

Appendix D:

Mitigation Monitoring and Reporting Program

FINAL MITIGATION MONITORING AND REPORTING PROGRAM

4.0

This document is the Final Mitigation Monitoring and Reporting Program (FMMRP) for the Salinas Central Area Specific Plan Project (Project). This FMMRP has been prepared pursuant to Section 21081.6 of the California Public Resources Code, which requires public agencies to "adopt a reporting and monitoring program for the changes made to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment." A FMMRP is required for the proposed project because the EIR has identified significant adverse impacts, and measures have been identified to mitigate those impacts.

The numbering of the individual mitigation measures follows the numbering sequence as found in the Draft EIR, some of which were revised after the Draft EIR were prepared. These revisions are shown in Chapter 3.0 of the Final EIR. All revisions to mitigation measures that were necessary as a result of responding to public comments and incorporating staff-initiated revisions have been incorporated into this FMMRP. The FMMRP also includes mitigation measures which are required by the *Final Environmental Impact Report, Salinas General Plan* (Cotton Bridges Associates 2002) and the *Final Supplement for the Salinas General Plan Final Program EIR* (EDAW, 2007).

4.1 MITIGATION MONITORING AND REPORTING PROGRAM

The FMMRP, as outlined in the following table, describes mitigation timing, monitoring responsibilities, and compliance verification responsibility for all mitigation measures identified in this Final EIR.

The City of Salinas will be the primary agency responsible for implementing the mitigation measures and will continue to monitor mitigation measures that are required to be implemented during the operation of the Project.

The FMMRP is presented in tabular form on the following pages. The components of the FMMRP are described briefly below:

- **Mitigation Measures:** The mitigation measures are taken from the Draft EIR in the same order that they appear in that document.
- **Mitigation Timing:** Identifies at which stage of the Project mitigation must be completed.
- **Monitoring Responsibility:** Identifies the agency that is responsible for mitigation monitoring.
- **Compliance Verification:** This is a space that is available for the monitor to date and initial when the monitoring or mitigation implementation took place.

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

This page left intentionally blank.

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

TABLE 4.0-1: MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
AIR QUALITY	<p>Impact 3.1-2: Project operation has the potential to cause a violation of an air quality standard or contribute substantially to an existing or projected air quality violation</p> <p>Mitigation Measure 3.1-1: Prior to approval of tentative maps, conditional use permits or site plan review, the project applicant(s) shall incorporate the following features into project plans and specifications, as directed by the City of Salinas:</p> <ul style="list-style-type: none"> • Provide traffic calming measures (such as speed humps, traffic circles, and/or other standard measures) on at least 50% of streets and intersections within the Plan Area; • Require the parking lots or parking structures for new commercial, office, retail, and multifamily development to provide enough parking spaces for carpools and vanpools to accommodate reasonably foreseeable consumer demand at the time of the approval of such development, consistent with State of California laws and policies intended to encourage the use of carpools and vanpools; • Require the use of low-VOC paint for all new building architectural coatings within the Plan Area, consistent with or better than, what is required by the City's Municipal Code. <p>Mitigation Measure 3.1-2: Prior to approval of development review permit(s), the project applicant(s) shall incorporate effective methods to facilitate the use of cleaner alternative fuel (e.g., electric vehicles, carpooling, etc.) within the Plan Area. Effective methods may include the installation of alternative fuel (e.g., electric) charging stations at locations spaced throughout the Plan Area including but not limited to those specified in this Draft EIR, as applicable, consistent with or better than what is required by the City's Municipal Code and Specific Plan. Additionally, this can be achieved by providing preferential parking for alternatively-powered vehicles, including electric cars, and/or by providing carpool/vanpool parking spaces.</p> <p>Mitigation Measure 3.1-3: Prior to approval of development review permit(s), the project applicant(s) shall incorporate the use of alternative</p>	City of Salinas Community Development Department	Prior to approval of tentative maps, conditional use permits or site plan review	City of Salinas Prior to approval of development review permit(s)

4.0-4 Final Environmental Impact Report – Salinas Central Area Specific Plan

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
<p>space, or similar as approved by the City Engineer) at all commercial and public facilities with 50 employees or more;</p> <ul style="list-style-type: none"> • Incorporate park-and-ride lots. • Install Level 2 electric vehicle (EV) charge stations at workplace sites with 50 or more employees (10% or more of total available parking spaces, dependent on the existing and anticipated overall electric vehicle fleet mix in Monterey County at time of development); and • Install publicly-available dual post Level 2 charge stations within the VC or NG zones, and/or other zones as deemed acceptable by the City of Salinas. (Note: The 'level' of the charging station refers to the voltage that the electric vehicle charger uses. Level 1 charging is your typical traditional home outlet, while level 2 is a 240 Volt Portable Cordset or Wall-mounted Charging Station (2-10 hours charging). 	<p><i>Mitigation Measure 3.1-8: Prior to the approval of individual phases (i.e. tentative maps, site plan review, etc.), the project applicant(s) shall develop a reasonably feasible offsite mitigation program that provides funding to offset the project-generated air emissions that are still above the Air District's operational criteria pollutant thresholds after the adoption of other applicable air quality mitigation measures. The offsite mitigation program is subject to the review and approval of the Air District and the City of Salinas on a project-by-project basis (of phase-by-phase), and is intended to be in addition to offsets that are obtained through any on-site mitigation measures. Example projects that could be included in the offsite mitigation program may include, but are not limited to, the following:</i></p> <ul style="list-style-type: none"> • Replace existing agricultural combustion-based generators/pumps with electric agricultural water pumps (in place of generators/pumps); • Replace combustion school buses with electric school buses within the local community; 	<p>City of Salinas Community Development Department</p>	<p>Prior to approval of individual phases (i.e. tentative maps, site plan review, etc.)</p>	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
Impact 3.1-3: Project construction has the potential to cause a violation of an air quality standard or contribute substantially to an existing or projected air quality violation	<ul style="list-style-type: none"> • Install adaptive traffic control systems; • Install solar photovoltaic (PV) systems. <p>Mitigation Measure 3.1-9: Prior to the issuance of grading permits, the project applicant shall prepare a grading plan subject to review and approval by the City. In the event that ground-disturbance exceeds 2.2 acres per day for initial site preparation activities that involve extensive earth-moving activities (e.g., grubbing, excavation, rough grading), and 8.1 acres per day for activities that involve minimal earth-moving (e.g., finish grading), the required grading plans shall include the following measures to be implemented as needed to prevent visible dust emissions:</p> <ul style="list-style-type: none"> • Water all active construction sites to prevent visible dust emissions. Frequency should be based on the type of operation, soil, and wind exposure; • Prohibit grading and earthmoving activities, and cover stock piles, during periods of high wind (over 15 mph); • Limit vehicle speed on construction sites to 15 mph. • Apply chemical soil stabilizers on inactive construction areas (disturbed lands within construction projects that are unused for at least four consecutive days); • Apply non-toxic binders (e.g., latex acrylic copolymer) to exposed areas after cut and fill operations and hydroseed area; • Maintain at least 1-foot of freeboard in each haul truck; • Provide windbreaks on the windward perimeter of construction projects where adjacent to open land; • Cover inactive storage piles; • Sweep streets if visible soil material is carried out from the construction site; and/or • Post a publicly visible sign written in English and Spanish which specifies the telephone number and person to contact regarding dust complaints. This person shall respond to complaints and take corrective action within 48 hours. The phone number of the Monterey Bay Air Resources District (MBARD) shall be visible to 	City of Salinas Community Development Department Monterey Bay Air Resources District	Prior to the issuance of grading permits	

