Changes in text are signified by strikeouts (~~strikeouts~~) where text is removed and by underlined font (underline font) where text is added. Other minor clarifications and corrections to typographical errors are also shown as corrected in this format, including corrections not based on responses to comments.

Cultural Resources

Section 5, *Cultural Resources*, page 40 and 41 of the Draft IS-MND are revised as follows:

In August 2021, Rincon Consultants, Inc. prepared a cultural resources study (~~Appendix C~~
Appendix E) for the project...

Given the negative results of ~~Appendix C~~ Appendix E, the project site is considered to have low archaeological sensitivity.

Appendices

Appendix E, *Cultural Resources Study*, has been included to the Final IS-MND. The study, which was referenced and incorporated into the analysis in Section 5, *Cultural Resources*, was erroneously referred to as Appendix C and unintentionally omitted from the Draft IS-MND Appendices. It has been added as Appendix E to the Final IS-MND.

Appendix A

Urbanization	Urban	Wind Speed (m/s)	2.8	Precipitation Freq (Days)	53
Climate Zone	4			Operational Year	2024
Utility Company	User Defined				
CO2 Intensity (lb/MWhr)	151	CH4 Intensity (lb/MWhr)	0	N2O Intensity (lb/MWhr)	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Project is in Salinas, Monterey County --> MBARD. Utility provider would be Central Coast Community Energy. The CO2e rate is 151 pounds per MWh

Land Use - Project is 76 dwelling units (approx 2,210 sf) and 166 parking lot spaces. Acreage is approximately 2.6

Construction Phase - Default construction schedule

Off-road Equipment - Default construction equipment

Architectural Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Vehicle Trips - Default trip gen rate

Woodstoves -

Area Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Water And Wastewater - No septic tanks proposed. Changed the percentage and added to aerobic

Area Mitigation -

1 Preston Street AQ - Monterey Bay Unified APCD Air District, Annual

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Applied

Water Mitigation - 2019 Title 24 standards require a 20% reduction for indoor water use

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Project is in Salinas, Monterey County --> MBARD. Utility provider would be Central Coast Community Energy. The CO2e rate is 151 pounds per MWh

Land Use - Project is 76 dwelling units (approx 2,210 sf) and 166 parking lot spaces. Acreage is approximately 2.6

Construction Phase - Default construction schedule

Off-road Equipment - Default construction equipment

Architectural Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Vehicle Trips - Default trip gen rate

Woodstoves -

Area Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Water And Wastewater - No septic tanks proposed. Changed the percentage and added to aerobic

Area Mitigation -

1 Preston Street AQ - Monterey Bay Unified APCD Air District, Summer

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Applied

Water Mitigation - 2019 Title 24 standards require a 20% reduction for indoor water use

Utility Company	User Defined				
CO2 Intensity (lb/MWhr)	151	CH4 Intensity (lb/MWhr)	0	N2O Intensity (lb/MWhr)	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Project is in Salinas, Monterey County --> MBARD. Utility provider would be Central Coast Community Energy. The CO2e rate is 151 pounds per MWh

Land Use - Project is 76 dwelling units (approx 2,210 sf) and 166 parking lot spaces. Acreage is approximately 2.6

Construction Phase - Default construction schedule

Off-road Equipment - Default construction equipment

Architectural Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Vehicle Trips - Default trip gen rate

Woodstoves -

Area Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Water And Wastewater - No septic tanks proposed. Changed the percentage and added to aerobic

Area Mitigation -

1 Preston Street AQ - Monterey Bay Unified APCD Air District, Winter

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Applied

Water Mitigation - 2019 Title 24 standards require a 20% reduction for indoor water use

1.0 Project Characteristics**1.1 Land Usage**

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
Parking Lot	166.00	Space	0.00	66,400.00	0
Apartment Mid Rise	76.00	Dwelling Unit	2.60	167,960.00	217

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.8	Precipitation Freq (Days)	53
Climate Zone	4			Operational Year	2030
Utility Company	User Defined				
CO2 Intensity (lb/MWhr)	151	CH4 Intensity (lb/MWhr)	0	N2O Intensity (lb/MWhr)	0

1.3 User Entered Comments & Non-Default Data

Project Characteristics - Project is in Salinas, Monterey County --> MBARD. Utility provider would be Central Coast Community Energy. The CO2e rate is 151 pounds per MWh

Land Use - Project is 76 dwelling units (approx 2,210 sf) and 166 parking lot spaces. Acreage is approximately 2.6

Construction Phase - Default construction schedule

Off-road Equipment - Default construction equipment

Architectural Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Vehicle Trips - Default trip gen rate

Woodstoves -

Area Coating - MBARD Rule 426 architectural coatings 50 g/L for nonflat coatings and 100 g/L for traffic markings

Water And Wastewater - No septic tanks proposed. Changed the percentage and added to aerobic

Area Mitigation -

1 Preston Street GHG - Monterey Bay Unified APCD Air District, Annual

EMFAC Off-Model Adjustment Factors for Gasoline Light Duty Vehicle to Account for the SAFE Vehicle Rule Applied

Water Mitigation - 2019 Title 24 standards require a 20% reduction for indoor water use

Subject: Biological Resources Assessment for 1 Preston Street Project in Salinas, California 95003

Dear Ms. Brinton:

This report documents the findings of a Biological Resources Assessment (BRA) conducted by Rincon Consultants, Inc. (Rincon) for the 1 Preston Street Project (project) in Salinas, California. The purpose of this report is to document existing conditions at the project site and to evaluate the potential for impacts to special-status biological resources including plant and wildlife species, plant communities, jurisdictional waters and wetlands, and suitable habitat for nesting birds, in compliance with the County of Monterey's California Environmental Quality Act (CEQA) environmental review requirements.

Project Location and Description

The project site, here after known as the study area, includes County Assessor's Parcel Number 003-161-008-000 and is located at 1 Preston Street in central Salinas, California, within Monterey County, on the east of the Monterey Bay (Figure 1; Attachment 1). The study area is south of Highway (HWY) 101. Land uses surrounding the approximately 2.6-acre study area consist of Medium and Low-Density residential neighborhoods to the west and north of the site, as well as commercial uses to the east along north Main Street. The study area is bordered on the north and west by an open space reclamation ditch which is fed by Main Canal, and collects water from Alisal Creek, Gabilan Creek, and Natividad Creek. A small park is located between existing residential developments, roughly 245 feet northwest of the project site on the far side of the reclamation ditch. The site is undeveloped with bare ground and sparse ruderal vegetation in the center and nonnative annual grasslands around the perimeter.

The proposed project consists of a General Plan Amendment and Rezone to modify the existing vacant 2.6-acre lot at 1 Preston Street from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1), which would facilitate the development of up to approximately 76 housing units (anticipating a density bonus) across approximately 129,202 square feet (sf). Because there are currently no development proposals, this BRA assumes the maximum potential buildout of the site.

Regulatory Background

Regulatory authority over biological resources is shared by Federal, State, and local authorities under a variety of statutes and guidelines. Primary authority for general biological resources lies within the land use control and planning authority of local jurisdictions (in this instance, the City of Salinas). The California Department of Fish and Wildlife (CDFW) is a trustee agency for biological resources throughout the State under CEQA and has direct jurisdiction under the California Fish and Game Code (CFGC). Under the California and federal Endangered Species Acts (CESA/ESA), the CDFW and the U.S. Fish and Wildlife Service (USFWS) also have direct regulatory authority over species formally listed as threatened or endangered, and species protected by the Migratory Bird Treaty Act (MBTA). The U.S. The City of Salinas is the designated lead agency under CEQA for this project.

Methods

This biological resources assessment consists of a review of relevant literature and background information, a reconnaissance-level field survey to confirm existing conditions and determine which biological resources are present or may occur at the site, and an evaluation of the development to determine potentially significant impacts to biological resources under CEQA. The potential presence of special-status species is based on the literature review and a survey designed to map vegetation communities and assess habitat suitability and presence of target species. The study area evaluated for this biological resource assessment is defined as the limits of the subject parcel (Figure 2; Attachment 1).

Literature Review

The literature review included database research on special-status resource occurrences within the *Salinas, California* 7.5-minute U.S. Geological Survey (USGS) quadrangle and eight surrounding quads. Sources included the CDFW California Natural Diversity Data Base (CNDDB) (CDFW 2021a), Biogeographic Information and Observation System (Bios) (CDFW 2021b), USFWS Information for Planning and Consultation (IPaC) (USFWS 2021a), and USFWS Critical Habitat Portal (USFWS 2021b). Other resources included the California Native Plant Society (CNPS) online Inventory of Rare and Endangered Plants of California (CNPS 2021), CDFW's Special Animals List (CDFW 2021c), and CDFW's Special Vascular Plants, Bryophytes, and Lichens List (CDFW 2021d). Aerial photographs, topographic maps, soil survey maps, geologic maps, and climatic data in the area were also examined.

Field Survey

A reconnaissance-level site visit was conducted to assess the habitat suitability for potential special-status species; map existing vegetation communities and any evident sensitive biological resources currently on site; note the presence of potential jurisdictional waters or wetlands; document any wildlife connectivity/movement features; and record all observations of plant and wildlife species within the study area. Site photos from the survey are included as Attachment 2.

Existing Conditions

Topography and Soils

The site's elevation is roughly 48 feet above mean sea level. With the exception of the reclamation ditch, the topography of the study area and its immediate surroundings is generally flat and has been previously graded and compacted. The site is located in Salinas, California. Based on the most recent soil survey for Monterey County (U.S. Department of Agriculture, Natural Resources Conservation Service [USDA,NRCS] 1980), the study area contains two soil map units:

- **Clear Lake clay, sandy substratum, drained, 0 to 1 percent slopes**, is basin alluvium. This soil type is derived from igneous, metamorphic and sedimentary rock over flood plain alluvium.
- **Xerorthents, loamy**, occurs on old alluvial fans, footslope terraces and footslopes.

Vegetation and Other Land Cover

No natural vegetation communities exist within the study area. Vegetation within the study area is regularly maintained, and was comprised of largely bare ground in the center with sparse ruderal vegetation, with non-native annual grassland along the perimeter (refer to Figure 3, Attachment 1). The dominant species were wild oats (*Avena sp.*), rip-gut brome (*Bromus diandrus*), and foxtail barley (*Hordeum murinum*) within the non-native annual grassland.

General Wildlife

The study area and its surroundings provide habitat for wildlife species that commonly occur in urban habitats such as house finch (*Haemorrhous mexicanus*), Botta's pocket gopher (*Thomomys bottae*) and California scrub jay (*Aphelocoma californica*); however, the site is regularly maintained and, therefore, only provides marginal habitat for urban wildlife such as Virginia opossum (*Didelphis virginiana*), raccoon (*Procyon lotor*), and fox squirrel (*Sciurus niger*). The adjacent reclamation ditch channel may provide a dispersal corridor for wildlife. Species such as coyote, bobcat, and raccoon may utilize the channel.

Special-Status Biological Resources

This section discusses special-status biological resources observed in the study area and evaluates the potential for the study area to support special-status biological resources.

Special-Status Species

Local, State, and federal agencies regulate special-status species and may require an assessment of their presence or potential presence to be conducted prior to the approval of proposed development on a property. Assessments for the potential occurrence of special-status species are based upon known ranges, habitat preferences for the species, species occurrence records from the CNDDDB species occurrence records from other sites in the vicinity of the study area, and previous reports for the study area. The potential for each special-status species to occur in the study area was evaluated according to the following criteria:

- **Not Expected.** Habitat on and adjacent to the site is clearly unsuitable for the species' requirements (foraging, breeding, cover, substrate, elevation, hydrology, plant community, site history, disturbance regime).
- **Low Potential.** Few of the habitat components meeting the species' requirements are present, and/or the majority of habitat on and adjacent to the site is unsuitable or of very poor quality. The species is not likely to be found on the site.
- **Moderate Potential.** Some of the habitat components meeting the species' requirements are present, and/or only some of the habitat on or adjacent to the site is unsuitable. The species has a moderate probability of being found on the site.
- **High Potential.** All of the habitat components meeting the species' requirements are present and/or most of the habitat on or adjacent to the site is highly suitable. The species has a high probability of being found on the site.
- **Present.** Species is observed on the site or has been recorded (e.g., CNDDDB, other reports) on the site recently (within the last 5 years).

For the purpose of this report, special-status species are those plants and animals listed, proposed for listing, or candidates for listing as Threatened or Endangered by the USFWS under the ESA; those listed or candidates for listing as Rare, Threatened, or Endangered under the CESA or Native Plant Protection Act; those identified as Fully Protected by the CFGC (Sections 3511, 4700, 5050, and 5515); those identified as Species of Special Concern (SSC) by the CDFW; and plants occurring on lists 1 and 2 of the CNPS California Rare Plant Rank (CRPR) system per the following definitions:

- **Rank 1A:** Plants presumed extinct in California;
- **Rank 1B.1:** Rare or endangered in California and elsewhere; seriously endangered in California (over 80 percent of occurrences threatened/high degree and immediacy of threat);
- **Rank 1B.2:** Rare or endangered in California and elsewhere; fairly endangered in California (20 to 80 percent occurrences threatened);
- **Rank 1B.3:** Rare or endangered in California and elsewhere, not very endangered in California (less than 20 percent of occurrences threatened, or no current threats known);
- **Rank 2:** Rare, threatened or endangered in California, but more common elsewhere.

Based on a query of the CNDDDB, there are 45 special-status plant species and 32 special-status wildlife species documented within the *Salinas, California* 7.5-minute U.S. Geological Survey (USGS) quadrangle and 8 surrounding quads. All 77 special-status species have been evaluated for potential to occur within the study area (Attachment 3).

Special-Status Plant Species

No special-status plants were incidentally observed during the reconnaissance-level field survey. The reconnaissance survey was conducted in May 2021, within the spring blooming period when many species are identifiable. Based on the impacted nature of the site, lack of natural vegetation communities, and habitat requirements of special-status plant species, Rincon determined of the 45 special-status plant species known to occur in the region, Congdon's tarplant (*Centromadia parryi* ssp. *Congdonii*) is the only species to have a low potential to occur within the study area (see Attachment 3). No other special-status species are expected to occur in the study area. This is due to a lack of species-specific habitat

requirements on site and the overall lack of suitable habitat such as natural vegetation communities or natural wetland habitats (e.g., marshes or seeps). For the purposes of CEQA analysis, special-status species with low potential to occur will not be addressed further.

Special-Status Wildlife Species

No federal or State-listed or other special-status wildlife species were observed during the field survey. Of the 32 species evaluated (see Attachment 3), two species had a low potential to occur and three species had a moderate potential to occur. California red-legged frog (*Rana draytonii*) and Monterey shrew (*Sorex ornatus salarius*) had a low potential to occur. Coast range newt (*Taricha torosa*), western pond turtle (*Emys marmorata*), and western burrowing owl (*Athene cunicularia*), had a moderate potential to occur in the study area. For the purposes of CEQA analysis, special-status species with low potential to occur will not be addressed further. No other special-status species are expected to occur in the study area. This is due to a lack of species-specific habitat requirements on site and the overall lack of suitable habitat such as natural vegetation communities or natural wetland habitats (e.g., marshes or seeps). The study area is relatively small and isolated by development from any natural habitats. As such, it does not support a prey base for larger predators/raptors and lacks connectivity to regional populations of special-status species.

Coast Range Newt

Coast range newt is a CDFW species of special concern that inhabits terrestrial habitats such as oak woodlands, annual grassland, and chaparral where sufficient moisture is present. As adults they will migrate over 0.62 mile (1 km) to breed in ponds, reservoirs, and slow-moving streams. There is one CNDDDB record for the coast range newt within five miles of the study area. The study area is within the known range of the species and suitable terrestrial and aquatic habitat is present within and immediately adjacent to the study area.

Western Pond Turtle

Western pond turtle is a CDFW species of special concern that is found in ponds, lakes, rivers, creeks, marshes, and irrigation ditches, with abundant vegetation. It requires basking sites of logs, rocks, cattail mats, or exposed banks. Western pond turtle is active from approximately February to November. It will estivate during summer droughts by burying itself in soft bottom mud. When creeks and ponds dry up in summer, some turtles will travel along the creek until they find an isolated deep pool, others stay within moist mats of algae in shallow pools, and many turtles move to woodlands above the creek or pond and bury themselves in loose soil. Western pond turtle will overwinter underground until temperatures warm up and the heavy winter flows of the creek subside. They return to the creek in the spring.

There are two occurrences within five miles of the study area, with the closest occurrence approximately 3.6 miles to the east within Natividad Creek. The ditch immediately adjacent to the study area is connected to Natividad creek.

Western Burrowing Owl

Western burrowing owl is a CDFW Species of Special Concern that occupies open, treeless areas within grassland, low density scrub, and desert biomes. This species generally inhabits gently sloping areas, characterized by low, sparse vegetation, and is often associated with high densities of burrowing

mammals (Poulin et al. 2011). Western burrowing owl often uses relatively disturbed areas such as agricultural fields, golf courses, cemeteries, and vacant urban lots in addition to natural breeding habitats. Nests are most often in fossorial animal burrows, such as California ground squirrel or American badger, but atypical nests such as culverts or rubble piles may also be used. Nest sites are typically selected in an area with a high density of burrows.

There are five occurrences within five miles of the study area, with the closest occurrence approximately 0.45 miles to the west. Suitable habitat is present throughout the study area within both the nonnative annual grassland and the ruderal habitats. Even though burrows of suitable size were not observed within the study area ground squirrels were observed in the open space alongside the adjacent reclamation ditch within 500 feet of the study area. The species is known to occur in the region and is determined to have a moderate potential to occur within the study area.

Nesting Birds

Birds may nest in trees, shrubs, or directly on the ground. The study area contains suitable nesting habitat for ground-nesting avian species, including killdeer (*Charadrius vociferus*). Therefore, the study area contains suitable nesting habitat for resident and migratory birds. Adjacent parcels contain trees and shrubs which provide suitable nesting habitat for other avian species. Native bird nests are protected by the MBTA and CFGC Section 3503. The nesting season generally extends from February through August but can vary based upon annual climatic conditions.

Special-Status Vegetation Communities

Plant communities are also considered sensitive biological resources if they have limited distributions, have high wildlife value, include sensitive species, or are particularly susceptible to disturbance. CDFW ranks sensitive communities as “threatened” or “very threatened” and keeps records of their occurrences in CNDDDB. CNDDDB vegetation alliances are ranked 1 through 5 based on NatureServe’s (2010) methodology, with those alliances ranked globally (G) or statewide (S) as 1 through 3 considered sensitive. Some alliances with the rank of 4 and 5 have also been included in the 2018 sensitive natural communities list under CDFW’s revised ranking methodology (CDFW 2020e).

Based on the current list, no special-status vegetation communities are present in the study area.

Jurisdictional Waters and Wetlands

While no potentially jurisdictional features occur within the study area, the reclamation ditch immediately adjacent to the study area is a potentially jurisdictional feature.

Wildlife Movement

Wildlife movement corridors, or habitat linkages, are generally defined as connections between habitat patches that allow for physical and genetic exchange between otherwise isolated animal populations or those populations that are at risk of becoming isolated. Such linkages may serve a local purpose, such as providing a linkage between foraging and denning areas, or they may be regional in nature. Some habitat linkages may serve as migration corridors, wherein animals periodically move away from an area and then subsequently return. Others may be important as dispersal corridors for young animals. A group of habitat linkages in an area can form a wildlife corridor network.

The study area is not within any Essential Connectivity Areas or Natural Landscape Blocks (CDFW 2021b). The adjacent ditch may provide a wildlife movement corridor, or habitat linkage; however, it is not within the study area.

Impact Analysis and Mitigation Measures

This section discusses the potential impacts and effects to biological resources that may occur from implementation of the proposed project and recommends mitigation measures that would reduce those impacts where applicable.

Special-Status Species

The proposed project would have a significant effect on biological resources if it would:

- a. Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special-status species in local or regional plans, policies, or regulations, or by the CDFW or USFWS.

Special-Status Plants

The proposed project has potential to result in direct impacts to special-status plant species if they are present in the disturbance footprint due to removal of individuals or crushing by heavy equipment.

No sensitive plant species were observed during the reconnaissance survey in May 2021 and no special-status plants are expected to occur within the study area.

Special-Status Wildlife

The site contains nesting bird habitat. If nesting birds protected by the CFGC or MBTA are present on-site during construction, direct effects could include injury or mortality from construction activity, or nest abandonment from construction noise, dust, and other project activities.

Nesting Birds

The loss of active nests would be a violation of the MBTA and CFGC sections 3503 and 3513. The loss of common avian species is not likely to constitute a significant impact under CEQA; however, the following measures are recommended for all avian species to maintain compliance with federal and State laws:

- To avoid disturbance of nesting and special-status birds or migratory species protected by the MBTA and Sections 3503, 3503.5, and 3513 of the CFGC, activities related to the project site development, including, but not limited to, vegetation and/or tree removal should occur outside of the bird breeding season (February 1 through August 30). If ground disturbance, vegetation removal or heavy equipment work must begin within the nesting season, then the project applicant shall submit evidence to the City that a qualified biologist conducted a pre-construction nesting bird survey, within 14 days of the start of construction. The nesting bird pre-construction survey will be conducted by a qualified biologist within the disturbance footprint and a 300-foot buffer.
- If nests are found, an avoidance buffer will be established by a qualified biologist. The buffer should be established to ensure nesting activity is not disturbed by construction activity, and should be determined by the qualified biologist based on the species' known tolerances, the proposed work

activity, and existing disturbances associated with land uses outside of the site. The buffer should be demarcated by the biologist with bright construction fencing, flagging, construction lathe, or other means to mark the boundary. All construction personnel should be notified as to the existence of the buffer zone and to avoid entering the buffer zone during the nesting season. No ground disturbing activities should occur within this buffer until the qualified biologist has confirmed that breeding/nesting has completed, and the young have fledged the nest, or the nest has become otherwise inactive. Encroachment into the buffer should occur only at the discretion of the qualified biologist.

This measure will reduce impacts to nesting birds to less than significant.

Coast Range Newt

Suitable aquatic breeding habitat for coast range newt is present adjacent to the study area within the unnamed reclamation ditch. There is moderate potential for this species to occur within the study area, and no impacts to breeding habitat are expected from project development. However, direct impacts in the form of injury or mortality could occur if individuals are present during construction activity.

Pre-construction clearance surveys for coast range newt should be conducted within 14 days prior to the start of construction (including staging and mobilization) in areas of suitable habitat. The surveys should cover the entire disturbance footprint. A wildlife exclusion fence should be placed along the top of bank of the adjacent ditch and maintained regularly to deter wildlife from entering the project area during construction. The project applicant shall submit evidence to the City that a qualified biologist conducted pre-construction clearance surveys for coast range newt no more than 14 days prior to the start of construction. These measures will reduce impacts to coast range newt to less than significant.

Western Pond Turtle

Western pond turtle has potential to occur along the adjacent ditch and within the nonnative grassland habitat. The species may be directly adversely affected by the proposed project if individuals are present in the work areas. Injury or mortality of individuals that may result from construction activity may be considered a significant impact under CEQA.

Pre-construction clearance surveys for western pond turtle should be conducted within 14 days prior to the start of construction (including staging and mobilization) in areas of suitable habitat. The surveys should cover the entire disturbance footprint. A wildlife exclusion fence should be placed along the top of bank of the adjacent ditch and maintained regularly to deter wildlife from entering the project area during construction. The project applicant shall submit evidence to the City that a qualified biologist conducted pre-construction clearance surveys for western pond turtle no more than 14 days prior to the start of construction. These measures will reduce impacts to western pond turtle to less than significant.

Western Burrowing Owl

Suitable western burrowing owl habitat is present in annual grassland, and ruderal habitats throughout the study area and within the nearby park and along the adjacent reclamation ditch. Even though there is a lack of burrows and a high degree of disturbance, with the nearby suitable habitat in the adjacent open space and along the reclamation ditch the likelihood of western burrowing owl occupying the study area is increased; therefore, the species is determined to have a moderate potential to occur within the study area. Impacts to western burrowing owls would be limited to project activity that would directly affect an

occupied burrow (temporarily or permanently damage or destroy the burrow), or project activity that would disrupt active breeding or wintering owls within 500 feet of construction activity. Because of the lack of suitable burrows within the study area, direct impacts to active burrows are unlikely; however, owls can be disturbed by construction noise and human activity and may abandon active burrows, including during breeding. Impacts to active western burrowing owl burrows would be considered significant under CEQA.

The project applicant shall submit evidence to the City that a qualified biologist conducted pre-construction clearance surveys prior to ground disturbance activities within suitable natural habitats and ruderal areas throughout the study area, to confirm the presence/absence of active western burrowing owl burrows. The surveys should be consistent with the recommended survey methodology provided by CDFW (2012). Clearance surveys should be conducted within 30 days prior to construction and ground disturbance activities. If no western burrowing owls are observed, no further actions are required. If western burrowing owls are detected during the pre-construction clearance surveys, the following measures should apply:

- Avoidance buffers during the breeding and non-breeding season should be implemented in accordance with the CDFW (2012) and Burrowing Owl Consortium (1993) minimization mitigation measures.
- If avoidance of western burrowing owls is not feasible, then additional measures such as passive relocation during the nonbreeding season and construction buffers of 200 feet during the breeding season should be implemented, in consultation with CDFW. In addition, a Western Burrowing Owl Exclusion Plan and Mitigation and Monitoring Plan should be developed by a qualified biologist in accordance with the CDFW (2012) and Burrowing Owl Consortium (1993).

These measures will reduce impacts to western burrowing owl to less than significant.

Special-Status Vegetation

The proposed project would have a significant effect on biological resources if it would:

- b. Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, or regulations, or by the CDFW or USFWS.

The reclamation ditch to the north and west of the project area is outside the project boundaries. This is a potentially jurisdictional feature. The project will not impact this feature. No CDFW listed sensitive natural communities or riparian habitats are present within the project boundaries. Therefore, no impacts to sensitive natural communities are expected.

Jurisdictional Waters and Wetlands

The proposed project would have a significant effect on biological resources if it would:

- c. Have a substantial adverse effect on federally or state protected wetlands (including, but not limited to, marshes, vernal pools, coastal wetlands, and drainages) or waters of the United States, as defined by § 404 of the federal Clean Water Act or California Fish & Game Code § 1600, et seq. through direct removal, filling, hydrological interruption, or other means.

No jurisdictional waters or wetlands exist within the project site and no direct impacts are anticipated. However, potentially jurisdictional features within the vicinity of the project site include the reclamation ditch located immediately adjacent to the project site. Indirect impacts from project activities could occur if sediment or pollutants were allowed to enter nearby waterways. Future project activities could include grading, excavation, and removal of soil... Development of the project site would disturb more than one acre of land, which would mandate implementation of a National Pollutant Discharge Elimination System (NPDES)-compliant Stormwater Pollution Prevention Plan (SWPPP). The SWPPP would include Best Management Practices (BMP) to prevent and retain stormwater runoff and to prevent soil erosion. Such BMPs could include checking vehicles daily for leaks, maintaining vehicles in good working order, providing spill kits, preparing a spill response plan, and sediment and erosion control measures (e.g., straw wattles, silt fencing, check dams). With mandatory implementation of the SWPPP and erosion control measures, impacts to the potentially jurisdictional reclamation ditch would be less than significant.

Pursuant to the City of Salinas Zoning Code Section 37-50,180(h), a 100-foot setback area would be required from the top of the bank of the reclamation ditch in which no building or development could occur. Furthermore, the project would be required to comply with the City of Salinas General Plan Policies COS-17 and COS-18 which require developments to protect wetland and riparian areas through a 100-foot setback and implement a riparian/wetland habitat mitigation and management plan. Development activities may be considered within the setback area if a City Planner determines the encroachment to be minor and a Biotic Resources Study has determined that the proposed encroachment would not result in significant adverse impacts to the applicable creek or wetland because the implementation of alternative mitigation measures would achieve a comparable or better level of mitigation than the strict application of the 100-foot setback. This BRA has determined that a 30-foot reduced setback would be appropriate for this site, as implementation of the SWPPP and erosion control measures would be equally as protective as a 100-foot setback.

Wildlife Movement

The proposed project would have a significant effect on biological resources if it would:

- d. Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors or impede the use of native wildlife nursery sites.

The adjacent reclamation ditch is a potential wildlife movement corridor however, it is outside the proposed project area and not within the study area. Therefore, no impacts to wildlife movement corridors are expected.

Local Policies and Ordinance

The proposed project would have a significant effect on biological resources if it would:

- e. Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance.

The Salinas General Plan Conservation and Open Space Element includes Policy COS-5.1, which aims to “protect and enhance creek, corridors, river corridors, the reclamation ditch, sloughs, wetlands, hillsides, and other potentially significant biological resources for their value in providing visual amenity, flood

protection, habitat for wildlife and recreational opportunities” (City of Salinas 2002b). The project would be consistent with Policy COS-5.1 as the project would adhere to applicable regulations and implement mitigation measures to reduce potential impacts to a less than significant level, as described under criteria (a) through (d), above.

Chapter 35 of the Salinas Municipal Code sets forth regulations and provisions pertaining to the planting, maintenance, and removal of trees and shrubs in Salinas. According to Section 35-1 of the Salinas Municipal Code, the City defines a heritage and/or landmark tree as 1) an oak tree that is at least 24 inches in diameter at two feet above the ground surface; or 2) an oak tree that is visually significant, historically significant, or exemplary in its species. Section 35-18 of the Salinas Municipal Code prohibits the removal of heritage or landmark trees from City property unless approved by the City’s Public Works Director. Heritage and landmark trees do not occur within the study area, and development facilitated by the project would not result in the removal of heritage or landmark trees.

Pursuant to Section 35-9 of the Salinas Municipal Code, no person shall root-trim, trim, prune, plant, injure, remove, or interfere with any tree, shrub or plant upon any street, parkway or alley in the City without written permission from the City’s Public Works Director. No trees protected by this policy exist within the study area, therefore the proposed project would not conflict with the Salinas Municipal Code, as applicable.

Habitat Conservation Plan

The proposed project would have a significant effect on biological resources if it would:

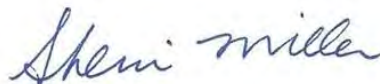

- f. Conflict with the provisions of an adopted Habitat Conservation Plan, natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan.

The study area is outside all Habitat Conservation Plan and Natural Community Conservation Plan Areas. Therefore, the proposed project will not conflict with any adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state habitat conservation plan.

Sincerely,
Rincon Consultants, Inc.

Special-Status Species Evaluation Tables

Special-Status Species in the Regional Vicinity of the Study Area

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
Plants and Lichens				
<i>Agrostis lacun- vernalis</i> vernal pool bent grass	None/None G1/S1 1B.1	Vernal pools. In mima mound areas or on the margins of vernal pools. 125-150 m. Blooms April - May	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Allium hickmanii</i> Hickman's onion	None/None G2/S2 1B.2	Closed-cone coniferous forest, chaparral, coastal scrub, coastal prairie, valley and foothill grassland. Sandy loam, damp ground and vernal swales; mostly in grassland though can be associated with chaparral or woodland. 5-200 m. Blooms March - May	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Arctostaphylos hookeri</i> ssp. <i>hookeri</i> Hooker's manzanita	None/None G3T2/S2 1B.2	Chaparral, coastal scrub, closed-cone coniferous forest, cismontane woodland. Sandy soils, sandy shales, sandstone outcrops. 30-550 m. Blooms February - April	Not Expected	No natural vegetation communities or suitable habitat occur in the study area. Would have been observed if present.
<i>Arctostaphylos montereyensis</i> Toro manzanita	None/None G2?/S2? 1B.2	Chaparral, cismontane woodland, coastal scrub. Sandy soil, usually with chaparral associates. 45-765 m. Blooms January - March	Not Expected	No natural vegetation communities or suitable habitat occur in the study area. Would have been observed if present.
<i>Arctostaphylos pajaroensis</i> Pajaro manzanita	None/None G1/S1 1B.1	Chaparral. Sandy soils. 30-170 m. Blooms December - February	Not Expected	No natural vegetation communities or suitable habitat occur in the study area. Would have been observed if present.
<i>Arctostaphylos pumila</i> sandmat manzanita	None/None G1/S1 1B.2	Closed-cone coniferous forest, chaparral, cismontane woodland, coastal dunes, coastal scrub. On sandy soil with other chaparral associates. 3-210 m. Blooms February - April	Not Expected	No natural vegetation communities or suitable habitat occur in the study area. Would have been observed if present.
<i>Astragalus tener</i> var. <i>tener</i> alkali milk-vetch	None/None G2T1/S1 1B.2	Alkali playa, valley and foothill grassland, vernal pools. Low ground, alkali flats, and flooded lands; in annual grassland or in playas or vernal pools. 0-170 m. Blooms March - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Castilleja ambigua</i> var. <i>insalutata</i> pink Johnny-nip	None/None G4T2/S2 1B.1	Coastal bluff scrub, coastal prairie. Wet or moist coastal strand or scrub habitats. 3-135 m. Blooms May - July	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Centromadia parryi</i> ssp. <i>Congdonii</i> Congdon's tarplant	None/None G3T1T2/S1S2 1B.1	Valley and foothill grassland. Alkaline soils, sometimes described as heavy white clay. 0-245 m. Blooms June - October	Low Potential	Potentially suitable habitat exists along the creek channel and in the disturbed areas. With the regular vegetation maintenance, it is unlikely the species would be observed within the study area.

