, Antigua Avenue, or other residential roadways near the school.
- The nearest bicycle facilities are Class II bicycle lanes on Freedom Parkway.

Students walk to Frank Paul Elementary and La Paz Middle on Antigua Ave.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND FRANK PAUL ELEMENTARY

The following table lists recommendations for Frank Paul Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|--|-----------|------------------------|
| FPE001 | Rider Ave at Freedom Parkway | Part of possible redesign of Freedom Parkway. | Conduct intersection control evaluation analysis to study installation of a roundabout. | \$235,000 | City |
| FPE002 | Rider Ave from Freedom Parkway to Mazatlan Way | No bicycle facilities near school. | Install bike lane. Transition to bike boulevard west of Mazatlan. | \$947,400 | City |
| FPE003 | Rider Ave at Antigua Ave | Key pedestrian route to school. | Upgrade crosswalk with high- visibility yellow markings. | \$4,000 | City |
| FPE004 | Rider Ave at Mazatlan Way | Key pedestrian route to school. Reports of speeding on Rider Ave. | Conduct a warrant study for a stop sign. If not warranted, evaluate crosswalk for a rectangular rapid flashing beacon. Upgrade crosswalk with high-visibility yellow, and install curb ramp on south side of Rider Ave. Install yield markings and curb extensions to shorten crossing distance on Mazatlan Way. | \$164,000 | City |
| FPE005 | Rider Ave at Mazatlan Way | Key pedestrian route to school. Reports of speeding on Rider Ave. | Maintain crossing guard even after installation of recommendations. | N/A | School |
| FPE006 | Rider Ave at Mimbrera Way | Key pedestrian route to school. Reports of speeding on Rider Ave. | Upgrade crosswalk to high visibility. Install curb ramp on south side of Rider Ave, and install curb extension to shorten crossing distance on Mimbrera Way | \$117,000 | City |
| FPE007 | Rider Ave from Freedom Parkway to Amarillo Way | Drivers coming from the east may not know they're entering a school zone. | Install additional school zone signage. | \$3,400 | City |
| FPE008 | Rider Ave at Amarillo Way | Key pedestrian route to school. | Upgrade crosswalk with high- visibility yellow, and install curb extensions across Amarillo Way. | \$204,000 | City |
| FPE009 | Antigua Ave from Rider Ave to Sanborn Rd | Key route to Frank Paul Elementary and La Paz Middle. No bike facilities. | Create a bicycle route with signage and sharrow markings. | \$19,600 | City |
| FPE010 | Antigua Ave from Palmera Ave to Sanborn Rd | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Widen sidewalk. | \$30,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-----------------------|--|---|--|-----------|------------------------|
| FPE011 | Sanborn Rd at Antigua Ave | Key pedestrian route to La Paz Middle. Five-lane roadway with high traffic volumes and speeds. | Conduct warrant for traffic signal or installation of pedestrian hybrid beacon signal. If neither is warranted, install pedestrian refuge island, upgrade to high-visibility yellow crosswalk, and add another flashing beacon to refuge island. Include appropriate yield signage and striping. | \$737,000 | City |
| FPE013 & FPE017 | Antigua Ave at La Cuesta Ct (both intersections) | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Install raised crosswalks with high-visibility yellow striping across both intersections with La Cuesta Ct. | \$298,000 | City |
| FPE014 | Antigua Ave at Antigua Cir | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Install high-visibility yellow crosswalk across Antigua Cir. | \$4,000 | City |
| FPE015 | Antigua Ave at Bernardo Ave | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Consider raised intersection with high-visibility crosswalks on all legs, or install high-visibility yellow crosswalk and construct curb extensions on all legs and raised crosswalks across Bernardo Ave. | \$796,000 | City |
| FPE016 | Antigua Ave at Vera Cruz Cir | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Install raised crosswalk with high- visibility yellow crosswalk and curb extensions across Vera Cruz Cir. | \$249,000 | City |

FREMONT ELEMENTARY

Fremont Elementary is in a high-density residential neighborhood in east Salinas. It draws students primarily from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Fremont Elementary parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 34 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in

Figure 24, below. **SAFETY OF INTERSECTIONS** AND CROSSINGS **AMOUNT OF TRAFFIC ADULTS TO ALONG ROUTE WALK OR BIKE WITH SPEED OF TRAFFIC** ALONG ROUTE **VIOLENCE OR CRIME CROSSING GUARDS WEATHER OR CLIMATE** CHILD'S **BEFORE OR** AFTER-SCHOOL **SIDEWALKS ACTIVITIES OR PATHWAYS**

STUDENTS QUALIFYING FOR FREE OR REDUCED MEALS

87.7%

STUDENTS USING ACTIVE TRANSPORTATION (BASED ON 34 SURVEY RESPONSES)

Curb extensions are recommended for the crosswalk at Towt St and Kentucky Ave

Fremont Elementary School

Motorist Conditions

- A Safe Routes to Schools project was completed in 2017 to reduce the number to travel lanes from four to two and install a new center turn lane.
- There is a drop-off loop and parking in front of the campus on East Market Street. Drivers are also encouraged to use designated drop-off spaces along East Market Street immediately in front of the school.
- School-zone speed limit signs are not currently present on East Market Street.
- Parents can also drop off students in the back of campus, off Cooper Avenue.
- As of the writing of this plan, the speed limit in front of the school is 30 miles per hour.

Pedestrian Conditions

- Students walk to school from the surrounding neighborhoods and enter campus through entrances on East Market Street or Cooper Avenue.
- There are complete sidewalks on both sides of East Market Street, Towt Street, and residential roadways near the school.
- There is a yellow high-visibility crosswalk at Market Street and 2nd Avenue, which serves as a key access point for pedestrians.
- The 2017 project included upgraded curb ramps and high-visibility crosswalks at intersections on East Market Street near the school.
- Pedestrians have been observed walking across unmarked areas of Market Street in front of the school.

Bicycling Conditions

- There are Class IIB buffered bike lanes on Market Street between North Sanborn Road and Williams Road, with a segment of Class IV separated bikeway in front of the school.
- There are no bicycle facilities on other residential roadways near the school.

Curb ramps, high-visibility striping and a rectangular rapid flashing beacon are recommended on Laurel St at 2nd Ave

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND FREMONT ELEMENTARY

The following table lists recommendations for Fremont Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-----------------|--|--|---|-------------|------------------------|
| FE001 | 2nd St at Quilla St | Key pedestrian route to school. | Install high-visibility crosswalks and curb extensions, or consider installing a neighborhood traffic circle. | \$216,000 | City |
| FE002 | Cooper Ave from Towt St to 2nd Ave | Key pedestrian route to school. | Install school zone signage. | \$1,700 | City |
| FE003 | Laurel Dr at 2nd Ave | Key pedestrian route to school. Reports of drivers not yielding to pedestrians in the crosswalk. | Evaluate pedestrian crossing demand. If this is the highest-use crosswalk on Laurel Dr, upgrade to yellow high-visibility crosswalk and install curb ramps and rectangular rapid flashing beacon. | \$54,000 | City |
| FE004 | Laurel Dr at Midway Ave | Key pedestrian route to school. Reports of drivers not yielding to pedestrians in the crosswalk. | Evaluate pedestrian crossing demand. If lower than on 2nd Ave, consider crosswalk removal to direct pedestrians to the safest crosswalk. | \$14,000 | City |
| FE006 | Laurel Dr at Williams Rd | Key pedestrian route to school. | Install white high-visibility crosswalk across Laurel Dr. | \$8,000 | City |
| FE007 | Laurel Dr from Williams Rd to Sanborn Rd | No bicycle facilities. | Install Class IV separated bikeway and recommended roadway reconfiguration. | \$2,914,380 | City |
| FE018 | Williams at Grandhaven | No marked crosswalk, reports of drivers not yielding to pedestrians. | Consider pedestrian facility, per city policy. | \$10,000 | City |
| FE009 | Market St at school entrance area | Parents parking in bus loading zones, not clearly marked. | Install "Bus Stop No Parking" signage so vehicles do not block bus parking space. | \$850 | City |
| FE010 | Market St at Williams Rd | Some students crossing here. | Reconstruct the slip lane to provide pedestrian crossing, and include conflict striping. Upgrade all legs of the intersection to high-visibility crosswalks. | \$270,000 | City |
| FE011+ FE016 | Towt St at Oregon St | Reports of students crossing Towt St, no marked crosswalk. | Install high-visibility crosswalk, curb ramps, and curb extensions across Oregon St. Consider pedestrian facility, per city policy. | \$140,000 | City |
| FE012 | Towt St at Cooper Ave | Key pedestrian route to school. | Install high-visibility crosswalk, curb ramps, and curb extensions across Cooper Ave. | \$130,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|--|--|-----------|------------------------|
| FE013 | Towt St at Laurel Dr | Key pedestrian route to school. Reports of drivers not yielding to pedestrians in the crosswalk. | Upgrade to yellow high-visibility crosswalk and curb ramps. | \$68,000 | City |
| FE014 | Towt St from Market St to Laurel Dr | Key route to school. No bicycle facilities present, reports of speeding. | Install traffic calming, sharrow markings, and bike boulevard signage. | \$550,800 | City |
| FE015 | Towt St at Kentucky Ave | Key pedestrian route to school | Install curb extensions across Towt St and high-visibility crosswalk on Kentucky Ave. | \$104,000 | City |
| FE017 | Oregon St | Reports of speeding | Install traffic calming measures if requested and supported by neighborhood residents, or consider speed enforcement on Oregon St. | \$15,000 | City |

GAVILAN VIEW MIDDLE SCHOOL

Gavilan View is located outside Salinas city limits on the north side of the city. It draws students from the surrounding neighborhoods and the neighborhood around New Republic Elementary (see map on the following page).

PARENT SURVEY

Gavilan View parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 21 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 25, below.

Figure 25. Parents' top concerns about letting children walk or bike to and from school.

There are currently sidewalk gaps on both sides of Russell Rd near the school

Gavilan View Middle School

Motorist Conditions

- Gavilan View Middle is located on Russell Road, a three-lane roadway that serves as a northern boundary of the city of Salinas. Parking is allowed on both sides of the street, and Russell Road is very congested before and after school.
- There are two drop-off areas and several parking lots on the school campus. The parking lots on the east and south sides are shared between staff and visitors. Left turns are permitted out of the school parking lot.
- The morning sun creates some visibility problems for eastbound traffic at certain times of the year.
- Bus drop-off takes place on Van Buren Ave, adjacent to the school campus.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There are no sidewalks on the north side
 of Russell Road between North Main Street
 and San Juan Grade Road except along the
 school frontage. On the south side, there are
 some segments of formal sidewalk in front of
 residential properties and dirt paths in
 other areas.
- There are complete sidewalks on Van Buren Avenue and other residential streets south of the school.
- There are yellow crosswalks on three legs of the intersection of Russell Road and Van Buren Avenue. School staff assists with crossing at the intersection during dismissal time.
- There are curb ramps at the intersection near the school.
- Students have been observed crossing Russell Road between North Main Street and the school, outside of marked crosswalks.
- Gavilan View Middle is not served by a MST bus route.

Bicycling Conditions

• There are no bicycle facilities on Russell Road or other roadways near the school.

Conflicts were reported between vehicles turning left and pedestrians crossing at the intersection of Russell and Van Buren

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND GAVILAN VIEW MIDDLE

The following table lists recommendations for Gavilan View Middle, and the map below shows their locations in relation to the school.

School Profiles // 189

| | | | School Pr | ofiles // 189 | |
|--------|---|---|---|---------------|------------------------|
| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
| GVM001 | Van Buren Ave | Key route to school. No bicycle facilities. Students cross midblock to reach marked crosswalk on the west side of the intersection of Van Buren Ave and Russell Rd. | Consider bike boulevard on Van Buren Ave. Consider pedestrian facility, per city policy, on Van Buren between Bolivar and Russell Rd. | \$1,975,600 | City |
| GVM002 | Russell Rd at Van Buren Ave | Key pedestrian route to school, high volumes of students crossing. Vehicle left turns onto Russell Rd conflict with pedestrians in the crosswalk. Pedestrian signal phase does not allow enough time to cross. U-turns allowed, intersection feels very unsafe. | Install curb extensions, curb ramps, high-visibility crossings, leading pedestrian intervals, protected pedestrian signal phase, and pedestrian countdown signal heads. Consider protected intersection treatments. | \$1,917,140 | City/county |
| GVM003 | Russell Rd from North Main Street to San Juan Grade Rd | Sidewalk gaps on both sides of the street. Students cross mid-block to reach the sidewalk on the north side of the street. | Install sidewalk or pedestrian path to ensure continuous sidewalk on one or both sides of the street. | \$1,320,000 | City/county |
| GVM004 | Russell Rd | Reports of speeding as vehicles enter and exit the freeway. Double- and triple-parking happens on the north side of Russell Road before and after school. | Install school zone speed limit signage and speed feedback sign, and consider traffic calming (speed-reduction markings). Consider channelized drop off lane on north side of Russell Road adjacent to school. | \$29,600 | County |
| GVM005 | Russell Rd at San Juan Grade Rd | Key pedestrian route to Gavilan View Middle and Rancho San Juan High. | Construct ADA curb ramps, and upgrade to high-visibility crossings. Install leading pedestrian interval and pedestrian countdown signal heads. Consider protected intersection treatments or curb extensions, taking truck and bus turning radius into account. | \$1,515,105 | City/county |
| GVM006 | Russell Rd from North Main Street to San Juan Grade Rd | No bicycle facilities. | Install Class I shared-use path or protected two-way bike facility along Russell Rd (the south side has few driveways). | \$2,035,440 | City/county |
| GVM007 | Russell Rd | Reports of students crossing here. No sidewalk on north side of street between Paul Ave and school. | Consider possible marked crossing on Russell Rd between Eisenhower St and Paul Ave. Evaluate pedestrian crossing demand and MUTCD compliance. | \$14,000 | City/county |

HARDEN MIDDLE

Harden Middle is located in north Salinas and draws students from neighborhoods throughout north Salinas (see map on the following page).

PARENT SURVEY

Harden parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 31 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 26, below.

Figure 26. Parents' top concerns about letting children walk or bike to and from school.

GRADE LEVELS

STUDENTS RESIDING WITHIN 1 MILE OF SCHOOL

42%

STUDENTS QUALIFYING FOR FREE OR REDUCED MEALS

75%

STUDENTS USING ACTIVE TRANSPORTATION (BASED ON 31 SURVEY RESPONSES)

Parents park in the bike lane after school, blocking the bus stop

Motorist Conditions

- Harden is located on McKinnon Street, a twolane roadway with no parking on either side.
 McKinnon Street is very congested before and after school.
- There are two drop-off areas and parking lots on the school campus. The smaller loop is reserved for bus drop-off, and the smaller parking lot is reserved for staff and visitors. The larger loop is designated for student drop-off. Left turns are prohibited out of the larger parking lot.
- As of the writing of this plan, the speed limit in front of the school is 35 miles per hour.

Pedestrian Conditions

- There are complete sidewalks on both sides of McKinnon Street near the school.
- There is a high-visibility crosswalk across McKinnon Street at Westminster Drive.
- There are yellow high-visibility crosswalks on all legs of the intersection of McKinnon Street and East Alvin Drive.
- There are standard crosswalks on all legs of the intersection of McKinnon Street and Harden Parkway.
- There are curb ramps at most of the intersections surrounding the school.

Bicycling Conditions

- There are Class II bicycle lanes on McKinnon Street and Harden Parkway. There are also Class II buffered bicycle lanes on East Alvin Drive.
- There are no bicycle facilities on Westminster Drive or other residential roadways near the school.

The crosswalk at McKinnon St and Westminster Dr was the top safety concern for school staff

School Profiles

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND HARDEN MIDDLE

The following table lists recommendations for Harden Middle, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|--|-------------|------------------------|
| HM001 | E Alvin Dr at McKinnon St | High volumes of pedestrians and vehicles. Conflicts between students crossing and drivers turning left. | Evaluate intersection for leading pedestrian interval or split signal phasing. | \$200,000 | City |
| HM002 | Harden Parkway from Main St to El Dorado Dr | Four-lane roadway with low traffic volumes. | Evaluate for possible road reconfiguration (road diet) and Class IV bike lanes. | \$4,903,560 | City |
| HM003 | Harden Parkway at McKinnon St | Students crossing, long pedestrian crossing distances. | Conduct intersection control evaluation for possible traffic signal or roundabout. Upgrade to high-visibility crosswalks, and add a marked crosswalk to the fourth leg of the intersection. | \$215,000 | City |
| HM004 | McKinnon St from Harden Parkway to E Alvin Dr | Drivers parked in the bike lane before and after school. | Install Class IV bikeway or Class I shared-use path and conflict striping at intersections and driveways. | \$1,080,000 | City |
| HM005 | McKinnon St from Harden Parkway to E Alvin Dr | Reports of speeding. | Install speed feedback signs north and south of school campus. | \$1,700 | City |
| HM006 | McKinnon St from Boronda Rd to Harden Parkway | Standard Class II bike lanes provide less separation from cars than buffered bike lanes. | Install Class II buffered bike lane. | \$255,420 | City |
| HM007 | McKinnon St from Harden Parkway to E Alvin Dr | Broken sidewalk. | Repair broken sidewalk. | \$125,000 | City |
| HM008 | McKinnon St at Westminster Dr | Key pedestrian route to school. Reports of speeding traffic and drivers not yielding to pedestrians, especially when students are crossing outside of drop- off and pick-up times. | Install rectangular rapid flashing beacon for McKinnon St crossing and assembly B signage to complement existing assembly A. Upgrade to high-visibility crosswalk and curb extensions across Westminster Dr. Include bikeway conflict striping through the intersection. | \$149,480 | City |
| HM009 | School Driveway exit on McKinnon St | Drivers trying to turn left out of school parking lot create traffic back-up in school loop. | Redesign school driveway exit to discourage left turns, and install right-turn-only signage. | \$2,850 | School |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|---|-----------|------------------------|
| HM010 | Westminster Dr from McKinnon St to Cambridge Ct | Key pedestrian route to Harden Middle, North Salinas High, and El Dorado Park. | Install curb extensions and high- visibility crosswalks on all side streets. | \$728,000 | City |
| HM011 | Westminster Dr from McKinnon St to Cambridge Ct | Key pedestrian route to Harden Middle, North Salinas High, and El Dorado Park. | a Install traffic calming if requested and supported by neighborhood residents, and bicycle route sharrows and signage. | \$612,000 | City |

JESSE G. SANCHEZ ELEMEN

Sanchez Elementary is located in the heart of east Salinas. It is located in the same complex as the Alisal Union District offices and Martin Luther King Academy. The two schools draw students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Sanchez Elementary parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 61 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 27, below.

Figure 27. Parents' top concerns about letting children walk or bike to and from school.

STUDENTS USING ACTIVE TRANSPORTATION (BASED ON 61 SURVEY RESPONSES)

High-visibility crosswalks and leading pedestrian intervals are recommended for the intersection of Sanborn Rd at Kimmel St.

Jesse G. Sanchez Elementary School

Motorist Conditions

- Sanchez Elementary is located on North Sanborn Road, a five-lane arterial street with high traffic volumes. There is limited on-street parking on the school side of the street.
- There are two entrances to the school parking lot from Sanborn Road, and separate dropoff loops for Sanchez Elementary and Martin Luther King Jr. Academy. Staff members assist with traffic flow at the drop-off loops during mornings and afternoons.
- Bus drop-off takes place in the school drop-off loop.
- There are speed feedback signs on Sanborn Road on either side of the school campus.
- The area in front of the school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- The main entrance to the school is on North Sanborn Rd, and there are two side entrances from Acosta Plaza.
- There are continuous sidewalks on both sides
 of Sanborn Road and smaller residential streets
 near the school. There are sections of broken
 sidewalk on Acosta Plaza on the back side of
 the campus.
- The streets across Sanborn from the school (Mohar Street, Montana Street) each have rolled curbs on both sides.
- There are standard yellow crosswalks on two legs of the intersection of Sanborn Road at Kimmel Street. There are no other marked crosswalks on Sanborn Road between Acosta Street and Garner Avenue.
- ADA curb ramps have been installed at the intersection of Sanborn Road and Kimmel Street.

Bicycling Conditions

 There are no bicycle facilities on North Sanborn Road or other residential streets near the school.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND **SANCHEZ ELEMENTARY**

The following table lists recommendations for Dual Language, and the map below shows their locations in relation to the school.

SAFETY IMPROVEMENTS

Bicycle boulevards are streets with low traffic volumes and speeds that are designed to prioritize bicycle travel. They can include traffic calming measures like speed bumps or chicanes.

Protected Pedestrian Signal Phases are traffic signals where people walking do not cross at the same time as drivers are making left turns.

Traffic Calming uses measures including speed humps, traffic circles, and chicanes to slow vehicle traffic on residential streets and improve safety and conditions for walkers and cyclists.

Rectangular Rapid Flashing Beacons are used at uncontrolled intersections or mid-block crosswalks to alert drivers to people who are waiting to cross the street.

| JGSE011 | Sanborn Rd from driveway entrance/exit loop to near Mohar | Drivers turning left out of loop block traffic flow. | Install right-turn-only signage. | \$850 | School |
| JGSE012 | Sanborn Rd from Del Monte Ave to Laurel Dr | No bicycle facilities. | Short term: Install Class II bike lanes between Laurel and Del Monte. Long term: Widen sidewalk to create shared-use path between Laurel and Garner. Install bike conflict markings at recreation center entrance/exit driveways. Installed raised median with pedestrian refuge islands. | \$1,799,520 | City |

JOHN E. STEINBECK ELEMENTARY

Steinbeck Elementary is located in northeast Salinas next to Steinbeck Park and close to Everett Alvarez High School. It draws students primarily from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Steinbeck Elementary parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 45 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 28, below.

Figure 28. Parents' top concerns about letting children walk or bike to and from school.

STUDENTS USING ACTIVE TRANSPORTATION (BASED ON 83 SURVEY RESPONSES)

Pedestrians use steep informal paths to reach New Salem Dr

John E. Steinbeck Elementary School

Motorist Conditions

- Steinbeck Elementary is located on Burlington Drive, a residential street with on-street parking. There is heavy school drop-off traffic on Burlington Drive before and after school.
- There is a parking lot and small drop-off loop off Burlington Drive, which is heavily congested before and after school. There is a second dropoff loop on the north side of campus, along New Salem Drive, which is designated for bus dropoff only.
- School drop-off also takes place on Burlington Drive.
- The area in front of the school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There is continuous sidewalk on both sides of Burlington Drive, New Salem Drive, and other residential roadways around the school.
 There is also continuous sidewalk on both sides of Independence Boulevard to the west of the school.
- There are standard crosswalks on two legs of the intersection of Burlington Drive and Provincetown Drive.
- There is a Class I shared-use path along the back side of campus, running from Nantucket Boulevard to Independence Boulevard near Constitution Boulevard. There are paved connections to the adjacent neighborhood at Round Hill Farms Road, and several informal dirt paths connecting to Round Hill Farms Road and Crestview Street.

Bicycling Conditions

- There are Class II bike lanes on Independence Boulevard and Nantucket Boulevard.
- There are no bicycle facilities on other residential roadways near the school.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND **STEINBECK ELEMENTARY**

The following table lists recommendations for Steinbeck Elementary, and the map below shows their locations in relation to the school.

SAFETY IMPROVEMENTS

Traffic Calming uses measures including speed humps, traffic circles, and chicanes to slow vehicle traffic on residential streets and improve safety and conditions for walkers and cyclists.

Raised Crosswalks are a higher section of pavement with a marked crosswalk. It is used to encourage drivers to slow down and to make people walking more visible to drivers.

Separated bikeways include a physical barrier such as parked cars, planters, or plastic posts between the bicycle lane and the vehicle lane, providing separation and safety for cyclists.

Curb Extensions are installed at intersections or mid-block crosswalks to shorten the crossing distance for people walking and make them more visible to people driv-

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|---|---|---|-------------|------------------------|
| JESE001 | Burlington Dr from Provincetown Dr to end of street | Reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$204,000 | City |
| JESE002 | Burlington Dr at Provincetown Dr | Traffic congestion in the intersection. Key pedestrian route to school. | Install traffic circle, and include high-visibility crosswalks and signage. Consider shifting crossing across Provincetown Dr to Lexington if all-way stop control is implemented at Lexington Drive. | \$214,400 | City |
| JESE003 | Independence Blvd at Provincetown Dr | Key pedestrian route to school. Students directed to cross at north leg for the shortest route to campus. | Mark safe route to school along north side of the intersection with signage or decorative crosswalk (school would need to sponsor and maintain decorative crosswalk). | \$5,850 | City/school |
| JESE004 | Independence Blvd from Boronda Rd to Constitution Blvd | Four-lane roadway, reports of speeding. | Consider reducing roadway to two lanes and upgrading bike lanes to Class IV separated bikeway. Add conflict striping at bus stop areas. | \$5,042,340 | City |
| JESE005 | Lexington Dr at Provincetown Dr (furthest west) | Key pedestrian route to school. | Upgrade to raised high-visibility crosswalk on Provincetown. | \$149,000 | City |
| JESE006 | Lexington Dr at Hancock St (both intersections) | Key pedestrian route to school. | Upgrade to raised high-visibility crosswalk on Hancock St. | \$298,000 | City |
| JESE007 | Lexington Dr at Newport Ct (both intersections) | Key pedestrian route to school. | Upgrade to raised high-visibility crosswalk on Newport Ct. | \$298,000 | City |
| JESE008 | Lexington Dr at Waterbury Way | Key pedestrian route to school. | Upgrade to raised high-visibility crosswalk on Waterbury Way. | \$149,000 | City |
| JESE009 | New Salem Dr at New Britain Cir | Key pedestrian route to school. | Upgrade crosswalk with yellow high-visibility striping across New Britain Cir. | \$4,000 | City |
| JESE010 | New Salem Dr from Burlington Dr to end of street | Reports of speeding, students dropped off here. | Install traffic calming if requested and supported by neighborhood residents. | \$158,100 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|------------------------------------|---|--|-----------|------------------------|
| JESE011 | New Salem Dr at New Haven Way | Key pedestrian route to school, reports of drivers not yielding to pedestrians in the crosswalk. | Upgrade to high-visibility crosswalks, and construct curb extensions and ramps. | \$147,000 | City |
| JESE012 | Parking lot | Current drop-off system implemented by staff was working well at the time of the audit. Signage reinforces this system. | Install signs in advance of drop-off loop: "Stay in car until drop-off zone." | \$850 | School |
| JESE013 | Provincetown Dr at Lexington Dr | Current crossing of Provincetown Dr does not meet the city's crosswalk policy. | Evaluate for an all-way stop. If warranted, install marked crossing on Provincetown Drive. Upgrade to high-visibility crosswalk and curb extensions across Lexington Dr. | \$109,000 | City |
| JESE014 | Provincetown Dr | Broken sidewalk. | Repair broken sidewalk sections. | \$125,000 | City |
| JESE015 | Trail network behind school | Heavy traffic congestion in front of school. Use of trail would encourage more walking and biking trips. | Install wayfinding from trail to school entrance. Locate bike parking near trail entrance. | \$12,250 | City |
| JESE016 | Trail network behind school | Trail is used mainly by high school students, sometimes for illicit activities. | Improve trail network behind school with paved pathway, pedestrian-scale lighting, and other improvements, per Urban Greening Plan. | \$264,000 | City |
| JESE017 | Trail network behind school | Pedestrians walking down steep dirt path to reach Provincetown Dr. | Evaluate pedestrian demand, and consider a formalized connection between Crestview and Provincetown. This would also serve Alvarez High students. | \$150,000 | City |
| JESE018 | School campus | Heavy traffic congestion in front of school. Use of trail would encourage more walking and biking trips. | Install additional school entrance at back of campus to allow access to school from trail. | \$8,500 | School |

JOHN GUTIERREZ MIDDLE

John Gutierrez Middle is located just outside Salinas city limits, to the north of the city. It draws students from the surrounding neighborhoods and neighborhoods south of McKinnon Elementary (see map on the following page).

PARENT SURVEY

John Gutierrez parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 24 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in

Figure 29. Parents' top concerns about letting children walk or bike to and from school.

The intersection of Rogge Rd and San Juan Grade Rd was reported as a safety concern

John Gutierrez Middle

Motorist Conditions

- John Gutierrez Middle is located on Rogge Road, a two-lane roadway. There is no on-street parking between San Juan Grade Road and the school except for a drop-off area in front of the school. Rogge Road is very congested before and after school.
- There is a drop-off area and parking lot on the school campus that is shared between staff and visitors. Left turns are prohibited out of the parking lot.
- The morning sun creates visibility problems for eastbound traffic at certain times of the year.
- There is another district facility west of the school where bus drop-off takes place.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There are sidewalks on both sides of Rogge Rd between San Juan Grade Road and the school campus, with the exception of missing sidewalk at the intersection of San Juan Grade and Rogge. There is no sidewalk on the north side of Rogge Road east of the school campus.
- There is intermittent sidewalk on San Juan Grade Road between Rogge Road and Russell Road.
- There is a high-visibility yellow crosswalk with updated curb ramps across Rogge Rd to the east of the school driveway exit.
- There are missing curb ramps at many intersections in the residential neighborhood south of the school.
- Gutierrez Middle is not served by a MST bus route.

Bicycling Conditions

- There are Class II bicycle lanes on Rogge Rd between San Juan Grade road and the school campus, but they end east of the school.
- There are no bicycle facilities on San Juan Grade Road or the residential roadways near the school.

The crosswalk at Rogge Rd and Bollenbacher Dr is used by Gutierrez Middle and La Joya students

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND JOHN GUTIERREZ MIDDLE

The following table lists recommendations for John Gutierrez Middle, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|----------------------------------|--|--|-------------|------------------------|
| JGM001 | Rogge Rd at Bollenbacher Dr | Key pedestrian route to school. Reports of speeding and drivers not yielding to pedestrians in the crosswalk. | Install curb ramps and high- visibility crossings on all three approaches. Consider curb extensions. Curb extensions must be designed to accommodate bus turning radius. Assign a crossing guard to this corner. | \$127,000 | County/school |
| JGM002 | Rogge Rd | Incomplete bike lanes between San Juan Grade Rd and middle school. | Consider buffered bike lanes or a separated two-way bike facility on Rogge Rd between Natividad Rd and San Juan Grade. Include bike lane conflict markings at intersections. | \$1,480,320 | County |
| JGM003 | Rogge Rd | Missing and broken sidewalk. | Widen sidewalk, reconstruct broken sidewalk, and fill sidewalk gaps between San Juan Grade Rd and Rancho San Juan High School | \$590,000 | County |
| JGM005 | Rogge Rd at San Juan Grade Rd | Key pedestrian route to middle school and Rancho San Juan High. Reports of drivers not stopping or yielding to pedestrians in the crosswalk. | Construct curb extensions with ADA ramps. Consider roundabout, signal warrant analysis, or flashing pedestrian beacon. Consider removal of long right-turn-only lane on northbound San Juan Grade Rd between Cornwall and Rogge Village Way, and use the space to upgrade bike lane to Class IIB buffered or Class IV separated bikeway. | \$335,000 | County |
| JGM006 | Rogge Rd | Reports of speeding. | Consider traffic-calming measures between San Juan Grade Rd and Rancho San Juan High School, such as lane width reduction. | \$77,880 | County |

HENRY F. KAMMANN ELEMENTARY

Kammann Elementary is located in northwest Salinas next to Laurel Park and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Kammann parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 87 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 30, below.

Figure 30. Parents' top concerns about letting children walk or bike to and from school.

Curb extensions and high-visibility crosswalks are recommended at the intersection of Rochex Ave at Tyler St

Henry F. Kammann Elementary School

Motorist Conditions

- Kammann Elementary is located on Rochex Avenue, a two-lane residential roadway with parking on both sides of the street.
- There are two small drop-off loops and parking lots on the school campus frontage. There is a small parking lot on the west side of campus that is reserved for staff. Left turns are allowed out of the school parking lot.
- Bus drop-off takes place on Rochex Avenue, directly in front of school entrance.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.
- As of 2022, the Salinas City Virtual Academy was located at Kammann, increasing the need for parking for staff and parents.

Pedestrian Conditions

- There are sidewalks on both sides of Rochex Avenue and other residential streets near the school.
- There is a high-visibility yellow crosswalk across Rochex Avenue at 4th Street, east of the school driveway entrance.
- There are standard yellow crosswalks on three legs of the intersection of Rochex Avenue and Tyler Street.
- There are missing curb ramps at many intersections surrounding the school.
- The school tries to maintain a crossing guard at the intersection of 4th Street and Rochex Avenue.
- Students who live across Laurel Drive and attend Kammann typically cross Laurel at Parkside Street.

Bicycling Conditions

There are no bicycle facilities on Rochex Avenue,
 Tyler Street, or other residential roadways near the school.

A rectangular rapid flashing beacon is planned for the crosswalk on Laurel Dr at Parkside St

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND KAMMANN ELEMENTARY

The following table lists recommendations for Kammann, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|---|---|-------------|------------------------|
| HFK001 | Tyler St behind school | Heavy traffic congestion on Rochex Ave in front of the school. Reports of speeding on Tyler St. | Develop Park and Walk program with drop-off at this location. Consider bike boulevard with traffic calming on Tyler. | \$1,387,200 | City |
| HFK002 | Rochex Ave at Tyler St | Reports of drivers not yielding to pedestrians and of drivers doing donuts in the intersection. | Install curb ramps or curb extensions to align curbs, high-visibility yellow crosswalks, and advance stop bars. | \$276,000 | City |
| HFK003 | Rochex Ave from Tyler St to N 4th St | Reports of speeding, students dropped off across Rochex and running across the street to school. The number of driveway entrances and exits complicates traffic on Rochex Ave. | Consider constructing a center median with street trees on Rochex Ave to slow traffic. Consolidate the number of driveways onto campus. | \$26,960 | City |
| HFK004 | 4th St at Rochex Ave | Cars parked at northeast corner of the intersection limit visibility of the crosswalk. Cars exiting school driveway can't see pedestrians waiting to cross. | Install traffic calming if requested and supported by neighborhood residents. Install curb extensions to shorten crossing distance and increase visibility, and consider rectangular rapid flashing beacon or raised crossing. Install ADAcompliant curb ramps. | \$456,520 | City |
| HFK005 | Tyler St at W Laurel Dr | Pedestrian route to school. | Upgrade curb ramps, install high- visibility crosswalks and advance limit lines. Upgrade pedestrian heads at signal to include leading pedestrian interval. | \$268,000 | City |
| HFK006 | W Laurel Dr | Five-lane roadway, higher traffic volumes and speeds. | Install Class IV separated bikeways or Class I multi-use path. | \$1,200,000 | City |
| HFK007 | Curtis St | No bicycle facilities on neighborhood streets near the school. | Consider bike boulevard with curb extensions and high-visibility crosswalks at all intersections from 1st St to Tyler St. | \$1,160,000 | City |
| HFK008 | Cherokee Dr | No bicycle facilities on neighborhood streets near the school, reports of speeding. | Consider bike boulevard. Consider road closure with bike and pedestrian access at Ebro Circle to reduce cut-through traffic. | \$3,060,000 | City |
| HFK009 | Cherokee Dr at Inca Way | Pedestrian route to school. | Install curb extensions and high- visibility crosswalks | \$216,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|---|---|--|-------------|------------------------|
| HFK010 | Tulane St | No bicycle facilities on neighborhood streets near the school. | Consider bike boulevard with curb extensions and high-visibility crosswalks at all intersections. | \$1,178,400 | City |
| HFK011 | 4th St at W Curtis St | No bicycle facilities on neighborhood streets near the school, traffic calming needed to create bike boulevard. | Consider neighborhood traffic circle. | \$195,000 | City |
| HFK012 | N 1st St | No bicycle facilities on neighborhood streets near the school. | Consider bike boulevard with curb extensions and tree wells. | \$3,447,200 | City |
| HFK013 | N 1st St at Navajo Dr | No bicycle facilities on neighborhood streets near the school, traffic calming needed to create bike boulevard. | Consider neighborhood traffic circle. | \$195,000 | City |
| HFK014 | W Alvin Dr | Recent Safe Routes to Schools project ends at N Main St. | Consider extending Safe Routes to Schools corridor on E Alvin and installing buffered bike lanes and high-visibility crossings. | \$1,361,580 | City |
| HFK015 | Madrid St from Cherokee Dr to mall entrance driveway | Bike lanes end at mall entrance driveway. | Consider bike lanes or bike boulevard. | \$408,000 | City |
| HFK016 | W Laurel Dr at Parkside St | Key pedestrian route to school. Uncontrolled crosswalk, reports of speeding and drivers not yielding to pedestrians. | Install planned rectangular rapid flashing beacon and pedestrian refuge island at Laurel/Parkside. | \$140,000 | City |

LA JOYA ELEMENTARY

La Joya is located outside Salinas city limits, to the north of the city. It draws students from the surrounding neighborhoods and from rural areas north of Salinas (see map on the following page).

PARENT SURVEY

La Joya parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 79 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 31, below.

Figure 31. Parents' top concerns about letting children walk or bike to and from school.

Curb extensions are recommended on Bollenbacher Dr in front of the school to prevent parking in the red zone

La Joya School

Motorist Conditions

- La Joya Elementary is located on Bollenbacher Drive, a two-lane residential roadway with parking on both sides. Bollenbacher Drive is very congested before and after school.
- There is a drop-off area and small parking lot on the school campus. The parking lot is shared with staff and visitors. Left turns are prohibited out of the school parking lot.
- The morning sun creates visibility problems for eastbound traffic along Rogge Road at certain times of the year.
- Bus drop-off takes place in the school drop -off loop.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There are sidewalks on both sides of Bollenbacher Drive and other residential streets near the school.
- There is a high-visibility yellow crosswalk on Rogge Road at Bollenbacher Drive and a standard yellow crosswalk on Bollenbacher Dr at Pingree Way.
- There are missing curb ramps at most intersections surrounding the school.
- Staff members assist during the morning dropoff to valet students into campus.

Bicycling Conditions

- There are Class II bicycle lanes on Rogge Road between San Juan Grade Road and the campus, but they end east of the school.
- There are no bicycle facilities on Bollenbacher
 Drive, San Juan Grade Road, or other residential roadways near the school.

The crossings of San Juan Grade Rd were identified as a safety concern

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND LA JOYA ELEMENTARY

The following table lists recommendations for La Joya Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|----------------------|---|--|-------------|------------------------|
| LJE009 | San Juan Grade Rd | Reports of speeding. | Install traffic calming, including narrowed travel lanes. | \$166,320 | County |
| LJE010 | San Juan Grade Rd | Key pedestrian route to La Joya Elementary, Gutierrez Middle, and Rancho San Juan High. No sidewalks. | Construct sidewalks along segments where none exists between Russell Rd and Rogge Village Wy. Consider shared-use path for bicycle use. | \$750,000 | County |
| LJE011 | General | Reports of speeding on neighborhood streets. Traffic from three schools combines. | Conduct neighborhood traffic- calming plan, and consider bike boulevard treatments. Consider Bollenbacher Dr, Jade St, and Penzance St as possible locations for traffic calming. | \$45,000 | County |
| LJE012 | Penzance St | Key pedestrian route to school. | Install curb extensions with ADA ramps and high-visibility crossings on cross streets between Paul Ave and Jade Dr. | \$1,682,000 | County |

LA PAZ MIDDLE

La Paz Middle is located in east Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

La Paz parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 28 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 32, below.

Figure 32. Parents' top concerns about letting children walk or bike to and from school.

Widening the sidewalk to create a shared use path is recommended on Paseo Grande, which is a route to three schools

Salinas Safe Routes to School Plan

Parks

Motorist Conditions

- La Paz Middle is located on North Sanborn Road, a four- to five-lane roadway with no parking on either side. North Sanborn Road is very congested before and after school.
- There are two drop-off areas and two parking lots on the school campus. There is a small parking lot on the west side of campus that is reserved for staff. Left turns are prohibited out of the school parking lot.
- Bus drop-off takes place in the drop-off loop on the west side of campus, off Sherwood Lane.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of North Sanborn Road, Paseo Grande, and other residential streets near the school.
- There is a high-visibility yellow crosswalk with rectangular rapid flashing beacons across
 North Sanborn Road to the west of the school driveway entrance.
- There are marked yellow crosswalks at the intersection of Paseo Grande and Towt Street.
 This intersection also serves Cesar Chavez Elementary.

Bicycling Conditions

- There are Class II bicycle lanes on North Sanborn Road between Del Monte Avenue and Boronda Road and on Freedom Parkway.
- There are no bicycle facilities on Paseo Grande or other residential streets near the school.

Analysis for a traffic signal or pedestrian hybrid beacon is recommended for Sanborn Rd at Antigua Ave

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND LA **PAZ MIDDLE**

The following table lists recommendations for La Paz Middle, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-----------------------|--|---|--|-------------|------------------------|
| LPM001 | Antigua Ave from Rider Ave to Sanborn Rd | Key route to Frank Paul Elementary and La Paz Middle. No bike facilities. | Create a bicycle route with signage and sharrow markings. | \$19,600 | City |
| LPM002 | Freedom Parkway at Estrella Way | Key pedestrian route to school. | Install high-visibility yellow crosswalk and construct curb extensions across Estrella Way. | \$104,000 | City |
| LPM003 | Antigua Ave from Palmera Ave to Sanborn Rd | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Widen sidewalk. | \$30,000 | City |
| LPM004 | Sanborn Rd at Antigua Ave | Key pedestrian route to school. Five-lane roadway with high traffic volumes and speeds. Reports of speeding and of drivers not yielding to pedestrians in the crosswalk. | Conduct warrant for traffic signal or installation of pedestrian hybrid beacon signal. If neither is warranted, install pedestrian refuge island and add an additional flashing beacon to refuge island. Include appropriate yield signage and striping. | \$737,000 | City |
| LPM005 | Sanborn Rd at Paseo Grande | Heavy traffic congestion before and after school, reports of drivers not yielding to pedestrians in the crosswalk. | Extend median to prevent left turns onto Paseo Grande. Extend the queue space for the left turn pocket at Sanborn/Antigua. | \$500 | City |
| LPM007 & LPM022 | Antigua Ave at La Cuesta Ct (both intersections) | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Install raised crossing with high- visibility yellow crosswalk on La Cuesta Ct. | \$298,000 | City |
| LPM008 | Antigua Ave at Antigua Cir | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Install high-visibility yellow crosswalk on Antigua Cir. | \$4,000 | City |
| LPM009 | Antigua Ave at Bernardo Ave | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Consider raised intersection with high-visibility crosswalks on all legs, or install high-visibility yellow crosswalks and curb extension on all legs of the intersection, and raised crosswalks across Bernardo Ave. | \$796,000 | City |
| LPM010 | Antigua Ave at Vera Cruz Cir | Key pedestrian route to Frank Paul Elementary and La Paz Middle. | Install raised, high-visibility yellow crosswalk on Vera Cruz Cir., and construct curb extensions. | \$249,000 | City |
| LPM011 | Sanborn Rd at Boronda Rd | Planned city project. | Install roundabout and appropriate striping. | \$5,000,000 | City |
| LPM012 | Paseo Grande at Estrella Way | Key pedestrian route to Cesar Chavez Elementary and La Paz Middle. | Upgrade to high-visibility yellow crosswalk on Estella Way. | \$4,000 | City |

| NO. | STREET 220 | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|---|-------------|------------------------|
| LPM013 | Paseo Grande at Estrella Way | Key pedestrian route to Cesar Chavez Elementary and La Paz Middle. | Consider pedestrian facility, per city policy. | \$10,000 | City |
| LPM014 | Sanborn Rd at Freedom Parkway | Reports of high traffic speeds and of drivers not yielding to pedestrians in the crosswalks. | Update signal to include leading pedestrian interval, and install pedestrian countdown signal heads. | \$400,000 | City |
| LPM015 | Sanborn Rd at Paseo Grande | Heavy traffic congestion before and after school, reports of drivers not yielding to pedestrians in the crosswalk. | Install curb extensions across Paseo Grande, and upgrade to raised high-visibility yellow crosswalk. | \$249,000 | City |
| LPM016 | Sanborn Rd at Del Monte Ave | Reports of drivers not yielding to pedestrians in the crosswalk. | Upgrade to high-visibility crosswalk and conflict striping for proposed Class IV bikeway. | \$5,000 | City |
| LPM017 | Sanborn Rd at Sherwood Ln | Reports of drivers making U-turns while students are crossing. This entrance to the school is designated for buses only. | Upgrade to high-visibility yellow crosswalk on Sherwood Ln. Expand center median further west of this intersection to prevent U-turns. | \$6,000 | City |
| LPM018 | Sanborn Rd from Del Monte Ave to Buckhorn Dr | Four-lane roadway with higher traffic volumes and speeds. Reports of speeding. | Upgrade Class II bike lane to Class IV separated bikeway. Include conflict striping at intersections. Consider Class IV or buffered bike lane west of Del Monte Ave, with 2-way center turn lane. | \$3,469,500 | City |
| LPM019 | Bus driveway and drop-off zone from Sherwood Ln to school entrance off Sanborn Rd | The bus driveway is a one-way loop and is used by parents, sometimes in the wrong direction. The end of the bus drop-off area is a key pedestrian route to school. | Add more bus-only signage at entry on Sherwood Lane. At the end of the bus drop-off lane, install flexible posts to narrow the exit, and install exit-only/one-way-road signage to prevent vehicles from turning incorrectly into the bus lane and to provide additional protection for pedestrians in the crosswalk. | \$3,050 | City |
| LPM020 | Parking lot entrance at Paseo Grande | Heavy traffic congestion on Paseo Grande before and after school. | Include exit-only signage, and consider narrowing the exit with delineators to limit the ability of vehicles to enter from Paseo Grande. | \$1,150 | City |
| LPM021 | Paseo Grande from Sanborn Rd to Towt St | Key route to Cesar Chavez Elementary, La Paz Middle, and Alisal High. No bicycle facilities. | Widen sidewalk on west side of street to create Class I shared-use path. Install signage and safety improvements to designate Antigua, Sanborn, Paseo Grande, Moreno, and Camarillo Court as an SRTS route. | \$121,700 | City |

LAUREL WOOD ELEMENTARY

Laurel Wood is located in west Salinas next to Laurel Wood Park and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Laurel Wood parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 60 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 33, below.

Figure 33. Parents' top concerns about letting children walk or bike to and from school.

There is a school bus stop at the intersection of Victor St and Larkin St

Laurel Wood Elementary School

Motorist Conditions

- Laurel Wood is located on Larkin Street, a two-lane residential roadway with parking on both sides.
- There are a drop-off area and small parking lot on the school campus, which are closed to parents before and after school. Parking on campus is reserved for staff.
- Drop-off takes place on Larkin Street in front of the school and on Flint Way on the west side of campus.
- There was no regular bus service to Laurel Wood at the time of the school audit.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Larkin Street and other residential streets near the school.
- There are yellow high-visibility crosswalks on three legs of the intersection of Larkin Street and Flint Way, to the west of the school driveway entrance.
- There is a pedestrian pathway to the school campus from Victor Street and through Laurel Wood Neighborhood Park.
- There is pedestrian access into campus through the side gate off Flint Way/Colton Drive.

Bicycling Conditions

- There are no bicycle facilities on Larkin Street or other residential roadways near the school.
- The nearest bicycle facilities are Class II bicycle lanes on North Davis Road.

The main school crosswalk on Larkin St at Flint Wy

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND LAUREL WOOD ELEMENTARY

The following table lists recommendations for Laurel Wood, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|-----------------------------|--|--|-------------|------------------------|
| LWE001 | Larkin St | Several reports of speeding on Larkin. No bicycle facilities near school. Students crossing outside of marked crosswalks between Victor St and Flint Wy. | Consider bike boulevard with traffic-calming measures along Larkin between N Davis Rd and Victor St. Consider crosswalk across Larkin St at Victor St, O'Farrell Ct, or Sherman Dr. Install curb extensions at intersections along Larkin St from Mason Way to Victor St to shorten crossing distance on side streets. | \$2,032,000 | City |
| LWE002 | Victor St | No bicycle facilities near school. Reports of speeding on Victor St. No marked crossing to connect segments of Rossi Linear Park. | Consider bike boulevard with traffic calming measures. Install curb extensions at all side streets along Victor from Geneva to Larkin. Install raised crossing and continuous sidewalk across Victor at Rossi Linear Park. | \$1,928,500 | City |
| LWE003 | Lombard St | No marked crossing to connect segments of Rossi Linear Park. | Close Lombard St at Rossi Linear Park and extend greenway. | N/A | City |
| LWE004 | Rico Circle | Key pedestrian route to school. | Install marked crosswalk and ADA-compliant curb ramps across Rico Circle. | \$30,000 | City |
| LWE005 | Rico St | No marked crossing to connect segments of Rossi Linear Park. | Install marked crossing with curb extensions or other crosswalk enhancements to connect Rossi Linear Park. | \$104,000 | City |
| LWE006 | Larkin St at Flint Way | Key pedestrian route to school. | Install high-visibility crosswalks, curb extensions, and updated ramps. | \$268,000 | City |
| LWE007 | Victor St at Larkin St | Traffic congestion on Larkin St before and after school. Bus drop-off at Victor and Larkin leads to large numbers of students crossing. | Encourage parent drop-off at this location to alleviate front of school traffic. Install curb extensions and high-visibility crossing across Victor. Consider marked crosswalk across Larkin St. | \$108,000 | School/city |
| LWE008 | Flint Way at Colton Dr | Traffic congestion on Larkin St before and after school. | Encourage use of this as a drop- off location to ease traffic on Larkin St. Reconstruct sidewalk and replace street trees. | \$190,000 | School/city |
| LWE009 | Victor St at Van Ness Ct | No marked crosswalks on Victor St. | Consider pedestrian facility across Victor St, per city policy to provide access to park and school. | \$10,000 | City |

LINCOLN ELEMENTARY

Boronda Meadows is located at the western edge of Salinas and draws most of its students from the surrounding neighborhoods. Many students must cross North Davis Road to reach the school, and some must cross Highway 101 (see map on the following page).

PARENT SURVEY

Lincoln parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 98 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 34, below.

Figure 34. Parents' top concerns about letting children walk or bike to and from school.

Chestnut St is a key route to Lincoln Elementary and Salinas High

Lincoln Elementary School

Motorist Conditions

- Lincoln is located on California Street, a two-lane residential roadway with parking on both sides.
- There are designated loading spaces along the school frontage on California Street. There is a small parking lot and drop-off loop on the north side of campus and a small lot on the south side that is reserved for staff.
- There is no regular bus service to Lincoln, but occasional bus drop-offs take place on California Street adjacent to the school campus.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There are sidewalks on both sides of California Street and other residential roadways near the school.
- There is a high-visibility crosswalk across
 California Street at Chestnut Street in front of
 the main school entrance. There are also marked
 crosswalks across California Street at Willow
 Street and across Maple Street at Front Street.
- There are yellow crosswalks on three legs of the intersection of California Street and Maple Street and on all legs of the intersection of California Street and Pine Street.
- A crossing guard assists pedestrians at the intersection of California Street and Willow Street.

Bicycling Conditions

• There are no bicycle facilities on California Street or other roadways near the school.

Widening the sidewalk to create a shared-use path is recommended for California St

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND LINCOLN ELEMENTARY

The following table lists recommendations for Lincoln, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|--|-------------|------------------------|
| LE001 | California St from Maple St to Pine St | Reports of speeding on California St. Key pedestrian route to school. | Consider traffic calming on California St on the blocks near the school if requested and supported by neighborhood residents. Install curb extensions and high-visibility crossings on California at Maple, Chestnut, Willow, and Pine. | \$1,270,200 | City |
| LE009 | California Ave from John St to Romie Ln | No bicycle facilities near school. | Widen sidewalk on school side to create a multi-use path. Install continuous sidewalk at intersections. | \$300,000 | City |
| LE002 | California St at John St | Pedestrian route to school. | Install pedestrian countdown signal heads and evaluate for leading pedestrian interval. | \$200,000 | Caltrans |
| LE003 | Drop-off loop in school parking lot | Small parking lot with limited space to maneuver. Limited visibility at exit. | Restripe parking lot to reduce drop-off area to one lane. Trim vegetation to maintain visibility at exit. | \$6,440 | School |
| LE004 | Chestnut St at Pajaro St | Key pedestrian route to Lincoln Elementary and Salinas High. | Consider pedestrian facilities, per city policy. | \$10,000 | City |
| LE005 | Maple St at Front St | Pedestrian route to school. | Consider pedestrian facilities, per city policy. | \$10,000 | City |
| LE010 | Carmel Ave at Maple St | Reports of drivers not yielding to pedestrians. | Install raised crosswalk on Carmel Ave at Maple. | \$145,000 | City |
| LE006 | Pajaro St | No bicycle facilities near school. | Install separated bikeways as proposed in Active Transportation Plan. | \$6,522,660 | City |
| LE007 | East Romie Lane | Reports of speeding. | Install planned road diet to provide space for buffered bike lanes. | \$1,099,080 | City |
| LE018 | General area | Traffic congestion on California St before and after school. | Implement Park and Walk program to ease congestion at school frontage, and utilize surrounding areas and side streets. | N/A | School |

LOMA VISTA ELEMENTARY

Loma Vista is located in north Salinas and draws most of its students from surrounding neighborhoods, though a cluster of them live near Cesar Chavez Community Park in east Salinas (see map on the following page).

PARENT SURVEY

Loma Vista parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 94 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 35, below.

Figure 35. Parents' top concerns about letting children walk or bike to and from school.