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<ul style="list-style-type: none"> ensure compliance with Rule 402 (Nuisance). The sign shall be in accordance with MBARD and/or City requirements, as applicable Use cleaner construction equipment that conforms to EPA's second or first-most stringent Tier emission standards (e.g. Tier 3 or Tier 4 emission standards in 2019), or better; and/or Further, where reasonably feasible, construction equipment should include the use of alternative fuels such as compressed natural gas (CNG), propane, electricity or biodiesel. 			
Impact 3.1-5: The proposed Project has the potential for public exposure to toxic air contaminants	<p>Mitigation Measure 3.1-10: Prior to issuance of building permits or commencing operation of any commercial building/use that would emit toxic air contaminants (such as gas stations or dry cleaning operations), the project applicant shall, at a minimum, perform prioritization screening in accordance with the Air Toxics "Hot Spots" Program, Facility Prioritization Guidelines (July 1990) and the Air Toxics "Hot Spots" Program, Facility Prioritization Assessment Act. The prioritization screening shall be performed in accordance with the California Air Pollution Control Officers Association Air Toxic "Hot Spots" Program guidance. The prioritization screening shall also be conducted consistent with the guidance provided by the Monterey Bay Air Resources District, which will be responsible for determining which facilities based on their prioritization screening score, must perform a health risk assessment. In determining the need to prepare a health risk assessment, the Monterey Bay Air Resources District considers the potency, toxicity, quantity, and volume of hazardous materials released from the facility, the proximity of the facility to potential receptors, and any other factors specific to the facility that indicate that it may pose a significant health risk.</p> <p>If a health risk assessment is warranted for a facility based on its prioritization score, the project applicant shall assess the facilities for the potential to expose the public to toxic air contaminants in excess of the applicable thresholds utilizing an air dispersion modelling program such as AERMOD. As of the time of this writing, the commonly accepted threshold for cancer risk is 10 in a million for carcinogens, and the reference exposure level for non-carcinogens ($HI = 1$). Facilities that exceed the applicable threshold(s) have the potential to expose the public to toxic air contaminants</p>	City of Salinas Community Development Department Monterey Bay Air Resources District	Prior to issuance of building permits or commencing operation of any commercial building/use that would emit toxic air contaminants (such as gas stations or dry cleaning operations)	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
levels that would be considered significant. Facilities that exceed the applicable threshold(s) must incorporate mitigation to reduce the risks from emission of toxic air contaminants to an acceptable level (i.e., to a level that does not exceed the applicable threshold[s]). Potential mitigation includes: reducing the size of the facility area; rearranging the site to reduce the potential for impacts on the nearest sensitive receptors; and utilizing products that reduce the level of toxic air contaminants, or removal of such products from the operational phase of the project.				
Impact 3.1-7: Cumulative impact on the region's air quality	Implement Mitigation Measures 3.1-1 through 3.1-10.	See Mitigation Measures 3.1-1 through 3.1-8	See Mitigation Measures 3.1-1 through 3.1-8	See Mitigation Measures 3.1-1 through 3.1-8
BIOLOGICAL RESOURCES				
Impact 3.2-2: The proposed project has the potential to, directly or indirectly, have a substantial adverse effect through habitat modifications or reductions, cause populations to drop below self-sustaining levels, substantially eliminate a community, or substantially reduce the number of, or restrict the range of, an endangered, rare or threatened species, including those considered, candidate, sensitive, or special status in local or regional plans, policies, regulations, or by the CDFW or USFWS - Reptile and Amphibian	Mitigation Measure 3.2-1: Prior to issuance of grading and/or building permits, the project applicant, assisted by a qualified biologist, shall consult with the USFWS and CDFW to obtain the appropriate regulatory approvals and authorizations regarding CTS. It is anticipated that the applicant would need to coordinate with the USFWS and CDFW on any additional survey needs, beyond the surveys, assessments, and genetic testing that has already been performed on this site for this species, during the consultation process. The surveys, assessments, and genetic testing that has already been performed, in addition to any additional survey needs, will inform what, if any, take authorization is required from CDFW to comply with CESA. Consultation with CDFW and the USFWS shall be conducted well in advance of beginning the surveys and prior to any planned vegetation- or ground-disturbing activities.	City of Salinas Community Development Department California Department of Fish and Wildlife U.S. Fish and Wildlife Service	Prior to issuance of grading and/or building permits	Qualified Biologist
The regulatory approvals are anticipated to include the need to submit an application for incidental take to both the USFWS (Section 7 Consultation) and CDFW (2081 incidental take permit). The project applicant's qualified biologist shall report the conclusions reached through such consultation to the City's Community Development Director. If either USFWS or CDFW determines that an incidental take permit is required, the project applicant shall obtain such a permit before engaging in any grading or other site-

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>treatment activities in areas deemed to be viable CTS habitat.</p> <p><i>It is anticipated that compensatory mitigation will be necessary for the loss of aquatic habitat associated with the 0.25-acre agricultural basin located on the east side of Natividad Road, approximately 0.4 miles north of East Boronda Road. At a minimum, the restoration and habitat creation of up to 30 acres along Gabilan Creek and 74 acres along Natividad Creek (net of any recreational amenities and public facilities required to facilitate the project) shall include ponded/basin areas that provide aquatic breeding habitat opportunities for CTS within the Specific Plan Area. The required amount of ponded/basin areas shall not be less than the 0.25 acres which is equivalent to the anticipated habitat loss, but the final calculation of aquatic habitat needed to compensate for that loss shall be determined by the USFWS and/or CDFW through the permit process. Additionally, the replacement aquatic habitat shall be designed with similar characteristics as the known 0.25-acre breeding pond including depths of at least five feet, and establishment of submergent and emergent vegetation around the perimeter of the pond/basin. All submergent and emergent vegetation around the pond/basin shall be from mature plantings to ensure that significant vegetation is established in the first year (i.e. no seeding or hydroseeding).</i></p>	<p>Prior to issuance of grading and/or building permits</p> <p>City of Salinas Community Development Department U.S. Fish and Wildlife Service California</p>	<p>Prior to issuance of grading and/or building permits</p> <p>Department of Fish and Wildlife U.S. Fish and Wildlife Service</p>

	<p>regulatory agency protocols, 3) erecting drift fencing around the work areas if occurring during the migration/breeding season, 4) inspection of drift fencing by biologist with an ITP every 72 hours during the migration/breeding season 5) installation of pit traps to capture CTS migrating during the rain events with a check twice daily (morning prior to construction start and evening after construction ends), 6) relocation of any CTS found immediately to a site designated by the USFWS and CDFW per protocol; and 7) post construction report. Any disturbance/decommissioning of the basin that is a known breeding site, shall be performed under the direction of the USFWS and/or CDFW. The decommissioning of this basin shall be performed during the non-breeding season.</p> <p>In addition, the project applicant shall consult with the CDFW to determine if the Project can avoid take. If take cannot be avoided, take authorization would be required prior to initiating ground-disturbing activities to comply with CESA. Take authorization would occur through issuance of an ITP by CDFW pursuant to Fish and Game Code section 2081(b). In the absence of protocol surveys, the applicant can assume presence of CTS within the Plan Area and obtain an ITP from CDFW.</p> <p>Mitigation Measure 3.2-3: Prior to issuance of grading and/or building permits, the project applicant, assisted by a qualified biologist, shall consult with the USFWS and CDFW to obtain the appropriate regulatory approvals and authorizations regarding CRLF. This is anticipated to include the need to submit an application for incidental take to both the USFWS (Section 7 Consultation) and CDFW (2081 incidental take permit). The project applicant's qualified biologist shall report the conclusions reached through such consultation to the City's Community Development Director. If either USFWS or CDFW determines that an incidental take permit is required, the project applicant shall obtain such a permit before engaging in any grading or other site-treatment activities in areas deemed to be viable CRLF habitat.</p>	<p>Department California Department of Fish and Wildlife</p> <p>U.S. Fish and Wildlife Service</p> <p>Qualified Biologist</p> <p>City of Salinas Community Development Department California Department of Fish and Wildlife</p> <p>U.S. Fish and Wildlife Service</p> <p>Qualified Biologist</p>	<p>building permits</p> <p>Prior to issuance of grading and/or building permits</p>	<p>Prior to issuance of Community Development Department California Department of Fish and Wildlife U.S. Fish and Wildlife Service Qualified Biologist</p> <p>Prior to issuance of City of Salinas Community</p>

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p><i>expansion of habitat beyond what exists presently, it is anticipated that there would be a net increase in CRLF habitat. There is, however, the potential for temporary impacts to CRLF during the creation/restoration effort. The final restoration and habitat creation design shall be subject to the approval of the USFWS and CDFW.</i></p> <p>Mitigation Measure 3.2-4: Prior to issuance of grading and/or building permits, in order to avoid and minimize impacts to CRLF to the extent feasible, the proposed project activities shall be compliant with all Avoidance and Minimization Measures imposed by the USFWS and CDFW during Construction Activities. Examples of standard avoidance and minimization measures include: 1) conducting environmental education training for all construction personnel, 2) having a biologist with a scientific collecting permit for CRLF to be responsible for overseeing any hand excavation of burrows using hand-trowels and spades per the regulatory agency protocols, 3) erecting drift fencing around the work areas if occurring during the migration/breeding season, 4) inspection of drift fencing by biologist with a scientific collecting permit every 72 hours during the migration/breeding season 5) installation of pit traps to capture CRLF migrating during the rain events with a check twice daily (morning prior to construction start and evening after construction ends), 6) relocation of any CRLF found immediately to a site designated by the USFWS and CDFW per protocol, and 7) post construction report.</p>	<p>Development Department California Department of Fish and Wildlife</p> <p>U.S. Fish and Wildlife Service</p> <p>Qualified Biologist</p>	grading and/or building permits	
	<p>Mitigation Measure 3.2-5: Prior to issuance of grading and/or building permits, in order to avoid and minimize impacts to WPT to the extent feasible, the proposed project activities shall be compliant with the following Avoidance and Minimization Measures: 1) conduct environmental education training for all construction personnel, 2) conduct western pond turtle surveys within creek corridors, ponded/basin areas, and irrigation ditches by a qualified biologist, 3) survey upland areas within 0.5 miles of the aquatic features for evidence of nests as well as individual turtles, 4) make a reasonable effort to capture and relocate as many western pond turtles as possible to minimize take, 5) if a nest is observed, move eggs to a suitable location or facility for incubation, and release hatchlings into the creek corridor the following autumn, 6) design habitat elements within the creek corridor to benefit western pond turtle (i.e. include logs or rafts for emergent basking sites, and upland areas adjacent to ponds in a relatively open condition), and 7) post construction report. All survey and/or handling of WPT shall be performed by a qualified biologist in consultation with the</p>			