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Chorizanthe minutiflora</i> Fort Ord spineflower	None/None G1/S1 1B.2	Coastal scrub, chaparral (maritime). Sandy, openings. 60-145 m. Blooms April - July	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Chorizanthe pungens</i> var. <i>pungens</i> Monterey spineflower	FT/None G2T2/S2 1B.2	Coastal dunes, chaparral, cismontane woodland, coastal scrub, valley and foothill grassland. Sandy soils in coastal dunes or more inland within chaparral or other habitats. 3-270 m. Blooms April - July	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Chorizanthe robusta</i> var. <i>robusta</i> robust spineflower	FE/None G2T1/S1 1B.1	Cismontane woodland, coastal dunes, coastal scrub, chaparral. Sandy terraces and bluffs or in loose sand. 5-245 m. Blooms May - September	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Clarkia jolonensis</i> Jolon clarkia	None/None G2/S2 1B.2	Cismontane woodland, chaparral, coastal scrub, riparian woodland. 10-1280 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Collinsia multicolor</i> San Francisco collinsia	None/None G2/S2 1B.2	Annual herb. Blooms March-May. Closed-cone coniferous forest, coastal scrub. On decomposed shale (mudstone) mixed with humus. 30-250m. Blooms March - May	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Cordylanthus rigidus</i> ssp. <i>littoralis</i> seaside bird's-beak	None/SE G5T2/S2 1B.1	Closed-cone coniferous forest, chaparral, cismontane woodland, coastal scrub, coastal dunes. Sandy, often disturbed sites, usually within chaparral or coastal scrub. 30-520 m. Blooms July - August	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Delphinium californicum</i> ssp. <i>interius</i> Hospital Canyon larkspur	None/None G3T3/S3 1B.2	Cismontane woodland, chaparral, coastal scrub. In wet, boggy meadows, openings in chaparral and in canyons. 195-1095 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Delphinium hutchinsoniae</i> Hutchinson's larkspur	None/None G2/S2 1B.2	Broad leafed upland forest, chaparral, coastal prairie, coastal scrub. On semi-shaded, slightly moist slopes, usually west-facing. 15-535 m. Blooms March - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Delphinium umbraculorum</i> umbrella larkspur	None/None G3/S3 1B.3	Cismontane woodland, chaparral. Mesic sites. 215-2075 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Ericameria fasciculata</i> Eastwood's goldenbush	None/None G2/S2 1B.1	Closed-cone coniferous forest, chaparral (maritime), coastal scrub, coastal dunes. In sandy openings. 30-215 m. Blooms July - October	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Eriogonum nortonii</i> Pinnacles buckwheat	None/None G2/S2 1B.3	Chaparral, valley and foothill grassland. Sandy soils; often on recent burns; western Santa Lucias. 90-975 m. Blooms May - August	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Erysimum ammophilum</i> sand-loving wallflower	None/None G2/S2 1B.2	Chaparral (maritime), coastal dunes, coastal scrub. Sandy openings. 3-320 m. Blooms March - April	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Erysimum menziesii</i> Menzies' wallflower	FE/SE G1/S1 1B.1	Bloom period: January-August. Occurs in coastal dunes, headlands, and cliffs. Localized on dunes and coastal strands. Elevations: 1-25 m. Blooms January - August.	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Fritillaria liliacea</i> fragrant fritillary	None/None G2/S2 1B.2	Coastal scrub, valley and foothill grassland, coastal prairie, cismontane woodland. Often on serpentine; various soils reported though usually on clay, in grassland. 3-385 m. Blooms February - April	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Gilia tenuiflora</i> ssp. <i>arenaria</i> Monterey gilia	FE/ST G3G4T2/S2 1B.2	Coastal dunes, coastal scrub, chaparral (maritime), cismontane woodland. Sandy openings in bare, wind-sheltered areas. Often near dune summit or in the hind dunes; two records from Pleistocene inland dunes. 5-245 m. Blooms March - May	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Holocarpha macradenia</i> Santa Cruz tarplant	FT/SE G1/S1 1B.1	Coastal prairie, coastal scrub, valley and foothill grassland. Light, sandy soil or sandy clay; often with nonnatives. 10-275 m. Blooms June -November	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Horkelia cuneata</i> var. <i>sericea</i> Kellogg's horkelia	None/None G4T1?/S1? 1B.1	Closed-cone coniferous forest, coastal scrub, coastal dunes, chaparral. Old dunes, coastal sandhills; openings. Sandy or gravelly soils. 5-430 m. Blooms April - August	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Horkelia marinensis</i> Point Reyes horkelia	None/None G2/S2 1B.2	Coastal dunes, coastal prairie, coastal scrub. Sandy flats and dunes near coast; in grassland or scrub plant communities. 2-775 m. Blooms May - September	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Lasthenia conjugens</i> Contra Costa goldfields	FE/None G1/S1 1B.1	Valley and foothill grassland, vernal pools, alkaline playas, cismontane woodland. Vernal pools, swales, low depressions, in open grassy areas. 1-450 m. Blooms March - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area

Scientific Common Name	Name/ Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Legenere</i> legenere	<i>limosa</i> None/None G2/S2 1B.1	Vernal pools. In beds of vernal pools. 1-1005 m. Blooms May - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Lupinus</i> Tidestrom's lupine	<i>tidestromii</i> FE/SE G1/S1 1B.1	Coastal dunes. Partially stabilized dunes, immediately near the ocean. 4-25 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Malacothamnus</i> <i>palmeri</i> <i>involucratus</i> Carmel Valley bush-mallow	var. None/None G3T2Q/S2 1B.2	Cismontane woodland, chaparral, coastal scrub. Talus hilltops and slopes, sometimes on serpentine. Fire dependent. 5-520 m. Blooms May - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Malacothrix</i> var. Carmel malacothrix	<i>saxatilis</i> <i>arachnoidea</i> None/None G5T2/S2 1B.2	Chaparral, coastal scrub. Rock outcrops or steep rocky roadcuts. 30-1040 m. Blooms May - August	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Meconella</i> Oregon meconella	<i>oregana</i> None/None G2G3/S2 1B.1	Coastal prairie, coastal scrub. Open, moist places. 60-640 m. Blooms March - May	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Microseris</i> marsh microseris	<i>paludosa</i> None/None G2/S2 1B.2	Closed-cone coniferous forest, cismontane woodland, coastal scrub, valley and foothill grassland. 3-610 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Monardella</i> ssp. northern leaved monardella	<i>sinuata</i> <i>Nigrescens</i> <i>curly-</i> None/None G3T2/S2 1B.2	Coastal dunes, coastal scrub, chaparral, lower montane coniferous forest. Sandy soils. 10-245 m. Blooms May - July	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Monolopia</i> woodland woollythreads	<i>gracilens</i> None/None G3/S3 1B.2	Chaparral, valley and foothill grassland, cismontane woodland, broad leafed upland forest, North Coast coniferous forest. Grassy sites, in openings; sandy to rocky soils. Often seen on serpentine after burns but may have only weak affinity to serpentine. 120-975 m. Blooms March - July	Not Expected	No natural vegetation communities or suitable habitat occur in the study area
<i>Pinus</i> Monterey pine	<i>radiata</i> None/None G1/S1 1B.1	Closed-cone coniferous forest, cismontane woodland. Five primary stands are native to California. Dry bluffs and slopes. 60-125 m.	Not Expected	No natural vegetation communities or suitable habitat occur in the study area. Would have been observed if present.

Scientific Common Name	Name/ Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Piperia yadonii</i> Yadon's rein orchid	FE/None G1/S1 1B.1	Closed-cone coniferous forest, chaparral, coastal bluff scrub. On sandstone and sandy soil, but poorly drained and often dry. 10-505 m. Blooms June - July	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Plagiobothrys chorisianus</i> <i>chorisianus</i> Choris' popcornflower	var. None/None G3T1Q/S1 1B.2	Chaparral, coastal scrub, coastal prairie. Mesic sites. 5-705 m. Blooms March - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Plagiobothrys diffusus</i> San Francisco popcornflower	None/SE G1Q/S1 1B.1	Valley and foothill grassland, coastal prairie. Historically from grassy slopes with marine influence. 45-360 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Rosa pinetorum</i> pine rose	None/None G2/S2 1B.2	Closed-cone coniferous forest, cismontane woodland. 5-1090 m. Blooms May - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Stebbinsoseris decipiens</i> Santa Cruz microseris	None/None G2/S2 1B.2	Broad leafed upland forest, closed-cone coniferous forest, chaparral, coastal prairie, coastal scrub, valley and foothill grassland. Open areas in loose or disturbed soil, usually derived from sandstone, shale or serpentine, on seaward slopes. 90-750 m. Blooms April - May	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Trifolium buckwestiorum</i> Santa Cruz clover	None/None G2/S2 1B.1	Coastal prairie, broad leafed upland forest, cismontane woodland. Moist grassland. Gravelly margins. 30-805 m. Blooms May - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Trifolium hydrophilum</i> saline clover	None/None G2/S2 1B.2	Marshes and swamps, valley and foothill grassland, vernal pools. Mesic, alkaline sites. 1-335 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.
<i>Trifolium polyodon</i> Pacific Grove clover	None/SR G1/S1 1B.1	Closed-cone coniferous forest, meadows and seeps, coastal prairie, valley and foothill grassland. Along small springs and seeps in grassy openings. 5-260 m. Blooms April - June	Not Expected	No natural vegetation communities or suitable habitat occur in the study area.

Scientific Common Name	Name/ Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
Regional Vicinity refers to within a 9-quad search radius of site.				
Status (Federal/State)		CRPR (CNPS California Rare Plant Rank)		
FE =	Federal Endangered	1B = Rare, Threatened, or Endangered in California and elsewhere		
FT =	Federal Threatened			
SE =	State Endangered	CRPR Threat Code Extension		
ST =	State Threatened	.1 = Seriously endangered in California (>80% of occurrences threatened/high degree and immediacy of threat)		
SR =	State Rare	.2 = Moderately threatened in California (20-80% of occurrences threatened/moderate degree and immediacy of threat)		
		.3 = Not very endangered in California (<20% of occurrences threatened/low degree and immediacy of threat)		
Other Statuses				
G1 or S1	Critically Imperiled Globally or Subnationally (state)			
G2 or S2	Imperiled Globally or Subnationally (state)			
G3 or S3	Vulnerable to extirpation or extinction Globally or Subnationally (state)			
G4/5 or S4/5	Apparently secure, common and abundant			
Additional Notations may be provided as follows				
T –	Intraspecific Taxon (subspecies, varieties, and other designations below the level of species)			
Q –	Questionable taxonomy that may reduce conservation priority			
? –	Inexact Numeric rank			

Special-Status Animal Species in the Regional Vicinity of the Study Area

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
Invertebrates				
<i>Euphilotes enoptes smithi</i> Smith's blue butterfly	FE/None G5T1T2/S1	Most commonly associated with coastal dunes & coastal sage scrub plant communities in Monterey & Santa Cruz counties. Hostplant: Eriogonum latifolium and Eriogonum parvifolium are utilized as both larval and adult foodplants.	Not Expected	No suitable coastal dune or coastal sage scrub habitat occurs in the study area and this species host plants were not observed.
Fish				
<i>Eucyclogobius newberryi</i> tidewater goby	FE/None G3/S3	Brackish water habitats along the California coast from Agua Hedionda Lagoon, San Diego County to the mouth of the Smith River. Found in shallow lagoons and lower stream reaches, they need fairly still but not stagnant water and high oxygen levels.	Not Expected	No suitable habitat occurs in the study area. The adjacent ditch is fed primarily by agriculture runoff.
<i>Lavinia exilicauda harengus</i> Monterey hitch	None/None G4T2T4/S2S4 SSC	Occupies a wide variety of habitats, although they are most abundant in lowland areas with large pools or in small reservoirs that mimic such conditions.	Not Expected	Potential habitat occurs within the adjacent reclamation ditch, which is outside the project area.
<i>Oncorhynchus mykiss irideus</i> pop. 9 steelhead - south-central California coast DPS	FT/None G5T2Q/S2	Federal listing refers to runs in coastal basins from the Pajaro River south to, but not including the Santa Maria River.	Not Expected	Potential habitat occurs within the adjacent reclamation ditch, which is outside the project area.
<i>Spirinchus thaleichthys</i> longfin smelt	FC/ST G5/S1	Euryhaline, nektonic & anadromous. Found in open waters of estuaries, mostly in middle or bottom of water column. Prefer salinities of 15-30 ppt, but can be found in completely freshwater to almost pure seawater.	Not Expected	Potential habitat occurs within the adjacent reclamation ditch, which is outside the project area.
Amphibians				
<i>Ambystoma californiense</i> California tiger salamander	FT/ST G2G3/S2S3 WL	Central California DPS federally listed as threatened. Santa Barbara and Sonoma counties DPS federally listed as endangered. Need underground refuges, especially ground squirrel burrows, and vernal pools or other seasonal water sources for breeding.	Not Expected	The site is surrounded by development and has been heavily disturbed.
<i>Ambystoma macrodactylum croceum</i> Santa Cruz long-toed salamander	FE/SE G5T1T2/S1S2 FP	Wet meadows near sea level in a few restricted locales in Santa Cruz and Monterey counties. Aquatic larvae prefer shallow (<12 inches) water, using clumps of vegetation or debris for cover. Adults use mammal burrows.	Not Expected	Suitable habitat is not present, and the site is surrounded by development.

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Rana boylei</i> foothill yellow- legged frog	None/SE G3/S3 SSC	Partly shaded, shallow streams and riffles with a rocky substrate in a variety of habitats. Needs at least some cobble-sized substrate for egg-laying. Needs at least 15 weeks to attain metamorphosis.	Not Expected	Suitable habitat is not present, and the site is surrounded by development.
<i>Rana draytonii</i> California red- legged frog	FT/None G2G3/S2S3 SSC	Lowlands and foothills in or near permanent sources of deep water with dense, shrubby or emergent riparian vegetation. Requires 11-20 weeks of permanent water for larval development. Must have access to estivation habitat.	Low Potential	Potentially suitable habitat occurs along the adjacent reclamation ditch. California red-legged frogs may use the urban creeks as dispersal corridors however, the urban nature of the reclamation ditch and a lack of suitable breeding habitat may preclude them from the study area. Dispersing individuals may transiently occur within the study area
<i>Spea hammondi</i> western spadefoot	None/None G2G3/S3 SSC	Occurs primarily in grassland habitats, but can be found in valley-foothill hardwood woodlands. Vernal pools are essential for breeding and egg-laying.	Not Expected	No suitable habitat occurs in the study area
<i>Taricha torosa</i> Coast Range newt	None/None G4/S4 SSC	Coastal drainages from Mendocino County to San Diego County. Lives in terrestrial habitats & will migrate over 1 km to breed in ponds, reservoirs and slow moving streams.	Moderate Potential	Potentially suitable habitat occurs along the adjacent reclamation ditch. Coast range newts may use the urban creeks as dispersal corridors however, the urban nature of the reclamation ditch may preclude them from the study area.
Reptiles				
<i>Anniella pulchra</i> Northern California legless lizard	None/None G3/S3 SSC	Sandy or loose loamy soils under sparse vegetation. Soil moisture is essential. They prefer soils with a high moisture content.	Not Expected	No suitable habitat occurs in the study area.
<i>Emys marmorata</i> western pond turtle	None/None G3G4/S3 SSC	A thoroughly aquatic turtle of ponds, marshes, rivers, streams and irrigation ditches, usually with aquatic vegetation, below 6000 ft elevation. Needs basking sites and suitable (sandy banks or grassy open fields) upland habitat up to 0.5 km from water for egg-laying.	Moderate Potential	Potentially suitable habitat occurs within the adjacent reclamation ditch corridor.
<i>Phrynosoma blainvillii</i> coast horned lizard	None/None G3G4/S3S4 SSC	Frequents a wide variety of habitats, most common in lowlands along sandy washes with scattered low bushes. Open areas for sunning, bushes for cover, patches of loose soil for burial, and abundant supply of ants and other insects.	Not Expected	No suitable habitat occurs in the study area

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Thamnophis hammondi</i> two-striped gartersnake	None/None G4/S3S4 SSC	Coastal California from vicinity of Salinas to northwest Baja California. From sea to about 7,000 ft elevation. Highly aquatic, found in or near permanent fresh water. Often along streams with rocky beds and riparian growth.	Not Expected	No suitable habitat occurs in the study area
Birds				
<i>Agelaius tricolor</i> tricolored blackbird	None/ST G1G2/S1S2 SSC	Requires open water, protected nesting substrate, and foraging area with insect prey within a few km of the colony.	Not Expected	No suitable habitat occurs in the study area
<i>Aquila chrysaetos</i> golden eagle	None/None G5/S3 FP WL	Rolling foothills, mountain areas, sage-juniper flats, and desert. Cliff-walled canyons provide nesting habitat in most parts of range; also, large trees in open areas.	Not Expected	No suitable habitat occurs in the study area
<i>Asio flammeus</i> short-eared owl	None/None G5/S3 SSC	Found in swamp lands, both fresh and salt; lowland meadows; irrigated alfalfa fields. Tule patches/tall grass needed for nesting/daytime seclusion. Nests on dry ground in depression concealed in vegetation.	Not Expected	No suitable habitat occurs in the study area
<i>Athene cunicularia</i> burrowing owl	None/None G4/S3 SSC	Open, dry annual or perennial grasslands, deserts, and scrublands characterized by low-growing vegetation. Subterranean nester, dependent upon burrowing mammals, most notably, the California ground squirrel.	Moderate Potential	Suitable habitat occurs within the study area. There are occurrences 0.45 miles to the west and ground squirrels were observed in the nearby open space.
<i>Buteo swainsoni</i> Swainson's hawk	None/ST G5/S3	Breeds in grasslands with scattered trees, juniper-sage flats, riparian areas, savannahs, and agricultural or ranch lands with groves or lines of trees.	Not Expected	No suitable habitat occurs in the study area
<i>Charadrius nivosus</i> western snowy plover	FT/None G3T3/S2 SSC	Sandy beaches, salt pond levees, and shores of large alkali lakes. needs sandy, gravelly or friable soils for nesting.	Not Expected	No suitable habitat occurs in the study area
<i>Coturnicops noveboracensis</i> yellow rail	None/None G4/S1S2 SSC	Summer resident in eastern Sierra Nevada in Mono County. Freshwater marshlands.	Not Expected	No suitable habitat occurs in the study area
<i>Elanus leucurus</i> white-tailed kite	None/None G5/S3S4 FP	Rolling foothills and valley margins with scattered oaks & river bottomlands or marshes next to deciduous woodland. Open grasslands, meadows, or marshes for foraging close to isolated, dense-topped trees for nesting and perching.	Not Expected	No suitable habitat occurs in the study area

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Falco peregrinus anatum</i> American peregrine falcon	FD/SD G4T4/S3S4 FP	Near wetlands, lakes, rivers, or other water; on cliffs, banks, dunes, mounds; also, human-made structures. Nest consists of a scrape or a depression or ledge in an open site.	Not Expected	No suitable habitat occurs in the study area
<i>Rallus obsoletus</i> California Ridgway's rail	FE/SE G3T1/S1 FP	Salt water and brackish marshes traversed by tidal sloughs in the vicinity of San Francisco Bay. Associated with abundant growths of pickleweed however, feeds away from cover on invertebrates from mud-bottomed sloughs.	Not Expected	No suitable habitat occurs in the study area
<i>Riparia riparia</i> bank swallow	None/ST G5/S2	Colonial nester; nests primarily in riparian and other lowland habitats west of the desert. Requires vertical banks/cliffs with fine-textured/sandy soils near streams, rivers, lakes, ocean to dig nesting hole.	Not Expected	No suitable habitat occurs in the study area
<i>Vireo bellii pusillus</i> least Bell's vireo	FE/SE G5T2/S2	Summer resident of Southern California in low riparian in vicinity of water or in dry river bottoms; below 2000 ft. Nests placed along margins of bushes or on twigs projecting into pathways, usually willow, Baccharis, mesquite.	Not Expected	No suitable habitat occurs in the study area
Mammals				
<i>Antrozous pallidus</i> pallid bat	None/None G4/S3 SSC	Found in a variety of habitats including deserts, grasslands, shrublands, woodlands, and forests. Most common in open, dry habitats with rocky areas for roosting. Roosts in crevices of rock outcrops, caves, mine tunnels, buildings, bridges, and hollows of live and dead trees which must protect bats from high temperatures. Very sensitive to disturbance of roosting sites.	Not Expected	No suitable habitat occurs in the study area
<i>Corynorhinus townsendii</i> Townsend's big-eared bat	None/None G4/S2 SSC	Occurs throughout California in a wide variety of habitats. Most common in mesic sites, typically coniferous or deciduous forests. Roosts in the open, hanging from walls & ceilings in caves, lava tubes, bridges, and buildings. This species is extremely sensitive to human disturbance.	Not Expected	No suitable habitat occurs in the study area
<i>Neotoma macrotis luciana</i> Monterey dusky-footed woodrat	None/None G5T3/S3 SSC	Forest habitats of moderate canopy and moderate to dense understory. Also, in chaparral habitats. Nests constructed of grass, leaves, sticks, feathers, etc. Population may be limited by availability of nest materials.	Not Expected	No suitable habitat occurs in the study area

Scientific Name/ Common Name	Status	Habitat Requirements	Potential to Occur in Project Area	Habitat Suitability/Observations
<i>Sorex ornatus</i> <i>salaris</i> Monterey shrew	None/None G5T1T2/S1S2 SSC	Riparian, wetland, and upland areas in the vicinity of the Salinas River delta. Prefers moist microhabitats. feeds on insects & other invertebrates found under logs, rocks & litter.	Low Potential	Marginal habitat occurs adjacent to the study area however, the disturbed nature of the study area precludes the species from the project site.
<i>Taxidea taxus</i> American badger	None/None G5/S3 SSC	Most abundant in drier open stages of most shrub, forest, and herbaceous habitats, with friable soils. Needs sufficient food, friable soils and open, uncultivated ground. Preys on burrowing rodents. Digs burrows.	Not Expected	No suitable habitat occurs in the study area

Regional Vicinity refers to within a 6-quad search radius of site.

Status (Federal/State)

FE = Federal Endangered

FT = Federal Threatened

SE = State Endangered

ST = State Threatened

SR = State Rare

SD = State Delisted

SSC = CDFW Species of Special Concern

FP = CDFW Fully Protected

WL = CDFW Watch List

Other Statuses

G1 or S1 Critically Imperiled Globally or Subnationally (state)

G2 or S2 Imperiled Globally or Subnationally (state)

G3 or S3 Vulnerable to extirpation or extinction Globally or Subnationally (state)

G4/5 or S4/5 Apparently secure, common and abundant

Additional Notations may be provided as follows

T – Intraspecific Taxon (subspecies, varieties, and other designations below the level of species)

Q – Questionable taxonomy that may reduce conservation priority

Executive Summary

This report presents the results of a Transportation Analysis (TA) for the proposed residential development located at 1 Preston Street in Salinas, California. The project consists of a General Plan Amendment and Zoning Code Amendment to modify the existing vacant 2.6-acre lot at 1 Preston Street from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1). There is currently no development proposal. With full buildout and anticipating a density bonus, future development on the site may include the construction of up to 83 residential units.

Transportation Analysis Scope

The transportation analysis of the project was evaluated following the standards and methodologies of the City of Salinas. The transportation analysis will consist of a CEQA-level transportation analysis to determine environmental impacts related to Vehicle Miles Traveled (VMT) and a transportation operations analysis to determine local impacts to nearby transportation facilities within the project vicinity.

CEQA Transportation Analysis Scope

The CEQA transportation analysis for the project consists of a project-level VMT impact analysis using the City's VMT tool.

Transportation Operations Analysis Scope

The transportation operations analysis includes the evaluation of weekday AM and PM peak hour operations at a limited number of intersections for the purpose of identifying operational issues (queuing, signal operations, and potential multi-modal issues) at intersections in the general vicinity of the project site. However, the determination of project impacts per CEQA requirements is based solely on the VMT analysis.

CEQA VMT Analysis

CEQA Transportation Analysis Exemption Criteria

The City of Salinas *Draft SB 743 Implementation Policy* describes screening criteria that determines a non-significant transportation impact for development projects. The criteria are based on the type of project, characteristics, and/or location. The project does not meet the screening criteria described in the *Draft SB 743 Implementation Policy* and would be required to conduct a CEQA level VMT analysis.

Project-Level VMT Impact Analysis

The results of the VMT analysis, using the City's VMT analysis tool, indicate that the proposed project is projected to generate 10.53 VMT per capita. Therefore, the proposed project would have an impact on the transportation system based on the City's VMT impact criteria.

Project Impacts and Mitigation Measures

Project Impact: Since the VMT generated by the project (10.53 VMT per capita) would exceed the threshold of 9.7 VMT per capita, the project would result in a significant transportation impact on VMT. Therefore, mitigation measures are required to reduce the VMT impact.

Mitigation Measures: Implementation of the following project design measures would reduce the VMT generated by the project to VMT per capita of 9.95:

1. Higher Density: The project proposes to construct residential units at a higher density in an infill location. **and**
2. Pedestrian Network Improvements: The project could construct pedestrian facilities within the project site to connect the project site to existing pedestrian facilities on Preston Street. Creating safe pedestrian connections could encourage future residents to walk instead of drive. **and**
3. Include Bike Parking Per City Code: The project could provide bike parking on-site. Providing bike parking may encourage future residents to utilize bicycles as a mode of transportation instead of driving.

The implementation of the following TDM strategies would be required to further reduce the project impact to VMT to insignificant levels:

4. Reduce On-Site Parking: Reduce to the number of on-site parking spaces for residents to less than that which is required per the municipal code. **or**
5. Implement Unbundled Parking: Separate or unbundle parking costs from leases/property costs requiring those that wish to purchase parking spaces to do so at an additional cost. Unbundled parking also would require the implementation of residential permit parking zones in the project area at the expense of the developer. **or**
6. Affordable Housing: Provide below market-rate housing on-site. **or**
7. Voluntary Travel Behavior Change Program: The project could implement a travel behavior change program by offering incentives to future residents to utilize alternative transportation modes. The program would require 75% participation by residents. **and**
8. Promotions and Marketing: The project could provide future residents with information about alternative transportation and other TDM programs available to them at move in. The program would require 75% participation by residents. **and**
9. School Carpool Program: The project could implement a school carpool program. Residents would be provided information about the school carpool program at move-in. Interested residents would provide their contact information to similar families that have children at the same school.

Transportation Operations Analysis

The intersection operations analysis is intended to quantify the operations of intersections and to identify potential negative effects due to the addition of project traffic. However, a potential adverse effect on a study intersection operation is not considered a CEQA impact metric.

The transportation operations analysis includes the analysis of AM and PM peak-hour traffic conditions for one signalized intersection and two unsignalized intersections. The intersections were evaluated using Synchro software, utilizing the Highway Capacity Manual (HCM) 2010 methodology.

Trip Generation

Based on the trip generation rates published in the Institute of Transportation Engineers' (ITE) *Trip Generation Manual, 11th Edition*, it is estimated that the project would generate 377 daily vehicle trips, with 31 trips (7 inbound and 24 outbound) occurring during the AM peak hour and 32 trips (20 inbound and 12 outbound) occurring during the PM peak hour.

Intersection Operation Conditions

The operations analysis shows that the signalized intersection of N. Main Street/Rossi Street and the unsignalized intersection of Martella Street/Rossi Street would continue to operate at an acceptable LOS D or better during both the AM and PM peak hours with and without the project. The N. Main Street/Menke Street intersection would operate at an unacceptable LOS F during both peak hours with and without the project. The addition of project generated trips to the intersection would increase the average delay experienced by each vehicle on the worst-leg approach by 13.6 seconds during the AM peak hour. Due to the small number of vehicles traveling along Menke Street relative to the traffic along N. Main Street, improvements are not recommended as drivers have the option to use Martella Street to access Rossi Street and N. Main Street.

Table ES-1
Intersection Level of Service Summary

Study #	Intersection	Control	Peak Hour	Existing Conditions				
				No Project		with Project		Increase in Crit. Delay (sec)
				Avg. Delay ¹ (sec)	LOS	Avg. Delay ¹ (sec)	LOS	
1	N. Main Street & Menke Street	TWSC	AM	65.9	F	79.5	F	13.6
			PM	183.3	F	183.3	F	0.0
2	N. Main Street & Rossi Street	Signal	AM	28.9	C	29.1	C	0.2
			PM	31.3	C	31.6	C	0.3
3	Martella Street & Rossi Street	TWSC	AM	22.3	C	24.1	C	1.8
			PM	26.2	D	27.9	D	1.7

Notes:
¹ Average delay is reported for signalized intersections. Delay for the worst approach leg is reported for TWSC intersections.
Bold indicates a substandard level of service.
Bold indicates an adverse effect with the addition of project trips.

Unsignalized Intersection Control and Critical Gaps

Both the unsignalized intersections of N. Main Street/Menke Street and Martella Street/Rossi Street are stop-controlled along the minor street approaches. Since neither of the unsignalized study intersections meet the minimum threshold for minor streets, it can be concluded that the peak hour signal warrant is not met for either intersection. Field observations show that gaps in traffic are available during both peak hours at both intersections.

Pedestrian, Bicycle, and Transit Analysis

Pedestrian Facilities

Pedestrian generators in the project vicinity include commercial areas and bus stops along N. Main Street and Rossi Street. Downtown Salinas is located approximately ½-mile walking distance from the project site.

Pedestrian facilities in the project vicinity include sidewalks, crosswalks, and pedestrian signals at the signalized study intersection. The sidewalk is discontinuous on the south and west side of Preston Street and Martella Street, respectively. Additionally, a sidewalk and curb ramp are missing at the southeast corner of the Martella Street/Menke Street intersection. Although sidewalks are missing along some property frontages along Preston Street, Martella Street, and Menke Street, a continuous sidewalk connects the project site to N. Main Street, which provides access to additional pedestrian facilities and to nearby points of interest.

The project proposes a general plan amendment which would allow construction of buildings that would be either row houses, condominiums, or apartments. Since a site plan has not yet been proposed, the final site plan should be designed to include sidewalks, pathways, and curb ramps connecting buildings to existing pedestrian facilities on Preston Street.

Bicycle Facilities

Bicycle facilities in the project vicinity include bike paths, bike lanes, and bike routes. The project site is not directly served by any bicycle facilities. However, Preston Street and Martella Street carry low volume and is conducive to bicyclists. Existing bike lanes along Rossi Street connect the project vicinity to other bicycle facilities and nearby points of interest.

The Monterey County Active Transportation Plan identifies future improvements to bicycle facilities in the project vicinity. A planned Class I share use path is proposed between Market Street and Rossi Street, opposite from Martella Street. This would provide a safe bicycle connection between the project site to the downtown Salinas area without needing to head west to Davis Road. The project would not remove any bicycle facilities, nor would it conflict with any adopted plans or policies for new bicycle facilities.

Transit Facilities

The project site is adequately served by existing MST transit services. Within the project vicinity, bus routes run along N. Main Street and Rossi Street. The project site is primarily served by five MST bus routes (Routes 23, 29, 44, 49, and 95). The nearest bus stops to the project site are located along both sides of Main Street (at Rossi Street), approximately ¼-mile from the project site. Additionally, the Salinas Amtrak station and the Salinas Transit Center are located approximately 0.6-mile from the project site. The new transit trips generated by the project are not expected to create demand in excess of the transit service that is currently provided. The project would not remove any transit facilities, nor would it conflict with any adopted plans or policies for new transit facilities.

1.

Introduction

This report presents the results of a Transportation Analysis (TA) for the proposed residential development located at 1 Preston Street in Salinas, California. The site is located at the western end of Preston Street. The project site location and surrounding study area are shown on Figure 1.

The project consists of a General Plan Amendment and Zoning Code Amendment to modify the existing vacant 2.6-acre lot at 1 Preston Street from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1). The maximum potential buildout of the site was evaluated as part of this traffic analysis since there currently is no development proposal. With full buildout and anticipating a density bonus, future development on the site may include the construction of up to 83 residential units.

Transportation Policies

Draft SB 743 Implementation Policy

Historically, traffic impact analysis has utilized vehicular delay to identify traffic impacts and potential roadway improvements to relieve traffic congestion that may result due to proposed/planned growth. However, the State of California has recognized the limitations of measuring and mitigating only vehicle delay at intersections and in 2013 passed Senate Bill (SB) 743, which requires jurisdictions to stop using congestion and delay metrics, such as Level of Service (LOS), as the measurement for CEQA transportation analysis. With the adoption of SB 743 legislation, public agencies are now required to base the determination of transportation impacts on Vehicle Miles Traveled (VMT) rather than level of service (LOS).

In adherence to SB 743, the City of Salinas has adopted a new Transportation Analysis Policy, the City of Salinas *Draft SB 743 Implementation Policy*. The policy establishes the thresholds for transportation impacts under the CEQA based on VMT instead of LOS. The intent of this change is to shift the focus of transportation analysis under CEQA from vehicle delay and roadway auto capacity to a reduction in vehicle emissions, and the creation of robust multimodal networks that support integrated land uses. All new development projects are required to analyze transportation impacts using the VMT metric and conform to the *Draft SB 743 Implementation Policy*.

General Plan Goals & Policies

The Circulation Element of the *City of Salinas General Plan* includes a set of balanced, long-range, multi-modal transportation goals and policies that provide for a transportation network that is safe, efficient, and sustainable (minimizes environmental, financial, and neighborhood impacts). These transportation goals and policies are intended to improve multi-modal accessibility to all land uses and create a city where people are less reliant on driving to meet their daily needs. The 2002 General Plan

contains the following policies to encourage the use of non-automobile transportation modes to minimize vehicle trip generation and reduce VMT:

- Use traffic calming methods within residential areas where necessary to create a pedestrian-friendly circulation system (C-1.8);
- Encourage car-pooling, at government offices, business, schools, and other facilities, to reduce the number of vehicles using the roadway system (C1.9);
- Urge a countywide approach to Transportation Demand Management (TDM) and Transportation Systems Management (TSM) as the best way to reduce peak-hour vehicle trips and congestion at major employment centers. (C2.1);
- Work with Caltrain and Amtrak to provide commuter rail service to the Silicon Valley and other major destinations to provide alternatives to automobile use (C-2.5);
- Support continued maintenance and expanded use of the City's Intermodal Transportation Center (C-2.7);
- Support Monterey-Salinas Transit initiatives to provide adequate and improved public transportation service (C-3.1);
- Design development and reuse/revitalization projects to be transit-oriented to promote the use of alternative modes of transit and support higher levels of transit service (C 3.2);
- Support the extension of commuter rail to Salinas to allow for alternatives to automobile use. (C 3.3);
- Support public transportation that is "bike" friendly, such as buses with bicycle racks and reduced fares for bicycle riders and provision of bicycle racks at public transportation stations (C-3.4);
- Continue to develop a network of on- and off-street bicycle routes to encourage and facilitate the use of bicycles for commute, recreational, and other trips. Eliminate gaps and provide connections between existing bicycle routes (C-4.1);
- Increase availability of facilities, such as bike racks and well-maintained and well-lit bike lanes, that promote bicycling (C-4.2);
- Encourage existing businesses and require new construction to provide on-premise facilities to aid bicycle commuters, such as on-site safe bicycle parking (C-4.3);
- Improve the biking environment by providing safe and attractive cut-through, bike lanes, and bike paths for both recreational and commuting purposes (C-4.4);
- Ensure that all pedestrian and bicycle route improvements meet the Americans with Disabilities Act (ADA) standards for accessibility, and Caltrans standards for design (C-4.5);
- Encourage parking lot designs that provide for safe and secure bicycle parking (C-4.6);
- Increase availability of safe and well-maintained sidewalks in all areas of the City (C-5.1);
- Ensure that all pedestrian route improvements meet with ADA standards for accessibility (C-5.3) ;
- Encourage parking lot designs that promote pedestrian access and safety (C-5.4);
- Improve the walking environment by providing safe and attractive sidewalks, cut-throughs, and walkways, for both recreational and commuting purposes (C-5.5)

Transportation Analysis Scope

The TA consists of a California Environmental Quality Act (CEQA) required vehicle-miles-traveled (VMT) analysis and a supplemental traffic operations analysis that demonstrates the project's consistency with the *City of Salinas General Plan* goals and policies. The TA was evaluated following the standards and methodologies set forth in the City of Salinas *Draft SB 743 Implementation Policy* and by the California Environmental Quality Act (CEQA).