Broken sidewalk on Compton Way

Loma Vista Elementary School

Motorist Conditions

- Loma Vista Elementary is located where Sausal Drive and Cambrian Drive meet. Both streets are two-lane residential roadways with parking on both sides of the street.
- There is a small drop-off area and parking lot on the school frontage. There is a parking lot in the back of campus that is reserved for staff. At the time of the audit, the parking lot and loop were blocked off for parents and drop-off took place on the street.
- Bus drop-off takes place in the drop-off loop.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Sausal Drive/Cambrian Drive near the school.
- There is a high-visibility yellow crosswalk on Sausal Drive directly in front of school and next to the school driveway entrance.
- There are no painted crosswalks at the nearby intersections.
- There is a pedestrian pathway and gate to the back of the campus from Compton Way, which was closed at the time of the audit.
- A crossing guard assists pedestrians at the intersection of Cambrian Drive and Sausal Drive.

Bicycling Conditions

 There are no bicycle facilities on Sausal Drive or other roadways near the school.

Opening the back entrance to campus is recommended to reduce traffic on Sausal Dr

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND LOMA VISTA ELEMENTARY

The following table lists recommendations for Loma Vista, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|-----------------------------------|--|---|-----------|------------------------|
| LVE001 | School drop-off loop | Heavy traffic congestion on Sausal Dr in front of school. | Consider moving bus drop-off (El Sausal Drive across from the school might be a good location) and letting parents drop off in the loop. | \$75,000 | School |
| LVE002 | Glendora Way at Compton Way | Key pedestrian route to school. | Consider continuous sidewalk at Redondo Way, Coventry St, and back entrance to campus. | \$13,500 | City |
| LVE003 | Sidewalk at back of school | Broken sidewalk. | Reconstruct sidewalk where needed on Compton Way and Glendora Way. | \$125,000 | City |
| LVE004 | Back entrance of school | Heavy traffic congestion on Sausal Dr in front of school. | Reopen back entrance with a gate that can be unlocked and opened during drop-off and pick-up hours. Encourage parent drop-off at this location. | \$8,500 | School |
| LVE005 | Pescadero Dr | Key pedestrian route to school. | Install marked crosswalks on side streets. Install curb extensions at intersections of Los Coches and Sausal. | \$232,000 | City |
| LVE006 | Pescadero Dr at Compton Way | Pedestrian route to school. | Evaluate sight-distance criteria and consider daylighting intersections or installing curb extensions to improve visibility. | \$101,525 | City |
| LVE007 | Cambrian Dr at Sausal Dr | Key pedestrian route to school. | Consider continuous sidewalk or raised crosswalk in front of school. | \$5,000 | City |
| LVE008 | Cambrian Dr at Saucito Ave | No bicycle facilities near school. Reports of speeding. | Consider bike boulevard. Install marked high-visibility crosswalk on side streets (Saucito and El Sur), and consider continuous sidewalks. | \$910,600 | City |
| LVE009 | Los Coches Ave at Cambrian Dr | Key pedestrian route to school. | Install curb extension and high- visibility crosswalk. | \$104,000 | City |
| LVE010 | Cambrian Dr at Atherton Way | Key pedestrian route to school. | Conduct all-way stop warrant analysis. | \$5,000 | City |
| LVE013 | Saratoga Dr at Cambrian Dr | Key pedestrian route to school. Connection to Castleton St and Gabilan Creek Trail. | Consider pedestrian crossing enhancements, per city policy. | \$10,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|-----------------------------------|--|--|-------------|------------------------|
| LVE011 | Natividad Rd | Six-lane roadway with higher traffic volumes and speeds. | Install Class IV separated bikeway. | \$2,313,000 | City |
| LVE012 | Natividad Rd at Los Coches Ave | Six-lane roadway with higher traffic volumes and speeds. Pedestrian route to school. | Consider center median pedestrian refuges, curb extensions, protected pedestrian phasing, and leading pedestrian interval. | \$766,000 | City |

LOS PADRES ELEMENTARY

Los Padres is located in east Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Los Padres parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September of 2020, and 114 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 36, below.

Parents reported concerns about safety and maintenance on the path behind the school

Los Padres Elementary School

Motorist Conditions

- Los Padres Elementary is located on John Street, a two-lane arterial roadway with a center turn lane and parking on both sides. John Street is very congested before and after school.
- There is a drop-off area and a large parking lot on the school campus frontage. Left turns are allowed out of the school parking lot.
- Bus drop-off takes place at the end of the dropoff loop, which is also used by parents.
- There are speed feedback signs on John Street on either side of the school campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of John Street and other residential roadways near the school.
- There is a high-visibility yellow crosswalk with rectangular rapid flashing beacons across John Street to the east of the school driveway exit.
- There are marked crosswalks on all legs of the intersection of John Street and East Alisal Street.
- There are high-visibility crosswalks on all legs of the intersection of John Street and South Sanborn Road.
- There is a pedestrian pathway to the school campus from Beverly Drive, which passes over Alisal Creek.

Bicycling Conditions

- There are Class II bicycle lanes on John Street between South Wood Street and East Alisal Street.
- There are no bicycle facilities on other roadways near the school.

A road diet, bike lanes, and rectangular rapid flashing beacons were installed on John St

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND LOS PADRES ELEMENTARY

The following table lists recommendations for Los Padres, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|---|-------------|------------------------|
| LPE001 | John St at school frontage | Reports of speeding and drivers not yielding to pedestrians. | Install curb extensions and pedestrian refuge island. | \$200,000 | City |
| LPE002 | John St | Reports of speeding. | Install raised median for entire length of John St, with landscaping and lighting. Consider other opportunities for traffic calming. | \$3,879,220 | City |
| LPE003 | Intersection of E Alisal St/John St/ Williams Rd | Intersection is confusing to drivers. Long crossing distances for pedestrians. | Intersection redesign, including slip lane closure, sight distance analysis, squaring of vehicle approaches and pedestrian crossings, and construction of curb extensions. | \$701,000 | City |
| LPE004 | Side streets along John St | Key pedestrian route to school. Low visibility at intersections. | Perform intersection sight distance analysis and consider installation of red curb to daylight the intersections of McGowan Dr and John Circle. | \$1,000 | City |
| LPE005 | John St at McGowan Dr | Drivers may not realize they are approaching a school zone. | Install planned school assembly B signage in advance of existing crosswalk. | \$850 | City |
| LPE006 | School campus | Congestion in parking lot before and after school. | Implement rolling drop-off program. Hire people or recruit volunteers to supervise drop-off and pick-up. | N/A | School |
| LPE007 | Alisal Creek | Opportunity for shared- use path and alternative route to school. | Consider shared-use path with lighting along Alisal Creek. | \$4,892,800 | City |
| LPE008 | Alleyway behind school | Safety concerns in alley, overgrown vegetation, and no lighting. | Repave and widen alleyway path. Repair or re-install fencing. Install landscaping to shield path from golf course. Consider opening school gate to allow access to campus. Install pedestrian-scale lighting. | \$183,800 | City |
| LPE009 | Mayfair Dr | Students who live on Mayfair Dr have no direct route to campus. | Consider acquiring right-of-way for pedestrian access to school campus from Mayfair Dr. | N/A | City |

KINNON ELEMENTARY

McKinnon is located in the northern edge of Salinas and draws most of its students from the neighborhood directly south of the school (see map on the following page).

PARENT SURVEY

McKinnon parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 46 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 37, below.

Figure 37. Parents' top concerns about letting children walk or bike to and from school.

A Class I path is recommended between Boronda Rd and the school

McKinnon Elementary School

Transportation Agency for Monterey County

Motorist Conditions

- McKinnon Elementary is located on McKinnon St, a two-lane roadway. There is no on-street parking on McKinnon south of Boronda Road. McKinnon Street is very congested before and after school.
- There are two drop-off areas and parking lots on the school campus. There is a parking lot on the north side of campus that is reserved for staff. Left turns are permitted out of the school parking lot.
- Bus drop-off takes place in the drop-off area on the north side of campus.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There is a sidewalk only on the east side of McKinnon St near the school. The West Area Specific Plan calls for sidewalks on both sides of the street when future development is completed.
- There are standard white crosswalks on three legs of the intersection of McKinnon Street and E Boronda Road. Curb ramps are in place at this intersection.

Bicycling Conditions

- There are Class II bicycle facilities on McKinnon St south of Boronda Road.
- There are Class II bicycle facilities on Boronda Road near the school.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND MCKINNON ELEMENTARY

The following table lists recommendations for McKinnon Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|---|-------------------|------------------------|
| MKE001 | McKinnon St in neighborhood | Buffered or separated bike lanes provide more separation from traffic than Class II bike lanes. Reports of speeding. | Install traffic calming and Class IIB buffered bike lanes or two-way separated bikeway. | \$1,595,970 | City |
| MKE002 | McKinnon St. at front of school | No bicycle facilities on McKinnon St north of Boronda Rd. | Install improvements per West Area Specific Plan: Class II bike lanes, street trees, and multi-use community path on east side of street to provide access to school. | \$176,400 | City |
| MKE003 | Boronda Rd at McKinnon St | Key pedestrian route to school. Higher traffic volumes and speeds. | Install planned changes re. Boronda Road Congestion Relief Project, including high-visibility crosswalks, Class IIB buffered bike lanes, and protected intersection. | Project Funded | City |
| MKE007 | Boronda Rd at McKinnon St | Roundabouts are new for many Salinas residents. | When roundabout is installed, give information to parents on how to use roundabouts and station a crossing guard at this intersection. | N/A | School |
| MKE004 | E Boronda Rd from Dartmouth to Hemingway | Higher traffic volumes and speeds. Shared- use paths provide more separation for people on bikes. | Expand sidewalk to Class I shareduse path. | \$2,415,000 | City |
| MKE008 | E Boronda Rd at San Juan Grade Rd | Pedestrian route to school. | Upgrade crosswalks to high- visibility. | \$28,000 | City |
| MKE005 | McKinnon St at Pennsylvania Dr | Pedestrian route to school. | Upgrade crosswalks to high- visibility. | \$4,000 | City |
| MKE006 | Chardonnay Dr at McKinnon St | Pedestrian route to school. | Install high-visibility crosswalk across Chardonnay Dr. | \$4,000 | City |
| MKE009 | Dartmouth Way | Heavy traffic congestion at intersection of McKinnon and Boronda. Dartmouth Way could be another way to enter and exit the neighborhood. | Remove traffic diverters on Dartmouth Way. | \$3,800 | City |

MISSION PARK ELEMENTARY

Mission Park is located in south Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page). It is located near Notre Dame High to the south, Palma School to the east, and Washington Middle to the north.

PARENT SURVEY

Mission Park parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September of 2020, and 74 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 38, below.

Figure 38. Parents' top concerns about letting children walk or bike to and from school.

Parents turning left back up traffic in the school parking lot

Mission Park Elementary School

Motorist Conditions

- Mission Park Elementary is located on West Acacia Street, a two-lane residential roadway with parking on both sides.
- There is a two-lane drop-off area and parking lot on the school campus frontage. There is a small parking lot on the west side of campus that is reserved for staff. Left turns are prohibited out of the school parking lot.
- There is no regular bus service to Mission Park, but special education bus drop-off takes place in the drop-off loop used by parents.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of West Acacia Street and other residential roadways near the school.
- There is a high-visibility yellow crosswalk on West Acacia Street at Maron Street to the west of the school driveway exit. At the time of the audit, there was a crossing guard stationed at this intersection before school only.
- There are yellow crosswalks on several side streets near the school, including San Vicente Avenue, Bruce Avenue, and Crespi Way.
- There are missing curb ramps at many of the intersections surrounding the school.

Bicycling Conditions

• There are no bicycle facilities on West Acacia Street or other roadways near the school.

A pedestrian refuge island is recommended for the crosswalk in front of the school

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND MISSION PARK ELEMENTARY

The following table lists recommendations for Mission Park, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|-----------------------------------|---|--|-------------|------------------------|
| MPE001 | School drop-off loop | Congestion in school parking lot before school. | Consider rolling drop-off program and drop-off monitors to streamline drop-off and pick-up. | N/A | School |
| MPE002 | School exit driveway | Drivers turning left out of driveway back up traffic in loop. | Install stop sign at school driveway exit. Redesign exit to restrict left turns (for example, see New Republic Elementary) | \$2,170 | School |
| MPE003 | W Acacia St at Marion St | Heavy traffic congestion to the three nearby schools. Vegetation obstructs visibility. | Upgrade crosswalk to yellow high- visibility, and install pedestrian island and advance yield lines. Trim vegetation to increase visibility. | \$109,800 | City |
| MPE004 | W Acacia St | No bicycle facilities near school. Reports of speeding on Acacia. | Consider bike boulevard. Study options for widening sidewalk to create a shared-use path. | \$4,347,200 | City |
| MPE005 | Riker St | No bicycle facilities near school. | Consider a bike boulevard. | \$2,713,200 | City |
| MPE006 | Iverson St | No bicycle facilities near school. | Consider a bike boulevard. | \$1,407,600 | City |
| MPE007 | W Acacia St at Sierra Madre | Key pedestrian route to school. | Install curb extensions to shorten crossing distance on Sierra Madre. | \$200,000 | City |
| MPE008 | W Acacia St at Bruce Ave | Key pedestrian route to school. | Install curb ramps and high- visibility crosswalk on Bruce. | \$30,000 | City |
| MPE009 | San Vicente Ave at Palma Dr | a Key pedestrian route to school. | Install curb extensions at all four corners of the intersection. | \$200,000 | City |
| MPE010 | W Acacia St at San Vicente Ave | Key pedestrian route to school. Reports of speeding on Acacia. | Install curb extensions, tighten curb radius, and install high-visibility crosswalks. Consider a neighborhood traffic circle. | \$411,000 | City |
| MPE011 | W Acacia St at Iverson St | Key pedestrian route to Mission Park and Washington Middle. Reports of speeding. | Square the intersection, close the slip lanes, and shorten crossing distances with curb extensions. Consider a neighborhood traffic circle. | \$645,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|---------------------------------|--|--|-----------|------------------------|
| MPE012 | W Acacia St at Junipero Way | Key pedestrian route to school. | Install curb ramps and continuous sidewalk with high-visibility crosswalk on Junipero. | \$34,500 | City |
| MPE013 | West Acacia St at Crespi Way | Key pedestrian route to school. | Install curb ramps and continuous sidewalk with high-visibility crosswalk on Crespi. | \$34,500 | City |
| MPE014 | Blanco Rd at Iverson St | Pedestrian route to school. Higher traffic volumes and speeds. | Install protected pedestrian signal phasing. | \$200,000 | City |

MONTE BELLA ELEMENTARY

Monte Bella Elementary is located on the eastern edge of Salinas. Most Monte Bella students live in the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Monte Bella parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 66 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 39, below.

Figure 39. Parents' top concerns about letting children walk or bike to and from school.

Families cross Tuscany Blvd at Canelli Ct to reach the school and park

Monte Bella Elementary School

Motorist Conditions

- Monte Bella is located on Tuscany Boulevard, a two-lane residential street with parking on both sides.
- There are two drop-off areas and two parking lots on the school campus. Drivers access the school via Tuscany Boulevard. School staff use cones to prevent left turns out of the drop -off loop.
- Tuscany Boulevard is a small residential street with low traffic.
- Drop-off occurs in both of the drop-off areas. At the time of the audit, school staff were trying out a new system of organizing pick-up by grade level, and parents were asked to circle the drop-off loop until their student was ready to be picked up.

- Drivers have also been seen dropping off curbside along the surrounding streets to avoid the school's drop-off loop.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There are complete sidewalks on Tuscany Boulevard, Monte Bella Boulevard, and other roadways near the school.
- There are high-visibility yellow crosswalks across Tuscany Boulevard at Tuscany Way and Freedom Parkway
- There are pedestrian pathways to campus from Monte Bella Park, which is adjacent to the school. There is a back gate to campus, which was closed at the time of the audit.

Bicycling Conditions

• There are Class II bike lanes on both sides of Tuscany Boulevard, Monte Bella Boulevard, and Freedom Parkway north of the school.

Analysis for a roundabout is recommended for Freedom Parkway at Tuscany Blvd

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND MONTE BELLA

The following table lists recommendations for Monte Bella, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------------------------|--|---|--|-----------|------------------------|
| MBLE001 | Freedom Parkway from Tuscany Blvd to Padova Dr (eventually to Sconberg Parkway) | Four-lane roadway with higher traffic speeds. | Consider road diet on Freedom from Tuscany, and installation of Class IV separated bikeways. | \$462,600 | City |
| MBLE002 | Freedom Parkway at Tuscany Blvd | Difficult for drivers to turn left from Tuscany onto Freedom, which backs up traffic on Tuscany and in the school parking lot. | Consider study for roundabout. Restripe the bikeway approach and right-hand-turn conflict area. The right-turn lane outside of the dedicated bikeway is not the best design (flip placement and put the crossover further north of the intersection, and the crossover should include conflict striping). Add conflict striping across Freedom Pkwy. | \$45,400 | City |
| MBLE003 | School parking lot | Goal of creating a one- way loop to reduce congestion at the intersection of Tuscany Blvd and Tuscany Way. | Install raised crosswalk to align with Tuscany Way crossing. Remove speed humps. Remove "No left turn" unless roundabout is installed. Make eastern driveway exit only. | \$151,500 | School |
| MBLE004 | Tuscany Blvd from Freedom Parkway to Monte Bella Blvd | Reports of speeding. | Consider traffic calming for two vehicular travel lanes in a way that does not affect bike lanes. | \$255,000 | City |
| MBLE005 | Tuscany Blvd | Heavy traffic congestion in school parking lot. | Install loading-zone curb markings and signage at curb along school frontage. | \$5,700 | School/city |
| MBLE006 & MBLE010 | Tuscany Blvd at Canelli Ct | Key pedestrian route to school and park. | Add high-visibility yellow crosswalk across Canelli Ct. Consider other pedestrian crossing enhancements per city policy. | \$14,000 | City |
| MBLE007 | Tuscany Blvd at Tuscany Wy | Reports of speeding. | Install raised crosswalk. | \$145,000 | City |
| MBLE008 | Monte Bella Blvd at Palermo Dr (north leg) | Pedestrian route to school and park. Reports of speeding. | Evaluate for all-way stop control. If warranted, install marked high-visibility crosswalks on all legs and ADA compliant ramps. If not warranted, consider pedestrian facility, per city policy. | \$53,000 | City |
| MBLE009 | Pardova Drive | Traffic congestion on Tuscany Blvd in front of school. | Open back gate to campus to provide an alternative to the traffic in front of the school. | \$8,500 | School |

MONTEREY PARK ELEMENTARY

Monterey Park is located in south Salinas and draws most of its students from south Salinas neighborhoods, with less than half of the students living within a mile of the school (see map on the following page).

PARENT SURVEY

Monterey Park parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September of 2020, and 58 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in

Figure 40. Parents' top concerns about letting children walk or bike to and from school.

Curb extensions and high-visibility striping are recommended for the crosswalk in front of the school

Monterey Park Elementary School

Motorist Conditions

- Monterey Park Elementary is located on San Miguel Avenue, a two-lane residential roadway with parking on both sides.
- There is a drop-off area and parking lot on the school campus frontage. There is a secondary staff parking lot on the southeast side of campus. Left turns are permitted out of the school parking lot.
- Bus drop-off takes place on San Miguel Avenue just past the school, adjacent to the park.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of San Miguel Avenue and other roadways near the school.
- There is a yellow crosswalk on San Miguel Avenue at Alameda Avenue to the east of the school driveway entrance.
- There are yellow crosswalks on two legs of the intersection of San Miguel Avenue and San Juan Drive.
- There are curb ramps at intersections surrounding the school, but most are not up to current ADA standards.

Bicycling Conditions

• There are no bicycle facilities on San Miguel Avenue or other roadways near the school.

There are currently no marked crosswalks at the intersection of San Miguel Ave at San Fernando Ave

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND MONTEREY PARK ELEMENTARY

he following table lists recommendations for Monterey Park, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|--------------------------------------|--|---|-------------|------------------------|
| MPKE001 | San Miguel Ave | Consider bike boulevard on San Miguel Ave. Consider widening the sidewalk along Claremont Manor Park to create shared-use path. | Install planned Class IIB buffered bike lanes on Williams Rd between Freedom and Bardin. Allow for loading and unloading only, and restrict long-term parking on Williams Rd in front of Alisal High. Install raised median with street trees between Del Monte Ave and Monte Bella Blvd. Replace missing street trees. | \$967,400 | City |
| MPKE002 | San Miguel Ave | Key pedestrian route to school. | Install curb extensions, ADA ramps and/or continuous sidewalks on San Miguel Ave at San Pedro, San Juan, Wilgart, San Fernando, Via Paraiso, and Los Palos. | \$1,287,000 | City |
| MPKE003 | San Miguel Ave at San Juan Dr | Key pedestrian route to school. | Install curb extensions with tightened curb radii and ADA ramps. Install high-visibility crosswalks | \$216,000 | City |
| MPKE004 | San Miguel Ave at San Fernando Dr | Key pedestrian route to school. | Install high visibility crosswalks and construct curb extensions | \$216,000 | City |
| MPKE005 | San Miguel Ave at Alameda Ave | Key pedestrian route to school. | Install curb extensions on all corners, pedestrian refuge island, high-visibility crosswalks, and curb ramps. Widen pedestrian entrance to school at this location | \$247,000 | City |
| MPKE008 | La Mesa St | Reports of speeding | Install traffic calming measures if requested and supported by neighborhood residents. | \$897,000 | City |
| MPKE006 | E Romie Ln | Higher traffic speeds. No bicycle facilities near school. | Install planned road diet to provide space for buffered bike lanes | \$1,099,080 | City |
| MPKE007 | E Romie Ln at Los Palos Dr | Higher traffic speeds. Concerns about safety of students crossing. | Consider installing high-visibility crosswalks and ADA ramps per City policy | \$70,000 | City |

MOUNT TORO HIGH

Mount Toro High is located in central Salinas and draws students from throughout the city (see map on the following page).

PARENT SURVEY

Mount Toro parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 6 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 41, below.

Figure 41. Parents' top concerns about letting children walk or bike to and from school.

MST buses have blocked traffic waiting to turn onto Sherwood Place

Motorist Conditions

- Mount Toro High is located on Sherwood Place, a two-lane roadway with some parking on both sides. Sherwood Place is very congested before and after school.
- There are several schools on Sherwood Place, with multiple drop-off areas and parking lots throughout their campuses. There is a parking lot on the north side of Mount Toro campus that is shared with staff and visitors. Left turns are permitted out of the school parking lot.
- Bus drop-off takes place on the back side of the school campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on the south side of Sherwood Place but none on the north side.
- There are sidewalks on both sides of Sherwood Drive between East Bernal Drive and Highway 101. South of the highway, there is missing sidewalk on the west side of Sherwood Drive to Rossi Street.
- There are no high-visibility yellow crosswalks near the school campus. There is a standard white crosswalk on Sherwood Place near the entrance to the Mount Toro High parking lot.
- There are curb ramps at the intersection of Sherwood Drive and Sherwood Place.
- Mount Toro High is not served by a MST bus route.

Bicycling Conditions

- There are no bicycle facilities on Sherwood Place.
- There are buffered Class II bicycle lanes on Sherwood Drive between Sherwood Place and East Laurel Drive, and Class II bicycle lanes south of the school to East Rossi Street.
- There are dashed green conflict markings on Sherwood Drive at the intersection of Sherwood Place.

A two-way cycle track or Class I path is recommended for Sherwood Dr.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND MOUNT TORO HIGH

The following table lists recommendations for Mount Toro High, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|---|---|--|--------------|------------------------|
| MTH001 | Sherwood Pl | Missing sidewalk. | Fill in sidewalk gaps on north side near Sherwood Dr. | \$60,000 | City |
| MTH002 | Sherwood Pl | Flooding during rainy season. | Upgrade stormwater retention and runoff reduction along Sherwood Place. | \$2,000,000 | City |
| MTH003 | Sherwood Pl at mid-block crosswalk | Reports of drivers not paying attention to pedestrians in crosswalk, pedestrian hit in crosswalk. | Update crosswalk to high visibility, and construct curb extensions on either side. Add yield lines and school crossing signage assembly A. | \$109,700 | City |
| MTH004 | Sherwood Dr | MST bus blocks traffic turning right onto Sherwood Pl. | Relocate bus stop to north side of Sherwood Pl to enhance visibility at intersection, and construct bus pullout on north side of intersection. | \$75,000 | City |
| MTH005 | Sherwood Dr from Bernal St and Rossi St | Large four-lane roadway with high traffic volumes and speeds. | Consolidate bike lanes to one side of the road for a two-way cycle track or Class I shared-use path. Upgrade bike lanes on Natividad between Bernal and Boronda to Class IV separated bikeways, and install protected intersection treatments at Bernal to facilitate transition to cycle track. | \$12,541,180 | City |
| MTH006 | Sherwood Drive at Sherwood Pl | Difficult for drivers to turn in and out of Sherwood Place. | Re-evaluate ICE analysis to study options for intersection control. | \$40,000 | City |
| MTH007 | Mount Toro parking lot | No marked crosswalk for people walking to campus. | Install striping and signage to create a recommended path of travel through parking lot, including crosswalk to connect ramps. | \$15,700 | School |
| MTH008 | Behind school | Students walking across agricultural fields to reach the schools. | Install trails or shared-use paths to connect to Sherwood, Laurel, and Madeira Ave. | \$2,100,000 | City |
| MTH009 | Service roads near canal between Rossi St and Main St, and Main St and Sherwood Dr | Sherwood Drive over Hwy 101 has high traffic volumes and speeds. | Create Class I shared use path on service roads/ROW adjacent to canal, as identified in Urban Greening Plan. | \$1,800,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|---------------------------------------|---|--|-----------|------------------------|
| MTH010 | Service road near canal at Main St | If a shared-use path were installed, connection would be needed across North Main St. | Consider redesign of Casentini St/Main St intersection to incorporate bicycle crossing. Consider removing parking and installing a raised shared-use path on both sides of Main St to connect the Class I path to the Casentini intersection. | \$305,000 | City |
| MTH011 | Sherwood Drive at Bernal St | Main crossing point for people walking from neighborhoods northwest of school. | Install lead pedestrian interval and conduct counts to determine whether protected phase is needed. | \$440,000 | City |

NATIVIDAD ELEMENTARY

Natividad is located in north Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Natividad parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September of 2020, and 80 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 42, below.

Figure 42. Parents' top concerns about letting children walk or bike to and from school.

A high-visibility crosswalk was installed across E Alvin Dr at Modoc Ave

Natividad Elementary School

Motorist Conditions

- Natividad Elementary is located on Modoc Avenue, a two-lane residential roadway with parking on both sides. Modoc Avenue is very congested before and after school.
- There is no formal drop-off loop on campus.
 There is a small parking lot on the north side of campus and another parking lot on the south side that is reserved for staff. Left turns are permitted out of the school parking lot.
- There is also access to the school at the deadend on Tampico Avenue.
- Bus drop-off takes place on Modoc Avenue in front of the school campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Modoc Avenue and other roadways near the school.
- Alvin Drive was recently renovated by the city of Salinas. This included a road diet, buffered bicycle lanes, high-visibility crosswalks, curb extensions, new traffic signals, and improved pedestrian signal phasing.
- There is a high-visibility yellow crosswalk with rectangular rapid flashing beacon across Alvin Drive at Modoc Avenue.
- There are yellow crosswalks on Modoc Avenue and Glacier Drive at the front of the school and on two legs of the intersection of Modoc Avenue and Rainier Drive.
- There are ADA-compliant curb ramps at intersections surrounding the school.

Bicycling Conditions

- Class II buffered bicycle lanes were recently installed on East Alvin Drive and Linwood Drive, and there are Class II bicycle lanes on El Dorado Drive.
- There are no bicycle facilities on Modoc Avenue or other residential roadways near the school.

Curb extensions are recommended on Modoc Ave to prevent parking up to the school crosswalk

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND NATIVIDAD ELEMENTARY

The following table lists recommendations for Natividad, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|---|--|-------------------|---------------------------------------|
| NE001 | General | Congestion on Modoc Ave in front of school. | Work with churches on Alvin Drive to develop park-and-walk program. | N/A | School/TAMC/ nonprofit partners |
| NE002 | Parking lot on north end of campus | No drop-off loop on campus, congestion on Modoc Ave in front of school. | Consider converting to drop-off loop, keeping the back spaces for staff parking. | \$2,640 | School |
| NE003 | School frontage | Congestion on Modoc Ave in front of school. | Implement staggered start times or incentive program for early arrival. | N/A | School |
| NE004 | Linwood Dr at Rainier Dr | Pedestrian route to school. | Upgrade crosswalks to yellow high-visibility (per Linwood SRTS project). | Project Funded | City |
| NE005 | Rainier Dr at Modoc Ave | Pedestrian route to school. | Update crosswalks to yellow high- visibility. | \$8,000 | City |
| NE006 | Modoc Ave at Alvin Dr | Key pedestrian route to school. | Install curb extensions and pedestrian refuge island with additional rectangular rapid flashing beacon signage in center median. | \$200,850 | City |
| NE008 | Modoc Ave at Glacier Dr | Parents parking in red zone, which limits visibility of the crosswalk. | Install wide curb extension to narrow crossing distance and prevent parking in red zone. | \$100,000 | City |
| NE009 | Modoc Ave from Alvin Dr to Rainier Dr | Reports of speeding. | Consider street trees and traffic calming if requested and supported by neighborhood residents. | \$284,600 | City |
| NE010 | Glacier Dr from Modoc Av to Plumas Way | Pedestrian route to school. | Install curb extensions at all intersections. | \$400,000 | City |
| NE011 | Chaparral St | No bicycle facilities south of the school. | Consider bike boulevard with traffic calming or additional speed humps. | \$2,162,400 | City |
| NE012 | El Dorado Dr | Connection to El Dorado Park. | Upgrade bike lanes to Class IV separated bikeway, buffered bike lane, or two-way cycle track. | \$3,562,020 | City |

NEW REPUBLIC ELEMENTARY

New Republic is located in north Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

New Republic parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 21 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 43, below.

Figure 43. Parents' top concerns about letting children walk or bike to and from school.

Curb stops discourage left turns out of the school parking lot

New Republic Elementary School

Motorist Conditions

- New Republic Elementary is located on Arcadia Way, a two-lane residential roadway with parking on both sides. Arcadia Way is very congested before and after school.
- There are two drop-off areas and parking lots on the school campus. The drop-off loop on the north side of campus, off Arcadia Way, is designated for parents, and parking spaces are open to parents and staff. Left turns are prohibited out of the parking lot.
- The loop on the east side of campus, off Emerald Drive, is reserved for buses, and parking is reserved for staff. School staff used cones to block off the loop to parents.
- The morning sun creates visibility problems for eastbound traffic at certain times of the year.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Arcadia Way and other roadways near the school.
- There is a high-visibility yellow crosswalk with curb extensions across Arcadia Way to the west of the school driveway entrance.
- There are yellow crosswalks on Emerald Drive, Wimbledon Way, and Kent Street where they intersect with Arcadia Way.
- There are curb extensions with curb ramps at the intersection of Arcadia Way and Wimbledon Way.
 Curb ramps are in place at intersections in the neighborhood surrounding the school.
- At the time of the audit, there were no crossing guards stationed at New Republic. School staff helped control traffic and cross students in the school drop-off loop.

Bicycling Conditions

- There are no bicycle facilities on Arcadia Way or other residential roadways near the school.
- The nearest bicycle facilities are Class II bicycle lanes on El Dorado Drive.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND NEW REPUBLIC ELEMENTARY

The following table lists recommendations for New Republic Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|---|---|---|-------------|------------------------|
| NRE001 | Arcadia Way from El Dorado Dr to Natividad Rd | Reports of speeding and cut-through traffic. | Install traffic calming along Arcadia Wy if requested and supported by neighborhood residents. | \$540,600 | City |
| NRE002 | Arcadia Way at Kent St | Key pedestrian route to school. | Conduct all-way stop warrant. Consider marked crosswalk on Arcadia Way, per city policy. | \$13,000 | City |
| NRE003 | Arcadia Way at El Dorado Dr | Key pedestrian route to school and El Dorado Park. | Install curb extensions, high- visibility crossings, and rectangular rapid flashing beacon. | \$148,000 | City |
| NRE004 | Arcadia Way at Klamath Dr | Key pedestrian route to school. | Install marked crosswalk on Klamath Dr and ADA-compliant curb ramps. | \$30,000 | City |
| NRE005 | Natividad Rd at Arcadia Way | Some students cross Natividad. Six-lane roadway with higher traffic volumes and speeds. | Consider re-grading roadway to remove large grade-break at center of crosswalk (near center median). Widen median to provide pedestrian refuge island. Upgrade crosswalks to high-visibility. | \$118,000 | City |
| NRE006 | El Dorado Dr | No bicycle facilities near school. Route to school and El Dorado Park. | Upgrade bike lanes to Class IV separated bikeway, buffered bike lane, or two-way cycle track. | \$3,562,020 | City |
| NRE007 | Emerald Dr | Parents parked in bus loading zone. | Install "Do not enter" pavement markings across driveway entrance and larger or more frequent "Do not enter" and "Bus only" signage. Install drop-off zone at curb along Emerald Dr on school side of street. | \$15,530 | School |

NORTH SALINAS HIGH

North Salinas High is located in north Salinas and draws students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

North Salinas High parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 24 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 44, below.

Figure 44. Parents' top concerns about letting children walk or bike to and from school.

Salinas Boundary Existing Bike Infrastructure Bike Path Bike Lane Bike Route

Motorist Conditions

- North Salinas High is located between Alvin
 Drive and Kip Drive. Alvin Drive was recently
 renovated by the city of Salinas. This included a
 road diet, buffered bicycle lanes, high-visibility
 crosswalks, curb extensions, new traffic signals,
 and improved pedestrian signal phasing. Kip
 Dive is a two-lane residential roadway with
 parking on both sides. Both Alvin and Kip Drive
 are very congested before and after school.
- On the north side of the campus off Alvin Drive, there is a large parking lot for parents and students and a small parking lot reserved for staff. Bus drop-off takes place in a small loop in the center of campus which is accessed via Alvin Drive. Left turns are permitted out of the school parking lot.
- On the east side of campus off Kip Drive, there is a small drop-off loop and another parking lot, which is reserved for staff.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Kip Drive,
 Alvin Drive, and other roadways near the school.
- There are high-visibility yellow crosswalks on all legs of the intersection of Alvin Drive and McKinnon Street.
- There are updated curb ramps at intersections on Alvin Drive surrounding the school.
- There is a bicycle and pedestrian path connecting Kip Drive to Maryal Drive and providing access to the neighborhood south of the school.
- At the time of the audit, school staff acted as crossing guards at the crosswalk between the student parking lot off Alvin Drive and the campus.

- There are buffered bicycle lanes on Alvin Drive.
 There are no bicycle facilities on Kip Drive.
- There is a bicycle and pedestrian path connecting Kip Drive to Maryal Drive, providing access to the neighborhood south of the school.

The intersection of E Alvin Dr and McKinnon St was the biggest concern for school staff

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND NORTH SALINAS HIGH

The following table lists recommendations for North Salinas High, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|---|-----------|------------------------|
| NSH001 | E Alvin Dr at McKinnon St | High volumes of pedestrians and vehicles. Conflicts between drivers turning left and students crossing. | Install intersection improvement per Alvin Dr/Linwood SRTS project, including high-visibility yellow crosswalks yellow. Evaluate intersection for leading pedestrian interval or split pedestrian signal phasing. | \$200,000 | City |
| HFK014 | W Alvin Dr | Recent Safe Routes to Schools project ends at N Main St. | Consider extending Safe Routes to Schools corridor on E Alvin and installing buffered bike lanes and high-visibility crossings. | \$344,380 | City |
| NSH002 | Kip Dr from E Alvin Dr to Block Ave/shared-use path | Broken sidewalk across from campus. Students crossing Kip outside of marked crosswalks. No bicycle connection to trail south of campus. | Install traffic calming and create a Class III bike route with sharrows and signage to connect to trail/ alley and to bikeways on Maryal Dr and Chaparral Ave. Repair broken sidewalk. | \$315,200 | City |
| NSH003 | Block Ave from Kip Dr to Parsons Ave | Limited space for drop- off on Kip. Goal of encouraging drop-off in school parking lot off Alvin Dr and providing more space for walking and biking. | Consider restricting traffic on Kip Dr to one-way northbound between Block Dr and school loop exit, and restrict access between Kip and Block to biking and walking. Coordinate with fire department and follow neighborhood traffic- management process. | N/A | City |
| NSH004 | Shires Way at Block Ave | Pedestrian route to school. | Install high-visibility crosswalk and curb extensions. | \$158,000 | City |
| NSH005 | Maryal Dr at Chaparral St | Pedestrian route to school. | Install high-visibility crosswalks and curb extension on all legs of the intersection. | \$216,000 | City |
| NSH006 | Maryal Dr from Chaparral St to Laurel Dr | No bicycle facilities on this section of Maryal. Provides connection to trail south of school. | Install traffic calming and create a Class III bike route with greenbacked sharrows and signage. | \$652,800 | City |
| NSH007 | Chaparral St from Maryal Dr to Linwood Dr | No bicycle facilities on Chaparral. Provides connection to trail south of school. | Install a Class III bike route with green-backed sharrows and signage. | \$14,000 | City |
| NSH008 | Rainier Dr at Amador Cir | Pedestrian route to school. | Install high-visibility crosswalk and curb extensions across Amador Cir. | \$104,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|--|--|--|-------------|------------------------|
| NSH009 | Rainier Dr at Parsons Ave | Pedestrian route to school. | Install high-visibility crosswalk and curb extensions across Parsons Ave. | \$104,000 | City |
| NSH010 | Rainier Dr at Linwood Dr | Pedestrian route to school. | Upgrade crosswalks to high- visibility, per Linwood SRTS project. Consider installing a traffic circle. | \$211,000 | City |
| NSH011 | Main St from E Alvin Dr to Laurel Dr | Six-lane roadway with higher traffic volumes and speeds. | Remove on-street parking to install Class IV bikeway and accompanying signage and striping. | \$2,729,340 | City |
| NSH012 | School campus at trail entrance | No bicycle facilities between trail and school campus. | Widen pathway between staff parking lot and trail entrance to allow for bicycle access. Consider narrowing staff lot to create additional space. Look into complete streets treatments to separate pedestrian/bike space from vehicle space at path entrance and parking lot exit. | \$53,350 | School |
| NSH013 | School campus | No bicycle facilities between trail and school campus. | Upgrade bike parking on campus, and create signed route from Kip St to bike parking. | \$8,000 | School |
| NSH014 | Trail/alley from Kip Dr to Maryal Dr | Popular walking and biking route. | Install improved lighting. | \$62,400 | City |
| NSH015 | Staff parking lot entrance | School staff monitor staff parking lot to prevent parent parking. An automated gate would free up staff time for traffic monitoring. | Install keycard-activated gate for staff parking. | \$1,000 | School |

OASIS CHARTER

Oasis Charter School is a charter school located on the northwestern edge of Salinas. It draws students from throughout the city of Salinas and the surrounding areas. None of its students live within two miles of the school.

PARENT SURVEY

Oasis parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, but no survey responses were received.

The bike lanes on Westridge Parkway end at the city limits

Motorist Conditions

- Oasis is located on Westridge Parkway, a fivelane roadway that channels traffic in and out of the adjacent residential neighborhood and the commercial shopping centers along North Davis Road.
- Oasis is located in a former shopping center, with parking located around the school building.
 Drivers enter the parking lot from the west side of campus, and different drop-off areas are designated for different grade levels.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- At the time of the audit, none of its students lived within two miles of the school, and all students were driven to school.
- There is complete sidewalk on the northern leg of Westridge Parkway between North Davis Road and the school campus. Sidewalk is missing west of the school entrance and on the western portion of Westridge Parkway.
- There is intermittent sidewalk on Brooks Road and Boronda Road south of the school campus.

- There are Class II bike lanes on Westridge Parkway between North Davis Road and the school's east entrance.
- There are Class II bike lanes on North Davis Road.
- There are no bicycle facilities on residential roadways near the school.

The school has developed a well-organized system for drop-off

\approx

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND **OASIS CHARTER SCHOOL**

The following table lists recommendations for Oasis Charter, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|--|--|-----------|------------------------|
| OC001 | Westridge Parkway from city limits to Boronda Rd | Bike lanes end at city limits. | Install Class III bikeway and traffic calming. | \$173,400 | Countya |
| OC003 | Westridge from Davis to City limits | Four-lane roadway with higher traffic speeds. | Consider road diet or Class IIB buffered bike lanes. | \$199,320 | City |
| OC004 | West Alvin Dr | No connection for walking or biking over Hwy 101. | Conduct feasibility analysis for bicycle and pedestrian overcrossing over SR 101 at Alvin Dr. | \$10,000 | City |
| OC002 | School parking lot | Drop-off/pick-up system was working well at the time of the audit. | Continue current drop-off/pick-up system. | N/A | School |

RANCHO SAN JUAN HIGH

Rancho San Juan is located on the northern edge of Salinas and draws students from both the surrounding neighborhoods and Salinas neighborhoods north of East Alvin Drive (see map on the following page).

PARENT SURVEY

Rancho San Juan parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 11 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 45, below.

1/4 mile

5 minutes

Rancho San Juan High School

Motorist Conditions

- Rancho San Juan is located on Rogge Road, a two-lane roadway with no parking on either side. Rogge Road is the northern border of the city of Salinas and is very congested before and after school.
- There are three drop-off areas and a large parking lot on the school campus that is open to staff and visitors. One drop-off loop is designated for buses. Left turns are permitted out of the school parking lot.
- The morning sun creates visibility problems for eastbound traffic at certain times of the year.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There are complete sidewalks on the south side of Rogge Road adjacent to the school. The sidewalk is broken in some locations. There are no sidewalks on the north side of Rogge Road between Gutierrez Middle and Natividad Road.
- There is intermittent sidewalk on San Juan Grade Road between Rogge Road and Russell Road, and a segment of missing sidewalk at the intersection of San Juan Grade and Rogge Road.
- There are curb ramps at some intersections surrounding the school.
- At the time of the audit, school staff members helped to control traffic in the school loop and acted as crossing guards at the crosswalk in the school loop.
- Rancho San Juan High is not served by a MST bus route.

- There are Class II bicycle lanes on Rogge Road between San Juan Grade Road and Gutierrez Middle, but they end east of the middle school campus.
- There are no bicycle facilities on San Juan Grade Road or the residential roadways near the school.

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND RANCHO SAN JUAN HIGH

The following table lists recommendations for Rancho San Juan, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|----------------------------------|--|---|-------------|---------------------------------------|
| RSJH001 | General | Students who live within two miles of school can't take the bus, but many have limited options for walking and biking. | Create carpooling program focused on students who live too far to walk or bike to school. | N/A | School/TAMC/ nonprofit partners |
| RSJH002 | Neighborhood around La Joya | Reports of speeding on neighborhood streets. Traffic from three schools combines. | Conduct neighborhood traffic- calming plan, and consider bike boulevard treatments. Consider Bollenbacher Dr, Jade St, and Penzance St as possible locations for traffic calming. | \$45,000 | County |
| RSJH003 | Rogge Rd at Bollenbacher | Key pedestrian route to school. Reports of speeding and of drivers not yielding to pedestrians in the crosswalk. | Install curb ramps and high- visibility crossings at all three approaches. Consider curb extensions. Curb extensions must be designed to accommodate bus turning radius. Assign crossing guard to this corner. | \$127,000 | County |
| RSJH004 | Rogge Rd | Incomplete bike lanes between San Juan Grade Rd and high school. | Install Class IIB buffered bike lanes or separated two-way bike facility on Rogge Rd between Natividad Rd and San Juan Grade. Include bike lane conflict markings at major and minor intersections. | \$1,480,320 | County |
| RSJH005 | Rogge Rd | Missing and broken sidewalk. | Widen sidewalk, reconstruct buckling sidewalk, and fill sidewalk gaps between San Juan Grade Rd and Rancho San Juan High School. | \$590,000 | County |
| RSJH006 | Rogge Rd | No bicycle facilities on Rogge Rd east of high school | Install Class I shared-use path along south side of Rogge Rd between Natividad Rd and Rancho San Juan High School. | \$560,000 | City |
| RSJH007 | Rogge Rd at San Juan Grade Rd | Key pedestrian route to middle school and Rancho San Juan High. Reports of drivers not stopping or yielding to pedestrians in the crosswalk. | Construct curb extensions with ADA ramps. Consider roundabout or signal warrant analysis. Consider removal of long right-turn-only trap lane on northbound San Juan Grade between Cornwall and Rogge Village Way, and use space to upgrade and widen bike lane to Class IIB buffered or Class IV separated bikeway. | \$335,000 | County |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|---|---|--|-------------|------------------------|
| RSJH008 | Rogge Rd | Reports of speeding. | C onsider traffic-calming measures between San Juan Grade Rd and Rancho San Juan High School, such as lane width reduction. | \$77,880 | County |
| RSJH009 | Russell Rd from North Main St to San Juan Grade Rd | Route to high school and Gavilan View Middle. Sidewalk gaps on both sides of the street. No bicycle facilities present. | Install sidewalk or pedestrian path to ensure continuous sidewalk on one or both sides of the street. Add Class I shared-use path or protected two-way bike facility along Russell Rd (south side has few driveways). | \$1,320,000 | County/city |
| RSJH010 | San Juan Grade Rd | Key pedestrian route to three schools. No sidewalks. | Construct sidewalks along segments where no sidewalk exists between Russell Rd and Rogge Village Way. Consider shared-use path for bicycles. Install traffic calming, including narrowed travel lanes. | \$750,000 | County |
| RSJH011 | San Juan Grade Rd from Boronda Rd to Russell Rd | Key pedestrian route to high school. Missing sidewalk. | Construct sidewalk on both sides of street. | \$910,000 | City |
| RSJH012 | San Juan Grade Rd at Penzance and Cornwall | Pedestrian route to the three schools. Reports of speeding and of drivers not respecting students in the crosswalk. | Construct curb extensions with ADA ramps, and install high-visibility crosswalks across San Juan Rd and on both sides of Penzance and Cornwall. Include rectangular rapid flashing beacon and median pedestrian refuge for San Juan Grade Rd crossing. | \$826,000 | County |
| RSJH013 | School driveways | Conflict point between pedestrians and vehicles. | Install high-visibility crosswalks across school driveways. | \$16,000 | School |
| RSJH014 | Natividad Rd | No bike or pedestrian facilities on Natividad Rd. | When development is constructed, install bike lanes and 8-foot sidewalks on both sides of street, as outlined in West Area Specific Plan. | \$1,200,800 | City |

ROOSEVELT ELEMENTARY

Roosevelt Elementary is located in central Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Roosevelt parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 42 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 46, below.

The bus drop-off location makes it difficult to see families who are crossing Capitol St at Gabilan

Roosevelt Elementary School

Motorist Conditions

- Roosevelt Elementary is located on Capitol Street, a two-lane roadway near downtown Salinas with parking on both sides. Capitol Street is very congested before and after school.
- There is no drop-off loop or parent parking lot on the school campus. There is a parking lot on the south side of campus that is reserved for staff and is access controlled.
- Bus drop-off takes place adjacent to the school campus on Capitol Street.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Capitol Street and Central Avenue near the school.
- There are standard yellow crosswalks on all legs of the intersection of Central Avenue and Capitol Street.
- There is a high-visibility yellow crosswalk with rectangular rapid flashing beacons across West Alisal Street at Capitol Street.
- There are curb ramps in place at intersections around the school.

- There are Class II buffered bicycle lanes on West Alisal Street, south of the school.
- There are no bicycle facilities on Central Avenue, Capitol Street, or other residential roadways near the school.

Curb extensions, street trees, and bike lane or bike boulevard treatments are recommended for Central Ave

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND ROOSEVELT ELEMENTARY

The following table lists recommendations for Roosevelt Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|-------------------------------|---|--|-------------|------------------------|
| RE001 | Capitol St at school frontage | No drop-off loop on campus, limited parking available. | Enforce loading zones at school frontage on Capitol Street, and add loading zone on an adjacent side street like Central Avenue. | \$1,700 | City/school |
| RE002 | Capitol St at Central Ave | Reports of drivers not yielding to pedestrians in the crosswalk. | Install curb extensions and high- visibility crosswalks. | \$216,000 | City |
| RE003 | Central Ave | No bicycle facilities near school. | Conduct feasibility study for bike lanes or bike boulevard. Consider expanding sidewalk adjacent to Central Park to create Class I shared-use path. | \$93,000 | City |
| RE004 | Central Ave | Key pedestrian route to school. | Consider curb extensions at intersections with Homestead Ave, Lorimer St, West St, Riker St, and Capitol St. Extend downtown lighting along Central. Consider curb extensions with pedestrian refuge island at Central/Villa. Install street trees where feasible. | \$1,518,000 | City |
| RE005 | Gabilan St | Pedestrian route to school. | Consider curb extensions and traffic calming on Gabilan Street if requested and supported by neighborhood residents. | \$961,000 | City |
| RE006 | Capitol St at Gabilan St | Pedestrians crossing here, limited visibility due to current bus stop location. | Conduct stop warrant at intersection. If stop is warranted, install marked crosswalk and shift school bus loading zone to the south to increase visibility at the corner. | \$14,700 | City |

Salinas High is located near old town Salinas and draws most students from the surrounding neighborhoods (see map on the following page). Some students live in east Salinas and cross Highway 101 to get to school.

PARENT SURVEY

Salinas High parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 57 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 47, below.

STUDENTS USING ACTIVE **TRANSPORTATION** (BASED ON 57 SURVEY RESPONSES)

An all-way stop warrant evaluation is recommended for the intersection of Riker St at Giel St

Motorist Conditions

- Salinas High is located on South Main Street, a five-lane state highway with no on-street parking. South Main Street is congested before and after school.
- There is a large one-way drop-off lane and parking lot on the school campus. The parking lot on the east side of campus is open to staff and students and the parking lot on the south side, off Geil Street, is reserved for staff only. Left turns are permitted out of the school parking lot.
- At the time of the audit, school staff helped control traffic in the drop-off loop.
- Bus drop-off takes place in the drop-off loop.
- There is a back entrance to campus on Lang Street at Capitol Street, and loading zone signage is in place adjacent to the school.
- As of the writing of this plan, the speed limit in front of the school is 25 miles per hour.

Pedestrian Conditions

- There are complete sidewalks on both sides of South Main Street and other roadways near the school.
- There are yellow crosswalks on all legs of the signalized intersection of South Main Street and the school loop exit (Avenue B).
- There is a high-visibility yellow crosswalk with rectangular rapid flashing beacons across South Main Street and Maple Street to the north of the school driveway exit.
- There is a marked crosswalk across South Main Street at Clay Street.
- There are updated curb ramps at intersections on South Main Street near the school.
- At the time of the audit, there were no crossing guards stationed around the school.

Bicycling Conditions

• There are no bicycle facilities on South Main Street or other roadways near the school.