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
CDFW.	<p>Mitigation Measure 3.2-6: Building and grading permits and plans issued for development in the project area shall note the following: If construction activities occur during the avian breeding season (February 1 – September 15) then the project proponent shall conduct pre-construction surveys to prevent impacts to nesting birds. No more than 15 days prior to the start of construction a bird survey shall be conducted by a qualified biologist to identify any active nests within the Specific Plan Area, and shall be submitted to the City. If construction stops for a period of 15 days or more during the avian breeding season than an additional bird survey shall be conducted. The biologist will conduct a survey in the Specific Plan Area for all special-status birds protected by the federal and state ESA, MBTA and CFGC. The biologist shall map all nests that are within, and visible from, the Specific Plan Area. If nests are identified, the biologist shall map the location and establish a minimum 300-foot buffer zone around active nests. Construction activity shall be prohibited within the buffer zones until the young have fledged. Nests shall be monitored at least twice per week during the nesting season and a report submitted to the City and CDFW monthly.</p>	City of Salinas Community Development Department Qualified Biologist	In conjunction with issuance of building and grading permits and plans	
Impact 3.2-3: The proposed project has the potential to, directly or indirectly, have a substantial adverse effect through habitat modifications or reductions, cause populations to drop below self-sustaining levels, substantially eliminate a community, or substantially reduce the number of, or restrict the range of, an endangered, rare or threatened species, including those considered candidate, sensitive, or special status in local or regional plans, policies, regulations, or by the CDFW or USFWS - Birds	<p>Mitigation Measure 3.2-7: Grading and/or building permits and plans issued for development in the project area shall note the following:</p> <ul style="list-style-type: none"> • Monterey Dusky-Footed Woodrat: Any vegetation/ground disturbance to the Gabilan Creek associated with the crossings or restoration should be conducted when woodrats are least likely to breed in October through November. No more than 30 days prior to construction located within 50-feet of Gabilan Creek, a qualified biologist shall conduct a preconstruction survey for Monterey woodrat middens that can be avoided, and these exclusion zones shall be fenced as Environmentally Sensitive Areas to protect the nest. If a woodrat midden cannot be avoided, potential dismantling and relocation strategies shall be developed and presented to the 	City of Salinas Community Development Department Qualified Biologist	In conjunction with issuance of building and grading permits and plans	

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
USFWS - Mammals	<p>City of Salinas Community Development Department by a qualified biologist for review and/or approval. Potential dismantling and relocation strategies may include hiring a qualified biologist to dismantle the middens by hand for relocation within the restored/created habitat along Gabilan and Natividad Creeks, or outside of the project site as appropriate. If approved by the City, a qualified wildlife biologist may dismantle only middens within the project site that would be disturbed by construction activities. If young are encountered during dismantling of the midden, any removed material may be replaced and a 50-foot no-disturbance buffer would be established around the active midden. The buffer would remain until young are weaned and are able to disperse on their own accord (typically for a period of 14 days). All removed midden substrate would be collected and relocated to suitable woodland habitat outside of the project footprint. Appropriate personal protective equipment (e.g., respirator, gloves, and Tyvek suit) shall be used while dismantling and relocating woodrat nest material to protect against disease carried by rodents (e.g. hantavirus).</p> <ul style="list-style-type: none"> • Bats: Fifteen days prior to construction activities within 200 feet of potential bat roosting habitat, the project applicant shall retain a qualified biologist familiar with bat biology to perform a preconstruction survey for roosting special-status bats, which shall be submitted to the City. The areas with potential bat roosting habitat include: 1) the three residential complexes located between Natividad Road and Gabilan Creek, 2) the outbuildings/structures located throughout the Specific Plan Area, and 3) Gabilan Creek. The survey shall include a minimum of one daytime and one evening survey. The survey shall cover the trees, structures, and debris located within these complexes. If active roosting is observed, removal of the tree or building shall be avoided until the bats can be excluded. All active non-maternity roosting sites shall be fitted with passive exclusion devices, such as one-way flaps or doors, and all bats shall be allowed to leave voluntarily. Once it is confirmed that all bats have left the roost (minimum of five days), crews shall be allowed to continue work in the area. If a maternity roosting site is discovered, a minimum 50-foot buffer shall be established around 			

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
Impact 3.2-7: The proposed project has the potential to have substantial adverse effect on federally - or state-protected wetlands (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means	<p><i>the roost. The project applicant shall consult with the qualified biologist in order to determine if a greater buffer is warranted based on the bat species, roost location, and specific construction activities to be performed in the vicinity. The buffer shall stay in effect until all young are determined to be volant (i.e., able to fly and feed independently) by a qualified biologist. Once it is determined that all young are volant (generally by August 1st), passive exclusion devices shall be installed and all bats shall be allowed to leave voluntarily. Once it is determined by the qualified biologist that all bats have left the roost (minimum of five days), crews shall be allowed to work within the buffer zone. Project Improvement Plans will include this measure as a note in the plans.</i></p>			
	<p>Mitigation Measure 3.2-8: Prior to grading/building permit issuance in an area that would disturb the Gabilan Creek, Natividad Creek (and its tributaries), the project applicant shall obtain jurisdictional determinations from the USACE, RWQCB, and CDFW for the creeks and ditches that are proposed to be disturbed. The creeks are confirmed jurisdictional and authorization for fill from the regulatory agencies USACE-404 permit, RWQCB-Procedures for the Discharge of Dredged or Fill Material to Waters of the State and 401 certification, CDFW-1600 Streambed Alteration Agreement will be necessary. The irrigation ditches are anticipated to be exempt. If these regulatory agencies concur that these irrigation ditches are exempt, then no further mitigation is necessary for the irrigation ditches. If it is determined that these ditches are not exempt, authorization for fill from the regulatory agencies (USACE-404 permit, RWQCB-Procedures for the Discharge of Dredged or Fill Material to Waters of the State and 401 certification, 1600 Streambed Alteration Agreement) will be necessary. At a minimum, the project applicant shall replace on a "no net loss" basis (minimum 1:1 ratio) the acreage and function of all wetlands and other waters that would be removed, lost, or degraded as a result of project implementation or operations, although a higher mitigation measure may be required by the USACE, RWQCB, and CDFW through their permitting processes. It is anticipated that the restoration of Gabilan and Natividad Creeks will result in up to 104 acres of wetland and riparian habitat creation (net of any recreational amenities and public facilities required to facilitate the project), which will serve as onsite mitigation; however, a mitigation plan must be submitted and approved by the USACE, RWQCB, and CDFW through the permitting processes conducted pursuant to Clean Water Act Sections 401 and 404, Fish and Game Code Section 1600, and State Water Board</p>	City of Salinas Community Development Department U.S. Army Corps of Engineers Regional Water Quality Control Board California Department of Fish and Wildlife	Prior to grading /building permit issuance in an area that would disturb the Gabilan Creek, Natividad Creek

	Procedures for the Discharge of Dredged or Fill Material to Waters of the State.			
CULTURAL AND TRIBAL RESOURCES				
Impact 3.3-1: Project implementation may cause a substantial adverse change in the significance of a historical resource as defined in CEQA Guidelines §15064.5	<p>Mitigation Measure 3.3-1: Grading and/or building permits and plans for development in the project area shall note the following: In the event that evidence of archaeological or historical features or deposits (e.g., ceramic shard, trash scatters, lithic scatters) are uncovered (discovered) during excavation and/or grading, all work shall stop in the area of the find until an appropriate avoidance or data recovery program can be developed and implemented by a qualified archaeologist. This archaeologist shall determine whether the uncovered deposits or features qualify as either "historical resources" within the meaning of CEQA Guidelines section 15064.5, subdivision (a), "unique archaeological resources" as defined in Public Resources Code section 21083.2, subdivision (g), or "tribal cultural resources," as defined in Public Resources Code section 21074. If historical resources, unique archaeological resources, or tribal cultural resources are present, the project proponent shall preserve any such resources in place if feasible as determined by the archaeologist and approve and feasible mitigation measures identified by the archaeologist and imposed by the City. In assessing whether avoidance is feasible, the City Planner shall consider project design, logistics, and cost considerations. All costs associated with the City's Planner's determination of project design, logistics and cost considerations shall be borne by the developer/applicant. Avoidance is infeasible where it would preclude the construction of important structures or infrastructure or require exorbitant expenditures. Recommended mitigation measures shall be reviewed by the City Planner and shall be approved if feasible in light of project design, logistics, and cost considerations and, if approved, shall be implemented and completed prior to commencing further work for which grading or building permits were issued, unless otherwise directed by the City Planner. Data recovery, including photo documentation, excavation and recovery, laboratory analysis, etc., shall be an option if preservation in place is infeasible. Where resources have been determined to be "unique archaeological resources" but not "historical resources" or "tribal cultural resources," the project proponent's obligations shall be limited as set forth in Public Resources Code section 21083.2, subdivisions (d), (e), and (f). Grading/building permits and plans shall note this measure.</p>	City of Salinas Community Development Department Qualified Archaeologist	In the event that evidence of archaeological or historical features or deposits (e.g., ceramic shard, trash scatters, lithic scatters) are uncovered (discovered) during excavation and/or grading	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
Impact 3.3-2: Project implementation may cause a substantial adverse change in the significance of archaeological resource pursuant to CEQA Guidelines §15064.5	Implement Mitigation Measure 3.3-1.	See Mitigation Measure 3.3-1	See Mitigation Measure 3.3-1	
Impact 3.3-3: Project implementation may directly or indirectly destroy a unique paleontological resource	Mitigation Measure 3.3-2: Grading and/or building permits and plans for development in the project area shall note the following: <i>If paleontological resources are discovered during the course of construction, work shall be halted immediately within 50 meters (165 feet) of the discovery, the City of Salinas shall be notified, and a qualified paleontologist shall be retained to determine the significance of the discovery. If the paleontological resource is considered significant, it should be excavated by a qualified paleontologist and given to a local agency, State University, or other applicable institution, where the resource could be curated and displayed for public education purposes.</i>	City of Salinas Community Development Department Qualified Paleontologist	If paleontological resources are discovered during the course of construction	
Impact 3.3-4: Project implementation may disturb human remains, including those interred outside of formal cemeteries	Mitigation Measure 3.3-3: Grading and/or building permits and plans for development in the project area shall note the following: <i>If human remains are found during construction within the Specific Plan Area, or at off-site infrastructure improvement locations, there shall be no further excavation or disturbance of the area of the find or any nearby area reasonably suspected to overlie adjacent human remains until a qualified archeological monitor and the coroner of Monterey County are contacted. If it is determined that the remains are Native American, the coroner shall contact the Native American Heritage Commission within 24 hours. The Native American Heritage Commission shall identify the person or persons it believes to be the most likely descendant (MLD) from the deceased Native American. The MLD may then make recommendations to the landowner or the person responsible for the excavation work, for means of treating or disposing of, with appropriate dignity, the human remains and associated grave goods as provided in Public Resources Code section 5097.98. The landowner or his authorized representative shall rebury the Native American human remains and associated grave goods with appropriate dignity on the property in a location not subject to further disturbance if:</i>	City of Salinas Community Development Department Monterey County Coroner Native American Heritage Commission	If human remains are discovered during the course of construction within the Specific Plan Area	

