ANALYSIS OF COMPUTER USAGE

Timetable

Capital Improvement Budget was approved during the 2022-2023 fiscal year

Computers were purchased in April and received in May/June of 2023

Computers were replaced at the John Steinbeck and Cesar Chavez Library at the end of fiscal year 2022-2023 and the beginning of fiscal year 2023-2024

We have seen an immediate increase in total usage and average length of sessions

ANALYSIS OF COMPUTER USAGE

Elements of comparison

In this presentation, we will compare statistics from fiscal year 2022-2023 and fiscal year 2023-2024

The following statistical categories will be discussed:

- Total number of sessions
- Average length of sessions (in minutes)
- Total amount of time spent on computers (in hours)
- Total number of pages printed
- Total number of sessions on our wireless network (Wifi)

ANALYSIS OF COMPUTER USAGE

Highlights

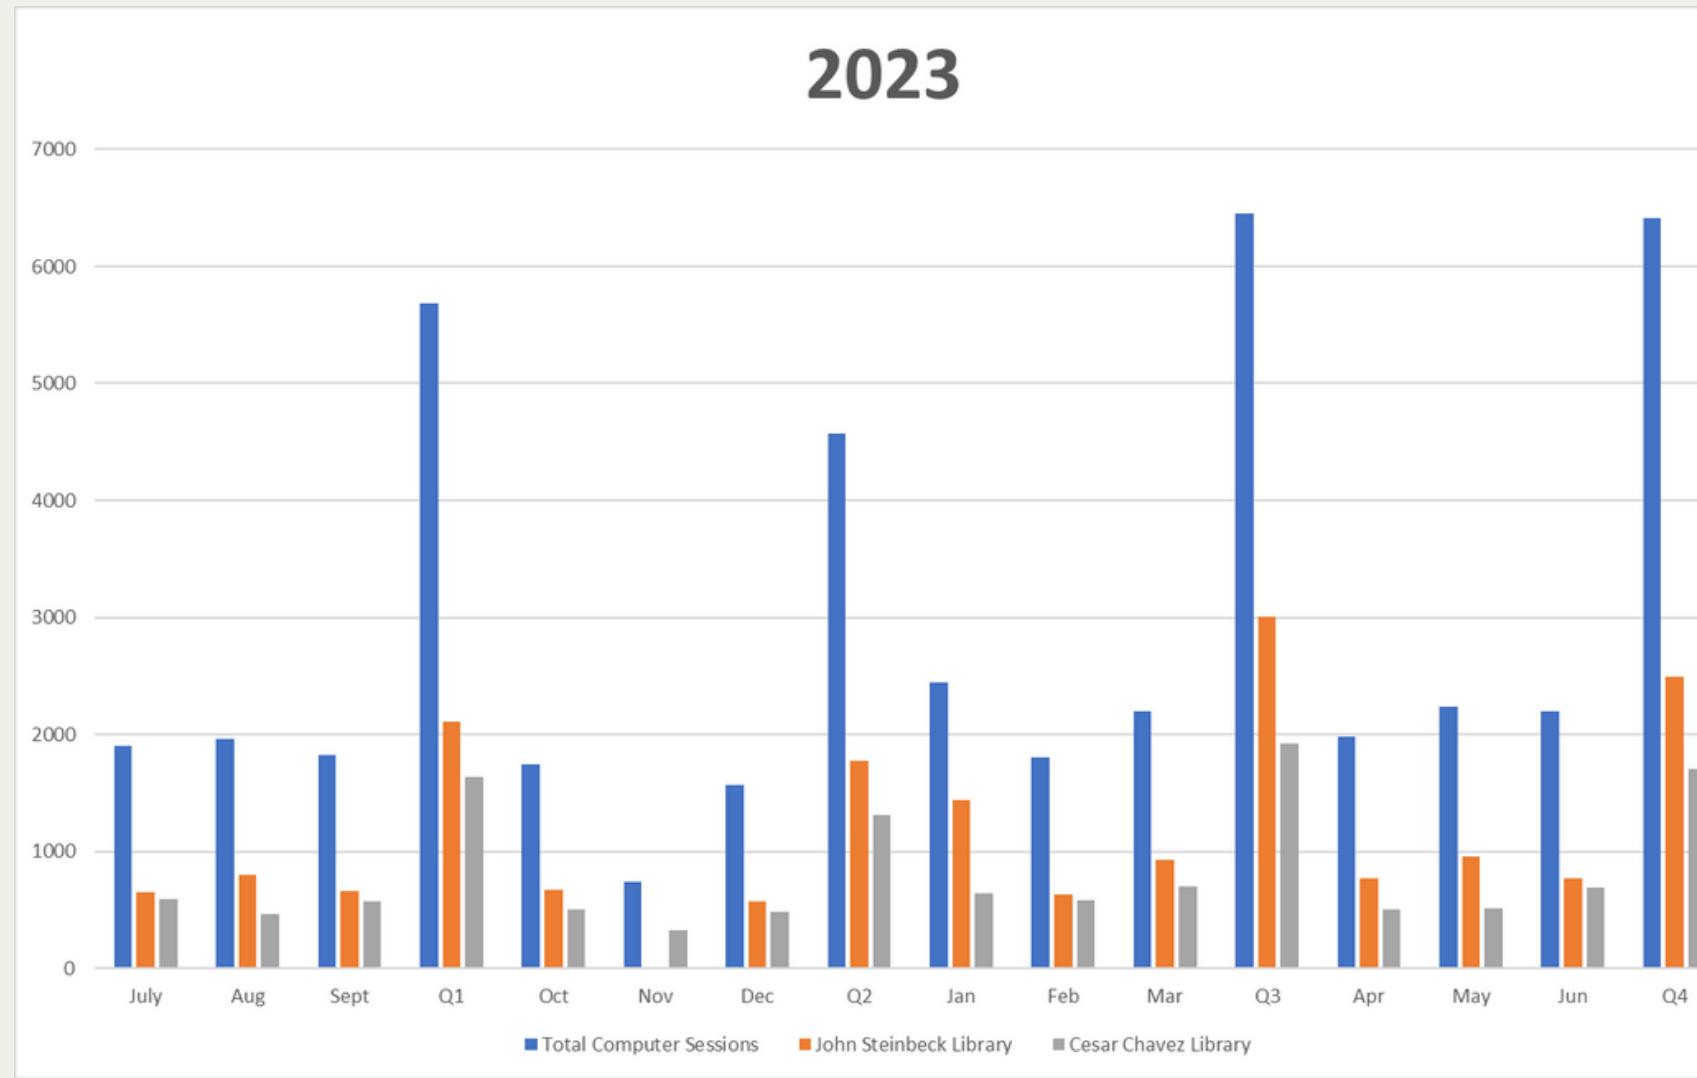

The two main trends are:

- The total amount of time spent by patrons on the new computers has seen a notable increase
- The average length of sessions has nearly doubled after the new computers were installed

The statistics that we will go over show that the computers that were replaced had become inadequate (slowness, freezing issues, connectivity issues)