School staff reported conflicts between students crossing and drivers exiting the school drop-off loop

School Profiles

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND SALINAS HIGH

The following table lists recommendations for Salinas High, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|--|---|-------------|------------------------|
| SH001 | Riker St from Alisal St to Blanco Rd | No bicycle facilities near school. Reports of speeding. | Install traffic calming, such as chicanes and Class III bikeway. | \$2,142,000 | City |
| SH002 | Clay St from Main St to Iverson St | No bicycle facilities near school. | Install traffic calming, such as chicanes or mid-block medians, and install bike boulevard and street trees. | \$1,102,200 | City |
| SH003 | Main St from John St to Geil St | Main St crossings are principal's top concern. Long crossing distances, reports of drivers not yielding to pedestrians. | Install Complete Streets improvements, such as raised median. If Caltrans is unable to construct improvements, consider relinquishing Main St to city of Salinas. Consider speed feedback signs on either side of school. Consider lane width reduction to match downtown section of Main St. | \$94,200 | Caltrans |
| SH004 | Main St at Chestnut St | Reports of drivers not yielding to pedestrians. Conflicts between drivers turning left and pedestrians crossing. Pedestrians have to wait a long time for walk signal. | Adjust signal operations to separate pedestrian and vehicle traffic. Consider protected pedestrian phase, leading pedestrian interval, and no right on red. | \$200,850 | Caltrans |
| SH005 | Main St at Maple St | Reports of drivers not yielding to pedestrians. Pedestrians have to wait a long time for walk signal. | Consider removal of left-turn pocket and installation of pedestrian median island. Conduct analysis for pedestrian hybrid beacon or rectangular rapid flashing beacon in center median. | \$141,320 | Caltrans |
| SH006 | Main St at Winham St/Clay St | Crosswalk does not comply with city policy. | Consider crosswalk removal: This crosswalk is less than 300 ft from John St. Work with community to determine need for left turns from Winham and Clay, and consider right-turn-only. | \$15,040 | Caltrans /city |
| SH007 | Giel St from Main St to Iverson St | No bicycle facilities near school. | Install traffic calming to create bike boulevard with striping and signage. | \$918,000 | City |
| SH008 | Riker St at Lang St | Key pedestrian route to school. | Install curb extensions, and update existing crosswalks to high-visibility. Evaluate for additional pedestrian facilities per city policy. | \$226,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|--|-------------|------------------------|
| SH009 | Riker St at Giel St | Key pedestrian route to high school and Washington Middle School. Drivers were confused and were stopping even though there was no stop sign. | Conduct an all-way stop warrant evaluation. Install curb extensions and update crosswalks to high-visibility. Evaluate for additional pedestrian facilities per city policy. | \$231,000 | City |
| SH010 | Riker St at W Acacia St | Pedestrian route to school. | Install curb extensions, yellow high-visibility crosswalks, and school crossing signage assembly A. | \$219,400 | City |
| SH011 | Chestnut St from Clay St to California St | No bicycle facilities near school. | Install traffic calming to create bike boulevard with striping and signage. Connect to future Class IV bikeway on Pajaro St. | \$550,800 | City |
| SH012 | Lincoln Ave from Alisal St to Avenue A | No bicycle facilities near school. | Install Class IIB buffered bike lanes. | \$236,070 | City |
| SH013 | Salinas St from Alisal St to Clay St | No bicycle facilities near school. | Install Class III bikeway. | \$14,700 | City |
| SH014 | Lincoln Ave at Clay St | Offset intersection. Key pedestrian route to school. | Consider removing slip lane and reconstructing intersection. Install high-visibility crosswalk and construct curb extensions. | \$466,000 | City |
| SH015 | Acacia St from Main St to Alisal St | No bicycle facilities near school. | Consider bike boulevard. | \$1,978,800 | City |
| SH016 | Clay St at Church St | Pedestrian route to school. | Upgrade to high-visibility crosswalk and install curb extension across Church St. | \$108,000 | City |
| SH017 | Pajaro St from Market St to Romie Ln | No bicycle facilities near school. | Install Class IV bikeway. | \$6,522,660 | City |
| SH018 | Clay St at Cayuga St | Pedestrian route to school. | Construct curb extensions to narrow crossing distance on Cayuga St, and install high-visibility crosswalk across Cayuga. | \$218,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--------------------------|---|--|-----------|------------------------|
| SH019 | Clay St at Capitol St | Pedestrian route to school. | Consider pedestrian facility, per city policy. Construct curb extensions to narrow crossing distance on Capitol St, and install high-visibility crosswalk across Capitol. | \$218,000 | City |
| SH020 | Clay St at Riker St | Pedestrian route to school. | Install curb extensions and yellow high-visibility crosswalks on all legs of the intersection, and school crossing signage assembly A. Coordinate any changes with Salinas Fire Department. | \$219,400 | City |
| SH021 | Clay St at West St | Pedestrian route to school. | Install curb extensions and yellow high-visibility crosswalk across West. | \$104,000 | City |
| SH022 | Cayuga St | Traffic congestion at current drop-off locations. | Add access to school campus. | \$8,500 | School |
| SH023 | Geil St at Capitol St | Pedestrian route to school. | Install curb extensions and yellow high-visibility crosswalk across Capitol. | \$104,000 | City |

SANTA RITA ELEMENTARY

Santa Rita Elementary is located in north Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Santa Rita Elementary parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September 2020, and 5 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 48, below.

Figure 48. Parents' top concerns about letting children walk or bike to and from school.

There are several back entrances to Santa Rita that could be opened to reduce traffic in front of the school

Santa Rita Elementary School

Transportation Agency for Monterey County

Motorist Conditions

- Santa Rita Elementary is located on Santa Rita Street, a two-lane residential roadway with parking on both sides. Santa Rita Street is very congested before and after school.
- There is a drop-off area and parking lot on the school campus. The parking lot is shared between staff and visitors. Left turns are permitted out of the school parking lot.
- The morning sun creates visibility problems for eastbound traffic on E Bolivar Street at certain times of the year.
- Special education bus drop-off takes place on the small bus loop on the north side of the school campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Santa Rita Street and other roadways near the school.
 There is broken sidewalk on Jackson Street on the backside of campus.
- There is a high-visibility crosswalk on Santa Rita Street at Lamar Street, south of the school driveway entrance.
- There is a marked yellow crosswalk on East Bolivar Street at Santa Rita Street.
- There are curb ramps at the intersections of Santa Rita Street at Bolivar Street and Lamar Street. There are no curb ramps at other intersections surrounding the school.
- There are several pedestrian entrances to the school campus from Swaner Avenue, Jackson Street, and East Bolivar Street that were closed at the time of the school audit.

- There are no bicycle facilities on Santa Rita Street or other roadways near the school.
- The nearest bicycle facility is Class II bike lanes on Boronda Road.

Pedestrian improvements are recommended for the intersection of Bolivar St and N Main St

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND SANTA RITA ELEMENTARY

The following table lists recommendations for Santa Rita Elementary, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|----------------------------------|---|--|-------------|------------------------|
| SRE001 | E Bolivar St at Santa Rita St | Key pedestrian route to school. Visibility issues for drivers approaching the intersection, reports of speeding. | Update curb ramps, update existing crosswalk to high-visibility, and add high-visibility crossing on Santa Rita. Consider curb extensions at this corner for visibility. Conduct all-way stop warrant analysis. | \$139,000 | City |
| SRE002 | E Bolivar St | No bicycle facilities near school. | Consider bike boulevard with traffic calming between Main St and Van Buren Ave. Consider street trees. Consider sidewalk widening on south side to install Class I shared-use path. | \$1,099,800 | City |
| SRE003 | E Bolivar St | Key pedestrian route to school. | Construct curb ramps or curb extensions along Bolivar for sidewalk connectivity. | \$969,000 | City |
| SRE004 | E Bolivar St at Roundtree Dr | Potential to reduce traffic on Santa Rita St by opening additional school entrances. Large student population in neighborhood off Roundtree Ln. | Construct curb extensions, and consider pedestrian facility, per city policy, across Bolivar St at Roundtree Dr to connect to pedestrian path/bridge that accesses the back of campus. Open gate to campus during morning and afternoon arrival and departure times. | \$110,000 | City/school |
| SRE005 | E Bolivar St at Perez St | Reports of speeding. | Install traffic circle. | \$195,000 | City |
| SRE006 | E Bolivar St at Van Buren Ave | Key pedestrian route to Santa Rita and Gavilan View Middle. | Construct curb extensions, curb ramps, and high-visibility crossings at all three approaches. | \$158,000 | City |
| SRE007 | Swaner Ave at Pierce St | Potential to reduce traffic on Santa Rita St by opening additional school entrances. | Construct curb ramps and raised crossings on Swaner Ave at Pierce St, to connect to pedestrian path that accesses the back of campus. Open gate to campus during morning and afternoon arrival and departure times. | \$171,000 | City/school |
| SRE008 | Jackson St | Potential to reduce traffic on Santa Rita St by opening additional school entrances. Broken sidewalk. | Open gate to campus during morning and afternoon arrival and departure times. Reconstruct sidewalk where buckling. | \$133,500 | City/school |
| SRE009 | Santa Rita St at E Lamar St | Key pedestrian route to school. | Construct curb extensions with updated curb ramps, and stripe high-visibility crossing onto Lamar St at this corner. | \$130,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|-------------------------------------|--|---|-------------|------------------------|
| SRE010 | North Main St at E Lamar St | Uncontrolled crossing. Roadway has higher traffic volumes and speeds. | Remove or upgrade crosswalk. Direct pedestrians to Bolivar St crossing. | \$2,170 | City |
| SRE011 | E Bolivar St at N Main St | Pedestrian route to school. Longer crossing distances. | Upgrade pedestrian heads to include leading pedestrian interval and countdown signal heads. | \$200,140 | City |
| SRE012 | Drainage parallel to Sucre Court | Opportunity to provide shared-use path. Could provide partial route to Rancho San Juan High. | Consider shared-use path between North Main and Santa Rita, potentially extending to Russell Rd. | \$130,000 | City |
| SRE013 | Santa Rita St | No bicycle facilities near school. | Consider bike boulevard with traffic calming between Bolivar St and Swaner Ave. Consider speed cushions, curb extensions, and street trees. | \$666,400 | City |
| SRE014 | Swaner Ave at Jackson St | Pedestrian route to school. | Construct curb extensions, curb ramps, and high visibility crossings on Jackson St/Jackson Circle. Replace faded street sign. Repave or resurface cracked pavement. | \$310,550 | City |
| SRE015 | Swaner Ave | No bicycle facilities near school. | Consider bike boulevard with traffic calming and speed cushions between Santa Rita and Van Buren. Update ADA ramps at all intersections. | \$1,042,600 | City |

SHERWOOD ELEMENTARY

Sherwood is located in east Salinas and draws most of its students from the surrounding neighborhoods (see map on the following page).

PARENT SURVEY

Sherwood parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September of 2020, and 171 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 49, below.

Figure 49. Parents' top concerns about letting children walk or bike to and from school.

Sherwood Elementary School

CURRENT INFRASTRUCTURE CONDITIONS

Motorist Conditions

- Sherwood Elementary is located on South Wood Street, a two-lane residential roadway with parking on both sides. South Wood Street connects to freeway on- and off-ramps, and freeway traffic combined with school traffic lead to very congested conditions before and after school.
- There are three parking lots on the school campus. The small lot on the northwest side and the larger lot on the southeast side are reserved for staff. Some school drop-off takes place in the larger lot on the southwest side, which is open to parents and visitors. Left turns are permitted out of the school parking lot.
- Bus drop-off for special-needs students takes place in the parent parking lot.
- The school is working on plans for a drop-off loop on the school campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of South Wood Street and other roadways near the school.
- There is a high-visibility yellow crosswalk across South Wood Street at Santa Maria Street, to the north of the school driveway exit.
- There are yellow high-visibility crosswalks on three legs of the intersection of South Wood Street and East Alisal Street, which were installed during the temporary demonstration project on East Alisal Street.
- There are yellow crosswalks on two legs of the intersection of South Wood Street and John Street.
- There are curb ramps in place at intersections on South Wood Street and East Alisal Street.
 There are no curb ramps at intersections on John Street.
- There are back entrances to campus from South Pearl Street and Hebbron Avenue, which were not open at the time of the school audit.

Bicycling Conditions

- There are no bicycle facilities on South Wood Street or East Alisal Street.
- The nearest bicycle facility is Class II bicycle lanes on John Street.

The intersection of S Wood St and John St is a key pedestrian route to school and a freeway on-ramp

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND SHERWOOD ELEMENTARY

The following table lists recommendations for Sherwood, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE RECOMMENDATION | | COST EST. | IMPLEMENTING AGENCY |
|------------------|---|---|--|-------------|------------------------|
| SE001 | School frontage | Traffic congestion on S Wood St and in school parking lot before and after school. | Develop drop-off loop in accordance with existing plans. Consider a rolling drop-off program more efficient drop-off and pick-up in the loop. | N/A | School |
| SE002 | S Wood St from E Alisal St to John St | | \$846,400 | City | |
| SE003 | S Wood St at John St | Key pedestrian route to school and location of freeway on-ramp. Reports of drivers not yielding to pedestrians. | Upgrade crosswalks to high visibility and install ADA curb ramp at northwest corner. Install school assembly signage and advance stop bars ahead of crosswalks. Consider roundabout or consider removing painted pork chop islands and installing curb extensions to shorten crossing distances. | \$209,850 | City/ Caltrans |
| SE004 | S Wood St near John St | Reports of speeding. | Move speed limit sign to more visible location. | \$850 | City |
| SE005 | Williams Rd at Freedom Parkway | Large numbers of vehicles and pedestrians at intersection. Reports of drivers not respecting pedestrians. | Conduct intersection control evaluation analysis to study installation of roundabout. Upgrade to yellow high-visibility crosswalks. | \$60,000 | City |
| SE006 | S Wood St at Santa Maria St | Reports of speeding and drivers not yielding to pedestrians in the crosswalk. | Install planned rectangular rapid flashing beacon and yellow high-visibility crosswalk. Consider continuous sidewalk. | \$48,500 | City |
| SE007 | S Wood St at San Benito St Key pedestrian route to school. Consider continuous sidewalk across San Benito | | | \$4,500 | City |
| SE008 | Smith St from E Alisal St to James St Pedestrian route to school. Conduct stop warrant evaluation at all intersections. | | Conduct stop warrant evaluations at all intersections. | \$5,000 | City |
| SE009 & SE010 | S Hebbron Ave | Traffic congestion on S Wood St and in school parking lot before and after school. | Open back entrance to school at Hebbron or Pearl St or both. Install curb extensions and ramps along Hebbron. | \$1,203,500 | School/city |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|--|-------------|------------------------|
| SE012 | John St | Key pedestrian route to school, traffic congestion. | Install curb extensions and ramps along John St. | \$3,102,000 | City |
| SE013 | E Alisal St from Kern St to Skyway Blvd | Key pedestrian route to school. Reports of speeding and drivers not yielding to pedestrians in the crosswalk. | Consider protected pedestrian phases at Alisal/Woods, Alisal/Madeira, and Alisal/Hebbron. Install high-visibility crosswalks and protected bike lanes as outlined in Alisal Vibrancy Plan. | \$1,480,680 | City |

UNIVERSITY PARK ELEMENTARY

University Park is located in southwest Salinas and draws students from the surrounding neighborhoods and the area near the Rossi Rico Parkway (see map on the following page).

PARENT SURVEY

University Park parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in September of 2020, and 15 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 50, below.

Figure 50. Parents' top concerns about letting children walk or bike to and from school.

Opening the school entrance at Palma Dr is recommended to reduce traffic in front of the school

University Park Elementary School

CURRENT INFRASTRUCTURE CONDITIONS

Motorist Conditions

- University Park Elementary is located on West Acacia Street, a two-lane residential roadway with parking on both sides. West Acacia Street is very congested before and after school.
- There is a drop-off area and small parking lot in the front of the school campus. There is also a parking lot on the south side of campus that is reserved for staff. Left turns are permitted out of the school parking lot.
- Bus drop-off takes place on Acacia Street to the west of the drop-off loop.
- The morning sun creates visibility problems for eastbound traffic at certain times of the year.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of West Acacia Street and other roadways near the school.
- There is a high-visibility yellow crosswalk across University Avenue at Palma Drive on the south side of the school. There is an alternate entrance to campus at this location which was closed at the time of the audit.
- There are marked crosswalks on three legs of the intersection of West Acacia Street and University Avenue. One leg of the intersection has highvisibility striping. There was a crossing guard at this intersection before and after school at the time of the audit.
- There are missing curb ramps at many intersections surrounding the school.

Bicycling Conditions

- There are no bicycle facilities on West Acacia Street or other residential roadways near the school.
- The nearest bicycle facilities are Class II bicycle lanes on South Davis Road and buffered bicycle lanes on West Alisal Street.

Curb extensions are recommended at the intersection of University Ave and W Acacia St

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND UNIVERSITY PARK ELEMENTARY

The following table lists recommendations for University Park, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--------|---|--|---|-------------|------------------------|
| UPE001 | School frontage | Students crossing without marked crosswalk. Congestion in school drop-off loop. | Consider pedestrian facility, per city policy, across West Acacia St near location of sidewalk and access route into campus. Propose dropoff along school side of W Acacia. Construct pedestrian access path or sidewalk across lawn and parking lot. | \$32,920 | City/school |
| UPE002 | W Acacia St at University Ave | Key pedestrian route to school. Reports of speeding. | Refresh crosswalks with high- visibility striping, construct curb extensions and ramps. | \$251,000 | City |
| UPE003 | University Ave at Ambrose Dr | Pedestrian route to school. | Evaluate for all-way stop. Install curb extensions. | \$105,000 | City |
| UPE004 | University Ave at Palma Dr | Congestion on W Acacia St and in school loop. Key pedestrian route to school. | Open gate to campus at this location. Provide crossing guard before and after school. Upgrade crosswalks and construct curb extensions and ramps. Consider rectangular rapid flashing beacon. | \$178,500 | City/school |
| UPE005 | University Ave at Central Ave | Reports of speeding on University Ave | Conduct feasibility study for neighborhood traffic circle. | \$195,000 | City |
| UPE006 | University Ave from Ambrose Dr to Archer St | Reports of speeding on University Ave. No bicycle facilities near school. | Consider bike boulevards and curb extensions at all intersections. | \$2,766,800 | City |
| UPE007 | Ambrose Dr from Carmelita Dr to University Ave | No bicycle facilities near school. | Consider bike boulevards and curb extensions at intersections. | \$524,400 | City |
| UPE008 | Columbia Ave from W Acacia St to Hastings Ave | Pedestrian route to school. | Install curb extensions at all intersections. | \$500,000 | City |
| UPE009 | Palma at Carmelita Dr San Simeon Dr | Pedestrian route to school. | Install curb extensions at intersections of Carmelita Drive and San Simeon Dr. | \$400,000 | City |
| UPE010 | W Acacia from Davis Rd to S Main St | Reports of speeding on Acacia St. No bicycle facilities near school. | Consider bike boulevard and curb extensions at Camden Way. | \$3,117,200 | City |
| UPE011 | Central Ave | No bicycle facilities near school. | Conduct feasibility study for bike lanes or bike boulevard. Consider expanding sidewalk adjacent to Central Park to create Class I shared-use path. | \$93,000 | City |

VIRGINIA ROCCA BARTON ELEMENTARY

Barton Elementary is located in east Salinas and draws most of its students from the surrounding neighborhoods south of the school (see map on the following page).

PARENT SURVEY

Barton elementary parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 36 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 51, below.

Figure 51. Parents' top concerns about letting children walk or bike to and from school.

The Creek Trail near the school is used by families, but parents expressed concerns about maintenance and lack of lighting

Virginia Rocca Barton School

CURRENT INFRASTRUCTURE CONDITIONS

Motorist Conditions

- Barton Elementary is located on Las Casitas Drive, a residential two-lane roadway that connects east Salinas and north Salinas.
- There is a school drop-off loop that is heavily congested before school. A median separates the drop-off lane from the school parking lot.
- There is another parking lot on the south side of campus that is designated for staff parking only.
- Left turns out of the school drop-off loop are allowed.
- Buses drop off on Las Casitas Drive just north of the school driveway.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There is continuous sidewalk on both sides of Las Casitas Drive between Constitution Boulevard and Rider Avenue.
- There is a standard yellow crosswalk across Las Casitas Drive at the driveway entrance of school. The school has had crossing guards at this crosswalk in the past, but it has been difficult to maintain them due to safety issues and abuse from frustrated parents.
- There is a bicycle and pedestrian pathway adjacent to the school campus that extends from Freedom Parkway at the north end and East Laurel Drive on the south end. The path is connected to the school via a short segment of Las Casitas Drive.
- Pedestrians were observed walking to and from school along Ranchero Drive after dismissal.
 Sidewalks were frequently blocked by cars parked in driveways.

Bicycling Conditions

- There are Class II bike lanes on Las Casitas
 Drive between Constitution Boulevard and the
 school driveway, and buffered bicycle lanes on
 Constitution Boulevard.
- There are no bicycle facilities on other residential roadways near the school.

A raised crosswalk is recommended across Las Casitas Dr in front of the school to slow traffic and connect trail segments

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND BARTON ELEMENTARY

The following table lists recommendations for Barton, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|--|---|---|-------------|------------------------|
| VRBE001 | Creek Trail from Freedom Parkway to Garner Ave | Current trail has broken pavement, no lighting, and no barriers between path and creek. Parents have concerns about safety of path. | Improve Creek Trail to a shared- use path with pedestrian-scale lighting. | \$1,260,000 | City |
| VRBE002 | Las Casitas Dr at school entrance | Heavy traffic congestion at intersection before and after school. Reports of speeding at other times of day. | Install raised crosswalk on Las Casitas to improve Creek Trail crossing to school. Include bike trail signage to remind cyclists to disembark and walk their bicycles across intersection. | \$146,700 | City |
| VRBE003 | Creek Trail entrance at Ranchero Dr | Steep informal connection between path and neighborhood. | Improve Creek Trail access with stairs or graded switchback. Include pedestrian lighting. | \$1,478,400 | City |
| VRBE004 | Las Casitas Dr from Constitution Blvd to school entrance | Heavy traffic congestion before and after school. Reports of speeding at other times of day. | Upgrade bike lane to Class IIB buffered bike lane. | \$170,280 | City |
| VRBE005 | Las Casitas Dr from Constitution Blvd to school entrance | Drivers queueing in bike lane to enter school campus. | Install bike lane treatments in conflict zones. | \$4,500 | City |
| VRBE006 | Las Casitas Dr at school entrance | Heavy traffic congestion at intersection before and after school. Reports of speeding at other times of day. | Upgrade to high-visibility crosswalk yellow on all legs of the intersection. | \$8,000 | City |
| VRBE007 | Las Casitas Dr from south of school entrance to Creek Trail | Connection between Creek Trail and school is too narrow to be shared by people walking and biking. | Narrow travel lanes to construct wider sidewalk. | \$18,200 | City |
| VRBE008 | School parking lot at teacher parking lot entry | Potential conflicts between people walking and teachers entering staff parking lot | Install raised crosswalk to help delineate pedestrian travel and discourage parents from entering staff lot. | \$145,000 | School |
| VRBE009 | School parking lot | Heavy traffic congestion in school parking lot. | Modify design to limit to circular pattern. Remove arrows pointing to the northern parking lot and the small lane between angled parking to reduce conflicts. Vehicles should stay in line even after dropping off students; consider flexible posts to create drop-off lane. | \$6,000 | School |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|---------|---|---|--|-------------|---------------------------------------|
| VRBE010 | Off-site parking lot for Natividad Creek Park at Las Casitas Dr | Heavy traffic congestion in school parking lot. | Develop park-and-walk or park- and-ride program to encourage parent drop-off in parking lot. Use Creek Trail for trips between parking lot and school. | N/A | School/TAMC/ nonprofit partners |
| VRBE011 | Las Casitas Dr at Constitution Blvd | Pedestrian route to school and connection between Creek Trail and neighborhood. | Upgrade to high-visibility crosswalk yellow across Las Casitas Dr. | \$5,000 | City |
| VRBE012 | Las Casitas Dr at Ranchero Dr | Key pedestrian route to school. | Consider raised crosswalk, and upgrade to high visibility yellow crosswalk across Ranchero Dr. | \$149,000 | City |
| VRBE013 | Las Casitas Dr at Pino Way | Key pedestrian route to school. | Consider raised crosswalk, and upgrade to high-visibility yellow crosswalk across Pino Way. | \$149,000 | City |
| VRBE014 | Las Casitas Dr at Nogal Dr | Key pedestrian route to school. | Consider raised crosswalk, and upgrade to high-visibility yellow crosswalk across Nogal Dr. | \$149,000 | City |
| VRBE015 | Las Casitas Dr at Alamo Way | Key pedestrian route to school. | Consider raised crosswalk, and upgrade to high-visibility yellow crosswalk across Alamo Way. | \$149,000 | City |
| VRBE016 | Las Casitas Dr at Rider Ave | Pedestrian route to Barton and Frank Paul Elementary Schools. | Install high-visibility yellow crosswalk and construct curb extensions across Las Casitas Dr. | \$104,000 | City |
| VRBE017 | Las Casitas Dr from Constitution Blvd to Rider Ave | Reports of speeding and low visibility at intersections. | Install traffic calming. Perform intersection sight distance analysis, and consider installation of red curb at intersections. | \$520,600 | City |
| VRBE018 | Rider Ave at Del Monte Ave | Upgrade to high-visibility | | \$108,000 | City |
| VRBE019 | Del Monte Ave at Pacific Ave Pacific Ave Pedestrian route to Barton and Frank Paul elementary schools. Upgrade to high-visibility white crosswalk, and install curb ramps. | | \$68,000 | City | |
| VRBE020 | Del Monte Ave from Rider Ave to Williams Rd | Key route to Barton and Frank Paul elementary schools and La Paz Middle. No bicycle facilities. | Install traffic calming (chicanes, removal of parking at those locations), sharrow markings, and bike route signage. | \$1,815,600 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|--|---|---|---|-------------|------------------------|
| VRBE021 | Constitution Blvd from Freedom Parkway to Manchester Cir | Four-lane roadway with higher traffic volumes and speeds. | Upgrade bike lane to Class IV separated bikeway. | \$3,885,840 | City |
| VRBE022 | Atlantic St at Del Monte Ave | Pedestrian route to school. | Install curb extension, and upgrade to high-visibility crosswalk on Atlantic St. | \$104,000 | City |
| VRBE023 | Atlantic St at Cari Court | Pedestrian route to school. | Install curb extension, and upgrade to high-visibility crosswalk on Cari Court. | \$104,000 | City |
| VRBE024 | Nogal Drive at Caoba Way | Pedestrian route to school. | Install curb extension, and upgrade to high-visibility crosswalk on Caoba Way. | \$104,000 | City |
| VRBE025 | Nogal Drive at Nogal Circle | Pedestrian route to school. | Install curb extension, and upgrade to high-visibility crosswalk on Nogal Circle. | \$104,000 | City |
| VRBE026 | Nogal Drive at Amarillo Way | Pedestrian route to school. | Install curb extension, and upgrade to high-visibility crosswalk on Amarillo Way. | \$104,000 | City |
| Ranchero Dr from VRBE027 Las Casitas Dr to La Honda Ct | | Reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$244,800 | City |
| VRBE028 | Las Casitas Dr at School Entrance | Heavy traffic congestion at intersection before and after school. | Consider location for crossing guard. | N/A | School |

WASHINGTON MIDDLE

Washington Middle is located in south Salinas and draws students from the southwest corner of the city, east Salinas, and rural areas outside of city limits (see map on the following page).

PARENT SURVEY

Washington parents were asked to complete a bilingual survey about their attitudes toward walking and biking to school in March 2021, and 55 surveys were received. The full survey report is in Appendix B.

The survey asked parents to select the most important factors in whether they allow their children to walk or bike to school. The top issues for parents are listed in Figure 52, below.

Figure 52. Parents' top concerns about letting children walk or bike to and from school.

A traffic circle or curb extensions are recommended for the intersection of Homestead Ave, Clay St, and Iverson St

CURRENT INFRASTRUCTURE CONDITIONS

Motorist Conditions

- Washington is located on Iverson St, a residential roadway with parking on both sides.
 Most of Iverson Street is two lanes, but there is also a center turn lane between Clay Street and Geil Street in front of the school. Iverson St is very congested before and after school.
- There is no drop-off area on campus. There are two parking lots, both of which are reserved for staff parking. Parent drop-off takes place on lyerson Street.
- Bus drop-off takes place on Iverson Street south of Geil Street, adjacent to the school campus.
- The area in front of this school is designated as a reduced school speed limit zone, established to reduce speed limits in school zones. These zones are typically 100 to 500 ft from the school boundary and have either 15-mph or 25-mph speed limits.

Pedestrian Conditions

- There are sidewalks on both sides of Iverson Street and other streets near the school.
- There are high-visibility yellow crosswalks on Iverson Street at Lang Street and Geil Street. At the time of the audit, there were no crossing guards in place.
- There are yellow crosswalks on three legs of the intersection of Iverson Street and Acacia Street.
- There are yellow crosswalks on two legs of the intersection of Iverson Street, Homestead Avenue, and Clay Street.
- There are curb ramps at many intersections surrounding the school, though most do not meet current ADA standards.
- There is a back entrance to campus from College Drive that was closed at the time of the audit.
- Washington Middle is not served by a MST bus route.

Bicycling Conditions

- There are no bicycle facilities on Iverson Street or other residential roadways near the school.
- The nearest bicycle facilities are Class IIB buffered bicycle lanes on West Alisal Street.

The center turn lane on Iverson St is recommended to be repurposed for a drop-off lane in front of the school

RECOMMENDED INFRASTRUCTURE IMPROVEMENTS AROUND WASHINGTON MIDDLE

The following table lists recommendations for Washington Middle, and the map below shows their locations in relation to the school.

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|--|--|--|-----------|------------------------|
| WM001 | Iverson St at Lang St | Key pedestrian crossing to school. Parents parked in red zones make it difficult to see students crossing. | Install rectangular rapid flashing beacon, curb extensions, yellow high-visibility crosswalks, and school crossing signage assembly A. | \$150,550 | City |
| WM002 | Iverson St at Geil | Heavy traffic congestion and reports of speeding on Iverson St in front of school | Remove marked crosswalk to encourage crossing at Lang St. | \$4,000 | City |
| WM003 | Reliminate center turn lane to create drop-off lane. Widen sidewalk on school side to create Class I shared-use path with landscaping separating students who are biking and walking | | \$912,400 | City | |
| WM004 | Iverson St at W Acacia St | Key pedestrian route to Washington Middle and Mission Park Elementary. | Square intersection, remove slip lane, install high-visibility crosswalk markings, and construct curb extensions to shorten crossing distance. Consider neighborhood traffic circle to manage speed. | \$657,000 | City |
| WM005 | College Dr | Heavy traffic congestion on Iverson St in front of school. | Reopen back gate to allow student entry and disperse traffic at the front of the school. | \$8,500 | School |
| WM006 | College Dr at Marion Ave | Possible future pedestrian route to school. | Install high-visibility yellow crosswalks, and construct curb extensions and ramps. | \$268,000 | City |
| WM007 | College Dr from Alisal St to back entrance to school | Possible future pedestrian and bike route to school. | Install traffic calming and speed humps, or consider bike boulevard. | \$550,800 | City |
| WM008 | College Dr at Bruce Ave | Pedestrian route to Washington Middle and Mission Park Elementary. | Install high-visibility crosswalk and curb extensions across Bruce Ave. | \$208,000 | City |
| WM009 | College Dr at San Vincente Ave | Pedestrian route to Washington Middle and Mission Park Elementary. | Install high-visibility crosswalk and curb extensions across San Vincente Ave. | \$208,000 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|--|---|-------------|------------------------|
| WM010 | College Dr at Amherst Dr | Pedestrian route to Washington Middle and Mission Park Elementary. | Install high-visibility crosswalk and curb extensions across Amherst Dr. | \$104,000 | City |
| WM011 | Acacia St from Main St to Alisal St | Reports of speeding. No bicycle facilities. | Install traffic calming and bike boulevard. | \$2,917,200 | City |
| WM012 | Homestead Ave at Lorimer St | Pedestrian route to school. Long crossing distance. | Install high-visibility crosswalk on Lorimer St and curb extensions to square intersection. | \$104,000 | City |
| WM013 | Homestead Ave at Talbot St | Pedestrian route to school. | Install high-visibility crosswalk on Talbot St. | \$4,000 | City |
| WM014 | Marion Ave from Acacia St to Homestead Ave | Reports of speeding. | Install traffic calming if requested and supported by neighborhood residents. | \$346,800 | City |
| WM015 | Acacia St at Junipero Way | Pedestrian route to Washington Middle and Mission Park Elementary. | Install raised high-visibility crosswalk on Junipero Way. | \$149,000 | City |
| WM016 | Acacia St at Capistrano Dr | Pedestrian route to Washington Middle and Mission Park Elementary. | Install raised high-visibility crosswalk on Capistrano Dr. | \$149,000 | City |
| WM017 | Acacia St at Crespi Way | Pedestrian route to Washington Middle and Mission Park Elementary. | Install raised high-visibility crosswalk on Crespi Way. | \$149,000 | City |
| WM018 | Homestead Ave at Marion Ave | Pedestrian route to school. | Install high-visibility crosswalk on Marion. | \$4,000 | City |
| WM019 | Staff parking lot entrance on Iverson St | lot entrance on walking and staff driveway. Consider striping and | | \$5,000 | City |
| WM020 | Parking lot entrance (driveway to the back lot) Limited visibility for drivers exiting staff parking lot. Trim hedge to increase visibility, and add striping and signage about pedestrians crossing. | | \$9,500 | City | |
| WM021 | Homestead Ave from Clay St to Wilson St | No bicycle facilities near school. | Install bicycle boulevard signage and striping. | \$1,407,600 | City |

| NO. | STREET | ISSUE | RECOMMENDATION | COST EST. | IMPLEMENTING AGENCY |
|-------|---|---|---|-----------|------------------------|
| WM022 | Homestead Ave at Clay St and Iverson St | Key pedestrian route to Washington Middle and Salinas High. High traffic volumes before and after school. | Consider installing a traffic circle with high-visibility crosswalks and school crossing signage assembly A. If not a traffic circle, install curb extensions, yellow high-visibility crosswalks, and school crossing signage assembly. | \$305,550 | City |
| WM023 | Roosevelt St | Bus stop for Washington Evaluate for possible time-of-day loading zone on Roosevelt Street | | \$13 | City |
| WM024 | Blanco Rd | Some students cross Blanco Road to walk to school. | Evaluate possible bicycle and pedestrian improvements on East and West Blanco Road. | \$250 | City |

CHAPTER 6 IMPLEMENTATION AND AND MAINTENANGE

IMPLEMENTATION AND REPORTING

The projects included in this plan will be implemented over time, as funding becomes available. With limited funding, the City of Salinas must decide how to prioritize the recommendations.

Some projects that are low cost and have community support can be incorporated into the City's maintenance programs and installed using its appropriated maintenance funds. For larger projects, leveraging local funds with additional grant funding will be critical. There are also projects that require either private property acquisition or coordination with Caltrans. Though these are high-cost projects that will take many years to fund, design, and construct, they are included in this plan as part of a long-term vision for the future of transportation in Salinas.

The City of Salinas has the opportunity to make bicycle and pedestrian improvements as part of ongoing road maintenance. The City is required to upgrade curb ramps to Americans with Disabilities Act standards during major road resurfacing projects. Many resurfacing projects provide a chance to restripe roadways and install improvements such as high-visibility crosswalks, Class IIB buffered bike lanes, green bike lane treatments, and Class IV separated bikeways for a relatively low additional cost. Traffic signal maintenance and upgrades also provide opportunities to install countdown pedestrian signal heads, leading pedestrian interval signal phasing, and video detection for cyclists. City staff will review the Safe Routes to Schools Plan project list when planning maintenance projects to look for ways to incorporate bike and pedestrian improvements. This allows for a highly cost-effective strategy for implementing the projects included in this plan.

The City already incorporates safety improvements into its maintenance projects as part of the Vision Zero Integrated into Maintenance Program (VZIM). VZIM is one of the most cost-effective ways the city can invest in traffic safety. Vision Zero is a multidisciplinary approach to eliminating severe and fatal collisions, and there is a substantial opportunity to make incremental safety improvements through the City's pavement maintenance program. Maintenance projects are less expensive than projects that are identified in the City's Capital Improvement Program (CIP). CIP projects often involve reconstructing roads, moving flow lines, upgrading drainage systems, rebuilding sidewalks, relocating utilities, and planting trees, all of which are very expensive. Resurfacing, restoration, and rehabilitation projects are typically regularly planned maintenance projects initiated on the basis of current or anticipated pavement

conditions. Maintenance funds are already programmed, and making striping changes would add only a nominal cost for the City. Because of this low additional cost, VZIM is one of the most cost-effective approaches to improving traffic safety.

Installing bicycle and pedestrian improvements as part of regularly scheduled maintenance is part of the quick-build approach to providing bicycle and pedestrian facilities. The concept of quick-build is meant to allow local jurisdictions to construct facilities faster using low-cost materials. Materials such as paint, planters, and plastic posts are less expensive initially than projects that require new pavement or changes to curb alignments, but they have more substantial ongoing maintenance costs. Quick-build is best suited to temporary trial projects that can be adjusted based to the success of the design and community feedback. More information on the quick-build approach can be found in the Quick-Build Guide developed by the California Bicycle Coalition and Alta Planning + Design.¹

Projects from this plan can also be installed as future development occurs in Salinas. This Safe Routes to Schools Plan provides a list of projects that can be used to mitigate land-use development impacts by reducing vehicle miles traveled. In 2013, California lawmakers approved Senate Bill 743, which considers vehicle miles traveled as a metric to determine impacts in transportation analysis under the California Environmental Quality Act (CEQA). Jurisdictions are no longer required to use traffic congestion or level of service as a metric, though they can still enforce them through consistency with the agency's General Plan. In addition, the traditional level-of-service metric may still be relevant to CEQA, as it relates to impacts on

public services, including emergency response and transit. The state released guidelines in 2018 that recommended the use of vehicle miles traveled as the key metric for analyzing transportation impacts. The Safe Routes to Schools Plan is a resource that the city and developers can use for project ideas to improve biking and walking facilities and reduce vehicle miles traveled.

This chapter includes a list of high-priority projects based on criteria that are aligned with the vision and goals of this plan. Individual projects will be prioritized for funding through the Monterey County Regional Transportation Plan and the City's Capital Improvement Program (CIP). Reporting on project funding, design, and construction will occur through an update to the city council and the public during the annual CIP update process.

For projects within Caltrans's right of way, all improvements must be consistent with Highway Access Management Plans. Caltrans's maintenance agreements are required prior to new construction. The city and Caltrans may also consider relinquishment of state highway routes 68 and 183 within city limits to allow for local control and to streamline implementation of complete streets improvements.

CROSSWALK, TRAFFIC-CALMING. AND CURB-MARK RECOMMENDATI

The City of Salinas has several policies and programs that govern the installation of crosswalks, traffic calming, and curb markings near schools.

All traffic-calming recommendations in this plan are subject to the Neighborhood Traffic Management Program, which addresses concerns about traffic speeds and other safety issues on Salinas residential streets. The program is driven by neighbors and requires that the residents themselves support the traffic-calming plan. It requires a petition from the community to begin the process and support from at least 50% of neighbors for the proposed changes. City staff prioritizes streets with higher traffic speeds and volumes. Learn more here:

https://www.cityofsalinas.org/our-city-services/ public-works/current-projects/traffic-calming.

New marked traffic control devices, including crosswalks, require further analysis and must meet the guidelines of the California Manual of Uniform Traffic Control Devices and city of Salinas policies in order to be installed. Learn more here:

https://www.cityofsalinas.org/our-city-services/ public-works/traffic-transportation-engineering/ policies/accordion/salinas-crosswalk-policy.

There are several recommendations in this plan for new curb markings to create loading zones near schools. The city has an established program and procedure available for new special curb markings, in which schools can begin the process by submitting an application to the City. The costs for installing and maintaining special curb markings are paid by the applicant. There is a fee for the application and an annual renewal fee to refresh the curb markings. All curb markings require Transportation and Traffic Commission and city council approval to be legitimate and enforceable.

PROJECT PRIORITIZATION

This prioritized project list is meant to help decisionmakers and City staff prioritize projects and identify the most competitive projects for various grant funding opportunities. The recommended projects were evaluated using five criteria that are aligned with the vision and goals of this plan and with common grant application criteria. Equity scores are based on the Healthy Places Index map, which shows data on health indicators such as education, job opportunities, and clean air and water. Each project was assigned a number from 0 to 100 based on the criteria in Table 3.

Table 5: Criteria for Project Prioritization

| CRITERIA | DESCRIPTION | MAXIMUM POINTS |
|---|---|-------------------|
| Safety | The following points are awarded for bicycle and pedestrian collisions in the last 5 years within 150 ft of the project, for a max score of 30 points: 5 points per fatal collision 3 points per severe-injury collision 1 point per complaint-of-pain collision | 30 |
| Access to Key Destinations | 10 points for every school and 5 points for every park, library, and recreation center within 500 ft of the project, for a max of 15 points. | 15 |
| Connectivity and Low Stress Network | 15 points if the project closes a gap in the existing bicycle or pedestrian network or upgrades an existing facility to a class IV bikeway or class I path. | 15 |
| | 20 points if the project is located within an area designated as <10% most disadvantaged. | |
| Equity | 10 points if the project is located within an area designated as 10%–25% most disadvantaged. | 20 |
| | 0 points if the project is not located in a disadvantaged area (>25%). | |
| Community- | 20 points if the project or location was identified by members of the community during project outreach. | |
| Identified Need | 10 points if the project or location was identified in one or more community planning documents. | |
| | Total | 100 |

PRIORITIZED PROJECT LIST

The table below shows the top ten high-priority projects for the City of Salinas. The full project list, including project prioritization scoring, can be found in Appendix E. Tables 7 and 8 show the highest-scoring projects in the small and medium project categories as defined by the California Active Transportation Program, which is one of the primary grant funding sources for active transportation projects.

Table 6: High-Priority Project List

| RANK | SCHOOL | PROJECT NO. | RECOMMENDATION | STREET | CROSS ST 1 | CROSS ST 2 | TOTAL | EST. COST |
|------|--|------------------|---|----------------------|------------------|-------------------|-------|--------------|
| 1 | Sherwood Elementary/El Sausal Middle | SE013/ ESM001 | Consider protected pedestrian phases at Alisal/Woods, Alisal/Madeira, and Alisal/Hebbron. Install high-visibility crosswalks and protected bike lanes as outlined in Alisal Vibrancy Plan*. Remove on-street parking in front of El Sausal, and shift bus drop-off from Towt to Alisal. | E Alisal St | Kern St | Skyway Blvd | 100 | \$2,717,020 |
| 2 | Dr. Martin Luther King Jr. Elementary/ Jesse G. Sanchez Elementary | MLKA008 | Short term: Install Class II bike lanes between Laurel and Del Monte. Long term: Widen sidewalk to create multi-use path from Laurel to Garner. Install bike-conflict markings at recreation center entrance and exit driveways. Install raised median with pedestrian refuge islands. | Sanborn Rd | Del Monte Ave | Laurel Dr | 90 | \$1,799,520 |
| 3 | Carr Lake Community Day/Mount Toro High/El Puente | CLCD005 | Consolidate bike lanes to one side of the road for a two-way cycle track or multi-use path. Upgrade bike lanes on Natividad between Bernal and Boronda to Class IV separated bikeways and install protected intersection treatments at Bernal to facilitate transition to cycle track. | Sherwood Dr | Bernal St | Rossi St | 86 | \$12,541,180 |
| 4 | Creekside Elementary | CE016 | Upgrade Class II bike lane to Class IV. | Constitution Blvd | Boronda Rd | Indepen- dence | 85 | \$5,458,680 |

^{*}Further planning and feasibility evaluation of the Alisal Vibrancy Plan is currently underway. The final preferred alternative for E Alisal Street has not been determined.

| RANK | SCHOOL | PROJECT NO. | RECOMMENDATION | STREET | CROSS ST 1 | CROSS ST 2 | TOTAL | EST. COST |
|------|--|----------------|--|------------------|------------|------------------|-------|-------------|
| 4 | Henry F. Kammann | HFK006 | Install Class IV separated bikeways or Class I multi- use path. | W Laurel Dr | Davis Rd | N Main St | 85 | \$1,200,000 |
| 4 | Los Padres Elementary | LPE002 | Install raised median for entire length of John St with landscaping and lighting. Consider other opportunities for traffic calming. | John St | Salinas St | E Alisal St | 85 | \$3,879,220 |
| 4 | Sherwood Elementary | SE012 | Install curb extensions and ramps along John St. | John St | S Wood St | Sanborn Rd | 85 | \$3,102,005 |
| 5 | Fremont Elementary | FE014 | Install traffic calming, sharrow marking, and bike boulevard signage. | Towt St | Market St | Laurel Dr | 81 | \$550,800 |
| 6 | Santa Rita Elementary | SRE002 | Consider bike boulevard with traffic calming between Main St and Van Buren Ave. Consider street trees. Consider sidewalk widening on south side to install multi-use path. | E Bolivar St | Main St | Van Buren Ave | 79 | \$1,099,800 |
| 6 | Virginia Rocca Barton Elementary | VRBE020 | Install traffic calming (chicanes and removal of parking at those locations), sharrow markings, and bike route signage. | Del Monte Ave | Rider Ave | Williams Rd | 79 | \$1,815,600 |

Table 7: Top Three Projects in Active Transportation Program Small Project Category

| RANK | SCHOOL | PROJECT NO. | RECOMMENDATION | STREET | CROSS ST 1 | CROSS ST 2 | TOTAL | EST. COST |

Quick build project in San Jose, CA

MEASURE X

To address the ongoing shortfall in transportation funding, Monterey County voters approved Measure X in 2016. Measure X establishes a 3/8-percent sales tax that will provide approximately \$20 million annually for local transportation projects over the next thirty years. Sixty percent of the funds are distributed by formula to cities and the County of Monterey for road maintenance and repair. Funding in the Pedestrian and Bike Safety and Mobility category can be used for Safe Routes to Schools projects.²

Figure 53: Measure X Expenditure Categories

Source: Transportation Agency for Monterey County

MEASURE G

Measure G is a 1-cent transactions and use tax for general services that was approved by Salinas voters in 2014. The tax went into effect on April 1, 2015 and will expire in 2030.

With the passage of Measure G, the City is now in a position to make strategic investments to restore services and improve public facilities and infrastructure. Each city department's plans are focused on delivering services and projects that are aligned with city council goals and objectives, ranked as high priorities in the budget, and reflect the main interests of the community as determined by extensive community outreach, surveys, and engagement.

The public has consistently expressed a desire for more services to achieve a better, safer Salinas. Crime prevention, public safety, economic development, and street and sidewalk repair all contribute to safe, clean neighborhoods. These and other critical public services have all suffered from inadequate funding.

Increased funding for public safety has been identified through the community outreach process as the highest priority, but not the only priority. While residents have consistently stressed the importance of public safety, they have also recognized that safe communities require investments in violence prevention and community-building programs such as after-school programs, recreational activities, life-long learning opportunities, special events, and cultural arts programming.

MAINTENANCE

The need for maintenance of bicycle and pedestrian facilities is often reported by residents walking and bicycling on local roadways. Bicycle and pedestrian maintenance issues in Salinas can be reported through the Salinas Connect app or through the Public Works Department website. The Transportation Agency for Monterey County (TAMC) also maintains the Bicycle Service Request program, which is a webpage where any issue related to bicycle safety can be reported. Reports are forwarded to the appropriate jurisdiction for action. Maintenance issues on state highways can be reported to Caltrans at https://csr.dot.ca.gov/.

The City of Salinas is responsible for maintaining pavement on roads that have been accepted for maintenance by the City. The City also maintains signage, signals, striping, guardrails, and other traffic-safety devices, walls and other retaining structures, and drainage facilities serving the roadway.

The City of Salinas currently employs the following maintenance policies and procedures to keep bicycle and pedestrian facilities in good repair:

- Bike lanes that are contiguous with a Citymaintained roadway are maintained by the **City as part of the roadway**. The City strives to sweep bike lanes every two weeks. Currently, the street-sweeping program has limited access to the curb, where there are no parking restrictions in place. The street-sweeping program prioritizes the curb and gutter areas, in accordance with state guidelines for stormwater management. Where bike lanes are intercepted by the sweeper, they will be cleaned, but these are not specific. Cleaning requirements are to ensure that stormwater-management requirements are met. Sweeping will be the responsibility of a private company, Republic Services, starting July 1, 2022. The City of Salinas may have limited oversight of their program moving forward.
- **According to the California Streets and Highways Code Section 5610, adjacent** property owners are responsible for the maintenance of sidewalks along the frontage of their properties. However, the City of Salinas continues to maintain sidewalks fronting private

- properties to the best of its abilities. The City repairs sidewalks, curbs, and gutters when requested and as funding allows, but requests to repair sidewalks have exceeded the City's ability to respond, and there is currently a twentyyear backlog of sidewalk repairs. The City also incentivizes private property owners to repair their sidewalks by offering to pay half the cost of repairs, via the 50/50 Sidewalk Repair Program. Alternatively, the City will replace the asphalt concrete tie-in to the new curb and gutter if the property owner repairs the curb and gutter.
- **According to the Streets and Highways** Code, a set amount of maintenance funding is provided by the gas tax, and the City is charged with maintaining roadways as best those funds allow. There is no specific standard to which a roadway must be maintained. Ideally, roads are resealed every five to ten years to keep pavement in good condition. The City works to maximize the funding it receives to provide the greatest benefit to the greatest number of road users.

APPENDIX

APPENDIX A

OUTREACH MATERIALS & SURVEY

Join us for a virtual parent meeting on traffic safety issues around Los Padres Elementary school!

Your input will be used to create a Safe Routes to Schools Plan, which help make it easier and safer for students to walk and bike to school.

September 23rd at 5:30pm
Click Here to Register
meet.google.com/rhk-tndr-iqa

For more information, visit https://ecoact.org/planningsalinas/, find us on Facebook @Transportation Agency for Monterey County, or call (831) 515-1364 to give input over the phone.

¡Acompáñenos para una junta virtual de padres sobre problemas de seguridad de tráfico alrededor de la escuela primaria Los Padres!

Su opinión se utilizará para crear un Plan de Rutas Seguras a las Escuelas. Este plan ayudará a que sea mas fácil y seguro para los estudiantes caminar y andar en bicicleta a la escuela.

23 de Septiembre a las 5:30pm Click Here to Register meet.google.com/rhk-tndr-iga

Para más información, visítenos en https://ecoact.org/planningsalinas-spanish/, encuéntrenos en Facebook @Transportation Agency for Monterey County, o llámenos directamente al (831) 515-1364 para brindar comentario por teléfono.

Neighborhood Scavenger Hunt

Over the next two years, members of our community will create a Safe Routes to Schools plan for 44 schools in Salinas to make walking and biking to school safer, easier and more FUN!

We would love to hear from you!

With a parent present and while following current social distancing guidelines (remain 6 feet from others, wear a mask, do not gather in groups), walk along the route you normally take to school and take notes on any of the items listed to the right. If going outside is not possible, make as many notes as possible for the items using your memory and imagination!

Make NOTES on each item you find.

You don't have to find ALL the items! It's more important to make notes for each one (as shown on the first example).

- 1. Tell us what street you found the item on.
- 2. Does this item make it easier to get to school? How does it make it easier?
- 3. Does this item make it harder to get to school? How does it make it harder?

Once you complete this sheet, visit this website to enter your responses:

www.ecoact.org/scavengerhunt

HELPFUL TIP: If you can't print this sheet, write down items 1-10 on your own sheet of paper before going out on your walk. Make any notes on your sheet of paper.

1. Missing or Broken Sidewalk

6. Stop sign

Example: Broken sidewalk at John St and Magnolia Dr. makes it harder to get to school-sometimes I trip!

2. Crosswalk

7. Tree

3. Bike Lanes

8. Traffic Signal

4. Speeding Traffic

9. Speed Limit SIgn

5. Dogs

10. Trash

A Community-Based Process

Resultados Esperados de este Plan / Outcomes for this Plan

- Identificar soluciones de ingeniería no relacionadas con infraestructura
- Crear lista de costos
- Identificar agencias responsables y posibles fuentes de fondos
- Prioridad de acciones a corto y largo plazo
- Encontrar victorias fáciles!
- A construir proyectos!

- Identify Engineering and Non-Infrastructure solutions
- Develop costs
- Identify responsible agencies and possible funding sources
- Prioritize short- and longterm actions
- Look for quick wins!
- Get projects built!

La Auditora Virtual / The Virtual Audit

Puntos de consideración...

- Patrones de Trafico
- Guardias de cruce
- Alta Velocidad
- El descenso de estudiantes a media calle
- No mirar antes de cruzar
- Andar en bicicleta sin casco

Points to consider...

- Traffic patterns
- Crossing guards/safety patrols
- Speeding
- Dropping students off in street
- Not looking before crossing
- Not wearing helmets

APPENDIX C

EAST ALISAL STREET TEMPORARY DEMONSTRATION

Proyecto Temporal Viene Próximamente

Instalación Para Caminar y Andar en Bicicleta de Manera Protegida Viene a la Calle East Alisal **14 de octubre - 10 de noviembre**

Se instalarán sobre la calle East Alisal entre las calles Griffin Street y Hebbron Avenue mejoras temporales que incluyen la reducción de vías de tráfico a solo una en cada dirección, carriles para bicicletas protegidos y otras mejoras de seguridad peatonal y ciclista. La meta es obtener comentario publico acerca de esta instalación.

Le invitamos a que camine o ande en bicicleta sobre la calle East Alisal durante esta demostración para que vea lo que pudiera ser un proyecto permanente. Después de probarla, utilice el código QR, el enlace o el número de teléfono debajo para participar en la encuesta y cuéntenos lo que piensa.

APPENDIX D

MCKINNON STREET TEMPORARY DEMONSTRATION

Temporary Protected Walking and Biking Installation
At McKinnon Street and Westminster Drive

April 20th - May 18th

The bike lanes on McKinnon Street between Harden Parkway and Harden Middle School will be temporarily changed to separated bikeways, and temporary curb extensions will be added on Westminster Drive. The goal of these changes is to improve safety and get feedback from the community.

GET INVOLVED

Learn more about the project and make sure your voice is heard.

Attend a virtual community meeting April 7th 6-7:30pm. Scan the OR code below for details.

Try walking or biking through this temporary project.

Use the QR code, link, or phone number below to take the survey.

The bike lanes on McKinnon Street between Harden Parkway and Harden Middle School will be temporarily changed to separated bikeways, and temporary curb extensions will be added on Westminster Drive. The goal of these changes is to improve safety and get feedback from the community.

WHAT TO EXPECT

- There may be traffic delays on McKinnon Street on April 18th and 19th while the temporary installation is being installed. Please allow extra time to drive through this area.
- There may be more people walking and biking on McKinnon Street and Westminster Drive during the temporary installation. When you are driving, please slow down and watch for people walking and biking.

I FARN MORE

For more information about the Safe Routes to School Plan, scan the QR code, visit https://saferoutesmonterey.org/ planning-salinas/, or call (831) 515-1364.

Las vías ciclistas sobre McKinnon Street entre Harden Parkway y Harden Middle serán cambiadas temporalmente a vías ciclistas separadas, y además, extensiones de acera serán instaladas sobre Wesminster Drive. La meta de estos cambios es mejorar la seguridad y obtener comentario publico.

QUE SE PUEDE ESPERAR

- Puede haber retrasos por el tráfico sobre la calle McKinnon Street durante los días de instalación que serán el 18 y 19 de Abril. Favor de darse más tiempo para manejar por esta área.
- Puede que vea más gente caminando o andando en bicicleta sobre las calles McKinnon St y Westminster Drive durante esta instalación. Cuando maneje por favor disminuya su velocidad y esté atento de más gente que ande caminando y andando en bicicleta.