CEQA Transportation Analysis Scope

The CEQA transportation analysis for the project consists of a project-level VMT impact analysis using the City's VMT tool. The City's VMT analysis tool was developed to streamline the analysis for development projects with common land uses such as residential, office and industrial uses.

The City of Salinas *Draft SB 743 Implementation Policy* establishes procedures for determining project impacts on VMT based on project description, characteristics, and/or location. The policy also includes screening criteria that are used to identify types, characteristics, and/or locations of projects that would not exceed the CEQA thresholds of significance. If a project meets the City's screening criteria, the project is expected to result in less-than-significant VMT impacts and a detailed CEQA VMT analysis is not required. However, the proposed project will not meet all applicable VMT screening criteria. Therefore, a CEQA-level transportation analysis that evaluates the project's effects on VMT is required and is presented in Chapter 3.

Transportation Operations Analysis Scope

The current General Plan, *City of Salinas General Plan*, adopted in September 2002 uses Level of Service (LOS) as its primary metric for the evaluation of the projected operation of the City's roadway system. Therefore, a traffic operations analysis based upon peak hour intersection level of service analysis is included for consistency with the General Plan goals and policies. The transportation operations analysis supplements the CEQA VMT analysis and identifies transportation and traffic operational issues that may arise due to a development project. However, the determination of project impacts per CEQA requirements is based solely on the VMT analysis.

The transportation operations analysis includes the evaluation of weekday AM and PM peak hour operations at a limited number of intersections for the purpose of identifying operational issues (queuing, signal operations, and potential multi-modal issues) at intersections in the general vicinity of the project site. The transportation operations analysis also includes signal warrant analyses and critical gap evaluation at unsignalized intersections. An evaluation of potential project impacts on bicycle, pedestrian, and transit facilities is also included.

The study intersections were selected in coordination with City staff and are listed below and are shown on Figure 1.

Study Intersections

1. North Main Street and Menke Street (unsignalized)
2. North Main Street and Rossi Street
3. Rossi Street and Martell Street (unsignalized)

The effects of the proposed development on traffic operations on the surrounding roadway system were evaluated following the standards and methodologies set forth by the City of Salinas General Plan.

Report Organization

The remainder of this report is divided into four chapters. Chapter 2 describes existing transportation system including the existing roadway network, transit service, bicycle and pedestrian facilities. Chapter 3 describes the CEQA transportation analysis, including the VMT analysis methodology, baseline and potential project VMT impacts, and required mitigation measures to reduce any VMT impacts. Chapter 4 describes the transportation operations analysis including the method by which project traffic is estimated, intersection operations analysis methodology, any adverse intersection

traffic effects caused by the project, and effects on bicycle, pedestrian, and transit facilities. Chapter 5 presents the conclusions of the transportation analysis.

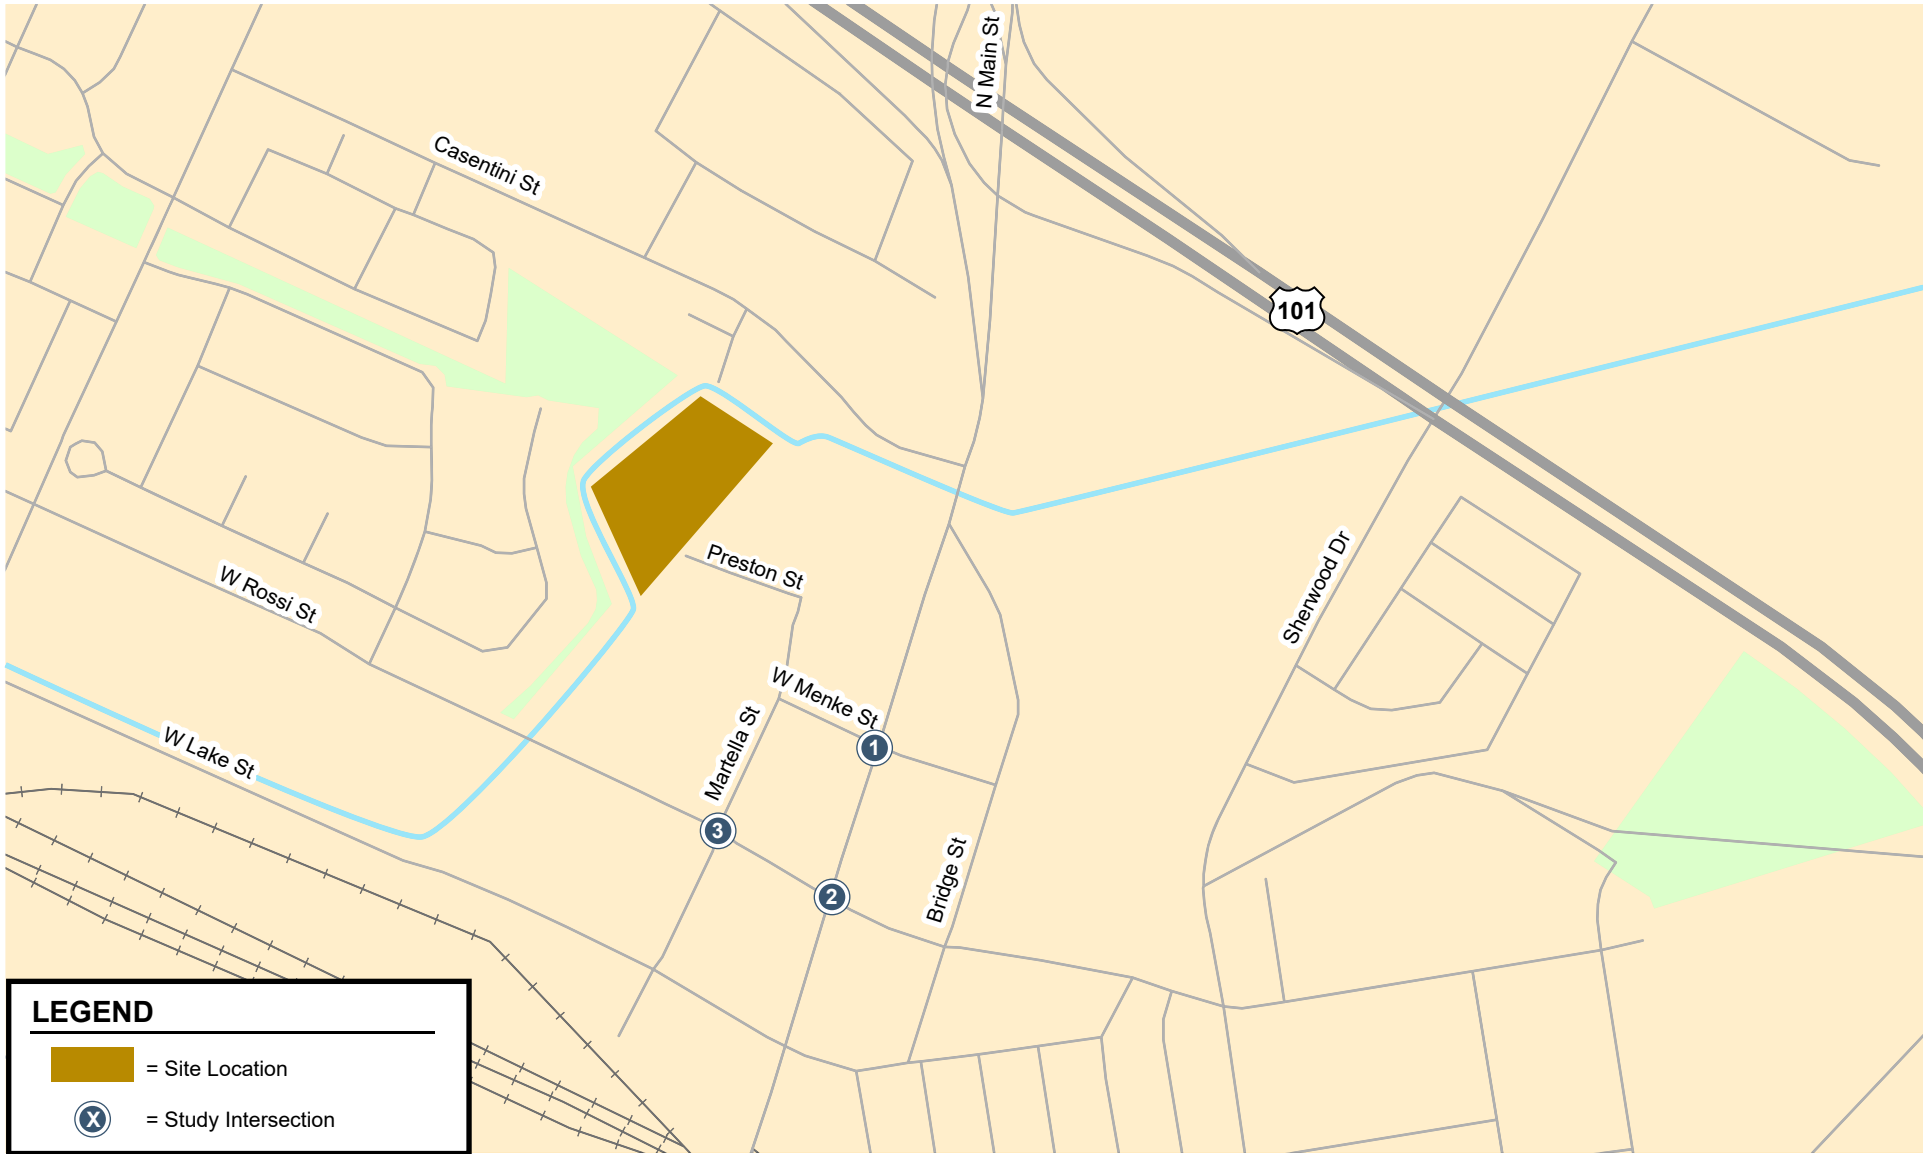

Figure 1
Site Location

2.

Existing Transportation System

This chapter describes the existing transportation system within the study area of the project. It describes transportation facilities in the vicinity of the project site, including the roadway network, transit services, and pedestrian and bicycle facilities.

Existing Roadway Network

Regional access to the project site is provided via US-101, SR-68, and SR 183. These facilities are described below.

US-101 is a four-lane freeway in the vicinity of the site. US 101 extends north to Gilroy and the San Francisco Bay Area and south to King City, central California, and the Los Angeles area. Access to the site is provided via its interchange at Main Street.

SR-68 is a four-lane highway with a two-way left-turn median between Blanco Road and Portola Drive. South of Portola Drive, the roadway narrows to two lanes with a two-way left-turn lane. SR 68 extends north to US-101 in Salinas and south to the Monterey Bay Peninsula. SR-68 runs along South Main Street and John Street in the City of Salinas. Access from SR-68 to the project site is provided via Main Street and North Main Street.

SR-183 is a two-lane highway west of the city of Salinas. SR 183 widens to four lanes and runs along Market Street and North Main Street within the City of Salinas. It extends east to US-101 in Salinas and west to SR-1 near Moss Landing. Access from SR-183 to the project site is provided via Rossi Street and Menke Street.

Local access to the site is provided by North Main Street, West Rossi Street, West Menke Street, Martella Street and Preston Street. These roadways are described below.

North Main Street is a four-lane north-south roadway in the vicinity of the project site. North Main Street is the primary north-south roadway within the city of Salinas and connects North Salinas and US-101 to the downtown area. In the project vicinity, North Main Street has a posted speed limit of 40 mph with sidewalks and on-street parking on both sides of the street and no bike lanes. Access to the project site from North Main Street is provided via Rossi Street and Menke Street.

West Rossi Street is a two-lane east-west roadway in the vicinity of the project site and extends between North Davis Road and Sherwood Drive. Sidewalks and bike lanes are present along both sides of West Rossi Street. In the project vicinity, parking is permitted on the north side of West Rossi Street, west of Martella Street. Access to the project site from West Rossi Street is provided via Martella Street.

West Menke Street is a two-lane east-west roadway that extends between Bridge Street and Martella Street in the vicinity of the project site. A continuous sidewalk is present along the north side of West Menke Street. Parking is permitted on both sides of West Menke Street. Access to the project site from West Menke Street is provided via Martella Street.

Martella Street is a two-lane north-south roadway in the vicinity of the project site extending between West Lake Street and Preston Street. Intermittent sidewalks are present along both sides of Martella Street. Parking is permitted on both sides of Martella Street. Access to the project site from Martella Street is provided via Preston Street.

Preston Street is a two-lane east-west roadway in the vicinity of the project site. A sidewalk is present on the north side of Preston Street. Parking is permitted on both sides of Preston Street. The proposed project site is located at the west end of Preston Street.

Existing Pedestrian, Bicycle and Transit Facilities

The existing bicycle, pedestrian, and transit facilities in the study area are described below.

Existing Pedestrian Facilities

Pedestrian facilities near the project site consist mostly of sidewalks along the streets in the study area. Sidewalks are missing along several property frontages along Preston Street, Martella Street, and Menke Street. However, a continuous sidewalk connects the project site to Main Street, which is the nearest major street in the vicinity. Other pedestrian facilities in the project area include crosswalks and pedestrian push buttons at the signalized study intersection of North Main Street and Rossi Street. At the intersection of North Main Street and Menke Street, marked crosswalks are present along the west and east legs. At the intersection of Martella Street and Rossi Street, marked crosswalks are present along the north and east legs.

Overall, the existing network of sidewalks and crosswalks provides adequate connectivity and provides pedestrians with safe routes to transit services and other points of interest in the area.

Existing Bicycle Facilities

There are several bicycle facilities in the vicinity of the project site. Bicycle facilities are divided into the following three classes of relative significance:

Class I Bikeway (Bike Path). Class I bikeways are bike paths that are physically separated from motor vehicles and offer two-way bicycle travel on a separate path. The Rossi Rico Parkway is in the vicinity of the project site and connects Rossi Street to Davis Road. The nearest access to the bike path is along Rossi Street, approximately 1,500 feet from the project site.

Class II Bikeway (Bike Lane). Class II bikeways are striped bike lanes on roadways that are marked by signage and pavement markings. Within the vicinity of the project site, striped bike lanes are present on Rossi Street, between Davis Road and Sherwood Drive.

Class III Bikeway (Bike Route). Class III bikeways are bike routes and only have signs to help guide bicyclists on recommended routes to certain locations. In the vicinity of the project site, the following roadway segments are designated as bike routes.

- Rice Street, between Rossi Street and Larkin Street
- Casentini Street, between Main Street and Rico Street

The existing bicycle facilities are shown in Figure 2.

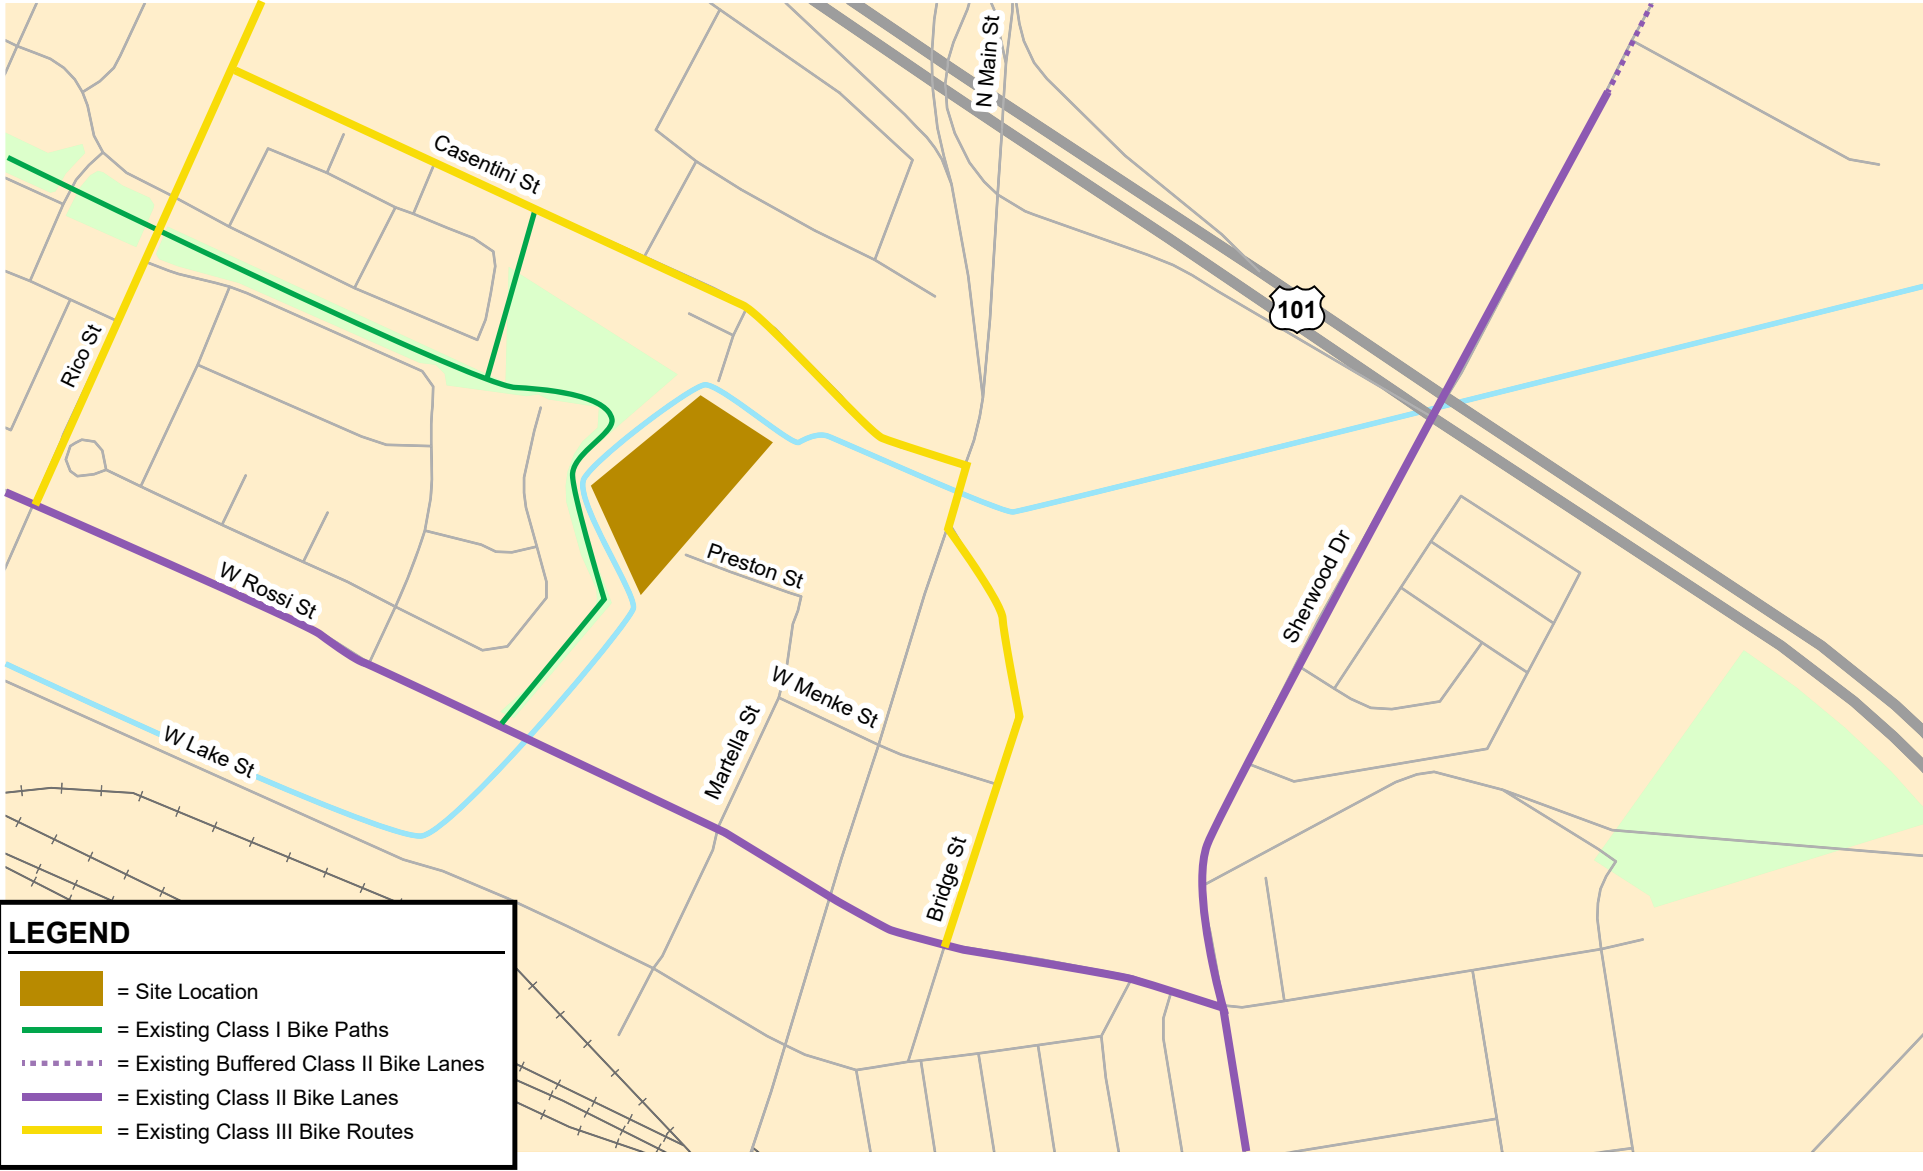

Figure 2
Existing Bicycle Facilities

Existing Transit Services

Existing transit services in the study area are provided by Monterey-Salinas Transit (MST) and are shown on Figure 3. The Salinas Amtrak station is located ½-mile from the project site and provides train and connecting bus services from Amtrak. Amtrak services are limited at Salinas station, providing one daily service in each direction via the Coast Starlight. Amtrak provides connecting bus services to train stations towards the north several times daily.

Monterey-Salinas Transit Bus Service

The project site is primarily served by five MST bus routes (Routes 23, 29, 44, 49 and 95). These bus routes are listed in Table 1, including their terminus points and headways. The nearest bus stops to the project site are located along both sides of Main Street (just south of Rossi Street), approximately ¼-mile from the project site. It should be noted that although headways are long, these routes all run along Main Street in the city of Salinas, connecting the downtown area and project site to areas in the northern part of the city, north of US 101.

Table 1
Existing Transit Services

Transit Route	Route Description	Hours of Operation	Headway ¹
Route 23	Salinas to King City	6:45 am - 10:00 pm	60 mins
Route 29	Watsonville to Salinas via Prunedale	5:45 am - 7:00 pm	120 mins
Route 44	Northridge to Salinas	6:30 am - 6:15 pm	75 mins
Route 49	Santa Rita via Northridge	6:15 am - 10:00 pm	60 mins
Route 95	Williams Ranch to Northridge	9:30 am - 5:15 pm	120 mins

Notes:
¹ Approximate headways during peak commute periods.

Figure 3
Existing Transit Services

3.

CEQA VMT Evaluation

This chapter describes the CEQA transportation analysis, including the VMT analysis methodology and significance criteria, potential project impacts on VMT, and mitigation measures recommended to reduce significant impacts. Pursuant to Senate Bill (SB) 743, the California Environmental Quality Act (CEQA) 2019 Update Guidelines Section 15064.3, subdivision (b) states that VMT will be the metric in analyzing transportation impacts for land use projects for CEQA purposes

VMT Evaluation Methodology and Criteria

The effects of the proposed project on VMT were evaluated using the methodology outlined in the City of Salinas *Draft SB 743 Implementation Policy*.

VMT is the total miles of travel by personal motorized vehicles a project is expected to generate in a day. VMT measures the full distance of personal motorized vehicle trips with one end within the project. Typically, development projects that are farther from other, complementary land uses (such as a business park far from housing) and in areas without transit or active transportation infrastructure (bike lanes, sidewalks, etc.) generate more driving than development near complementary land uses with more robust transportation options. Therefore, developments located in a central business district with high density and diversity of complementary land uses and frequent transit services are expected to internalize trips and generate shorter and fewer vehicle trips than developments located in a suburban area with low density of residential developments and no transit service in the project vicinity.

VMT Tool

To determine whether a project would result in CEQA transportation impacts related to VMT, the City has developed a VMT Analysis Tool. The VMT tool identifies the existing average VMT per capita and VMT per employee for an identified project area. Based on the project location, type of development, project description, and proposed trip reduction measures, the VMT analysis tool calculates the project VMT. Projects located in areas where the existing VMT is above the established threshold are referred to as being in “high-VMT areas”. Projects that exceed the City’s thresholds of significance are required to include VMT reduction measures that would reduce the project VMT to the greatest extent possible.

VTM Policies and Impact Criteria

In adherence to SB 743, the City of Salinas has adopted its *Draft SB 743 Implementation Policy*. The policy aligns with the Governor's Office of Planning and Research (OPR) *Technical Advisory on Evaluating Transportation Impacts in CEQA*, December 2018.

Per OPR's technical advisory, VMT per resident (capita) is the recommended metric to evaluate CEQA-related transportation impacts for residential land uses. As stated in the technical advisory, OPR recommends an impact threshold of 15% below the existing VMT levels for residential land uses. OPR allows the existing VMT to be measured as regional or citywide VMT per capita. Therefore, the City's policy has established 15% below the county-wide residential VMT per capita as the impact threshold for residential uses in the city. The VMT Evaluation Tool indicates that the countywide average VMT per capita is currently 11.40. Thus, the project will result in a significant impact if it results in project generated VMT of 9.7 VMT per capita or greater.

If a project is found to have a significant impact on VMT, the impact must be reduced by modifying the project to reduce its VMT to an acceptable level (below the established thresholds of significance applicable to the project) and/or mitigating the impact through mitigation measures, which can include implementing a TDM program.

The VMT analysis tool evaluates a list of selected VMT reduction measures that can be applied to a project to reduce the project VMT. The VMT reduction measures include Transportation Demand Management (TDM) strategies in the following categories:

1. Parking
2. Transit
3. Communication and Information
4. Commuting
5. Shared Mobility
6. Bicycle Infrastructure
7. Neighborhood Enhancement
8. Miscellaneous
9. Land Use

Project-Level VMT Impact Analysis

The results of the VMT analysis, using the City's VMT analysis tool, indicate that the proposed project is projected to generate VMT per capita (10.53), which would exceed the impact threshold of 9.7 VMT per capita. Therefore, the proposed project would have an impact on the transportation system based on the City's VMT impact criteria. The VMT Evaluation Tool output is shown in Figure 4 and also can be found in Appendix A.

Project Impacts and Mitigation Measures

Project Impact: Since the VMT generated by the project (10.53 VMT per capita) would exceed the threshold of 9.7 VMT per capita, the project would result in a significant transportation impact on VMT. Therefore, mitigation measures are required to reduce the VMT impact. Per the city's impact thresholds, the project would need to implement VMT reduction measures to achieve an 8 percent reduction (10.53 to 9.7) in its VMT per capita for the proposed residential uses to reduce its impact to less than significant levels.

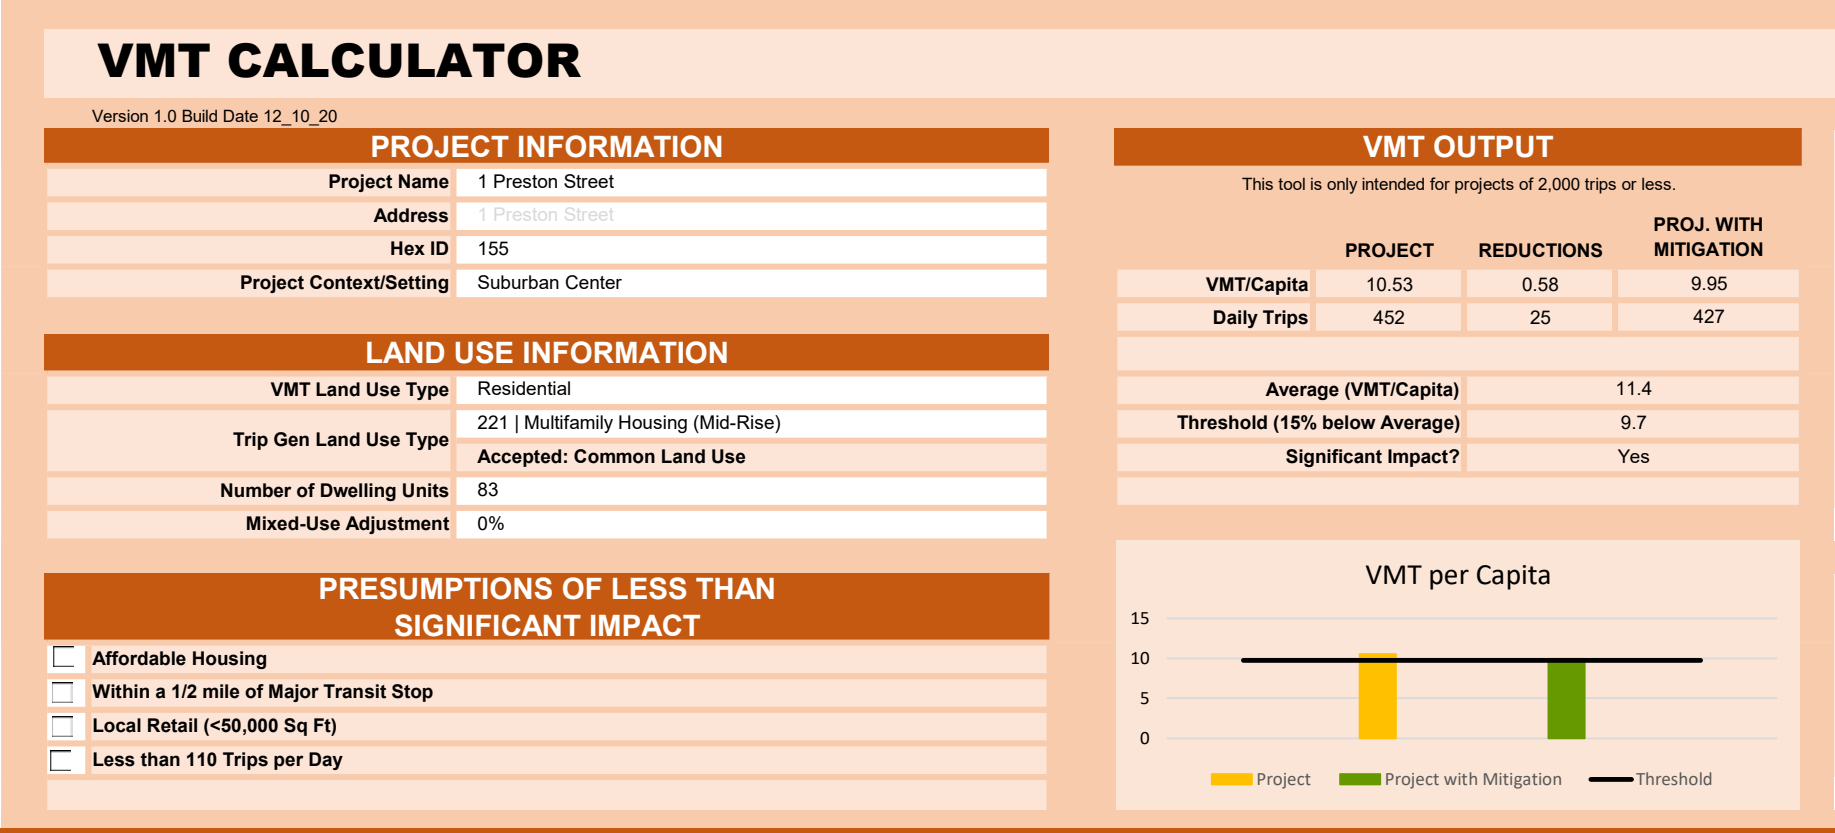

Figure 4
VMT Tool Output Summary

Mitigation Measures: Based on City's VMT policy and analysis tool, the following Travel Demand Management (TDM) strategies could be implemented to reduce the project's impact to a less than significant level. The mitigation measures and the resulting VMT are summarized in Table 2.

Implementation of the following project design measures would reduce the VMT generated by the project to VMT per capita of 9.95:

1. Higher Density: The project proposes to construct residential units at a higher density in an infill location. **and**
2. Pedestrian Network Improvements: The project could construct pedestrian facilities within the project site to connect the project site to existing pedestrian facilities on Preston Street. Creating safe pedestrian connections could encourage future residents to walk instead of drive. **and**
3. Include Bike Parking Per City Code: The project could provide bike parking on-site. Providing bike parking may encourage future residents to utilize bicycles as a mode of transportation instead of driving.

The implementation of the following TDM strategies would be required to further reduce the project impact to VMT to insignificant levels:

4. Reduce On-Site Parking: Reduce to the number of on-site parking spaces for residents to less than that which is required per the municipal code. **or**
5. Implement Unbundled Parking: Separate or unbundle parking costs from leases/property costs requiring those that wish to purchase parking spaces to do so at an additional cost. Unbundled parking also would require the implementation of residential permit parking zones in the project area at the expense of the developer. **or**
6. Affordable Housing: Provide below market-rate housing on-site. **or**
7. Voluntary Travel Behavior Change Program: The project could implement a travel behavior change program by offering incentives to future residents to utilize alternative transportation modes. The program would require 75% participation by residents. **and**
8. Promotions and Marketing: The project could provide future residents with information about alternative transportation and other TDM programs available to them at move in. The program would require 75% participation by residents. **and**
9. School Carpool Program: The project could implement a school carpool program. Residents would be provided information about the school carpool program at move-in. Interested residents would provide their contact information to similar families that have children at the same school.