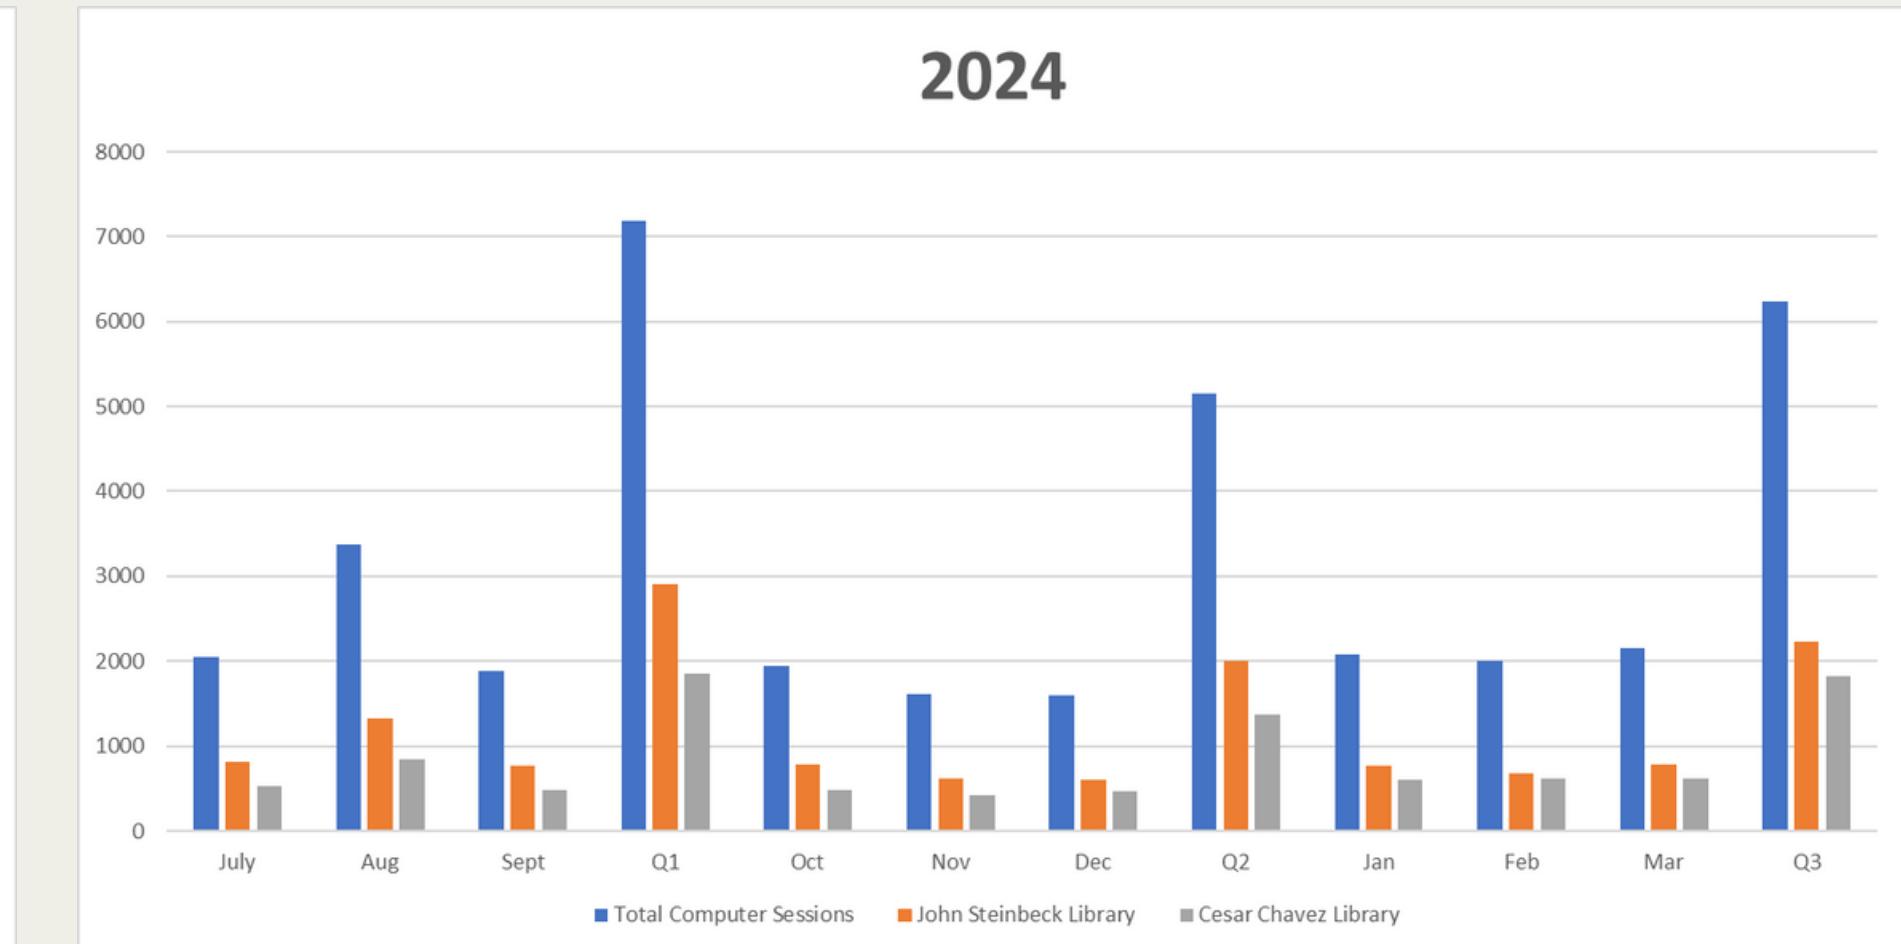

They also show that the new computers allow patrons to complete projects and tasks at the library without the fear of losing their work half-way through