COMING SOON!

Temporary Protected Walking and Biking Installation

At McKinnon Street and Westminster Drive April 20th – May 18th

Possible Traffic Impacts

The installation will include barriers between the bike lane and the motor vehicle lane, so you will not be able to drop-off or pick up students on McKinnon Street during the demonstration. This may cause additional traffic in the school drop-off loop. Thank you for your patience with any additional traffic during this project.

How Can My Student Get to School During the Demonstration?

- Walk or Bike to School. Students are encouraged to walk or bike during the installation, and will be entered in a raffle to win prizes if they log their trips through the Move It Monterey County Challenge. Learn more at https://rb.gy/2pwefn
- Drop-off in Church Parking Lot (5-minute walk). You can drop off or pick up students in the parking lot of the Church of Latter Day Saints, located at 255 E Alvin Dr. (see map above)
- 3. Drop-off Circle (15+ minutes): The drop-off circle will remain open but may take 15+ minutes to get through. If enough students walk or bike to school or are dropped off in the church parking lot, it will take less time to get through the drop-off loop.

Why Redesign McKinnon Street?

The temporary installation is designed with students in mind. The project will include barriers between the bike lane and the motor vehicle lane, which makes it safer for students to bike to Harden Middle School and North Salinas High School.

For more information, scan the QR code visit https://saferoutesmonterey.org/planning-salinas, or call (831) 515-1364.

Safe Routes to School

VIENE PRÓXIMAMENTE

Instalación Temporal para Caminar y Andar en Bicicleta de Manera Protegida

En las calles McKinnon Street y Westminster Drive 20 de April – 18 de Mayo

Posible Impacto al Tráfico Normal

La instalación incluirá barreras entre la vía ciclista y la vía de autos, así que no será posible parar para dejar o recoger a su estudiante sobre la calle McKinnon Street durante el mes de demostración. Esto puede que cause tráfico adicional en el área de descenso a la par del estacionamiento escolar. Le agradecemos su paciencia por el tráfico adicional durante este proyecto.

Maneras que su estudiante puede llegar a la escuela durante la demostración:

- 1. Caminando o en bicicleta. Animamos a que estudiantes caminen o vayan a la escuela en bicicleta durante el mes de la demostración. Estudiantes que usen este método podrán grabar sus viajes a la escuela por medio del programa Move It Monterey County Challenge y participar en una rifa para ganar premios. Para más informes puede ir a la página web https://rb.gy/2pwefn
- Puede dejar su estudiante en el estacionamiento de la iglesia (requiere caminar al campo escolar que toma 5 minutos). Usted podrá dejar y recoger a su estudiante de la iglesia Church of Latter Day Saints, localizada en el 255 E. Alvin Dr. (refiera al mapa arriba)
- 3. Puede dejar su estudiante en el área de ascenso cerca del estacionamiento escolar (15+ minutos): El área de ascenso se mantendrá abierto durante la demostración, pero puede que le tome más de 15 minutos para usarla. Si suficientes estudiantes caminan o van a la escuela en bicicleta, o son dejados en el estacionamiento de la iglesia, puede ser que pasar por el área de ascenso sea más rápido.

¿Porque el rediseño de la calle McKinnon Street??

La instalación temporal está diseñada con estudiantes en mente. El proyecto incluirá barreras entre las vías ciclistas y las vías de autos para aumentar la seguridad de estudiantes que andan en bicicleta hacia las escuelas Harden Middle y North Salinas High.

PARA MAS INFORMACION:

Para más información, haga scan el código QR o visítenos en la página web: https://saferoutesmonterey.org/planningsalinas-spanish/, o llámenos al (831) 515-1364.

McKinnon Street Temporary Installation Survey Responses

CSU Monterey Bay Class: ENSTU 376

_

Summary Report of Bicycle & Pedestrian Counts for
Temporary Installations on
McKinnon Street & Westminster Drive, Salinas CA

Written by: Mollie Brogdon

June 24, 2022

Abstract

To ensure the safety for children and all community members in Monterey County, as part of the Salinas Safe Routes to School Program, The Transportation Agency for Monterey County installed temporary safety measures in front of Harden Middle School located in Salinas, CA. With help from the Sustainable City Year Program and CSUMB students, a study on the temporary installations was conducted to assess their effectiveness in increasing pedestrians and bicyclist traffic, as well as improving their overall safety. Each movement an individual made across the intersection of McKinnon Street and Westminster Drive was recorded during four designated days and time frames both before and after the temporary safety measures were installed. When it was observed, additional documentation concerning dangerous behavior was made. This study concluded that the temporary installations did increase the safety of bicyclists and pedestrians. However, pedestrians may still be subject to unsafe conditions due to the speed of vehicular traffic, and children bicyclists remain susceptible to injury from the lack of prevalent helmet use. Pedestrian activity had a notable increase following the installations, whereas bicyclist activity decreased. It was also found that the temporary installations did not encourage bicyclists to travel in the protected bike lanes. This study argues that an additional speed survey is necessary to better assess the severity of speeding in the area. Education on proper bike lane use for child bicyclists is also recommended. Finally, stronger enforcement of helmet use for minors is imperative. A program to connect the children with such safety gear is advised.

Background & Purpose

All children should be able to make their way to school safely. The Transportation Agency for Monterey County (TAMC) is working to ensure children's safety through various Safe Routes to School projects and programs across Monterey County. TAMC is aware that the majority of children in Monterey County are driven to school. This is one of the leading causes of traffic congestion on local roads during the morning and afternoon. This chaotic drop-off traffic in front of schools creates an unsafe environment for children who walk and bike. TAMC is making an effort to bring forth a community approach to achieving a deep and comprehensive impact for children's safety through the Safe Routes to School Program. One specific project that TAMC employed took place in front of Harden Middle School and was made possible through the Sustainable City Year Program. The Sustainable City Year Program is a connection made by universities and communities to assist with local needs. The program is intended to assist local municipalities with sustainability-related projects that they would like to take on but may not have the resources to do so. For this project, an Environmental Studies class focusing on infrastructure at California State University, Monterey Bay, collaborated with TAMC to collect bicycle and pedestrian count data and assess the effectiveness of the project.

The project in front of Harden Middle School was focused on the intersection of McKinnon Street and Westminster Drive, with the goal of getting feedback from the community and improving safety. TAMC added temporary curb extensions on Westminster Drive and changed bike lanes to protected bikeways with a barrier from cars on McKinnon Street.

Examples of these temporary installation are found below in *Figure 1*. To properly evaluate the effectiveness of these temporary measures, CSUMB students were tasked with counting the movements of pedestrians and bicyclists across the entire intersection. The counts were primarily intended to answer the following question: How do the temporary installations impact pedestrian

and bicyclists' behaviors? Questions of more specific interest include, Do the temporary installations improve safety for pedestrians? Do the temporary installations improve safety for bicyclists? Do the temporary installations encourage more pedestrian and bicyclist activity? Recording the activity within the intersections through pedestrian and bicyclist counts allowed for a comprehensive investigation to answer the questions of interest.

Figure 1. Temporary Bike Lane Separations on McKinnon Street

Methodology

The counts were recorded by CSUMB students, whose role included observing and tallying the movements of pedestrians and bicyclists across the McKinnon and Westminster intersection. An example of how the intersection was labeled for the purpose of counting can be seen in *Figure 2* below. These counts were taken from 7-9am and 2:30-4:30pm on Tuesday April 5th and Thursday April 7th before the installations. After the installation of the curb extensions and separate bikeways, counts were taken during the same time frames on Tuesday April 26th and Thursday April 28th.

During the counts, students recorded the number of individual movements people made at any of the four crossings, as well as turns they made on corners of the street. Counters specified if the pedestrians or bicyclists were adults or children, if the crossings were considered

safe, if child bicyclists were wearing helmets or not, and if bicyclists were traveling on the sidewalk or street. A safe crossing was one in which a pedestrian or bicyclists used the designated pathways and did not have a dangerous interaction with the vehicular traffic.

Additional notes were recorded if dangerous or unusual behavior was observed. Counters also recorded the opinions and input from community members as well as teachers from Harden Middle School that approached them about the study. To account for other variables impacting the results, the temperature and weather conditions during each count were also documented. Weather during every count was mild; no rain, extreme heat, cold, or wind was recorded. It is likely that the weather did not impact the results of this study.

Within the collected data, there is some information regarding bicyclists that is incomplete or was entered incorrectly. The data is concerned with helmet use by child bicyclists and if the bicyclists were traveling on the sidewalk or street. The findings and conclusions further explain in detail the impact of this on the study.

Figure 2. Labeled Intersection for Counting

Findings:

To gain a better understanding of the results of this project, an overview of three themes within the findings will be presented. These include results relating to pedestrians, bicyclists, and dangerous behaviors. These findings will relay comparative information and data from before and after the temporary installations.

Pedestrians

Figure 3 below displays several findings from the study. Within the graphs, categories of "In" signifies that the crossing took place within a designated pathway and that the crossing was considered safe from vehicular traffic. On the other hand, those that say "Out" indicate that the crossing took place outside of the crossway and was considered an unsafe crossing. "Before" signifies the count data prior to the installation of the temporary safety measures and "After" signifies the data that was collected following the installation of temporary street improvements. Since the before and after counts for Tuesday and Thursday were generally comparable to each other, the data from the two days was compiled into sum totals.

As seen in the graphs, movements of children were far more frequent than adults at almost every crossing. In the morning, the most frequently crossed pathways were from $2\rightarrow 1$ with 48 children inside the crosswalk before and 44 after, $3\rightarrow 4$ with 13 children before and 21 after, $4\rightarrow 3$ with 164 children before and 228 after, and $1\rightarrow 4$ with 159 children before and 175 after. Likewise, in the evening, the most frequent crossings for children included: $1\rightarrow 2$ with 40 before and 72 after, $2\rightarrow 1$ with 63 before and 49 after, $3\rightarrow 4$ with 307 before and 435 after, $4\rightarrow 3$ with 35 before and 70 after, $1\rightarrow 4$ with 19 before and 47 after, $4\rightarrow 1$ with 215 before and 248 after, and finally Corner 2 where there were 44 turns before and 54 turns after the pop-ups.

The main pathways traveled by children are the crossings between locations 4 and 3 as well as the between locations 1 and 4. Both were traveled in high frequency in the morning and

afternoon, just in the opposite direction. In the morning, children typically traveled sequentially from $1\rightarrow 4$ then, from $4\rightarrow 3$. In the afternoon, they typically travel from $3\rightarrow 4$ then, from $4\rightarrow 1$.

The graphs further demonstrate that there is more pedestrian traffic during the afternoons than there is in the mornings. Moreover, there are more children crossings that took place outside of the crosswalks during the afternoon. It is important to note that one of the most frequent crosswalks that children traveled outside of was $3\rightarrow4$ in the afternoon. This pathway is not an actual street crossing, but a sidewalk where the large bins were added as a barrier between the bike lane and the street. The data is unclear whether the pedestrians were traveling behind these bins in the bike lane, or in front of the bins in the street.

Figure 3. Pedestrian Count Graphs

Bicyclists

Similar to *Figure 3, Figure 4* also displays compiled data from two data collection days to best showcase the findings. *Figure 4* shows that in the mornings of the pre-counts, there were a total of 94 bicyclists. Within this, 40 were children, 38 of which, traveled on the sidewalk. In the afternoon of the pre-counts, there were 37 bicyclists. 22 out of the 37 bicyclists were children with 18 traveling on the sidewalks. After the temporary measures were installed, post-counts revealed that in the morning there were a total of 35 bicyclists. 28 of these bicyclists were children, with 25 of them traveling on sidewalks. Likewise, the afternoon post-counts totaled 49 bicyclists. Out of the 49 bicyclists, there were 41 children. The data that was collected during these time frames does not indicate whether these children traveled on the sidewalk or the street.

Cumulatively, *Figure 5* reveals that there was a total of 131 bicyclist movements during the pre-count, and 84 bicyclist movements observed during the post-count. This is a 35.9% overall decrease in bicyclist traffic. In the mornings, bicyclist traffic decreased by 62.7%.

However, in the afternoon, bicyclist traffic increased by 32.4%. Overall, the number of bicyclists decreased following the installation of the temporary measures.

Lack of helmet use by children bicyclists proved to be a significant finding within the study. The data collected on helmet use may not be reflective of the precise percentage of children that wore helmets due to data entry errors. However, based on substantial observational data, it can be concluded that there were very few children who wore helmets. The vast majority of children bicyclists did not wear helmets. A change in the frequency of helmet use by children bicyclists was not observed following the installations.

Figure 4. Morning & Afternoon Counts of Bicyclists Graph

Figure 5. Totals of Before & After Counts Graph

Dangerous Behaviors

Based on observational data collected during the study, vehicular traffic was a significant contributor to dangerous behaviors within the intersection. Prior to the installations, cars commonly pulled into the unprotected bike lanes on McKinnon Street to drop-off or pick-up children. *Figure 6* below provides an example of this frequent occurrence. Following the installation of the temporary bike lane barriers, cars were no longer able to make this maneuver. Instead, they then opted to park in the residential streets down Westminster Drive. These locations down Westminster became crowded and cars ended up blocking intersections, parking in front of driveways, and in fire lanes as they waited to pick their children up. One CSUMB student counter reported on the deeper implications that could arise as a result of vehicles blocking intersections:

"During [a post-count] count on Thursday April 28, multiple cars were parked, blocking the fire lanes where Westminster opens onto McKinnon (in the $1 \rightarrow 2/2 \rightarrow 1$ crossing, see Figure 1). A few minutes later, I observed an ambulance and fire engine responding to a

medical emergency on Tynan Court, which intersects Westminster near the count site. If those cars had been blocking the lanes, neither emergency vehicle would have been able to access the street without driving over a planted center divider and knocking over a sign. This is the only major drawback I can see with the installation: as parking opportunities are limited on McKinnon to create safer conditions for pedestrians, drivers are routed onto residential streets, causing potential issues for emergency and residential access to the neighborhood. Granted, this problem only arises during school pickup hours, but it is still a concerning possibility."

After the temporary installations were put in place, it was observed that the number of children who were dropped off in the morning within the intersection significantly decreased. More specifically, there were fewer cars that stopped to drop off children in front of the crossing between locations 3 and 4. Prior to the installation, this was a popular spot for cars to stop and drop off children.

Another frequent dangerous behavior observation made by counters relates to the speed of vehicular traffic. Before and after the installations, multiple counters noted that the speed vehicles were traveling down McKinnon was a concern. Although the actual speed of vehicles was not recorded in the study, it was evident that they were traveling at a speed that was unsafe for pedestrians. One observation of particular importance deals with the crosswalk between locations 1 and 4. During the morning counts, both before and after the installations, it was recorded that a child was almost hit by a vehicle in the middle of this crosswalk. In both instances, the children had to make abrupt stops in the middle of the crossing to avoid being hit by a car.

Figure 6. Cars Parked in Bike Lane on McKinnon Street

Conclusions

The purpose of this study was to gain insight into the following questions: How do the temporary installations impact pedestrian and bicyclists' behaviors? Do the temporary installations encourage more pedestrian and bicyclist activity? Do the temporary installations improve safety for pedestrians and bicyclists?

It is concluded that overall pedestrian traffic increased following the addition of the temporary street improvements. Almost every route during the post-installation counts had a notable increase. It is also clear that the main routes traveled by children are the crossings between locations 4 and 3 as well as the crossing between locations 1 and 4. Both of these were traveled in high frequency in the morning and afternoon, just in the opposite direction. From this, it can be assumed that many children are being picked up in the same places that they are dropped off for school or that they live in the neighborhoods accessed by Westminster Drive. It was also observed that children traveled outside of the crosswalks more frequently in the afternoon than in the morning. This is likely a result of a rush of students being released from

school at the same time and the resulting crowding on the sidewalks in front of Harden Middle School. Since the children are traveling outside of the pathways during these times, the bins that were set up in front of the $3 \leftarrow \rightarrow 4$ crossing are likely providing a necessary safety barrier to protect the child pedestrians from vehicular traffic.

This temporary barrier bins in front of locations 3 and 4 proved to be advantageous for bicyclists who utilize the bike lane as well. They actively assisted in inhibiting cars from entering and parking in the bike lane to drop-off or pick-up children. The bins, along with the other temporary installations that created protected bikeways, allows for bicyclists to safely travel in the bike lane without the risk of interference from vehicles. Despite the fact that the protected bikeways are making traveling in the bike lane safer, they did not encourage bicyclists to travel in the bike lanes themselves. Although it cannot be concluded with full certainty due to missing data during the afternoon post-counts on whether the bicyclists were traveling on or off the sidewalks, the data that is available during the morning counts indicates that there was no change in bicyclists traveling on the streets instead of the sidewalk. Bicyclists continued to travel on the sidewalks.

As it has been presented, there was an 35.9% overall decrease in bicyclist traffic following the instillations. In the mornings, there was a decrease of 62.7%. Only during the afternoon was there an 32.4% increase in bicyclists traffic following the installations.

Although the temporary installations were not created with the intention of improving this observation, one of the main concerns that became evident within the study is the lack of helmet use in child bicyclists. Very few, if any, children wore helmets while riding their bikes. This is a significant safety risk for children.

An additional safety concern for both pedestrian and bicyclists is the speed of vehicular traffic on McKinnon Street. The installations did not appear to significantly lower the speed that

vehicles are traveling. Pedestrians and bicyclists continue to be at risk from speeding cars. While this study reported only two "close-calls" events where children were almost struck by motorists in a designated crosswalk, other stakeholders such as Harden Middle School teachers, have reported that it is a common occurrence.

In all, the temporary installations did increase the safety of bicyclists and pedestrians by providing a safety barrier from motorists. However, pedestrians are still subject to unsafe conditions due to the speed of vehicular traffic, and children bicyclists remain susceptible to injury from the lack of prevalent helmet use. Pedestrian activity had a notable increase following the installations, whereas bicyclist activity decreased. The temporary installations did not encourage bicyclists to travel in the protected bike lanes.

Recommendations

To address the safety concerns that this study has uncovered, a few recommendations for infrastructure improvements and programming should be taken into consideration. First, to make a more accurate assessment on the speed of vehicular traffic within the area, an additional speed survey is recommended. Once the severity of speeding is recorded, it would allow for a better examination of pedestrian and bicyclist safety. Then, applicable recommendations on how to decrease the speed of traffic can be made.

An additional recommendation is to better educate child bicyclists on using the bike lanes. Child bicyclists may not be aware that using sidewalks while traveling on bikes is unsafe and that the street bike lanes is where they should travel instead. Sufficient education on bicycle policies for children will enhance safety for all. It may also encourage more children to bike to school after they have had the opportunity to become more familiar and confident about biking.

However, if measures continue to be taken to encourage children to bike to school, helmet enforcement for children under the age of 18 must also take effect. Whether this be through actions Harden Middle School takes to regulate helmet use, through local law enforcement, or even through a program that allows children to gain access to safety gear such as helmets, intervention is necessary.

APPENDIX E PRIORITIZED PROJECT LIST

| School | Rec ID Code | Recommendation | Street | Cross Street 1 | Cross Street 2 | Safety | Access to key destinations | Equity | Connectivity and Low Stress Network | Community- Identified Need | Total Score | Cost Estimate |

APPENDIX F

PUBLIC COMMENTS BY SCHOOL

| SCHOOL | SOURCE | LOCATION | COMMENT |
|-------------------------|--------|--|---|
| Alisal Comununty School | Survey | Dallas Ave | Dallas Ave is dangerous |
| • | • | | The speed some cars go by on Dallas every morning before school and after-school. Another crosswalk and we |
| Alisal Comununty School | Survey | Dallas Ave | need a cross guard. Cars pass to fast on Dallas Ave. Given this is the las street that connects Del Monte Ave with Garner Ave or vice versa if you want to get to Town Ave or to Del Monte (" the shortcut"). Many students, including me and my girls use Dallas and New Deal to get to Del Monte and get to school. Bumps are needon that street, teen drive there carelessly. Morning school traffic is crazy. The combination of high school and elementary traffic come |
| Alisal Comununty School | Survey | Dallas Ave and Del Monte Ave and Garner Ave | together evey morning making it dangerous for kids that walk by themselves to cross the street. Some parents make a complete stop in the middle of the street to droop off their child. Traffic is terrible. |
| Alisal Comununty School | Audit | Dallas Ave and New Deal Ave | Popular route to school, narrow streets and speeding |
| Alisal Comununty School | Audit | Del Monte and Towt | Donators of the second state of Could be seen as the second state of the second state |
| Alisal Comununty School | Audit | Del Monte Ave | Bus dropoff happens on street. Small loop used as loading zone. In the near future, the school parking lot and drop-off loop will be located on Del Monte at the front of school |
| Alisal Comununty School | Audit | Del Monte Ave | Parents dropping off on both sides of the street, students running across. MST stop in front of school adds to school congestion. Principals biggest concern is that there is no marked crosswalk on Del Monte between Williams and Towt. There |
| Alisal Comununty School | Audit | Del Monte Ave | used to be one in front of the Head Start building but the City removed it. Parents do not like using the crossing at Williams, say it feels unsafe |
| Alisal Comununty School | Audit | Del Monte Ave | Speeding. MST route so speed humps not an option. |
| Alisal Comununty School | Audit | Del Monte Ave | Wide crossings at side streets, parked cars restrict visibility. |
| Alisal Comununty School | Survey | Del Monte Ave | Add speed bumps on Del Monte Ave |
| Alisal Comununty School | Survey | Del Monte Ave | Del Monte |
| Alisal Comununty School | Survey | Del Monte Ave | Del Monte Ave is dangerous |
| Alisal Comununty School | Survey | Del Monte Ave | Del monte st.no safety cross lines children crossed and is a bussy street cars don't stop |
| Alisal Comununty School | Survey | Del Monte Ave | Lots of traffic on Del Monte Ave |
| Alisal Comununty School | Survey | Del Monte Ave | On the street Del Monte Ave traffic doesn't allow any safety for the bikes cars drive by pretty fast thru that street also there is to many cars parked on the side of the street which makes bikers be unsafe since they don't have there lane to be on while biking. Also walking for either kids or adults is unsafe for the same reason above we need flashing lights on our streets so other cars get alerted when someone is walking and cars don't just go by speeding. I've have experience allot of occasions where myself and other kids have almost got hit because cars don't look where we are crossing or they are speeding. |
| _ | Survey | Del Monte Ave | Traffic in Del Monte |
| Alisal Comunumty School | | Del Monte Ave - front of | |
| Alisal Comununty School | Survey | school | Nicer crossguards and more crosswalks around school |
| Alisal Comununty School | Survey | Del Monte St | pues yo diria que pinten las calles porque cuando llueve no se mira las linias de la del monte |
| Alisal Comununty School | Survey | Del Monte St | Si pintar la calle de la del monte y poner unos semáforos |
| Alisal Comununty School | Survey | Del Monte St and Dallas St | Si, un cruce en del Monte y Dallas |
| Alisal Comununty School | Survey | Del Monte St and New Deal Av | Un cruce en del monte y new deal av. My 6 year old son is too small to walk by himself. Plus by Eagle Dr. vehicles over speed often. But road bumps |
| Alisal Comununty School | Survey | Eagle Dr | on Eagle Drive. Vehicles over speed often. |
| Alisal Comununty School | Survey | Garner Ave | Dangerous to cross Garner Ave School pop = 650. 50-60% of kids are dropped off. A few bike, no students bussed unless they are overflow |
| Alisal Comununty School | Audit | General | from other schools. The rest walk (40-50%). Bike parking present on campus. |
| Alisal Comununty School | Survey | General | A crossing light |
| Alisal Comununty School | Survey | General | A crossing light |
| Alisal Comununty School | Survey | General | Accidents |
| Alisal Comununty School | Survey | General | Add crosslights or have someone help the students cross the streets safely |

| Alisal Comununty School | Survey | General | Get the police department involved for safety |
| Alisal Comununty School | Survey | General | Get the police department involved for safety |
| Alisal Comununty School | Survey | General | Get the police department involved for safety |
| Alisal Comununty School | Survey | General | Have someone assits students cross the light safely |
| | | | |

| Alisal Comununty School | Survey | General | Her baby sitter takes her and picks her up from school, no problem |
|-------------------------|--------|---------|--|
| Alisal Comununty School | Survey | General | I don't know, maybe just too much traffic around school zones |
| Alisal Comununty School | Survey | General | I hope God protects us and helps doctors find the cure so our children can go back to school |
| Alisal Comununty School | Survey | General | I like the school and neighborhood though |
| Alisal Comununty School | Survey | General | I think adding a crossguard would be good |
| Alisal Comununty School | Survey | General | I would like more crossguards to assist students crossing the street |
| Alisal Comununty School | Survey | General | I would like to have a crossguard |
| Alisal Comununty School | Survey | General | I would love for my child to be able to walk to school, but it is dangerous. Especially with the shootings that happen around here sometimes |
| Alisal Comununty School | Survey | General | Irresponsible Drivers |
| Alisal Comununty School | Survey | General | It scares me that my daughter gets kidnap |
| Alisal Comununty School | Survey | General | It worries me because she's still very young |
| Alisal Comununty School | Survey | General | It worries me because she's very yoong and cars don't respect traffic speed |
| Alisal Comununty School | Survey | General | It's a busy time around schools. Parents trying to get to work and there isn't much parking either |
| Alisal Comununty School | Survey | General | It's a busy time around schools. Parents trying to get to work and there isn't much parking either |
| Alisal Comununty School | Survey | General | La violecia |
| Alisal Comununty School | Survey | General | Less parked cars on the street so she can focus on the cars driving by. |
| Alisal Comununty School | Survey | General | Lots of traffic |
| Alisal Comununty School | Survey | General | Lots of traffic |
| Alisal Comununty School | Survey | General | More crossguards in the streets around school |
| Alisal Comununty School | Survey | General | More crosslights around the schools |
| Alisal Comununty School | Survey | General | More safety and crossguards around the school |
| Alisal Comununty School | Survey | General | More safety around the school. |
| Alisal Comununty School | Survey | General | More safety around the school. Encourage drivers to slow down and respect the traffic and safety signs |
| Alisal Comununty School | Survey | General | More safety, crossguards |
| Alisal Comununty School | Survey | General | More security |
| Alisal Comununty School | Survey | General | More than anything, traffic. They are not cautious about students crossing |
| Alisal Comununty School | Survey | General | My kids are still too young |
| Alisal Comununty School | Survey | General | My son has asthma and worries me when he walks alone |
| Alisal Comununty School | Survey | General | My son is easily distracted and the community is not very safe |
| Alisal Comununty School | Survey | General | Neighborhood support. If students need help, help them |
| Alisal Comununty School | Survey | General | No issues, my child always walks with an adult |
| Alisal Comununty School | Survey | General | None |
| Alisal Comununty School | Survey | General | Not being chased by dogs |
| Alisal Comununty School | Survey | General | Paint crosswalks |

| Alisal Comununty School | Survey | General | Traffic |
| Alisal Comununty School | Survey | General | Traffic speed worries me |
| Alisal Comununty School | Survey | General | Unsafe crosslight |
| Alisal Comununty School | Survey | General | When it rains, the school district should be aware that, because of the traffic, sometimes students will be late |
| Alisal Comununty School | Survey | General | When the bus drops the student off in the corner of Del Monte close to the school, cars don't stop. A crosswalk and a crossguard would make it safe |
| Alisal Comununty School | Survey | General | Worries me that my child is bullied by others while walking to school |
| Alisal Comununty School | Survey | General | Worries me that my child walks because there is no supervision along the way |
| Alisal Comununty School | Survey | School Perimeter | The back of the school there should be a supervisor guiding traffic |
| Alisal Comununty School | Audit | Towt and Cortez | |
| Alisal Comununty School | Survey | Towt St and Del Monte Ave | Cars don't respect stop signs on Towt St and Del Monte Ave |
| | | | Elementary school students do not cross here but this intersection is well used by high school students. The City |
| Alisal Comununty School | Audit | Williams and Del Monte | used to provide a crossing guard here but that stopped. Elementary parents don't want to cross here |
| Alisal Comununty School | Audit | Williams Rd | Drop-off currently happens in lot off Williams (but will move to Del Monte). 2 staff controlling traffic in the loop. Williams gets very backed up before and after school. Parents turning left out of lot blocks traffic. |
| Alisal Comununty School | Survey | Williams Rd | Instalar luz de cruce escolar en la calle de Williams Rd entre alisal high school y alisal elementary |
| Alisal Comununty School | Survey | Williams Rd | The crosswalk in between Monte Bella Blvd and Del Monte Avenue causes unnecessary traffic during drop off and during pick up. The students can cross on the two stop lights (Williams and Del Monte & Williams and MonteBella) Please consider eliminating that crosswalk. It is unsupervised and causes major traffic. There is literally nothing they are crossing over to, they either continue on to the high school or the elementary school. Please drive up and down Williams road at 7:45am and you'll see the issue. |
| | | | |

| Alisal Comununty School | Survev | Williams Rd | There is a 5 lane street that in mornings and afternoons gets filled with traffic (Williams street) people rushing to get to either the elementary school (Alisal Community School) or high school (Alisal High) which are on the same block right next to each other. There are many accidents on Williams Road near schools because of all the traffic and the people who rush and don't know how to drive. Also on Del Monte and Williams drivers do not respect the cross walk and when stopped at red light they stop across the cross walk. |
|-------------------------|----------------|---|---|

| Alisal High School | Student Survey | General | I am concerned strangers will talk to me. |
| Alisal High School | Student Survey | General | I am concerned strangers will talk to me. |
| Alisal High School | Student Survey | General | I dont have any walking or biking safety issues, my mom just worries about me walking alone late at night after practice or early in the morning. |
| Alisal High School | Student Survey | General | I have to get on the highway so it is a major hazard for me to walk to school. |
| | | | I really didn't have any issues it was just so many people would drive to school causing the distance and time to |
| Alisal High School | Student Survey | | arrive to school affect me arriving late sometimes. I stopped walking once cars wouldnt stop for me anymore and I almost got hit a few times. I just got spooked |
| Alisal High School | Student Survey | General | and would then look for any available rides. |
| Alisal High School | Student Survey | General | I used to live in Acosta Plaza but I hardly ever walked to/from school because of how unsafe it was. There were shootings almost every other week. The children at Martin Luther King Elementary school would be on lockdowns almost everyday. The city almost never addresses the vast amounts of issues there. Not just crime but housing/homelessness and lack of infrastructure (run down apts, ugly roads etc.) Its sad how that area is just set aside and instead all the money goes to downtown Salinas like the new sign they just put up. |
| | | | Im not from Salinas Im actually from greenfield high school, and I live across town I have to cross bridges to get to school and home i also have to go through busy roads and I have had scary encounters with homeless people following me and catcalling me. I have to cross el Camino real and oak Avenue and there isnt many side |
| Alisal High School | Student Survey | General | walks to get to my side of the town so I walk beside cars. |
| Alisal High School | Student Survey | General | My parents do not let me walk to school because they are concerned for my safety. Usually I did not have any safety concerns only in Williams Road when we would cross sometimes it was scary |
| Alisal High School | Student Survey | General | because there aren't as much crosswalks. |
| Alisal High School | Student Survey | General | Well if I were to walk to school, I'd have to cross the street on Cross Ave, where the traffic is usually really fast and hectic heading towards Cesar Chavez Library/ around there. |
| | | | |
| | | | |

| Alisal High School | Student Survey | General | When crossing on North Sanborn, I feel as if the cars drive by very fast, so I have to be extra careful when crossing. |
|--|------------------|--------------------|---|
| Alisal High School | Student Survey | General | When I walk home through Sanborn, creepy men catcall me and make me feel harassed. It also takes a long time for drivers to let me cross. |
| - mounting in contact | | | When I would bike to school there would be a lot of pot holes or broken sidewalks, sometimes there wasnt |
| Alisal High School | Student Survey | General | really a side walk to go on. For example, I would usually go through E Laurel Dr. to go school but its just a very uneven dirt path that can be pretty dangerous if you make a wrong move. |
| Alisal High School | Student Survey | General | When walking to school i would walk alone in the mornings and afternoons and my parents are afraid that something bad might happen to me on my way home. |
| Alisal High School | Student Survey | General | When walking to school, some concerned issues are that drivers don't stop in walking paths because there is no light. |
| • | , | | |
| Alisal High School | Student Survey | General | When, I would walk to school, there were no concerns for my safety for the route that I would take. |
| Alisal High School Alisal High School | Survey Survey | General General | A lot of traffic and gang violence around Add a crosswalk |
| Alisal High School | Survey | General | Add a crosswalk and traffic lights around the school |

| | | | My younger brother walks to Rancho San Juan High School. We live in Santa Rita area. His walk there isn't very |
|-------------------------|------------------|---|--|
| Bolsa Knolls Middle | Survey | General | safe. There aren't many crosswalks or sidewalks. It is very unsafe. |
| Bolsa Knolls Middle | Survey | General | The amount of traffic and how fast and terrible people drive in the morning. |
| 20.54 14.0.5 1 1144.0 | | 40.10.41 | The distance is too long and there are no safe curbs or sidewalks to walk or ride bikes to school and there |
| Bolsa Knolls Middle | Survey | General | aren't any guard supervision. |
| | | | Traffic during school times , speed of cars , car drivers not slowing down near cross walks so students can cross |
| Bolsa Knolls Middle | Survey | General | safely, cars speeding , drivers running stop signs. |
| D | A . D | Intersection of San Juan | |
| Bolsa Knolls Middle | Asst. Principal | Grade and Rogge | Some drivers don't stop at stop signs |
| Bolsa Knolls Middle | Audit | Kelton Dr and Rogge Rd | West corner allows car parking to very corner and overgrown bushes. Obstructed view if ped stands at corner. |
| Bolsa Knolls Middle | Asst. Principal | Main St | Main St. is terrible for traffic and speeding, specially with students crossing. |
| Bolsa Knolls Middle | Asst. Principal | MOT center | Buses drop off here near gym - separate entrance |
| Bolsa Knolls Middle | Survey | North Main St | North Main is a 5 lane street with very high speeds as people are coming off and on the freeway. |
| | • | Rancho San Juan High and | There is no side walk, My sons schol is not listed? why? Rancho san Juan high school has the worst route to |
| Bolsa Knolls Middle | Survey | surrounding | school with fields and no side walks. |
| | | | During food distribution there's lots of traffic going to the church through the street immediately next to school |
| Bolsa Knolls Middle | Asst. Principal | Rogge Rd | campus that also extends down to the high school. |
| | | | There is no paved walking or bike path for kids in the Harden Area districted to go to Bolsa Knolls to cross over |
| Bolsa Knolls Middle | Survey | Rogge Rd | to safely cross over to Rogue Rd. The only way is to illegally cut through the fields or take the dirt path down Old Natividad Rd. on the busy 2 way street. |
| Doisa Kilolis Pildule | Survey | nogge na | My child attends Rancho San Juan High - There is no paved walking and bike paths. The most important safety |
| | | | issue is the lack of a safe route that is paved to walking and bike to school. The only available route is down a |
| Bolsa Knolls Middle | Survey | Rogge Rd and Natividad Rd | dirt path on the 2 way Old Natividad Rd. |
| | • | Rogge Rd at school driveway | Staff controls crosswalk across Rogge and students crossing school driveway. Crosswalk moved from corner |
| Bolsa Knolls Middle | Asst. Principal | entrance | because it was not straight |
| Bolsa Knolls Middle | Asst. Principal | Russell Rd | Lots of speeding on Russell Rd. |
| Bolsa Knolls Middle | Asst. Principal | Russell Rd | School bus stop - some students walking. Complaints about speeding traffic. |
| Dalaa Kaalla Middla | C | Diversill Del | There has been a second of an order about most and indeed and indeed and indeed and indeed about the second and the second and indeed about the second and indeed and |
| Bolsa Knolls Middle | Survey | Russell Rd | There has been a couple of murders along russel road and i dont want to expose my daughter to that. |
| Bolsa Knolls Middle | Survey | San Juan Grade | Implement curbs or sidewalks on both sides of San Juan Grade, I believe this is a place where there has been lots of accidents due to good traffic infrastructure. |
| Doisa Mions Middle | Survey | San Juan Grade between | tots of accidents due to good traine inflastracture. |
| Bolsa Knolls Middle | Asst. Principal | Rogge and Cornwall | students crossing mid-block to get to Valero |
| Bolsa Knolls Middle | Parent | San Juan Grade Rd | Cars parked along shoulder leave small space for pedestrians. |
| | | | |
| Bolsa Knolls Middle | Parent | San Juan Grade Rd | Sometimes cars stop on the turn lane but keep going stratight because they don't know it's a turning lane. |
| Bolsa Knolls Middle | Parent | San Juan Grade Rd | There are no sidewalks along this road for students to walk on. |
| Bolsa Knolls Middle | Survey | San Juan Grade Rd | Concerned with the entire length of this road. |
| Bolsa Knolls Middle | Survey | San Juan Grade Rd | No sidewalks along parts of San Juan Grade Rd |
| Bolsa Knolls Middle | Survey | San Juan Grade Rd San Juan Grade Rd and | Towards the 500 block and on there are no sidewalks or bike lanes and cars pass by very fast. |
| Bolsa Knolls Middle | Asst. Principal | Rogge Rd | Intersection is unsafe because how it is offset. Maybe a stop light would be better here. |
| 20.04 14.0.05 1 1144.0 | 7.0001 7.1110.pu | San Juan Grade Rd and | The section is a section of the section in the sect |
| Bolsa Knolls Middle | Parent | Rogge Rd | Intersection is not safe. Drivers pull into intersection without stopping and cars go by fast. |
| | | San Juan Grade Rd and | Traffic does not stop at crossing off Rogge road and San Juan grade road. Cross guard needed during before |
| Bolsa Knolls Middle | Survey | Rogge Rd | and after school. |
| | | San Juan Grade Rd and | |
| Bolsa Knolls Middle | Survey | Russell Rd | Would be good if at stop signs there were people crossing the children. |
| Bolsa Knolls Middle | Asst. Principal | School drap off loop | No staff in school drop-off loop. Three lanes of drop-off. Functions smoothly |
| Bolsa Knolls Middle | Asst. Principal | School drop-off loop | Some parking in drop-off loop, but not common |
| Boronda Meadows School | Survev | Boronda Rd and N Davis Rd | Concerns with crosswalks. |
| | | | |
| Boronda Meadows School | Principal | Bus loop | Six buses bring students into school from throughout Salinas. |
| | | Calle Del Adobe and N Davis | |
| Boronda Meadows School | Survey | Rd | Concerned about the crossing near Adobe St. |
| | | | I cringe every time I see kids cross "Calle de Adobe". Sometimes they're alone, and sometimes with a parent. |
| | | | Still, it's a dangerous crosswalk! Drivers who travel that road are more often than not speeding. Yet just a few |
| | | | yards away is a ped bridge! It's a much safer way to cross and why wait for a catastrophic event on that crosswalk to look at the problem. When you have a chance to be proactive and make a change for the kids |
| | | | safer path to your school. I did drive by the entrance to the bridge on El Rancho Way. the path is full of weeds, |
| | | | no wonder no one uses it. And the exit at Calle de Adobe has no access opening to the sidewalk. Both are |
| | | Calle del Adobe and | easy fixes. And all the effort would benefit your kids. |
| Boronda Meadows School | Resident | Pedestrian Bridge | |
| | | | |
| | | | Large new housing dvlp being constructed on Davis near Rossi. May be farmworker (not family) housing - |
| | | | unknown whether there will be new students and families and which school those students will go to. Complete |
| Boronda Meadows School | Audit | Davis Rd | wide sidewalks in place on Davis between new development and Boronda Meadows |
| Boronda Meadows School | Parent | Front of school | Issues with congestion, parents parking where they shouldn't and blocking school buses. |
| Doronia Picauows School | alcill | I TOTIL OF SCHOOL | Lots of students live in the apartments next door. Crossing the school main entrance and parking lot is a bit |
| Boronda Meadows School | Parent | Front of school | dangerous. |
| | | | <u> </u> |
| Boronda Meadows School | Parent | Front of school | Lots of the congestion happens on Larkin St., right at the school entrance. |
| | | | |
| | | | |

| | | | School would like more parking and gates at school entrance and exits - neighbors park in school parking lots. Staggered school start times in place. 730 students - about 50% bused, 50% dropped off, and a few walk from |
|-------------------------------------|---------------------|----------------------------|---|
| Boronda Meadows School A | | General | Salinas Bay apartments. No students walk across Davis that principal is aware of. 8 buses on campus daily. Maybe would be better if a new staff lot was built so that drop off for parents is separated from staff lot and |
| Boronda Meadows School P | arent | General | busses. |
| Boronda Meadows School P | arent | General | Staff open campus for a brief time window which is why parents rush to drop off at the same time. |
| Boronda Meadows School P | arent | General | What will be the impact of the new housing development being built on Davis. |
| Boronda Meadows School S | Survey | General | Better if students travel on school buses more safely. |
| Boronda Meadows School S | Survey | General | Concerned about crossing by several traffic signals and excessive traffic during that time. |
| Boronda Meadows School S | Survey | General | Concerns about the climate. And if he had to walk to school he'd have to wake up really early so he can get there on time. |
| Boronda Meadows School S | Survey | General | I don't have any issues. |
| Boronda Meadows School S | iun _' ev | General | I don't think children should be walking by themselves. We don't know our neighbors and I feel more comfortable dropping and picking up my daughter to know where she is. Once I got a call from the school saying that my daughter was absent, after I dropped her off. I was terrified, I left my job crying to go to her school and know what was happening. She was there; she went to the bathroom before getting in her classroom. She was late, NOT ABSENT as they told me. I thought someone abducted her from school. So for me, to let her walk to school is not an option. |
| | | | I think that my route from home to school is too dangerous because there's lot of car activity during school |
| Boronda Meadows School S | urvey | General | schedules. |
| Boronda Meadows School S | iurvey | General | I wouldn't want my child to walk because it's a bit far for his safety. |
| Boronda Meadows School S | iurvey | General | It's far and I can't drop him off because I work. My daughter is 7 and doesn't know how to ride bike. The route is not safe an there's no path for pedestrians. I |
| Boronda Meadows School S | Survey | General | don't know anyone I can trust to take her to school. For me school bus works better because drive makes a crosswalk and it's not on the main road. |
| Boronda Meadows School S | iurvey | General | People are always in a rush and don't pay attention specially to those children not accompanied by an adult. |
| Boronda Meadows School S | Survey | General | Risk of kidnapping. |
| Boronda Meadows School S | iurvey | General | Should be more cautious when driving in a school zone. |
| Boronda Meadows School S | Survey | General | The traffic at school start time is too much and eveyone is rushing because they're running late to school or work. |
| Boronda Meadows School S | iurvey | General | There are lots of homeless people. More than anything I'm concerned about safety in Salinas when my son walks. |
| Boronda Meadows School S | iurvey | General | There are several homeless where the child needs to walk and he's afraid of them. |
| Boronda Meadows School S | iurvey | General | Well it's better to take him because it's unsafe on the bike or them walking on the street alone. |
| Boronda Meadows School S | iurvey | General | Would be good if drivers were more cordial. |
| Boronda Meadows School P | arent | N Davis Rd | No concerns crossing Davis. Feels pretty safe. |
| Boronda Meadows School S | Survey | School campus | Within the school campus there are also lots of problems when picking up my son. |
| Boronda Meadows School A | Audit | School parking lot | 2 staff controlling traffic in parking lot. Both drop-off loops used for bus drop-off, loop closest to Davis Road used for bus drop-off only. |
| Boronda Meadows School A | Nudit | School parking lot | Parents drop off in red curb zone at far west side of campus. Principal would like another crossing guard to assist those students |
| Boronda Meadows School A | Nudit | School parking lot | Parking lot and Larkin Street is very congested before and after school |
| Boronda Meadows School S | Survey | W Laurel Dr and N Davis Rd | Crosswalks on Laurel are not safe. |
| Boronda Meadows School S | Survey | W Laurel Dr and N Davis Rd | The transit crossings are too dangerous by Laurel and Davis, also the crossings by freeway onramp. |
| Cesar Chavez Elementary School S | iurvey | Del Monte Ave | Lots of traffic along Del Monte and other streets. |
| Cesar Chavez Elementary School S | Survey | Del Monte Ave and Towt St | The 4 way stop by la michoacana. There's no courtesy for both the pedestrians and drivers. |
| Cesar Chavez Elementary | Survey | Del Monte Ave and Towt St | The intersection of Towt and Delmonte gets very backed up due to people crossing all directions at once and not allowing for traffic flow. People eventually get impatient and cut between pedestrians in order to get across. There needs to be some type of control implemented for this intersection. |
| Cesar Chavez Elementary | | | So that there isn't too much congestion during drop-off, parents should drop off students then leave. I have see cars park and drivers get down to walk the students inside which creates longer traffic lines. |
| School P Cesar Chavez Elementary | arent | Drop-off loop | There are no slow down signs anywhere on any street, I. E. Galindo, C street Also crosswalks next to school |
| School S Cesar Chavez Elementary | urvey | Galindo St and C St | needs painting. |

| Cesar Chavez Elementary School | Survey | General | Gangs |
| Cesar Chavez Elementary | ou.vey | | an.go |
| School | Survey | General | Gangs on all streets. |
| Cesar Chavez Elementary School | Survey | General | I believe there needs to be public safety messages through media and schools that address the PEDESTRIAN's responsibility to look for cars before stepping out - even with a crosswalk. Messages such as "wait for the cars to pass, then step out when there is a break in traffic." or "watch the traffic when in a crosswalk and don't assume the car that's coming sees you." Also, sometimes cars will stop in anticipation of someone who hasn't started to step out yet, and it causes confusion for other drivers who may not see why they stopped, causing potential accidents. |
| Cesar Chavez Elementary | | C | |
| School Cesar Chavez Elementary | Survey | General | I would like to see more safety at crossings for students. I would love for there to be some type of blinking crosswalk in place for people to stop and know through the |
| School Cesar Chavez Elementary | Survey | General | blinking lights that people are walking |
| School | Survey | General | It's a far distance and kids should wear masks. |
| Cesar Chavez Elementary School | Survey | General | It's unsafe with all the crime. |
| Cesar Chavez Elementary School | Survey | General | It's unsafe with others being in gangs. |
| Cesar Chavez Elementary School | Survey | General | Keep alls informed about what to do if they are in danger, or if a stranger try to give them or take them. Keep police around, so they can be alert from any danger. |
| Cesar Chavez Elementary School | | General | Lots of traffic. |
| Cesar Chavez Elementary | Survey | | |
| School Cesar Chavez Elementary | Survey | General | Make flyers or make meetings about safety after school |
| School Cesar Chavez Elementary | Survey | General | More safety at crossings so children can arrive home safely. |
| School Cesar Chavez Elementary | Survey | General | Pedestrian crossings |
| School | Survey | General | She is too young to walk home alone |
| Cesar Chavez Elementary School | Survey | General | Streets are unsafe |
| Cesar Chavez Elementary School | Survey | General | The crosswalks and the amount of people speeding down long stretches of road |
| Cesar Chavez Elementary | | | The entire city complains about the amount of cars on the street. We need cross walkers everywhere, not just the nice neighborhoods. And the entire city complains about the homelessness. City has all the |
| ccsar chavez Elementary | | | |
| School Cesar Chavez Elementary | Survey | General | "recommendations" they need but don't do anything about them. There needs to be pedestrian safety taught from a young age and also a community based program to teach |

| Citywide Comment | Department | Citywide | Drivers don't always respect bus flashing lights, especially on North Main |
| citywide comment | SRUSD | CityWide | Parents will park across the street from the bus stop and run across to get their students. If they see parents |
| | Transportation | | across the street, bus drivers will get out and act as crossing guard to help students across the streets – but |
| Citywide Comment | Department | Citywide | they usually don't have time, parents run across. |
| | SRUSD | | |
| 6 | Transportation | C' | Some parents whos kids miss the bus will follow the bus and try to get their kids on there – honk at the buses |
| Citywide Comment | Department Resident (Los | Citywide | bus drivers are not legally allowed to stop outside of designated stops. |
| | Abuelitos | | |
| Citywide Comment | Senior Center) | Driveways along Market St | Daylight requests. Visibility difficult with cars parked up to driveway |
| • | , | , <u>, , , , , , , , , , , , , , , , , , </u> | All sidewalks need ramps in Salinas. Too many sidewalks leading into crosswalks have a "walled" curb. They |
| Citywide Comment | Survey | General | need to be "ramped" leading into a crosswalk. |
| Citywide Comment | Survey | General | Availability of adult volunteers along frequently used routes, not only in front of schools. |
| Citywide Comment | Survey | General | Better signage and lights at crosswalks when students are crossing. |
| Citywide Comment | Survey | General | Blind turns. There should be more red paint on sidewalks so cars can see arournd turns easier and quicker. |
| Citywide Comment | Survey | General | Crossing streets should have lit up things in the road, like they do near the courthouse. |
| Citywide Comment | Survey | General | Driver awareness, patience and good visibility around other cars. |
| | | | |
| Citywide Comment | Survey | General | drivers not paying attention and driving too fast. Kids crossing the street without looking out for traffic. |
| St. 11 S | • | | I don't live in Salinas but having to drive through town I would think there would be more crosswalks with |
| Citywide Comment | Survey | General | flashing lights to warn drivers when somebody is crossing. |
| Citywide Comment | Survey | General | I don't think any child should walk or ride bikes to school, as it is not safe from predators, gangs, and traffic - there should be school buses |
| Citywide Comment | Survey | General | I think excessive parking on our streets makes it difficult to maneuver one's car and also to see any pedestrians. |
| | | | I worry that people drive too fast and don't have time to react safely. I think school zone speed limits should be |
| | | | STRONGLY enforced and tickets given for speeding, for being on a cell phone and any general dangerous |
| Citywide Comment | Survey | General | behavior. |
| | | | I worry that people drive with fogged up windows and don't look very diligently for anyone in the crosswalk. I |
| St. 11 S | • | | also worry that people don't know the law that states you can't drive until the person is completely out of the |
| Citywide Comment | Survey | General | crosswalk. |
| | | | Lack of speed human and warning signs for drivers to slow down. Lack of crossing guards. Cracks in side walls |
| Citywide Comment | Survey | General | Lack of speed bumps and warning signs for drivers to slow down. Lack of crossing guards. Cracks in side walk and road that could cause a tripping hazard or worse for students on scooters, skate boards and bikes. |
| only made dominion. | - cu.vey | | and road that could cause a tripping nazara or noise to stadents or seconds, shall sound and sines. |
| Citywide Comment | Survey | General | Most neighborhoods don't have bike lanes and are over crowded with vehicles parked on the side of the roads. |
| | | | Police do not enforce bike laws (no helmets, no lights, no drunk while biking, jaywalking). When police choose |
| Citywide Comment | Survey | General | not to enforce laws in the community, it facilitates an unsafe environment. |
| | | | The main concern is lack of attention by some drivers and some students. Some drivers are in a hurry in the |
| Citywide Comment | Survey | General | morning and do not pay attention. And some students do not pay attention either, and just assume that the driver will stop. |
| citywide comment | Survey | GOTOTAL | The most important issue would probably be for both drivers and pedestrians to be alert, observe their speed |
| | | | and surroundings and share the road. Allow the children to cross streets safely but also let some drivers |
| Citywide Comment | Survey | General | proceed so as to not create back up of vehicles. |
| Citywide Comment | Survey | General | Traffic enforcement in school zones. |