Table 2
VTM Mitigation Measures and Resulting VMT

Item	Mitigation	Mitigation Description	VTM per Capita	VTM Threshold	VTM Impact?
1	Project	None	10.53	9.7	Yes
2	Higher Density, Pedestrian Network Improvements, and Include Bike Parking Per City Code	The project proposes to construct residential units at a higher density in an infill location, construct pedestrian facilities within the project site that would connect to the existing pedestrian network, and provide bike parking on-site.	9.95	9.7	Yes
3	Item 2 and Reduce On-site Parking	Reducing on-site parking spaces less than what is required per the municipal code	(9.53) varies ¹	9.7	No
4	Item 2 and Implement Unbundled Parking	Unbundle parking costs from leases/property costs.	(9.7) varies ²	9.7	No
5	Affordable Housing	The project could provide a high percentage of affordable housing units, as defined by the City of Salinas, could result in a less-than significant impact on VMT.	n/a	9.7	No
6	Item 2 and Implement Voluntary Travel Behavior Change Program, Promotions and Marketing, and School Carpool Program	<p><u>Voluntary Travel Behavior Change Program</u> - Implement a travel behavior change program by offering incentives to future residents to utilize alternative transportation modes.</p> <p><u>Promotions and Marketing</u> - Implement marketing/educational campaigns that promote the use of transit, carpooling, school pools, and travel through active modes. Strategies may include welcome packets for new residents, on-line portal to access information, and event promotions.</p> <p><u>School Carpool Program</u> - Implement a School Carpool Program. Residents would be provided information upon move-in. Interested residents would provide their contact information to similarly interested families.</p>	9.62	9.7	No

Notes:

¹ Since a breakdown of units and their sizes has not yet been proposed, the number of required spaces is unknown. Based on a requirement of 2 spaces per unit, reducing the parking supply to one space per unit would result in 9.53 VTM per capita.

² VTM reduction is varied based on the amount charged for a parking space. Implementing a \$20 charge for parking would reduce the VTM per capita to 9.7

4.

Transportation Operations Analysis

This chapter describes the transportation operations analysis including the method by which project traffic is estimated, intersection operations analysis for existing and existing plus project scenarios, any adverse effects on study intersections caused by the project, and effects on bicycle, pedestrian, and transit facilities, and parking.

The transportation operations analysis provides supplemental analysis for use by the City of Salinas in identifying adverse effects related to the proposed project and to identify potential improvements to the transportation system. The transportation operations analysis supplements the CEQA VMT analysis and identifies transportation and traffic operational issues that may arise due to a development project. The determination of project impacts per CEQA requirements is based solely on the VMT analysis presented in the previous chapter.

Project Description

There currently is no development proposal for the vacant project site. Therefore, the maximum potential buildout of the site was evaluated as part of this traffic analysis. With full buildout and anticipating a density bonus, future development on the site may include the construction of up to 83 residential units. The lot can be accessed at the west end of Preston Street.

Project Trip Estimates

The magnitude of traffic produced by a new development and the locations where that traffic would appear are estimated using a three-step process: (1) trip generation, (2) trip distribution, and (3) trip assignment. In determining project trip generation, the magnitude of traffic entering and exiting the site is estimated for the AM and PM peak hours. As part of the project trip distribution, the directions to and from which the project trips would travel are estimated. In the project trip assignment, the project trips are assigned to specific streets and intersections. These procedures are described below.

Trip Generation

Through empirical research, data have been collected that indicate the amount of traffic that can be expected to be generated by common land uses. Project trip generation was estimated by applying to the size and uses of the development the appropriate trip generation rates. The average trip generation rates for Multi-Family Housing – Mid Rise (Land Use 221) as published in the Institute of Transportation Engineers (ITE) *Trip Generation Manual, 11th Edition* (2021) were applied to the proposed residential development.

Based on the trip generation rates, it is estimated that the project would generate 377 daily vehicle trips, with 31 trips (7 inbound and 24 outbound) occurring during the AM peak hour and 32 trips (20 inbound and 12 outbound) occurring during the PM peak hour. The project trip generation estimates are presented in Table 3.

Table 3
Project Trip Generation Estimates

Land Use	Size	Daily Trips		AM Peak Hour						PM Peak Hour						
		Rate	Trip	Split			Trip			Rate	Split			Trip		
				In	Out	Total	In	Out	Total		In	Out	Total			
Proposed Land Uses																
#221 - Multifamily Housing (Mid-Rise)	83	Dwelling Units	4.540	377	0.370	23%	77%	7	24	31	0.390	61%	39%	20	12	32
Source: ITE Trip Generation Manual, 11 th Edition 2021.																

Trip Distribution and Trip Assignment

The trip distribution pattern for the project was developed based on existing travel patterns on the surrounding roadway system and the locations of complementary land uses. The peak-hour vehicle trips generated by the project were assigned to the roadway network in accordance with the trip distribution pattern. Figure 5 shows the trip distribution pattern and net trip assignment of project traffic on the local transportation network.

Intersection Operations Methodology

This section presents the methods used to evaluate traffic operations at the study intersections. It includes descriptions of the data requirements, the analysis methodologies, the applicable level of service standards, and the criteria defining adverse effects at the study intersections.

The intersection operations analysis is intended to quantify the operations of intersections and to identify potential negative effects due to the addition of project traffic. However, a potential adverse effect on a study intersection is not considered a CEQA impact metric.

Traffic conditions at the study intersections were analyzed for both the weekday AM and PM peak hours of adjacent street traffic. The AM peak hour typically occurs between 7:00 AM and 9:00 AM and the PM peak hour typically occurs between 4:00 PM and 6:00 PM on a regular weekday. These are the peak commute hours during which most weekday traffic congestion occurs on the roadways in the study area. The study includes the analysis of one signalized intersection and two unsignalized intersections within the City of Salinas. The study intersections were selected in coordination with City staff and are listed below and are shown on Figure 6.

Study Intersections

1. North Main Street and Menke Street (unsignalized)
2. North Main Street and Rossi Street
3. Rossi Street and Martell Street (unsignalized)

Study Scenarios

Intersection operations conditions were evaluated for the following scenarios:

- **Existing Conditions.** Existing conditions represent existing peak-hour traffic volumes on the existing roadway network. Existing AM and PM peak hour traffic volumes at all study intersections were obtained from new traffic counts.

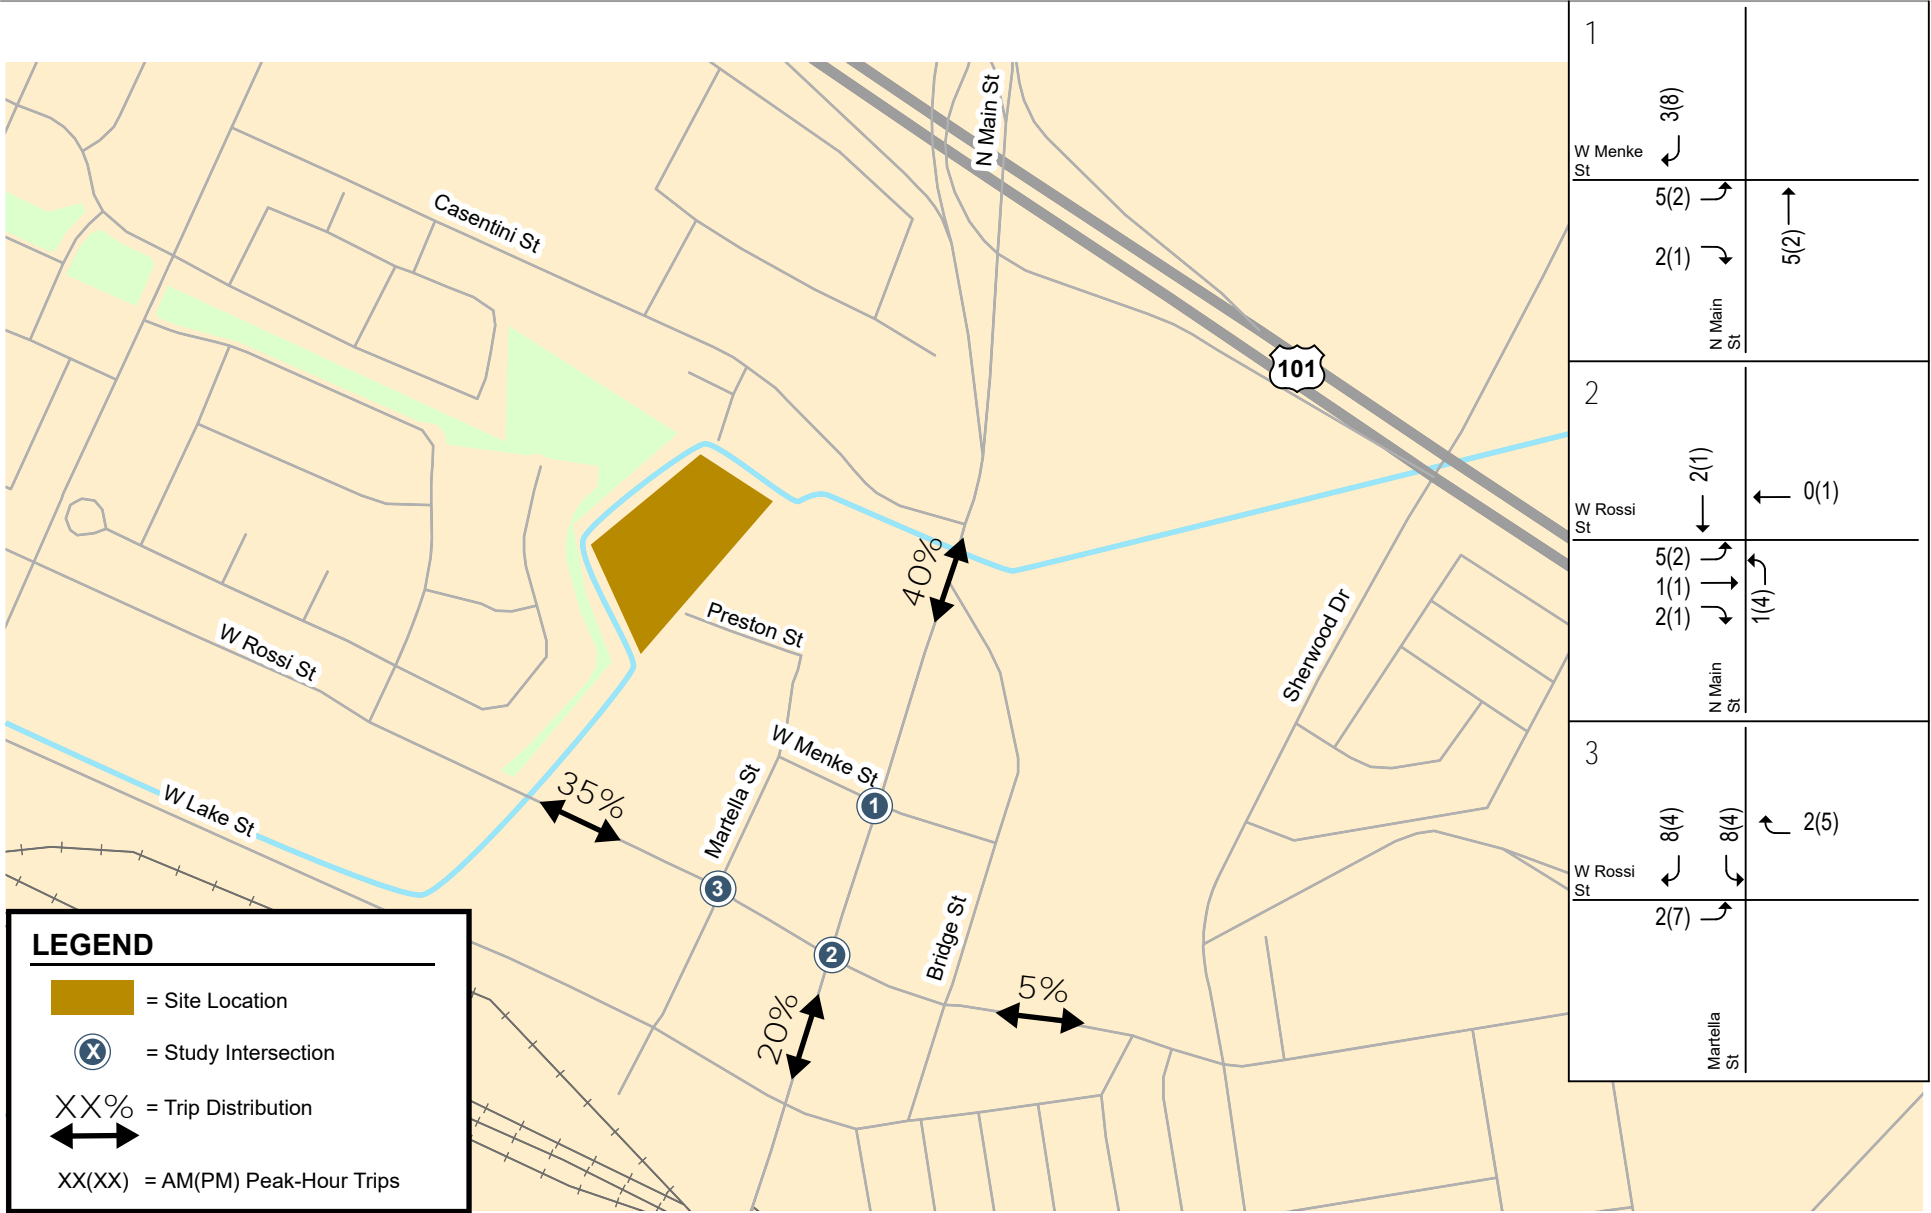

Figure 5
Project Trip Distribution and Assignment

- **Existing Plus Project Conditions.** Existing plus project conditions represent existing peak-hour traffic volumes on the existing roadway network with the addition of traffic generated by the proposed project assuming the project was completed and occupied today. Existing plus project conditions were evaluated relative to existing conditions to determine potential project impacts on the existing transportation network attributable to the project only.

Data Requirements

The data required for the analysis were obtained from new traffic counts and field observations. The following data were collected from these sources:

- existing traffic volumes
- existing lane configurations
- signal timing and phasing

Lane Configurations

The existing lane configurations at the study intersections were determined by observations in the field and are shown on Figure 7. It is assumed in this analysis that the roadway network and intersection configurations under the existing plus project would be the same as described under existing conditions.

Traffic Volumes

Existing Conditions

Existing peak hour traffic volumes at all signalized study intersections were obtained from new traffic counts collected in January 2022. The existing peak-hour intersection volumes are shown on Figure 8. Intersection turning-movement counts conducted for this analysis are presented in Appendix B.

Existing plus Project Conditions

Project trips were added to existing traffic volumes to obtain existing plus project traffic volumes (see Figure 9).

Intersection Level of Service Standards and Analysis Methodologies

Traffic conditions at the study intersections were evaluated using level of service (LOS). *Level of Service* is a qualitative description of operating conditions ranging from LOS A, or free-flow conditions with little or no delay, to LOS F, or jammed conditions with excessive delays. The analysis methods are described below.

Study intersections were evaluated based on the *2010 Highway Capacity Manual* (HCM) level of service methodology using Synchro software. This method evaluates intersection operations on the basis of average control delay time for all vehicles at the intersection. The correlation between average control delay and level of service at signalized intersections is shown in Table 4. The correlation between control delay and level of service at unsignalized intersections is shown in Table 5.

City of Salinas Intersection Operations Adverse Effects

An adverse effect on signalized intersection operations occurs if for either peak hour:

1. The addition of project traffic causes operations to deteriorate from an acceptable level (LOS D or better) to an unacceptable level, or
2. The addition of project traffic adds one vehicle trip to intersections already operating at an unacceptable level (LOS E or F).

Figure 6
Existing Lane Configurations

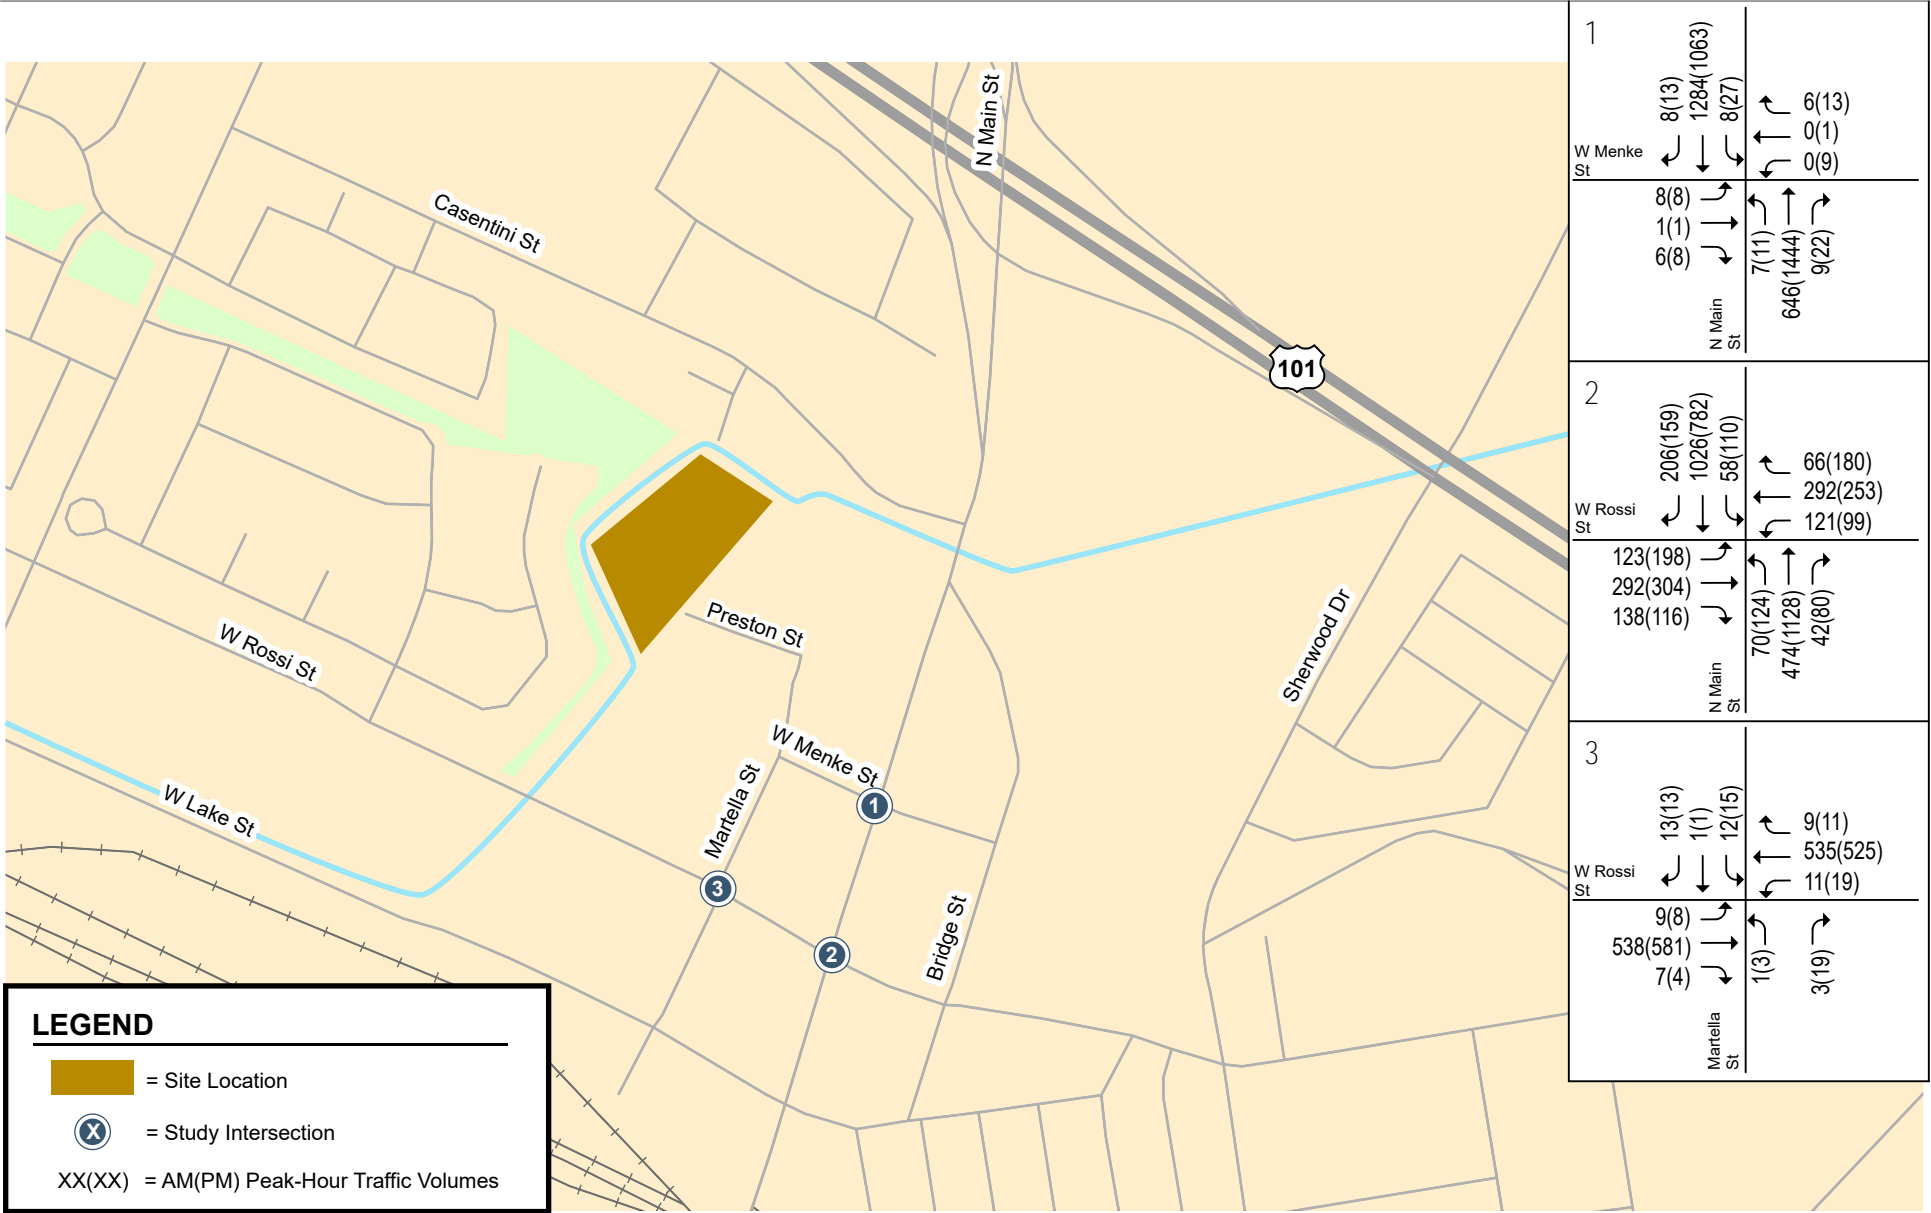

Figure 7
Existing Traffic Volumes

Figure 8
Existing Plus Project Traffic Volumes

Table 4
Signalized Intersection Level of Service Definition Based on Control Delay

Level of Service	Description	Average Control Delay Per Vehicle (sec.)
A	Signal progression is extremely favorable. Most vehicles arrive during the green phase and do not stop at all. Short cycle lengths may also contribute to the very low vehicle delay.	10.0 or less
B	Operations characterized by good signal progression and/or short cycle lengths. More vehicles stop than with LOS A, causing higher levels of average vehicle delay.	10.1 to 20.0
C	Higher delays may result from fair signal progression and/or longer cycle lengths. Individual cycle failures may begin to appear at this level. The number of vehicles stopping is significant, though some vehicles may still pass through the intersection without stopping.	20.1 to 35.0
D	The influence of congestion becomes more noticeable. Longer delays may result from some combination of unfavorable signal progression, long cycle lengths, or high volume-to-capacity (V/C) ratios. Many vehicles stop and individual cycle failures are noticeable.	35.1 to 55.0
E	This is considered to be the limit of acceptable delay. These high delay values generally indicate poor signal progression, long cycle lengths, and high volume-to-capacity (V/C) ratios. Individual cycle failures occur frequently.	55.1 to 80.0
F	This level of delay is considered unacceptable by most drivers. This condition often occurs with oversaturation, that is, when arrival flow rates exceed the capacity of the intersection. Poor progression and long cycle lengths may also be major contributing causes of such delay levels.	greater than 80.0
Source: Transportation Research Board, <i>2010 Highway Capacity Manual</i> (Washington, D.C., 2010)		

Table 5
Unsignalized Intersection Level of Service Definition Based on Control Delay

Level of Service	Description	Average Delay Per Vehicle (Sec.)
A	Little or no traffic delay	10.0 or less
B	Short traffic delays	10.1 to 15.0
C	Average traffic delays	15.1 to 25.0
D	Long traffic delays	25.1 to 35.0
E	Very long traffic delays	35.1 to 50.0
F	Extreme traffic delays	greater than 50.0
Source: Transportation Research Board, <i>2010 Highway Capacity Manual</i> (Washington, D.C., 2010)		

An adverse effect at a one- or two-way stop-controlled intersection operations occurs if for either peak hour:

1. The addition of project traffic causes overall operations to deteriorate from an acceptable level (LOS D or better) to an unacceptable level, or
2. The addition of project traffic adds one vehicle trip to intersections whose side-street operations are already operating at an unacceptable level (LOS E or F).

An adverse intersection operations effect provides an indication to City staff to determine whether improvements are needed at a study intersection. If adverse effects are found as a result of the addition of project-generated trips on the roadway network, potential improvements that would reduce the project's effect on the roadway network will be identified.

Intersection Operations Analysis Results

The intersection level of service analysis is summarized in Table 6.

Table 6
Intersection Level of Service Results

Study #	Intersection	Control	Peak Hour	Existing Conditions				
				No Project		with Project		
				Avg. Delay ¹ (sec)	LOS	Avg. Delay ¹ (sec)	LOS	Increase in Crit. Delay (sec)
1	N. Main Street & Menke Street	TWSC	AM	65.9	F	79.5	F	13.6
			PM	183.3	F	183.3	F	0.0
2	N. Main Street & Rossi Street	Signal	AM	28.9	C	29.1	C	0.2
			PM	31.3	C	31.6	C	0.3
3	Martella Street & Rossi Street	TWSC	AM	22.3	C	24.1	C	1.8
			PM	26.2	D	27.9	D	1.7

Notes:
¹ Average delay is reported for signalized intersections. Delay for the worst approach leg is reported for TWSC intersections.
Bold indicates a substandard level of service.
Bold indicates an adverse effect with the addition of project trips.

Existing Intersection Operation Conditions

The results of the level of service analysis show that the signalized intersection of N. Main Street/Rossi Street and the unsignalized intersection of Martella Street/Rossi Street operate at an acceptable LOS D or better during both the AM and PM peak hours. The unsignalized intersection of N. Main Street/Menke Street currently operates at an unacceptable LOS F during both peak hours. The level of service calculation sheets are included in Appendix C.

Existing plus Project Intersection Operation Conditions

The operations analysis shows that the signalized intersection of N. Main Street/Rossi Street and the unsignalized intersection of Martella Street/Rossi Street would continue to operate at an acceptable LOS D or better during both the AM and PM peak hours with the addition of project-generated trips. The N. Main Street/Menke Street intersection would continue to operate at an unacceptable LOS F during both

peak hours. The intersection level of service calculation sheets are included in Appendix C.

The addition of project generated trips to the west leg (eastbound direction) of the N. Main Street/Menke Street intersection would increase the average delay experienced by each vehicle on that approach by 13.6 seconds during the AM peak hour. N. Main Street carries a high volume of traffic during the peak hours and causes side-street traffic to wait for extended periods of time. Field observations show that vehicles were able to make turns from Menke Street once the downstream signal at N. Main Street/Rossi Street approached the end of the green phase for the southbound direction. Due to the small number of vehicles traveling along Menke Street relative to the traffic along N. Main Street, improvements are not recommended as drivers have the option to use Martella Street to access Rossi Street and N. Main Street.

Unsignalized Intersection Control and Critical Gaps

Both the unsignalized intersections of N. Main Street/Menke Street and Martella Street/Rossi Street are stop-controlled along the minor street approaches. A peak hour signal warrant check and a critical gap analysis were performed at each of the unsignalized study intersections to evaluate the need for a change of control.

Peak Hour Signal Warrant

The need for signalization of the unsignalized intersections was assessed based on the Peak Hour Volume Warrant (Warrant 3) described in the *California Manual on Uniform Traffic Control Devices for Streets and Highways (CA MUTCD)*, Part 4, Highway Traffic Signals, 2014. This method makes no evaluation of intersection level of service, but simply provides an indication whether vehicular peak hour traffic volumes are, or would be, sufficient to justify installation of a traffic signal. Intersections that meet the peak hour warrant are subject to further analysis before determining that a traffic signal is necessary. Additional analysis may include operational analysis such as evaluating vehicle queuing and delay. Other options such as traffic control devices, signage, or geometric changes may be preferable based on existing field conditions.

A peak-hour traffic signal warrant check was conducted for unsignalized study intersections that meet the 100 vehicles per hour threshold for minor streets. Since neither of the unsignalized study intersections meet the minimum threshold for minor streets, it can be concluded that the peak hour signal warrant is not met for either intersection.

Critical Gap Observations

Although the minor street threshold is not met for the peak hour signal warrant at either unsignalized intersection, a critical gap analysis was completed to determine whether vehicles would be able to turn from minor streets onto major streets at study intersections.

The critical gap is the time needed for a driver to safely navigate from a minor street approach. The longest critical gap is typically the left turn from a minor street to a major street at two-way stop-controlled intersections. The Highway Capacity Manual (HCM) describes the default values that should be used for these movements based on the number of lanes on the major street. The critical gap is 7.5 seconds and 7.1 seconds for a four-lane major street and two-lane major street, respectively.

Based on the values described in the HCM, vehicles originating at the project site would need a minimum gap of at least 7.5 seconds to turn from Menke Street onto northbound N. Main Street and 7.1 seconds to turn from Martella Street onto eastbound Rossi Street.

Field observations show that gaps in traffic are available during both peak hours at both intersections. For the intersection of N. Main Street and Menke Street, field observations show that during both peak hour, vehicles were easily able to make left turns from Menke Street onto N. Main Street when southbound through green phase began at the N. Main Street/Rossi Street intersection. Since the southbound movement at the N. Main Street/Rossi Street intersection ends with a lagging left turn, very few vehicles approach the unsignalized intersection of N. Main Street/Menke Street towards the end of the signal cycle, allowing for vehicles to locate a gap in traffic to depart from Menke Street. Field observations of the signal timing show that the green+yellow+all red for the southbound left turn movement at N. Main Street/Rossi Street totals 12 seconds in the AM peak hour and 16 seconds in the PM peak hour, which would provide an adequate gap in traffic for vehicles to depart Menke Street.

For the intersection of Martella Street and Rossi Street, vehicles are easily able to find gaps in traffic to make the left turn. During busier cycles at the N. Main Street/Rossi Street intersection, vehicles may occasionally spillback to the Martella Street/Rossi Street intersection. However, vehicles are easily able to depart Martella Street once the signal turns green at the downstream intersection. Field observations of the signal timing show that the green+yellow+all red for the eastbound left turn movement at N. Main Street/Rossi Street totals 12 seconds in the AM peak hour and 14 seconds in the PM peak hour, which would provide an adequate gap in traffic for vehicles to depart Menke Street.

Pedestrian, Bicycle, and Transit Analysis

Pedestrian Facilities

Pedestrian facilities in the study area consist of sidewalks, crosswalks, and pedestrian signals (see Chapter 2 for details).

Pedestrian generators in the project vicinity include commercial areas and bus stops along N. Main Street and Rossi Street. Downtown Salinas is located approximately ½-mile walking distance from the project site.

The sidewalk is discontinuous on the south and west side of Preston Street and Martella Street, respectively. Additionally, a sidewalk and curb ramp are missing at the southeast corner of the Martella Street/Menke Street intersection. Although sidewalks are missing along some property frontages along Preston Street, Martella Street, and Menke Street, a continuous sidewalk connects the project site to N. Main Street, which provides connections to nearby points of interest.

The project proposes a general plan amendment which would allow construction of buildings that would be either row houses, condominiums, or apartments. Since a site plan has not yet been proposed, the final site plan should include sidewalks, pathways, and curb ramps connecting buildings to existing pedestrian facilities on Preston Street.

Bicycle Facilities

There are several bike facilities in the immediate vicinity of the project site (see Chapter 2 for details). The project site is not directly served by any bicycle facilities. Preston Street and Martella Street carry low volume and is conducive to bicyclists. Existing bike lanes along Rossi Street connect the project vicinity to other bicycle facilities and nearby points of interest.

The Monterey County Active Transportation Plan identifies future improvements to bicycle facilities in the project vicinity. A planned Class I share use path is proposed between Market Street and Rossi Street, opposite from Martella Street. This would provide a safe bicycle connection between the project site to the downtown Salinas area without needing to head west to Davis Road. The project would not

remove any bicycle facilities, nor would it conflict with any adopted plans or policies for new bicycle facilities.

Transit Services

The project site is adequately served by existing MST transit services. Within the project vicinity, bus routes run along N. Main Street and Rossi Street. The project site is primarily served by five MST bus routes (Routes 23, 29, 44, 49, and 95). The nearest bus stops to the project site are located along both sides of Main Street (at Rossi Street), approximately ¼-mile from the project site. Additionally, the Salinas Amtrak station and the Salinas Transit Center are located approximately 0.6-mile from the project site. The new transit trips generated by the project are not expected to create demand in excess of the transit service that is currently provided. The project would not remove any transit facilities, nor would it conflict with any adopted plans or policies for new transit facilities.

5. Conclusions

The transportation analysis of the project was evaluated following the standards and methodologies set forth by the California Environmental Quality Act (CEQA) and the City of Salinas.

CEQA VMT Analysis

Project-Level VMT Impact Analysis

The results of the VMT analysis, using the City's VMT analysis tool, indicate that the proposed project is projected to generate 10.53 VMT per capita. Therefore, the proposed project would have an impact on the transportation system based on the City's VMT impact criteria.

Project Impacts and Mitigation Measures

Project Impact: Since the VMT generated by the project (10.53 VMT per capita) would exceed the threshold of 9.7 VMT per capita, the project would result in a significant transportation impact on VMT. Therefore, mitigation measures are required to reduce the VMT impact.

Mitigation Measures: Implementation of the following project design measures would reduce the VMT generated by the project to VMT per capita of 9.95:

1. Higher Density: The project proposes to construct residential units at a higher density in an infill location. **and**
2. Pedestrian Network Improvements: The project could construct pedestrian facilities within the project site to connect the project site to existing pedestrian facilities on Preston Street. Creating safe pedestrian connections could encourage future residents to walk instead of drive. **and**
3. Include Bike Parking Per City Code: The project could provide bike parking on-site. Providing bike parking may encourage future residents to utilize bicycles as a mode of transportation instead of driving.