a) the Native American Heritage Commission is unable to identify a

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	MLD or the MLD failed to make a recommendation within 48 hours after being notified by the commission;			
	b) the descendant identified fails to make a recommendation; or c) the landowner or his authorized representative rejects the recommendation of the descendant, and the mediation by the Native American Heritage Commission fails to provide measures acceptable to the landowner.			
GREENHOUSE GASES AND CLIMATE CHANGE				
Impact 3.3-5: Project implementation may cause a substantial adverse change in the significance of a tribal cultural resource	Implement mitigation measures 3.3-1 through 3.3-3.	See Mitigation Measures 3.3-3 and 3.3-4	See Mitigation Measures 3.3-3 and 3.3-4	See Mitigation Measures 3.3-3 and 3.3-4

Mitigation Measure 3.4-1: Prior to the approval of the tentative maps, conditional use permits or site plan review, as applicable, the project applicant shall prepare a Greenhouse Gas Reduction Plan (GGRP) aimed at achieving specific performance standards. The GGRP may be prepared pursuant to CEQA Guidelines section 15183.5(b) and shall include the following:

- 1) The GGRP shall, if feasible, achieve a per capita operational emissions level of 1.44 MT CO2e/service population/year by year 2040, and 0.80 MT CO2e/service population/year by year 2050.
- 2) Calculation of GHG emissions projection using an acceptable modeling tool such as the most recent version of CalEEMod.

GHG reduction measures may include building and site energy reduction measures, measures to reduce project-generated vehicle miles traveled, or other measures. Off-site measures such as participation in a community-wide GHG reduction program(s), if any are adopted, or payment of GHG reduction fees (carbon offsets) into a qualified existing program, may be considered after all feasible on-site reduction measures are considered. Any carbon offsets must be real, quantifiable, permanent, verifiable, enforceable, and additional, consistent with the standards set forth in Health and Safety Code section 38562, subdivisions (d)(1) and (d)(2). Such offsets shall be based on protocols

Prior to the approval of the tentative maps and development review permits

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>consistent with the criteria set forth Section 95572, subdivision (a) of Title 17 of the California Code of Regulations, and shall not include offsets originating outside of California, except to the extent that the quality of the offsets, and their sufficiency under the standards set forth herein, can be verified by the City and/or the Monterey Bay Air Resources District (MBARD). Such credits must be purchased through one of the following: (i) a CARB-approved registry, such as the Climate Action Reserve, the American Carbon Registry, and the Verified Carbon Standard; (ii) any registry approved by CARB to act as a registry under the California Cap and Trade program; or (iii) through the CAPCOA GHG Rx and any program adopted the MBARD. The effectiveness of the GHG reduction measures included in the GGRP must be verifiable based on evidence presented in the GGRP. Representative GHG reduction measures which may be considered may include, but are not limited to:</p> <ul style="list-style-type: none"> • Measures identified by the California Air Pollution Control Officers' Association in Quantifying Greenhouse Gas Mitigation Measures: A Resource for Local Government to Assess Emission Reductions from Greenhouse Gas Mitigation Measures or updates to this document as may occur from time to time. • Applicable measures identified in guidance from MBARD, if any, and/or in guidance provided by the California Air Resources Board, other regional air districts such as the Bay Area Air Quality Management District, Sacramento Metropolitan Air Quality Management District, San Luis Obispo County Air Pollution Control District, or other agencies with adopted GHG reduction guidance that is applicable on the date the project application is deemed complete by the City. <p>If the project applicant concludes that sufficient feasible GHG reduction measures are unavailable to reduce GHG emissions to below the threshold of significance (i.e., per capita operational emissions level of 1.44 MT CO2e/service population/year by 2040, and 0.80 MT CO2e/service population/year by 2050), the project applicant shall include substantial evidence in the GGRP to this effect. The GGRP shall be subject to review and approval of the City of Salinas Community Development Department prior to</p>			

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>approval of the tentative map or development review application, as applicable. Where the applicant concludes that the GGRP meets the threshold of significance, the Community Development Department shall determine whether, in its independent judgment, the GGRP actually does meet the threshold of significance, and shall ensure that all proposed measures will be effective and enforceable. In determining whether, as the applicant may assert, sufficient feasible GHG reduction measures are unavailable to reduce GHG emissions to below the threshold of significance, the Community Development Department shall determine, in its independent judgment, whether there might be additional feasible measures, including qualifying carbon offsets, available to meet the thresholds of significance. In making this determination, the Community Development Department shall consider the feasibility of imposing additional measures, including requiring the applicant to purchase any additional qualifying carbon offsets that might be available in the marketplace or through development of a local or regional program that could produce additional qualifying offsets. "Feasibility" in this context shall focus on the technical viability and overall cost of such additional measures, including carbon offsets, and, specifically, whether such measures (i) are technologically feasible, (ii) would substantially increase the cost of proposed housing, or (iii) would render the proposed project economically infeasible within the meaning of CEQA case law such as <i>Uphold Our Heritage v. Town of Woodside</i> (2007) 147 Cal.App.4th 587, 598-601. After the Community Development Department has approved a GGRP, the GGRP shall be forwarded to the City Planning Commission for its consideration and potential approval. The Planning Commission shall consider the GGRP at a noticed public hearing or meeting at which public testimony shall be considered. Any decision of the Planning Commission approving, conditioning, or denying a GGRP may be appealed to the City Council within 10 days of the Planning Commission decision. Upon appeal, the City Council shall consider the GGRP at a noticed public hearing or meeting at which public testimony shall be considered.</p> <p>Implementation of this mitigation measure shall not be required if the City has a qualified GHG reduction plan in place on the date a future individual project application subject to the GHG reduction plan is deemed complete, the qualified GHG reduction plan reflects the most recent legislatively-adopted GHG reduction targets (e.g., the 2030 target set by SB 32), includes</p>

hazard area as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map	<p>building construction would take place within remapped FEMA flood zones AE and A and that no changes to the regulated floodway will result in an increase in the base flood elevation or impact the downstream waterways.</p> <p>Mitigation Measure 3.6-9: Prior to the approval of site improvement plans the project applicant shall submit for review and approval by the Salinas Public Works Department detailed grading plans and calculations designed to place enough fill onto the shaded Zone X area as to raise the land surface elevation above the base flood elevation so that flooding hazards are minimized to a FEMA flood standard. The project applicant shall submit an application for a LOMR-F to the City of Salinas floodplain administrator and FEMA with pertinent information for approval.</p>	City of Salinas Public Works Department	Prior to the approval of site improvement plans	
	<p>Mitigation Measure 3.6-10: Prior to the approval of site improvement plans, the project applicant shall submit for review and approval by the Salinas Public Works Department and the City Planner, detailed plans, calculations, landscaping (and irrigation, as applicable) plans, and design basis reports for creek corridor restoration, including detention/retention/water quality basins, within the flood hazard extents identified as Zones A and AE that provide assurances that during large storm events, creek flows and sediment transport from upstream sources are not impeded at the same time as when the adjacent basins are at or near capacity. The design basis reports for creek corridor restoration shall also be submitted to the USACE, USFWS, and RWQCB and any required permitting processed prior to City approval. All basins shall be designed to have a natural appearance through the use of varied bank slopes (through grading) and appropriate landscaping (ground cover, bushes, trees, etc.) and irrigation (as applicable). A landscaping plan, irrigation plan and maintenance plan (all prepared by a qualified professional) shall be submitted for review and approval of the Public Works Department and the City Planner.</p>	City of Salinas Public Works Department	Prior to the approval of site improvement plans	
	<p>Mitigation Measure 3.6-11: Prior to the approval of site improvement plans, the project applicant shall submit a Stormwater Control Plan that provides sufficient supporting documentation and calculations to the Salinas Public Works Department to address sediment transport issues of fine-grained materials from upstream and local sources that could clog</p>	City of Salinas Public Works Department	Prior to the approval of site improvement	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
<p>infiltration capacities and could fill required storage space within the stormwater basins at the downstream boundaries of the project area to the extent practicable.</p> <p>The calculations to address these sediment transport issues may include:</p> <ul style="list-style-type: none"> • A streamflow and sediment transport (bedload and suspended sediment) data collection monitoring program that begins one- to two-years pre-construction and continues through a mandated post-project timeframe and would provide volumetric information for calculations related to the potential for sediment deposition. • Pre-project measurements could be used to estimate sediment loading, which could inform the design of mitigation measures and enable estimates of maintenance frequencies needed ensure ongoing efficacy of the measures. During project execution and after project completion, measurements of bedload and suspended sediment in the channel at the downstream boundary of the project could be used to verify performance of sediment management measures and avoidance of associated sediment transport impacts. • The United States Geological Survey gage record on Gabilan Creek (#11152600) contains limited suspended sediment data that was collected in March and April of 2017. These data could be used to compare to and/or validate measurements obtained via field data collection. <p>Strategies and measures to address these sediment transport issues may include:</p> <ul style="list-style-type: none"> • Bioretention Basins: Bioretention basin features provide multiple water quality functions for stormwater systems, including performing as depositional areas for sediments that settle and get trapped in the bioretention media. <p>An operations and maintenance plan shall be used to address specific</p>		plans		