| El Puente/Mt. Toro/Carr Lake | Staff | Sherwood Dr | Coming out of Sherwood Place to the right and left sidewalks are is very narrow and parts are made out of dirt |
| El Puente/Mt. Toro/Carr Lake | Staff | Sherwood Dr | During school time the speed limit is much slower than what is posted, Going towards South main (on Sherwood Drive) down the hill, it goes down to 35 miles and hr, but when traffic is going downhill the other way towards the school, the speed limit is 45 miles per and hr (on Sherwood Drive), cars go really fast, they go faster then 45 maybe 55. |
| El Puente/Mt. Toro/Carr | Stan | SHCIWOOU DI | Pole in sidewalk (telephone and electric) it may make it challenging for someone with a stroller or wheel-chair |
| Lake El Puente/Mt. Toro/Carr | Staff | Sherwood Dr | pass through that area. The yellow school signage, advertising a pedestrian as shown on google maps (zoomed in), has not been seen |
| Lake | Staff | Sherwood Dr | on Sherwood Drive |
| El Puente/Mt. Toro/Carr Lake | Staff | Sherwood Dr | There is not a big yellow school cross walk on Sherwood Drive, anywhere around the school. |
| El Puente/Mt. Toro/Carr Lake | Survey | Sherwood Dr | Sherwood is very busy road; cars drive too fast; not safe for kids; crossing traffic in a car is a hazard let alone on foot. |
| El Puente/Mt. Toro/Carr | C | Chamara d Da | double to the control of the control |
| Lake | Survey | Sherwood Dr | slow down traffic on Sherwood near El Puente |
| El Puente/Mt. Toro/Carr Lake | Principal | Sherwood Dr and Sherwood PI | Intersection would benefit from a stop light. There's conflict north and south bound. Drivers turning left onto Sherwood Dr need to wait in center lane until all cars pass. Sometimes the wait to turn is 10-15 minutes. |
| El Puente/Mt. Toro/Carr | · | Sherwood Dr and Sherwood | Cross walk is very light and faded, crossing from the Square to Mt Toro, pedestrians must stop constantly to |
| Lake El Puente/Mt. Toro/Carr | Staff | PI Sherwood Dr and Sherwood | make sure there are no vehicles, sidewide on Mt Toro does not exist Past safety meetings community members and parents have requested to have a stop light installed at |
| Lake | Staff | PI | Sherwood Place and Sherwood Drive. |
| El Puente/Mt. Toro/Carr Lake | Staff | Sherwood Dr Bridge | Kids walking over the bridge to Mt Toro, they are not suppose to be walking but they do in some of these areas, farmers call the school principal because the kids are walking through the fields to get to school at Toro, at the Carr Lake field, and there are neighboring fields all around the school campus |
| El Puente/Mt. Toro/Carr Lake | Audit | Sherwood Drive | No school speed limit signs in place. No lighting for students walking |
| El Puente/Mt. Toro/Carr Lake | Audit | Sherwood Drive | Chi danta hilian an sidayalli |
| El Puente/Mt. Toro/Carr | Audit | Sherwood Drive | Students biking on sidewalk Traffic on Sherwood before and after school, backs up to Bernal Drive. Buses get stuck in traffic waiting to turn left into school. |
| Lake El Puente/Mt. Toro/Carr | Audit | Sherwood Drive | Tell Into School. |
| Lake | Audit | Sherwood Drive | MST stop in right turn lane south of Sherwood place - bus blocks right turning traffic |
| El Puente/Mt. Toro/Carr Lake | School Security Guard | Sherwood PI | There's flooding between Natividad and El Puente. Will that be addressed. Also, There has been four major accidents within the last month and a half. |
| El Puente/Mt. Toro/Carr | C+-# | Chamara d DI | Nord to odd street brown to the street growth and the |
| Lake El Puente/Mt. Toro/Carr | Staff | Sherwood PI | Need to add street bumps to the streets near the schools. The Village crossing to the Education Center needs a cross walk, unclear if this sidewalk needs to be repaired in |
| Lake | Staff | Sherwood PI | this area |
| El Puente/Mt. Toro/Carr Lake | Staff | Sherwood Pl | Unsafe to cross the street to get to the other side of campus, because there are various programs with different start and stop times and people are coming in and out through-out the day, there are a couple of times when I have seen a lot of traffic and people are not paying attention to pedestrians |
| El Puente/Mt. Toro/Carr Lake | Audit | Sherwood Place | Crosswalk very faded, student hit in crosswalk. Students crossing between adult school campus and the Village. |
| El Puente/Mt. Toro/Carr | | | |
| El Puente/Mt. Toro/Carr Lake | Audit | Sherwood Place Sherwood Place | Difficult to turn left out of school parking lot No sidewalk on north side near Sherwood Drive |
| El Puente/Mt. Toro/Carr | | | |
| Lake El Puente/Mt. Toro/Carr | Audit Salinas Parole | Sherwood Place | Some speeding, large trucks parking overnight |
| Lake | Officer | Work path near Cassentini St | Homeless incampment has turned very big recently by the bridge. |
| El Sausal Middle School | Audit | Alisal St and Towt | Signalized intersections, new curb extensions in place |
| El Sausal Middle School | Audit | All streets near school | Speeding is an issue on Alisal, Eucalyptus and Towt |
| El Sausal Middle School | Parent | Connely St | Drivers don't respect the crosswalk and don't give students the right of way. Would be good to have a signal here. |
| El Sausal Middle School | Parent | E Alisal St | Cars don't respect the crosswalk and students should be more careful. Students will sometimes cross without looking when it's the car's turn to go. |
| | | | |

| El Sausal Middle School | Principal | E Alisal St | Parents drop of students where they can. Staff recommends that students be dropped off on school side but it depends on where parents are coming from. Students dropped off across the street just run. Students walking without looking and they do not use the cross walk. |
|-------------------------|-----------|--|---|
| El Sausal Middle School | Principal | E Alisal St | The morning and after school times are hardest times In front of school on E Alisal St, that is always difficult no matter the time. Suggestion to put a sign that reminds drivers to lower speed on E Alisal St. There are 4 lanes and people feel like they are on a freeway. |
| | | | This street is dangerous. Students run from Foods Co. and then back. Street is very wide and the only crossing |
| El Sausal Middle School | Staff | E Alisal St | is at the signal. Many cars also make u-turns near the intersection. Again its probably just that people don't really adhere to the signs and designated walking areas. It's extremely |
| El Sausal Middle School | Survey | E Alisal St | frightening to see children darting in the middle of the road. I don't have any children of my own, but I notice a lot of children walk by themselves or in small groups to |
| | _ | | school and home. I notice on Alisal Street (Specifically in the area of Foods Co and El Sausal) A LOT of children cross between the cross walk on either ends, sometimes without even looking. I have seen them almost get hit |
| El Sausal Middle School | Survey | E Alisal St | because of this. |
| El Sausal Middle School | Survey | E Alisal St and Sanborn Rd and John St and Williams Rd | Busy intersections on commercially busy streets including E. Alisal, Sanborn Road, John St., and Williams Road. |
| El Sausal Middle School | Parent | E Alisal St and Towt St | Most people cross here. |
| El Sausal Middle School | Staff | E Market St | There is an improvement due to the lights and bike lanes. This has helped a lot with traffic. Important for El Sausal Middle School students since students go by Towt St. and cross street there as they head to Laurel. |
| El Sausal Middle School | Audit | East Alisal Street | Lots of parents dropping off students. Parents park in bus stop or double park in front of school. City gives tickets occasionally. |
| | | | |
| El Sausal Middle School | Audit | East Alisal Street | Lots of students crossing Alisal in front of school to go to Foods Co |
| El Sausal Middle School | Audit | Eucalyptus Dr | Lots of parent drop-offs Near the gym gets a bit dangerous and would be good to have a crossing with lights because students cross |
| F10 1141111 01 1 | . | | looking down and cars try to speed up to get out of the congestion. Students are dropped off on both sides of |
| El Sausal Middle School | Parent | Eucalyptus Dr | the street. Would also like to see buses picking up at Rider. There is no crosswalk here. Everyone needs to cross on Towt St. but no one respects this even though there is a |
| El Sausal Middle School | Principal | Eucalyptus Dr | sign there. Not the students nor the community. |
| El Sausal Middle School | Survey | Eucalyptus Dr | Should install speed bumps so that cars go slower especially on Eucalyptus Dr where I live. I see lots of speeding cars and they don't respect when students cross the street and cars are parked with people living in them. They go to the bathroom on the street so that stretch of street is very dirty near the gym. |
| El Sausal Middle School | Survey | Eucalyptus Dr | What worries me most is that cars go by too fast and are not careful when children are crossing at Eucalyptus Dr and there are too many parked cars where people are actually living in the cars near school near the gym. |
| El Sausal Middle School | Audit | Eucalyptus Dr and Connely | Lots of students crossing, drivers not yielding to pedestrians. Transverse crosswalk in place |
| | | | 1078 students. Only a few students bused - special ed and students from outside town. Some students take MST bus. About 30 students bike - they have bike racks and skateboard racks on campus. The rest walk or are |
| El Sausal Middle School | Audit | General | dropped off. Students walking generally coming down Alisal or down Towt |
| El Sausal Middle School | Audit | General | Homeless people parking near school is a concern. Girls get harassed on their way to school. |
| El Sausal Middle School | Audit | General | No drop-off loop on campus, and very little parking. Buses drop off on Towt adjacent to school. School entrances on Alisal, Towt and Eucalyptus. No crossing guards. |
| El Sausal Middle School | Parent | General | Alisal is an area with lots of worries. |
| El Sausal Middle School | Principal | General | City of Salinas had a meter citation and they have a device where they take a photo of the license plate. |
| El Sausal Middle School | Staff | General | 1194 students |
| | | | |
| El Sausal Middle School | Survey | General | Afraid he'll get hit by a car. |
| El Sausal Middle School | Survey | General | Afraid that my son will be hit by a car. |
| El Sausal Middle School | Survey | General | At crossings with signals cars sometimes don't give them the right of way. |
| El Sausal Middle School | Survey | General | Concerned about speeding cars |
| El Sausal Middle School | Survey | General | Concerned about street crossings |
| El Sausal Middle School | Survey | General | Crime safety |
| El Sausal Middle School | Survey | General | Drivers should be aware and respect the fact that it's a school zone. |
| El Sausal Middle School | Survey | General | Gangs |
| El Sausal Middle School | Survey | General | Homeless and gangs |
| El Sausal Middle School | Survey | General | I would like to see more speed bumps and am interested in participating as a parent to promote more information about these improvements. |
| | | | |

| El Sausal Middle School | Survey | General | It is too far for her to walk on her own and too hard to ride a bike as she carries an instrument in addition to her school supplies |
|---------------------------|--------|---------|---|
| El Sausal Middle School | Survey | General | It's a high traffic area and drivers don't respect right of way. |
| El Sausai Filidate School | Survey | deneral | |
| El Sausal Middle School | Survey | General | Just a general Salinas concern, more light-up crosswalks. As a driver without kids, these really help draw more attention especially if there is a parked car making it difficult to see if anyone is trying to cross the road. |
| El Sausal Middle School | Survey | General | less cars more distance within each individual and car |
| El Sausal Middle School | Survey | General | Long walk to get to school |
| El Sausal Middle School | Survey | General | Lots of traffic and there should be an area designated for bikes. |
| El Sausal Middle School | Survey | General | Lower speeds in school zones. |
| El Sausal Middle School | Survey | General | More patrolling in the school bus stops |

| El Sausal Middle School | Survey | General | Worried about drivers who speed |
|---|----------------|---|---|
| El Sausal Middle School | Survey | General | Worried when my child walks to school. |
| El Sausal Middle School | Survey | General | Would like if police would patrol school surroundings. |
| El Sausal Middle School | Audit | Market Street | SRTS improvements recently installed |
| El Sausal Middle School | Parent | Towt St | There's only one main entrance and there's lots of traffic on Towt St in the morning and children just run across. |
| El Sausal Middle School | Principal | Towt St | MST brings students by cafetería by Towt St. Bus passes at dismissal time. Parents get there and they make double or triple lines. |
| El Sausal Middle School | Staff | Towt St | School buses park here in the mornings. Larger buses for field trips park on Eucalyptus. |
| El Sausal Middle School Everett Alvarez High | Staff | Towt St and Eucalyptus Dr | Lots of parents pull over and drop off students around this intersection. |
| School | Audit | Boronda Rd | Traffic backed up on Boronda. Cars parked on Boronda to drop off students, students running across Boronda |
| Everett Alvarez High School | Survey | Bradbury St | Hybrid Crosswalk Needed on Bradbury St. & Nantucket St.and a roundup on Hemingway Street I witness speeding cars each morning through my bedroom window! If the two items wont get installed soon there will be a car accident with students walking to school. "Urgently Needed" I hope someone leasons to the concerned parents! Make this happen city of Salinas. |
| Everett Alvarez High School | Parent | Bus loop | Buses enter from Nantucket and exit on Independence where they encounter congestion. |
| Everett Alvarez High School | Survey | Bus loop | where the bus enter to drop off students. THERE SHOULDN'T be cars parking on the side or dropping off. The is a tight fit for cars to pass and for the bus turn into the school |
| Everett Alvarez High | · | Danbury St and | Coventry is popular place for student parking. RRFB in place at Independence Blvd crossing, which has helped a little but cars still don't always stop. No crossing guard currently. Students biking through crosswalk. Marked |
| School Everett Alvarez High School | Audit | Danbury St and Independence Blvd | crosswalk 1 side, students cross both sides. Definitely need a stop light or controlled stop at intersection of Independence Blvd and Danbury Way. When the students get out of school, they do not yield to traffic. They walk across the street not checking for oncoming cars. They assume the cars will stop for them. Students just keep walking across with no regards to drivers. |
| Everett Alvarez High School | · | Danbury St and | Make the entrance and exit (Danbury and Independence intersection) an all and 4 way stop. So that traffic can flow better rather than cars pulling out of the parking have to fly out bc cars driving straight toward boronda |
| Everett Alvarez High School | Survey | Independence Blvd Danbury St and Independence St | drive too fast. Would be helpful to have crosswalk push button ahead of the Stop Sign on Danbury St to make people crossing more visible. |
| Everett Alvarez High School | Survey | E Boronda Rd | Boronda and all streets around Everett Alvarez High School need work for the safety of our children. Just like Alisal High has improved their roads and made it safe for students we need that to. |
| Everett Alvarez High School | Survey | E Boronda Rd | Expand Boronda to four lanes. |
| Everett Alvarez High School | Survey | E Boronda Rd | Riding a bike for my Christmas le would be a no. Because Boronda Road and Independence Road is very bad all day there's no clear roads racing takes place and no cross lights for our children. |
| Everett Alvarez High School | Survey | E Boronda Rd | too much traffic on Boronda Rd. |
| Everett Alvarez High School | Cuminu | E Boronda Rd | Widen Boronda!!! |
| Everett Alvarez High School | Survey | E Boronda Rd and Natividad Rd | Seems like congestion here has increased with the opening of Rancho San Juan, adding to traffic going to Alvarez. |
| Everett Alvarez High School | Survey | E Boronda Rd and Natividad Rd | Really need double lanes on boronda rd to ease traffic going thru and traffic turning into the school which backs up really bad thru Natividad rd. |
| Everett Alvarez High | -uy | Front of school and | |
| School | Parent | Roundabout | Lots of congestion here as parents try to enter and exit. 2,700 students. 13 buses - roughly 20% of students bused, 40% walk, 40% dropped off. 25-50 students bike |
| Everett Alvarez High School | Audit | General | or skateboard. Bike and skateboard parking present on campus. Some students take MST bus, stops on Independence |
| Everett Alvarez High School | Audit | General | Buses enter from Nantucket and exit on Independence where they encounter congestion. |
| Everett Alvarez High School | Audit | General | Students walking to school from all directions |
| Everett Alvarez High | | | I don't have to walk to school but from what I can see, I'm concerned about the walking routes to my school because there aren't any designated sidewalks to get to the street that does have sidewalks Personally, I've never had to walk to school as a highschooler. However, when I was younger and lived in apartments, walking |
| School Everett Alvarez High | Student Survey | General | home from school was my only source of transport. |
| School Everett Alvarez High | Student Survey | General | I dont know how to drive and the school is far from my home . |
| School Everett Alvarez High | Student Survey | General | Not after I moved. |
| School | Student Survey | General | Safety since we have to cross a street that's always full and it's very unsafe to cross. |
| Everett Alvarez High School | Student Survey | General | When I leave school, it takes me a long time to be able to cross the cross walk on Independence Blvd in front of Everett Alvarez High school. It takes a long time for the drivers to stop or see a student crossing. |

| Everett Alvarez High | | | |
|---------------------------------|--------|------------------------------------|---|
| School | Audit | Nantucket and New Haven | Lots of students crossing at bus entrance. |
| Everett Alvarez High School | Audit | Nantucket Blvd | Bus entrance. Parents park on street before and after school, block bike lane and bus entrance. Students biking on sidewalk. |
| Everett Alvarez High | | | |
| School Everett Alvarez High | Audit | Nantucket Blvd | Lots of parents making U-turns after drop-off |
| School | Audit | Nantucket Blvd | School staff thinks it would help to add entrance to parking lot off Nantucket Blvd. |
| Everett Alvarez High School | Parent | Nantucket Blvd | Kids on bikes not wearing helmets!!! Parents at EAHS parking and stopping and turning illegally on Nantucket |
| SCHOOL | rarent | Nantucket bivu | causes really bad traffic problem and is unsafe. A lot of parents drop off high school kids on Nantucket st. (Side of Alvarez high school) and cause a back up |
| Everett Alvarez High | | | line and traffic and kids seem to walk between cars and risk to get hit by other cars while crossing from other |
| School | Survey | Nantucket Blvd | side of street. This needs to be addressed. |
| Everett Alvarez High School | Survey | Nantucket Blvd | By Nantucket, the fence is damaged with a big hole. Big safety concern. Also, with all the issues of violence that surround us, why not put metal detectors at entrances of school. Review your incident reports. |
| Everett Alvarez High | | Newtoniet Phys | I would like to see the easment adjacent to the school on Nantucket and Independence to be adjusted to include several more drop off locations that allow for traffic to continue flowing. The issue with this area is the close proximity of three schools (2 elementary and 1 high school) along with there only being one exit to the Danbury court area and only 3 for residents near Steinbeck elementary. It is clear that the Creekbridge Development planners never considered this. Perhaps the city should seek financial relief from them for these |
| School | Survey | Nantucket Blvd | adjustments. |
| Everett Alvarez High School | Survey | Nantucket Blvd | Nantucket should be expanded if possible. Boronda road needs to expanded to 4 lanes with additional turn lanes to help with traffic flow. Roundabouts would only add to traffic at Boronda road and Independence. |
| Everett Alvarez High School | Survey | Nantucket Blvd | Parents dropping off children down Nantucket Blvd and pulling over to the side and other cars are going around while Students are crossing from all directions. If there was a drive through drop off that would make it entry way for parents to drop off the kids. Even if there has to be a route through the actual school. Too many parents are going in and out of road. |
| Everett Alvarez High | Curroy | | |
| School Everett Alvarez High | Survey | Nantucket Blvd | The parking issue along Nantucket |
| School | Survey | Nantucket Blvd | Too many cars and children crossing in all directions on Nantucket blvd. |
| Everett Alvarez High | | Nantucket Blvd and | |
| School Everett Alvarez High | Survey | Hemingway Dr Nantucket Blvd and | Consider another roundabout on Nantucket and Hemingway dr Hemingway and Nantucket! I can see people blow thru the intersection. I bet cars don't stop for kids crossing. |
| School | Survey | Hemingway Dr | Plus tell people stop using Whitman St as a short cut! |
| Everett Alvarez High School | Survey | Nantucket Blvd and Hemingway Dr | Roundabout or light at Hemingway |
| Everett Alvarez High | • | | Concerned that she'll walk through Natividad Creek park and will be met by someone smoking marijuana or |
| School Everett Alvarez High | Survey | Natividad Creek Park | other bad habits. |
| School | Survey | Natividad Rd | Speed of traffic along Natividad is excessive. The side walks are very narrow making it hard for multiple walkers |
| Everett Alvarez High School | Audit | Natividad Rd and Emerald | Students crossing, no marked crosswalk. Lots of speeding traffic. |
| Everett Alvarez High | | | Student crossing the street and going into the school through New Haven Way and the field causes traffic as |
| School | Parent | New Haven Way | this road also leads to Steinbeck Elementary School and parents drop off their children I would like to see more crossing guards along routes to schoolsI think this would establish presence in the |
| Everett Alvarez High School | Survey | Rider Ave | area, and make them safer over time for kids to walk to school. My kid will usually walk down E Boronda from Ryder to get to Everett Alvarez, and there are a lot of street crossings there where drivers pull up to the stop sign quickly, and sometimes stop over the line. |
| | | | |
| Everett Alvarez High | | | There isn't a 4 way stop on Saratoga and Cambrian so cross traffic tends to fly thru the turn. On the way to school people will not make complete stops and I have seen children get hit on several occasions. Luckily it hasn't been anything major since they did have a stop and even though they rolled thru their speed was low. And most kids have been on bikes. It's usually the four way stop by the school where it happen. The side of the football field . Independence and There isn't a four way stop to be able to turn into the schools parking lot either so in the mornings and after school people do get tired of the long wait to turn and just tend to speed thru the traffic. Putting kids and other drivers at risk. But we also can't have children walking non stop and not |
| School Everett Alvarez High | Survey | Saratoga Dr and Cambrian Dr | getting the cars thru. So a cross guard would be nice. A light at the parking lot entrance, especially if Inglewood opens and roundabouts are installed. Students get |
| School | Survey | School Frontage | nearly run over daily. |
| Everett Alvarez High | | | Crear otra entrada en para el estacionamento en la escuela. Esto causaria que el trafico flueyera mas rapido a la hora del amuerzo y la salida. Hay tiempos donde terminamos saliendo despues de las cuatro porque solamente |
| School Everett Alvarez High | Survey | School Frontage | hay una salida para todos los automoviles incluyendo los autobuses escolares. entrance to school is too close to boronda which causes more traffic with people trying to get in the gate and |
| School | Survey | School Frontage | people trying to get out of independence. |
| Everett Alvarez High School | Survey | School Frontage | Have staff directing traffic and students through cross walks and entrences |
| Everett Alvarez High | • | | · |
| School Frank Paul Elementary | Parent | Student Parking Lot | No safe area for peds to cross from parking lot onto campus. |
| School | Audit | Antigua Ave | Lots of traffic going to middle school, visibility issues at Bernardo Ave crosswalks. Xing guard stationed here. |
| Frank Paul Elementary School | Survey | Antigua Ct | The adults working at school do a great job at helping my daughter cross at Antigua Ct. |
| | | | |

| Frank Paul Elementary School | Survey | Cottonwood St | The fast and unsafe traffic and individuals parking on cottonwood smoking or drinking |
|---------------------------------|---------|---------------------------------|---|

| Harden Middle School | Survey | General | I would like if there were police officers outside of schools so students could feel safe. |
|---|---|---|--|
| Harden Middle School | Survey | General | I would like it if there were more security in the streets. In my case he's a teenager so my concern is that someone will offer him drugs and sometimes there are fights |
| Harden Middle School | Survey | General | outside of school. |
| Harden Middle School | Survey | General | Intersection with 4-way stops. |
| Harden Middle School | Survey | General | Long distance and safety |
| Harden Middle School | Survey | General | Mainly her being by herself to and from school. |
| Harden Middle School | Survey | General | More police patrolling the streets. |
| Harden Middle School | Survey | General | More school security even before students arrive to school. |
| Harden Middle School | Survey | General | More security |
| Harden Middle School | Survey | General | More security inside and outside of school campus. |
| Harden Middle School | Survey | General | More security inside and outside of school campus. |
| Harden Middle School | Survey | General | Most important is the speed of traffic. |
| Harden Middle School | Survey | General | People with bad intentions may offer bad things to my son. |
| Harden Middle School | Survey | General | People with bad intentions. |
| Harden Middle School | Survey | General | Please consider the survey and the concerns. |
| Harden Middle School | Survey | General | Police patrol presence during dismissal times. |
| | , | | Salinas could easily become a bike friendly hub and example of moving forward towards a more sustainable |
| Harden Middle School | Survey | General | future with bike culture as a component. |
| Harden Middle School | Survey | General | Sometimes drivers don't respect nor give the right of way to pedestrians or students. |
| | , | | Speed of cars in the high traffic streets. Distracted drivers and possible predators on the walk or bike to school |
| Harden Middle School | Survey | General | over 3 miles from the house. |
| Harden Middle School | Survey | General | speed of traffic in neighborhoods, broken glass and trash along paths and graffiti |
| Harden Middle School | Survey | General | Speeding |
| Harden Middle School | Survey | General | Speeding |
| Harden Middle School | Survey | General | Speeding |
| Harden Middle School | Survey | General | The crossing where drivers don't give right of way to students and students are very distracted. |
| Harden Middle School | Survey | General | There should be a school staff to help students cross safely and police to control traffic. |
| Harden Middle School | Survey | General | They don't respect the speed limit around the school. |
| Harden Middle School | Survey | General | Traffic |
| Harden Middle School | Survey | General | Traffic control. Have a safety blinking lights when kids are crossing. |
| | | | |
| Harden Middle School | Survey | General | Traffic, but most important as a little girl she needs to feel no one will bug her on the way to school. |
| Harden Middle School | Survey | General | Traffic, no side walks |
| Harden Middle School | Audit | Harden | |
| Harden Middle School | Audit | Harden and McKinnon | Giant intersection, students crossing |
| | | Maryal Dr and High School | |
| Harden Middle School | Parent | Alley | Lots of trash, not enough lighting, people hanging out, generally feels unsafe for students. |
| Harden Middle School | Audit | McKinnin | Wide sidewalk, broken in some places. |
| | | | Lots of students biking and skateboarding to school, using both street and sidewalk. Safe bike routes to campus |
| Harden Middle School | Audit | McKinnon | are a priority for the school. Buffered bike lanes in the works on Alvin. |
| | | | All recommendations look good to me, but here in the U.S. the best option is a traffic signal. A roundabout |
| | | | would create other issues. Many people don't know how to use them. I appreciate all the information because |
| Harden Middle School | | McKinnon and Harden | it's something needed. |
| | | | Main school crosswalk. Constant stream of students blocks traffic during drop-off and pick-up. When McKinnon |
| | | | is not congested, drivers speed and don't always realize they're approaching a crosswalk - dangerous for kids |
| Harden Middle School | Audit | McKinnon and Westminster | crossing after sports practice etc. |
| | | | Really bad traffic congestion for about 15 mins before and after school. Drivers speeding outside of main drop- |
| | | | off times. 35 mph speed limit. Drivers park to drop-off students, students run across street, and some parents |
| Harden Middle School | Audit | McKinnon St | drop off in the travel lanes. |
| | | | The street across Harden is very dangerous. People don't respect when kids are crossing. The lane becomes two |
| Harden Middle School | Survey | McKinnon St | lanes when it's only one. There have been ran overs and accidents. |
| Harden Middle School | Survey | Mendocino St | There isn't enough supervision along Mendocino. |
| | | | I would like my child to bike; however he would have to bike down Main street and the speed of traffic and |
| Harden Middle School | Survey | N Main St | safety are a concern to me. |
| | _ | | My child would need to cross north main st & its very busy & people don't take into consideration that children |
| Harden Middle School | Survey | N Main St | are out early morning or late afternoons trying to get to & from school. |
| | | | |
| | _ | | |
| Harden Middle School | Survey | N Main St | Walking on North Main Street and having to cross the street and doesn't seem safe for a 13 year girl. |

Kids who live on Baldwin St, at the trailer park and apartments have to cross the super busy street of Laurel Dr. with no good way of getting across. I have seen them every morning fighting for their lives trying to get across. |
| Harden Middle School | Survey Survey Audit Audit Audit Audit | N Main St and W Bernal Dr and Lupin Dr and Iris Dr and Navajo Dr Natividad Rd and Los Coches Ave North Main School campus School campus School campus | The traffic, speed and also the amount of homeless encampments. No reliable cross walks for children or adults to cross safety. North Main, Bernal, Lupin, Iris and Navajo. Crossing at Natividad and Los Coches Some students crossing, high traffic speeds Larger parking lot used for parent drop-off. 1 drop-off lane and 1 through lane. No staff controlling traffic, functions pretty well. Parents turning left out of drop-off loop backs up traffic. School met with the City a few years ago and were told that they couldn't do a right turn only lane. Small loop at south end of campus is reserved for buses, gated to prevent parent access. Used to have a volunteer crossing guard but she quit because she felt unsafe. Cars parked at NE corner on Rochex block visibility of crosswalk. Cars exiting school driveway can't see pedestrians waiting to cross. Kids who live on Baldwin St, at the trailer park and apartments have to cross the super busy street of Laurel Dr. |

| Henry Kammann School | Survey | Cherokee Dr | Cars speed down Cherokee Dr. Parents driving near the school do not follow road rules. |
|----------------------|-----------|--------------------------|--|
| · | , | | Walking to school is the exception, not the norm. Kids just don't walk or bike to school regularly, so I would be very concerned sending my 9 year old to school walking by himself, especially since there are no other kids around. Also, on Cherokee and Adams street there are a lot of cars that speed drive and many many houses, that I'd be afraid that my child could be easily hit by traffic or by cars pulling out the driveway. Another issue is dogs. There are plenty of houses on those streets that have dogs and I've even seen some loose, so I'd be afraid |
| Henry Kammann School | Survey | Cherokee Dr and Adams St | of a dog attack incident happening. |
| Henry Kammann School | Parent | Front of school | parents are dropping kids off on the street. Despite the 4 way stop sign. cars inpatient. They drive in there like a freeway. The flashing lights would help these intersections in front of the school Rochex Ave. and Tyler St. A signal light so we can cross the street. Would be marvellous to have safe pedestrian crosswalks on these |
| Henry Kammann School | Survey | Front of school | streets. |
| Henry Kammann School | Survey | Front of school | Speeding and parents dropping off students in the middle of the Street. and cars dont stop at crosswalks when kids trying to cross School staff estimates 60-70% walkers. About 10 students biking. No buses except a few to after-school |
| Henry Kammann School | Audit | General | programs. No staggered start times. |
| Henry Kammann School | Parent | General | A walking field trip for parents would help many parents paying attention to the dangers. |
| Henry Kammann School | Parent | General | Carpool together with parents has been done together with other parents who know each other has been done before at other schools. |
| Henry Kammann School | Parent | General | Salinas PD has had some presence on some days, and those days are good, but when they are not here everything goes back to chaos. |
| Henry Kammann School | Parent | General | The kids are being dropped off on the bus zone and teachers parking. Parents always rushing, |
| Henry Kammann School | Parent | General | They need to come and start giving parents tickets, that would change things. |
| Henry Kammann School | Principal | General | Parent education would possibly help the parent's dissonance when dropping kids off improperly and speeding in the school zone. |
| Henry Kammann School | Principal | General | There is a bus for the kids who attend the boys and girls club. |

| Henry Kammann School | Survey | General | I'm concerned on leaving my daughter by herself and someone kidnapping her. |
| Henry Kammann School | Survey | General | I'd like to see crossing guards and more police or private security patrol before and after school. |
| Henry Kammann School | Survey | General | I'd like to see crossing guards and more police or private security patrol before and after school. |
| Henry Kammann School | Survey | General | It will be safe if there is a crossing guard at three streets around school and a traffic control person in the school parking (front entrance). The traffic is heavy and dangerous for little ones that walk to school and for the ones that get drop off in the street. It will save life's and educated parents to take an extra time to get to school before the last bell rings and also pick up on time. Most of the time parents are rushing to get to work or return to work on time and with crazy traffic around school, they just drop off students in the nears street. With a traffic control person it will be a big help to have safer environment. I live a cross the street from School and see many bad and sad incidents. Thank you in advance for considering my opinion. |
| Henry Kammann School | Survey | General | Kidnapping, traffic. More crossing guards, more parents on the route. |
| Henry Kammann School | Survey | General | More Police presence to stop speeding and Street markers for bike lanes, painted intersections for pedestrians. |
| Henry Kammann School | Survey | General | Mostly my concern is about safety and crime. We don't know what's lurking out there. |
| Henry Kammann School | Survey | General | My son loved to walk |
| · | • | | |

| Henry Kammann School | | | |
| Henry Kammann School | Parent | Rochex Ave | Some speeding Crossing streets all throughout Rochex Ave cause some people don't know how to be careful when children are present. Advice parents to be more careful when driving around the school zones & have cross guards out a |
| Henry Kammann School | Survey | Rochex Ave | little more |
| Henry Kammann School | Parent | Rochex Ave and 4th St | Make a 3 way stop in front of the school in front of the park |
| Henry Kammann School | Staff | Rochex Ave and 4th St | Have one crosswalk by the park, but it is in a blindsided area |
| Henry Kammann School | Parent Coordinator | Rochex Ave and N 4th St | Students have been hit by cars at this intersection in the past. Don't recall details. |
| Henry Kammann School | Parent Coordinator | Rochex Ave and Tyler St | Students have been hit by cars at this intersection in the past. Don't recall details. |
| Henry Kammann School | Survey | Rochex Ave and Tyler St | For the safety of our students, we really need speed bumps on Tyler and on Rochex. Adding a center stop sign would help deter illegal driving as well as encourage full stops. |
| | | | |

| Henry Kammann School | Survey | Rochex St and Fourth St | My son walks to school but crossing the street is always dangerous (Rochex St. & Fourth St.) vehicle drivers don't respect pedestrians. Kammann School needs a cross guard or Police officer supervision before and after school at least for 20 min. so drivers can respect pedestrians. |
|--|-----------|------------------------------------|--|
| Henry Kammann School | Principal | School boundaries | Students south of Laurel Dr. must attend Boronda Meadows unless they request intra-district transfer. |
| Henry Kammann School | Audit | School campus | 2 drop-off loops. No staff supervision of loops. Parents park in loops and walk in. Parking lots used for staff and parent parking. 1 entrance to school and 3 exits, all at front of school. |
| Henry Kammann School | Audit | School Drop off loop | No staff during drop off or pick up hours |
| Henry Kammann School | Survey | School Entrance | Put more restrictions at the school entrance since cars accumulate and not all children are cautious. |
| Tierry Naminanii School | Survey | SCHOOL EHITAIRE | There should be someone in the parking lot and advising people to park in the street if parking lot is full. Not |
| Henry Kammann School | Survey | School parking lot | allowing people to make lines in non parking zones are full or behind cars that are park and hard to get out. It'll be safer for the children if parking lot is used the right way. |
| Henry Kammann School | Parent | School perimeter | I would feel more comfortable if there were items slowing traffic down around the school perimeter. |
| Henry Kammann School | Survey | School perimeter | Can we have speed bumps in the perimeter of our school. |
| Henry Kammann School | Survey | School perimeter | Need more guards in all crossing lines around school. |
| Henry Kammann School | Principal | School surroundings | Lots of students and families walk to school. |
| Henry Kammann School | Survey | School surroundings | Walking or biking was an issue after school because some drivers rushed to much through the school. |
| Henry Kammann School | Survey | Tulane St and Adams St | There is no sidewalk once you cross Adams St. on Tulane St. We need crossing guards because without them children have been hit by cars. |
| Henry Kammann School | Audit | Tyler and Laurel | Students crossing here, safer because of signal |
| Henry Kammann School | Audit | Tyler and Rochex | Crossing guard present. Drivers don't respect crosswalk, do California stops even when pedestrians are crossing. Offset intersection, visibility is low for drivers - especially for southbound traffic turning right from Rochex onto Tyler |
| Henry Kammann School | Parent | Tyler St | 2 accidents on Tyler St. with students from Kamman Elementary |
| Henry Kammann School | Parent | Tyler St | Yes. One of my girls from volleyball almost got hit last year (Tyler right, where the second-grade class is at). |
| | | | |
| Henry Kammann School | Principal | Tyler St | You cannot, park on Tyler st. street or you get a ticket. Tyler St is a speedurar cars are moving so fast you can't see anyone coming |
| Henry Kammann School | Principal | Tyler St | Tyler St is a speedway, cars are moving so fast you can't see anyone coming |
| Henry Kammann School Henry Kammann School | Survey | Tyler St | 4 stops traffic on Tyler it is crazy and havy during school hours No cross walks . Cars drive really fast on Tyler st. Parents are always trying to push through the traffic. Last year a child got hit by a car and that was enough to validate my feeling about my child walking to school. Even though we live 5 minutes walking distance. We need cross walks , more speed bumps , cops to give out tickets in that area |
| | Teacher | | |
| Henry Kammann School | | Tyler St. and Barbay Ave. | Need speed bumps between Tyler St. and Laurel Dr. and Tyler & Rochex Ave. And Infront of the school. There are many speeding drivers on Tyler Street and Rochex Avenue. Speed bumps here are essential to keep our students safe. When lunch pick up happens, you can see people speeding down the street which also has a blind curve. Anyone speeding down the street would not have time to break is someone is crossing the street. Another big issue is that there have been many incidents of individuals doing "donust" on the intersection of |
| Henry Kammann School | Survey | Tyler St and Rochex Ave | Rochex and Tyler. This was observed during broad daylight. Most recently in August. |
| Henry Kammann School | Survey | Tyler St and Rochex Ave | There isn't a person that helps cross at Tyler and Rochex. When crossing at the stop sign at Tyler street and Rochex it isn't very safe because some vehicles don't come to |
| Henry Kammann School | Survey | Tyler St and Rochex Ave | a full stop. Problem is there isn't anyone watching the crossing at the stop sign. |
| Henry Kammann School | Parent | Tyler St and Side of campus | Good that access gate has been closed and locked so that random people don't enter school campus. |
| Henry Kammann School | Principal | Tyler St and Side of campus | Cars speed going southbound with "blind spot" at curve located between Rochex Ave. and W. Laurel Dr. |
| Henry Kammann School | Survey | Tyler St and W Laurel Dr | Sometimes there's lots of traffic on Tyler and Laurel. |
| Henry Kammann School | Audit | Tyler Street | Approaching Rochex traveling NB sight visibility due to curvature of roadway |
| Henry Kammann School | Audit | Tyler Street | Curve in roadway limits visibility. Speeding traffic. Parents dropping off on both sides of Tyler and crossing the street to walk students in. Fully parked before and after school |
| Henry Kammann School | Audit | Tyler Street | Sidewalk issues |
| Henry Kammann School | Survey | W Alvin Dr and N First St | There should be a traffic light here so we can cross this street. Add more crosswalks. |
| Henry Kammann School | Audit | W Laurel adjacent to school campus | |
| Henry Kammann School | Audit | W Laurel and Parkside | Concerns with uncontrolled marked crosswalk. Speeding issues on Laurel, crossing is too long Uncontrolled crossing. Large group of students lives in apartments across Laurel and crosses here. Drivers don't |

| School Jesse Sanchez Elementary | Parent | Plaza N Sanborn Rd and Acosta | Not too bad because there's a microphone for handicap and it works. Except light takes a long time to change. |
| School | Survey | Plaza | Cameras at Sanborn and Acosta Plaza. |
| Jesse Sanchez Elementary | 5 . | NG L BL 10 | Drivers seem to respect that intersection. But many people are not sure when they need to cross and when they need to stop. They don't understand. They cross because the light is red, maybe need better crossing |
| School Jesse Sanchez Elementary | Parent | N Sanborn Rd and Garner Ave | INSTRUCTIONS. |
| School | Survey | N Sanborn Rd and Garner Ave | Distracted drivers at the Garner Ave and Sanborn Rd intersection. |
| Jesse Sanchez Elementary | | | There are times when drivers exit the school parking by turning right but quickly make a u-turn before getting |
| School Jesse Sanchez Elementary | Principal | N Sanborn Rd and Kimmel St | to the Kimmel St. signal, going around the center median. This also happens on Alma. We have a staff supporting and helping students cross. We use the signal there and at the same time we have a |
| School | Principal | N Sanborn Rd and Kimmel St | supervisor helping to increase safety. |
| Jesse Sanchez Elementary School | Parent | N Sanborn Rd and Kimmel? | The crosswalk in front of the school, cars are going really fast, cars don't always allow students to cross the street. |
| Jesse Sanchez Elementary School | Principal | N Sanborn Rd and Kimmel? | Recommendation from Principal to have a flashing lights, like there is in front of La Paz school, on Sanborn street |
| Jesse Sanchez Elementary | Tillicipal | N Janbom Na and Nimmer: | Lots of people cross the street at Mohar. I suggest a crosswalk and traffic light. Lots of people don't want to |
| School Jesse Sanchez Elementary | Parent | N Sanborn Rd and Mohar St School Campus - Drop off | walk over to the signal crosswalk when walking to school. Loop gets filled with double and triple parked cars making it difficult to get out. Sometimes I have to wait until |
| School | Parent | loop | drivers return to their cars and drive away. |
| Jesse Sanchez Elementary School | Parent | School Campus - Drop off loop | During rainy season the loop gets very full so I usually exit through Luther King by the signal to avoid the chaos. |
| Jesse Sanchez Elementary | | School Campus School | School has only one entrance and one exit depending on schedule that creates congestion. When drivers want to turn right this creates more congestion inside parking lot and it's caused by the signals at Acosta Plaza and |
| School | Principal | School Campus - School driveways | Laurel Dr. |
| Jesse Sanchez Elementary School | Parent | School front driveways | School Exit and Entrance there is a lot of traffic congestion, can't there be something done about that? |
| | | Cornwall St and Rogge Rd | • |
| John Gutierrez John Gutierrez | Survey Survey | and San Juan Grade Rd Jasper Way | Stop lights at Cornwall and Rogge on San Juan Grade Jasper Way is in URGENT need of speed bumps. |
| | | ., | |
| John Gutierrez | Survey | Natividad Rd and Rogge Rd | You think painted crosswalks make one safe or a silly bike path on streets when in an area you have overflow parking from apartments will help get serious. Not to mention as I drive to work myself I see students walking and biking on Natividad and Roggee with no margins or sidewalk to be on. How is this safe? I see students riding on sidewalks while students walk and offer bikers riding against traffic. They have no room with the cars lined up at these schools. Why are we even doing a survey. You guys don't care. Had you then you would've listened in the neighborhood meetings when we voiced our concerns. |
| John Gutierrez | Survey | San Juan Grade Rd | San Juan grade road . Between Russell and Rogge Rd. Walking path is dangerous for children |
| La Joya Elementary | Principal | Bollenbacher | Drop-off happens on street, parents and students run across street Parents park in red zone which blocks visibility of the crosswalk. School staff acting as crossing guards. Some |
| La Joya Elementary | Principal | Bollenbacher at Pingree | drivers not respecting crosswalk. |
| La Joya Elementary | Survey | Front of school | Vehicles blocking the crosswalk in front of La Jolla Elementary School. It happens all the time! My son rides the bus from Russell Road(45 mile sign). There is not a safe sidewalk going from where we live to where the bus stop is located. The Sidewalk Ends about halfway to the bus stop then it turns into a dirt path. |
| | <u> </u> | | A few students bike - 50-100 walk - the rest dropped off or bused. Bike racks present on campus. No |
| La Joya Elementary | Principal | General | staggered start time. All entrances in front of school. Amount of traffic, plus he is too young for me to feel confident that he will be aware of incoming cars. Possibly block schedules, students coming in at different times. We also need to think about the special needs students. |
| La Joya Elementary | Survey | General | They are losing out on a lot of learning. Maybe have them come back to school sooner since they are a smaller group. |
| La Joya Elementary | Survey | General | Cars go by very fast in the areas along streets where children cross. I take my children and pick them up to prevent accidents. |
| | | | |

| La Joya Elementary | Survey | General | flashing light at each crosswalk or even a timer for pedestrian to cross the crosswalk during school time. |
| | | | I feel very safe with her riding her bike in my gated community but there is no way in heck I'm going allow her to ride her bike or walk on the streets outside of my gated community. Too much crime, very very busy road, |
| | | | and people drive way too fast. I see them driving through the school bus lights in the morning in the |
| | | | afternoon's before Covid. Illegally speeding and passing everybody!!! I would like to see police officers on the |
| _a Joya Elementary | Survey | General | school routes |
| a Joya Elementary | Survey | General | I never leave him alone so he's always accompanied by his mom and dad when he doesn't work. |
| a Joya Elementary | Survey | General | In our case the route isn't safe it's all road. |
| La Joya Elementary | Survey | General | It worries me that other classmates could hit the little girl. |
| | | | It's all very good just that in the short time that my son was attending school the only detail I didn't like was |
| | | | that parents drop off children at school gate, the gate where parents could not enter due to school rules. That |
| | | | impacted my child emotionally for his first two weeks. Thanks to covid he's learning from home but it still |
| La Joya Elementary | Survey | General | concerns me for when he returns to school. |
| La Joya Elementary | Survey | General | My children are young and are not used to walking alone. |
| | | | |
| | | | My kids will have to walk all through the busy mall traffic, walk down San Juan grade which are fields on the |
| | | | way and it's a long walk for small kids to walk alone. I really don't feel safe having my child walking such a long |
| | | | distance without an adult that we trust. I feel more police patrolling needs to be done, many parents get really stressed and drive extremely unsafe when dropping off kids in the morning. Traffic gets extremely crazy and I've |
| La Joya Elementary | Survey | General | seen people just hanging around without lids and really gets me really nervous to ha e kids walk alone to school |
| La Joya Elementary | Survey | General | My son is 10 years old and I don't feel it's safe for him to walk when leaving the school. |
| La Joya Licincitary | Survey | General | Try sort is 10 years old and 1 don't leer it's sale for filling wank when leaving the seriou. |
| | | | No sidewalks and cars pass to fast and don't respect right of way. We live on the side of a high traffic street |
| La Joya Elementary | Survey | General | with no sidewalks or crosswalks near by with safety light to cross over onto school neighborhoods faster. |
| La Joya Elementary | Survey | General | No vivimos cercan de la escuela. Manejar es la única opción para nosotros. |
| La Joya Elementary | Survey | General | none but my child is to young to ride her bike alone |
| La Joya Elementary | Survey | General | Safety and fast cars. |
| La Joya Elementary | Survey | General | Safety of intersections and crossings |
| La Joya Elementary | Survey | General | Speeding cars don't give right of way. |
| La Joya Elementary | Survey | General | The lack of safety in the city is high, as much for drivers as it is with criminals. |
| La Joya Elementary | Survey | General | The school is too far for our child to go walking. |
| | | | The speeding of traffic is absurd. We need speed bumps along Penzance way, Jasper and Jade Dr. the amount of |
| | | | cars that speed down these roads make it a big safety concern with the high school in the picture. We need |
| | | | speed bumps on these roads. Parents and high schoolers are driving way too fast down these roads which |
| La Joya Elementary | Survey | General | make it very dangerous for kids and parents to be walking. |
| La Joya Elementary | Survey | General | The traffic drives at more than 55mph where the limit is 45mph. |
| | | | There are no sidewalks on most of the routes. Bellinzona, Locarno, Cornwall, Paul, San Juan Gr. Rd. They must |
| La Joya Elementary | Survey | General | cross San Juan Gr Rd during high traffic times. |
| La Joya Elementary | Survey | General | There aren't any sidewalks on a long stretch from our home towards school. |
| La Joya Elementary | Survey | General | There aren't sufficient safe sidewalks. |
| La Joya Elementary | Survey | General | There is heavy traffic at the times my son would have to cross through. |
| La Joya Elementary | Survey | General | They would have to walk through the street because there's no sidewalk. Also there's no crossing guard |
| La Joya Elementary | Survey | General | Traffic to many speeding cars. More traffic light to allow the kids to cross with more time. |
| La Joya Elementary | Survey | General | We don't know with what bad person our children could meet on their way to school. |
| za soya ziomontary | | Gorioral | Would be good if all parents taking our kids to school would do it carefully with enough time and without |
| La Joya Elementary | Survey | General | rushing while driving. |

| Laurel Wood Elementary | Survey | General | Child too young to walk alone. |
| Laurel Wood Elementary | Survey | General | Child's age, he is 5 years old. |
| Laurel Wood Elementary | Survey | General | Concerned with speeding cars and before getting to school there isn't anyone helping the children cross. |
| Laurel Wood Elementary | Survey | General | Crossing bridge |
| Laurel Wood Elementary | Survey | General | Drivers respecting pedestrians |
| Laurel Wood Elementary | Survey | General | Fast drivers along path to school. Child has to cross streets where people speed. Need to slow traffic down in neighborhoods. Other than speed, neighborhood feels safe enough for children to walk to school. |
| Laurel Wood Elementary | Survey | General | Getting child to school in the morning met having lots of traffic to get to school |
| Laurel Wood Elementary | | General | I noticed the speed of vehicles were going above the posted speed limit and at times not fully stopping at crossing points and intersections. Also, things are just not the same as they used to be when we were kids. I would like to see more caution signs regarding the speed in which drivers should be going around the school and at least 1 and 4 a mile to 1 and 2 mile, within it's immediate location. Speed bumps may also be a helpful factor. |
| | Survey | | I'm concerned about my child being hit by a car at any intersections on way and from school. Speed of cars and |
| Laurel Wood Elementary | Survey | General | distractions on route. |
| Laurel Wood Elementary | Survey | General | Is the he gets out late from best is dark |
| Laurel Wood Elementary | Survey | General | Just for her safety she is to young to be alone |
| Laurel Wood Elementary | Survey | General | Lack of visible painted lines, lack of visible and posted pedestrian signs, the need for flashing road lights in pedestrian crossing paths community and news efforts. The need for a billboard post like the one in front of Monterey bay park school on acacia I believe. Seeing the wooden police guard makes you slow down. Drivers do not make full stops and constantly park in undesignated areas like the fire zone. |
| Laurel Wood Elementary | Survey | General | More parking is always needed. |
| Laurel Wood Elementary | Survey | General | My concern for her to walk to school is speeding cars that might not be the doing the speed limit and concern about someone might kidnap her. |
| Laurel Wood Elementary | Survey | General | My son would have to cross a main street that's dangerous to get to school. |
| Laurel Wood Elementary | Survey | General | No safety go to bike. |
| Laurel Wood Elementary | Survey | General | Older students starting problems with younger ones, how easy it is for strangers to grab a child. Addressing Bullying from students when kids are walking and talking to strangers in way home from school Keep stranger danger fresh in kids head |
| Laurel Wood Elementary | Survey | General | People drive fast by the school. More Speed bumps and cross walls |
| Laurel Wood Elementary | Survey | General | People not stoping in the stops signs. People speeding in the morning |
| Laurel Wood Elementary | Survey | General | Safety issues and people speeding past the school and parents double parking and letting their children out in the middle of traffic. More staff outside before and after school. |
| | | | Some cars drive too fast. Just to keep a look out on houses next to school so kids can feel safe. Maybe to have |
| Laurel Wood Elementary | Survey | General | staff out on the corner of the school in the morning or after school while children are coming in or out. |
| Laurel Wood Elementary | Survey | General | Speedy and distracted drivers and dogs not on leashes. People driving too fast. |
| Laurel Wood Elementary | Survey | General | Staff could be out in the corner of the school in the mornings or afternoons when students come in and out. |
| Laurel Wood Elementary | Survey | General | The people at the school park hanging around. |
| Laurel Wood Elementary | Survey | General | There are no other children walking to school from our street. There is no bike lane on the street for the kids who go to Laurel Wood nor are there any people on nearby |
| Laurel Wood Elementary | Survey | General | streets helping them cross. |
| Laurel Wood Elementary | Survey | General | To young to be walking by himself and riding a bike he's only 6yrs old |
| Laurel Wood Elementary | Survey | General | Too much homeless peoples on the pathway they will have to take to school |

| Laurel Wood Elementary | Survey | Sherman Dr | necessary and would be extremely helpful |
| Laurel Wood Elementary | Survey | Sloat Dr | Fast cars going down Sloat Drive and not allowing the kids to have the right of way when they are crossing. Suspicious vehicles following children and fast moving cars not being mindful of walking children |
| | ou.vej | olout 51 | Cars driving too fast by Victor street. Parent's dropping kids in the middle of the street at front of the school. |
| Laurel Wood Elementary | Survey | Victor St | And making U turns. |
| | | | Victor st is busiest on the way to and from school. Also my daughter is still too young to walk alone. Maybe have one school staff on a corner of Victor and the next street just at the bottom of the hill. Its not far from the |
| Laurel Wood Elementary | Survey | Victor St | school but just as an extra set of eyes. |
| Laurel Wood Elementary | Audit | Victor Street | Speeding issue |
| Laurel Wood Elementary | Audit | Victor Street | Speeding traffic, no marked crosswalks |
| Laurel Wood Elementary | Audit | Victor Street and Van Ness | No marked crosswalk, possible location for one |
| Lincoln Elementary | Survey | Acacia St | Acacia and Main st. and Blanco and Main Street. Just all of of Blanco and all of Main Street. Safe walking signs or street lights. I want my children to be safe if traveling to school. |
| Lincoln Elementary | Survey | Blanco Rd | They would have to cross 2 major streets, Blanco Rd and S. Main St. Traffic tends to travel at a much higher speed than posted. Blanco Rd has a lot of trailers or heavy machinery vehicles and they tend to run red lights since its harder for them to slow down for traffic lights due to speeding. S. Main St Tends to have high volume of speeders in the morning and afternoon traffic. More speed traffic control especially on Blanco Rd and all intersections on S. Main between Blanco Rd to John St as well as California St between John and Rome Ln. |
| Lincoln Elementary | Survey | Boronda Rd | Lack of sidewalks in my neighborhood. (Boronda Rd). Side Walks, poor lighting (Boronda Rd neighborhood by UPS). |
| Lincoln Elementary | Audit | California and Chestnut | Cars would like to turn but students are walking |
| Lincoln Elementary | Audit | California and Widow | No ADA ramps |
| Lincoln Elementary | Audit | California at Chestnut | Difficult to cross here and to see pedestrians waiting to cross. Parked cars block crosswalk. Parent suggested RRFB |
| Lincoln Elementary | Audit | California at Chesthut | Sidewalks in place, no marked crosswalks and curb ramps |
| , | | | |
| Lincoln Elementary | Audit | California St | Lots of traffic and drop-off on street in front of school. Double parking, students running across the street |
| Lincoln Elementary | Parent | California St | No bike lanes along California for students who ride bikes. California St after passing John St. is a little scary to walk by. There is a lot of homeless walking around that |
| Lincoln Elementary | Survey | California St | area. |
| Lincoln Elementary | Survey | California St | Cars driving on California St. often run the stop sign at California and Pine St. as well as California and Maple St. Better signage, barriers, and paint, could make these intersections safer. Take a look at San Luis Obispo's recent efforts to create safe bike routes to school for kids. Their city is making child safety a top priority. Having safe bike lanes in California street by Lincoln school. Making sure cats stop at the 4 way stop on California and pine street. Having parents pulling in and out into the driveway by Lincoln cafeteria and then |
| Lincoln Elementary Lincoln Elementary | Survey Survey | California St California St | backing out. How fast cars go on California street in front of the school. Stop signs and speed bumps. |
| Lincoll Elementary | Survey | camornia ot | now last cars go on camorna street in none of the school. Stop signs and speed bumps. |
| Lincoln Elementary | Survey | California St | How fast cars travel Down California street between John and Romie. Stop signs and speed bumps. Need for speed bumps in front of the school. Too much traffic and they drive fast. Adults ready to welcome them |
| Lincoln Elementary | Survey | California St | in on the permitete perhaps and speed bumps added to California st also a lot of older homes there have sidewalks lifted up by tree roots |
| Lincoln Elementary | Survey | California St | Parents dropping or picking up their kids, they are always in a hurry blocking driveways and double parking. Parents dont follow the rules of the road. Parents need to be reminded on the rules of the roads. Parents set a bad example for their kids. California St in Salinas is too wide maybe there is an option to install a class iv cycle track. |
| Lincoln Elementary | Survey | California St | Speed of the cars driving by. The cars tend to obey the speed limit on California street. The crossing guards are a great resource the school has and utilizes. |
| Lincoln Elementary | Parent | California St and Front of school | Crossguards should be present every day on California in front of school. |
| • | | California St and Front of | In the mornings cars let out their students while double-parked so students are getting off in the middle of the |
| Lincoln Elementary | Parent | school California St and Front of | street. |
| Lincoln Elementary | Parent | school California St and Front of | Many drivers make u-turns on California in order to pull up to curb directly in front of school entrance. |
| Lincoln Elementary | Parent | school | Would be perfect to install lights on California as was done at Hartnell. |
| Lincoln Elementary | Audit | California Street | Speeding in front on school in the evening |
| Lincoln Elementary | Parent | Carlifornia St and John St | The crossing at California and John is where people cross even without a crosswalk or a stop sign. |
| Lincoln Elementary | Parent | Carmel St and Maple St | Need a speed bump here. |
| Lincoln Elementary | Audit | Front and Maple | Flashing lights |
| Lincoln Elementary | Audit | Front of School | Double parking during drop off and pick up |
| Lincoln Elementary | Audit | Front of School | Drop offs happenning at red zones |
| Lincoln Elementary | Audit | Front of School | No ADA ramps |
| Lincoln Elementary | Audit | Front of School | Request for a stop sign |
| Lincoln Elementary | Audit | Front of School | RRFB requested Córner and intersection of Front st and John St should have a pedestrian crossing, many kids have to walk |
| Lincoln Elementary | Survey | Front St and John St | further to the traffic light to avoid fast traffic. |
| Lincoln Elementary | Parent | Front St and Maple St | Front St. and Maple St. cross the corner, there's a pedestrian crosswalk on this low-traffic street and there's a half-curve where cars drive at high speeds. Would like speed bumps. |