The implementation of the following TDM strategies would be required to further reduce the project impact to VMT to insignificant levels:

4. Reduce On-Site Parking: Reduce to the number of on-site parking spaces for residents to less than that which is required per the municipal code. **or**
5. Implement Unbundled Parking: Separate or unbundle parking costs from leases/property costs requiring those that wish to purchase parking spaces to do so at an additional cost. Unbundled

parking also would require the implementation of residential permit parking zones in the project area at the expense of the developer. **or**

6. **Affordable Housing**: Provide below market-rate housing on-site. **or**
7. **Voluntary Travel Behavior Change Program**: The project could implement a travel behavior change program by offering incentives to future residents to utilize alternative transportation modes. The program would require 75% participation by residents. **and**
8. **Promotions and Marketing**: The project could provide future residents with information about alternative transportation and other TDM programs available to them at move in. The program would require 75% participation by residents. **and**
9. **School Carpool Program**: The project could implement a school carpool program. Residents would be provided information about the school carpool program at move-in. Interested residents would provide their contact information to similar families that have children at the same school.

Transportation Operations Analysis

The intersection operations analysis is intended to quantify the operations of intersections and to identify potential negative effects due to the addition of project traffic. However, a potential adverse effect on a study intersection operation is not considered a CEQA impact metric.

The transportation operations analysis includes the analysis of AM and PM peak-hour traffic conditions for one signalized intersection and two unsignalized intersections. The intersections were evaluated using Synchro software, utilizing the Highway Capacity Manual (HCM) 2010 methodology.

Trip Generation

Based on the trip generation rates published in the Institute of Transportation Engineers' (ITE) *Trip Generation Manual*, 11th Edition, it is estimated that the project would generate 377 daily vehicle trips, with 31 trips (7 inbound and 24 outbound) occurring during the AM peak hour and 32 trips (20 inbound and 12 outbound) occurring during the PM peak hour.

Intersection Operation Conditions

The operations analysis shows that the signalized intersection of N. Main Street/Rossi Street and the unsignalized intersection of Martella Street/Rossi Street would continue to operate at an acceptable LOS D or better during both the AM and PM peak hours with and without the project. The N. Main Street/Menke Street intersection would operate at an unacceptable LOS F during both peak hours with and without the project. The addition of project generated trips to the intersection would increase the average delay experienced by each vehicle on the worst-leg approach by 13.6 seconds during the AM peak hour. Due to the small number of vehicles traveling along Menke Street relative to the traffic along N. Main Street, improvements are not recommended as drivers have the option to use Martella Street to access Rossi Street and N. Main Street.

Unsignalized Intersection Control and Critical Gaps

Both the unsignalized intersections of N. Main Street/Menke Street and Martella Street/Rossi Street are stop-controlled along the minor street approaches. Since neither of the unsignalized study intersections meet the minimum threshold for minor streets, it can be concluded that the peak hour signal warrant is not met for either intersection. Field observations show that gaps in traffic are available during both peak hours at both intersections.

Pedestrian, Bicycle, and Transit Analysis

Pedestrian Facilities

Pedestrian generators in the project vicinity include commercial areas and bus stops along N. Main Street and Rossi Street. Downtown Salinas is located approximately ½-mile walking distance from the project site.

Pedestrian facilities in the project vicinity include sidewalks, crosswalks, and pedestrian signals at the signalized study intersection. The sidewalk is discontinuous on the south and west side of Preston Street and Martella Street, respectively. Additionally, a sidewalk and curb ramp are missing at the southeast corner of the Martella Street/Menke Street intersection. Although sidewalks are missing along some property frontages along Preston Street, Martella Street, and Menke Street, a continuous sidewalk connects the project site to N. Main Street, which provides access to additional pedestrian facilities and to nearby points of interest.

The project proposes a general plan amendment which would allow construction of buildings that would be either row houses, condominiums, or apartments. Since a site plan has not yet been proposed, the final site plan should be designed to include sidewalks, pathways, and curb ramps connecting buildings to existing pedestrian facilities on Preston Street.

Bicycle Facilities

Bicycle facilities in the project vicinity include bike paths, bike lanes, and bike routes. The project site is not directly served by any bicycle facilities. However, Preston Street and Martella Street carry low volume and is conducive to bicyclists. Existing bike lanes along Rossi Street connect the project vicinity to other bicycle facilities and nearby points of interest.

The Monterey County Active Transportation Plan identifies future improvements to bicycle facilities in the project vicinity. A planned Class I share use path is proposed between Market Street and Rossi Street, opposite from Martella Street. This would provide a safe bicycle connection between the project site to the downtown Salinas area without needing to head west to Davis Road. The project would not remove any bicycle facilities, nor would it conflict with any adopted plans or policies for new bicycle facilities.

Transit Facilities

The project site is adequately served by existing MST transit services. Within the project vicinity, bus routes run along N. Main Street and Rossi Street. The project site is primarily served by five MST bus routes (Routes 23, 29, 44, 49, and 95). The nearest bus stops to the project site are located along both sides of Main Street (at Rossi Street), approximately ¼-mile from the project site. Additionally, the Salinas Amtrak station and the Salinas Transit Center are located approximately 0.6-mile from the project site. The new transit trips generated by the project are not expected to create demand in excess of the transit service that is currently provided. The project would not remove any transit facilities, nor would it conflict with any adopted plans or policies for new transit facilities.

Subject: Cultural Resources Assessment for the 1 Preston Street Project Salinas, Monterey County, California

Dear Ms. Brinton:

The City of Salinas (City) retained Rincon Consultants, Inc. (Rincon) to conduct a cultural resources assessment for the proposed 1 Preston Street Project (project) in Salinas, Monterey County, California. The proposed project is subject to the California Environmental Quality Act (CEQA) and local regulations. The City is the lead agency under CEQA. This letter report documents the results of the assessment, which was conducted in support of CEQA review and consisted of a cultural resources records search, Sacred Lands File search, and a pedestrian field survey.

Project Location

The proposed project consists of Assessor's Parcel Number 003-161-008-000, a 2.6-acre lot located at 1 Preston Street, Salinas, in Monterey County, California (Figure 1, Attachment 1). The proposed project site lies within Section 29 of Township 14 South, Range 3 East of the *Salinas, Calif.* (USGS 2021) topographic quadrangle (Figure 2, Attachment 1). The project site is bounded by residential and commercial development to the east, and a channelized river to the north, west, and south. The proposed project site is currently vacant and unpaved.

Project Description

The project consists of a General Plan Amendment and Zoning Code Amendment to modify the existing vacant 2.6-acre lot from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1). The project does not involve construction or other physical changes. Because there are currently no development proposals, this Initial Study analyzes the maximum potential buildout of the site, using reasonable assumptions for construction, building height, and other design features. Depending on the final design of proposed development facilitated by the rezoning project, additional project-specific CEQA review may be required, as determined by the City upon receipt of a complete project-specific application. With full buildout and anticipating a density bonus, future development on the site may

include the construction of up to 76 residential units over roughly 129,202 square feet. Based on the existing maximum height allowable in the R-M-3.6 zone, future development would not exceed 45 feet and would be up to approximately 4-5 stories tall. Development would likely consist of buildings that are either row houses, condominiums, apartments, or other units, ranging in size from 400 square feet to 2,210 square feet, all which would be consistent with the Salinas General Plan description of the High Density Residential land use designation.

Cultural Resources Records Search

On May 20, 2021, Rincon requested a records search of the project site and a 0.5-mile radius from the California Historical Resources Information System (CHRIS) at the Northwest Information Center (NWIC) located at Sonoma State University. On June 23, 2021, Rincon received the results of the records search for the proposed project. The purpose of the records search was to identify previously conducted cultural resources studies and previously recorded cultural resources located within the existing project site and a 0.5-mile radius. In addition to the NWIC records search, a review of the National Register of Historic Places (NRHP), the California Register of Historical Resources (CRHR), the Office of Historic Preservation Historic Properties Directory, the California Inventory of Historic Resources, the Built Environment Resource Directory, and the Archaeological Determinations of Eligibility list was conducted.

Previously Conducted Studies

The NWIC records search identified 39 previously conducted cultural resources studies within the 0.5-mile radius of the project site (Attachment 2), of which one (S-043489) includes portions of the current project site as discussed here.

S-043489

In 2013, Lorna Billat of Earth Touch, Inc. and Dana E. Supernowicz of Historic Resource Associates conducted study S-043489 entitled *Collocation ("CO") Submission Packet FCC Form 621, Downtown Salinas, CNU3535*. This study included an architectural evaluation for the project by Supernowicz entitled *Architectural Evaluation Study of the Downtown Salinas Project, AT&T Mobility Site No. CNU3535, 220 Bridge Street, Salinas, Monterey County, California 93941*. The study included the development of the Area of Potential Effects (APE), a records search of the NWIC, archival research, and a pedestrian survey of the APE. Additionally, a vehicular survey was conducted for the visual APE, approximately a 0.5-mile radius around the direct APE. The study identified one historical resource, the PG&E Moss Landing-Salinas Tower No. 011/064; however, the tower was recommended ineligible for listing in the NRHP. No further cultural resources evaluations were recommended for the project. The recorded historical resource is located outside of the current project site. The study includes the entirety of the current project site within the visual APE; therefore, no formal pedestrian survey was conducted of the current project site.

Previously Recorded Resources

The NWIC records search identified 16 previously recorded cultural resources within a 0.5-mile radius of the project site (Table 1 and Attachment 2), of which none are identified within the project site. These resources include a historic district, four historic-period structures, six historic-period buildings, and one historic-period archaeological site.

Aerial Imagery and Historical Topographic Maps Review

Rincon completed a review of historical topographic maps and aerial imagery to ascertain the development history of the project site. Historical topographic maps from 1910 to 1964 depict the project site as undeveloped surrounded by a channelized creek to the west, south, and north (USGS 2021; NETR Online 2021). Historical topographic maps from 1970 to 1984 depict a structure added within the southeastern portion of the project site (NETR Online 2021). Aerial imagery from 1956 to 2005 depicts the project site as graded with a structure identified in the topographic maps, with housing development growing to the east and the water source as depicted on the topographic maps (NETR Online 2021). By 2009, the aerial imagery shows that the structure is no longer present, and vegetation has developed throughout the project site. Aerial imagery from 2012 depicts the project site in its current state, as graded with residential housing to the east and a channelized canal to the west, south, and north.

The site has been disturbed by the previous development and demolition of a structure from 1970 to 2009. Additionally, the project site was previously used as a staging area, and the City stated that the owner grants access to the project site which as lead to further disturbance of the site (City of Salinas 2021).

Sacred Lands File Search

Rincon contacted the Native American Heritage Commission (NAHC) on May 17, 2021, to request a Sacred Lands File (SLF) search of the project site. The NAHC emailed a response to the City on June 1, 2021, stating the SLF search was positive. In their response, the NAHC provided a list of 11 tribes who may have knowledge of cultural resources within the project site. The SLF search can be found in Attachment 3 of this report. Rincon was not contracted to conduct Native American outreach as a part of this cultural assessment.

Pedestrian Field Survey

On August 20, 2021, Rincon Archaeologist Dustin Merrick, MA, Registered Professional Archaeologist (RPA), conducted a pedestrian survey of the project site. Mr. Merrick walked a series of pedestrian transects oriented generally north-south and east-west, spaced no more than 15 meters apart across the project site. Areas of exposed ground were inspected for prehistoric artifacts (e.g., flaked stone tools, tool-making debris, stone milling tools, ceramics, fire-affected rock), ecofacts (marine shell and bone), soil discoloration that might indicate the presence of a cultural midden, soil depressions, and features that indicate the former presence of structures or buildings (e.g., standing exterior walls, postholes, foundations) or historic debris (e.g., metal, glass, ceramics). Ground disturbances, such as burrows, and drainages were also visually inspected. Ground visibility within the project site ranged from poor along the perimeter (less than five percent) to excellent (greater than 95 percent) within the center.

The project site consisted of tan to dark brown sand and showed evidence of heavy disturbance. Native soils were intermixed with imported fill with some gravel. Figure 3 through Figure 6 in Attachment 1 depict the current conditions of the project site.

No new cultural resources were observed or recorded during the field survey.

Findings and Recommendations

The background research and pedestrian field survey did not identify any cultural resources within the project site. No built environment resources are present that may be impacted by the project; therefore Rincon recommends a finding of ***no impact to historical resources***.

Although the SLF search was returned with positive results, no prehistoric resources were identified within the project site. Given the negative results of this study, the project site is considered to have low archaeological sensitivity. However, it is possible that unanticipated archaeological deposits and/or human remains could be encountered and damaged during the ground-disturbing activities associated with construction (such as grading and excavation), especially if those activities occur in less-disturbed buried sediments. Consequently, mitigation is necessary to ensure that potential impacts to archaeological resources, including those that may be considered historical resources, are reduced to a less-than-significant level.

Given the results of this assessment, Rincon recommends a finding of ***less than significant impact to archaeological resources with mitigation*** for the purposes of CEQA. The following is recommended in the unlikely case of unanticipated discoveries during ground-disturbing activities. Also included below is a summary of existing regulations regarding the discovery of human remains. With adherence to existing regulations, Rincon recommends a finding of ***less than significant impact to human remains***.

Unanticipated Discovery of Cultural Resources

In the unlikely event that archaeological resources are unexpectedly encountered during ground-disturbing activities, work in the immediate area should be halted and an archaeologist meeting the Secretary of the Interior's Professional Qualification Standards for archeology (National Park Service 1983) will be contacted immediately to evaluate the find. If the find is prehistoric, then a Native American representative will be contacted to participate in the evaluation of the find. If necessary, the

evaluation may require preparation of a treatment plan and archaeological testing for California Register of Historical Resources (CRHR) eligibility. If the discovery proves to be eligible for listing in the CRHR and cannot be avoided additional work, such as testing and data recovery excavations, may be warranted to mitigate any significant impacts to cultural resources to less than a significant level.

Unanticipated Discovery of Human Remains

In the unlikely event of an unanticipated discovery of human remains, all ground-disturbing activities in the vicinity of the discovery will be immediately suspended and redirected elsewhere. All steps required to comply with State of California Health and Safety Code Section 7050.5 and Public Resources Code Section 5097.98 will be implemented including contacting the Monterey County Department of Medical Examiner-Coroner. If the human remains are determined to be prehistoric, the coroner will notify the NAHC, which will determine and notify a most likely descendant (MLD). The MLD shall complete an inspection of the site and provide recommendations for treatment to the landowner within 48 hours of being granted access.

Please do not hesitate to contact Rincon with any questions regarding this cultural resources assessment.

Sincerely,

Notes: _____

CHRIS Data Request Form

Mark the request form as needed. Attach a PDF of your project area (with the radius if applicable) mapped on a 7.5' USGS topographic quadrangle to scale 1:24000 ratio 1:1 neither enlarged nor reduced and include a shapefile of your project area, if available. Shapefiles are the current CHRIS standard for submitting digital spatial data for your project area or radius. **Check with the appropriate IC for current availability of digital data products.**

- Documents will be provided in PDF format. Paper copies will only be provided if PDFs are not available at the time of the request or under specially arranged circumstances.
- Location information will be provided as a digital map product (Custom Maps or GIS data) unless the area has not yet been digitized. In such circumstances, the IC may provide hand drawn maps.
- In addition to the \$150/hr. staff time fee, client will be charged the Custom Map fee when GIS is required to complete the request [e.g., a map printout or map image/PDF is requested and no GIS Data is requested, or an electronic product is requested (derived from GIS data) but no mapping is requested].

For product fees, see the CHRIS IC Fee Structure on the [OHP website](#).

Please forward a copy of any resulting reports from this project to the office as soon as possible. Due to the sensitive nature of archaeological site location data, we ask that you do not include resource location maps and resource location descriptions in your report if the report is for public distribution. If you have any questions regarding the results presented herein, please contact the office at the phone number listed above.

The provision of CHRIS Data via this records search response does not in any way constitute public disclosure of records otherwise exempt from disclosure under the California Public Records Act or any other law, including, but not limited to, records related to archeological site information maintained by or on behalf of, or in the possession of, the State of California, Department of Parks and Recreation, State Historic Preservation Officer, Office of Historic Preservation, or the State Historical Resources Commission.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the CHRIS Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

Should you require any additional information for the above referenced project, reference the record search number listed above when making inquiries. Requests made after initial invoicing will result in the preparation of a separate invoice.

Thank you for using the California Historical Resources Information System (CHRIS).

Sincerely,

Justin Murazzo
Researcher

Type of List Requested

☒ CEQA Tribal Consultation List (AB 52) – *Per Public Resources Code § 21080.3.1, subs. (b), (d), (e) and 21080.3.2*

☒ General Plan (SB 18) - *Per Government Code § 65352.3.*

Local Action Type:

___ General Plan ___ General Plan Element x General Plan Amendment

___ Specific Plan ___ Specific Plan Amendment ___ Pre-planning Outreach Activity

Required Information

Project Title: 1 Preston Street Project

Local Government/Lead Agency: City of Salinas

Contact Person: Lisa Brinton, Planning Manager Community Development Department

Street Address: 65 W. Alisal Street, 2nd Floor

City: Salinas **Zip:** 93901

Phone: 831-775-4259

Email: lisab@ci.salinas.ca.us

Specific Area Subject to Proposed Action

The proposed project consists of a General Plan Amendment to rezone the existing vacant 2.6-acre lot at 1 Preston Street from Residential Medium Density to Residential High Density. The project will be development in two phases. Phase one includes the development of 27 homes with the current zoning. Phase two will seek a Conditional Use Permit to allow the development of 2-12-bedroom transitional housing units

Re: Native American Consultation, Pursuant to Senate Bill 18 (SB18), Government Codes §65352.3 and §65352.4, as well as Assembly Bill 52 (AB52), Public Resources Codes §21080.1, §21080.3.1 and §21080.3.2, 1 Preston Street Project, Monterey County

Dear Ms. Brinton:

Attached is a consultation list of tribes with traditional lands or cultural places located within the boundaries of the above referenced counties or projects.

Government Codes §65352.3 and §65352.4 require local governments to consult with California Native American tribes identified by the Native American Heritage Commission (NAHC) for the purpose of avoiding, protecting, and/or mitigating impacts to cultural places when creating or amending General Plans, Specific Plans and Community Plans.

Public Resources Codes §21080.3.1 and §21080.3.2 requires public agencies to consult with California Native American tribes identified by the Native American Heritage Commission (NAHC) for the purpose of avoiding, protecting, and/or mitigating impacts to tribal cultural resources as defined, for California Environmental Quality Act (CEQA) projects.

The law does not preclude local governments and agencies from initiating consultation with the tribes that are culturally and traditionally affiliated within your jurisdiction. The NAHC believes that this is the best practice to ensure that tribes are consulted commensurate with the intent of the law.

Best practice for the AB52 process and in accordance with Public Resources Code §21080.3.1(d), is to do the following:

Within 14 days of determining that an application for a project is complete or a decision by a public agency to undertake a project, the lead agency shall provide formal notification to the designated contact of, or a tribal representative of, traditionally and culturally affiliated California Native American tribes that have requested notice, which shall be accomplished by means of at least one written notification that includes a brief description of the proposed project and its location, the lead agency contact information, and a notification that the California Native American tribe has 30 days to request consultation pursuant to this section.

The NAHC also recommends, but does not require that lead agencies include in their notification letters, information regarding any cultural resources assessment that has been completed on the area of potential affect (APE), such as:

1. The results of any record search that may have been conducted at an Information Center of the California Historical Resources Information System (CHRIS), including, but not limited to:
 - A listing of any and all known cultural resources have already been recorded on or adjacent to the APE, such as known archaeological sites;
 - Copies of any and all cultural resource records and study reports that may have been provided by the Information Center as part of the records search response;
 - Whether the records search indicates a low, moderate or high probability that unrecorded cultural resources are located in the APE; and
 - If a survey is recommended by the Information Center to determine whether previously unrecorded cultural resources are present.
2. The results of any archaeological inventory survey that was conducted, including:
 - Any report that may contain site forms, site significance, and suggested mitigation measures.

All information regarding site locations, Native American human remains, and associated funerary objects should be in a separate confidential addendum, and not be made available for public disclosure in accordance with Government Code Section 6254.10.
3. The result of the Sacred Lands File (SFL) check conducted through the Native American Heritage Commission was positive. Please contact the tribes on the attached list for more information.
4. Any ethnographic studies conducted for any area including all or part of the potential APE; and
5. Any geotechnical reports regarding all or part of the potential APE.

Lead agencies should be aware that records maintained by the NAHC and CHRIS is not exhaustive, and a negative response to these searches does not preclude the existence of a tribal cultural resource. A tribe may be the only source of information regarding the existence of a tribal cultural resource.

This information will aid tribes in determining whether to request formal consultation. In the event, that they do, having the information beforehand will help to facilitate the consultation process.

If you receive notification of change of addresses and phone numbers from tribes, please notify the NAHC. With your assistance we can assure that our consultation list remains current.

If you have any questions or need additional information, please contact me at my email address:
Sarah.Fonseca@nahc.ca.gov.

Sincerely,

Sarah Fonseca
Cultural Resources Analyst

This list is current only as of the date of this document and is based on the information available to the Commission on the date it was produced. Distribution of this list does not relieve any person of statutory responsibility as defined in Section 7050.5 of the Health and Safety Code, Section 5097.94 of the Public Resources Code and Section 5097.98 of the Public Resources Code.

This list is applicable only for consultation with Native American tribes under Government Code Sections 65352.3, 65352.4 et seq. and Public Resources Code Sections 21080.3.1 for the proposed 1 Preston Street Project, Monterey County.

**UNOFFICIAL MINUTES
OF THE
SALINAS PLANNING COMMISSION
April 19, 2023**

The meeting was called to order at 3:33 p.m. in the City Council Chamber Rotunda.

PLEDGE OF ALLEGIANCE

ROLL CALL

WELCOME AND STAFF INTRODUCTIONS

PRESENT: Chairperson Gonzalez, Commissioners Manzo, Meeks, McKelvey Daye and Purnell

ABSENT: Commissioner Donohue

STAFF: Community Development Director, Megan Hunter; Planning Manager, Courtney Grossman; Planning Manager, Grant Leonard; Associate Planner, Oscar Resendiz; Principal-in Charge from Rincon Consultants Inc., Megan Jones; and Administrative Aide, Maira Robles

COMMENTS FROM THE PUBLIC FOR ITEMS NOT ON THE AGENDA

Chairperson Gonzalez opened for public comment at 3:34 p.m.

No public comments were received.

Chairperson Gonzalez closed for public comment at 3:34 p.m.

APPROVAL OF THE MINUTES: March 1, 2023

Upon motion by Commissioner Meeks, and a second by Commissioner Purnell, the minutes of March 1, 2023, were approved. The motion carried by the following vote:

AYES: Chairperson Gonzalez, Commissioners Manzo, Meeks, McKelvey Daye and Purnell

NOES: None

ABSTAIN: None

ABSENT: Commissioner Donohue

ADMINISTRATIVE REPORTS

General Plan Update Community Engagement and Outreach Strategy

Planning Manager, Grant Leonard, presented a PowerPoint presentation, which is on file at the Community Development Department.

Commissioner Manzo requested information regarding the Youth Ambassador Interviews. Mr. Leonard informed that Youth Ambassador Interviews are made possible through the Sustainable Lands Grant and are the result of a partnership between the City and the Center for Community Advocacy (CCA). The CCA recruits youth ambassadors and trains them to interview other youth in an effort to obtain feedback from community members that would otherwise not engage.

Commissioner Purnell requested details regarding the Focus Groups at High Schools. Mr. Leonard informed that Associate Planner, Monica Gurmilan, who is running the Outreach Strategy will follow-up in providing details about the Focus Groups.

Chairperson Gonzalez inquired if outreach has primarily focused on housing and if an outreach goal has been set. Mr. Leonard informed that currently the focus is on housing as staff are in the process of drafting and releasing the Housing Element, however, the outreach strategies for community engagement as presented, will also serve as the infrastructure toward gathering input on other elements of the General Plan. Community Development Director, Megan Hunter, informed that as feedback is gathered from various sources and meetings, the city has reached over 5k, and added that staff's primary goal is to ensure that the General Plan draft is reflective of the community's input.

Commissioner Meeks inquired if the 5k outreach goal is city-wide. Mr. Leonard confirmed that the goal of 5K goal is city-wide.

Chairperson Gonzalez opened for public comment at 3:46 p.m.

No public comments were received.

Chairperson Gonzalez closed for public comment at 3:46 p.m.

PUBLIC HEARINGS

General Plan Amendment 2022-001 and Rezone 2022-001; Amend the General Plan Land Use Designation from Residential Medium Density (8-15 Units/Acre) to Residential High Density (15-24 Units/Acre) and Rezone from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1) of a vacant 2.6-acre lot located at 1 Preston Street

Associate Planner, Oscar Resendiz, presented a PowerPoint presentation, which is on file at the Community Development Department.

Commissioner Manzo inquired about the Final Initial Study and Mitigated Negative Declaration (ISMND) as prepared for the project site and inquired about the measures that will be taken to address concerns with regard to parking and walkability of the site and surrounding areas upon development. Principal-in-Charge Planner from Rincon Consultants Inc., Megan Jones, informed that the analysis of the initial study found that the project's impact will slightly exceed the Vehicle Miles Traveled (VMT) per capita threshold, therefore, the applicant developing the site will need to prepare and implement a VMT Reduction Program that reduces VMT generated by the project through Pedestrian Network Improvements and the inclusion of bicycle parking. Other measures may include on-site parking reductions, implementation of unbundled parking, affordable housing, incentivizing alternative transportation modes, and a school carpool program.

Commissioner Meeks requested that the PowerPoint slides for project presentations be shared ahead of meetings and that maps include legends for reference. Commissioner Meeks also inquired about the previous use of the project site. Mr. Resendiz informed that the vacant lot was previously a Truck Depot with vehicle maintenance conducted on site.

Commissioner McKelvey Daye inquired about the response from staff to the concerns outlined in the letter received from the Department of Toxic Substances Control (DTSC). Mr. Resendiz informed that the comments and concerns identified in the letter were addressed on page 139 of the Final ISMND. Ms. Jones provided additional details regarding the response to comments and informed that it was determined that there is no impact to the site resulting from hazardous material spills.

Commissioner Purnell inquired about the green space requirements for the site. Mr. Resendiz informed that once an application for development is submitted, the applicant will have to follow regulations for open space requirements.

Commissioner Gonzalez commended the reuse of vacant land as a strategy to help meet housing production goals.

Chairperson Gonzalez opened for public comment at 4:02 p.m.

No public comments were received.

Chairperson Gonzalez closed for public comment at 4:02 p.m.

Commissioner Manzo motioned to approve a Resolution Recommending that the Salinas City Council approve a General Plan Amendment (GPA) to change the land use designation from Residential Medium Density (8-15 Units/Acre) to Residential High Density (15-24 Units/Acre) and Rezone (RZ) from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1) of a vacant 2.6-acre lot located at 1 Preston Street (GPA 2022-001, RZ 2022-001, ER 2022-009). Commissioner Meeks seconded the motion. The motion carried by the following vote:

AYES:	Chairperson Gonzalez, Commissioners Manzo, Meeks, McKelvey Daye and Purnell
-------	---

NOES:	None
-------	------

ABSTAIN: None

ABSENT: Commissioner Donohue

OTHER BUSINESS

General Plan Steering Committee Update

Commissioner Gonzalez commended staff for compiling data from all community engagement work completed to date and for reviewing the initial policy element drafts to ensure that these are reflective of recommendations received from the public.

Mr. Grant informed that the General Plan Steering Committee will not be meeting for the month of April 2023 due to the scheduled community outreach meetings. Regular meetings for the General Plan Steering Committee are expected to resume in May 2023.

FOLLOW UP REPORTS

None

FUTURE AGENDA ITEMS

Planning Manager, Courtney Grossman, informed that a Conditional Use Permit to construct a new 7, 625 s.f. recovery center at 11 Peach Drive, is scheduled for presentation to the Planning Commission on May 3, 2023.

Additionally, a General Plan Amendment, Rezone, and Conditional Use Permit for an Extended Stay Hotel is also scheduled for presentation on May 3, 2023.

Commissioner Purnell inquired if notices would be sent to inform of the proposed projects. Mr. Grossman confirmed notices would be sent to residents and businesses within a 300 radius of the project sites.

ADJOURNMENT

Chairperson Gonzalez reviewed for quorum for May 3, 2023, and adjourned the meeting at 4:09 p.m.

ROSA GONZALEZ
Chairperson

COURTNEY GROSSMAN
Executive Secretary

**SALINAS PLANNING COMMISSION
RESOLUTION NO. 2023-03**

**RESOLUTION RECOMMENDING TO THE SALINAS CITY COUNCIL APPROVAL
OF A GENERAL PLAN AMENDMENT (GPA) TO CHANGE THE LAND USE
DESIGNATION FROM RESIDENTIAL MEDIUM DENSITY (8-15 UNITS/ACRE) TO
RESIDENTIAL HIGH DENSITY (15-24 UNITS/ACRE) AND REZONE (RZ) FROM
RESIDENTIAL MEDIUM DENSITY (R-M-3.6) TO RESIDENTIAL HIGH DENSITY (R-
H-2.1) OF A VACANT 2.6-ACRE LOT LOCATED AT 1 PRESTON STREET
(GPA 2022-001, RZ 2022-001, ER 2022-009)**

WHEREAS, on April 19, 2023, the Salinas Planning Commission held a duly noticed public hearing to consider General Plan Amendment 2022-001 and Rezone 2022-001 of a vacant 2.6-acre lot located at 1 Preston Street as described in more detail below:

1. General Plan Amendment 2022-001 (GPA 2022-001); Change the land use designation from Residential Medium Density (8-15 units/acre) to Residential High Density (15-24 units/acre); and
2. Rezone 2022-001 (RZ 2022-001); Change the Zoning designation from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1).

WHEREAS, the Planning Commission weighed the evidence presented at said public hearing, including the Staff Report which is on file at the Community Development Department together with the record of environmental review; and

WHEREAS, the Planning Commission has reviewed and considered the information contained in the Initial Study and related environmental documents including the Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program, which is known as ER 2022-009.

WHEREAS, the circulated Initial Study and Mitigated Negative Declaration incorrectly stated the maximum density as 15-20 units/acre when the actual Residential High Density designation is 15-24 units/acre.

NOW, THEREFORE, BE IT RESOLVED by the Salinas Planning Commission that it recommends that the City Council adopt the proposed Mitigated Negative Declaration, approve General Plan Amendment 2022-001 and Rezone 2022-001, adopt the following findings as the basis for its determination, and that the foregoing recitations are true and correct, and are included herein by reference as findings:

For the Mitigated Negative Declaration:

1. *The Planning Commission hereby finds that a Mitigated Negative Declaration (MND) has been prepared with respect to the project in compliance with the California Environmental Quality Act (CEQA) of 1970, as amended, and the guidelines promulgated thereunder. Further, this Commission has independently reviewed and considered the information contained in the Initial Study and related environmental documents, together with the comments received during the public review process. On the basis of the whole record before it, the Commission finds that there is no substantial evidence that the project will*

have a significant effect on the environment and that the MND reflects the Commission's independent judgment and analysis. On this basis, the Commission recommends that the City Council adopt the Mitigated Negative Declaration.

The environmental impacts of the project have been analyzed in accordance with the California Environmental Quality Act (CEQA). An Initial Study was prepared to evaluate the potential impacts associated with the project. Based upon review of the Initial Study, the proposed project will not have a significant effect on the environment because the mitigation measures outlined in the proposed Mitigation Monitoring and Reporting Program have been included in the project (see Exhibit "1"). The Initial Study and Mitigated Negative Declaration were routed to responsible agencies and posted at the County Clerk's Office on January 27, 2023; the deadline for comments was February 26, 2023. The State Clearinghouse received the document on January 27, 2023; the deadline for Clearinghouse comments was February 26, 2023 (SCH Number 2023010626).

Public comments were received from interested parties and public agencies during the comment period as described below:

1. Comments received via email from Mr. Gavin McCreary, Project Manager, Site Evaluation and Remediation Unit, Site Mitigation and Restoration Program, Department of Toxic Substance Control, On February 9, 2023 with comments attached to the email, stating: The Department of Toxic Substances Control (DTSC) received a Mitigated Negative Declaration (MND) for the 1 Preston Street Project (Project). The Lead Agency is receiving this notice from DTSC because the Project includes one or more of the following: groundbreaking activities, importation of backfill soil, and/or work on or in close proximity to an agricultural or former agricultural site.

DTSC recommends that the following issues be evaluated in the Hazards and Hazardous Materials section of the MND:

1. A State of California environmental regulatory agency such as DTSC, a Regional Water Quality Control Board (RWQCB), or a local agency that meets the requirements of Health and Safety Code section 101480 should provide regulatory concurrence that the Project site is safe for construction and the proposed use.
2. The MND should acknowledge the potential for historic or future activities on or near the project site to result in the release of hazardous wastes/substances on the project site. In instances in which releases have occurred or may occur, further studies should be carried out to delineate the nature and extent of the contamination, and the potential threat to public health and/or the environment should be evaluated. The MND should also identify the mechanism(s) to initiate any required investigation and/or remediation and the government agency who will be responsible for providing appropriate regulatory oversight.
3. If any projects initiated as part of the proposed project require the importation of soil to backfill any excavated areas, proper sampling should be conducted to ensure

that the imported soil is free of contamination. DTSC recommends the imported materials be characterized according to DTSC's 2001 Information Advisory Clean Imported Fill Material.

4. If any sites included as part of the proposed project have been used for agricultural, weed abatement or related activities, proper investigation for organochlorinated pesticides should be discussed in the MND. DTSC recommends the current and former agricultural lands be evaluated in accordance with DTSC's 2008 Interim Guidance for Sampling Agricultural Properties (Third Revision).

Staff Response: Consultant firm (Rincon Consultants, Inc.) prepared the following response comments to the comments made by Mr. McCreary and Staff provided comments via email to Mr. McCreary.