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>maintenance requirements related to sediment accumulation, such that basin media remediation would take place when a threshold condition (such as a certain amount of sediment accumulation on the basin floor) is reached. For instance, if sediment deposition exceeds a depth of 2-inches, even a small patch, the sediment would require removal to keep the basin functioning properly.</p> <p>Furthermore, the functional lifespan of bioretention media (mulch, soils, drain rock, underdrain) is generally about 15 years. Annual monitoring reports could be used to track basin performance under varying wet season conditions and used to guide media replacement timing.</p> <ul style="list-style-type: none"> • Treatment Wetlands: Treatment wetlands are designed to mimic the natural infiltration, nutrient cycling, habitat, and a myriad of other important ecological functions provided by natural wetlands. Treatment wetlands could be constructed at storm drain outfall locations or adjacent to or off-channel from a creek channel. Wetlands could vary between those that are highly designed and may need relatively high levels of maintenance to more naturally based designs that may need more limited maintenance, each with varying levels of treatment potential. <p>Treatment performance is a function of wetland to watershed ratio, wetland treatment design, area hydrology, hydraulic residence time, and source pollutants. The preferred residence time through wetlands varies based on vegetation type and quantity, water depth, temperature, and design flow rates. Having a lower design flow rate can result in longer hydraulic residence time, which is preferred particularly at the start of a rainy season, since the "first flush" volume of stormwater runoff will generally contain the highest concentrations of pollutants. Treatment wetland design generally considers dry season irrigation return flows and first flush principles.</p> <ul style="list-style-type: none"> • Vegetated Banks/Riparian Corridor: Trees and other riparian corridor vegetation appropriate to the environment, such as willows, could 			

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>grow rapidly on channel banks and trap sediments, removing sediment from streamflows as well as from local/surface runoff.</p> <ul style="list-style-type: none"> Floodplains: Floodplains provide one of the most important storage spaces for sediment as it moves discontinuously through a watershed. Naturally functioning floodplains generally extend laterally past the immediate riparian buffer zone into relatively flat areas. Floodplain access could be provided by bank and channel grading at specified design storm flows. The rate of sediment deposition on floodplains is largely dependent on the frequency of inundating flows, the suspended sediment loads in the river, available floodplain area, and presence of vegetation. 			
	<p>Mitigation Measure 3.6-12: Prior to the approval of site improvement plans, the project applicant shall provide an Operation and Maintenance Plan as part of the Stormwater Control Plan with sufficient supporting documentation and calculations for review and approval by the Salinas Public Works Department demonstrating that risks associated with reduction of infiltration capacity in the detention/retention/water quality basins shall be minimized to the maximum extent practicable.</p>	City of Salinas Public Works Department	Prior to the approval of site improvement plans	Prior to the approval of site improvement plans
	<p>Mitigation Measure 3.6-13: Prior to the approval of site improvement plans, the project applicant shall provide the Salinas Public Works Department with sufficient supporting documentation and calculations that the risks associated with basin embankment side slope failure because of the non-cohesive nature of Gabilan and Natividad Creek corridor sediments will be minimized to the extent practicable.</p>	City of Salinas Public Works Department	Prior to the approval of site improvement plans	Prior to the approval of site improvement plans
	<p>Mitigation Measure 3.6-14: Prior to the approval of site improvement plans, the project applicant shall provide operations, maintenance, and SWPPP procedures for review and approval by the Salinas Public Works Department such that any detention/retention/water quality basin issues associated with sedimentation or loss of infiltration capacities are addressed by the operations, maintenance, and SWPPP procedures. Should the Salinas Public Works Department find that sedimentation or loss of infiltration capacities are addressed and subsequently approve the operations,</p>	City of Salinas Public Works Department

	<p>maintenance, and SWPPP procedures, the applicant shall implement the procedures through the lifetime of the project.</p> <p>Mitigation Measure 3.6-15: Prior to the approval of site improvement plans, the project applicant shall provide the Salinas Public Works Department with operations, maintenance, and SWPPP procedures such that any detention/retention/water quality basin issues associated with embankment side slope failures are addressed by the operations, maintenance, and SWPPP procedures. Should the Salinas Public Works Department find that any detention/retention/water quality basin issues associated with embankment side slope failures are addressed and subsequently approve the operations, maintenance, and SWPPP procedures, the applicant shall implement the procedures through the lifetime of the project.</p> <p>All basins shall be designed to have a natural appearance through the use of varied bank slopes (through grading) and appropriate landscaping (ground cover, bushes, trees, etc.) and irrigation (as applicable). A landscaping plan, irrigation plan and maintenance plan (all prepared by a qualified professional) shall be submitted for review and approval of the Public Works Department and the City Planner.</p>	City of Salinas Public Works Department	Prior to the approval of site improvement plans	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
NOISE	<p>Impact 3.7-2: The proposed project has the potential to increase noise levels associated with construction activities</p> <p>Mitigation Measure 3.7-1: Prior to the approval of site improvement plans and respective permits, plans shall note that construction activities shall adhere to the requirements of the City of Salinas Municipal Code with respect to hours of operation.</p> <p>Mitigation Measure 3.7-2: Prior to the approval of site improvement plans and respective permits, plans shall note that all equipment shall be fitted with factory equipped mufflers and in good working order. All stationary noise generating equipment (i.e. generators) shall be located at least 200 feet from a sensitive receptor. All construction staging areas shall be located at least 200 feet from a sensitive receptor.</p>	<p>City of Salinas Community Development Department</p>	Prior to the approval of site improvement plans	
Impact 3.7-4: The proposed project has the potential to expose new sensitive receptors to excessive transportation noise	<p>Mitigation Measure 3.7-3: Prior to the approval of site improvement plans and respective permits, the plans shall note the location, design, and construction details of the eight-foot to nine-foot tall sound walls and/or landscaped berm/wall combinations, as applicable, that will be constructed along the primary Specific Plan Area roadways, adjacent to proposed residential dwellings, in order to achieve the City's exterior noise standards. At the City's discretion, wall heights which achieve the City's conditionally acceptable 60-70 dB L_{dn} noise standard may be allowed. See the Draft EIR Table 3.7-14 for specific noise barrier/wall heights along each roadway. Additionally, at the City's discretion, alternative noise reduction measures which achieve the City's conditionally acceptable 60-70 dB L_{dn} noise standard may be allowed. Alternative noise reduction measures, such as building orientation and use of noise-attenuating features, can be utilized provided that a site-specific acoustical analysis is conducted that demonstrates that the alternative methods would ensure that noise levels do not exceed the City's conditionally acceptable 60-70 dB L_{dn} noise standard.</p> <p>Noise barrier walls shall be constructed of concrete panels, concrete masonry units, stucco or manufactured materials (with a density of four pounds per square foot or greater), earthen landscaped berms, or any combination of these materials as determined appropriate by the City of Salinas based upon the standards contained in the Central Area Specific Plan and the Salinas Zoning Code, as applicable. The design/appearance of the wall is subject to</p>	<p>City of Salinas Community Development Department</p>	Prior to the approval of site improvement plans and respective permits	

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>the design approval by the City of Salinas to ensure that it is visually pleasing. Wood is not permitted due to eventual warping and degradation of acoustical performance. The walls shall not have gaps or penetrations which allow sound to flank through or around the walls. Small gaps which may occur using materials such as "Keystone" blocks shall be avoided. Additionally, in accordance with Section 5-03.19 of the City's Municipal Code, best management practices shall be incorporated into the sound wall design in order to control graffiti and/or mitigate the potential impacts of graffiti. These graffiti prevention best management practices may include, without limitation:</p> <ul style="list-style-type: none"> (1) The use or the installation and maintenance of anti-graffiti materials and surface treatments approved by the City on likely graffiti-attracting surfaces. (2) Installation and maintenance of landscaping to discourage defacement of and/or protect likely graffiti-attracting surfaces. (3) Installation and maintenance of lighting to protect likely graffiti-attracting surfaces. (4) Immediate removal of graffiti by appropriate means within seventy-two hours. (5) Incorporation of architectural or design elements or features to discourage graffiti defacement in accordance with the principles of Crime Prevention Through Environmental Design (CPTED). (6) Authorizing right of access by city employees or contract agents to remove graffiti if not removed within specified time periods. (7) Supplying the city at its request with paint (of the appropriate color and type), cleaning agents, and/or other materials acceptable to the city to abate or to deter graffiti. (8) Other requirements, as deemed reasonably feasible by the city planner, to deter, to protect or to reduce the potential for graffiti 			