| Lincoln Elementary | Parent | Front St and Maple St | I've noted that cars go by very fast. They see the children and don't stop. Maple St. and Front St. has fast traffic. California St. also I have noted there's a stop sign on the previous street but as soon as they pass they speed up. |
|--|----------------------|-------------------------|---|
| Lincoln Elementary | Audit | General | No regular bus service - occasional bus for overflow students. Have to cone off space for buses when needed |
| | A 111 | | 0 |
| Lincoln Elementary Lincoln Elementary | Audit Audit | General General | Open enrollment school, so some students coming from far away. 50% walk and 50% drive, with a few cyclists. Some students bike - enter from Willow or Maple entrances |
| Lincoln Elementary | Parent | General | Great if parents could volunteer for crosswalk duty. |
| Lincoln Elementary | Survey | General | Cars drive too fast. |
| Lincoln Elementary | Survey | General | Cars not stopping for her. People driving their cars over the speed limit. |
| Lincoln Elementary | Survey | General | Concerned with the signals perhaps too dangerous for her to walk alone. |
| Lincoln Elementary | Survey | General | Crossing intersections |
| Lincoln Elementary | Survey | General | Crossing the street (any street) |
| Lincoln Elementary | Survey | General | Crossing the street on a busy intersection |
| Lincoln Elementary | Survey | General | Delinquency makes it unsafe for a minor to walk alone. |
| Lincoln Elementary | Survey | General | Distance and driver don't follow the rules my street is a 25 speed limit drivers drive 55 and don't respect the stop sign. Speed and driver paying attention to the road dimes driver are on their phone |
| Lincoln Elementary | Survey | General | Distance because my son lives far from school since he has school choice. |
| Lincoln Elementary | Survey | General | Distance speed and not safe. Speed and drivers driving without paying attention |
| Lincoln Elementary | Survey | General | For us it would be the distance, and safety to many busy streets to send our child on a bike. |
| Lincoln Elementary | Survey | General | He's too young and it's not safe |
| Lincoln Elementary | Survey | General | I live too far away for My child to walk or bike to school |
| Lincoln Elementary | Survey | General | I would not allow my child to walk. Our distance to the school is lengthy. Traffic on regular school days. However I take extra measures when crossing my child to the school. |
| Lincoln Elementary | Survey | General | Make crosswalks more visible. Not enough crosswalk attendants. |
| Lincoln Elementary | Survey | General | More safety on the streets. |
| Lincoln Elementary | Survey | General | My child already walks to the YMCA after school and my biggest concern is the weather. Traffic speed on South main- Salinas High area |
| Lincoln Elementary | Survey | General | My child attends a school outside of our home school boundaries and walking and and or riding a bike is not an option |
| Lincoln Elementary | Survey | General | My child can not walk or ride a bike to school because of the distance. Our home is too far away from her school. |
| Lincoln Elementary | Survey | General | Our streets are not safe for our children to walk to and from school because of different factors, such as vehicles driving too fast within school proximities and different homeless encampments in the streets of Salinas. Homelessness problem afflicting Salinas and how the city is making our streets safer. |
| Elifeoni Elementary | Survey | Control | Parents disregard parking rules around school zones. Schools were designed for children to be bused to school |
| Lincoln Elementary | Survey | General | and that is no longer the case. More cars = more traffic= more danger for children to walk safely. Cars make illegal u turns and park illegally in school zones. |
| Lincoln Elementary | Survey | General | Parents driving in a hurry. Cross walks with flashing lights when children are crossing. |
| Lincoln Elementary | Survey | General | People drive too fast and are not careful. It's dangerous to let children cross the streets without supervision. I've heard rumors that they kidnap children who walk alone. They should put signals for pedestrians at the school's crosswalks. |
| Lincoln Elementary | Survey | General | People obeying the stop signs, speed limits and crosswalks. |
| Lincoln Elementary | Survey | General | Salinas is not a bike friendly town. We don't have enough bike paths. |
| Lincoln Elementary | Survey | General | She would walk from Lincoln to the YMCA Afterschool program and she has witnessed speeding cars and reckless driving (the Y staff would brief the parents at pick up time). From our house to school, there are many homeless or folks who look to be under the influence of drugs and they can be a danger to themselves and the children. We live less than 2 miles from the school but from our home to school there's a big homeless camp, no safe bike route and erratic drivers. |
| Lincoln Elementary | Survey | General | Speed at which cars travel on the road in front of the school. The fact that the cars don't stop at the chestnuts cross street and try to inch through the crosswalk. It's hard to see the kids entering the cross walk because of all the cars parked on the curb. Stop signs at all cross. Streets and maybe even speed bumps on street in front of the school. |
| Lincoln Elementary | Survey | General | Speed at which cars travel on the road in front of the school. The fact that the cars don't stop at the chestnuts cross street and try to inch through the crosswalk. It's hard to see the kids entering the cross walk because of all the cars parked on the curb. Stop signs at all cross. Streets and maybe even speed bumps on street in front of the school. |
| Lincoln Elementary | Survey | General | Speeding cars not respectful ti crosswalks. |
| Lincoln Elementary | Survey | General | Speeding vehicles |
| Lincoln Elementary | Survey | General | The areas cover are great, we don't live at a walking distant from school. |
| Lincoln Elementary | Survey | General | The distance from my house is too far to walk. |
| Lincoln Fi | | C | The speed some cars drive by even at crosswalks and with a crossing guard is ridiculous, I have seen one too |
| Lincoln Elementary Lincoln Elementary Lincoln Elementary | Survey Survey Survey | General General General | many students unable to cross because of the speed of some cars. There are no crossing guards working the intersections where my child walks and everyday it was hard to cross the street even with the company if an adult. We live close to school yet the parking lot is not well respected by drivers. Sometimes kids have to walk part of the street due to cars blocking side walks. It will be of great benefit to have crossing guards on each intersection surrounding the school. That will give a little piece of mind knowing there is someone watching after my kid. Traffic issues such as at crossings |
| Lincoln Elementary | | General | Traffic, people not paying attention to crossing pedestrians. Making sure every child gets picked up safely. My daughter attends a school that is not walking distance to home and even if the school was close by I would not hav her walk as she is too young. |
| Encom Elementary | ISurvey | ructicial | ווומי והי יימות מי אוני וא נטט ייטעווע. |

| Lincoln Elementary | Survey | Maple St and California St | Crossing guard also at Maple and California st |
| Lincoln Elementary | Parent | Maple St and Front St | Need a stop sign here. |
| | 1 4.5.1.0 | i impre et ana i rent et | intered a citago cigir meter |
| | | | Entrance on Maple St. is only accessible for three or four cars and the bushes produce a blind spot and there's |
| Lincoln Elementary | Parent | Maple St and Side entrance | no way for children to see if a car is passing through. Suggesting a stop sign so that traffic knows when to go. |
| | | | |
| Lincoln Elementary | Parent | Maple St and Side entrance | Folks have found used needles in the bushes near building structure. |
| | | | |
| | | | Going on North Main to Old Town is nor a safe route to ride bikes with kids. I would like to have divided roads |
| Lincoln Elementary | Survey | N Main St | for automotives and bikes, it would make me feel safer to ride bikes with my kids on the streets. |
| Lincoln Elementary | Parent | Pajaro St | Need a stop sign along Pajaro, there's only one at Acacia and crossing there is difficult. |
| Lincoln Elementary | Parent | Pajaro St and Chestnut St | At Chestnut and Pajaro trees block visibility for cyclists and pedestrians. |
| Lincoln Elementary | Audit | Pajaro Street | No crosswalk or stop signs |
| | | . | No marked crosswalk at Chestnut and Pajaro, difficult for students to cross. Curb ramps need updating. Lots of |
| Lincoln Elementary | Audit | Pajaro Street | high school traffic |
| Lincoln Elementary | Audit | Romie Lane | Connection to Monterey Park |
| Lincoln Elementary | Parent | Romie Lane and California St | Romie Lane and California is where people enter very fast. On the three pedestrian crossings one cannot cross safely. |
| Lincoll Licinchialy | raicit | Nomic Lanc and Camornia St | Cars on Romie lane drive very fast because there are not enough stop signs and traffic lights. It makes it |
| Lincoln Elementary | Survey | Romie Lane and California St | challenging to cross the street with small kids walking and or on scooters. |
| | | | My child would haveto go down Romie Lane, lots of traffic, driving way too fast even though the speed limit is |
| Lincoln Elementary | Survey | Romie Lane and California St | only 25 MPH. Crosswalks with buttons that makes lights flash. |
| | j | | Speed limits; passing Salinas High School on S. Main Street parents stop in the middle of the street and front of |
| | | | the stop light (corner of Subway and gas station) to drop off their kids. Very unsafe and illegal! Cross walks. |
| Lincoln Elementary | Survey | S Main St | Adding the bright yellow blinking lights, to catch vehicle attention. |
| Lincoln Elementary | Audit | School campus | 3 entrances to campus - California and Willow, California and Chestnut, school parking lot on Maple |
| Lincoln Elementary | Survey | School frontage | Cones for students lined up. One cone per student to keep their distance. |
| Lincoln Elementary | Survey | School frontage | More crossing guards |
| Lincoln Elementary | Parent | School perimeter | At the corners near school entrances children can't cross with ease. |
| Lincoln Elementary | Parent | School perimeter | Install ADA ramps at all school zones so that mothers and those in wheelchairs can have access. |
| Lincoln Elementary | Parent | School perimeter | Side entrances remain closed, maybe best if openned so students don't have to walk around. |
| Lincoln Elementary | Survey | School Perimeter | All grades can use any gate. |
| Lincoln Elementary | Survey | School Perimeter | Designated drop and off pick up area and parking lot for visitors. |
| Lincoln Elementary | Survey | School Perimeter | Me gustaría que hubiera un estacionamiento adecuado para los padres de familia |
| Lincoln Elementany | Survey | School Perimeter | Restrict staff to designated parking areas on campus. Public parking should be for prioritized for parents and neighborhood residents. |
| Lincoln Elementary | Survey | School Ferimeter | |
| | | | This does not apply to Lincoln, since this school is located within residential streets. But the parents dropping off kids need to respect the rules of the road. Parents dropping off kids are creating the majority of the issues, |
| Lincoln Elementary | Survey | School perimeter | by double parking, speeding, and always driving in a hurry. |
| | | | 1) Bike lanes are needed on both California St. and Maple St. These are heavy traffic feeder streets to Lincoln school. 2) Add curb extensions and high-visibility cross-walk on the corner of Maple St. and Carmel Ave that crosses Carmel Ave. This is the ONLY intersection touching Lincoln School's block without a stop-sign or a crossing guard. Cars turning from Maple St. to Carmel Avenue do not yield, and the cross-walk is the longest and with the least visibility (due to the high hedge and decorative lighthouse on the corner) of any cross-walk |
| Lincoln Elementary | Survey | Various | on the Lincoln School block. 3) On the south side of Maple St. between California and Carmel Ave. convert the street parking to a 2-way bike lane so that students biking to Lincoln from Carmel can directly access the school in a safe lane instead of riding on the sidewalk or crossing Maple twice. |
| | 1 | | |

| Lincoln Elementary | Survey | Various | 1) There is a need for bike lanes on California St. 2) There is a need for bike lanes on Maple St. 3) There is a need for curb extensions and high-visibility crosswalk at the intersection of Maple St. and Carmel Ave - this is an uncontrolled intersection that cars speed through when turning from Maple St. onto Carmel Ave. 4) idle control http: and and idlefreecalifornia.org and california-idle-free-schools.html parents park their SUVs along California and Maple St. and idle their vehicles with engines runningthis should be an idle-free zone to protect our children's health. |
|---|-------------|---------------------------------|--|
| Lincoln Elementary | Survey | W Acacia St | Route - W. Acacia between W. Alisal and California St. Too much school traffic. No designated bike lane. No crossing guards. |
| · | | | We live too far to allow him to walk alone to school. He would have to cross W. Alisal and S. main streets to get to school. If we did live near school I'd like cross walks on neighborhood streets close to school. Better marked cross walks on neighborhood streets. I would like to see speed bumps on California Street in front of Lincoln |
| Lincoln Elementary | Survey | W Alisal St | School because I've seen too many cars speed during school hours and through the cross walks. Willow and California is where the crossguard crosses the students- it's important because this is the entrance |
| Lincoln Elementary | Parent | Willow St and California St | most used by students who arrive early and those who stay after hours. |
| oma Vista Elementary | Survey | Alvin Dr | The crossing feels dangerous on Alvin Dr. here in Salinas. |
| oma Vista Elementary | Audit | Cambrian and Sausal | Drivers are not respecting the crosswalk |
| oma Vista Elementary | Audit | Cambrian and Sausal | Some speeding outside of drop off and pick up hours |
| oma Vista Elementary | Audit | Cambrian Ave | Students walking, no marked crosswalks at cross streets |
| _oma Vista Elementary | Crossguards | Cambrian Dr and Sausal Dr | Parents dropping off the kids in the middle of the streets. The pedestrian crossing is the one immediately in front of the school. |
| _oma Vista Elementary | Audit | Cambrian Drive | Traffic backed up before and after school. After school is worse because parents want to park, go onto campus, visit with teachers etc. |
| oma Vista Elementary | Audit | Compton Way | Back gate to campus |
| Loma Vista Elementary | Audit | Compton Way | Potential staff availability for supervision on entrance and exit |
| oma Vista Elementary | Audit | Compton Way | Sidewalk issues |
| _oma Vista Elementary | Parent | Compton Way and Glendora Way | Around Loma Vista the sidewalks are in bad shape. We need the crosswalks to get fixed. Specifically, on Compton and Glendora |
| _oma Vista Elementary | Parent | Compton Way and Glendora Way | Will the back area be open again? Allowing a keycard to enter the back gate. |
| Loma Vista Elementary | Survey | Elton Place | On our street, Elton Place, drivers tend to drive over the speed limit, and many children cross streets around the area. |
| _oma Vista Elementary | Audit | Front of School | Drop off and pick up is an issues which occurs on Cambrian or Sausal. Pick up is more congested due to parents staying longer in their vehicles |
| oma Vista Elementary | Audit | Front of School | Parents are parking on street red zones |
| oma Vista Elementary | Survey | Front of School | Cars drive too fast in front and around school. |
| Loma Vista Elementary | Survey | Front of School | There is alot of traffic congestion in front of the school when dropping off my child, I am concern about drivers not paying attention. Children are children and as much as we teach them the safe rules of crossing the street. The school personnel does their best I see staff at the crosswalk and supervising the children. Only suggestion I have is to open the back gate again so there is not a many cars in the front parents can drop in the back as well 500 students, 75 after-school participants. 140 students bused, lots of walkers. A few students bike. Bike racks |
| _oma Vista Elementary | Audit | General | present on campus. Staff parking lot in back of school, no issues with staff parking. No staggered start time. Front of school is currently the only entrance |
| oma Vista Elementary | Audit | General | Currently one entrance to the school. Potential reopening the entrance on Compton Way(behind the school) |
| oma Vista Elementary | Parent | General | No reported issues relating to Natividad Rd. |
| _oma Vista Elementary | Parent | General | Salinas should make a new school, the area is very populated schools are at mass capacity. Busing a portion to Loma Vista and the other to Roosevelt. |
| oma Vista Elementary | Principal | General | Access points to neighborhood are Los Coches Ave and Emerald Way. |
| oma Vista Elementary | Survey | General | Afraid that a bad person will harm them on their way or wants to abduct them. |
| oma Vista Elementary | Survey | General | Cars go by so fast sometimes and some people drive out of their drive way fast |
| Loma Vista Elementary | Survey | General | Cars in the morning are always in a hurry and it is dangerous. No place to park in Loma Vista School on the mornings. Its always supper busy. Hope they had a drop off method for kids to be safely dropped off. Parents are forced to park in the middle of the road to cross their kids across to get the kids on time to school. I have honestly thought of moving my daughter because of the hassle of dropping her off in the morning. |
| _oma Vista Elementary | Survey | General | Concerned that my child will run into a bad person. |
| oma Vista Elementary | Survey | General | Concerned with crime, traffic, gangs and people who drive under the influence of drugs and alcohol. |
| Loma Vista Elementary | Survey | General | Concerned with fast cars when turning around. |
| oma Vista Elementary | Survey | General | Concerned with the crossings before getting to school. |
| Loma Vista Elementary | Survey | General | Concerns with street crossings and the responsibility of drivers. Concerns with the crossings, speeding cars, few signs, traffic at the school, there is not one route to approach or with each of the concerns. |
| Loma Vista Elementary | Survey | General | exit and nobody respects. For now no issue because school staff is very caring about children's safety and the people who enter school |
| Loma Vista Elementary Loma Vista Elementary | Survey | General General | Great if a patrol car would be always at bus stops. |
| Loma vista Elementary | Julvey | GENERAL | He would have to cross a busy street and a lot cars do not pay attention and he is to young to be walking. |
| Loma Vista Elementary | Survey | General | Crossing on the Main Street cars do not pay attention to the smaller kids. |
| oma Vista Elementary | Survey | General | I would like added safety around school zones and near home. |
| oma Vista Elementary | Survey | General | I would like it if children use school routes that parents then get notified when child arrives safely to school. In my opinion as a mother who works in aq fields I would like it if my children used safe routes to be 100% |
| | ام | C | , , |
| oma Vista Elementary | Survey | General | sure that they arrived to school and that a parent could be nitified by call or text. |

| Loma Vista Elementary | Survey | General | More signs that it's a school zone so cars can slow down or drivers can be more cautious. |
|--|------------------|-------------------------------|--|
| | | | |
| | | | My child is an outer district transfer and distance from our home to the school is significant where i need to |
| | | | drive him to school to be dropped off and picked up. But if i were to use a bus, I feel that safety measures |
| | | | would need to be in place so kids dont touch each other. the younger they are the more the more they are |
| Lama Vista Elementen | Cumini | Comparel | attracted to human contact and dont think twice about germs. The buses would need to be extremely clean and |
| Loma Vista Elementary | Survey | General | have a few adults in the bus to assist the in the social distancing. |
| | | | My child is only 5 years old and I do not feel comfortable letting him walk across the neighborhood to walk to |
| | | | and from school. I do not feel comfortable letting my child cross the street alone, or navigate to and from |
| Loma Vista Elementary | Survey | General | school. I would be comfortable with my son walking to and from school with older students present, or with an adult present. I feel he is too young at this time to walk. |
| Loma Vista Elementary | Survey | General | My concern is distance and the crossings at signals. |
| Loma vista Licincitary | Survey | General | My concern is the distance from my house to school and because I also need to take his brother to another |
| Loma Vista Elementary | Survey | General | school since he is in 12th grade. |
| Loma Vista Elementary | Survey | General | My son rides the school bus because our house is too far. |
| ŕ | , | | |
| | | | People are rushing and not respecting stop signs or yield to others. School parking lot in front area is horrible. |
| | | | Also, the Street in front of school is very narrow for two way traffic. There have been accidents and people |
| | | | parking in red zone areas and blocking traffic to move safely. To respect the stop signs and yield to |
| | | | pedestrians. To respect the red zone and not block traffic. To close the parking in front area of the school when |
| | | | school day ends so it won't be crazy and be safe. The school has a parking lot in the back area which is pretty |
| | | | big and is more spacious. I know they say it's for teachers however it has more parking space than teachers. I |
| | | | would suggest a drive thru drop off in the back parking. I have seen that in other cities. Parents just drive thru |
| | | | and there is a school staff receiving the kids and traffic keeps moving. And for parents that want to walk their |
| Loma Vista Elementary | Survey | General | kids to class can have room to park in the back parking lot or in the street how we've been doing. |
| Loma Vista Elementary | Survey | General | Put up more signs indicating there are students around. |
| Loma Vista Elementary | Survey | General | Should be demanded that parents respect the places that should not be blocked. |
| Loma Vista Elementary Loma Vista Elementary | Survey Survey | General General | Should install more signs indicating school zone. Speeding cars |
| Loma Vista Elementary | Survey | General | Speeding cars and lack of patrolling. |
| Loma Vista Elementary | Survey | General | Speeding cars don't respect speed limit. |
| Lonia vista Liementary | Survey | General | Speculity tais don't respect speculiinit. |
| Loma Vista Elementary | Survey | General | Speeding Cars, narrow streets, the school is located in a very tight corner which is no safe for crossing |
| Loma Vista Elementary | Survey | General | Speeding, no parking not enough supervision |
| Loma Vista Elementary | Survey | General | The amount of Traffic no parking for drop off. No speed bumps. No cross lights. |
| Loma Vista Elementary | Survey | General | The crosswalks and signals. It's good that kids ride their bikes to school, it's good exercise. |
| | , , | | The lack of adult supervision on their walk to school. Only cross guard is right at the school but I'm not |
| | | | comfortable with my kids walking with no adult. I have heard of attempted kidnapping a few years ago and it |
| Loma Vista Elementary | Survey | General | makes me uneasy about them walking without an adult. |
| Loma Vista Elementary | Survey | General | The most important thing is safety for my child and that he gets to class on time. |
| Loma Vista Elementary | Survey | General | The route is safe since I live three blocks away from school. |
| Loma Vista Elementary | Survey | General | The safety in walking isn't very safe, cars drive too fast. |
| | | | The street corners are so packed with cars, it makes smaller bodies hard to see. Perhaps more red zones, |
| | | | enforce red zones so we can see pedestrians and oncoming cars. We really do need to keep a crossing guard |
| Loma Vista Elementary | Survey | General | and it helps so much by regulating traffic before and after school hours. |
| Loma Vista Elementary | Survey | General | The streets are not very safe for them because there is so much traffic. |
| Loma Vista Elementary | Survey | General | The traffic and pedestrian crossings would be my concerns if my children went walking or biking to school. |
| Loma Vista Elementary | Survey | General | There should be signs that children walk around those places so they can be cautious. |
| Loma Vista Elementary | Survey | General | This is a very tranquil neighborhood. |
| | | | To bike or walk to Loma Vista school we have to walk all the way around Compton street to get to sausal Drive |
| | | | since the back of the school off of Glendora Way is gated closed shut. Sausal Drive is too congested in the |
| | | | morning. I wish there were a better drop off plan for all families. Also wish parents would not allow their |
| | | | children to jump out of the cars on the street of the school. It makes for longer wait times on the street. If a |
| | | | better plan for drop off is in place then drop off for kids and families would run smoothly. It's pretty stressful in |
| | | | the morning and then our child feels the stress or anger. It's not how I want my child to start the morning at |
| Loma Vista Elementary | Survey | General | school. |
| Loma Vista Elementary | Survey | General | To put slow bumps on the street when getting closer to the school so cars can slow down |
| Loma Vista Elementary | Survey | General | Too many homeless and gangs. |

| Lonia Vista Liementary | ridait | researche and less escries | There is no stop signs, cars take that curve and don't stop. The problem is on the middle point of Saratoga and |
| Loma Vista Elementary | Parent | Saratoga Dr and Cambrian Dr | Cambrian. Many students and people use the path up the hill going into Castleton St. |
| | | | |
| | | | On the corner of Saratoga and Cambrian there isn't a 4 way stop so cross traffic tends to just speed thru the turn. They also love to do careless doughnuts in that section. I feel cross traffic should have a stop since a lot of |
| | | | people tend to walk across to go down into constitution thru that path way. There's a lot of kids on bikes and |
| | | | they don't even bother looking since there is no stop they speed thru. For the pedestrians as well as the |
| | | | drivers to just take a second look before crossing any intersection for both their safety. I have heard but not |
| | | | witness children being followed so as a small neighborhood we should keep an eye on each other's children. We should encourage each other to say a simple hello to learn familiar faces so if we do se an unfamiliar one we are |
| | | | more vigilant for the children's safety. Talk to the kids to walk close to a familiar group and ask for help if they |
| | | | feel uneasy. Pedestrians and drivers take a second look to ensure each other's safety. Otherwise I feel pretty safe |
| Loma Vista Elementary Loma Vista Elementary | Survey Audit | Saratoga St and Cambrian St Sausal Dr | around the neighborhood and walking. |
| Loma Vista Elementary | Audit | Sausal Dr | Parents dropping off in the street - students running across Parents park in red zone in front of the school, which means that other cars can't get around |
| Loma Vista Elementary | Audit | Sausal Dr | Students cross street ar multiple locations while traffic movement is present |
| Loma Vista Elementary | Parent | Sausal Dr | Lots of congestion here and cars going fast around the turn where Sausal and Cambrian meet. |
| | | | Outside of Sausal, bus lanes are very faded. Re painting all the bus lines on the ground. Exiting the bus loop |
| Loma Vista Elementary | Principal | Sausal Dr and Front of school | immediately to the right. Request help from city to install bus parking on street (currently on drop off loop) so that parents have a loop in which to pull in and drop off their students. |
| Loma Vista Elementary | Audit | School campus | Bike Parking available |
| _ | | School campus and School | Parking available for staff towards the back but becasue an issue due to parents parking and stopping in the |
| Loma Vista Elementary | Audit | front parking lot | way of the entrance to the parking lot |
| Loma Vista Elementary | Audit | School drop off loop | Only busses are able to access Bus drop-off only in drop-off loop, no parent access to parking lot. School puts out cones to block access to |
| Loma Vista Elementary | Audit | School parking lot | parking lot. Staff monitors bus drop-off area |
| | | | The school does not have big enough parking area and the drop of area is on the street. So the streets get |
| Loma Vista Elementany | Survey | School Parking lat | pretty crowded and I have experiment many issues with vehicles not seeing the kids crossing. So hopefully |
| Loma Vista Elementary | Survey | School Parking lot | something is done soon to address that important safety issue. The chaos that forms at dismissal and start of school is dangerous for the children with risk of being hit by |
| Loma Vista Elementary | Survey | School Perimeter | drivers. |
| | | | There is a lot of traffic in and around the school in the mornings and afternoons and I would be worried about |
| | | | having my child ride a bike to and from school. Walking would be a lot safer but the amount of traffic around |
| | | | the school would still concern me. Too much traffic, especially since the school is located in a residential neighborhood. Consider reopening the gate on the backend of the school on Compton way! And create |
| Loma Vista Elementary | Survey | School Perimeter | designated biking or walking-only routes to the school. |
| | | | there should be curb extenders at the corner of Alisal and Williams as well as Sanborn and John street. there |
| | | | should be speed bumps to slow traffic. The apartment house 1,000s of persons and that traffic, especially |
| Los Padres Elementary | Survey | Alisal St and Williams Rd | around the curves can be very dangerous. My brother has seen at least 2 pedestrian and vehicle collisions over the years becuase of the speed and lack of crosswalks. |

| M IC | ъ . | E Boronda Rd and McKinnon | |
| McKinnon Elementary | Parent | St E Boronda Rd and McKinnon | Big intersection for small children. Concerned that students would not have knowledge of how the proposed roundabout would work. Any plans to |
| McKinnon Elementary | Parent | St | have a cross guard there? |
| ricianion Licinchary | rarent | E Boronda Rd and McKinnon | nave a cross guara tricre. |
| McKinnon Elementary | Parent | St | Crosswalks are faded. |
| • | | E Boronda Rd and McKinnon | |
| McKinnon Elementary | Parent | St | Lots of traffic and speeding cars. |
| | Parent | E Boronda Rd and McKinnon | Traffic gets backed up in all directions from E. Boronda Rd. onto McKinnon St. towards school. Sometimes it |
| McKinnon Elementary | Coordinator | St | takes several signals to pass the intersections. |
| M 10 | | E Boronda Rd and McKinnon | |
| McKinnon Elementary | Survey | St | They have to cross 2 very busy streets Boronda and McKinnon Street, without a crossing guard. |
| McKinnon Elementary | Audit | General | 60% of students are bused, the rest are dropped off. Small number of students walking and biking, mostly with parents. No staggered start times |
| McKinnon Elementary | Survey | General | A lot of traffic and long distance for a 6 year old. |
| McKinnon Elementary | Survey | General | Concerned with crime or people driving who don't respect the crossings or traffic signals. |
| | 1 | | Concerned with intersections, drivers who do not respect primarily the moment when making right turns and the |
| McKinnon Elementary | Survey | General | space they should allow when students are crossing. |
| McKinnon Elementary | Survey | General | Concerned with the corners and the crossings. |
| McKinnon Elementary | Survey | General | Distance and being in a Main Street there's lots of traffic and not sfe for her to cross the lights. |
| McKinnon Elementary | Survey | General | Distance and traffic. We need crossing guards or more supervision for our kids |
| McKinnon Elementary | Survey | General | Drive kids to school it's more safer. In my opinion. |
| McKinnon Elementary | Survey | General | I would like it if there were people assigned to watch the children at the crosswalks and traffic signals. |
| Michimon Liementary | Survey | deneral | Im concern that we have ruthless drives and don't respect the crosswalks . I would like to have a supervisor in |
| McKinnon Elementary | Survey | General | the stop lights, our children are not safe with our resident drivers. |
| McKinnon Elementary | Survey | General | Mainly a cross guard fir children crossing the street |
| McKinnon Elementary | Survey | General | My concern is crossing the signal, bad people and the climate. |
| McKinnon Elementary | Survey | General | No bike and too many streets to cross. Great school! I had more kids there. |
| | | | People don't follow the street lights. They don't yield. Taking measurements when kids and adults are crossing |
| McKinnon Elementary | Survey | General | the street. |
| McKinnon Elementary | Survey | General | Safety of intersections. |
| | | | School is too far from home for An 8 year old to walk and bike by himself. Too much traffic when picking up kids at McKinnon and only sometimes does someone stand outside to direct traffic (which is helpful) but it didn't |
| McKinnon Elementary | Survey | General | happen daily (which it should). |
| McKinnon Elementary | Survey | General | School needs cross guard, street is a high speed traffic |
| | | | |
| McKinnon Elementary | Survey | General | The Walmart light. Cars going fast. |

I would like that there is always a person at start and dismissal of school at the McKinnon and Boronda crosswalk. People at the stop light so stop to let the kids cross when it's the kids turn Speed and traffic lights and safety of |
| McKinnon Elementary | Survey Survey Survey Survey Survey Survey Transportation Dept. Audit Audit Audit Parent Parent Survey Survey Survey Survey Survey Survey Survey Survey Survey | General General General General General General Harden Pkwy Mckinnon Mckinnon and Pennsylvania McKinnon St McKinnon St | There is no adult to take him walking. There is no cross guard Too much traffic and cars driving too fast. Lowering speed limit. Would be nice if there was a crossing guard helping kids. Would like that when children and adults cross the traffic signal that it is safe because the signal does not last very long and we would feel better when the officer was there to ensure drivers would respect the signals because it gets very congested during pick up and drop off in the morning. Plaza Club apartments (195 Harden Pkwy) – homeless people, parents worry about people drinking and children's safety. Bike lanes Sidewalk issues Potential midblock crosswalk As a mother who walks her student, the people who manage the land between Boronda and the school need to clean up the mud produced during rainy season that flows onto sidewalk to the point where people cannot walk on the sidewalk and many have to walk on the street. Need more cleaning and maintenance there. Future development and expansion of McKinnon St- will road continue and instead of having a dead end, will it be two lanes for each side and will the sidewalk become wider? Concerned when it rains from the traffic signal all to the school the road gets very slippery from all the dirt. Mckinnon street driver's driving too fast not safe when children are crossing the street. Safety wise need to add more people to guide and watch our children while crossing the intersection. If we can provide more traffic people to watch our children in the morning and after school much safer. Children can walk safely going to school. Parking along McKinnon Street in front of and along McKinnon Elementary. Side walk next to field at McKinnon Elementary. It gets really muddy and it has broken concrete because of the large agriculture trucks. I would like that there is always a person at start and dismissal of school at the McKinnon and Boronda crosswalk. People at the stop light so stop to let the kids cross when it's the kids turn Speed and traffic light at Boronda and McKi |

| McKinnon Elementary | Survey | McKinnon St and Boronda Rd | There is no cross guard at the big intersection (Boronda & McKinnon). We need a cross guard there and the traffic lights needs to be reprogrammed to make it safer and effective for pedestrians and cars. |
|---|-------------------------|--|---|
| McKinnon Elementary | Audit | Mckinnon St and Front of school | Issues at pick up hours |
| McKinnon Elementary | Parent | McKinnon St and Front of school | Drivers make u-turns anywhere they can. |
| McKinnon Elementary | Parent | McKinnon St and Front of school | Drop off loop gets very congested, so many parents don't bother. |
| McKinnon Elementary | Parent | McKinnon St and Front of school | Lots of parents park and double park in the staff parking lot so they can walk students in. Many times block the bus loading zone. |
| | Parent | McKinnon St and Front of | Maybe school can consider parking buses at front loop instead and direct parents to drop off on side entrance |
| McKinnon Elementary | Coordinator Parent | school McKinnon St and Front of | by parking lot. Maybe that would improve traffic flow. |
| McKinnon Elementary | Coordinator Parent | school McKinnon St and Front of | Most issues happen in front of school. Parents park on both sides of McKinnon or double park. Students get dropped off on the street or across the |

| McKinnon Elementary | Survey | N Main St | Sometimes there are drivers who drive too fast along North Main St. |
| McKinnon Elementary | Audit | School campus | Staff parking and bus drop-off in back parking lot. Not impacted too much by parent traffic |
| McKinnon Elementary | Audit | School parking lot | Staff directing traffic on McKinnon Road at drop-off loop exit |
| Mission Park Elementary | Survey | Acacia St | Acacia Street is very busy as well as neighborhood streets San Vincente and Palma Drive. Mornings are scary with speeding parents. Speed bumps, and lighted cross walks would help ensure our children's safety. Other side streets have bumps to slow traffic, I don't understand why the main streets to school don't have any. Having visible cross walks. A Lighted cross walk in front of the school would help ensure our children's safety. At morning drop off My husband and children were nearly clipped by a car speeding while in the cross walk of San Vincente & Acacia Streets. So he finds it safer to drive the kids to school instead of walking. |
| Mission Park Elementary | Survey | Acacia St | Cars driving too fast on Acacia and not stopping for pedestrians. Crossing guard available after school for safety walking home (not just on way to school). |
| Mission Park Elementary | Survey | Acacia St | School is on a very busy street Acacia St. Palma st is very busy, not many stop signs and teenagers going to adjacent high school are speeding. |
| Mission Park Elementary | Survey | Acacia St | Speed along acacia around the school. It would be nice to have cops occasionally patrol the area around Mission Park to enforce speed limits. In the 6 years my son has attended mission park, I've only seen patrol cars a few times after school. |
| Mission Park Elementary | Survey | Acacia St | Speed of vehicles traveling on Acacia. |
| Mission Park Elementary | Survey | Acacia St | The entire street of Acaciamostly before school. I feel more at ease when I see the Crossing Guard and the occasional appearance of the Police Enforcement stationed near the school campus at in the morning. |
| Mission Park Elementary | Survey | Acacia St | Traffic congestion on Acacia St. lots of speeding vehicles |
| | | | Vehicles do not make complete stops and often drive through stop signs and are also speeding. Having speed bumps put in to help decrease with cars speeding (on Lang, Acacia and Iverson). Also with the increase in |
| Mission Park Elementary | Survey | Acacia St and Iverson St Acacia St and San Vicente | children being abducted and trafficked, it is safer for me to continue driving my child to and from school. No crosswalk to cross Acacia at the intersection at San Vincente Ave. Car congestion at drop off traffic gets |
| Mission Park Elementary | Survey | Ave Acacia St and Sierra Madre | blocked in front of the school in both directions at drop off and pick up times. The intersection of West Acacia and Sierra Madre has no stop sign on West Acacia. The drivers just blindly turn |
| Mission Park Elementary | Survey | Ave | and going so fast it's frightening. |
| Mission Park Elementary | Survey | Alisal St | Crossing Alisal Street. Construction and changes make driver's decision uncertain. Other parents are too much in a rush. |
| Mission Park Elementary | Survey | Blanco Rd | Blanco is very dangerous. |
| Mission Park Elementary | Survey | Blanco Rd | Crossing Blanco road safely. |
| Mission Park Elementary | Survey | Blanco Rd and Iverson St | Yes, Blanco Road and Iverson Street intersection, consider a roundabout so kids can safely cross Blanco Road. Cars drive too fast and sometimes drive through red lights. |
| Mission Park Elementary | Survey | Clay Park | There are to many people that live on the street that are around our neighborhood and that hang around Clay Park the is just around the corner from us. Also there has been a lot of cars driving very fast on these streets. I do fear that some drivers will call my kids to there car close enough to take them. It almost happened to one of my daughters friend in front of Washington Middle school last year so Im cautious about my kids going home with other people or walking home. Not sure what could help change anything but I will always drive my kids to school and pick them up every day to make sure they are safe. |
| | | | |

| Mission Park Elementary | Survey | Crespi Way and Junipero Way | I've been walking my daughter to school since kindergarten, she's in 5th now. My biggest issue is when children are crossing the street at Crespi way and Junipero way, drivers don't wait until the kids are out of the street. Nearly every day I have almost been hit or have seen a child almost get hit. The drivers are impatient and distracted. I have seen drivers go around a kid and into the other lane while the child was in the middle of the crosswalk. Drivers need to stop and wait for kids to get out of the crosswalks and back into the sidewalks. People seem to drive better when there is the motorcycle officers around and crossing guards. |
|-------------------------|-------------|--|--|
| Mission Park Elementary | Audit | Exit of front parking lot | The exit is right turn only, but drivers are making a left turn |
| Mission Park Elementary | Survey | Front of school and School drop-off lane | Lack of afternoon crossing guard. Most mornings were covered. I would volunteer to do it myself if I didn't have work commitments. |
| Mission Park Elementary | Survey | Front of school and School drop-off lane | When there is no crossing guard, the cars go faster and don't stop for the kids sometimes. Cars in the school's drop-off lane who are supposed to only make R turns, make L turns into the crosswalk or drive straight across to Marion Ave. It's dangerous for kids who are in the crosswalks, not expecting the cars to turn that way. |
| Mission Park Elementary | Audit | General | 6 kids typically bike, 40% of students walk. No bussing |
| Mission Park Elementary | Audit | General | Staggered morning start time. Dismissal times are staggered but within 10 minutes |
| Mission Park Elementary | Cross Guard | General | Lots of people walking to school or through the neighborhood. |
| Mission Park Elementary | Cross Guard | General | Washington Middle realeases at a different time on Wednesdays, making traffic a bit lighter. |
| Mission Park Elementary | Principal | General | How does a traffic circle improve a 4 way stop? |
| Mission Park Elementary | Survey | General | Beacon lights on the stops. |
| Mission Park Elementary | Survey | General | Cars speeding |
| Mission Park Elementary | Survey | General | Concerned with amount of traffic and speeding cars. |
| Mission Park Elementary | Survey | General | Concerned with speed limits. |
| Mission Park Elementary | Survey | General | Concerned with the signal crossing at that time with lots of cars. |
| Mission Park Elementary | Survey | General | Crime. Child predators. |
| Mission Park Elementary | Survey | General | Crossing guards EVERY morning and afternoon when the kids get out. Last year, he was only there 50% of the time at best. |
| Mission Park Elementary | Survey | General | Crossing safely along the route to school. There is so much traffic due to three schools being less than a block from each other. |
| Mission Park Elementary | Survey | General | Drivers not paying attention, busy streets, no crossing guards, speeding traffic. Overall safe neighborhood, but drivers aren't paying attention & yielding to pedestrians. |
| Mission Park Elementary | Survey | General | General concerns for young girl walking alone to school |
| Mission Park Elementary | Survey | General | He's too young in my opinion |
| Mission Park Elementary | Survey | General | I do not want my daughter walk and riding her bike alone for safety reasons. None. It is not the schools responsibility to get my daughter safely to school. It is the schools job to keep her safe while she is there. |
| Mission Park Elementary | Survey | General | I have addressed this before, in the proximity of missionpark school there should be speed bumps to include a solar operated speed limit sign. There are high school students and parents rushing school, people using that route to rush to work, many times I have seen people viewing their cell phones as they are driving past Mission Park School. The motorist speed and not be attentive as they are driving in the proximity of Mission Park School. Action is needed before it's to late for a family and and or families. |
| Mission Park Elementary | Survey | General | I won't allow her to walk to school if there is no crossing guard. Dangerous drivers who speed or turn the wrong way in front of the school. |
| Mission Park Elementary | Survey | General | If there were security guards on the streets so children could be safer. |
| Mission Park Elementary | Survey | General | Making sure that there are cross guards before kids cross the street to get to school. |
| Mission Park Elementary | Survey | General | Morning traffic there are lots of cars and would have to cross by traffic signals. |
| Mission Park Elementary | Survey | General | My child's route to school is tranquil. |
| Mission Park Elementary | Survey | General | My concerns are all the streets my child has to cross with no adults to assure him it is safe to go and the amount of traffic coming from Mission and Palma School. I think either school should start at different time to avoid the busy streets for these young ones walking. I think for Mission Park because of covid maybe they should suggest different times for grade levels to avoid the congestion of traffic. More adult supervision making sure these kids make it safe to school. I feel there is a lot of boys (Palma) out when these little kids are going to school. Also the speeding of most cars that come down these streets. |
| Mission Park Elementary | Survey | General | No traffic circles |
| | 1-4 | 2.2.10.00 | |

| - | | | |
|--|----------|--|---|
| M: | | | Often there are multiple cars for a single family home 4and. Cars that over flow the driveway and into the street, taking over any possible bike lanes and indicates multiple people for one home. This leaves me concerned for community safety as well. Having too many people in one home leaves children inside at risk and those children passing by at risk. There should ne more regulations on single family homes. Often multiple people live in one home and having numerous cars overflowing into the streets. This leaves streets clogged up without proper use |
| Mission Park Elementary | Survey | General | of the bike lanes that tax payers paid for but cant use. People are driving too fast. No bike lane that separates car lane and bike lane. More speed bumps and speed |
| Mission Park Elementary | Survey | General | limits signs. Bike lane need to be draws for safe bikers. |
| Mission Park Elementary | Survey | General | Restoration of crossing guard program at every school site |
| Mission Park Elementary | Survey | General | South main intersection |
| Mission Park Elementary | Survey | General | Speed and amount of traffic along route. Bussing to and from school should be provided to all areas in the south Salinas area. |
| Mission Park Elementary | Survey | General | Speed of drivers was my biggest concern. Having a reliable crossing guard before and after school is a huge safety concern. We will now be driving our kids to school due to the fact that we moved. |
| Mission Park Elementary | Survey | General | Speed of surrounding traffic. Major intersection would need to be crossed. Lots of accidents occur at that intersection. |
| Mission Park Elementary | Survey | General | The cars go by very fast. There are no speed bumps anywhere. The 4 way stop near Palma is also very unsafe. Homeless people in the area. Cars that speed and no speed-bumps. |
| Mission Park Elementary | Survey | General | The crosswalk and sidewalk corners are not bike friendly and do not have handi-cap curbs. The traffic on Acacia is insane, and people constantly almost hit pedestrians in the crosswalks right in front of the school. SOMETHING NEEDS TO BE DONE. Sometimes there wasn't even a crossing guard! Terrible! There should be a crossing guard EVERY DAY. speed bumps! more crossing guards! flashing lights at cross walks! |
| Mission Park Elementary | Survey | General | There are no clear sidewalks in some locations. Please put cross walks on all courners. |
| Mission Park Elementary | Survey | General | Traffic does not respect signals. |
| Mission Park Elementary | Survey | General | We need more speed bumps and stop signs and if the cross walks had flickering lights when the kids use the cross walks. We have one parent and teacher volunteer at one cross walk, but there are several cross walks that the local children use. Our school is doing their best to inform and make sure parents follow parking lot rules and only make a right hand turn when exiting but ultimately we have to collectively take care of the children. Also electric bikes should not be allowed on the side walks. |
| Mission Park Elementary | Survey | Homestead Ave and Marion St | Crossings on corner of Homestead Avenue and Marion which can be a blind spot crossing and often traffic speeds down Homestead. This area if Homestead Ave becomes particularly busy during school hours as this is a pass through street for students getting to Hartnell college and Washington middle school either by car or walking. |
| Mission Park Elementary | Survey | Iverson St and Acacia St | Also add a crosswalk on acacia and iverson where there isn't one |
| Mission Park Elementary | Survey | Iverson St and Acacia St | En la intersección de la calle acacia y Iverson necesita una luz. El tráfico no respeta los altos. Van dos ocasiones que están a punto de atropellar A mi hija!!! . Los carros van a velocidades excesivas que no tienen tiempo de parar ni mirar a los peatones. |
| Mission Park Elementary | Survey | Iverson St and Acacia St | Iverson and Acacia interception traffic, car driving too fast. |
| Mission Park Elementary | Survey | Iverson St and Acacia St | Iverson and Acacia, a traffic light is need it. The cars did not respect 4 stop signs. |
| | | | |
| Mission Park Elementary | Survey | Iverson St and Acacia St | Luces sobre los señaleros de alto en las calles acacia y iverson. Stop sign on W. Acacia between Iverson and Riker. Pedestrian island for refuge if needed at corner of Iverson |
| Mission Park Elementary | Survey | Iverson St and Acacia St | and W. Acacia on Palma school side of the street. Traffic speed, car driving too fast at the interception of Iverson and Acacia. Car driving fast at the front of |
| Mission Park Elementary | Survey | Iverson St and Acacia St | school. |
| Mission Park Elementary | Survey | Iverson St and Junipero Way | I think there should be cross walk lines for Iverson and Junipero Way and crosswalk lines for Iverson and Crepsi. |
| Mission Park Elementary | Resident | Marion Ave | Requested speed bumps from city, but city declined. Offered to organize neighbors and pay for speed bumps if city assists with installation process. |
| Mission Park Elementary | Survey | Marion Ave and Acacia St | Full traffic light at Marion and acacia. Add additional crosswalk parallel to existing crosswalk at Marion and acacia. |
| Mission Park Elementary | Survey | Marion Ave and Acacia St | I think adding stop at that big cross walk by Marion, you would slow down the cars that speed down Acacia, but please no traffic circlesthey do not work!!!! also don't think a bike lane would help, I don't see too many kids riding their bike to school anymore, times have changed |
| | | | Yes, the crosswalk of Riker and Accacia. This needs to be updated just like all other high traffic crosswalks. There are 4 schools that use this intersection. |
| Mission Park Elementary Mission Park Elementary | Survey | Riker Ave and Accacia St Riker St and Geil Street | Riker and Geil street no flashing lights at cross walk to alert drivers. It is a very busy and congested area in the mornings Provide Riker and geil street some type of flashing lights to alert drivers of kids crossing. Maybe offer a buddy system for parents who have children in the area to sign up their kids so children don't walk alone. |
| Mission Park Elementary | Survey | San Vicente St | San vicente street sidewalk is horrible for the kids to ride their bikes or skates. It is uneven almost the whole street. on Iverson st. not every corner has a handicap accessible corner for the kids bikes and skates to ride on |
| Mission Park Elementary | Audit | School campus | Bike rack present, no skateboard rack |
| | ı | I | Back gate to campus is closed at 7:30, which has helped traffic by encouraging drivers to pull to the front of the |

| | | T | |
|-------------------------|-------------|--|---|
| Mission Park Elementary | Audit | School drop off loop | Some drop-off in #2 lane |
| Mission Park Elementary | Cross Guard | School exit driveway | Right turn ONLY out of driveway, but cars go straight or turn left. |
| Mission Park Elementary | Parent | School exit driveway | When School gets out there are lots of cars along Acacia, people stop and park and wait for kids. Suggest to install a stop sign to give cars opportunity to leave campus and to keep area around exit clear for improved driver visibility. |
| Mission Park Elementary | Survey | School frontage | No only thing that I would suggest is enforce red zone parking. Constantly see parents either park in red zone or double park on street to get child. Causes unsafe conditions when you have other cars trying to go around into oncoming lane to pass. |
| Mission Park Elementary | Audit | School parking lot | No left turns out of lot, but some parents still turn left |
| Mission Park Elementary | Parent | School parking lot | How will left turns be restricted out of the driveway of the school? |
| Mission Park Elementary | Survey | School parking lot | The simple solution is stop and go. Vehicle block the entry way to drop of the children at the front. Vehicle are allowed to park in the red zone directly in front of the school where there should only be stop and go traffic. Parents should not be allowed to get there early simply to stay parked u til there child finally gets released from class. They block traffic. They should go through and if there child is not out you must proceed and make another round to allow other vehicle to go through. |
| Mission Park Elementary | Survey | School parking lot | Yes the drop off area, there are 3 points where there are crosswalks on campus and it adds to car stoppage, should be just 2 areas around the drop off not in the middle |
| Mission Park Elementary | Audit | W Acacia | 1 hour parking in front of school |
| Mission Park Elementary | Audit | W Acacia | Some speeding during off-peak hours |
| Mission Park Elementary | Audit | W Acacia | Some students cross outside of crosswalk, but most use crosswalk |
| Mission Park Elementary | Cross Guard | W Acacia St | Heard from parent who rides his bike with daughter that it is horrible riding along Acacia. |
| Mission Park Elementary | Cross Guard | W Acacia St | Issues with visibility due to sun. |
| Mission Park Elementary | Cross Guard | W Acacia St | Lots of cars going fast. |
| Mission Park Elementary | Cross Guard | W Acacia St | Lots of traffice produced by other schools in the area. |
| Mission Park Elementary | Survey | W Acacia St | In the morning cars and parents are in a rush. Rolling through stop signs and speeding down our street. The local high school drivers obey the speed limit better than adult drivers. |
| Mission Park Elementary | Cross Guard | W Acacia St and front of school | Curb is designated loading zone, but parents park there anyway. |
| Mission Park Elementary | Principal | W Acacia St and Iverson St | Better traffic management for peak hours since there are four schools in close proximity to each other. |
| Mission Park Elementary | Cross Guard | W Acacia St and Marion Ave W Acacia St and San Vicente | Lots of overgrown trees, low visibility for drivers. |
| Mission Park Elementary | Parent | Ave | Passing Mission Park elem east bound between San Vicente and Iverson is problematic. Study how many cars go through and speed levels. Suggestion of installing a stop sign at Marion and Acacia. |
| Mission Park Elementary | Survey | W Acacia St and San Vicente Ave | Crossing the intersection of University and central intersection and W. Acacia st and San Vincente ave. Maybe crosswalks on W. Acacia st. and San Vincente ave. The intersection is not very safe for children to cross. |
| Mission Park Elementary | Parent | W Acacia St between San Vicente Ave and Iverson St | Lots of speeding traffic through this street. Fatal incident involving a student a few years back (2006?). Suggest to install speed bumps. |
| Mission Park Elementary | Survey | W Alisal St | Traffic on West Alisal st |
| Mission Park Elementary | Survey | W Alisal St and Acacia St | Too much traffic. Stop lights at crossings would alert drivers. |
| Mission Park Elementary | Survey | W Alisal St and Acacia St | W Alisal St and Acacia St. Lights to alert drivers at all crossings. |