1. Health and Safety Code section 101480 authorizes a responsible party, as defined, to request that a local officer supervise remedial action if a release of waste occurs, and remedial action is required. As stated in Section 9, Hazards and Hazardous Materials, of the Initial Study, no items of potential environmental concern were identified at the project site. Therefore, oversight of a qualified regulatory investigation and no remedial action would be required at this time. No revisions to the IS-MND are required in response to this comment.
2. Please refer to Section 5, Cultural Resources, of the Initial Study for additional information on historic uses of the project site. As discussed therein, it was found that the project site was generally undeveloped until the 1970s. As stated in Section 9, Hazards and Hazardous Materials, of the Initial Study, future operation activities on the project site are not anticipated to release hazardous wastes or substances, but construction activities could result in the transport, storage, or use of potentially hazardous materials. The project would be required to comply with various federal, state, and local regulations, including those set forth by DTSC, which are designed to reduce risks associated with hazardous materials, including potential risks associated with upset or accident conditions. No items of potential environmental concern were identified at the project site. Therefore, there are no required investigations or remediation needed, and no revisions to the IS-MND are warranted.
3. According to DTSC, there are currently no established standards within applicable statutes and regulations that address environmental requirements for imported fill material.¹ Sampling of backfill soil would not be required. Additionally, the property owner would be liable if contaminated soil were imported to the site. No revisions to the IS-MND are required in response to this comment.
4. Based on review of historical topographic maps from 1910 to 1964, the project site has not been used for agricultural purposes. Furthermore, the project site has not been used for weed abatement or related activities. As discussed within Section 9, Hazards and Hazardous Materials, compliance with existing DTSC regulations would reduce the risk of potential release of hazardous materials during demolition, dewatering, soil disturbance/grading, and

construction. No revisions to the ISMND are required in response to this comment.

For General Plan Amendment 2022-001:

- 2. That the proposed General Plan Amendment is in conformance with all other goals, policies, programs, and land uses of the Salinas General Plan.***

The proposed Amendment is consistent with Salinas General Plan Policies. The proposed General Plan Amendment would change the existing designation for the project site and amend the General Plan Land Use and Circulation Policy Map to align with the proposed rezoning of the site to Residential High Density (15-24 units/acre). The Amendment would be consistent with the General Plan land use designation of the adjacent sites of the subject site. The proposed “Residential High Density (15-24 units/acre)” land designation for the project site is consistent with General Plan Goal H-1, by providing a range of housing opportunities to adequately address existing and projected needs to Salinas. The project also complies with General Plan Policy H-1.3, by identify adequate sites to facilitate and encourage housing production for the existing and projected housing needs of the City. In addition, the project complies with General Plan Goal H-2, by maintaining and improving existing neighborhoods and housing stock.

- 3. That the proposed General Plan Amendment promotes the public necessity, convenience, and general welfare.***

The General Plan Amendment promotes the public necessity, convenience, and general welfare because the proposal will create additional housing units the City of Salinas.

For Rezone 2022-001:

- 4. The amendment is consistent with the Salinas General Plan, any applicable Specific Plan, and other plans and policies adopted by the Salinas City Council.***

Per the 2002 Salinas General Plan, the “High-Density Residential” designation allows for development of row houses, condominiums, and apartments. The designation allows a maximum of 24.0 units per net acre (30 with density bonus). Uses such as mobile and modular homes, public facilities, day care, churches and others that are compatible with and oriented toward serving the needs of the high-density neighborhood may also be considered. The maximum density of this land use designation may be increased in accordance with the density bonus provisions of the California Government Code and the City's Zoning Ordinance.

Per the 2002 Salinas General Plan, Focused Growth Areas are existing urbanized areas where additional growth and/or redevelopment and revitalization would be appropriate and provide

benefits to the community. By selectively increasing density of development in a manner compatible with the surrounding neighborhoods, the pressure to develop agricultural lands is also reduced.

The project site is currently designated “Residential Medium Density (8-15 du/ac)”. The proposed Amendment is consistent with Salinas General Plan policies. The proposed General Plan Amendment would change the existing designation for the project site and amend the General Plan Land Use and Circulation Policy Map to align with the proposed rezoning of the site to Residential High Density (15-24 du/ac). The Amendment would be consistent with the General Plan land use designation of the adjacent site to the east of the subject site.

The proposed “Residential High Density” land use designation is consistent with General Plan Goal H-1, by providing a range of housing opportunities to adequately address existing and projected needs in Salinas. The project also complies with General Plan Policy H-1.3, by identifying adequate sites to facilitate and encourage housing production for the existing and projected housing needs of the City. In addition, the project complies with General Plan Goal H-2, by maintaining and improving existing neighborhoods and housing stock.

Residential- High Density (R-H-2.1) provides for high density multifamily dwelling units where the minimum density is more than 15 dwelling units per net acre and the maximum density is not more than 24 dwelling units per net acre without density bonus. Per Zoning Code Section 37-30.140, the purpose of the “Residential high density (R-H)” land use designation is to provide appropriately located areas for high density and multifamily dwellings consistent with the General Plan and with standards of public health and safety established by the Municipal Code. This includes:

- Provide adequate light, air, privacy, and open space for each dwelling unit and protect residents from the harmful effects of excessive noise, inappropriate population density, traffic congestion, and other adverse environmental impacts.
- Promote development of affordable housing, housing for qualifying residents, and day care facilities by providing a density bonus for projects, which meet state and/or city density bonus requirements.
- Achieve design compatibility through the use of site development regulations and design standards.
- Protect adjoining low and medium density residential districts from excessive noise or loss of sun, light, quiet, and privacy resulting from proximity to multifamily dwellings.
- Provide sites for public and semipublic land uses needed to complement residential development or requiring a residential environment.
- Ensure the provision of public services and facilities needed to accommodate planned population densities.
- Encourage attractive and interesting residential streetscapes and high-density developments that are pedestrian-oriented and reflect traditional residential design principles and promote safe residential neighborhoods through the incorporation of crime prevention through environmental design (CPTED) features in dwelling and site design.

In order for the proposed Residential High Density Development Regulations to be permitted, the project site will need to be rezoned “Residential High Density” (R-H). The purpose of the proposed Rezone is to facilitate the production of housing which per R-H-2.1 Zoning Code Section 37-30.150(j)(1) the minimum density is more than 15 dwelling units per net acre and the maximum density is not more than 24 dwelling units per net acre without density bonus.

The proposed rezoning of the project site would be consistent with Residential High Density (R-H) District and Focused Growth (FG) Overlay District. The project would comply with the development regulations and design standards of both the R-H and FG-2 District by:

- Creating healthy neighborhood centers where residents of all economic and cultural backgrounds can live, work, walk, shop, exercise, and spend quality time outdoors.
- Increase pedestrian activity by creating neighborhood centers that are conveniently accessed by public transit.
- Encouraging creative architecture and public design that communicate a neighborhood's locale, purpose, priorities, and personality to those who use the space, and create revitalized neighborhoods through infill development and redevelopment activities.

5. *The amendment will not have the effect of reversing the policies of the Salinas General Plan, any applicable Specific Plan, and other plans and policies adopted by the Salinas City Council.*

There are no policies within the Salinas General Plan that would be reversed as a result of this amendment. There are no Specific Plans or Precise Plans applicable to the site.

6. *The amendment would not create an isolated district unrelated to adjacent zoning districts.*

The proposed rezoning will not create an unrelated zoning district because the rezoning of the project site from “from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1)” would be consistent with the adjacent zoning district to the east of the project site “Residential High Density (R-H-2.1)”.

7. *The City has the capability to provide public utilities, roads, and services to serve the uses allowed by the proposed amendment.*

Salinas is an urbanized area and public infrastructure is presently in place to serve most uses. The proposed Rezone would not create the need for additional infrastructure.

PASSED AND APPROVED this 19th day of April 2023, by the following vote:

AYES: Chairperson Gonzalez, Commissioners Manzo, McKelvey, Meeks, and Purnell

NOES:

ABSTAIN:

ABSENT: Commissioner Donohue

THIS IS TO CERTIFY that the foregoing is a full, true, and correct copy of a Resolution of the Planning Commission of the City of Salinas, that said Resolution was passed and approved by the affirmative and majority vote of said Planning Commission at a meeting held on April 19, 2023, and that said Resolution has not been modified, amended, or rescinded, and is now in full force and effect.

SALINAS PLANNING COMMISSION

(GENERAL PLAN AMENDMENT 2022-001 AND REZONE 2022-001)**

Mitigation Number	Nature of Mitigation	Result after Mitigation	Party Responsible for Implementing	Party Responsible for Monitoring: Method to Confirm Implementation	Timing for Implementation
BIO-1: Nesting Bird Surveys and Avoidance	<p>To avoid disturbance of nesting and special-status birds or migratory species protected by the MBTA and Sections 3503, 3503.5, and 3513 of the CFGC, activities related to the project site development, including, but not limited to, vegetation removal, shall occur outside of the bird breeding season (February 1 through August 30). If ground disturbance, vegetation removal or heavy equipment work must begin within the nesting season, then the project applicant shall submit evidence to the City that a qualified biologist conducted a pre-construction nesting bird survey within 14 days of the start of construction. The nesting bird pre-construction survey shall be conducted within the disturbance footprint and a 300-foot buffer.</p> <p>If nests are found, an avoidance buffer shall be established by a qualified biologist. The buffer shall be established to ensure nesting activity is not disturbed by construction activity, and shall be determined by the qualified biologist based on the species' known tolerances, the proposed work activity, and existing disturbances associated with land uses outside of the site. The buffer shall be demarcated by the biologist with bright construction fencing, flagging, construction lathe, or other means to mark the boundary. All construction personnel shall be notified as to the existence of the buffer zone and to avoid entering the buffer zone during the nesting season. No ground disturbing activities shall occur within this buffer until the qualified biologist has confirmed that breeding/nesting has completed, and the young have fledged the nest, or the nest has become otherwise inactive. Encroachment into the buffer shall occur only at the discretion of the qualified biologist.</p>	To avoid disturbance of nesting and special-status birds or migratory species protected by the MBTA and Sections 3503, 3503.5, and 3513 of the CFGC. 	then additional measures such as passive relocation during the nonbreeding season and construction buffers of 200 feet during the breeding season shall be implemented, in consultation with CDFW. In addition, a Western Burrowing Owl Exclusion Plan and Mitigation and Monitoring Plan shall be developed by a qualified biologist in accordance with the CDFW (2012) and Burrowing Owl Consortium (1993).				
CUL-1: Unanticipated Discovery of Cultural Resources	If archaeological resources are encountered during ground-disturbing activities, work within 50 feet shall be halted and an archaeologist meeting the Secretary of the Interior's Professional Qualification Standards for archaeology (National Park Service 1983) shall immediately to evaluate the find pursuant to PRC Section 21083.2. If necessary, the evaluation may require preparation of a treatment plan and archaeological testing for CRHR eligibility. If the discovery proves to be significant under CEQA and cannot be avoided by the project, additional work may be warranted, such as data recovery excavation (described below), to mitigate any significant impacts to significant resources. If the resource is of Native American origin, implementation of Mitigation Measure TCR-1 may be required. Any reports required to document and/or evaluate unanticipated discoveries shall be submitted to the City for review and approval and submitted to the NWIC after completion. Recommendations contained therein shall be implemented throughout the remainder of ground disturbance activities.	To ensure protection of cultural resources.	Applicant, or Successor in Interest.	Development and Engineering Services Department - Community Development Department	If archaeological resources are encountered during ground-disturbing activities.
GEO-1: Paleontological Resources Monitoring and Mitigation	For grading or excavation exceeding five feet in depth, the City of Salinas shall require the following: 1. Qualified Paleontologist. The project applicant shall retain a Qualified Paleontologist prior to excavations that will exceed five feet in depth. The Qualified Paleontologist shall direct all mitigation measures related to paleontological resources. A qualified professional	To ensure protection of paleontological resources.	Applicant, or Successor in Interest.	Development and Engineering Services Department - Community Development Department	During grading or excavation exceeding five feet in depth.

Mitigation Number	Nature of Mitigation	Result after Mitigation	Party Responsible for Implementing	Party Responsible for Monitoring: Method to Confirm Implementation	Timing for Implementation
	<p>paleontologist is defined by the Society of Vertebrate Paleontology (SVP) standards (SVP 2010) as an individual preferably with an M.S. or Ph.D. in paleontology or geology who is experienced with paleontological procedures and techniques, who is knowledgeable in the geology of California, and who has worked as a paleontological mitigation project supervisor for a least two years (SVP 2010).</p> <p>2. Paleontological Worker Environmental Awareness Program. Prior to the start of construction, the Qualified Paleontologist or his or her designee shall conduct a paleontological Worker Environmental Awareness Program (WEAP) training for construction personnel regarding the appearance of fossils and the procedures for notifying paleontological staff should fossils be discovered by construction staff.</p> <p>3. Paleontological Monitoring. Full-time paleontological monitoring shall be conducted during ground disturbing construction activities (i.e., grading, trenching, foundation work) of depths greater than five feet within native (previously undisturbed) sediments. Ground-disturbing activities that impact artificial fill (previously disturbed) sediments only do not require paleontological monitoring. Paleontological monitoring shall be conducted by a qualified paleontological monitor, who is defined as an individual who has experience with collection and salvage of paleontological resources and meets the minimum standards of the SVP (2010) for a Paleontological Resources Monitor. The duration and timing of the monitoring will be determined by the Qualified Paleontologist based on the observation of the geologic setting from initial ground disturbance, and subject to the review and approval by the City of Salinas.</p> <p>4. Final Paleontological Mitigation Report. Upon completion of ground disturbing activity (and curation of fossils if necessary) the Qualified Paleontologist shall prepare a final report describing the results of the</p>				

Mitigation Number	Nature of Mitigation	Result after Mitigation	Party Responsible for Implementing	Party Responsible for Monitoring: Method to Confirm Implementation	Timing for Implementation
	paleontological monitoring efforts associated with the project. The report shall include a summary of the field and laboratory methods, an overview of the project geology and paleontology, a list of taxa recovered (if any), an analysis of fossils recovered (if any) and their scientific significance, and recommendations. The report shall be submitted to the City of Salinas Community Development Department. If the monitoring efforts produced fossils, then a copy of the report shall also be submitted to the designated museum repository.				
TRA-1: VMT Reduction Program	<p>The applicant shall prepare and implement a VMT Reduction Program that reduces VMT generated by the project to VMT per capita of 9.95. The following two strategies shall be included in the Program:</p> <p>Pedestrian Network Improvements. Construct pedestrian facilities to connect the site to existing pedestrian facilities on Preston Street. Creating safe pedestrian connections would encourage future residents to walk instead of drive.</p> <p>Include Bike Parking, Pursuant to SMC Section 37-50.400. Provide bicycle parking on site, which would encourage future residents to bike instead of drive.</p> <p>In addition to the above strategies, one or several of the following travel demand management strategies shall be considered for inclusion in the VMT Reduction Program, to achieve a VMT per capita of 9.7 or less:</p> <p>Reduce On-Site Parking. Reduce the number of on-site parking spaces for future residents to less than what is required by SMC Section 20-85; or</p> <p>Implement Unbundled Parking. Separate or “unbundle” parking costs from leases or property costs, requiring those that wish to purchase parking spaces to do so at an additional cost; or</p> <p>Affordable Housing. Provide affordable, below market-rate housing on site; or</p> <p>Voluntary Travel Behavior Change Pattern. Implement a travel behavior change program by offering incentives to future residents to utilize alternative transportation modes, with at</p>	To reduce vehicle miles traveled per capita.	Applicant, or Successor in Interest.	Public Works Department – Traffic Engineering - Community Development Department - Current Planning	Prior to issuance of a building permit.

Mitigation Number	Nature of Mitigation	Result after Mitigation	Party Responsible for Implementing	Party Responsible for Monitoring: Method to Confirm Implementation	Timing for Implementation
	<p>least 75 percent of future residents participating; and Promotions and Marketing. Provide future residents with information regarding alternative transportation and travel demand management programs, with at least 75 percent of future residents participating; and</p> <p>School Carpool Program. Implement a school carpool program among future residents of the project site.</p> <p>The VMT Reduction Program shall be submitted to the City for review and approval prior to issuance of a building permit and shall demonstrate that the net VMT per capita would be 9.7 or less, using a combination of travel demand management strategies approved by the City.</p>				
TCR-1: Inadvertent Discoveries During Construction	<p>In the event that cultural resources of Native American origin are identified during grading or construction, all earth disturbing work within the vicinity of the find shall be temporarily suspended or redirected until a qualified archaeologist has evaluated the nature and significance of the find; an appropriate Native American representative, based on the nature of the find, is consulted; and mitigation measures are put in place for the disposition and protection of any find pursuant to PRC Section 21083.2. If the City, in consultation with local Native Americans, determines that the resource is a tribal cultural resource and thus significant under CEQA, a mitigation plan shall be prepared and implemented in accordance with state guidelines and in consultation with local Native American group(s) prior to continuation of any earth disturbing work within the vicinity of the find. The plan shall include avoidance of the resource or, if avoidance of the resource is infeasible, shall outline the appropriate treatment of the resource in coordination with the appropriate local Native American tribal representative and, if applicable, a qualified archaeologist. Examples of appropriate mitigation for tribal cultural resources include, but are not limited to, protecting the cultural character and integrity of the resource, protecting traditional use of the resource, protecting the confidentiality of the resource, or heritage recovery.</p>	To ensure protection of on-site tribal cultural resources.	Applicant, or Successor in Interest.	Development and Engineering Services Department - Community Development Department	If cultural resources of Native American origin are identified during grading or construction.

PROPOSED GENERAL PLAN LAND USE AND ZONING CODE DESIGNATIONS:

1 Preston Street (APN: 003-161-008-000)

**GENERAL PLAN AMENDMENT 2022-001 AND REZONE 2022-001;
AMEND THE GENERAL PLAN LAND USE DESIGNATION FROM
RESIDENTIAL MEDIUM DENSITY (8-15 UNITS/ACRE) TO
RESIDENTIAL HIGH DENSITY (15-24 UNITS/ACRE) AND REZONE
FROM RESIDENTIAL MEDIUM DENSITY (R-M-3.6) TO
RESIDENTIAL HIGH DENSITY (R-H-2.1) OF A VACANT 2.6 ACRE
SITE LOCATED AT 1 PRESTON STREET**

Oscar Resendiz, Associate Planner
Grant Leonard, Planning Manager
Community Development Department
City Council Hearing
Tuesday, June 13, 2023

Background

- Project Area
 - One (1) site totaling 2.6-acres
 - Approximately 129,202 square feet (sf)
- Project Objectives
 - Change the General Plan land use designation from Medium Density Residential (8-15 units/acre) to High Density Residential (15-24 units/acre)
 - Rezone from Residential Medium Density (R-M-3.6) to Residential High Density (R-H-2.1)
 - Encourage the development of higher density development that would provide new housing that would be consistent with the Salinas General Plan
 - Facilitate development of up to approximately 76 (anticipating a density bonus)

GPA 2022-001 / Rezone 2022-001

Environmental Review

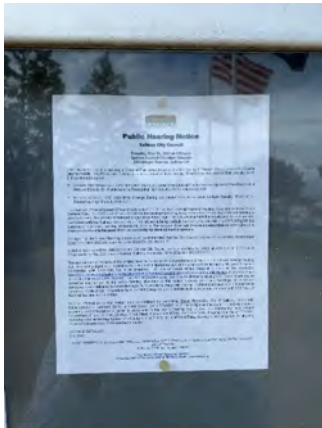

Initial Study & Mitigated Negative Declaration routed to responsible agencies on January 27, 2023:

- The proposed project will not have a significant effect on the environment because the mitigation measures outlined in the proposed Mitigation Monitoring and Reporting Program have been included in the project.
 - State Clearinghouse – January 27, 2023 (SCH Number 2023010626).
 - Posted County Clerk's Office - January 27, 2023
 - Routed to responsible agencies – January 27, 2023
 - Deadline for comments – February 26, 2023

Public Notice

- Published in Monterey Herald – 05/05/2023
- Mailed – 05/04/2023; and
- Posted – 05/04/2023

Recommended Motion

1. Approve a resolution affirming the findings, adopting the proposed Mitigated Negative Declaration and Mitigation Monitoring and Reporting Program, and approving a General Plan Amendment (GPA 2022-001) changing the General Plan Land Use designation from Residential Medium Density to Residential High Density; and
2. Adopt an Ordinance to Rezone from Residential Medium Density to Residential High Density (RZ 2022-001).

Parking Citation Fee Update

Approve a Resolution adopting the updated schedule of parking citation fines.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: MAY 16, 2023 – CONTINUED
JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS DEPARTMENT/POLICE

FROM: ROBERTO FILICE, CHIEF OF POLICE
DAVID JACOBS, PUBLIC WORKS DIRECTOR

BY: ANDREW EASTERLING, TRAFFIC ENGINEER
ANISSA TORRES, MANAGEMENT ANALYST
TONYA ERICKSON, POLICE SERVICES ADMINISTRATOR

TITLE: PARKING CITATION FEE UPDATE

RECOMMENDED MOTION:

A motion approving a Resolution adopting the updated schedule of parking citation fines (Attachment 1).

EXECUTIVE SUMMARY:

The last time the City updated the parking citation fee schedule was in 2017 and 2018. The last fee update included fees for many but not all of the municipal code and California Vehicle Code parking violations. City staff are proposing a fee update which establishes citation amounts for all of the municipal code and California Vehicle Code violations and eliminates obsolete or duplicate codes. City staff has completed a comparative analysis of nearby jurisdictions and is recommending a proposed parking citation fee update. The proposed parking citation fee update includes a complete list of parking citations and establishes a comparable rate to nearby agencies.

BACKGROUND:

In 1992, the State of California passed Assembly Bill 408, which allowed agencies to establish their own parking citation fines. The City of Salinas is allowed to establish the amount of parking violation citation fees. However, the California Vehicle Code Section 40203.5 states, “to the extent possible, issuing agencies within the same county shall standardize parking penalties.”. The City of Salinas established a bail schedule for parking violations in 1994 (Attachment 2). The bail schedule was increased in 2004 (Attachment 3) and then updated again in 2017 (Attachment 4). In 2018 three (3) new municipal code parking violations were added for oversize vehicles (Attachment 5). Throughout all of the updates there remain several municipal code and California Vehicle Code violations that the City does not currently have an adopted citation fee for. The

proposed parking citation fee update includes a complete and comprehensive list of parking citations and establishes a comparable rate to nearby agencies, in accordance with California Vehicle Code Section 40203.5.

City staff has prepared the proposed schedule of parking citation fines (Attachment 1). The update includes a complete fee schedule for every municipal code and California Vehicle Code violation used by parties conducting Parking Enforcement in the City of Salinas. In accordance with California Vehicle Code requirements, staff completed a comparative analysis of parking fines adopted in nearby cities. Several nearby cities were non-responsive and City staff were not able to obtain rates from every agency within the County. The analysis includes Monterey, Marina, Seaside, Carmel by the Sea, Soledad, and Greenfield. King City and Gonzales were non-responsive to staff requests. Each city may have different municipal code violations, and not every responsive City had a complete bail schedule for all of the parking-related municipal codes and California Vehicle Code violations. In order to have a more complete sampling of other agencies, City staff also included a comparison to Watsonville, Santa Cruz, and Gilroy to supplement the available data from within the County.

The attached proposed updated schedule of parking citation fees provides a comparison of the available parking citation fees for similar violations from other nearby cities. City staff has included an average calculation from the available data for comparison. In some cases, there are notable statistical outliers in the sample that effects the average calculation, and some consideration was given to their effect. Generally, staff's recommended citation fee amount is based off of the average calculation rounded to the nearest \$5 increment or aligned with similar types of parking violations. The baseline parking violation was set at \$45 for many of the common parking violations. Citations for code sections with similar or the same violation are proposed with consistent citation fee amounts to standardize the fee schedule as much as possible.

TRAFFIC AND TRANSPORTATION COMMISSION:

The parking citation fee update was presented to the Traffic and Transportation Commission at its January 12, 2023, meeting. Commissioner Cox recommended modifying the proposed fee schedule to align citations CVC 4000(a)(1): Expired Registration, and CVC 5204(a): Tab not displayed closer to the surveyed average. An amended motion was made to recommend City Council approve the parking citation fee schedule (Attachment 1), with the exception of violations CVC 4000(a)(1): Expired Registration set to \$65, and CVC 5204(a): Tab no Displayed set to \$55. The Commission voted (5-0) to approve the amended recommendation to approve the parking citation fee schedule (Attachment 1), with the exception of violations CVC 4000(a)(1): Expired Registration set to \$65, and CVC 5204(a): Tab no Displayed set to \$55.

FINANCE COMMITTEE:

The parking citation fee update was presented to the Finance Committee at its March 7, 2023, meeting. The Committee voted (2-1) to approve the proposed parking citation fee schedule (Attachment 1). Where as committee members Craig, and Osornio voted in support of the item and committee member Rocha voted against the item.

CEQA CONSIDERATION:

Not a Project. City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) pursuant to Sections 15378 and 15061(b)(3).

STRATEGIC PLAN INITIATIVE:

Parking enforcement is a public service which supports the Council's initiatives of "Public Safety", "Economic Development," and "Infrastructure and Environmental Sustainability". Parking regulations may exist for a variety of reasons. Red zones, and other no parking zones are typically established for public safety purposes to keep sight lines clear or to provide emergency service access. Occasional, parking regulations may be used to support businesses and provide parking turnover for customer convenience. In some cases, parking regulations also serve provide sweepers access to the curb to improve infrastructure and environmental sustainability.

FISCAL AND SUSTAINABILITY IMPACT:

There is no impact to the General Fund. The Parking Enforcement Program is an enterprise account where the revenues offset the operating cost. The proposed updated schedule of parking citation fines is not anticipated to substantially change the Parking Enforcement Program operations.

Attachment 6: 2018 Parking Fines Update

RESOLUTION NO. _____ (N.C.S.)

**A RESOLUTION OF THE SALINAS CITY COUNCIL ADOPTING THE UPDATED
SCHEDULE OF PARKING CITATION FINES**

WHEREAS, the last time the City updated the parking citation fee schedule was in 2017 and 2018; and

WHEREAS, the last fee update included fees for many but not all of the municipal code and California Vehicle Code parking violations; and

WHEREAS, City staff are proposing a fee update which establishes citation amounts for all of the municipal code and California Vehicle Code violations, and eliminates obsolete or duplicate codes. City staff has completed a comparative analysis of nearby jurisdictions and is recommending a proposed parking citation fee update; and

WHEREAS, the proposed parking citation fee update includes a complete list of parking citations and establishes a comparable rate to nearby agencies; and

WHEREAS, the Commission voted (5-0) to approve an amended recommendation to approve the parking citation fee schedule (Attachment 1), with the exception of violations CVC 4000(a)(1): Expired Registration set to \$65, and CVC 5204(a): Tab no Displayed set to \$55; and

WHEREAS, the Finance Committee voted (2-1) to approve the proposed parking citation fee schedule (Attachment 1); and

WHEREAS, the City of Salinas has determined that the implementing the parking restrictions is exempt from the California Environmental Quality Act (CEQA) Guidelines (Section 15301, Class 1). The project consists of the operation, repair, or minor alteration of public streets involving no expansion of use. There would be no significant effect on the environment.

NOW, THEREFORE, BE IT RESOLVED that the Salinas City Council hereby adopts the updated schedule of parking citation fines (Attachment 1).

PASSED AND APPROVED this 13th day of June 2023, by the following vote:

RESOLUTION NO. 15102 (N.C.S.)

RESOLUTION ADOPTING INCREASE IN BAIL
SCHEDULE FOR PARKING VIOLATIONS

Whereas, the bail schedule for parking violations was last amended in October 1991 by Resolution No. 14312; and

Whereas, the Finance Department has reviewed the current bail schedule; and

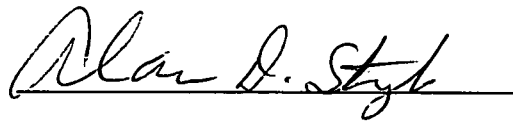

Whereas, an increase in particular bail amounts will align the City's bail schedule with that of Monterey County;

Now, therefore, be it resolved by the Council of Salinas that the attached "Bail Schedule for Parking Violations" be adopted.

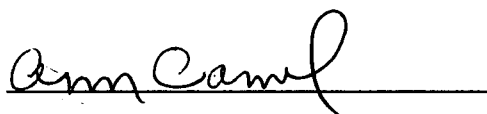

PASSED AND ADOPTED this 12th day of April, 1994,
by the following vote:

AYES: Councilmembers Fernando Armenta, Anna Caballero, Jim Collins, Gloria De La Rosa, Steve Ish, Roberto Ocampo, and Mayor Alan Styles

SUBJECT: PARKING FINE INCREASE

Department Director Approval

Da. M. Ortega
Finance Review

Tom L. Kever
Attorney Review

Christine Davis
City Manager Approval

BACKGROUND:

On April 12, 1994, the City's bail schedule for parking violations was amended by Resolution No. 15102. The bail amount was increased by \$5.00 to align the City's bail schedule with that set by Monterey County.

Section 40203.5 of the California Vehicle Code states: "The schedule of parking penalties for parking violations, late payment penalties, administrative fees and other related charges for parking violations shall be established by the governing body of the jurisdiction where the notice of violation is issued. To the extent possible, issuing agencies within the same county shall standardize parking penalties."

Researching bail schedules for other agencies within Monterey County indicates that the City of Salinas could raise penalties charged for most parking violations by 20%. The 20% penalty increase for a parking violation generally amounts to a \$5.00 increase for the majority of parking violations. For reference, a list of parking violations with current and proposed penalties is attached to this report.

Under the new proposed bail schedule, the basic overtime parking fine will be increased from \$20.00 to \$24.00. The County will receive \$5.00 with the remaining \$19.00 retained by the City.

For the City, a 20% increase in parking citation revenue should generate approximately \$50,000 annually and would be deposited in the Traffic Safety Fund.

ISSUE

Shall Council adopt the proposed bail schedule increase?

ALTERNATIVES AVAILABLE TO COUNCIL

1. Approve the suggested bail schedule increase for parking violations.
2. Not approve the increase for parking violations.

FISCAL IMPACT

Based on the parking fine revenues for the last two years, the proposed increase will generate approximately \$50,000 annually.

CONCLUSION AND RECOMMENDATION:

Staff recommends Council adopt a Resolution establishing the new bail schedule for parking violations.

Distribution:

City Manager
City Attorney
Finance Director
Chief of Police
City Clerk

Re: Bail and Parking Fees

Pursuant to your request, we researched whether the City should increase its bail and/or parking fees. The City may increase parking ticket fees as long as those fees are standardized with other cities within Monterey County. Based on the comparison set forth in the table below, the City should consider increasing at least some of its parking ticket fees to align its bail schedule with other cities in Monterey County. The City is not limited in its ability to increase parking lot use charges.

Bail Schedule:

Vehicle Code §40203.5 provides that the City may establish a schedule of penalties for parking violations and late payments, although to the extent possible, the fees must be standardized with other cities in the county. For some specific parking infractions, there are statutorily prescribed minimum and maximum amounts that may be assessed.

The City's last fee increase for parking violation bail amounts took place in April 1994 by Resolution No. 15102. The purpose of the fee increase at that time was to align the City's bail schedule with that of other cities in Monterey County. In the attached table, the City's current bail amounts for some violations are compared with those of other cities in Monterey County including Monterey, Seaside, Carmel, and Marina. We obtained the fees from Santa Cruz, Hollister and San Jose for informational purposes only.

The citation fees for the City of Carmel have been in effect for over eight years. The City of Seaside citation fees have been in effect for more than five years. Some of the City of Marina's fees were increased in 1999. The City of Monterey's fees have been in effect for eight years. None of those cities have plans to raise their fees. The City of San Jose is currently increasing its fees for some citations, however, all fees will be increased sometime next year.

Since the City of Salinas' fees have been in effect for almost 10 years, and some of the fees are lower than those of other cities in Monterey County, the fees could be increased.

	Salinas	Seaside	Marina	Monterey	Carmel	Santa Cruz	Hollister	San Jose
Handicapped Parking Zone	\$280	\$275	\$275	\$275	\$275	\$275	\$250	\$280

Loading Zone	\$25	\$30	\$35	\$25		\$25	\$30	\$28
Alley parking	\$25	\$30	\$35			\$25	\$20	\$28
Undesignated space	\$25			\$25	\$20	\$25	\$20	
Abandoned Vehicle	\$100	\$250	\$270			\$100		
Bus Zone Parking	\$25		\$35	\$25	\$25	\$250	\$20	\$255

Parking Lot Fees:

Pursuant to Resolution No. 13867, Parking Lot #17 has had a monthly parking fee of \$25.00 since August 1990. Pursuant to Resolution No. 14875, Parking Lot #5 has had a monthly parking fee of \$40.00 since July 1993. Most of the parking garages for the City of Monterey have a \$32.50 monthly charge, or quarterly permits for \$90.00. Therefore, we should consider increasing these fees.

RESOLUTION NO. 21470 (N.C.S.)

**A RESOLUTION APPROVING PARKING FINES UPDATE FOR THE CITY OF
SALINAS**

WHEREAS, Section 40203.5 of California Vehicle Code gives the City authority to set parking penalties for parking violations; and

WHEREAS, on June 19, 2018, the Salinas Council adopted Ordinance No. 2604 to prohibit certain over-sized vehicles from parking in the city limits; and

WHEREAS, staff has reviewed the current parking fines schedule and has determined that there currently is no parking fine for parking an over-sized vehicle in violation of Ordinance No. 2604 and therefore desires to add a parking fine for such violations to the City's Parking Enforcement Program Bail Schedule.

NOW, THEREFORE, BE IT RESOLVED that the Salinas City Council hereby establishes a monetary penalty in the amount of \$44.00 for the first violation, \$150.00 for the second violation, and \$250.00 for the third and subsequent violations of Ordinance No. 2604; and

BE IT FURTHER RESOLVED that said fees are to be effective on September 4, 2018; and

BE IT FURTHER RESOLVED that the monetary penalties set forth in this Resolution are in addition to whatever other penalties and sanctions are provided for in Ordinance No. 2604.

PASSED AND APPROVED this 4th day of September 2018, by the following vote:

AYES: Councilmembers: Barrera, Craig, Davis, De La Rosa, McShane, Villegas and Mayor Gunter

2023 Salinas Municipal Airport Rates and Fees Schedule

Approve a Resolution adopting the 2023 Salinas Municipal Airport Rates and Fees Schedule.

CITY OF SALINAS

CITY COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS, AIRPORT DIVISION

FROM: DAVID JACOBS, PUBLIC WORKS DIRECTOR

BY: BRETT J. GODOWN, AIRPORT MANAGER

TITLE: 2023 SALINAS MUNICIPAL AIRPORT RATES AND FEES
SCHEDULE

RECOMMENDED MOTION:

A motion to approve a resolution approving the 2023 Salinas Municipal Airport Rates and Fees Schedule.

RECOMMENDATION:

It is recommended City Council approve a resolution approving the 2023 Salinas Municipal Airport Rates and Fees Schedule.