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>Mitigation Measure 3.7-4: Prior to the approval of building permits, the first row of residential dwellings located along E. Boronda Road and Constitution Boulevard shall include windows having a Sound Transmission Class (STC) 35, or higher, rating installed in second floor facades and rooms that have windows or doors that abut or face E. Boronda Road and/or Constitution Boulevard. Exterior walls shall also require 3-coat stucco and RC-channels, sheathing, or another acceptable construction application that effectively attenuates noise intrusion to the interior of the house. The exterior wall specifications would specifically apply to the first row of homes that abut or face E. Boronda Road and/or Constitution Boulevard and only apply to the facades facing these roadways. The specifications do not apply to single story homes, or the first floor of a two-story home, both of which are attenuated by the sound wall. These requirements shall be included in the building plans for the specific dwelling units and noted on the building permits. A detailed analysis of any additional interior mitigation measures shall be conducted when building plans are available and prior to building permit issuance to verify these requirements. These requirements shall also be noted in the site improvement plans prior to approval by the City.</p>	City of Salinas Community Development Department	Prior to approval of building permits	
	<p>Mitigation Measure 3.7-5: Prior to the approval of building permits, mechanical ventilation shall be required in the first row of all residential dwellings that abut E. Boronda Road and Constitution Boulevard, as desired for acoustical isolation, to keep their doors and windows closed and still maintain acceptable interior temperature and noise levels. This requirement shall be included in the building plans for the specific dwelling units and noted on the building permits. This requirement shall also be noted in the site improvement plans prior to approval by the City.</p>	City of Salinas Community Development Department	Prior to approval of building permits	
Impact 3.7-5: The proposed project has the potential to expose sensitive receptors to substantial noise from proposed park and school uses	<p>Mitigation Measure 3.7-6: Prior to the approval of site improvement plans, as applicable, when parks or play areas are located near residential uses, the center of active play areas, such as football fields, soccer fields or other athletic fields, shall be located at a minimum distance of 90-feet from the nearest residential property lines. Large active play areas shall comply with the 60 dB L_{eq} and 70 dB L_{max} standards, and shall include these further noise level evaluations during the design phases of future park areas.</p>	City of Salinas Community Development Department	Prior to the approval of site improvement plans	

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<p>Parks shall be designed such that residences front, or side in limited locations where approved by the City Planner, to the park. Minimum 6-foot tall sound walls and/or landscaped berms shall be constructed where school site directly abuts a residential property line in instances where site design (i.e., minimum distances, siting of activity areas, etc.) cannot achieve the 60 dB L_{eq} and 70 dB L_{max} noise standards. No wall shall be required where residential uses are fronted towards a park or school site and separated by a roadway or a walkway.</p> <p>Noise barrier walls shall be constructed of concrete panels, concrete masonry units, stucco or manufactured materials (with a density of four pounds per square foot or greater), earthen landscaped berms, or any combination of these materials as determined appropriate by the Salinas Public Works Department and the City Planner. The design/appearance of the walls is subject to the design approval by the Salinas Public Works Department and the City Planner based upon the standards contained in the Central Area Specific Plan and the Salinas Zoning Code, as applicable to ensure that it is visually pleasing. Wood is not permitted due to eventual warping and degradation of acoustical performance. The walls shall not have gaps or penetrations which allow sound to flank through or around the walls. Small gaps which may occur using materials such as "Keystone" blocks shall be avoided. Additionally, in accordance with Section 5-03.19 of the City's Municipal Code, best management practices shall be incorporated into the sound wall design in order to control graffiti and/or mitigate the potential impacts of graffiti (see Mitigation Measure 3.7-3 for further discussion of best management practices).</p>			
Impact 3.7-6: The proposed project has the potential to expose sensitive receptors to substantial noise from proposed commercial mixed-uses	<p>Mitigation Measure 3.7-7: Prior to the approval of development review permits, the plans shall demonstrate where mixed use commercial, business professional, office, or similar uses face residential uses or where loading docks or truck circulation routes face residential areas, the following measures shall be included in the project design:</p> <ul style="list-style-type: none"> • All HVAC equipment shall be located within mechanical rooms where possible or shielded from view with solid or grated barriers; • Emergency generators shall comply with the City's noise criteria at the nearest noise-sensitive receivers; 	City of Salinas Community Development Department	Prior to the approval of development review permits	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	<ul style="list-style-type: none"> Delivery/loading activities shall comply with the Salinas Zoning Code standards and regulations; and <p>The applicant shall submit a noise study to verify that the appropriate noise control measures have been incorporated into the project design and will achieve compliance with the City's noise level standards.</p>			
Impact 3.7-7: The proposed Project has the potential to expose sensitive receptors to substantial noise from proposed well sites	<p>Mitigation Measure 3.7-8: The potential well sites are shown in the Specific Plan. The actual wells are subject to the approval of a Conditional Use Permit (CUP) by the City pursuant to the requirements of the Salinas Zoning Code and the Central Area Specific Plan. The potential well sites and the CUP requirement for said facilities shall be clearly noted on the site improvement plans.</p> <p>Prior to approval of the CUP and subsequent issuance of the building permits for the wells, the plans shall demonstrate that the following measures shall be included in the project design:</p> <ul style="list-style-type: none"> The wells have been designed and will be built to not exceed a noise level of 55 dB L_{eq} at the nearest residential or school property line during normal operation of the facilities; The generators shall not be permitted to exceed the City's daytime noise standard of 60 dB L_{eq}; The generators shall be tested only during daytime hours; and <p>Additionally, that the wells have been designed (in accordance with the Central Area Specific Plan) to incorporate decorative screen walls, landscaping and other features to ensure compatibility with surrounding land uses.</p>	City of Salinas Community Development Department	Prior to approval of the CUP and subsequent issuance of the building permits for the wells and treatment plant facilities	
PUBLIC SERVICES AND RECREATION				
Impact 3.9-1: The proposed project may require the construction of fire department facilities which may cause substantial adverse physical	Mitigation Measure 3.9-1: Prior to the issuance of a Certificate of Occupancy for each dwelling unit (and prior to issuance of building permits for non-residential uses), the applicant shall pay all applicable project impact fees per the impact fee schedule.	City of Salinas Community Development Department	Prior to the issuance of a Certificate of Occupancy for each dwelling unit

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
OTHER ISSUES ADDRESSED IN THE FINAL SUPPLEMENT FOR THE 2002 SALINAS GENERAL PLAN FINAL PROGRAM EIR				
AESTHETICS				
A1	The City will implement General Plan Implementation Program CD-1 – City Gateway Guidelines. Implementation Program CD-1 requires the City to implement the City's Gateway Guidelines addressing identification graphics and entry signs, lighting, and landscaping for the City's major entry points identified in Figure CD-1.	Community Development	Ongoing – the City is required to implement this measure everywhere it applies.	
A2	The City will implement General Plan Implementation Program CD-2 – Architectural Design. Implementation Program CD-2 requires the City to strengthen the City's Design Guidelines and require compliance to enhance the City's visual appeal and ensure compatible, aesthetically pleasing development with particular emphasis on: 1) historic areas of the community; and 2) properties visible from Highway 101.	Community Development, Redevelopment Agency	Ongoing – the City is required to implement this measure everywhere it applies.	
A3	The City will implement General Plan Implementation Program CD-3 – Lighting Ordinance, on an ongoing basis. Implementation Program CD-3 requires the City to improve the City Lighting Ordinance to ensure that: 1) all future outdoor lights include cut-off lenses to minimize light dispersion above the fixture head; 2) a lighting study is required to be performed when appropriate to ensure adequate light levels, while not exceeding industry standards; and 3) sky glow is reduced.	Community Development	Ongoing – the City is required to implement this measure everywhere it applies.	
A4	The City will implement General Plan Implementation Program CD-4 – Landscaping Standards, on an ongoing basis. Implementation Program CD-4 requires the City to implement landscaping requirements for public and private development and redevelopment projects to promote greater visual and functional compatibility with residential development and pedestrian/bicycle use.	Community Development, Redevelopment Agency	Ongoing – the City is required to implement this measure everywhere it applies.	
A5	The City will implement General Plan Implementation Program CD-5 – Review Discretionary Development Projects, on an ongoing basis. Implementation Program CD-5 requires the City to review discretionary development proposals for potential aesthetics impacts per the California Environmental Quality Act (CEQA). The standards established in the Zoning Code, the City's Design Guidelines, Landscaping Standards, Lighting Ordinance, Gateway Guidelines, the projects incorporation of Traditional	Community Development	Ongoing – the City is required to implement this measure everywhere it applies.	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
	Neighborhood Development (TND) characteristics, and the projects potential to damage or block scenic resources and views will be used to determine the significance of impacts. If potential impacts are identified, mitigation in the form of project redesign (e.g., bulk, height, architectural details, lighting) will be required to reduce the impact to a level less than significant.			
A6	The City will implement General Plan Implementation Program COS-10 – Buffers, on an ongoing basis. Implementation Program COS-10 requires the City to encourage the provision and maintenance of buffers, such as roadways, topographic features, and open space, to prevent incompatible uses between agricultural and non-agricultural land uses. A number of factors shall be used to determine the appropriate buffer, including type of agricultural use, topography, and pesticide and machinery use, among others.	Community Development	Ongoing – the City is required to implement this measure everywhere it applies.	
A7	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, on an ongoing basis. Implementation Program COS-9 requires the City to continue to cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east away from the most productive farmland.	Community Development, County of Monterey	Ongoing – the City is required to implement this measure everywhere it applies.	
A8	The City will implement General Plan Implementation Program LU-7 – City-Centered Growth, on an ongoing basis. Implementation Program LU-7 requires the City to give priority to redevelopment and infill projects that reduce development pressure on agricultural lands and establish an incentive program to promote these projects, such as priority permit processing and density bonuses, for such developments.	Community Development, Redevelopment Agency	Ongoing – though the project convert existing agricultural lands to urban development, the City is required to implement this measure everywhere it applies.	
A9	The City will implement General Plan Implementation Program CD-8 – California Main Street Program on an ongoing basis. Implementation Program CD-8 requires the City to expand community participation in the	Community Development, Public Works,	Ongoing – the City is required to implement	