| | | Tuscany Blvd and Tuscany | |
|--------------------------|--------|--|--|
| Monte Bella | Audit | Way | High-viz crosswalk in place and crossing guard. Still issues with drivers yielding to pedestrians. |
| Monte Bella | Audit | Tuscany Boulevard | Speeding. Bike lanes in place. Parents double park to drop off students |
| Monte Bella | Survey | Verona Ct and Monte Bella Blvd and Freedom Pkwy | High schools students are out almost at the same time and drive at high speeds thru Verona ct and mobtebella blvd. also parents in the morning drive at high speeds when dropping off children thru Freedom parkway |
| Monte Bella | Survey | Williams Rd | More school staff helping with the major crossings - Williams Rd. Si que se quitara tanto carro estacionado por días en todo área de Williams y se respetará el Cruze pateonal |
| Monte Bella | Survey | Williams Rd | que está enfrente de la preparatoria Alisal . |
| Monte Bella | Survey | Williams Rd | Speeding and unsafe crossings along Williams Rd |
| Monte Bella | Parent | Williams Rd and Gabilan Plaza Apartments | Cars will drive by crosswalk while people are in the crosswalk. This crosswalk has no lights, no stop signs. Concerned because there is nothing to stop traffic and it is very busy on Williams Rd. Lots of kids who go to Alisal High and Monte Bella Elementary use this crosswalk. |
| Monterey Park Elementary | Audit | Alameda Ave | Drop off zone here |
| Monterey Park Elementary | Survey | Blanco Rd | Speeding traffic in Blanco |
| Monterey Park Elementary | Audit | E Romie Ln | |
| Monterey Park Elementary | Survey | E Romie Ln | Crossing romie lane |
| Monterey Park Elementary | Survey | E Romie Ln | East Romie Lane is a very busy street. It is very concerning. General concern with how unsettling our nation is in right now. Need Crosswalk and reflectors. The busy streets |
| Monterey Park Elementary | Survey | E Romie Ln | by children have to cross is East Romie Lane and it is concerning. |
| Monterey Park Elementary | Survey | E Romie Ln | My issue is that my 6 year old would have to cross the street where the light stop is by Memorial hospital. After that, he would then have to cross several cross-walks to get to his school. My son would have to cross East Romie, then cross Los Palos Drive, then cross San Miguel Ave, then Via Paraiso, and lastly San Fernando Drive. Adult supervision during these high traffic area cross walks that are near the hospital and houses. |
| M . B . E | 6 | 5 D | |
| Monterey Park Elementary | Survey | E Romie Ln | Romie lane is a busy street to cross. |
| Monterey Park Elementary | Survey | E Romie Ln | Romie Lane traffic and CA street |
| Monterey Park Elementary | Survey | E Romie Ln | The amount of speeding cars through a residential neighborhood. The majority being employees of the hospital or the doctors on Los Palms and Romie Lane. Having students walk in groups together. Having more street lights. Having crosswalks with flashing light when people are crossing. It would be nice if those working on Los Palos Street or Romie Lane would use Main Street to get to Romie Lane or Blanco to Abbott Street instead of driving through neighborhoods. |
| Monterey Park Elementary | Audit | Exit of front parking lot | The exit is right turn only, but drivers are making a left turn |
| Monterey Park Elementary | Survey | Front of school | Parents dropping students off in the middle of the street. Ensure students are properly dropped off by parents, i.e using the crosswalk, not dropping off in red zones. Would like a safety enforcement officer present at all times before and after school |
| Monterey Park Elementary | Audit | General | 6 kids typically bike, 40% of students walk. No bussing |
| Monterey Park Elementary | Audit | General | AAA safety patrol program in place for 6 years, students assist with traffic control |
| Monterey Park Elementary | Audit | General | School sends out frequent messaging on traffic safety |
| Monterey Park Elementary | Audit | General | School start and dismissal times are staggered by grade level |
| Monterey Park Elementary | | General | Sidewalks in good condition. |
| Monterey Park Elementary | Audit | General | Staggered morning start time. Dismissal times are staggered but within 10 minutes |
| Monterey Park Elementary | Audit | General | Students biking on sidewalks, 15-20 students bike. After school Bike Club led by parents |
| Monterey Park Elementary | Survey | General | Crosswalk guard needed |
| Monterey Park Elementary | Survey | General | Distance- school to far from home |
| Monterey Park Elementary | Survey | General | Distance, due to inter district transfer. |
| Monterey Park Elementary | Survey | General | Distance. To far from school |
| Monterey Park Elementary | Survey | General | Fast drivers. More cross guards. |
| Monterey Park Elementary | Survey | General | Having crosswalks and stop signs. |
| Monterey Park Elementary | - | General | I live by an area where there is a lot of homeless people where sometimes they are under the influence. I would like the bus stop to be closer to the apartments. |
| Monterey Park Elementary | Survey | General | I think my kid is to young to walk to school with what violence and crime is at |
| Monterey Park Elementary | Survev | General | I wouldn't let my kids walk to or from school they get picked up every day would not want to be to happen to them being alone. |

| | | 1 | 1 |
|--|------------------|-----------------------------------|---|
| | | | When the kids cross Alvin from el dorado to the other side of Alvin its so dangerous. It is a 4 lane street. Cars drive so fast. One time my son was crossing and they almost ran him over then the driver proceeded to flip off my son and tell him he was an idiot for not paying attention. I see this happen every morning when I drive past there. The cross walks are only painted there is no lights for drivers to be warned that someone is crossing, live seen when the kids are already walking half way in the cross walk and the care are driving so fast past the kids. |
| | | | seen when the kids are already walking half way in the cross walk and the cars are driving so fast past the kids and its such a close call. Maybe even speed bumps on Calaveras. Exiting the garage is dangerous on Calaveras. There are so many cars on the side walk and since these houses don't have a full drive way the cars are parked |
| | | | covering the side walk. When exiting the garage its impossible to see if there are cars coming and if you exit and a car is coming they don't stop they just honk at you and speed away behind you. There is also a lot of foot |
| Natividad Elementary | Survey | Alvin Dr and El Dorado Dr | traffic on this street due to the El Dorado park. |
| Natividad Elementary | Audit | Alvin Dr and Modoc | No crossing guard at this crosswalk. RRFB has helped with driver yielding but more is needed. |
| Natividad Elementary | Parent | Alvin Dr and Modoc Ave | Even at signal crosswalk, drivers don't respect and don't stop for anyone. Would like to see a stop sign at this three way stop for cars coming from the opposite end to the school. It's |
| Natividad Elementary | Parent | Alvin Dr and Modoc Ave | hard to make a left turn onto Modoc due to high speed and traffic. |
| Natividad Elementary | School VP | Alvin Dr and Modoc Ave | Lots of fast traffic goes through this intersection. |
| N I. I. E | ь . | Alvin Dr, Modoc Ave, | |
| Natividad Elementary Natividad Elementary | Parent Audit | Linwood Dr Alvin Drive | Never see police patroling the area. Some police would help in enforcing traffic laws. High traffic speeds on Alvin, drivers don't stop at crosswalk |
| Natividad Elementary | Audit | Alvin Drive | No marked crosswalk at El Dorado, crosswalks in place at Lassen Ave and Linwood Drive |
| Natividad Elementary | Audit | Alvin Drive | Speeding is an issue and drivers are not stopping for pedestrian at the crosswalk |
| | | | |
| N I. E | 6 | A | Crosswalks all along E. Alvin ave. Cars not respecting speed limit on all streets around school (Modoc ave, |
| Natividad Elementary | Survey | Alvin Drive | Glacier dr. Etc) not having speed bumps on streets around school or enough sings asking to reduce speed. E. Alvin Dr. some cars won't stop for children crossing & some drive beyond speed limit. There should be a |
| Natividad Elementary | Survey | Alvin Drive | crossing guard on E. Alvin Dr. |
| , | | | There's a lot of traffic in the morning and drivers are not careful and they speed. I'm always afraid someone is |
| | | | going to get hit. In all crosswalks have those flashing lights so drivers could see them and slow down. Have |
| National Flancastan | C | Alicia Datas | safer crosswalk with flashing lights so driver could see and slow down in all the crosswalks on Alvin street, since |
| Natividad Elementary Natividad Elementary | Survey Survey | Alvin Drive Alvin Drive | there are many schools on this street. Traffic on Alvin dr. My children went the other way around to school to avoid Alvin Dr. |
| Natividad Elementary | Survey | Alvin Drive | When crossing to school cars don't stop in Alvin drive even if the crossing light is on. |
| | | | |
| Natividad Elementary | | Chaparral St | Install speed bumps on both sides of street. |
| Natividad Elementary | Audit | Chaparral Street | Bolt-on speed humps in place. Street widens significantly between Noice Dr and Maryal Drive |
| Natividad Elementary Natividad Elementary | Audit | Front of school campus General | Principal brought up the idea of drop off and pick up loop A lot of traffic, speeding. |
| Natividad Elementary | Survey Survey | General | Afraid that a car will not respect speed limit at crosswalks and that my daughter will get hit. |
| Natividad Elementary | Survey | General | Cars go by too fast. |
| Natividad Elementary | Survey | General | Concerned about street crossings because they have heavy traffic. |
| Natividad Elementary | Survey | General | Concerned with gangs, traffic, etc. |
| Natividad Elementary | Survey | General | Concerned with lack of safety in the city. |
| Natividad Elementary | Survey | General | Concerned with the bad traffic education from drivers because we need to cross several streets and the majority of drivers are rushing and are very imprudent. |
| Natividad Elementary | Survey | General | Cross walk in alvin dr even though there's a lighted Crosswalk cars still don't fully stop. I think if there is somebody with a stop sign it will help |
| Natividad Elementary | Survey | General | Drivers do not respect speed limits. |
| | | | Honestly this does not apply to my daughter since where we live she has no need to cross main streets like |
| Natividad Elementary | Survey | General | Alvin and I also don't feel comfortable letting her walk alone. |
| | | | Just distance related. Which has us past huge homeless encampment near China Town. This is a huge safety concern and we could never walk to school. Dogs roaming neighborhood. Even when driving to school, I |
| Natividad Elementary | Survey | General | encounter dogs roaming the neighborhood often just parking and waking a block or two to the school. |
| • | | | Lots of traffic goes by very fast and they do not stop and look to see if pedestrians are crossing. There is a |
| Natividad Elementary | Survey | General | signal missing on the main street. |
| Natividad Flamentons | Survey | General | Maybe schedule during cold season should be at least half hour later because going outside soon after getting them out of bed is difficult. |
| Natividad Elementary Natividad Elementary | Survey | General General | My child is still young. |
| Natividad Elementary | Survey | General | No issues since there was always a person to help them cross. |
| Natividad Elementary | Survey | General | Parking for parents, drop off and pick up zones, speeders |

| New Republic Elementary | Audit | | A few students cross Natividad |
| New Republic Elementary | Audit | Arcadia Way at school entrance | Crosswalk in front of school is only one across Arcadia. No crossing guard. Lots of students crossing, mostly with parents |
| New Republic Elementary | Audit | Arcadia Way near Emerald | Broken sidewalk |
| New Republic Elementary | Staff | Drop off loop and front of school | Guard duty feedback: Cones were placed because parents would block the entrance for the buses. The drop off lane is one-way and you can only turn right out of the parking lot. There were a lot of people that turned left, and that's where it gets congested. You may only turn right. |
| New Republic Elementary | Staff | Drop off loop and front of school | The outer lane is the only place where you can drop off. Inner lane is drive through. Cars do not respect that rule and drop off wherever they can. |
| New Republic Elementary | Audit | El Dorado Drive | |
| New Republic Elementary | Audit | Emerald Dr | Buses drop off in loop off Emeral Drive. School closes loop to prevent parent drop-off |
| New Republic Elementary | Audit | Emerald Dr | Parents are not respecting bus loading zone by parking or stopping at their locations |
| New Republic Elementary | Parent | Emerald Dr | On Emerald all of the side streets are full, and there is no parking. |
| New Republic Elementary | Survey | Emerald Dr | Yes Emerald Dr. Cars pass by so fast and a lot of the kiddos that walk to school are coming from this street in clouding my kiddos. Emerald Dr is a very high trafficked area that need major attention 4 buses, lots of students dropped off. Some students walk and a few bike. School serves large attendence area |
| New Republic Elementary | Audit | General | and some transfer students. |
| New Republic Elementary | Audit | General | No crossing guard at this school |
| New Republic Elementary | Audit | General | SRO officer used to help control traffic. Their grant ran out so no assistance in the future. |
| New Republic Elementary | Principal | General | School is loosing the SRO and the presence of a person. School needs to plan ahead when the kids come back to school. |
| New Republic Elementary | Staff | General | New Republic has a high percentage of walkers and bikers. |
| New Republic Elementary | Survey | General | Cars speeding, crosswalk visibility |
| New Republic Elementary | Survey | General | Crosswalks and drivers racing and not following traffic laws. |
| New Republic Elementary | Survey | General | Having cross walkers at the main crosswalks by the school Lack of duty of care by the people driving and compliance of traffic laws. Bus drivers doing illegal moving. |
| New Republic Elementary | Survey | General | Lack or duty of care by the people driving and compilance of traffic laws. Bus drivers doing illegal moving. Crosswalks and drivers racing and not following traffic laws. |
| New Republic Elementary | Survey | General | Sidewalks are cracked and pushing together |
| New Republic Elementary | Survey | General | Speeding traffic and irresponsible driving practices of frustrated drivers. |
| New Republic Elementary | Survey | General | Speeding traffic, Lack of safe crossing devices, and erratic drivers. |
| New Republic Elementary | Survey | General | The drop off pick up at new republic elementary school is very difficult as far as driving in and out. The kids'safety pre-covid was always a factor with people not obeying the rules and making long lines instead of parking. No place to park available. |
| | Survey | General | The school is far from our house. |
| | | | |
| New Republic Elementary | Jourvey | General | The speed to be reduced for drivers, |

| New Republic Elementary | Survey | General | Wreckless driving would be #1 and the violence. |
|--|----------------|--|--|
| New Republic Elementary | Audit | School campus | Parents park on street and cross through school parking lot. Crosswalk does not extend through 1st section of parking lot |
| New Republic Elementary | Parent | School driveway and drop off loop | I've observed drivers passing on all sides while children are in the crosswalk entering the school and in the drop off and pickup zone. |
| New Republic Elementary | Parent | School driveway and drop off loop | Very frustrating design for drivers. |
| New Republic Elementary | Audit | School drop-off loop | School staff act as crossing guards and traffic control in loop. Parents drop off in #2 drop-off lane. |
| New Republic Elementary | Audit | School drop-off loop | Staff assist on drop off and pick up |
| New Republic Elementary | Audit | School parking lot | Left turn lane blocked off at parking lot exit - parents still turn left |
| New Republic Elementary | Parent | School parking lot | Drop offs occur in the parking area rather than in the drop off area. Its difficult for small children to be visible. |
| New Republic Elementary | Survey | Wimbeldon Way and Kent St | Install a visible crossing lane on wimbledon way and kent st. |
| North Salinas High School | Audit | Alvin Dr and Kip | High viz crosswalk in place, not a lot of vehicle and ped conflicts School staff's biggest concern. Lots of students crossing here, conflicts with vehicles turning left. Buses leaving |
| North Salinas High School | Audit | Alvin Dr and McKinnon | school also have a hard time making a left turn, no left turn signal phase. |
| North Salinas High School | Audit | Bike and ped path behind school | Issues with drug use, graffiti. Requests for lighting from parents but there is lighting in place - maybe its not working or too high? Unclear who maintains, District maintenance staff won't clean up grafitti etc. Popular walking and biking route, students coming in this way have a safe path of travel into campus. |
| North Salinas High School | Parent | E Alvin Dr | Lots of speeding |
| | | E Alvin Dr and Linwood Dr and E Alvin Dr and Kip Dr and Rainier Dr and Linwood | Alvin is a dangerous street to cross. There aren't many crosswalks and cars don't stop. Especially Alvin and |
| North Salinas High School | Survey | Dr | Linwood and Alvin and Kip. On Rainier and Linwood we need a visible crosswalk. Lots of students cross there. |
| North Salinas High School | Audit | General | 2,000 students on campus. 40-60% walk. About 50 students bike. 3-5 buses. The rest get dropped off. Alvin Drive is northern school boundary, so students coming from south and east and west. |
| North Salinas High School | Student Survey | General | When I walk sometimes I have to cross west Alvin Dr. to east Alvin Dr. and it crosses North Main, sometimes cars just turn even when they see us walking. |
| North Salinas High School | | General | Distance |
| North Salinas High School | Survey | General | It's my sons first year here and has not been on campus due to pandemic. |
| North Salinas High School | Survey | General | It's unsafe to walk for children, specially young girls. |
| North Salinas High School | Survey | General | More school security |
| North Salinas High School | Survey | General | My daughter was molested by a school mate and that is a very traumatic experience for us. |
| North Salinas High School | Survey | General | My son is in the 9th grade and is anxious to be at school. |
| North Salinas High School | Survey | General | Security |
| North Salinas High School | Survey | General | Street crossings |
| North Salinas High School | Survey | General | Worried that someone will harm him as he walks to school. |
| North Salinas High School | Audit | Kip | Lots of students crossing Kip everywhere to reach school campus. Some broken sw across from school. |
| North Salinas High School | Parent | Maryal Dr and High School Alley | Lots of trash, not enough lighting, people hanging out, generally feels unsafe for students. |
| North Salinas High School | Audit | McKinnon St | Parents drop off high school students on McKinnon, students cross Alvin to get to school |
| North Salinas High School | Audit | School campus | Parking lot on Alvin west of McKinnon is used for parent drop-off and student parking. Functions pretty smoothly. Students must cross driveway that buses use to get to back of campus, crossing guard controlling crossing but not a lot of vehicle conflicts. No other crossing guards around school. Parents enter and exit from yellow gate to the west, issues with parents trying to turn left. |
| North Salinas High School | Audit | School campus | Parking lots on Alvin: lot east of McKinnon is staff only, staff at entrance preventing parent parking. Staff would like to have key-activated gate at this lot to prevent parent access and save staff time. |
| 5 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - 2 - | | | Very small loop. Buses used to drop off here but they got stuck due to parent drivers. School staff would like to have a bigger and more modern loop. Drivers entering and exiting loop makes Kip pretty chaotic. Parking lot |
| North Salinas High School | | School lool off Kip | past loop is staff parking, closed to parents. |
| Oasis Charter School | Audit | General | 200 students. All students driven to school. None live within 2 miles of campus, no busing Start times staggered - kindergardeners start 15 minutes before other grades. School has recently implemented new drop-off system with different drop-off areas for each grade level. Staff assists with traffic control at parking lot entrance and with checking in students at each drop-off area. 1-way traffic in loop, entrance on west leg of |
| Oasis Charter School | Audit | General | Westridge Parkway. |

| Rancho San Juan High School | Parent | Arthur St and Russell Rd | Concern about Arthur St. where students would have to walk through Russell and San juan grade road. Same concern relating to violence and lack of sidewalks everyone is talking about. |
| Rancho San Juan High | . urone | Bollenbacher Dr and Rogge | The intersection of where the three schools, Rancho San Juan, Bolsa Knolls, and la Joya meet. It might get hectic |
| School | Survey | Rd | while taking kids to school. |
| Rancho San Juan High School | Survey | Boronda Rd and Natividad Rd | If possible to alleviate traffic at Boronda and natividad. |
| Rancho San Juan High School | Parent | Boronda Rd and Russell Rd | Concerned about street becoming a "free road" after the one light; drivers speed making it an unsafe road for students. |
| SCHOOL | rarent | boronda na ana nussen na | Students. |
| Rancho San Juan High School | Parent | Boronda Rd and San Juan Grade Rd | There is a mobile home park on the corner of Boronda and San Juan Grade and a lot of our students have to walk from there but there are zero sidewalks. From Boronda to all the way down to where Russel Road connects with San Juan Grade; that was an insurance for a lot of the parents. |
| Rancho San Juan High | | | with San Juan Grade; that was an issue last year for a lot of the parents. |
| School Rancho San Juan High | Survey | Cornwall St | Yes crossing Cornwall st to the other side of San Juan Grade Rd |
| School | Survey | El Dorado Dr | Extend Eldorado to the high school |
| Rancho San Juan High School | Survey | El Dorado Dr | It is a reasonable request to include on the safe routes a proposal that would extend El Dorado through the fields to reach Rancho San Juan high school. Without said a route that includes an ADA safe sidewalk. It would also be a reasonable request to put a sidewalk on the old Natividad Road for students to walk since this is the only current walking path available for our students in the Harden in Ranch area to walk to school. Unfortunately in Natividad Road is an unsafe pass to walk on because it is a 45 miles zoned area. |
| Rancho San Juan High School | Survey | El Dorado Dr | The best way to help the traffic congestion would to get another road out. It would be wonderful if El Dorado Dr. could go straight to the High School. More kids could bike or walk if that was the case. |
| Rancho San Juan High | Julies | El Dorado Street - Harden | Are there plans to develop a safe walking and bike route from the Harden housing area to the high school, |
| School | Parent | Housing | maybe via extending El Dorado street? |
| Rancho San Juan High School | Audit | General | 1700 students currently, expected to grow. 200-300 students bused typically, half of remaining students walk and half are dropped off. About 10 students bike, some skateboard. Bike parking present on campus. No staggered start times, but the 3 schools on Rogge Road have 15 minutes between start times |
| Rancho San Juan High | Barant | Comoval | Change the start time to sucid traffic between selectic in class provincity. |
| School Rancho San Juan High | Parent | General | Change the start time to avoid traffic between schools in close proximity. Distracted students crossing the street looking at their phones and listen to music. Perhaps doing a workshop |
| School | Parent | General | for students about safe crossing: "Usen los 5 sentidos al cruzar la calle" |
| Rancho San Juan High School | Parent | General | Due to all of the schools being so closet o each other and starting times being only a few minutes after each ther, there is a lot of congestion in all of the neighborhood. |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Parent | General | Encourage students to be attentive when walking to school |
| School | Parent | General | Implement the use of technology and install cameras on traffic lights to encourage parents to drive safe. |
| Rancho San Juan High School | Parent | General | Implement these changes "as soon as possible hopefully before students go back to school" |
| Rancho San Juan High | raicht | deneral | It would be great for students to be able to ride their bikes daily to school, is there a way there could be secure |
| School See the Ulint | Parent | General | routes for bikes |
| Rancho San Juan High School | Parent | General | More police presence to at least scare and encourage parents to drive safely in school zones. |
| Rancho San Juan High | | | Request to offer more recommendations to parents and students who have to drive from much farther to get to |
| School Rancho San Juan High | Parent | General | school and for whom walking and biking is not a viable option due to distance. Two parents touch on the concern relating to school and district boundaries and how that impacts the lengthy |
| School | Parent | General | drive they have because of the way boundaries are laid out in their neighborhoods. |
| Rancho San Juan High School | Staff | General | 2020 was first full academic year for RSJ |
| Rancho San Juan High | Stan | delleral | Enrollment is 1180 give or take will be about 1700 next year. The problem will double. Expecting to top off at |
| School Bandha Can han Hinh | Staff | General | 1800 or 1900. |
| Rancho San Juan High School | Staff | General | No crossing guards at school, only principal helps direct traffic. |
| Rancho San Juan High | | | |
| School | Staff | General | We had a small consistent crew of students biking about 4-5 bikes. |
| Rancho San Juan High | | | A walking concern I have is the issue of pavements/sidewalks. I live over at North Main Street and the sidewalks |
| School Rancho San Juan High | Student Survey | General | tend to be a bit dirty or maybe even sometimes unsafe due to debris after a rainstorm. |
| School | Student Survey | General | All the lights and riding a bike through the fields |
| Rancho San Juan High School | Student Survey | General | At the intersection of San Juan Grade Rd & Rogge Road there is cross walk but not many people pay attention to it and still dive anyways. Something that can make it a lot more safe is the addition of two crosswalk signs exactly like the ones in front of Everett Alvarez High School. They'd have a button so that it can turn on the lights telling the drivers to stop so the students can cross the street. |
| Rancho San Juan High School | Student Survey | General | Car accidents near boronda road |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | cars not looking out for people walking |
| School San Juan Figh | Student Survey | General | cars pass by fast |
| Rancho San Juan High | | | Chance of an accident, Strangers, and a long walk home - I just don't like the feeling that there is a chance that |
| | | | |

| Rancho San Juan High | | | |
|--------------------------------|----------------|---------|---|
| School | Student Survey | General | Could get hurt by someone Parents are worried i can get taken or hit. |
| Rancho San Juan High | 6. 1 . 6 | | |
| School Rancho San Juan High | Student Survey | General | Crossing Russel road and San Juan grade road is super dangerous with super fast cars passing Plus there are |
| School | Student Survey | General | no side walks down one side of San Juan grade road and Half of Russel road. |
| Rancho San Juan High | _ | | |
| School | Student Survey | General | drivers don't stop for people who are walking. |
| Rancho San Juan High School | Student Survey | General | Drivers take too long to slow down |
| Rancho San Juan High | otadoni odnioj | donoral | |
| School | Student Survey | General | FIX THE SIDEWALKS!!!! - The side walks are sometimes really broken! |
| Danisha Can luan Hink | | | From my house to Rancho, it's pretty far away, and so walking wouldn't be convenient on that part, other than |
| Rancho San Juan High School | Student Survey | General | that, there's nothing else concerning except the usual dangers there always are when walking to school My mom just doesn't let me walk. |
| Rancho San Juan High | | | |
| School | Student Survey | General | getting hit by a car |
| Rancho San Juan High School | Student Survey | General | Getting kidnapped |
| Rancho San Juan High | Student Survey | General | detailing numapped |
| School | Student Survey | General | getting kidnapped |
| Rancho San Juan High | 6. 1 . 6 | | |
| School | Student Survey | General | getting ran over on san juan grade road |
| Rancho San Juan High | | | going past the stop light next to north salinas high and harden on Alvin Dr it was very scary - walking to rancho |
| School | Student Survey | General | is gonna be very hard because of how far it is and the dirt roads you need to go through |
| Rancho San Juan High | 6. 1 . 6 | | |
| School Rancho San Juan High | Student Survey | General | How cars did see if kids needed to cross the street |
| School | Student Survey | General | I am not concerned about my neighborhood, it's really close to my school. |
| | _ | | |
| Rancho San Juan High | 6. 1 . 6 | | I am not really concerned about any safety issues about having to walk home. The bus drops me off at McKinnon |
| School | Student Survey | General | park which is very close to my house. I believe that my neighborhood is very safe compared to others. |
| | | | I can't walk or ride a bike to school, I ave always lived a long ways away from school so usually my parents |
| | | | would drive me to the closest bus stop and the bus would take me to school from there. I live in the prundale |
| Rancho San Juan High | 6. 1 . 6 | | area and the school I went to was about 25 - 30 mins away depending on traffic I would have to live really |
| School Rancho San Juan High | Student Survey | General | really close to the school to be allowed to walk or ride a bike to school. I don't have any safety issues walking to and from school since my route doesn't involve crossing the road more |
| School | Student Survey | General | than 2 or 3 times |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | I dont like the crime at bolsa knolls. |
| School | Student Survey | General | I dont memorize the route yet |
| Rancho San Juan High | j | | I don't usually walk but from my house to the school, my only walking issue would be crossing since a lot of cars |
| School | Student Survey | General | pass by. |
| Rancho San Juan High School | Student Survey | General | I don't walk to school anymore, but probably just all the traffic around the crossway where Bolsa knolls is at. |
| Rancho San Juan High | | | I don't walk to school but I've notice that there really isn't a sidewalk on the left side of the road across Rancho |
| School | Student Survey | General | San Juan High School. |
| | | | |
| | | | I fear for my safety because I would have to bike in Natividad Road and Rogge Road. The reason I don't bike is because getting out of Old Natividad Rd, there is this long path with no biking lane, sidewalk, or any light posts |
| Rancho San Juan High | | | available. In addition, cars are usually speeding in a one way path, where it is dangerous when crossing in the |
| School | Student Survey | General | small bridge I also think that if more people start biking to school, the school would need more bike racks. |
| Rancho San Juan High School | Student Sunov | General | I feel like it's safer and more efficient for students to take the bus rather than walking to school if they are not able to carpool or get driven by family members. |
| Rancho San Juan High | Student Survey | GOTGIAI | auto to carpool of get univer by family members. |
| School | Student Survey | General | i feel like people go fast on all the streets lol |
| Rancho San Juan High | 6. 1 . 6 | | |
| School | Student Survey | General | I get driven to school |
| | | | I have a walking and biking safety issues when I skate to my grandma's house after school because the sidewalk |
| | | | is very uneven in Glendora Way - My grandma fell a few days ago and bruised her whole face walking to her |
| Rancho San Juan High School | Student Come | Conoral | house, she also just got surgery on her knee and it feels worse now. I just wish they could the sidewalk so I don't have to worry about the safety of my grandma and family when we go out. |
| Rancho San Juan High | Student Survey | General | don't have to worry about the safety of my grandma and family when we go out. |
| School | Student Survey | General | I have almost no concern besides getting lost on the way to school |
| Rancho San Juan High | | | |
| School | Student Survey | General | I have never walked to school because of distance and traffic. |
| Rancho San Juan High | | | I have no issues with the biking saferty issues my concern is more far I live and the traffic with everything trying |
| School | Student Survey | General | to get to the same place at the same time and all the school leading the same way Im always late. |
| Rancho San Juan High | G: 1 : 6 | | I have to cross Jade Dr. and it takes some time for the cars to stop, sometimes they don't wait fully until I'm on |
| School Rancho San Juan High | Student Survey | General | the sidewalk to make a turn. I have to cross many intersections and it would take too long to get too school - There is too much traffic and |
| nancho San Juan High | I | | private to cross many intersections and it would take too long to get too school - There is too much traffic and |
| | | | |

| | 1 | | |
|--------------------------------|-----------------|---------------|--|
| Rancho San Juan High School | Student Survey | General | i have to cross mckinnon park |
| Rancho San Juan High | otadont outroj | donoral | That's to cross manifest park |
| School See Just High | Student Survey | General | i have to go through fields |
| Rancho San Juan High School | Student Survey | General | i have to ride my bike at natividad and thereÅ a lot of trafic |
| Rancho San Juan High | 6. 1 . 6 | | i have to walk along san juan grade road and i dont remember if there are any sidewalks but there arnt really |
| School Rancho San Juan High | Student Survey | General | any on the right side |
| School | Student Survey | General | I haven't been to the school - no eh ido a la escuela entre a clases cuando ya cerro la escuela |
| Rancho San Juan High | Student Sunsay | General | I haven't noticed any |
| School Rancho San Juan High | Student Survey | General | i naven i noticed any |
| School | Student Survey | General | I haven't walk or bike to school because is too far. |
| Rancho San Juan High School | Student Survey | General | i just don't wanna walk early in the morning |
| Rancho San Juan High | oradoni od roj | donoral | in Just work warms warm out by in the morning |
| School Bancha San Ivan High | Student Survey | General | l just live far |
| Rancho San Juan High School | Student Survey | General | I just live far |
| Rancho San Juan High | | | I live by the Santa Rita school and sometimes it can be hard to walk by there because of the people and |
| School Rancho San Juan High | Student Survey | General | neighborhood it is. |
| School | Student Survey | General | I live far - I want to stay in distance learning for the rest of the year |
| | | | |
| Rancho San Juan High School | Student Survey | General | I live in Harden Parkway, there was never a really big issue except that in a cross that I have to make cars wouldnt stop to give me a chance to walk by. I would have to wait there a while until someone actually stopped. |
| Rancho San Juan High | j | | , , , , , , , , , , , , , , , , , , , |
| School Rancho San Juan High | Student Survey | General | I live on the completely other side of town I definitely need to drive. |
| School | Student Survey | General | I only walk to the bus stop so I don't really have any concerns. |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | I think my neighborhood is safe. I also live around monte bella. |
| School | Student Survey | General | I use a car. |
| Rancho San Juan High | Ct. down Common | C | I usually don't walk to school from my house but after school I walked to my grandmother's house and it would |
| School Rancho San Juan High | Student Survey | General | usually take a long time for cars to stop when I was crossing San Juan Grade Road. |
| School | Student Survey | General | I usually go in a family vehicle so I don't have much issues about walking or biking to school. |
| Rancho San Juan High School | Student Survey | General | I walk through the fields and on a road west there is no side walk - No sidewalk |
| Rancho San Juan High | Ottadont outroj | donoral | Thank all ough and note and on a road most allow to the state main. |
| School | Student Survey | General | i walk through the trenches. |
| Rancho San Juan High | | | i walk to school and sometimes drivers dont always stop because we have like three schools near and cross walks arent really in those areas i think street lights are necessary because after school when you play a sport |
| School | Student Survey | General | it gets a little dark and doesnt seem so safe. |
| Rancho San Juan High | | | i walk to school and sometimes drivers dont always stop because we have like three schools near and cross walks arent really in those areas i think street lights are necessary because after school when you play a sport |
| School | Student Survey | General | it gets a little dark and doesnt seem so safe. |
| Rancho San Juan High | 6. 1 . 6 | 6 1 | |
| School Rancho San Juan High | Student Survey | General | I walked fine when i went to school I lived 4 min away - I moved |
| School | Student Survey | General | I would have to walk on the road in between the fields I forgot the name but its close to natividad |
| Rancho San Juan High School | Student Survey | General | I would have to walk really far. |
| Rancho San Juan High | Student Survey | General | i would have to waik really lar. |
| School | Student Survey | General | I'm not concerned about anything but from where I live to where i got to school is far. |
| Rancho San Juan High School | Student Survey | General | If I bike to school I have to bike Natividad rd and their is no bike lanes - I see a lot of kids bike there and it would nice for a bike lane |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | If I had to walk from my house to school It would be around a 3.1 mile trip there. |
| Rancho San Juan High School | Student Survey | General | If I ride my bike I needed to cross major streets, E. laurel and Natividad. The other is Davis Rd For me is very dangerous to cross the streets that is with lots of traffic. |
| Rancho San Juan High | Ctl C | Communication | Kinglia shalifalahakungidhah in 1975 - 197 |
| School Rancho San Juan High | Student Survey | General | If i walk to school i feel that it would be hard to cross big busy roads like E Boronda Rd. If I walk to school I have to constantly check for traffic b/c there aren't sidewalks and the intersection/crossing |
| School | Student Survey | General | takes too long because of the traffic. |
| Rancho San Juan High | Student Sun or | General | If I walk to school, I'm afraid of people following me and try to kidnap or do something to me or my sibling and |
| School Rancho San Juan High | Student Survey | General | the violence people intend to do - I only drive to school |
| School | Student Survey | General | If I walked to school I live on the other side of Salinas now so it would take hours |
| Rancho San Juan High School | Student Survey | General | if i wanted to bike to school there are no side walks on San Juan grade road. |
| Rancho San Juan High | j | | , and the second |
| School | Student Survey | General | If I was to walk to school I would have to walk from Monte Bella all the way to Rancho. |
| | | | |

| Rancho San Juan High School | Student Survey | General | If I were to go to school by walking or biking i would have to go along Natividad Rd which there are no sidewalks on once you get to the fields part as well as when you make the turn onto Rogge there also no sidewalks on the side till you get to the school |
|--|----------------|--------------------|---|
| Rancho San Juan High School | Student Survey | General | If I were to walk from my current house to Rancho San Juan high school it would be difficult to go all the way around the fields. Also the roads don't have any walking lanes. Another reason I can't walk alone is because I don't trust the drivers and people around me when walking to/from. |
| Rancho San Juan High School | Student Survey | General | if i were to walk from my house on the South side by Old-town it would take too long and be too far and there wouldn't be no safety people to assist. furthermore it is not convenient for me to walk to school. |
| Rancho San Juan High | | | If i were to walk from my house to RSJ I would have to worry about the distance, time, and the amount of cars I |
| School | Student Survey | General | have to look out for It's just to far away. |
| Rancho San Juan High School | Student Survey | General | If I were to walk or bike to school it would be difficult because I would have to walk around a field and it take more time, plus my parents don't want me to get to school late and they don't like me walking by myself. |
| Rancho San Juan High School Rancho San Juan High | Student Survey | General | If I were to walk to school it would take me roughly an hour, and I'd need to walk along a few major highways so it's never been an option for me. The road by my house, Blackie, is extremely dangerous to walk on as drivers get careless and fly by at 65+ mph. If there were a safe way to get to school I'd consider it, but it's still quite a distance to walk when my brother gets dropped off 5 minutes from Rancho. If I were to walk to school one safety concern would be in Russell Road where their is no sidewalk to walk |
| School Rancho San Juan High | Student Survey | General | through by the stop light. |
| School | Student Survey | General | if i were to walk to school there is no sidewalks or walk paths on Natividad road and Rogge Road. |
| Rancho San Juan High School | Student Survey | General | Im just scared of getting run over or kid naped |
| Rancho San Juan High School | Student Survey | General | Im just scared to be alone |
| Rancho San Juan High School | Student Survey | General | It doesn't take me my mom a long time to drive over there and there isn't much traffic. |
| Rancho San Juan High School | Student Survey | General | it is a very long way from my house |
| | Student Survey | dericial | |
| Rancho San Juan High School | Student Survey | General | It is impossible for me to ride to school on a skateboard because there are no sidewalks and the road is not a residential road with a residential speed limit - Put sidewalks along the roads to schools |
| Rancho San Juan High School | Student Survey | General | It takes some time to walk across San Juan Grade Rd. |
| Rancho San Juan High School | Student Survey | General | it takes time for drivers to stop |
| Rancho San Juan High School | Student Survey | General | It would be pretty dangerous and far to walk to school, lots of fields to walk by. |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | It's farther away then before |
| School Rancho San Juan High | Student Survey | General | It's just that my school is far away from where I am, besides that I believe that I could find a safe route somehow. It's just very far from where I live and when I bike over there the shortest route to the school doesn't even have a |
| School Rancho San Juan High | Student Survey | General | sidewalk and only like half a road with tons of traffic. |
| School | Student Survey | General | Its the distance and the fact that i don't know how to ride a bike. |
| Rancho San Juan High School | Student Survey | General | its to much of a walk from where i live to school, its around a hour and there isnt a side walk if i do go walking. |
| Rancho San Juan High School | Student Survey | General | I've only walked to school once and it was when i missed bus and it made it way more farther i dont really know the streets but it was far. |
| Rancho San Juan High School | Student Survey | General | my family takes me to school |
| Rancho San Juan High | | | My issue is the distance because its 50 minutes away by walking and also the road scares me and i'm scared of |
| School | Student Survey | General | being kidnapped. Another reason is there is no sidewalks so id be scared to get hit by a car. |
| Rancho San Juan High School | Student Survey | General | My mom drives me to school |
| Rancho San Juan High School | Student Survey | General | My parents drive me to school and there is usually some traffic |
| Rancho San Juan High School | Student Survey | General | no cars stoping |
| Rancho San Juan High | , | | |
| School Rancho San Juan High | Student Survey | General | No concerns at all I live in a nice neighborhood thankfully. |
| School Rancho San Juan High | Student Survey | General | No cross walks |
| School Rancho San Juan High | Student Survey | General | No side walk on the way to school on natividad road. |
| nancio Jan Juan Myn | Student Survey | General | None except the fact that it's far. |
| School | | | |
| School Rancho San Juan High School | Student Survey | General | None My brother and I usually walked with a group of kids. |
| School Rancho San Juan High | Student Survey | General General | None My brother and I usually walked with a group of kids. None, I don't walk but the roads by Rancho are pretty safe compared to the ones by north high where students would clash with middle schools. |

| D 1 C 1 11:1 | 1 | 1 | |
|--------------------------------|----------------|---------|--|
| Rancho San Juan High School | Student Survey | General | Nope. Sometimes. Im not sure. |
| Rancho San Juan High School | Student Survey | General | Not much I just have to cross Santa Rita |
| Rancho San Juan High School | Student Survey | General | not much sidewalks and the distance |
| Rancho San Juan High School | Student Survey | General | Nothing really because a lot of kids pass in the same direction as me so I fell safe. |
| Rancho San Juan High School | Student Survey | General | nothing stopps me in like 2 mins away |
| Rancho San Juan High School | Student Survey | General | on my route to school there is not bike lane so cars whiz by and their is glass and spiky plants and so the one time I biked to school my bike got a flat and i had to walk a mile home |
| Rancho San Juan High School | Student Survey | General | On San Juan Grade Rd the side were the gas station is not all the street has a sidewalk up until the light. |
| Rancho San Juan High School | Student Survey | General | One biking safety that Im concerned about in my neighborhood is that the road is to small. |
| Rancho San Juan High School | Student Survey | General | people sometimes sped down the road with out stopping. |
| Rancho San Juan High School | Student Survey | General | ride the bus to get home |
| Rancho San Juan High School | Student Survey | General | Safety |
| Rancho San Juan High School | Student Survey | General | San Juan Grade and Russell Road don't really have a sidewalk. |
| Rancho San Juan High School | Student Survey | General | San Juan grade rd there speeding and theres no sidewalks cars pass by to fast and the road there isnt the best so I avoid walking and take the bus. |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | san juan grade street wouldn't have a sidewalk to walk on just a street and people's lawns. |
| School | Student Survey | General | scared of getting called by a stranger |
| Rancho San Juan High School | Student Survey | General | School is too far |
| Rancho San Juan High School | Student Survey | General | skating through San Juan Grade Road is difficult because cars go fast. |
| Rancho San Juan High School | Student Survey | General | So I haven't actually been to the high school considering i'm a freshman and covid happened but when I went to gavilain view there were a few issues when I had to walk because I couldn't get a ride. Like after school I would have to cross into my street to get home fast because my mom doesn't like me to walk home because the world is a scary place and you have to walk all the way down the street to get to the next cross walk. It was dark and a car drove passed me even though I was already walking across the street because the light cross walk had the white shaped person for me to walk and I don't know if it was because the person was impatient or because they didn't see me. |
| Rancho San Juan High School | Student Survey | General | So I live a little far from my highscool since I live on Bolivar Street in the trailer park and walking is not my thing. |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | Sometimes cars just had the nerve to go extra fast. |
| School | Student Survey | General | speeding cars |
| Rancho San Juan High School | Student Survey | General | The car take a long time to stop for me to cross on San Juan Grade RD. |
| Rancho San Juan High School | Student Survey | General | The cars. |
| Rancho San Juan High School | Student Survey | General | The didewalk by my old house was bad and a safety hazard. |
| Rancho San Juan High School | Student Survey | General | The major one is the violence and crime that is constantly being committed in the Salinas valley, where I live. There is seriously NO BIKE LANES or SIDEWALKS where I live to get to school. I live next to the side highway of Old Stage and its far to dangerous of a speed of 60 MPH which my dad says no to riding a bike on(I only live a 4 MIN drive from Rancho High). Racing Cars and Semi Trucks plus the usual crack heads that cant drive for sh** would not care if they did a hit and run to a bicyclist. I would dearly DEARLY LOVE to be ABLE to ride my bike to school. SAFETY CONCERNS |
| Rancho San Juan High | | | The road i would have to walk or skateboard to school dosnt have a sidwalk and is pretty far from my house but |
| School Rancho San Juan High | Student Survey | General | only like 5 minutes away by bus or car |
| School | Student Survey | General | The school is too far I will need the bus too go to school. |
| Rancho San Juan High School | Student Survey | General | the sidewalk near the school |
| Rancho San Juan High School | Student Survey | General | The things that concerns me about walking to school is the safety if I get kidnapped or something happens. |
| Rancho San Juan High School | Student Survey | General | Their are cars who like to speed near Jackson street. |
| Rancho San Juan High School | Student Survey | General | There are no sidewalks either direction to get to my school. |
| Rancho San Juan High School | Student Survey | General | There are not any issue I'm concerned about my neighborhood or on my trip to school because it only take less than ten minutes to get there I walk in a safe street that takes me easily to school but sometimes traffic comes when I get there. |

| Rancho San Juan High | | | |
|--------------------------------|----------------|----------|--|
| School Rancho San Juan High | Student Survey | General | there aren't many issues for me when I walk to/from school. |
| School | Student Survey | General | there is a lot of traffic everywhere |
| | | | |
| Rancho San Juan High | | | There is a lot of traffic on E Boronda Rd turning into Natividad Rd. I would always go through car and even then it would take me a long time to get to school because of the traffic and the lights would let very few cars go. |
| School | Student Survey | General | And it is too far to walk. I also can't skate because of no sidewalk on natividad rd. |
| Rancho San Juan High School | Student Survey | General | There is a lot of traffic. |
| Rancho San Juan High | j | | |
| School Rancho San Juan High | Student Survey | General | There is no direct route to walk or bike towards the school. |
| School | Student Survey | General | there is no sidewalk when i want to walk from or to school |
| Rancho San Juan High School | Student Survey | General | There is not a cofe way to go biking to ranche the two ways to get there is either by beauty reads |
| Rancho San Juan High | Student Survey | General | There is not a safe way to go biking to rancho, the two ways to get there is either by heavy roads there is not many bike lanes and sometimes cars park on them - We can find other places for cars to park so |
| School | Student Survey | General | bike lanes are more open for bikers |
| Rancho San Juan High School | Student Survey | General | There is not much of a sidewalk between Bolsa Knolls and Rancho San Juan High School, making it difficult for students to walk to school. |
| Rancho San Juan High | 6. 1 . 6 | | |
| School Rancho San Juan High | Student Survey | General | There is only one bike lane to and from school |
| School | Student Survey | General | There isn't a safe way to cross San Juan Grade Rd |
| Rancho San Juan High School | Student Survey | General | There just a lot of traffic |
| Rancho San Juan High | Student Survey | dericial | The office a feet of dame |
| School Rancho San Juan High | Student Survey | General | There were no sidewalks when I walked through Natividad Rd. |
| School | Student Survey | General | theres no bike lane |
| Rancho San Juan High | 6. 1 . 6 | 6 1 | |
| School | Student Survey | General | There's no crosswalk to be walking on if I were to be walking to school |
| | | | This year I asked for permission to go to RSJ so of course the school is really far away from me because EAHS |
| | | | pertains to me, this means its to much to walk and I can never easily walk to school to get lunch or breakfeast |
| | | | because I would have to carry the food all the way back, It would also just be harder for my mom to bring all my sisters along because she works 3 days a week and when my grandma takes care of us we have to remember to |
| Rancho San Juan High | Ctdt C | C | bring the carseat we have with us and than return it. I know at RSJ a lot of kids asked for the same permission |
| School Rancho San Juan High | Student Survey | General | to go to a interdestrict school and I haven't heard much of it.Thanks Time but I have only been late like twice last year and dont think that will continue to be an issue. Because I go |
| School | Student Survey | General | ahead of time |
| Rancho San Juan High School | Student Survey | General | too far |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | Too much cars will occasionally be in the way |
| School | Student Survey | General | Traffic |
| Rancho San Juan High | Student Survey | General | umm for me when I walk to school sometimes when I cross the street it takes a while because of the cars that are there. |
| School Rancho San Juan High | Student Survey | General | are there. |
| School | Student Survey | General | waiting for cars to stop |
| Rancho San Juan High School | Student Survey | General | Walking from Rogge Road or my parent driving is safe for me. |
| Rancho San Juan High | _ | | Walking is very time consuming and took up time I didn't have. San Juan grd is a very dangerous street because |
| School Rancho San Juan High | Student Survey | General | it has no sidewalks. |
| School | Student Survey | General | we need a bike lane on the way to rancho coming from near alvers area |
| Rancho San Juan High | | | Well by oak park there is a four way stop and cars don't stop all the time. so I go to the other cross walk by the Valero gas station across from oak park and those cars are speeding so you know I just make a run for it when I |
| School | Student Survey | General | see no cars. |
| Rancho San Juan High | Student Sunsay | Comprel | well for me the only danger i think of is crossing the street and if there are people who mess with me - because |
| School Rancho San Juan High | Student Survey | General | of thins i decided to take the bus to school or my parents taking m |
| School | Student Survey | General | well i have to go through the fields |
| Rancho San Juan High School | Student Survey | General | well I sometimes go to school and noting happens but i feel like im going to be late. |
| Rancho San Juan High | j | | |
| School Rancho San Juan High | Student Survey | General | Well I'm not super close to the school so I take the bus. When I have to walk to school i have to walk along side the san juan grade road and i noticed that it doesnt |
| School | Student Survey | General | have a bike lane. |
| Rancho San Juan High | Student Common | General | When crossing the cross walk some drivers don't stop over when I'm stopped off the side walk |
| School Rancho San Juan High | Student Survey | General | When crossing the cross walk, some drivers don't stop, even when I'm stepped off the side walk. |
| School | Student Survey | General | when i drive to school the lights take forever |
| | | | |

| | | Г | |
|--------------------------------|-----------------|---------|--|
| | | | When I go to school my mom dives down Natividad road to get to Rogge Road and when you reach the fields it is't exactly safe to walk along because there aren't any side walks, although it kinda makes sense not to have |
| Rancho San Juan High | | | any there. We don't go around by lowes and walmart to get to school because it's longer and farther away from |
| School | Student Survey | General | home. |
| Rancho San Juan High | | | When I have to walk home or walk to school it is hard for because there is no sidewalks where I live to walk on |
| School | Student Survey | General | and can be dangerous. |
| Rancho San Juan High School | Student Survey | General | When I just walk I notice a lot of fast vehicles and there arnet speed bumps in some streets - can be dangerous |
| Rancho San Juan High | Student Survey | General | When i lived Salinas i had to walk to street stop at Van Buren ave. Near the Gavilan View middle school I don't |
| School | Student Survey | General | live in Salinas anymore but i still attend online high school there. |
| | | | |
| Rancho San Juan High | | | When I walk and cross from Russell Rd to San Juan Grade Rd there isnt a lot of side walk in San Juan Grade Rd so I was always scared of getting hit by a car plus there was a lot of sand and mud so sometimes it was slippery |
| School | Student Survey | General | and there was always a lot of cars everywhere and a lot of traffic so I had to be extra careful |
| | | | |
| Rancho San Juan High | | | When I walk from school I come across four ways roads with no lights the four way road isn't straight. you |
| School | Student Survey | General | have to turn if you are in a car to go "straight" which confuses the drivers and endangers students |
| Rancho San Juan High School | Student Survey | General | When I walk from school I need to cross mckinnon street, then cross boronda rd, go straight, then pass natividad road, then cross rogge rd and get to school. |
| SCHOOL | Student Survey | General | inatividad road, tilen cross rogge id and get to school. |
| | | | When I walk home from school I have to walk down San Juan Grade rd to get to my house on Pinehurst In. There |
| Rancho San Juan High | | | are no sidewalks along the road and the roadsides are covered in weeds and rocks. The cars also go very fast |
| School | Student Survey | General | down San Juan Grade road and there are very few crosswalks at the start of the road. |
| Rancho San Juan High School | Student Survey | General | When i walk i had to walk to Harden I have to cross a sidewalk . |
| Rancho San Juan High | Student Survey | deneral | When I walk I have to cross this street near the gas station and its a little scary because some cars are in a hurry |
| School | Student Survey | General | to get their kids to school so they speed up or dont stop. |
| Rancho San Juan High | | | |
| School | Student Survey | General | When I walk I have to walk by a public Park (el dorado park). |
| Rancho San Juan High School | Student Survey | General | When I walk to school (especially with what has been going on recently) I have to watch out for police I'm afrolatina so like- yeah. |
| Rancho San Juan High | Student Survey | General | launa so me year. |
| School | Student Survey | General | when I walk to school I have to cross North main but its a very short distance |
| Rancho San Juan High | | | When I walk to school I have to cross where there is a gasoline station named Valero in 307 San Juan Grade Rd |
| School | Student Survey | General | and there is no stop signs so some of the cars won't see me crossing. |
| Rancho San Juan High | | | When I walk to school I have to go across a crosswalk, and sometimes cars don't see me There have been at least 3 different times where cars didn't see me and they speed up and get a good distance away from hitting |
| School | Student Survey | General | me. |
| Rancho San Juan High | | | |
| School | Student Survey | General | When I walk to school i have to go on a very skinny path that my bike can barely go trough |
| Rancho San Juan High School | Student Survey | General | When I walk to school I have to go through all of e boronda rd and there is a lot of traffic - School is way to far to go walking when I would go to north high I would get there in 10 minutes walking |
| Rancho San Juan High | Student Survey | deneral | when i walk to school i have to go to natividad road - the speed limit is really high and there are no paved |
| School | Student Survey | General | sidewalks |
| Rancho San Juan High | | | When I walk to school I have to wake up way more early than I usually do because it kind of far from my house |
| School Rancho San Juan High | Student Survey | General | and I don't want to feel tired in school. |
| School | Student Survey | General | When I walk to school I there are no issues |
| Rancho San Juan High | | 33.11.0 | |
| School | Student Survey | General | When I walk to school I usally croos by the bolsa knolls gas station but they take to long. |
| Rancho San Juan High | 0. 1 . 6 | | When i walk to school i would have to cross east boronda road and the lights there take a super long time to |
| School Rancho San Juan High | Student Survey | General | change. |
| School | Student Survey | General | when i walk to school theirs just fields and no sidewalks |
| Rancho San Juan High | , | | |
| School | Student Survey | General | When I walk to school, I find that takes a long time. |
| Rancho San Juan High | Ct. dant Comme | C | Miles I will be a head the second with a high of should also the second be seen to be a second by |
| School Rancho San Juan High | Student Survey | General | When I walk to school, I have to cross quite a bit of streets even though I don't live far away. When i walk to school, i have to cross Rogge rd at England Ave which dosent take a long time and it takes a |
| School | Student Survey | General | while until a car finally stops so i can cross. |
| Rancho San Juan High | | | |
| School | Student Survey | General | when I walk to school, I have to cross street because i am very far from the school. |
| Rancho San Juan High | Student Com | Gonoral | When I walk to school, I have to cross van Buren Ave and the car takes a while o stop so I can cross to get to school. |
| School Rancho San Juan High | Student Survey | General | When I walk to school, I have to walk along rogge rd. and cars speed by and run stop signs Salinas is too |
| School | Student Survey | General | unsafe for us to walk and bike etc. to school. |
| Rancho San Juan High | | | |
| School | Student Survey | General | When I walk to school, I need to cross to the North Main St. |
| Rancho San Juan High | Student Sun (c) | General | When i walk to school, the " side walk " isnt very big, so it would be easy for me to fall over and probably get |
| School | Student Survey | General | ran over. Also a lot of cars pass very fast . |
| | | | When I walk to school, the distance is a too far. I don't walk to school but there was an incident about a year or |
| | | | two ago where a teenager was walking to or from school and was hit by a drunk driver and didn't make it. If I |
| Rancho San Juan High | | | were to walk to school, I would need to walk by that area but I'd rather not. There's no stable sidewalk either, I |
| School | Student Survey | General | dont know the name, but it's on the way to Bolsa Knolls Middle School. |
| | | | |