BACKGROUND:

The City of Salinas owns and operates the Salinas Municipal Airport. As set forth by the Federal Aviation Administration (FAA) by way of its Airport Sponsor Assurances, any airport developed with Federal grant assistance is required to operate for the use and benefit of the public and is to be made available to all types, kinds, and classes of aeronautical activity on fair and reasonable terms and without unjust discrimination. The FAA provides grant funding to the City of Salinas for capital needs at the Salinas Municipal Airport. The obligation to make the Airport available to the public does not preclude the City from recovering the costs of operating, maintaining, and developing the Airport through fair and reasonable rates, charges, and fees. The City has the option to utilize various methods to assess Airport user rates, charges, and fees for the public use or tenancy of the Airport property and facilities.

Annually, the Airport Rates and Fees Schedule is adjusted to reflect changes in the aeronautical market conditions. Fees associated with property and facilities, such as hangars and buildings, are adjusted based on market comparables. Non-property fees and charges, such as gate cards, are adjusted based on cost recovery conditions. The San Francisco Bay Area Consumer Price Index (SFCPI or CPI) is the historical rate adjustment mechanism used to adjust the rates and fees at the Salinas Airport as rates and fees become out of alignment with market comparables.

The majority of Rates and Fees will remain stable and experience no change. The primary change to the 2023 Rates and Fees Schedule reflects changes to month-to-month agreements (e.g., Aircraft

Storage Hangars) based on market comparables and adjusted using changes in the CPI. Hangar rates were last adjusted in September 2021. Due to timing, migrating from a stand-alone approval from City Council to incorporating Rates and Fees into the Citywide Schedule, adjusting hangar rates in July 2022 was bypassed.

Additional adjustments are being recommended for several facilities. Hangar rows A, B, C, D, E, P, and G require additional adjustments to align them with market comparables. Specifically, Hangar rows D, E, and P require additional maintenance as the facilities age. Even minor repair requires months and, in some cases, years to recoup expenditures on the facilities.

Market Rent Analysis Adjustment Process

The hangar rate adjustment analysis is a multi-step process. First, an Airport Hangar Market Study is prepared (attached). Second, hangar vacancies and the hangar wait-list are analyzed to ensure the market is healthy. Third, the airport budget and capital program are reviewed to ensure rates and fees adjustments are consistent with the budget. Fourth, a Consumer Price Index Analysis is reviewed and applied to appropriate rates. Fifth, the analysis is brought before the Airport Commission over several meetings for advisory comments and questions. Sixth, notices (mail, email, Airport Commission meeting publications) are disseminated to the airport tenants and businesses affected by fee adjustments. Seventh, the Airport Manager attends monthly pilot association meetings advising attendees of the process and proposed rates and fees adjustments.

Tenant Notification

On February 27 and March 17, 2023, Staff transmitted an electronic notice to the airport's email distribution list presenting the revised Rates and Fees adjustment. On April 21, 2023, Staff transmitted a notice via U.S.P.S. to the Tenants (agreement, permit, and/or leaseholders) using the legal address on file with the City, presenting the proposed 2023 Airport Rates and Fees Schedule. From November 2022 – March 2023, Airport Tenants were notified and provided the Airport Commission Agendas. These meetings either had the Airport Rates and Fees Schedule as an Administrative Report, Presentation, or Consideration Agenda Item.

Commission Recommendation

The proposed amendments to the Rates and Fees Schedule were presented at the January 26, February 26, and March 23, 2023, Airport Commission meetings. At the March 23, 2023, Airport Commission meeting, the Airport Commission unanimously recommended City Council adopt a resolution approving the 2023 Salinas Municipal Airport Rates and Fees Schedule. Further, at the March 23, 2023, Airport Commission meeting, no dissenting opinions or comments were received from the general public.

ANALYSIS:

Aircraft Storage Hangars Market Comparables

Fees associated with property and facilities, such as hangars and buildings, are adjusted based on market comparables. The Airport uses Paso Robles, Watsonville, Hollister, Santa Clara County Airports, Hayward, and Livermore as comparable market facilities.

This year, staff was able to visit each airport and evaluate and document comparable facilities. The results are presented in the attached documents: Airport Hangar Market Study, Airport Hangar Market Study Analysis Documents, and the 2023 Airport Rates and Fees Schedule.

CPI Data

The Airport uses the SFCPI as the adjustment mechanism as the primary means to adjust rates and fees at the Salinas Municipal Airport. The previous [ending] data point used to adjust hangar rents is from February 2021 (304.387). The current data point being used to adjust hangar rents is from December 2022 (331.222). The analysis is as follows:

$$\frac{\text{New CPI} - \text{Old CPI}}{\text{Old CPI}} = \text{rate (100)} = \text{CPI \%} \qquad \frac{26.835}{304.387} = .0882 (100) = 8.82\%$$

Additional Adjustments

In addition to the 8.82% adjustment, the following hangars are being recommended for additional adjustments to align them more closely with market comparables: A, B, C, D, E, P, and G. The additional adjustments will more closely align the rates with hangars on the airport, with airports/hangars in our market study area, and will provide additional revenue to offset the increase of maintenance and rehabilitation due to the age of the hangar.

The Papa Row Hangars, also known as the Porta-Ports, are being recommended to adjust to \$150.00 per month (\$0.17 cents per square foot). This would raise the current monthly rent by \$30.00 from \$120.00. \$150.00 is relatively low compared to other airports with Porta-Ports. Several of the porta-ports have been rehabilitated over the last seven years. With their age, it is typical to spend several thousand dollars rehabilitating one unit. In some cases, it can take several years to amortize the maintenance investment. Adjusting the rate closer to market comparables will accelerate the amortization period. In both the short and long term, economically, it is better to maintain the facilities (versus removing them) because airworthy based aircraft provide tower operations, buy fuel from the fuel provider, use maintenance facilities at the airport, and generally add to the aviation community.

Hangar rows A, B, C, D, and E are being recommended to adjust to \$0.23 cents per square foot. Comparatively speaking, the new proposed cost per square foot for the south side hangars is approximately \$0.27 per square foot.

Example. The current rate for the A and B rows is \$186.00 per month. The current rate plus the CPI (8.82%) is \$202.00. The recommended adjustment to \$0.23 p/sq' would adjust the monthly rent to \$208.00.

Hangar row G is being recommended to adjust to \$90.00 per month.

The monthly single-engine tie-down is being recommended to adjust to \$70.00 per month.

CEQA/NEPA CONSIDERATION:

The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

This action complements the City Council's Goals for Investment Strategies and Operational Efficiencies.

DEPARTMENTAL COORDINATION:

Starting in 2024, the Airport Rates and Fees Schedule will be included in the Citywide rates and fee schedule.

FISCAL AND SUSTAINABILITY IMPACT:

It is estimated that the revised rates and fees will positively impact the airport enterprise fund by \$65,000 annually.

2023 Airport Rates and Fees Schedule
Resolution – 2023 Salinas Municipal Airport Rates and Fees Schedule

RESOLUTION NO. _____(N.C.S)

**A RESOLUTION ADOPTING A REVISED
SALINAS MUNICIPAL AIRPORT RATES AND FEES SCHEDULE**

WHEREAS, on June 13, 2023, the Salinas City Council held a duly noticed public hearing to consider proposed amendments Salinas Municipal Airport Rates and Fees Schedule; and

WHEREAS, pursuant to City of Salinas Resolution No. 19296, it was resolved by the Salinas City Council that the Salinas Municipal Airport Rates and Fees shall be increased annually as recommended by City Staff; and

WHEREAS, the City Council has determined that it is essential to support a process of adjusting Airport Rates and Fees to ensure that the Airport Enterprise Fund remains viable; and

WHEREAS, at the March 23, 2023, Airport Commission Meeting, the Airport Commission recommended that the City Council approve the 2023 Airport Rates and Fees Schedule.

NOW, THEREFORE, be it resolved by the City Council of Salinas that the attached Airport Rates and Fees Schedule to this resolution is hereby adopted as the schedule of rates and fees for the Salinas Municipal Airport and will become effective August 1, 2023; and

BE IT FURTHER RESOLVED that the schedule of rates and fees hereby adopted pursuant to this resolution shall be increased annually as recommended by City staff and the Salinas Airport Commission and approved by the Salinas City Council.

PASSED AND APPROVED this 13th day of June, 2023, by the following vote:

**SALINAS CITY COUNCIL
NOTICE OF PUBLIC HEARING**

JUNE 13, 2023, 4 P.M.

A public hearing will be held before the Salinas City Council on Tuesday, June 13, 2023, at 4:00 p.m. in the City Hall Rotunda, 200 Lincoln Avenue, Salinas, to consider authorizing adjustments to the Salinas Municipal Airport Rates and Fees Schedule effective July 1, 2023.

City meetings may be observed live at <https://salinas.legistar.com/Calendar.aspx>, on The Salinas Channel on YouTube at <https://www.youtube.com/user/thesalinaschannel>, or on Comcast Channel 25. If you wish to make a comment on a specific agenda item, please submit your comment via email by 2:00 P.M. on the day of the meeting to the City Clerk at PublicComment@ci.salinas.ca.us.

Additional information, including fee cost, may be obtained by contacting Brett Godown, Airport Manager, 758-7214, 342 Airport Blvd., Salinas 93905. Disability-related modification or accommodation, including auxiliary aids or services, may be requested by any person with a disability who requires a modification or accommodation in order to participate in any meetings for this project. Requests should be referred to the City Clerk's Office at (831) 758-7381 as soon as possible but by no later than 5 p. m. of the last business day prior to the scheduled meeting. Hearing impaired or TTY/TDD text telephone users may contact the City by dialing 711 for the California Relay Service (CRS) or by telephoning any other service provider's CRS telephone number.

Fiscal Year 2024 Operating and Capital Improvement Budgets and Annual Appropriations Limit

Approve a Resolution approving the Fiscal Year 2024 Proposed Operating Budget for the City of Salinas and Successor Agency to the former Salinas Redevelopment Agency; the Fiscal Year 2024 Capital Improvement Budget for the City of Salinas; and Resolution establishing the appropriations limit for fiscal year 2024 at \$310,220,680.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: FINANCE

FROM: STEVEN S. CARRIGAN, CITY MANAGER

BY: MARK ROBERTS, DIRECTOR OF FINANCE
DANIELLE CLAYTON, FINANCE MANAGEMENT ANALYST
ABE PEDROZA, FINANCE MANAGEMENT ANALYST
JIM PIA, ASSISTANT CITY MANAGER
DEPARTMENT DIRECTORS AND STAFF
FINANCE DEPARTMENT

TITLE: FISCAL YEAR 2024 OPERATING AND CAPITAL
IMPROVEMENT BUDGETS AND ANNUAL APPROPRIATIONS
LIMIT

RECOMMENDATION:

Staff recommends City Council approve resolutions adopting:

- 1) the Fiscal Year 2024 Proposed Operating Budget for the City of Salinas and Successor Agency to the former Salinas Redevelopment Agency;
- 2) the Fiscal Year 2024 Capital Improvement Budget for the City of Salinas; and
- 3) a resolution establishing the appropriations limit for fiscal year 2024 at \$310,220,680.

EXECUTIVE SUMMARY:

The operating and capital improvement budget transmittal letters summarize and highlight their respective budgets. The operating budget transmittal letter may be found on pages i-x of the Fiscal Year 2024 Proposed Operating Budget (PDF pages 13-22). The capital improvement budget transmittal letter may be found on pages i-v of the Fiscal Year 2024 Capital Improvement Budget (PDF pages 5-9).

STRATEGIC PLAN INITIATIVES:

The proposed budgets promote and support all of the Council’s Strategic Plan goals: Economic Development, Housing and Affordable Housing, Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors, and Effective and Culturally Responsive Government.

DEPARTMENTAL COORDINATION:

Development of the budget is a City-wide collaborative effort involving Salinas residents and all City departments.

FISCAL AND SUSTAINABILITY IMPACT:

Below are the summarized totals of the proposed fiscal year 2024 City of Salinas budget.

Operating Budget:	
General Funds	\$ 146,843,146
Other Operating Funds	<u>70,177,032</u>
Total Operating Budget	217,020,178
Capital & VRF Budget	<u>31,417,810</u>
Total City Budget	<u><u>\$ 248,437,988</u></u>

The proposed fiscal year 2024 City of Salinas budget is balanced.

City of Salinas

FINANCE DEPARTMENT • 200 Lincoln Ave • Salinas, California 93901

(831) 758-7420 • (831) 758-7937 (Fax) • www.ci.salinas.ca.us

June 13, 2023

Honorable Mayor and City Council of the City of Salinas:

It is my privilege to present the Fiscal Year 2024 Proposed Operating Budget.

Executive Summary

As the City Manager, I continually seek to listen and understand the priorities of the community and work with the City Council, staff, and the community to prepare a budget that invests in what matters most as we recover from the pandemic. This fiscal year 2024 budget has incorporated input my staff and I have received, and I believe this is a very good budget proposal. It is a budget that celebrates the Alisal through \$1.0 million of Measure G funding for the Alisal Vibrancy Plan and \$16.5 million over the next 6 years. The City continues deploying approximately \$7.5 million of Measure X, SB1, and Gas Tax funding for maintaining and improving the City's roads and sidewalks. This proposed budget includes important reorganizations of certain departments and divisions as an investment toward better service to the community. This budget maintains our existing service levels for all departments but makes strategic increases on priority investments.

Budget Summary

Operating Budget:

General Funds	\$ 146,843,146
Other Operating Funds	<u>70,177,032</u>
Total Operating Budget	217,020,178
Capital & VRF Budget	<u>31,417,810</u>
Total City Budget	<u>\$ 248,437,988</u>

As shown in the table above, the City's proposed fiscal year 2024 General Fund, Measure E Fund and Measure G Fund operating budget totals \$146,843,146. The remainder of the budget includes special revenue funds, internal services, enterprise operations, assessment and maintenance districts, grants, agencies, and debt service funds totaling \$70,177,032 and the Capital Improvement and Vehicle Replacement Budget totaling \$31,417,810. The total City Budget is \$248,437,988.

City Council Goals & Objectives and Community Outreach

The City budget is developed in alignment with the City Council Strategic Plan with Goals and Objectives for 2022-2025. The budget was also developed with feedback from extensive

community outreach, including four budget meetings, an online survey, and dozens of “pop-up” discussions with residents in various locations.

Budget Process

The fiscal year 2024 budget process began in December upon the release of an online budget survey to the community and continued through the spring with community budget meetings. Additionally, in February, staff began working on the Capital Improvement Budget. Budget instructions and budget packets were distributed to each department, which included a budget calendar, organizational charts, prior year department budget narratives and a template for performance measures. Department staff received refresher training and instruction on how to enter and use the New World budget system. In April 2023, staff reviewed and projected the revenue forecast. Individual departmental budget meetings were conducted with the Director of Finance during March and April, followed by meetings between Finance staff and the City Manager, and an Executive team meeting. Staff presented the CIP and operating budgets to City Council on May 23, 2023.

Fiscal Outlook and Sustainability – General Funds

The City’s underlying structural deficit has improved and requires constant monitoring. The main reason for the structural deficit, where the expenditure growth exceeds the revenue growth continually each year, is a result of the compensation costs growing faster than the projected revenue. Controlling the main cost drivers of wages, pension, unfunded accrued liability, health insurance, and workers’ compensation continues to be the key to managing this projected problem. Additionally, the state of the nation, state and local economy, and any recessionary factors, will have an affect on future budgets. The City has been implementing the Salinas Plan and is achieving results that are helping eliminate the long-term structural deficit, such as eliminating flex and management leave, and changes in employee health cost sharing for all bargaining units.

The Salinas Plan and Fiscal Sustainability

The Salinas Plan is a Ten-Year Plan designed to provide the City with a path toward maintaining a long-term balanced budget while preserving City services and addressing the affordable housing crisis. The plan provided thirty-two recommended initiatives. The thirty-two recommended initiatives are now in various stages of progress. An important refresh of the Salinas Plan was recently completed and is described in more detail in the corresponding section of this document.

State Budget and Local Impacts

Governor Gavin Newsom released his revised 2023-24 State Budget proposal on May 12, 2023. The revised budget included \$224.1 billion in General Fund spending, \$79.5 billion from special funds, and \$2.9 billion from bond funds. No adverse impacts on local government are expected.

Revenue Assumptions

The City’s fiscal year 2024 proposed budget is built using economic assumptions to estimate revenue. Staff uses a variety of sources to determine revenue assumptions including the

Monterey County Assessor's office, HdL, Coren & Cone (the City's property tax auditors and sales tax consultants/auditors), the State Controller's Office, the State Board of Equalization, and other sources as appropriate. Assumptions for the major General Fund revenue sources are:

- Property Tax and Property Tax in Lieu of VLF
 - Assumes 5.7% growth from last year's fiscal year 2024 adopted budget based on current trends and factoring in the Monterey County Assessor estimates.
- Sales & Use and Transactions & Use (Measures E & G) Taxes
 - Assumes 3.6% increase from the prior year adopted budget largely based on current year performance and projected economic trends.
- Utility Users Tax
 - Assumes 0.8% increase to the prior year adopted budget.
- Franchise Fees
 - Assumes 8.4% increase to the prior year adopted budget.
- Business License Tax
 - Assumes 1.8% increase from the prior year adopted budget largely based on current year performance and projected trends.

Major Revenue Summary

Ninety percent of the City's general fund (combined General, Measure E & Measure G Funds) revenue comes from the five revenue sources listed above. Seventy – four percent of revenue comes from two major revenue sources: property tax and sales tax (including Measure E and Measure G revenues); while approximately sixteen percent comes from utility users taxes, franchise fees, and business license tax.

Fiscal year 2024 general funds revenue estimates total \$172,861,750. The major revenue categories are classified and discussed below:

General Funds				
	FY 24	FY 23	\$	%
	Proposed	Adopted	Difference	Difference
Sales & Use Tax	\$38,700,000	\$37,570,000	\$1,130,000	3.0%
Transaction & Use Tax	51,300,000	49,269,000	2,031,000	4.1%
Property Tax	21,540,500	20,172,046	1,368,454	6.8%
Property Tax In Lieu of VLF	16,300,000	15,620,539	679,461	4.3%
Utility Users Tax	12,000,000	11,900,000	100,000	0.8%
Franchise Fees	10,335,000	9,535,000	800,000	8.4%
Business License Tax	5,800,000	5,700,000	100,000	1.8%
Other Revenues	16,886,250	14,966,400	1,919,850	12.8%
Total	\$172,861,750	\$164,732,985	\$8,128,765	4.9%

FY 24 Estimated Revenue

Property Tax

The amount of property tax the City receives is determined based on growth and declines in property values. The City's historical property assessed value growth/declines for property tax collections are shown in the graph below:

Source: Monterey County Tax Assessors - Tax Rate Books.

The City's annual property tax is estimated to increase by \$1.4 million or 6.8% from the prior year.

General Fund Sales Tax, Measure E & Measure G

The City's share of the 7.5% sales & use tax collected on retail sales is one percent (1.0%), which is credited to the General Fund. The City also receives revenues from a 0.5% transaction & use tax approved by Salinas' voters in November 2005 and extended with no sunset in November 2012. These revenues are accounted for separately in the Measure E Fund, so named for the ballot measure approving/extending the tax. On November 4, 2014, voters approved a one cent transaction & use tax similarly referred to as "Measure G" for the ballot measure approving it, proceeds of which are reported in the Measure G Fund.

HdL, the City's sales tax consultants/auditors, and their partnership with Beacon Economics, have evaluated trends in each sector and national and economic drivers. Staff is estimating an 3.6% increase when comparing to the fiscal year 2023 adopted budget. Fiscal year 2024 General Fund sales tax revenue is estimated to be \$38,700,000, Measure E revenue is estimated at \$17,100,000, and Measure G at \$34,200,000.

General Funds Expenditures

The combined fiscal year 2024 general funds preliminary operating budget totals \$146,843,146, a 9.8% increase from last year's adopted total of \$133,738,207. Police and Fire expenditures represent 60.6% of the operating budget. The proposed fiscal year 2024 General, Measure E and G Funds operating budget, by department activity is as follows:

The changes from prior year's adopted budget are shown in the following table.

Department	FY 24 Proposed Budget	FY 23 Adopted Budget	%	Change	% Change
Admin & City Council	\$ 7,345,725	\$ 2,237,178	5.0%	\$ 5,108,547	228.3%
City Attorney	920,577	1,026,003	0.6%	(105,426)	-10.3%

Fire	28,843,608	27,895,447	19.6%	948,161	3.4%
Human Resources	1,927,090	1,726,279	1.3%	200,811	11.6%
Non Departmental	8,126,260	6,197,310	5.5%	1,928,950	31.1%
Police	60,085,120	57,452,491	40.9%	2,632,629	4.6%
Public Works	13,712,737	11,783,688	9.3%	1,929,049	16.4%
Library and Comm. Svcs.	14,463,221	13,485,862	9.8%	977,359	7.2%
Total Exp. Budget	\$ 146,843,146	\$ 133,738,207	100.0%	\$ 13,104,939	9.8%

Personnel costs, 77.1% of the budget, continue to increase in all departments with the main cost drivers including salaries, retirement, health insurance, and workers compensation. Rising costs of services and supplies are seen amongst most of the divisions and account for a large portion of increases.

Measure E

Measure E expenditure budget totals \$13,525,058. The total revenue budget is estimated at \$17,350,000 (includes investment earnings), which is a \$0.9 million increase from last year.

Compared to the prior year adopted budget, the total expenditure budget increased by \$670,454 as shown in the following table.

Measure E **FY 24 Operating Budget**

Department	FY 24 Proposed Budget	FY 23 Adopted Budget	%	Change	% Change
Administration	\$ 58,000	\$ -	0.4%	\$ 58,000	0.0%
Finance	8,000	63,000	0.1%	(55,000)	-87.3%
Fire	-	44,293	0.0%	(44,293)	-100.0%
Non Departmental	250,000	171,700	1.8%	78,300	45.6%
Police	4,409,331	4,347,419	32.6%	61,912	1.4%
Library and Comm. Svcs.	8,799,727	8,228,192	65.1%	571,535	6.9%

The number of positions funded by the Measure E proposed budget for fiscal year 2024 are summarized as follows:

Police	21.0
Parks & Recreation	16.0
Youth Serv. & Com. Engagement	2.0
Library	<u>41.0</u>
Total Positions	<u>80.0</u>

Please see the Measure E section of this Operating Budget document for more details on Measure E.

Measure G

On May 20, 2023, the Measure G Committee met and received a presentation from staff on the budget proposal.

Fiscal year Measure G revenue is estimated to be \$34,625,000 (includes investment earnings). This represents a \$1,671,000, or 5.1% increase from the adopted fiscal year 2023 revenue budget of \$32,954,000. The fiscal year 2024 budget includes \$9,385,000 in capital improvement projects, \$7,159,620 in transfers out to mainly fund the new Public Safety Building debt service and internal service charges, and a \$24,117,782 operating budget. The CIP includes such projects as the Alisal Vibrancy Plan, soccer field at Cesar Chavez Park, facilities ADA improvements, Northgate Dog Park, and streets/sidewalk improvements.

The details of the proposed capital projects are in the capital improvement budget document for fiscal year 2024.

Total Positions	<u><u>106.9</u></u>

Please see the Measure G section of this Operating Budget document for more details on Measure G.

Pension Programs

Most California cities participate in the California Public Employees' Retirement System (CalPERS) retirement program. The cost of providing retirement benefits to employees remains a challenge to cities. Retirement costs represent 22% of total personnel costs.

Under the Governor's pension reform law called Public Employees' Pension Reform Act of 2013 (PEPRA), new employees began to pay 50% of the normal costs of the pension. Existing city employees or new employees that have been active members in CalPERS (without separation for more than six months) continue to pay under the existing rates. City Public Safety – Police and Fire employees pay twelve (12%) percent of base salary into CalPERS, which was phased in from nine (9%); non-public safety employees pay seven (7%) percent. Under the PEPRA law, the retirement formula is 2% at 62 for non-public safety employees and 2.7% at 57 for safety employees. The City has negotiated other formulas for safety employees.

Additionally, CalPERS applies a discount rate when computing City funding obligations under the program. This is the long-term interest rate used to fund future pension benefits, and is also known as the assumed rate of return on investments. The lower the percentage, the more cities pay. It now stands at 6.8%, down from 7.5% as recently as 2018.

Capital Improvement Program

The Capital Improvement Budget includes a number of general funds investments. Recommended General Fund items total \$5,430,000 and Measure G Fund items are \$9,385,000.

General Funds CIP Budget Projects

The CIP is contained in a separate document and provides detailed information for each capital project included in the fiscal year 2024 Capital Improvement Budget and Capital Improvement Program (fiscal year 2025 through 29).

Reserves

During fiscal year 2022, the City Council approved amendment of the City's financial policies, including establishment of several new reserves, and initial funding of the reserves. Amongst the new reserves is the General Funds Economic Contingency Reserves, for which the minimum target levels are twelve percent (12%) of a single year's budgeted operating expenditures and non-capital transfers of the respective funds. The Council authorized funding of these reserves at their full minimum target levels.

Conclusion

I would like to thank the City Council for its leadership in working together on this budget, in prioritizing what matters most to the Salinas community, in particular with identification of the 2022-2025 strategic plan goals that are vital for our community. I would also like to recognize the City of Salinas staff for their dedication to this organization. Lastly, I would like to thank the employees in the Finance Department who tirelessly worked on the budget documents, as well as all other staff who made contributions to its completion.

Sincerely,

A handwritten signature in blue ink, appearing to read 'S. Carrigan', with a stylized, flowing script.

Steven S. Carrigan
City Manager

COMMUNITY PROFILE

HISTORY

The name Salinas means “salt marsh” in Spanish. The City got this name because at that time there was a large slough that ran through the area. In the mid-1800s, Salinas' agricultural industry began to grow. In 1867, several local businessmen laid-out a town plan and enticed the Southern Pacific Railroad to build its tracks through Salinas City.

Agriculture continued as the area's major industry and today, the Salinas Valley is known as "The Salad Bowl of the World".

The City of Salinas was incorporated as a charter city on March 4, 1874 providing all typical City services: Public Safety (police and fire), Public Works (engineering & transportation, and environmental & maintenance services), Community Development (permit services and planning), Library and Community Services (parks & community services, and library), and General Administrative Services. Business-type City services include: a Municipal Airport, Industrial Waste System, Golf (two municipal golf courses), Sanitary Sewer and Storm Drain Systems, Water Utility, Preferential, Downtown Parking District and Permit Services. The State Department of Finance reports the City's population at 161,784, as of January 1, 2018. The City employs about 597 persons on a full time basis.

CITY GOVERNMENT

The City of Salinas operates under the Council-Manager form of government. The City Council is governed by a six-member Council elected by districts for four-year alternating terms and a Mayor elected at large for a two-year term. The City Council acts as the legislative and policy-making body. Council appoints the City Manager and awards the contract for City Attorney services. The City Manager is the chief administrator and is responsible for implementing the policies and priorities of the City Council. Our current City Hall was built in 1964 and an addition was constructed in 1975. Our old City Hall no longer exists, but

COMMUNITY PROFILE

we have some records of the building dating back to 1907. It was demolished shortly after our current City Hall was opened in 1964.

ECONOMY

Salinas is a global AgTech hub located in the backyard of internationally renowned technology epicenter, Silicon Valley. From the perspective of native son and iconic American author John Steinbeck to the pioneering problem solving that led to the invention of iceberg lettuce and bagged salad, Salinas has a global reputation as a city where agriculture, technology and innovation converge and blossom. Although agriculture is the foundation of the local economy, more than 100 manufacturing firms call Salinas home. Some of the largest employers in the area include: Dole Fresh Vegetable, the County of Monterey and Salinas Valley Memorial Hospital.

HOUSING

Salinas is a community of neighborhoods with a wide variety of housing options. With Victorians and the historic Spanish influence, Salinas provides renters and homebuyers a housing assortment, from modest cottages and modern townhouses to spacious "rancheros" nestled in the oak-dotted countryside.

Newer developments provide attractive and imaginative tract homes and condominiums along side the many modern homes in well-established neighborhoods. Newcomers and longtime residents will find a neighborhood to their liking, regardless of whether they are looking for something larger to accommodate a growing family, or simply want to find smaller quarters for their retirement years.

Salinas offers approximately 46,523 housing units of which 23,620 are detached single family residences, 2,687 are attached single family residences, 3,838 two to four unit multifamily complexes, 14,928 apartment units, and 1,450 mobile homes. The residential vacancy rate is approximately 4.1% at any time during the year.

TRANSPORTATION

The City of Salinas is the county seat of Monterey County and is located in the Central Coast region of California, 17 miles inland from the Monterey Bay, 325 miles north of Los Angeles and 106 miles south of San Francisco.

Air

The Salinas Municipal Airport serves the City as an element of the national transportation system. It is also an economic development asset and serves as an employment center with over twenty businesses providing jobs. The Municipal Airport has a 6,000-foot and 5,000-foot lighted runways. Commercial airlines serve at the nearby, Monterey Peninsula Airport.

Bus

Monterey-Salinas Transit (MST) operates local bus service; Monterey-Salinas Airbus offers connections to San Jose and San Francisco airports; Greyhound offers service to all major cities from the Intermodal Transportation Center.

Highways

The major north-south freeway, US-101, bisects Salinas. State highways 68 and 183 connect with scenic Highway 1 accessing the Monterey Peninsula and surrounding cities.

Rail

COMMUNITY PROFILE

Union Pacific's main line has daily Amtrak service which runs through Salinas; with a stop at the new Intermodal Transportation Center.

SCHOOLS

Salinas is served by three elementary school districts, a unified high school district and several private schools at both the primary and secondary level. Hartnell College, a State Community College, offers two-year degrees and occupational certificate programs. California State University Monterey Bay is located less than 15 miles away on the former Fort Ord site but has strong local presence with their branch located on North Main Street. Graduate studies through Golden Gate University, Monterey Institute of International Studies and Chapman College are available nearby. Also in the area are Moss Landing Marine Laboratory, Monterey College of Law, Stanford University's Hopkins Marine Station and San Jose State University.

COMMUNITY SERVICES

Salinas has extensive health and medical services with two of Monterey County's four hospitals located within the City. Natividad Medical Center recognized as a Medical Center Level II Trauma Center serving the Central Coast. Salinas also offers skilled nursing and convalescent homes and residential retirement facilities for seniors, as well as over 210 practicing physicians.

Fire protection and basic and advanced life support are provided by the City's full-service Fire Department. Advanced life support services are provided by the Fire Department's paramedic program with partial funding being provided from a countywide ambulance contract. The City of Salinas has a well-equipped, fully staffed Police Department and receives additional support, as required, from the Monterey County Sheriff's Office.

The City's moderate climate encourages year-round use of its 550 plus acres of municipal parks, which include golf courses, tennis courts and swimming pools. The Salinas Community Center regularly hosts symphonies, ballets, concerts and conventions. Salinas is host to the annual Steinbeck Festival, the California Rodeo, and the California International Airshow. Salinas has a modern California Sports Complex and the National Steinbeck Center. Surrounding Salinas are diverse recreational opportunities including beautiful beaches and the world-famed golf courses of the Monterey Bay Peninsula.

As the retail hub of the Central Coast, Salinas enjoys a wide selection and diversity in its stores. Northridge Shopping Center contains over 120 specialty shops and four major department stores – Macy's, Sears, J.C. Penney and Best Buy. Harden Ranch Plaza includes a Super Wal-Mart, Target, Safeway, specialty stores, restaurants, and banking institutions and future site of a Lowe's Home Center. The Westridge Shopping Center is home to Costco, a second Wal-Mart store, Office Max, Dick's Sporting Goods and a variety of national chain restaurants. The Salinas Auto Center houses nine local dealers. In October 2007, Home Depot moved its operations from Harden Ranch Plaza to the Auto Center area to join Kohl's and other specialty stores. A new Lows opened this last year in the future growth area in the northern part of the City. Additionally, Salinas' location allows quick access to the Monterey Peninsula, as well as the San Jose area.

The City utilizes various Boards and Commissions in the conduct of its affairs. Commissions established by City Ordinance are:

- Airport Commission
- Recreation-Parks Commission
- Library Commission
- Traffic and Transportation Commission

COMMUNITY PROFILE

- Planning Commission
- Youth Commission
- Measure E Committee
- Measure G Committee

Boards and committees established by Resolution of the City Council are:

- Police Community Advisory Committee
- Animal Services Committee
- Finance Committee
- Design Review Board
- Board of Appeals
- Grievance Advisory Board
- Historic Resources Board

BUDGET GUIDE

BUDGET GUIDE

The budget represents the City's work plan in support of City Council goals and policies. It is the City's fundamental policy document, annual financial plan and operations guide expressed in dollars and staff resources. In addition, it informs the public about the City's financial strategies and provides the documentation needed for other financial matters, such as audits, loans and grants.

A sustainable budget allocates limited available resources to the provision of programs, services or projects in support of community needs and expectations, without compromising the long-term financial health of the City. It balances city resources with community priorities and requirements. A budget serves the following purposes:

- Public communication device
- Establishes annual goals and objectives to meet community priorities
- Policy document
- Resource allocation tool
- Spending plan
- Accountability document
- Management tool
- Grants authority to city staff

The annual operating budget is a financial plan for a specific period of time. Salinas prepares a one-year operating budget and a six-year capital improvement budget plan. The operating budget is adopted by Council and implemented by staff. For the City of Salinas, the City's fiscal year starts on July 1st and end on June 30th.

DOCUMENT ORGANIZATION

The following section briefly describes the components that comprise the budget document.

Letter of Transmittal

In the transmittal letter to the City Council and Salinas' citizens, the City Manager summarizes the operating budget for the next Fiscal Year (FY) 2024. It outlines strategies and objectives for the fiscal years and highlights the most critical issues facing the City.

Community Profile and Budget Guide

This is the current section, and it contains a variety of information about the City of Salinas, its history, government, housing, economy, transportation, schools and community services. The budget guide section is an important tool in understanding the budget. Long-term financial strategies and budget policies that provide guidance to city staff are identified. In addition, this section describes the structure of city finances, including financial objectives reporting requirements, reserve descriptions, appropriation control, debt management, and management responsibilities. A brief summary of the annual budget process and a glossary of budget terminology are also included to aid the reader.

Summaries & Schedules

Local government budgets are organized or separated into various funds in order to account for revenues, which are restricted by law as to how they may be spent. Each fund functions like a separate bank account targeted to a specific purpose or purposes and the City's budget is financed by these different funds. This section of the budget presents the Fund Balances, Reserves, Interfund Transfers, Expenditures by Category, a summary schedules of revenues by fund that includes actual revenues for FY 2021 and FY 2022 and estimates for FY 2023 and FY 2024, and Administrative Overhead Rates. Also contained here

BUDGET GUIDE

is the summary of the total full-time workforce budgeted for the next year with historical changes in staffing over time.