4.0-52 Final Environmental Impact Report – Salinas Central Area Specific Plan

	Main Street Program and continue to work with the Program to create an identity that emphasizes our cultural heritage and attracts businesses and consumers to the downtown area.	Redevelopment Agency, Oldtown Salinas organization	this measure everywhere it applies.	
A10	<p>The City will implement General Plan Implementation Program COS-14 – Historic/Architectural Preservation, on an ongoing basis. Implementation Program COS-13 requires the City to consider implementing a historic/architectural preservation program and a historic/architectural preservation ordinance that encourages public/private partnerships to preserve and enhance historically significant buildings in the community. Measures to implement may include, but are not limited to, Transfer of Development Rights (TDR), establishment of criteria for a historic/architectural resources review process, and implementation of a Mills Act program. TDR could benefit the community by protecting historic resources through an agreement that allows the development potential ("rights") on the historic property to be transferred to another property when the historic resources on the original property is preserved.</p> <p>The Mills Act program would involve the City entering into a contract with a property owner to change how the County Assessor calculates taxes on their property in exchange for the continued preservation of the property by the property owner. The adjusted property taxes are recalculated using a formula in the Mills Act and Revenue and Taxation Code.</p>	Community Development, Redevelopment Agency, City Manager's Office, City Council, County Assessors Office	Ongoing – the City is required to implement this measure everywhere it applies.	
AGRICULTURAL RESOURCES				
AG1	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, which requires the City to continue to cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east away from the most productive farmland.	Community Development, County of Monterey	Ongoing – the project would comply with this measure.	
AG2	The City will implement General Plan Implementation Program LU-7 – City-Centered Growth, which requires the City to give priority to redevelopment and infill projects that reduce development pressure on agricultural lands. Establish an incentive program to promote these projects, such as priority permit processing and density bonuses for such	Community Development, Redevelopment Agency	Ongoing – although the project would develop agricultural	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
AG3	The City will implement General Plan Implementation Program COS-11, which requires the City to be consistent with the County of Monterey's "Right-to-Farm" Ordinance, and the County of Monterey Draft General Plan Policy LU-7.8 and Actions LU-7.b and LU-7.c, revise the City's Zoning Ordinance to require the recordation of a Right-to-Farm Notice as a condition of discretionary permit approval for residential development within 1,000 feet of an established agricultural operation. The purpose of the Notice is to acknowledge that residents in the area may experience inconveniences and discomfort associated with the normal farming and grazing activities, such as noise and dust. The Notice shall specifically state that a variety of activities may occur that may be incompatible with the proposed development and that an established agricultural operation in full compliance with applicable laws, shall not be considered a nuisance due to changes in the surrounding area. The Notice shall also state that a person's right to recover under a nuisance claim against these activities may be restricted.	Community Development, ACOE, FWS, CDFG	Ongoing – the City is required to implement this measure everywhere it applies.	
AG4	The City will implement General Plan Implementation Program COS-10 - Buffers, which requires the City to encourage the provision and maintenance of buffers, such as roadways, topographic features, and open space, to prevent incompatibilities between agricultural and non-agricultural land uses. A number of factors shall be used to determine the appropriate buffer, including type of agricultural use, topography, and pesticide and machinery use, among others.	Community Development	Ongoing – the City is required to implement this measure everywhere it applies.	
AG5	The City will work with the County of Monterey, and other local jurisdictions, to create and implement an agricultural land conservation easement program including such measures as securing the dedication of easements or by paying a mitigation fee that could be used to purchase easements through a mitigation bank.	Community Development	Ongoing – the City is required to implement this measure everywhere it applies.	

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
LAND USE AND PLANNING				
LU1	The City will implement General Plan Implementation Program LU-3 – Zoning and Subdivision Ordinances Update, which requires the City to review and update the Zoning Code and Subdivision Ordinance to ensure consistency with the General Plan and to help implement the General Plan policies and New Urbanism principles.	Community Development, Public Works	Ongoing – the project is consistent with the General Plan and follows New Urbanism principles.	
LU2	The City will implement General Plan Implementation Program LU-8 – Local Agency Formation Commission, which requires the City to be consistent with a portion of Draft Policy LU 3.4 of the Monterey County Draft General Plan, and to cooperate with LAFCO and the County of Monterey to direct growth outside the City limits to the Future Growth Area, on lands that are served or are planned to be served, with a full range of urban services, such as public water and sewer, an extensive road network, public transit, safety and emergency response services, parks, trails, and open space.	Community Development, LAFCO, County of Monterey	Ongoing – the Central Area Specific Plan is consistent these requirements.	
LU3	The City will implement General Plan Implementation Program LU-22 – Salinas Municipal Airport Master Plan, which requires the City to update and implement the Airport Master Plan. Funding has been approved to update the Salinas Municipal Airport Master Plan. The update should contain the following: address minimum distance for the Eastern bypass south of airport, define how the Eastern bypass can best be integrated with ILS approach, and determine limitations on surrounding land uses and new roadways to allow continuation of airport operations, including the potential lengthening of runway 31/13, and the California International Airshow. Upon any update of the Airport Master Plan, the Monterey County Airport Land Use Plan or the California Airport Land Use Planning Handbook, the Salinas General Plan will be reviewed and revised, as necessary.	Community Development, Salinas Airport	Ongoing – the City is required to implement this measure everywhere it applies.	
LU4	The City will implement General Plan Implementation Program LU-23 – Monterey County Airport Land Use Plan, which requires the City to continue to support the implementation of the Monterey County Airport Land Use Plan (MCALUP) and support the timely update of the MCALUP to	Community Development, Salinas Airport, County of	Ongoing – the City is required to implement this measure everywhere it

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
LUS	meet new State guidelines.	Monterey	applies.	
LU6	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, which requiring the City to continue to cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east away from the most productive farmland.	Community Development, County of Monterey	Ongoing – the City is required to implement this measure everywhere it applies.	
HAZARDS AND HAZARDOUS MATERIALS				
H1	The City will implement General Plan Implementation Program S-8 – Household Hazardous Waste Program, which requires the City to continue to work with the Salinas Valley Solid Waste Authority to implement the Household Hazardous Waste program to protect resident from dangers resulting from the use, transport, and disposal of hazardous materials used in the home.	County of Monterey Environmental Health Division, Salinas Valley Solid Waste Authority	Ongoing – the City is required to implement this measure everywhere it applies.	
H2	The City will implement General Plan implementation Program S-9 – Small Business Hazardous Waste Program, which requires the City to continue to work with the Salinas Valley Solid Waste Authority to implement the Small Business Hazardous Waste Program, which allows qualified small businesses to dispose of their hazardous wastes at the Salinas Hazardous Household Waste Collection Facility.	County of Monterey Environmental Health Division, Salinas Valley Solid Waste Authority	Ongoing – the City is required to implement this measure everywhere it applies.	

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
H3	<p>The City will implement General Plan Implementation Program S-7 – Hazardous Materials, which requires the City to minimize public health risks and environmental risks from the use, transport, storage, and disposal of hazardous materials by:</p> <ul style="list-style-type: none"> • Cooperating with federal, state, and county agencies to effectively regulate the management of hazardous materials and hazardous waste; • Cooperating with the County of Monterey to implement the applicable portions of the County Hazardous Waste Management Plan; • Identifying roadway transportation routes for conveyance of hazardous materials (the City does not exercise jurisdictional over transportation of freight along railroad right-of-way or state highways); • Implementing the Multi-Hazard Emergency Plan for accidents involving hazardous materials; and • Cooperating with the Certified Unified program Agency (CUPA) for Salinas (the County of Monterey, Environmental Health Division) and the Salinas Fire Department to administer Risk Management Plans for businesses within the City. • Requiring development project applicants to provide a hazardous materials report documenting past uses of the property and reporting the results of soil sampling where needed to determine whether remediation is required. 	<p>County of Monterey, Environmental Health Division, Salinas Fire Department, California Department of Transportation</p>	<p>Ongoing – the City is required to implement this measure everywhere it applies.</p>	
H4	<p>The City will implement General Plan Implementation Program S-6 – Pesticide Use, which requires the City to continue to monitor regulations governing the use of pesticides and work with the County Agricultural Commission to promote the responsible use of pesticides.</p>	<p>Community Development, Fire Department, County Agriculture Commission</p>	<p>Ongoing – the City is required to implement this measure everywhere it applies.</p>	
H5	<p>The City will implement General Plan Implementation Program S-18 – Flood Control Insurance, which requires the City to continue to participate in the National Flood Insurance Program (NFIP).</p>	<p>Community Development, and Permit Services, Public</p>	<p>Ongoing – the City is required to implement this measure everywhere it applies.</p>	

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
H6	The City will implement General Plan Implementation Program S-19 – Flood Overlay District Regulations, which requires the City to continue to apply the Flood Overlay District regulations, pursuant to the City's Zoning Code and implement Section 9, Article VI of the Municipal Code, to minimize the potential impact to and from new development in areas subject to flooding. Update the boundaries of the District as needed to reflect current hydrologic conditions.	Community Development, Development and Permit Services, Public Works	Ongoing – the City is required to implement this measure everywhere it applies.	
H7	The City will implement General Plan Implementation Program LU-17 – Project-Related Flood Control and Stormwater Management, which requires, as a condition of project approval, new development to provide adequate storm water and flood management facilities as determined by the Public Works Department. In order to determine the facility and Best Management Practices (BMP) needs, the City may require a hydrological/drainage analysis to be performed by a certified an City-approved engineer, with the cost of said analysis the responsibility of the project applicant.	Public Works	Ongoing – the City is required to implement this measure everywhere it applies.	
H8	The City will implement General Plan Implementation Program S-22 – Promote Fire Prevention, which requires the City to promote fire prevention in Salinas by: <ul style="list-style-type: none"> • Working closely with the Salinas Fire Department to implement fire hazard education and fire prevention programs; • Coordinating with Cal Water and Alco water districts and the Salinas Fire Department to ensure that water pressure for existing developed areas and sites to be developed is adequate for fire fighting purposes; • Conform to Fire Department requirements for individual projects; • Adopting and implementing the most recent Uniform Fire Code provisions and appropriate amendments; and • Continue to require sprinklers in new buildings. 	Development and Permit Services, Fire Department, water companies	Ongoing – the City is required to implement this measure everywhere it applies.	
H9	The City will implement General Plan Implementation Program CD-10 – Weed Abatement, which requires the City to continue to monitor and abate weeds throughout the community.	Weed Abatement Specialist	Ongoing – the City is required to implement this measure everywhere it	