| | I | 1 | |
|--------------------------------|----------------|-----------------------------|---|
| Rancho San Juan High School | Student Survey | General | When I walk to school, theirs lots of cars by Russell rd and sometimes they don't stop I think students that live by Russell rd around this area we should get a closer bus because we only have the one by the Santa Rita park but its still far from where we live. |
| Rancho San Juan High School | Student Survey | General | when i walk to the bus i walk to mckinnon. |
| Rancho San Juan High School | Student Survey | General | When I walked home from school the lack of side walks effected me. |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | When I walked to school I had to cross the street near the gas stop and I couldn"t ready cross the street. |
| School Rancho San Juan High | Student Survey | General | When I was going to school, there wasn't as many sidewalks. This is by San Juan Grade Rd. When I would get a ride to school, the person driving the vehicle had to pass by Gavilan View Middle School, |
| School | Student Survey | General | then turn at the light into San Juan Road. |
| Rancho San Juan High School | Student Survey | General | When I would walk to school there would be lots of cars driving by Gavilan view |
| Rancho San Juan High School | Student Survey | General | When or If I walk to school I would have to walk through E Boronda Rd, Natividad Rd and Roggie Rd. It is also about an hour long walk. |
| Rancho San Juan High School | Student Survey | General | When people walk to school there isnt that much sidewal or crossing places to go from one school to the other. |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Student Survey | General | When walking or biking from school the light on Rogge Road does not work so its slower for me to get there |
| School | Student Survey | General | when walking to my school I had to cross Russel RD. To get to the other side - I had to cross the road |
| Rancho San Juan High School | Student Survey | General | When walking to school I have to cross Main Street and I feel unsafe crossing there. I then have to cross Boronda and it also takes a while to cross. I also have to walk where there is no sidewalk near the Lowe's. |
| Rancho San Juan High School | Student Survey | General | When walking to school there are sometime just too many cars in on area. |
| Rancho San Juan High School | Student Survey | General | Where I live, there are no sidewalks anywhere. There are just dirt pathways along the houses and the road. This does concern me because of the safety of my family and neighbors, but it is a bit more complicated for my location. I technically live in Prunedale, but I live around 10 minutes away from Rancho, so it is my designated school. I am also concerned about the safety of the animals since I see so many on the road every time I leave to go somewhere. I hope there is something we can do about this as a community. |
| Rancho San Juan High School | Survey | General | cars going fast |
| Rancho San Juan High School | Survey | General | Crossings and sidewalks |
| Rancho San Juan High | - | | |
| School Rancho San Juan High | Survey | General | I don't know since my son used the bus. |
| School Rancho San Juan High | Survey | General | I don't know since my son used the bus. |
| School Rancho San Juan High | Survey | General | I feel like most of these recommendations are not necessary and a huge waste of money. |
| School | Survey | General | My child is on an Interdistrict so I need to provide transportation. |
| Rancho San Juan High School | Survey | General | no sidewalks |
| Rancho San Juan High School | Survey | General | |
| Rancho San Juan High | | | No sidewalks all the way to the school none other than recommending if the city adds more schools, these things should be considered and built |
| School Rancho San Juan High | Survey | General | beforehand |
| School Rancho San Juan High | Survey | General | the cars |
| School | Survey | General | The schools to far for my kid to walk or bike too. |
| Rancho San Juan High School | Survey | General | the traffic |
| Rancho San Juan High School | Survey | General | to have more safety patrol by the school to be cheaking the speed of the car passing by. |
| Rancho San Juan High | | Intersection of Boronda and | Missing sidewalk. Question about plans for this intersection - Boronda Road roundabout project covers other |
| School | Audit | San Juan Grade Rd | intersections from McKinnon to Independence In order for my child to bicycle to school there would need to be a connection from McKinnon school to Rancho |
| Rancho San Juan High School | Survey | McKinnon St | San Juan, and the intersection in front of McKinnon school needs to be safer. Other than that, there's no feasibly safe way for kids to walk or bike. |
| Rancho San Juan High School | Survey | Middlefield Rd | Middlefield rd |
| Rancho San Juan High School | Audit | Natividad Rd | Some walkers, no sidewalk. Difficult to install sidewalk because farm vehicles need to be able to access the fields |
| Rancho San Juan High | | | |
| School | Parent | Natividad Rd | Include recommendations for students and families traveling on Natividad Rd. Basically, any student within 2 miles from our school is technically a walker. Even those students who live |
| Rancho San Juan High School | Staff | Natividad Rd | around New Repulic, behind El Super, they can technically walk but there is no sidewalk at all along Natividad so you will not see many students walking unless they are desperate and have no other choice. Which lends itself to having a lot more traffic during drop off. |
| Rancho San Juan High | | | |
| | | | |

| Rancho San Juan High School | Survey | Natividad Rd | Is there a way to also recommend sidewalks on natividad rd going to Rogge rd for rancho San |
|--------------------------------|-----------|---|--|
| Rancho San Juan High | Survey | Ivatividad No | Natividad Road and Rogge Road need more lighting. These roads are very dark in the evenings markedly |
| School | Survey | Natividad Rd | decreasing visibility. |
| Rancho San Juan High | C | Nest dated Da | put in a sidewalk or bike lane on Natividad from Boronda to Rogge |
| School Rancho San Juan High | Survey | Natividad Rd | put in a sidewark of bike fane on Natividad from boronda to kogge |
| School | Survey | Natividad Rd | Yes sidewalk access for those students walking on Natividad Rd to Rogge rd or even through the field |
| Rancho San Juan High | | | |
| School Rancho San Juan High | Survey | Natividad Rd | Yes, need to add another back road entrance from natividad road to rancho San Juan high school. |
| School | Survey | Natividad Rd and Rogge Rd | Intersection oat Natividad and Rogge - lights are desperately needed for everyone's safety |
| Rancho San Juan High | | | |
| School Baraha Can luan Hinh | Survey | Natividad Rd and Rogge Rd | Natividad and Roggee roads |
| Rancho San Juan High School | Survey | Penzance Rd and San Juan Gra | Penzance and San Juan road needs a round a bout or lights too many automobile accidents and pedestrians getting hit |
| Rancho San Juan High | July 10 | Tonzanco na ana oan saan an | Request for additional stop signs between San Juan Grade and Rogge Rd. Traffic Congestion due to three |
| School | Parent | Penzance St | schools located in close proximity. |
| Rancho San Juan High School | Audit | Pagga Pd | Bike lanes end at Bollenbacher |
| Rancho San Juan High | Audit | Rogge Rd | Missing sidewalk at SE corner of Rogge and San Juan Grade Road and on north side of street east of Bolsa |
| School | Audit | Rogge Rd | Knolls |
| | | | |
| Danaha Can luan High | | | Rogge; traffic really gets congested in the morning; all schools are about 10-15 mins apart. We did have a |
| Rancho San Juan High School | Staff | Rogge Rd | problem with those who did not want to turn into the drop off and were dropping their kid off in the street. Kid jump off and proceed to walk across the street onto oncoming traffic. That was a big concern. |
| | | | J |
| | | | I came down Bolsa Knolls to Rancho and there were parents stopped in the middle of the road, drop their |
| Rancho San Juan High School | Student | Rogge Rd | student off and that would back up the line of cars so it would take longer. By gas station, cars do go fast and there is no sidewalk and I see kids trying to get across without getting hit. I think that place is super dangerous. |
| Rancho San Juan High | Student | nogge nu | Safe sidewalks on both sides of Rogge rd and other roads close to the 3 schools (Rancho San Juan) etc. are |
| School | Survey | Rogge Rd | very important. Clear crosswalk or lights on Rogge and Natividad Rd. |
| D 1 6 1 111 1 | | | Request for parents to be more responsible when dropping off children: Don't let them get off the car in the |
| Rancho San Juan High School | Parent | Rogge Rd and Bollenbacher Dr and Front of schools | middle of the street; it is not safe. This happens often between Bolsa Knolls and La Joya and obstructs traffic for all three schools. |
| <u>ocnoor</u> | T GI CITE | Di ana i fone di schools | A teacher asked a student Do you feel safe crossing San Juan Grade? She said oh no, no. I look both ways until |
| Rancho San Juan High | | Rogge Rd and San Juan | there are no cars and I run as fast as I can. Student crosses at stop sign at intersection of Rogge and San Juan |
| School | Staff | Grade Rd | Grade then turns left on Rogge. |
| Rancho San Juan High School | Survey | Rogge Rd and San Juan Grade | Definitely a roundabout on Rogggel and San Juan Grade |
| Rancho San Juan High School | Survey | Rogge Rd and San Juan Grade | The corner of San Juan and Rogge crossing should be in all corners, not just one. From new light at the high school to the middle school should have a sidewalk on opposite site. Work out an Easement with the Church across the high school to allow for their parking lot to be used for the high school as additional parking. Or buy the church out, so it becomes part of the high school property for additional bus, students and events parking lot. Additional Parking should be available behind the high school and next to the high school football field before more homes are built; to prevent it from becoming the back of North High where vandalism and shootings happened. Students should feel safe walking outside of the school property not worried if someone will pop out from behind a car. |
| 00.1001 | Survey | Thogge the and ball stail diade | This paper duction a desired a desired and |
| Rancho San Juan High School | Survey | | The intersection of Rogge and San Juan Grade Rd is terrible. Even with a 4 way stop drives do not pay attention to the pedestrians crossing in the crosswalk. I believe an actual traffic signal would be more beneficial for pedestrians and motorists. The other crosswalks on San Juan Grade Rd. should have flashing lights. |
| Rancho San Juan High School | Audit | Rogge Rd at school driveway entrance | Traffic light not working |
| | | Rogge Rd between | |
| Rancho San Juan High | Payant | Bollenbacher Dr and | We have three schools elementary and bolsa knolls is very narrow at a point it just allows one car to be going in |
| School Rancho San Juan High | Parent | Natividad Rd | one direction and if there is another car it pinches the other car off the road |
| School | Audit | Russell Rd | Sidewalk ends. Crime is a concern in this area, recent shootings |
| Rancho San Juan High | | | Going on Russel, down towards San Juan Grade Rd., there is a portion after Gabilan Middle School that there is |
| School | Parent | Russell Rd | NO sidewalk on either side of the road and cars drive very fast through there. |
| | | | I have been living here for a year and a half and I heard about a lot of shootings; not too familiar with that area. |
| Rancho San Juan High | | | Apartments right in front of Gabilan Middle school. And there was another murder in same place where the |
| School See her High | Parent | Russell Rd | homicide took place last week but not sure how long ago. Parents have voiced this as a concern. |
| Rancho San Juan High School | Parent | Russell Rd | Road to Gabilan View via San Juan Grade has no stop sign; parents speed, dangerous for students. |
| Rancho San Juan High | . urone | | Treat to substant from the our read read that the stop sign, parents speed, early read for stautilits. |
| School | Parent | Russell Rd | There was a shooting here on Russel Road last week. Someone got killed in front of Gabilan Middle School. |
| Rancho San Juan High | Parant | Russell Rd and San Juan | At the corner of Russell and San Juan, there is a stop but no where for students to stand while waiting for the |
| School | Parent | Grade Rd | light. |
| Rancho San Juan High School | Audit | San Juan Grade Rd | If students walk, most of them are using San Juan Grade Road. Students from Santa Rita neighborhood are not eligible for busing and San Juan Grade is the only option for those students. Speed limit is 45 mph, no sidewalks, students have been hit and killed. Drivers can't see pedestrians at intersections of Rogge and Cornwall |

| | | | One of any himself concerns is the students who did not live for anough from the school to be visited up by |
|--------------------------------|--------|-----------------------------------|--|
| Rancho San Juan High | | | One of our biggest concerns is the students who did not live far enough from the school to be picked up by a bus but do not live close enough to consider it an easy walk. There was an area where the students have to |
| School | Parent | San Juan Grade Rd | cross San Juan to get to our school but there is no sidewalk. |
| Rancho San Juan High | | | |
| School | Survey | San Juan Grade Rd | Crosswalks are needed on San Juan Grade Rd. |
| | | | |
| Rancho San Juan High | | San Juan Grade Rd and | On the other side of Casa de Pollo street out there by the Valero Gas Station there are really no crosswalk, just |
| School | Parent | Penzance Rd | roads. By the Valero was definitely a concern that was brought up as a dangerous spot to cross. |
| Rancho San Juan High | | San Juan Grade Rd and | |
| School | Parent | Penzance St San Juan Grade Rd and | San Juan y Penzance St – install a stop sign to more easily allow left turns. |
| Rancho San Juan High School | Parent | Rogge Rd | Dirt and no clear sidewalks; dangerous for students to walk to school. |
| Rancho San Juan High | raicit | nogge na | Feels like this intersection needs better control than what a roundabout can offer. Might be better with an |
| School | Parent | San Juan Grade Rd and Rogge | |
| Rancho San Juan High | | 33 | |
| School | Parent | San Juan Grade Rd and Rogge | This intersection gets very dark at night. Request to install lighting. |
| | | | |
| | | | I used to run from North Salinas High School down to San Juan Grade to Rogge and then turn on Rogge and |
| | | | come around; do a big triangle. This has not changed other than Rancho San Juan since I was in high school. We |
| Danaha Can luan High | | San Juan Grade Rd and | would run on the dirt but on the winter it is mud. So even though fields and place where cars park, what looks |
| Rancho San Juan High School | Staff | Rogge Rd and Natividad Rd | like you might be able to walk there but it becomes a mess when it rains and those managing the fields asked the school not to send students through there for fear of liability. |
| Rancho San Juan High | Stair | San Juan Grade Rd and | San Juan and Russel rd I just live 7 minutes away from the school and I won't trust my daughter to cross this |
| School | Parent | Russell Rd | intersection. Is there any way to get more visibility for pedestrians in this area? |
| | | | , , , |
| Rancho San Juan High | | San Juan Grade Rd between | |
| School | Parent | Lowe's and Russell Rd | Add a sidewalk |
| Rancho San Juan High | | | |
| School | Survey | School Frontage | better traffic control by staff |
| Rancho San Juan High | C | Calcal Frants na | First and the United States and the state of |
| School | Survey | School Frontage | Exit at the light from student parking lot at RSJ is a nightmare |
| | | | |
| | | | The parking lot at Rancho San Juan has multiple access areas that could be closed and a centralized drop off |
| | | | point to minimize the traffic back up on San Juan Road and maximize the efficiency of the student drop off. |
| | | | Many parents drop off students in the middle of the road on San Juan Grade Road, which causes hazardous situations for students and other drivers. The cross walk across from Bolsa Knolls Middle School causes a traffic |
| | | | jam because students and other drivers. The cross wark across from bolsa knows Friddle School causes a traine |
| | | | off Penzance St to South San Juan Grade Road and they use the median divider, often cutting off cars already on |
| | | | San Juan Grade Rd. Russell Road needs sidewalks to the intersection of San Juan Grade and Russell. The light |
| Rancho San Juan High | | | Turing left from Russell onto San Juan is also very short. A traffic study should be performed to find the length |
| School | Survey | School Frontage | of time the light should be green. |

| Santa Rita Elementary | School Staff Audit Audit Parent Survey Audit | Bolivar St Bolivar Street Drainage parallel to Sucre Court, between North Main and Santa Rita E Boronda Rd and McKinnon St Front of School General | There are at least two high school buses that park alongside Bolivar St. on the side of the park close to the corner of Santa Rita St. where many students gather in the early morning before 7:45 A.M. Also, high school students get dropped off in the afternoon across from that area on the other side of the street. Last, I've seen high school students dropped off in the P.M. in front of the fire station going west on Bolivar St. Then some students will "jay walk" to cross the street during a very traffic congested time. Lots of parked cars, no space for drop-off Concerned that students would not have knowledge of how the proposed roundabout would work. Any plans to have a cross guard there? There is always lots of traffic during school hours when entering and exiting and there aren't enough parking spaces. 600and students. No busing (except special ed buses?). Lots of walkers. Main entrance is at front of campus, currently no other entrances. Fenced bike parking present on campus. The crossing guard died over Winter Break and flowers were placed near the cross walk in her honor. There are a few kids that ride bikes to school. Definitely under 20, based on what I see in the bike rack. I feel |

| Sherwood Elementary | Survey | General | I though for us as well we don't follow pedestrian rules. |
|-----------------------|-----------------|--------------------|---|
| Sherwood Elementary | Survey | General | I would like to have a sidewalk installed for children where they cross because cars sometimes do not care there |
| Sherwood Elementary | Survey | General | is a traffic signal and more security people because there aren't plenty. |
| Sherwood Elementary | Survey | General | I'm afraid when she crosses the street and afraid something could happen to her. |
| Sherwood Elementary | Survey | General | Install traffic signals at the corner because too much traffic gathers and cause accidents. |
| Sherwood Elementary | Survey | General | Its to far and she's to young to walk on her own. |
| Sherwood Elementary | Survey | General | Lack of safety and crime. |
| Sherwood Elementary | Survey | General | Lots of traffic and unsure he can defend himself. |
| <u> </u> | , | | Many people live nearby but because they don't want to walk they instead decide to drive and create a |
| Sherwood Elementary | Survey | General | congestion. Just a comment. |
| Sherwood Elementary | Survey | General | More pedestrian lighting on the paths to school. |
| Sherwood Elementary | Survey | General | More security at school, more guards to watch the school. |
| Sherwood Elementary | Survey | General | My child is too young and school is too far. |
| Sherwood Elementary | Survey | General | My concerns are the distance and his age. |
| | | | My daughter and I have to cross a stop sign and there are many cars who do not respect so we are afraid to |
| | | | cross. Crossing guards would be helpful for our kid's safety because there are other parents who have |
| Sherwood Elementary | Survey | General | complained about the same thing. |
| <u> </u> | , | | My daughter is too young still and there is too much traffic in front of the school and many of them do not |
| Sherwood Elementary | Survey | General | respect the people who are walking. |
| Sherwood Elementary | Survey | General | My son lives near school so babysitter takes him when I work and I pick him up. |
| Sherwood Elementary | Survey | General | Need crosswalks. |
| | , | | Need more supervision at start and dismissal times because there are lots of children who cross the street alone |
| Sherwood Elementary | Survey | General | in the morning and afternoon. |
| Sherwood Elementary | Survey | General | No place is safe because of other drivers. |
| | , | | |
| Sherwood Elementary | Survey | General | Not safe. Traffic and strange people hanging around the cross walk. Something needs to be done about traffic. |
| | | | Parents create the congestion and can cause accidents when letting their children get off in the middle of the |
| Sherwood Elementary | Survey | General | street. |
| Sherwood Elementary | Survey | General | Parents should not unload their children in the middle of the street near the school. |
| | 1 | | People don't know how to pay attention. Would help if people getting off there phones & stop speeding |
| Sherwood Elementary | Survey | General | around schools. |
| Sherwood Elementary | Survey | General | School is too far and she is too young to go by herself. |
| Sherwood Elementary | Survey | General | See more staff or adults supervising traffic. |
| Sherwood Elementary | Survey | General | Should install cameras at traffic lights to see who is not respecting traffic signals. |
| Sherwood Elementary | Survey | General | Sometimes drivers do not respect when people are crossing. |
| Sherwood Elementary | Survey | General | Speeding we need speed bumps. |
| Sherwood Elementary | Survey | General | Stop signs they should put like school zone light so people could stop. |
| Sherwood Elementary | Survey | General | The time I have is too short so to arrive guicker I have to drive. |
| Sherwood Elementary | Survey | General | The truth is we need traffic lights because sometimes people do not respect. |
| Sherwood Liementary | Survey | derierai | There are no signals that indicate it is a school zone. The cars should be lower on the street along Alisal where |
| Sherwood Elementary | Survey | General | majority of students walk. |
| one wood Elementary | ou. voj | acricia. | ingony or crack name |
| | | | There are no signs along Alisal indicating to cars that there is a school nearby and the majority of students walk |
| Sherwood Elementary | Survey | General | along this street and live on these streets near school and cars go very fast and do not respect traffic signals. |
| one wood Elementary | ou. vey | acricia. | There is a lot of traffic at that time. I dont feel safe having my child walk to school and not check for cars |
| | | | coming. Too manu cars driving around looking for parking does not make it safe for all the children walking or |
| Sherwood Elementary | Survey | General | riding to school. |
| one wood Elementary | ou. voj | acricia. | There is lots of traffic and lots of parents live nearby but drive to drop off their children and don't let others |
| Sherwood Elementary | Survey | General | enter school through John St. They mess up traffic. |
| Sherwood Elementary | Survey | General | There is no crossing guard. |
| Sherwood Elementary | Survey | General | There is nobody who can help children cross the street. |
| | Ju. 159 | | There should be more order because there are too many parents who unload their kids in the middle of the |
| Sherwood Elementary | Survey | General | street and make the congestion that way. |
| Sherwood Elementary | Survey | General | Too many streets to be crossing. |
| Sherwood Elementary | Survey | General | Too many streets to cross. |
| C.ICIWOOG LICITEITALY | ou. vey | donoral | Too much traffic afraid she might not be seen when crossing the streets. Cars do not stop to give the right of |
| Sherwood Elementary | Survey | General | way. Too many accidents right infront of my house (intersection) during school time. |
| Sherwood Elementary | Survey | General | Too much traffic on the street in front of school. |
| Sherwood Elementary | Survey | General | Transferring him back to his home school will solve the problems. |
| Sherwood Elementary | Survey | General | Way too far-special education student |
| | | General | We as a community should be more courteous if we all want it that way. |
| Sherwood Elementary | Survey | uciiciai | THE AS A COMMUNITY SHOULD BE MOTE COULTEOUS II WE All WAILL IT THAT WAY. |
| Sherwood Elementary | Survey | General | We live far to walk. There's always irresponsible parents crossing from they don't suppose to cross the street. |
| Sherwood Elementary | Juivey | delicial | , , , , , , |
| Shanwood Elementer | Survey | General | We live in East Salinas and always has been considered a dangerous place due to crime and gangs so that is |
| Sherwood Elementary | Survey | General | why I would never let my daughter go by herself to school. |
| Shanwood Florester | Sun <i>t</i> o: | Conoral | Well if I told you to add a bus so that many children don't have to walk I think nobody would do it but would be |
| Sherwood Elementary | Survey | General | safer. |
| Sherwood Elementary | Survey | General | Would be good if there were crossing guards. |
| Shanward Flore | Cur.o. | Conoral | Would be good to watch at arrivals when parents park and create congestion and do not allow to pass through |
| Sherwood Elementary | Survey | General | more during rainy season. |
| Shanwood Elementer | Sun ro | Conoral | Would like it if how there is a crossing guard at the crosswalk there would also be a crossing guard at the traffic |
| Sherwood Elementary | Survey | General | light. |
| Shenwood Elementer | Survey | Hebron | Opening up that back way on Hebron leading to school. Fixing the crosswalk situation in the school area or a |
| Sherwood Elementary | Survey | Hebron | better drop off area. Student hit in creecyalk creecing John St |
| Sherwood Elementary | Audit | John St and S Wood | Student hit in crosswalk crossing John St Flashing lights at all crosswalks near school and on John and Wood St. |

| University Park Elementary | Audit | University Ave | Lots of students crossing from university apartments, don't walk to crosswalk |
| University Park Elementary | | University Ave | Walking route for students. Sidewalks in place, no curb ramps or marked crosswalks. Broken sidewalk at University and Bedford |
| University Park Elementary | Survey | University Ave | The issue is the constant speeding of vehicles along University Avenue. Cars speeding have disregard for pedestrians coming off of Central Avenue and coming off of Acacia Avenue, cars have a tendency to speed along University Avenue and it is a hazard for pedestrians young and old. I moved into the University Avenue neighborhood in 2019. The neighborhood is relatively quiet. However, the speeding of vehicles has made it unsafe for all pedestrians who are walking, riding their bikes, and recreational runners. This has become a big unsafe issue and needs to be addressed. Traffic along University Avenue has reached high rates of speed. The residential speed limit is 25 mph not 35, 40, 45, and 50 mph. I have also seen a high speed chase in the neighborhood by CHP pursuing a vehicle with disregard to pedestrians. There are speed bumps along Ambrose Avenue and there are less pedestrians in that neighborhood and University Park Elementary is further away. Please address this issue speed bumps will definitely slow the traffic down, vehicles constantly are driving at unsafe speeds. |
| University Park Elementary | Survey | University Ave and Central Ave | Intersection of university and central is dangerous to cross. Cars don't stop at stop signs even in front of the school. |
| University Park Elementary | | University Ave and Central Ave | On central ave and university st the car go fast and they don't slow down for any one. There's no cross walk there. Plus it's a dangerous intersection. |
| Offiversity Fark Liementary | Survey | Ave | utere. Flus it's a dangerous intersection. |

| Virginia Rocca Barton Elementary School | Survey | Constitution Blvd and Freedom Pkway and Las Casitas Dr | Growing up in this area and including streets such as Constitution Blvd, Freedom and Las Casitas are a few of the highest in traffic, violence and safety issues in Salinas! As with many parents I just want to make sure my child not only gets to school, but to get to school safely! |
| Virginia Rocca Barton Elementary School | Suprov | Constitution Blvd and Las Casitas Dr | Speed of care on Constitution Plud and on Las Casitas Drive. Also distracted drivers |
| Virginia Rocca Barton Elementary School | Survey | Creek path | Speed of cars on Constitution Blvd. and on Las Casitas Drive. Also distracted drivers. Lots of students and families use the path to get to school. Path is in bad shape - broken pavement, trash, grafitti, steep embankment with no railing, homeless emcampments. Parents are concerned about kids falling into the creek. No lighting, kids get out of school in the dark in winter. Very sketchy unofficial unpaved pedestrian access to path from Ranchero Drive |
| Virginia Rocca Barton | ۸ا | Del Mente and Besifie | |
| Elementary School Virginia Rocca Barton | Audit | Del Monte and Pacific | |
| Elementary School Virginia Rocca Barton | Audit | Del Monte Ave Del Monte Ave and Pacific | Appears to be very wide - space for bike facilities? |
| Elementary School | Survey | Ave | Del monte and pacific no one to supervise when kids have to cross the streets |
| Virginia Rocca Barton Elementary School | Audit | General | About 50% of students walk and 50% are dropped off. Very little busing - buses drop-off and pick up on Las Casitas Drive north of the school driveway. Less than 10 students bike, bike parking present on campus. Staff parking lot at back of campus. |
| Virginia Rocca Barton Elementary School | Survey | General | As a parent I would also like to know about the safety of the children at school once they are able to attend! |
| Virginia Rocca Barton Elementary School | Survey | General | Bad sidewalks and vehicles parking on sidewalks due to street being narrow and no dividers. |
| Virginia Rocca Barton | | | |
| Elementary School Virginia Rocca Barton | Survey | General | Cars sometimes drive too fast. Children never should go to school alone or back home. Should always be with an adult because there could |
| Elementary School Virginia Rocca Barton | Survey | General | always be bad people. |
| Elementary School | Survey | General | Control the ice cream vendors because they congest the sidewalks. |

|--|-----------|-------------------------------------|--|
| Virginia Rocca Barton | Cuminu | Comoval | Wayld like if any wouldn't aread and were more asyticus about kida |
| Elementary School Virginia Rocca Barton | Survey | General | Would like if cars wouldn't speed and were more cautious about kids. |
| Elementary School | Survey | General | Would like to find a responsible person or school transportation to take him home while I'm at work. |
| Virginia Rocca Barton | ourvey | Goriora | Troute line to find a responsible person of serious drainsportation to take finit home while this at work. |
| Elementary School | Survey | General | Would like to see more police at arrival and dismissal because lots of cars speeding. |
| Virginia Rocca Barton | | | |
| Elementary School | Survey | General | Would like to see more supervision on the streets during school hours. |
| Virginia Rocca Barton | | | Would like to see people watching the crosswalks on the way to school where most students cross not only at |
| Elementary School | Survey | General | the front of the school. |
| | | | I believe the raised crosswalk is the better option. On Las Casitas, the space is limited and will be more |
| Virginia Rocca Barton | Danish | Las Casitas Ave and Front of School | challenging to augment the street with curb extensions or separated bike lanes. In my opinion, that makes me |
| Elementary School Virginia Rocca Barton | Parent | Las Casitas Ave and Front of | think there will be more traffic. In addition to the raised sidewalks right outside of Virginia Roccca Barton, would you be able to add the |
| Elementary School | Parent | School | flashing lights when students and pedestrians cross. |
| Virginia Rocca Barton | | | Lots of speeding outside of pick-up and drop-off, drivers speed up and down the hills. No curb ramps at |
| Elementary School | Audit | Las Casitas Dr | intersections. |
| Virginia Rocca Barton | | | |
| Elementary School | Survey | Las Casitas Dr and Rider Ave | Drivers speeding who are not cautious on Rider Ave, Las Casitas etc. |
| Virginia Rocca Barton | | | |
| Elementary School | Survey | Las Casitas Dr and Rider Ave | Lack of safety on the streets specially at Las casitas, Rider Ave and speeding cars. |
| Virginia Rocca Barton | C | Las Casitas Du and Bidan Ava | Character and a second second law class of the Didon Account and a second secon |
| Elementary School | Survey | Las Casitas Dr and Rider Ave | Streets are unsafe specially along Las Casitas, Rider Ave and cars speeding. |
| Virginia Rocca Barton Elementary School | Resident | Pedestrian path | Dangerous for kids. Might fall into the creek. Feels also a bit unsafe for adults. |
| Virginia Rocca Barton | osiaciit | . Jacoman pam | - angui suo ter masi. Engris min mao ano erochi. Ecolo albo a bit unbaio for adulto. |
| Elementary School | Survey | Ranchero Dr and Alamo Way | Crosswalks by Ranchero and Alamo cars turn too guickly when children are crossing. |
| Virginia Rocca Barton | ĺ | Í | |
| Elementary School | Audit | Ranchero Drive | Speeding |
| Virginia Rocca Barton | | | |
| Elementary School | Resident | Ranchero St | Cars driving too fast. |
| Virginia Rocca Barton | | | |
| Elementary School | Resident | Ranchero St and La Honda Ct | Cars driving too fast. |
| Virginia Rocca Barton Elementary School | Resident | Ranchero St and Las Casitas Dr | Visibility issues turning left from Ranchero onto Las Casitas. |
| Virginia Rocca Barton | resident | | Visibility issues turning left from Hanchelo onto Eas Casitas. |
| Elementary School | Audit | Rider and Del Monte | New curb ramps in place, low-viz crosswalks |
| Virginia Rocca Barton | | | Drivers don't let students cross at Rider and Del Monte. Car's don't even stop. Sometimes kids will be midway |
| Elementary School | Parent | Rider Ave | crossing and cars just go when kids have not even finished crossing. |
| Virginia Rocca Barton Elementary School | Parent | Rider Ave | Street has lots of traffic and the speed limit is supposed to be 25mph but nobody respects it and people drive over 70 and 80 mph as seen on home cameras. There have been accidents. Need speed bumps so that limit is respected. In addition to crashes, a child was hurt but survived. |
| Virginia Rocca Barton | | | |
| Elementary School | Audit | Rider Ave | Speeding. Route to Frank Paul Elementary |
| Virginia Rocca Barton | | | |
| Elementary School | Survey | Rider Ave and Alamo Way | Our son walks past Raider and Alamo and the streets are not very safe due to many cars. |
| Virginia Rocca Barton Elementary School | Audit | School entrance and Las Casitas | Traffic trying to enter the loop backs up in both directions on Las Casitas. Southbound drivers trying to turn right use the bike lane as a right-turn lane. Lots of pedestrians crossing, difficult to cross the street due to traffic. They have had crossing guards in the past but it is hard to keep them, it is a dangerous job and they suffer a lot of abuse. |
| Virginia Rocca Barton | | | |
| Elementary School | Audit | School parking lot | Families walking to campus must cross driveway to staff parking |
| Virginia Rocca Barton Elementary School | Audit | School parking lot | Parking lot is a mess. Parents park in the drop-off loop and walk in. No staff controlling traffic in loop. Parents double park throughout lot to walk students in, other drivers get stuck. They tried a system to organize pick-up by grade level in the past but abandoned it, too labor intensive. |
| Virginia Rocca Barton | Audit | School parking lat | Touchors and parents onter through the positive let out to quality the sector U.S. |
| Elementary School | Audit | School parking lot | Teachers and parents enter through the parking lot exit to avoid the school loop. Traffic I'm concerned about. Also the amount of missing children. It's hard to take 4 different children to 3 |
| Washington Middle School | Survey | Alder Circle | different schools with one car and a husband that works. but it's better to drive them that to have something happen on there way to school. Alder Circle, Salinas |
| Washington Mill C. | C | Diamen Del | Also, crossing Blanco is a concern for me being that is a speed of traffic. There not that may student that walk |
| Washington Middle School | Survey | Blanco Rd College Street and School | along that street after school. |
| Washington Middle School | Principal | Rear Access | College Street access to school is closed caused congestion. In the morning and after school, the only entrance to the school is the front and main entrance. |
| Trasmington Pilidale School | Ппсіраі | noar necos | 1,200 students. 400-500 bused. Students all coming from area south of Hwy 101, some from outside the City. |
| Washington Middle School | Audit | General | About 20 skateboarders, 30 cyclists, bike parking present on campus. About 200 walkers, 400 dropped off by parents. |
| | | | |
| Washington Middle School | Audit | General | Concerns about homelessness, crime, and harassment of students. 2 stabbings on Clay St in the last year. |
| Washington Middle School | Audit | General | Small lot between Lang and Gell is staff parking, closed to parent parking. Bus drop-off and pick-up happens on school frontage south of Gell. Gates to campus on Acacia and College Drive |
| Washington Middle School | Parent | General | Change start and end time. Allow 7th graders to start or be released 5 or 10 minutes before or after. |
| Washington Middle School | Parent | General | More cross guards or student leadership roles to make crossing the street safer. |
| | | | |
| | | | |
| | | | |

| Washington Middle School | Student Survey | General | I live very far away from Salinas. |
|--------------------------|----------------|---------|---|
| Washington Middle School | Student Survey | General | if i walked to school i would have to cross lots of busy streets like alisal st. |
| Washington Middle School | | General | Nothing, I actually live in a nice area but it's kinda far from Washington and it would take me a long time to get to school. |
| Washington Middle School | | General | Sometimes at the bus stop my mom waits for me I am scared because you never know if there is person that sees you crossing but won't bother to stop. |
| Washington Middle School | - | General | When biking to school I have to take all of East Alisal street and It takes time for people to stop and if people would stop fast It would take me 17 minutes to get to school. |
| Washington Middle School | Student Survey | General | When I drive to school everything is good. |
| Washington Middle School | Student Survey | General | When i ride do school i pass east Alisal at N Madeira Ave. |
| Washington Middle School | Student Survey | General | When I ride the school bus, I have to cross old town and it is boring because they either dont have music or not any good music. |
| Washington Middle School | Student Survey | General | when i walk thought main st its kinda weird there are lots of homeless that are agresive its kinda unsafe |
| Washington Middle School | Student Survey | General | When i walk to school im concerned about time. |
| Washington Middle School | Student Survey | General | When I walk to school, I have to cross main st at clay st and it take a long time. |
| Washington Middle School | Survey | General | student is disabled |
| Washington Middle School | Survey | General | A lot of homeless people and encampments on this route. |
| Washington Middle School | Sunga | General | After school activities have been helpful for me child because it ensure that she remains safe at School after educational hours. Also, the YMCA and Salinas School Extended Day Care where wonderful services that I was appreciative because it allow from me a 8-5working parent to have support for the care of child and a peace of mind to ensure she was safe and not alone. |
| Washington Middle School | Survey | | mind to ensure she was sale and not alone. |
| Washington Middle School | Survey | General | Bullied |
| Washington Middle School | Survey | General | Bullying on the bus. |
| Washington Middle School | Survey | General | Bullying was an issue waiting for the morning bus therefore I started to give her a ride to and from school. |
| Washington Middle School | Survey | General | Crosswalks |
| Washington Middle School | Survey | General | Don't feel safe letting my child walk to school at all |
| Washington Middle School | Survey | General | gald to know there's a plan to help out our commuinty safety routes to our students to their schools |
| Washington Middle School | Survey | General | Homeless people and vehicles driving fast car accidents. |
| Washington Middle School | Survey | General | Homelessness issues |
| Washington Middle School | Survey | General | I am concerned about children's safety & would like to see addressed about loose and stray dogs, people speeding & driving horrible, and what to do about homeless people around the schools. |
| Washington Middle School | Survey | General | I am so glad that this issue is being addressed! |
| | | | I would like more effective speed bumps and more neighborhood awareness regarding kids walking home, |
| Washington Middle School | Survey | General | school crossing guards, and possibly police around the schools giving tickets to people that drive reckless I would like that my son rides his bike to school but unfortunately we live too far and the route is unsafe |
| Washington Middle School | Survey | General | because drivers speed. I WOULD LIKE TO SEE MORE ADULT SUPERVISION AM & PM , CROSS GAURDS, ADDRESSING CARS and PEOPLE |
| Washington Middle School | Survey | General | TO MOVE ALONG IF THEIR CHILD HAS BEEN PICKED UP. |
| Washington Middle Cale | Sunge | Conord | I WOULD LOVE FOR CHILD TO GO BACK TO SCHOOL BECAUSE SHE IS FAILING AND HAVING ALOT OF ISSUES WITH THIS DISTANCE LEARNING BUT THEN AGAIN I AM HAPPY SHE'S HOME BECAUSE WHEN SHE WAS IN SCHOOL I WAS SCARED FOR HER SAFELTY SO MANY FIGHTS SEEMED LIKE EVERY DAY THERE WAS A FIGHT, IF MORE SUPERVISION IS NEEDED SPEAK UP LET PARENTS KNOW SO THEY COULD VOLUNTEER. I'D BE HAPPY TO DO SO EVEN AFTER MY CHILD LEAVE THE SCHOOL I WANT ALL KIDS TO FEEL SAFE BEFORE, DURING & |
| Washington Middle School | | General | AFTER SCHOOL THIS SHOULD BE THEIR SAFE PLACE Line to be more visible. Traffic to flow one way for parents to pick up there child safer. Front of school parking |
| Washington Middle School | Survey | General | is carzy. |
| Washington Middle School | Survey | General | More safety at crossings. |
| Washington Middle School | Survey | General | More safety for children at crosswalks. |
| Washington Middle School | Survey | General | More security police during busy hours traffic |
| Washington Middle School | Survey | General | MY CONCERN WAS A FEW TIMES MY CHILD TOLD ME ABOUT A PERSON(MALE) FOLLOWING HER ON HER WAY HOME, ALSO THE AMOUNT OF TRAFFIC THIS SCHOOL CREATES IS CRAZY I WAS SCARED FOR MY CHILDS SAFETY CROSSING THE SRTEETS, SPEEDING CARS. |
| | | | |

| _ | | | My daughter will walk to school in the morning with her grandmother. She noticed kids walking were they |
|---------------------------|-----------|--|--|
| Washington Middle School | Survey | General | should not be walking crossing were they should not be crossing. |
| Washington Middle School | Survey | General | My daughter's school is too far from home to let her walk. I feel much better driving her to school |
| Washington Middle School | Survey | General | My family lives at the other side of town on E. Alvin Dr so school is too far for my son to ride his bike or walk. |
| | | | New to the area. The story of crime, drugs, bullying, and fights that long time Salinas residents reported about |
| Washington Middle School | Survey | General | the school is a safety concern. Which resulted in a rise on my personal insecurity about my child safety of she walks alone. In addition, my child does not have any friends in our neighborhood that she could walk with. |
| Washington Middle School | Survev | General | Parking meters |
| Washington Middle School | | General | People speeding & driving dangerous & too many homeless people out by the schools & loose dogs. |
| <u> </u> | | General | Perhaps creating a route for children and having police presence in those designated areas. |
| Washington Middle School | _ | | |
| Washington Middle School | | General | Safety and proper crosswalks |
| Washington Middle School | Survey | General | Safety around intersections and the amounts of traffic. |
| Washington Middle School | Survey | General | School is across town and my student is disabled. |
| Washington Middle School | Survey | General | speeding cars, young, careless drivers |
| Washington Middle School | Survey | General | Staff needs to be everywhere kids are out of control. They have no respect for people property. |
| Washington Middle School | Survey | General | Supervision for kids who take the bus. |
| Washington Middle School | Survey | General | The school is across town and my student is disabled |
| Washington Middle School | Survey | General | There are too many cars in front that use the middle lane as a parking spot or a waiting spot. Cars block the lanes and other cars cannot get through. |
| Washington Middle School | Survey | General | There are too many cars parked on the side streets and not enough bike lanes and crosswalks. |
| Washington Middle School | Survey | General | There should be a lane designated for bicycles so that drivers respect cyclists. |
| Washington Middle School | Survey | General | They don't respect cyclists. |
| Washington Middle School | Survey | General | Too far |
| Washington Middle School | | General | Traffic |
| Washington Middle School | Survey | General | Traffic issues |
| Washington Middle School | Survey | General | Traffic safety |
| Washington Middle School | | General | Unsafe Crossings. |
| | | | • |
| Washington Middle School | | General Homestead and Iverson and | We live quite far so for now I have no further issues. |
| Washington Middle School | Audit | Clay | Lots of traffic and students crossing |
| Washington Middle School | Survey | Hwy 68 | Child would have to ride along Hwy 68 and cross the road. Marked crosswalk, no crossing guards in place. Parents parked in red zone make it difficult to see students |
| Washington Middle School | Audit | Iverson at Lang | crossing. |
| | | | Main concern for school staff. Parents park in center lane, students running across travel lanes to get to school. |
| Washington Middle School | Audit | Iverson St and Clay St and | Parents making U-turns in front of the school. Speeding is an issue during off-peak hours. I would think a crossing guard at the three way stop of iverson, clay and homestead could help with the |
| Washington Middle School | Survey | Homestead St | congestion and dangers. Possible to get funding to add space for cars dropping off students at front of school? Currently there's |
| Washington Middle School | Parent | Iverson St and Front of school Iverson St and Front of | minimal space so parents are forced to drop off at various areas. |
| Washington Middle School | Parent | School | Traffic and speeding on Iverson is dangerous for students. |
| Washington Middle School | Principal | Iverson St and Front of School | Cars parking in the center lane which is supposed to be for making a left turn causes traffic congestion. |
| Washington Middle School | Principal | Iverson St and Front of School | Double parking in front of the school causes congestions as parents who arrive earlier and parked can't leave because there are other cars behind. |
| Washington Middle School | Survey | Iverson St and Front of School | Lots of traffic in front of school. Random people trying to talk to young kids. |
| Washington Middle School | | Iverson St and Front of school | Washington middle school needs beacon lights for the safety of the students due to high traffic in School hours |
| Washington Middle School | | Iverson St and Lang St and Geil St | Location of street vendors on Iverson and Lang St cause traffic. |
| mashington Piladie School | raiont | aon ot | Common of Street vendors on recison and Lang St cause traint. |

| | | | A group of parents raised concerns about the school bus pick up zone at La Paz park. Approximately 200 students catch the bus there, unsupervised. According to parents buses have to park in the middle of the street, drivers sometimes don't give ROW to students, there's no organization to manage a group of 200 students who gather there, lighting is dim around the park, there have been instances of homeless individuals staying at the park and drug use. The park hasn't been well-maintained with trash around and drug |
|--------------------------|-----------|-------------------------------|---|
| Washington Middle School | Parent | La Paz Park | paraphanalia. |
| Washington Middle School | Audit | Lang and Riker | Lots of students crossing |
| Washington Middle School | Parent | Lincoln Ave and Clay St | Safety for students who walk to school and walk by the shelter on Lincoln. |
| Washington Middle School | Principal | Lincoln Ave and Clay St | Corner of CLAY St and the YMCA is dangerous for students because of shelter. There is also a lot of traffic because of the cars going to Salinas High. |
| Washington Middle School | Survey | Lincoln Ave and Clay St | My child walks to my work after school which is about 1.5 miles away. The shelters and homeless in the area, make me worry for my child's safety especially since a pregnant woman was stabbed near YMCA during the day time a few years ago. |
| Washington Middle School | Survey | Lincoln Ave and Clay St | My children are grown 25 & 27, but I always delivered them to school by my vehicle. I live in "old town" Salinas 300 block of Capitol Street they went to WJH and SHS. At the time I was mainly concerned with gang issues, but was able to flex my hours at work to be able to bring them and pick them up at school. As of late I have been very concerned with the children that walk to WJH and SHS past the Methodist Church on Lincoln as I have witnessed drug sales and use out in front of the church while children are walking by. Church needs to have security and it would be best to have adult volunteers along the routes to schools which may help with children witnessing the above and may help to keep them safe from gang issues as I have heard that children walking to school are targets for the gangs to recruit. |
| Washington Middle School | Survey | Lincoln Ave and W San Luis | Addicts in the area of Lincoln and San Louis attract drug dealers and gangs. In addition the Methodist Church protects pedophiles, they take them in as other shelters are not supposed to. Children need to be kept safe and have witnessed countless issues in this area while children are walking to school. Children need to be kept safe. |
| Washington Middle School | | Main St | Main St is the only one that worries me because it's a street with heavy traffic and I have seen accidents and cars don't respect the signals. |
| Washington Middle School | Survey | Marion Ave and Back of School | The school needs to open up the back of the school for drop off like they use to do. This would spread out the congestion. Or redo the front to allow for an appropriate drop off location. |
| Washington Middle School | Survey | Romie Lane | Traffic speed on Romie Lane faster than 25 mph limit. |
| Washington Middle School | Survey | S Main St | Crossing the Street (South Nain street) |
| Washington Middle School | Survey | Victor St | Cars driving to fast by Victor street. |
| Washington Middle C. L. | C | W Acacia St and Mission Park | Assistant the form of the first of Mississan and sales and an arrangement of the sales and the sales are sales as the sales and the sales are sales as the sales are sales are sales as the sales are sales are sales as the sales are |
| Washington Middle School | Survey | Elem | Acacia street lots of traffic and in front of Mission park school cars speeding. Alisal Street intersection. I appreciate the new bike lanes, but how will you insure other drivers won't speed or |
| Washington Middle School | Survey | W Alisal St | run stop signs or lights. |
| Washington Middle School | Survey | W Alisal St | My main concern was my child crossing Alisal street. Also the cars that speed in the mornings when heading to work at the same time as school starts. |

| SCESD Board meeting | General | Maintenance is key - need to clear streets and sidewalks. Her son stopped biking because goat heads popped his tires over and over. | This plan recommends pursuing additional funding for roadway maintenance to ensure that bicycle and pedestrian facilities throughout the city are safe and accessible. | Recommendation added to maintenance section in Ch 4: This plan also recommends that the City of Salinas finalize and implement the Salinas Reconfiguration of Street Sweeping Routes and Signage Plan. The City will sweep residential streets two times monthly and commercial streets four times monthly. No parking signs shall be installed to provide the street sweeper curb access during designated street sweeping days. |
| CCECD Decad acception | Consul | Describes the state of the stat | | No action |
| SCESD Board meeting | General | Board member thinks the city should pay for crossing guards | | No action |
| Online Comment | General | As a parent of a child a La Joya Elementary School I want to believe that these plans would work. You can teach the kids every kind of safety rule and how to implement them, but its the drivers, i.e. Parents that are the hazard. They do not pay attention, they do not think the rules apply to them. They are the ones always in a hurry, park where they are told not to, they speed to and from, don't stop for the children in cross walks. The only way these plans are going to work is if you educate the parents, and hold them accountable. Ticket and tow the ones parking in no parking zones. Have the sheriff and police come out and stop and ticket the ones speeding in the school zone or not stopping for the cross walk. You can spend all the money in the world to fix the situation but nothing will change unless you hole these self entitled people responsible for their actions. Remind them that even though they spent months alone during quarantine they are in fact not the only people in the world, and just because they get treated like royalty at home, in the real world they are human just like the rest of us. Educate the adults, then work on the kids. | 1. Distribute a traffic circulation plan and bike and pedestrian safety information to parents at the beginning of the school year through all possible communication channels (email, handouts, parent meetings, back to school nights, etc.). 2. Develop programs and events to provide parents and guardians with traffic safety education, such as the following: oCommunity traffic safety education events on weekends. OTraffic safety messaging at established parent meetings and events, such as back-to-school nights and spring open houses. oLocate traffic-safety education staff members at schools to talk to parents during drop-off. | Language added to recommendation #1: Distribute traffic circulation plan and bike and pedestrian safety information to parents with the goal of promoting positive behavior during drop-off /pick-up. Distribute information at the beginning of the school year through all possible communication channels (email, handouts, parent meetings, back to school nights, etc.). Language added to Chapter 4, Citywide Recommendations that City of Salinas will look for opportunities to convert Class II bike lanes to Class |
| Online Comment SUHSD Board Meeting | General Harden Parkway | For the safety of the students, CLASS I (separated from the street) makes the most sense, especially when considering all the hit-and-run deaths in Salinas. I would also recommend a bike path along the Salinas River in collaboration with all the farmers, in order to connect to the Ocean/Marina, but that's another project:) Speeding - like a drag strip | Rec #HM002: Evaluate for possible road reconfiguration (road diet) and Class IV bike lanes. | IV separated bikeways or Class I paths. Path along Salinas River is outside the scope of Salinas Safe Routes to Schools Plan. For plans for regional connections see the TAMC Active Transportation Plan: https://www.tamcmonterey.org/active-transportation-plan Addressed in existing recommendation. |
| | | - | | , |

| SOURCE | LOCATION | COMMENT | EXISTING RECOMMENDATION | ACTION |
|--|---|--|--|---|
| SUHSD Board Meeting | Independence/Danbury | Past board conversation about the need for a traffic light and street light at this intersection. | Rec #EAH007: Conduct warrant study for traffic signal or pedestrian hybrid beacon. If traffic signal is warranted, install marked crosswalks on all legs of intersection. Allow right-turn access only in and out of Danbury St. | Language added to existing recommendation: Evaluate for additional lighting at intersection. |
| SCESD Board meeting | Natividad Rd / Los Coches Natividad Rd between | Speeding is a big issue on Natividad, crosswalk is used by Loma Vista students and it is not safe Please add the recommendation for a walking path on Natividad road from | Rec # LVE012: Consider center median pedestrian refuges, curb extensions, protected pedestrian pedestrian pedestrian interval. Rec# LVE011: Install separated bikeways on Natividad Rd Rec # RSJHS014: When development is constructed, install bike lanes and 8' sidewalks | Addressed in existing recommendations. |
| Online Comment | | Rogge Road to Boronda. Many students are walking through the dirt field to get to Rancho San Juan. | on both sides of street as outlined in West Area Specific Plan | Addressed in existing recommendation. Response sent to commenter. |
| TAMC Bike & Pedestrian Facilities Advisory Committee | Rogge Road | Question if the Class I on Rogge Rd could be prioritized | Rec #JGM004: Install multi-use path along south side of Rogge Rd between Natividad Rd and Rancho San Juan High School | No action. Project prioritization is based on evaluation criteria and does not determine the order of project construction. Rec #JGM004 is dependent on West Area Specific Plan development. |
| SRESD Board meeting | San Juan Grade at Corwall and Penzance | Critical locations for improvements | Rec # RSJH012: Construct curb extensions with ADA ramps and install High-Visibility crosswalks across San Juan Rd and on both sides of Penzance St./Cornwall. Include RRFB and median ped refuge for San Juan Grade Rd crossing | Addressed in existing recommendation. |
| | | Dear Ladies and Gentlemen of the board, Sorry to bother you but when looking over the Safe Routes to School Plan I noticed a glaring omission of an area within our district that, I at least feel, needs to be addressed. I am referring to the way students get from Penzance Street to Russel Road. As of right now our families that walk that route have no sidewalk to walk along to get from Penzance to the crosswalk at San Juan Grade and Russell Road. Right now they have to walk on a shopping dirt path, or else jay-walk across San Juan Grade road and walk through a neighborhood that again has no sidewalk and that many cars speed through as a "short cut". Now I am not sure if it is possible to add to this plan at this stage, if it isn't I implore you to please keep it in mind if there will be a second part to this plan. Please let me know if you have any questions or need any additional | Rec #UE010: Construct sidewalks along segments where no sidewalk exists between Russell Rd and Rogge Village Wy. Consider multi- | Addressed in current recommendation. Response |
| Email to SRESD Board TAMC Bike & Pedestrian Facilities | San Juan Grade Rd | information. | use path for bicycle use. Rec # MLKA008: Short term: install class II bike lanes on Sanborn RD between Laurel/Del Monte. Long term: widen sidewalk to create multi-use path between Laurel to Garner. Rec # DOLA018: Install Class IV separate bikeway or Class IIB buffered bike lanes and conflict striping on Sanborn Rd between Freedom Pkway and Boronda Rd. Rec # LPM018: Upgrade existing Class II bike lane to Class IV separated bikeway on Sanborn Rd between Del Monte Ave and Buckhorn Dr. Include conflict striping at intersections. Consider future Class IV or buffered bike lane west of Del Monte Ave with 2-way center turn | Sanborn Rd between Boronda Rd and Laurel Dr is covered in existing recommendations. Sanborn Road between Laurel Dr and Abbot St will be evaluated in upcoming Active Transportation Plan. This segment has not been identified as a key route |