FINAL MITIGATION MONITORING AND REPORTING PROGRAM 4.0

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
H10	The City will implement General Plan Implementation Program LU-12 – Fire Protection, Emergency Services, and Law Enforcement Annual Level Of Service Review, which requires the City to review the level of services and funding levels at budget time, adjusting when necessary to ensure that adequate levels of service are provided and facilities are maintained.	Fire Department, Police Department	Ongoing – the City is required to implement this measure everywhere it applies.	
H11	The City will implement General Plan Implementation Program LU-21 – Salinas Municipal Airport Master Plan, which requires the City to continue working with the Salinas Airport Commission to implement the Airport Master Plan, providing technical assistance and information to the Commission when necessary. Funding has been approved to update the Salinas Municipal Airport Master Plan. The update should contain the following: address minimum distance for Eastern bypass south of airport, define how Eastern bypass can best be integrated with ILS approach, and determine limitations on surrounding land uses and new roadways to allow continuation of airport operations, including the potential lengthening of runway 31/13, and the California International Airshow. Upon any update of the Airport Master Plan, the Monterey County Airport Land Use Plan or the California Airport Land Use Planning Handbook, the Salinas General Plan will be reviewed and revised, as necessary.	Community Development, Salinas Airport	Ongoing – the City is required to implement this measure everywhere it applies.	
H12	The City will implement General Plan Implementation Program C-8 – Monterey County Airport Land Use Commission, which requires the City to continue to coordinate with the Monterey County Airport Land Use Commission (ALUC) on projects near the airport. Encourage ALUC to update its County Airport Land Use Plan.	Community Development, Salinas Airport, Public Works, County of Monterey, Development and Permit Services	Ongoing – the City is required to implement this measure everywhere it applies.	
H13				

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
H14	California Airport Land Use Planning Handbook for comprehensive airport land use planning.	County ALUC, Salinas Airport	applies.	
H15	The City will implement General Plan Implementation Program S-12 – Salinas Municipal Airport Master Plan, which requires the City to revise the Airport Master Plan in order to update operational and safety procedures, reflect State and Federal mandates, better utilize airport property, and recommend land use compatibility standards for land surrounding the airport.	Community Development, Salinas Airport, ALUC	Ongoing – the City is required to implement this measure everywhere it applies.	
H16	The City will implement General Plan Implementation Program N-4 – Salinas Municipal Airport Master Plan, which requires the City upon any update of the Salinas Municipal Airport Master Plan, the County Airport Land Use Plan, or California Airport Land Use Planning Handbook, review and revise as necessary Table N-4, Figure N-2, and the goals, policies, and noise plan within the General Plan Noise Element to correspond with the updated Airport Master Plan.	Community Development, Salinas Airport Commission, ALUC	Ongoing – the City is required to implement this measure everywhere it applies.	
	The City will implement General Plan Implementation Program S-23 – Multi-hazard Emergency Plan, which requires the City to annually review and update the Multi-Hazard Emergency Plan under the provision of the State Emergency Management System format to maximize the efforts of emergency service providers (e.g., fire, medical, and law enforcement) and minimize human suffering and property damage during disasters. Provide annual practice sessions to the City. Support high-level multi-jurisdictional cooperation and communication for emergency planning and management. Solicit private individuals and organizations to enhance service provider communications and response with cellular telephones, ham radios, AM/FM radio, and cable television.	Community Development, Police Department, Fire Department, public and private medical facilities, Monterey County Emergency Communication Services, Monterey County Mobile Emergency Coordination Unit, Federal Emergency Management Agency (FEMA),	Ongoing – the City is required to implement this measure everywhere it applies.

	requirements for the structural design of new development and redevelopment projects.	Services	this measure everywhere it applies.	
G54	The City will implement General Plan Implementation Program S-17 – Soil and Geologic Surveys, on an ongoing basis. Implementation Program S-17 requires that during the review of development and redevelopment proposals, the City require surveys of soil and geologic conditions by state licensed Engineering Geologists and Civil Engineers where appropriate. When potential geologic impacts are identified, the City shall require project applicants to mitigate the impacts per the recommendations contained within the geologic survey.	Community Development, Development and Permit Services, Public Works	Ongoing – the City is required to implement this measure everywhere it applies.	
G55	The City will implement General Plan Implementation Program S-23 – Multi-hazard Emergency Plan, on an ongoing basis. Implementation Program S-23 requires the City to maintain the Multi-hazard Emergency Plan under the provision of the State Emergency Management System format to maximize the efforts of emergency service providers (e.g., fire, medical, and law enforcement) and minimize human suffering and property damage during disasters. Support high-level multi-jurisdictional cooperation and communication for emergency planning and management. Solicit private individuals and organizations to enhance service provider communications and response with cellular telephones, ham radios, AM/FM radio, and cable television.	Community Development, Police Department, Fire Department, public and private medical facilities, Monterey County Emergency Communication s, Monterey County Mobile Emergency Coordination Unit, Federal Emergency Management Agency (FEMA), American Red Cross, Monterey County Office of Emergency	Ongoing – the City is required to implement this measure everywhere it applies.

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
GS6	The City will implement General Plan Implementation Program S-24 – Emergency Preparedness Education, on an ongoing basis. Implementation Program S-23 requires the City coordinate with local agencies and organizations to educate all residents and businesses to take appropriate action to safeguard life and property during and immediately after emergencies.	Services	Fire Department, Federal Emergency Management Agency (FEMA), American Red Cross, Monterey County Office of Emergency Services	Ongoing – the City is required to implement this measure everywhere it applies.
POPULATION AND HOUSING				
PH1	The City will implement General Plan Implementation Program HE-2 – Provision of Future Sites, which requires the City to continue to work with the Local Agency Formation Commission to ensure that sufficient land, infrastructure, and services are available to support housing development.	Community Development	Ongoing – the City is required to implement this measure everywhere it applies.	
PH2	The City will implement General Plan Implementation Program LU-12 – Fire Protection, Emergency Services, and Law Enforcement Annual Level of Service Review, which requires the City to review the level of services and funding levels at budget time, adjusting when necessary to ensure that adequate levels of service are provided and facilities are maintained.		Fire Department, Police Department	Ongoing – the City is required to implement this measure everywhere it applies.
PH3	The City will implement General Plan Implementation Program C-3 – Capital Improvement Plan, which requires the City to continue to update on an annual basis the Capital Improvement Plan to plan for and fund future improvements to the circulation system, as well as other public facilities, including improvements to the existing pedestrian and bicycle system, within the community.	Public Works		Ongoing – the City is required to implement this measure everywhere it applies.

4.0 FINAL MITIGATION MONITORING AND REPORTING PROGRAM

ENVIRONMENTAL IMPACT	MITIGATION MEASURE	MONITORING RESPONSIBILITY	TIMING	VERIFICATION (DATE/INITIALS)
PH4	The City will implement General Plan Implementation Program COS-9 – Boronda Memorandum of Understanding, which requires the City to continue to cooperate with the County of Monterey to implement the Boronda Memorandum of Understanding, which directs that City growth occur generally to the north and east from the most productive farmland.	Community Development, County of Monterey	Ongoing – the City is required to implement this measure everywhere it applies.	
PH5	The City will implement General Plan Implementation Program COS-33 – Promote Energy Retrofit Programs, which requires the City to promote retrofit programs by the City to reduce energy usage and consequently reduce emissions from energy consumption. Encourage utility companies to provide informational literature about available retrofit programs at City offices, the Permit Center, and libraries.	Development and Permit Services, utility companies	Ongoing – the City is required to implement this measure everywhere it applies.	
PH6	The City will implement General Plan Implementation Program CD-11 – Smart Growth Principles, which requires the City to use the Smart Growth Networks Getting to Smart Growth: 100 Policies for Implementation (ICMA, 2002) or other similar policy manual, perform an “audit” of the City’s Zoning and Subdivision Ordinances to identify potential impediments to the development of smart growth and traditional neighborhood development projects. Revise, adopt, and implement new standards and procedures as necessary to encourage smart growth and traditional neighborhood development in Salinas.	Community Development, Public Works	Ongoing – the City is required to implement this measure everywhere it applies.	
PH7	The City will implement General Plan Implementation Program COS-23 – Monterey Bay Unified Air Pollution Control District Air Quality Management Plan, which requires the City to continue to cooperate with the Monterey Bay Unified Air Pollution Control District to implement the most recent Air Quality Management plan to address regional motor vehicle emissions. In particular, coordinate with the District and AMBAG, providing technical assistance and demographic data when available, during the development of future population projections by AMBAG.	Community Development, Monterey Bay Unified Air Pollution Control District, AMBAG	Ongoing – the City is required to implement this measure everywhere it applies.