Salinas Plan

This section provides information regarding the implementation and status of the Salinas Plan, a Ten-Year Plan designed to provide the City with a path toward maintaining a long-term balanced budget while preserving City services and addressing the affordable housing crisis.

Measure E Funds

This section provides historical information about the circumstances surrounding the conception and implementation of the Transaction and Use tax approved by Salinas' voters on November 2005. This section also includes summaries of the Measure E funds budgeted for Operating and Capital Projects for FY 2024 and a list of the number of positions funded during the same period.

Measure G Funds

This section provides historical information about the circumstances surrounding the conception and implementation of the Transaction and Use tax approved by Salinas' voters on November 2014. This section also includes summaries of the Measure G funds budgeted for Operating and Capital Projects for FY 2024 and a list of the number of positions funded during the same period.

Department Operating Budgets

Here you will find detailed information about each department, including department organizational charts, department and division descriptions including Purpose, Goals, Strategies and Objectives and Major Budget Changes for FY 2023, and a financial summary showing funding sources, actual expenditures from FY 2021 and FY 2022 and projected expenditures for FY 2023 and FY 2024.

The Capital Improvement Budget is issued in a separate document. Both of these documents are available to residents and interested parties for review at the City's website located at www.cityofsalinas.org.

Appendix

Included in this section are the Budget Resolution, Appropriations Limit, Detailed Workforce Schedules, a 10-year budget forecast per the Salinas Plan, information on the American Rescue Plan Act, and an overview of city's financial policies that include Accounting Policies, Reserve Policies, Administrative Fee Policies, Revenue Policies, Operating and Capital Improvement Budget Policies, Debt Policies, Assessment and Community Facilities Financing Policies, Landscape and Lighting Policies, Capital Asset Policies and Risk Management Policies. Also included are the chart of accounts, a fund type matrix, salary schedules, and more.

STRUCTURE OF THE CITY'S FINANCES

One way to view city finances is from the perspective of personal financial planning. It is good financial advice to take time each year to do some financial planning regardless of your personal circumstances. A portion of existing resources is used to pay for necessities (utilities, mortgage). Some of your projected income is used for maintenance needs on assets (car repair, plumbing problems). Yet another part of your income is set-aside for future use or anticipated costs (investment for retirement, buying a new car, insurance premiums, roof replacement, etc.).

A city is required to essentially complete the same type of financial planning. Salinas keeps track of its activities in self-balancing sets of accounts called "funds" which are the basic accounting and reporting components in governmental accounting. Funds are designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

BUDGET GUIDE

Some funds are established to track activities required by law (e.g. gas tax fund), some fulfill revenue requirements (CDBG), and still others demonstrate prudent administrative practices (such as self-insurance funds for General, workers' compensation and liability).

Budget years run in fiscal year cycles beginning July 1 and ending June 30. The City budget is approved and balanced by fund. The vast majority of these fund balance dollars are held for future expenses for several reasons. Special taxes, such as the gas tax, are restricted to specific services and must be carried forward for that purpose (in this case, street improvements). Other balances may result from legal requirements, such as payment of long-term debts for bonds.

The City maintains budgetary controls that ensure compliance with the budget approved by the City Council. All activities of the City are included in the annual appropriated budget. The legal level of budgetary control (that is, the level at which actual expenditures may not legally exceed the appropriated amount) is at the fund level, as authorized in the Annual Appropriations Resolution.

BASIS OF ACCOUNTING

Fund Accounting

The accounts of the City are organized on the basis of funds and account groups, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts that comprise its assets, liabilities, fund equity, revenues, and expenditures or expenses, as appropriate. Government resources are allocated to and accounted for in individual funds based upon the purposes for which they are to be spent and the means by which spending activities are controlled.

The budget is adopted consistent with generally accepted accounting principles. Revenues are recognized on the accrual basis (i.e., when they are earned). Expenditures are recorded when the related fund liability is incurred.

Base Budget: Each department is initially provided an annual appropriation sufficient to fund current service levels and any other costs the department is responsible for managing. This year's base budget involved implementing a zero-based budgeting model.

Carry Over: Unexpended funds from a fiscal year are known as carryover funds. The City Council's past practice is to allocate carryover funds pursuant to the City's adopted financial policies. The policy states "General Fund carryover balances shall be allocated to reserves in the following priority order: 1) Insurance Reserves, 2) Operating Budget Reserve and 3) Capital Improvement Program Reserve."

Long Range Financial Planning

The City has developed a five-year and ten-year forecasting model for operating revenues and expenditures. The City also produces a six-year capital improvements plan.

The Finance Department prepares initial Baseline Budget forecast and allows City Council and departments to focus on policy, program and work plan issues.

Reserves

The General Fund strives to maintain a contingency or prudent reserve, with a target of 8% of the General Fund Operating Budget.

Contingency Reserve Policy

The City Policy endeavors to maintain a contingency reserve for operations to help mitigate the effects of such unanticipated situations as (1) economic downturns, (2) loss of revenues to or imposition of additional costs by other governmental agencies, (3) variances in financial forecasting, and (4) natural disasters. The contingency reserve is funded at a level established by Council each June. All uses of the contingency reserve are approved by the City Council.

BUDGET GUIDE

Long Term Capital Debt

The City of Salinas uses long-term debt financing only for one-time capital improvement projects and unusual equipment purchases. Long-term capital debt complies with applicable federal and State regulations and is repaid over the legal life of the related asset or twenty years whichever is less. Financing is generally conducted on a competitive basis and the City seeks to maintain its current bond rating.

Investments and Cash Management

The City follows the practice of pooling and investing cash of all funds under its control to maximize the return in a safe and prudent manner while at the same time ensuring that the portfolio is sufficiently liquid to meet day-to-day cash needs. There is diversity in the types and maturity dates of investments, which are made in accordance with the California Government Code. The remaining final maturity on investments is limited to five years. Currently, the average life of our portfolio is generally about one year. An Investment Report is submitted to the City Council quarterly, which shows investment activity and the performance of the investment portfolio. The investment policy is reviewed and readopted annually by the City Council, as required by State law.

BUDGET PROCESS

The Salinas' City Council adopts the City of Salinas' annual operating budget no later than June 30 of each fiscal year. Beginning July 1st, the budget process allows the City of Salinas to make resource allocation decisions, including choices about staffing, technology, and equipment, as well as determining which program priorities will be addressed in the coming fiscal year. Although the City Council deliberates the proposed budget in June, the budget process occurs throughout the year. Staff begins in earnest each January based on projections of city revenues, costs associated with contractual obligations, assessment of city needs, and review of the City's overall financial position.

Financial information containing actual revenue receipts and expenditures trends is presented to the Finance Committee at least once every month. During the year, Council amends the budget with the approval of supplemental appropriations and reviews and amends the budget at mid-year and at year-end.

The budget is prepared by the City Manager and adopted by the City Council. The City Council approves operating appropriations at the department and fund level prior to July 1, each year and may amend the budget during the fiscal year. Budgetary control is maintained at the program level. Formal budgetary integration was employed as a management control device during the fiscal year for the General Fund, Special Revenue Funds, Debt Service Funds, Capital Projects Funds, Enterprise Funds and Internal Service Funds.

Budgets are legally adopted for all Governmental and Proprietary Fund Types. Fiduciary Funds and Agency Funds have no adopted budgets because the City is only required to make payments to the extent funds are available. Agency Fund budgets that are approved by their respective governing boards are recorded in the City's accounting system.

The City Manager may transfer budget appropriations between departments and Department Directors may transfer appropriations between programs and accounts within their individual departments and divisions, but only the Council may appropriate funds from reserves or fund balances.

Budget policy excludes the use of taxes, accounts receivable, interest receivable assets and long-term advances that are not currently available resources for budget purposes. Condemnation deposits are also excluded because they are returned upon right of way acquisition.

Expenditures may not legally exceed budgeted appropriations at the department level. Budgeted amounts shown are as originally adopted and as amended by the City Council during the year and reviews and amends the budget at mid-year and at year-end.

Appropriations lapse at fiscal year end to the extent they have not been expended. New budget appropriations are approved for the coming year. Project-length financial plans are adopted for all capital

BUDGET GUIDE

projects funds and appropriations are carried forward until project completion. Grant funds are carried forward until the grant expires.

Encumbrances represent commitments related to unperformed contracts for goods or services. Encumbrance accounting, under which purchase orders, contracts, and other commitments for the expenditure of monies are recorded in order to reserve that portion of the applicable appropriation, is employed as an extension of formal budgetary integration in the governmental funds. Encumbrances outstanding at year-end are recorded as reservations of fund balance and do not constitute expenditures or liabilities because the commitments will be honored during the subsequent year.

From January through March, departments review their functional responsibilities and services and their current year budget objectives in light of any modifications in Council priorities or other direction to staff. These are considered in conjunction with projections of revenues and expenditures as the departments prepare their preliminary budget requests. Departments develop budgets, which reflect departmental goals and City Council priorities within budgetary constraints.

The City Manager reviews department budget requests in March-April. From these reviews, the budget parameters may be modified, and changes made to the preliminary budget for presentation to Council. During the month of April, the Finance Department compiles all department requests and the City's financial data to produce a preliminary document.

The presentation of the City Manager's Proposed Budget in late May is intended to provide the City Council and the public time to review the budget. Included in the City Manager's presentation are an update of the City's financial position and long-range plan, review of the national, state and local economies, and discussion of financial policies and department activities.

After the Council reviews the proposed budget and receives public comment, they may revise the proposed budget. Then, on or before June 30, the City Council votes to adopt the budget, including any amendments to the proposed budget that may occur, by an affirmative vote of the majority of the seven-member City Council. At any meeting after the adoption of the budget, the City Council may amend or supplement the budget by a majority vote of the Council.

Upon final adoption by city ordinance, the budget becomes the legal authorization for the various departments to expend revenues, subject to any controls established by the City Manager, City Council and internal audit requirements. The City Council has adopted several financial and budgetary policies, which address debt, reserves, and spending authorizations.

CITIZEN PARTICIPATION

Salinas' residents are encouraged to participate in the budget planning process through a variety of avenues, such as participating in Council-appointed boards and commissions or by attending budget sessions during the month of May or public hearings at City Council meetings. Citizens may also view and comment on the budget document through the City's Web page located at www.cityofsalinas.org.

Public hearings on the budget occur in late May and June. Citizens have the opportunity to speak about budget issues at these hearings and at virtually any City Council meeting during the year. Council meetings are generally held on Tuesday afternoon beginning at 4:00 p.m. in the Council Rotunda at City Hall, located at 200 Lincoln Ave. Salinas. All council meetings are broadcast live online and televised on the local cable access channel 25 and subsequently aired many times.

GLOSSARY OF BUDGET TERMINOLOGY

A city budget contains specialized and technical terminology that is unique to public finance and budgeting. Therefore, a glossary is provided to help the reader understand terms and vocabulary that are used in this document. Useful terms relevant to the budget process and/or city government are included.

BUDGET GUIDE

APPROPRIATION: An authorization made by the City Council, which permits the City to incur obligations and to make expenditures of resources.

BENEFITS FULL-TIME (FT:) Cost to the City for insurance benefits for all regular part time employees. This includes health, disability, and workers' compensation insurance.

EDUCATIONAL INCENTIVE PAY: Cost to the City for educational incentive pay to eligible public safety employees. For budget purposes, this payment is included as part of the total annual salary for eligible regular full-time employees.

BENEFITS REGULAR FT INSURANCE: Cost to the City for insurance benefits for all regular full-time employees. This includes the city's cost for health, dental, disability, life, and workers' compensation insurance.

BENEFITS REGULAR FT LEAVE TIME: Compensation for all leave time to employees who are appointed to regular full-time positions. For budget purposes, the percentage factor could be applied to net work hours as calculated by the Finance Department.

BENEFITS REGULAR FT RETIREMENT: Cost to the City for Public Employees' Retirement for all regular full-time employees. The city participates in two pension plans: the California Public Employees' Retirement System (PERS) for public safety and miscellaneous employees hired after June 1995 or those employees who elected to switch from the other local plan, and the New York Life Retirement Plan for miscellaneous employees hired before June 19, 1995 and who elected not to receive benefits under the PERS system.

BUDGET: A financial plan for a specific period of time (one fiscal year) that matches planned revenues and expenditures with various municipal services.

BUDGET ADJUSTMENT: A legal procedure to revise a budget appropriation. City staff has the prerogative to move expenditures within or between department programs. Increases to the budget must be approved by the City Council.

BUDGET DOCUMENT: The instrument used by the City Manager and staff to present a comprehensive financial program to the City Council.

BUDGET RESOLUTION: The official enactment by the City Council to establish legal authority for city officials to obligate and expend city resources and funds.

BUDGETED FUNDS: Funds that are planned for certain uses but have not been formally or legally appropriated by the City Council. The budget document submitted for City Council approval is composed of budgeted funds.

BUDGETARY CONTROL: The control or management of a governmental unit or enterprise in accordance with an approved budget for the purpose of keeping expenditures within the limitations of available appropriations and available revenues.

CAPITAL IMPROVEMENT PROJECTS: A plan for capital expenditures to provide long-lasting physical improvements to be incurred over a period of several future years.

CAPITAL OUTLAY: Purchase of equipment (including vehicles), tools, and furniture having a value of \$5,000 or more and a normal useful life of two years or more.

CONTRACTUAL SERVICES: Expenditures for services which are obtained by an expressed or implied contract, or services which are of such nature that they normally would be obtained by such a contract. Major types of contractual services are advertising, printing and binding services, maintenance and repair services, auto body work, professional services, public utility services, and travel and transportation services.

DEPARTMENT: A separate major administrative section of the City which indicates overall management responsibility for a group of related operations within a functional area. The City's structure has fourteen departments.

BUDGET GUIDE

DEPARTMENT SUMMARY: The Department Summary provides a summary of source of funds and expenditures by major category. The source of funds section shows how the fiscal year 2021 and 2022 actual, the 2023 budget and the proposed 2024 budget are funded. The expenditure section details both employee services and other resources. The employee services category includes regular full-time, temporary part-time, and overtime. The other resources category includes: supplies/small equipment, outside services/other expenditures, and capital outlay

DIVISION: A major administrative section of a department indicating management responsibility for a group of related operations within a department.

DIVISION SUMMARY: Provides a summary of source of funds and expenditures by major category in the same manner as the Department Summary, described above, except that this summary is at the division level.

ENCUMBRANCE: The commitment of appropriated funds to purchase an item or service. To encumber funds is to set aside or “commit” funds for a future expenditure.

ENTERPRISE FUND: A governmental accounting fund in which the services provided are financed and operated similarly to those of a private business. The rate schedules for these services are established to ensure that the revenues are adequate to meet all necessary expenditures. The City of Salinas has the following Enterprise Funds: Airport, Golf Courses, Industrial Waste, Sanitary Sewer, NPDES Storm Drain Sewer, NPDES Street Sweeping, Hitchcock Road Water Utility, Permit Services and the Downtown Parking.

EXPENDITURE: Refers to the outflow of funds paid or to be paid for an asset obtained or goods and services obtained, regardless of when the expense is actually paid. This term applies to all funds. Expenditures are recorded in the City’s financial records when the goods, services, or assets are received.

EXPENDITURE BY CHARACTER: A basis for distinguishing types of expenditures. The major expenditure categories used by the City of Salinas are Employee Services including salaries, benefits and overtime: operating expenditures (supplies and services) and capital outlay expenditures.

FISCAL YEAR (FY): The time period designated by the City representing the beginning and ending period for recording financial transactions. The City of Salinas has specified July 1 to June 30 as its fiscal year.

FULL TIME EQUIVALENT (FTE): Technique converting labor work hours into a unit measure of equivalent number of full-time employees (1 FTE =2,080 annual hours) with the exemption of firefighters that are measured on 2,912 annual hours annually. For FY 2016-17 forward, the budget included employees’ full cost due to the elimination of the furlough program effective July 1, 2015.

FUND: An accounting entity that has a set of self-balancing accounts and that records all financial transactions for specific activities, revenue sources, or government functions. Eight commonly used types of funds in public accounting are: general fund, special revenue funds, debt service funds, capital projects funds, enterprise funds, trust and agency funds, internal service funds, and special assessment funds.

FUND BALANCE: Refers to the excess of assets over liabilities and encumbrances at the end of the recorded accounting period. Also known as available funds.

FUNDING SOURCE: Identifies which revenues the City will use to pay the expenditures of each department. Some department budgets include revenues from one or more sources, which legally, may only be used for specific purposes, while others rely more heavily on the City’s General Fund, which, may be used for any appropriate purpose.

GRANT: A donation by a government or other organization to support a particular function. Grants may be classified as either categorical or block, depending upon the amount of discretion allowed the grantee.

INTERNAL SERVICE FUND: Funds used to account for the financing of goods or services provided by one city department to another on a cost reimbursement basis.

BUDGET GUIDE

LETTER OF TRANSMITTAL: The opening section of the budget, which provides the City Council and the public with a general summary of the most important aspects of the budget, changes from the current and previous fiscal year, and the views and recommendations of the City Manager.

LINE-ITEM BUDGET: A budget that lists each expenditure type (salary, supplies, contractual services, etc.) as a separate line item, along with the dollar amount budgeted for each specified category.

OPERATING BUDGET: The portion of the budget pertaining to daily operations that provides basic governmental services. The operating budget contains appropriations for such expenditures as personnel services, materials and supplies, and capital outlay. It does not include Capital Improvement Project expenditures.

REVENUE: Funds the City receives as income. Revenues include such items as taxes, licenses, user fees, service charges, fines and penalties, and grants.

RESERVE: An account used to indicate that a portion of a fund's balance is legally restricted for a specific purpose and is, therefore, not available for general appropriation.

SUPPLIES / SMALL EQUIPMENT: Items purchased that have a unit value of less than \$5,000 regardless of normal useful life or have a unit value of more than \$5,000 and a useful life of less than 2 years.

TEMPORARY: Describes the job status of an employee as one who works less than full time and in a transitory position.

REVENUES SCHEDULES: Complete revenue worksheet for 2021 and 2022 actuals & 2023 and 2024 revenue estimates.

REGULAR FULL-TIME: Describes the job status of a city employee as one who works a full weekly schedule (40 hours for Police sworn and non-public safety employees (adjusted for furlough concessions), 56 hours for Firefighters public safety employees) on a non-temporary basis.

THE SALINAS PLAN REFRESH

In 2018, the National Resource Network (NRN), led by Public Financial Management (PFM) conducted a comprehensive study of the financial and organizational issues being experienced by the City of Salinas. The Study was named “The Salinas Plan” (the “TSP”) and was completed in November 2018. At that time the City was facing a number of issues: budget forecast of a negative net revenue in the General Fund; a housing and homelessness crises; lack of investment in City buildings, parks, and infrastructure; and a number of workforce compensation strategies that worked against the City’s goals of competitive pay structures for recruitment and retention. The TSP included 32 recommendations targeted at each of these major issue areas for the City. Since that time, the City has systematically worked at implementing the recommendations from the TSP.

In October 2022, Russ Branson Consulting (RBC) was retained to perform a refresh of the TSP. The “refresh” is an opportunity to review the City’s progress on the original TSP recommendations, update the budget forecast, and recommend additional recommendations based on current economic and operating conditions.

Purpose of The Salinas Plan Refresh

Over the last four years, the City has undergone a number of changes and challenges that have reshaped the City in key ways:

- Turnover of key staff, including the City Manager and Finance Director;
- The COVID pandemic and resulting impacts on implementation of TSP recommendations; and,
- Increased sales and property tax revenue placing the City in a better financial position.

Other aspects of the City remains unchanged, including:

- Population has remained static;
- Expected new development has been delayed; and,
- Total staffing and service levels effectively remain at 2018 levels.

Given the turmoil of the last four years, as well as the progress the City has made on the original plan, the City is seeking a review of the 2018 TSP status, including an evaluation of which recommendations should remain in place and the addition of new recommendations that should be added based on current circumstances.

This “refresh” plan is being completed as an update of the original plan and not a complete re-evaluation of the underlying analysis of the TSP. In this way, the Refresh Plan relies on the work done in the original NRN study. Except where noted, it is determined that the analysis and circumstances of the original TSP remain valid.

The Salinas Plan Summary

The Salinas Plan (“TSP”) included 32 recommendations, or initiatives, across six broad categories:

- **Risk Mitigation** initiatives represent actions the City can take to reduce its exposure to significant budgetary impacts in the future;
- **Public Safety** initiatives provide a path to more efficient, cost-effective Police and Fire services without reducing service levels;
- **Shared Services** initiatives seek to make the most efficient use of shared services and for the City to be properly compensated for services provided on a shared basis;
- **Managed Competition** initiatives focus on areas where the City should explore partnerships to either manage or repurpose City assets;

THE SALINAS PLAN REFRESH

- **Operational Efficiencies** initiatives change the way the City does business so that services are as efficient and affordable as possible;
- **Workforce** initiatives allow the City to develop a more sustainable compensation package while increasing the City's long-term competitiveness and ability to recruit and retain employees critical to delivering quality services;
- **Investment Strategies** initiatives focus on investment in the City both to maintain the City's significant investments in community facilities and infrastructures and to support affordable housing and community development initiatives that will meaningfully begin to tackle the City's housing and homelessness crisis; and,
- **New Revenues** include provisions for new revenue to support new investment and projected growth.

To date, more than half of the recommendations have either been implemented or are actively being implemented by the City to some extent. A third of the recommendations are not currently being implemented and are recommended to remain in place for City action. Four of the TSP recommendations have attempted implementation and failed or have been rejected by the City as not feasible.

Status of The Salinas Plan Initiatives

No. of Recommendations	
Implemented	7
In-Progress	10
Active	11
Rejected	4
Total Recommendations	32

Revised Recommendation Organization

For the TSP Refresh, recommendations are organized in different groups from the TSP. This provides a simpler approach and places related recommendations together. The graphic below illustrates the four areas of recommendations in the Refresh Plan. These areas are: Managing the Organization, Facilities & Infrastructure, Investments for a Healthy City, and Housing & Homelessness.

THE SALINAS PLAN REFRESH

Revised Recommendations Listing

Managing the Organization (MO)

- MO-01 Healthcare Cost Containment
- MO-02 Improve Base Pay on a Cost-Neutral Basis
- MO-03 Evaluate the Total Leave Program
- MO-04 Continue to Address Workers' Compensation Costs, Moving Towards Sound Actuarial Funding
- MO-05 Police Civilianization
- MO-06 Improve Budget Process and Monitoring
- MO-07 Incorporate Multi-Year Financial Planning into All Budgetary Actions
- MO-08 Include Leave Accruals and Cash Outs in Current Compensation Study
- MO-09 Evaluate the Parking Functions Within the City
- MO-10 Evaluate the impact of implementing the City's Coming Compensation Study

City Facilities & Infrastructure (CFI)

- CFI-01 Prepare a Preventive Maintenance Program for all City Facilities
- CFI-02 Citywide Fleet Strategy
- CFI-03 Eliminate General Fund Subsidy of Golf Course Debt Service
- CFI-04 Eliminate Sherwood Hall Deficits
- CFI-05 Develop an Implementation Approach to Prioritize and Fund the Most Pressing City Needs

Investments for a Healthy City (IHC)

- IHC-01 Enact Storm Sewer Utility Fee to Fund Current Transfer of General Fund Revenues to Storm Sewer Fund
- IHC-02 Increase Hotel Tax and Dedicate Funding that Results to Capital Investment
- IHC-03 Engage with the Salinas Community to Make the Measure G Sales Tax Permanent
- IHC-04 Dedicate Savings to Capital Investment
- IHC-05 Evaluate a General Obligation ("GO") Bond to Fund Key City Projects

Housing and Homelessness (HH)

- HH-01 Convene Stakeholders to Develop an Impl Plan to Create More than 4,000 New Units of Affordable Housing in Next 10 Yrs
- HH-02 Establish a Housing Trust Fund with a Dedicated Revenue Stream for Affordable Housing
- HH-03 Develop a Land Strategy to Leverage Private Market Investment to Create up to 2,400 New Units of Affordable Housing
- HH-04 Create Regulations to Address Safety and Health Conditions in Rental and Other Group Housing
- HH-05 Use Multiple Sources to Provide Revenue for the Housing Trust Fund
- HH-06 Coordinate Homeless Response Between Departments Through the City Manager's Office

THE SALINAS PLAN REFRESH

Status of Revised Recommendations for The Salinas Plan Refresh

The Salinas Plan Refresh was presented to City Council on March 21, 2023. New and updated recommendations have not been implemented by City staff. The status of these recommendations with corresponding financial impacts will be shown in subsequent versions of this annual operating budget document.

MEASURE E

Over a period of three fiscal years beginning in April 2003, the Salinas City Council reduced City programs and services funded by the General Fund budget a total of \$15.3 million dollars or 24%. The reductions were required to maintain the City's financial solvency. The financial crisis was the result of a combination of factors including a weak economy evidenced by sales tax decreasing for two years, State raids on local revenue, increasing charges assessed by the County of Monterey, increasing retirement costs and increasing employee health insurance costs.

The required reductions included the elimination of 123.50 authorized positions. The layoff of employees broadly impacted services throughout the City. Staff reported to City Council that absent a new, guaranteed source of General Fund revenue, the City would not be able to restore the services that had been cut for at least 8-10 years.

At the City Council's May 3, 2005 meeting, members of the public expressed their view that the City must be able to provide adequate police, fire and street and park maintenance services, and that the libraries and recreation centers should remain open. The public requested that Council consider placing a tax measure on the ballot so that revenue could be provided to restore vital services.

On May 17, 2005, the City Council received a report regarding its options for placing a tax measure before the City's voters to generate sufficient revenue to maintain minimal levels of service for the public welfare. Members of the public reiterated their support for such a measure, indicating that the community would suffer if services were further curtailed.

On June 7 and June 14, 2005, the Council reviewed and approved the FY 2005-06 budget, and confirmed the on-going reductions in services previously approved. On July 12, 2005, the Council adopted a resolution calling for an election to take place on November 8, 2005 to ask City voters to approve a half-cent transactions and use tax. The proposed tax measure also included a ten (10) year sunset provision and mandated the appointment of an independent committee with authority to both recommend the use of the tax revenue and provide oversight as to the use of funds.

On November 8, 2005, the voters of Salinas approved (61.74%) the ordinance establishing a Temporary Transactions and Use Tax at the rate of one-half of one percent (0.50%) to be in effect for a period of ten (10) years. Initial collection of the tax began April 1, 2006 with the first receipt of revenues from the tax to occur in July 2006. The temporary tax was therefore scheduled to sunset April 1, 2016. During November 2012, Salinas' residents approved the renewal of the transaction and use tax with no expiration date by removing the language addressing a tax collection sunset in April 2016.

The tax approved by the voters is a general tax. As such, the City may use the revenue from the tax for any general governmental purpose, including without limitation police, fire safety, paramedics, libraries, crossing guards, graffiti removal, anti-gang programs, and street and park maintenance.

In order to assure full compliance with the intent of the ordinance, the tax proceeds from this ordinance are separately received and accounted for in the City's financial reporting system (Fund 1100). The Finance Director reports at least quarterly to the Oversight Committee the use of tax proceeds. The Oversight Committee reports annually to the City Council regarding the use of tax proceeds.

The Oversight Committee is a fundamental provision in the voter-approved ordinance. The ordinance states that:

The Mayor and City Council shall each annually appoint one member of the public to serve as an oversight committee for the revenue that the City receives from the tax. The committee shall prepare an annual report on the revenue received and recommend the use thereof. The City Manager shall provide

MEASURE E

staff for the committee, and the Finance Director shall provide all relevant data regarding revenue from the tax and expenditure thereof.

Transactions and Use Tax collections began a severe decline starting in fiscal year 2009 that continued over a two-year period. Signs of recovery started to show in FY 11 and continued through FY 19. As a result of the COVID-19 pandemic, a brief decline was experienced in FY 20, with signs of significant improvement for FY 21 through FY 24.

Measure E tax collections are projected to increase \$677,000 or 4.12% in FY 24. Staff revenue projections are conservative and based on the current economic recovery signs. The City's outside consultant (Hinderliter, de Llamas & Associates) agrees with staff revenue estimates for the City's Transaction and Use Tax.

MEASURE E

The Measure E proposed budget by department/program for FY 24 is as follows:

Internal Svc - General Liability	420,000	2.7%
Internal Svc - Insurances	250,000	1.6%
Internal Svc - Fleet Maint	100,000	0.6%
Energy Debt Svc	66,200	0.4%
El Gabilan Library Debt Svc	1,145,200	7.4%
Salinas Reg. Soccer	250,000	1.6%
Finance & IT	66,000	0.4%
Library	5,944,553	38.3%
Recreation & Comm. Svc	2,855,174	18.4%
Police	<u>4,409,331</u>	<u>28.6%</u>
Total Appropriations	<u>15,506,458</u>	<u>100.0%</u>

MEASURE E

The number of positions funded by Measure E during FY 24 is summarized as follows:

	<u>FY 24</u>
Police	21.0
Parks & Recreation	16.0
Youth Serv. & Com. Engagement	2.0
Library	<u>41.0</u>
Total Positions	<u><u>80.0</u></u>

MEASURE G

With the passage of Measure G in November 2014, the City is in a position to make strategic investments to restore services and make strategic investments into public facilities and infrastructure. Each of the department's plans are focused on delivering services and projects that reflect the main interests of the community, as determined by extensive community outreach, surveys and engagement.

The public have consistently expressed a desire for more services to achieve a better, safer Salinas. Crime prevention, public safety, economic development, and street and sidewalk repair all contribute to safe, clean neighborhoods. These and other critical public services have all suffered from inadequate funding. Increased funding for public safety has been identified through the community outreach process as the highest priority, but not the only priority. While residents have consistently stressed the importance of public safety, they have also recognized that safe communities require investments in violence prevention and community-building programs such as after-school programs, recreational activities, life-long learning opportunities and special events/cultural arts programming.

On March 25, 2014, the City Council reviewed the results of the community outreach, received further public comment, and directed staff to prepare a resolution calling for an election to ask voters of the City of Salinas to increase the general transactions and use tax by one cent, with a fifteen-year sunset, and with citizens' oversight.

On June 24, 2014, the City Council held a noticed public hearing to consider calling a municipal election to seek voter approval of a proposed general transactions and use tax (or "sales tax"). At the conclusion of that hearing, the City Council decided to call an election to ask voters of the City to approve a local transactions and use tax for 15 years, the revenue from which would be used to support general municipal services.

On November 4, 2014, the voters of Salinas approved Measure G, an ordinance imposing a one-cent general transactions and use tax. Measure G has a fifteen-year term and requires the City Council to establish an Oversight Committee.

Measure G was premised upon and was presented to the voters as an opportunity to restore services to the community; to provide for a "safer, better Salinas." Consistent with that purpose, the following question was presented to the voters:

"To improve our quality of life, maintain and enhance city services and facilities, including: crime and gang prevention; neighborhood policing and school safety; safety inspections; police, fire and paramedic response; fixing potholes, streets, and sidewalks; recreation and programs for youth and seniors; and other city services, shall the City of Salinas enact a one cent sales tax, that can't be taken by the State, with citizens' oversight, annual independent audits, with all funds dedicated to Salinas?"

As set forth in Section 32-94 of the Measure G ordinance, the "Measure G Oversight Committee" has the following attributes and responsibilities:

1. The Committee consists of no fewer than seven members of the public (one member selected by each Council member with the initial Committee appointed by the Council by March 31, 2015);
2. The Committee members shall be either city residents or representatives of businesses located in Salinas;
3. The Committee receives and by May 30 of each year is responsible for reviewing the City auditor's report and based on their review of the auditor's report is responsible for issuing a public report to the City Council on the receipt of revenue and expenditure of Measure G funds and such other matters the City Council may assign.

MEASURE G

As approved by the City Council on March 31, 2015 and adopted by resolution on April 14, 2015, the Committee shall meet three times per year:

1. As set forth in Section 32-94 of the Ordinance, before May 30 of each year to “review the auditors’ report, for each year in which the auditors prepare such a report, [for the purpose of issuing] a report to the City Council regarding the use of revenue [from Measure G] and such other matters as the City Council may assign.”
2. Following the City Council’s adoption of the annual budgets (Operating, Capital, Measure E, and Measure G) for the purpose of understanding how the City Council directed the expenditure of Measure G revenues.
3. Prior to the City Council’s adoption of the annual budgets so that City staff can present information to the Committee on Measure G revenues and the Measure G expenditures proposed in the annual Measure G Budget.

The Committee may have additional meetings beyond these three, provided a majority of the Committee requests an additional meeting(s) and the Committee’s request is approved by the Mayor.

In order to assure full compliance with the intent of the ordinance, the tax proceeds from this ordinance are separately received and accounted for in the City’s financial reporting system (Fund 1200).

The City received \$5.4 million for the last quarter of FY 15, \$22.6 million for FY 16, \$24.1 million for FY 17, \$25.2 million for FY 18, \$27.2 million for FY 19, \$26.0 million for FY 20, \$28.5 million for FY 21, and \$34.0 million for FY 22. For FY 23 and FY 24, the City is expecting \$32.8 million and \$34.2 million, respectively. The FY 24 budget includes \$9,385,000 in capital improvement projects (CIP), \$7,159,620 in transfers out to mainly fund the new Public Safety building debt service and various internal service charges, and a \$24,117,782 operating budget. The CIP includes the Alisal Vibrancy Plan, soccer field at Cesar Chavez Park, facilities ADA improvements, Northgate Dog Park, and streets/sidewalk improvements. The detail of the proposed capital projects are located in the capital improvement budget document for FY 24.

MEASURE G

As mentioned, each of the department's plans are focused on delivering services and projects that are aligned with Council goals and objectives and reflect the main interests of the community, as determined by extensive community outreach, surveys and engagement. The Department plans were presented to the City Manager, who made the final determination on the proposal to the City Council. In addition to community funding themes and City Council goals, the City Manager's proposed budget allocating Measure G funds factors in city wide operations, all funding sources, all department requests, a sustainable level of staffing, and the full 15-year horizon. The ninth year of Measure G operating costs for FY 24 is shown below:

	<u>Amount</u>	<u>Percent</u>
Police	6,319,012	26.2%
Fire	1,907,341	7.9%
Public Works	6,936,280	28.8%
Recreation	5,383,744	22.3%
Community Development	2,427,600	10.1%
Information Technology	363,282	1.5%
Finance	277,366	1.2%
Human Resources	185,020	0.8%
Administration	318,137	1.2%
Total Appropriations	<u>\$ 24,117,782</u>	<u>100.0%</u>

MEASURE G

As mentioned above, the Measure G Capital Improvement Program (CIP) budget totals \$9,385,000 and consists of six projects. For a complete list of projects, see the proposed Measure G CIP projects budget for FY 24:

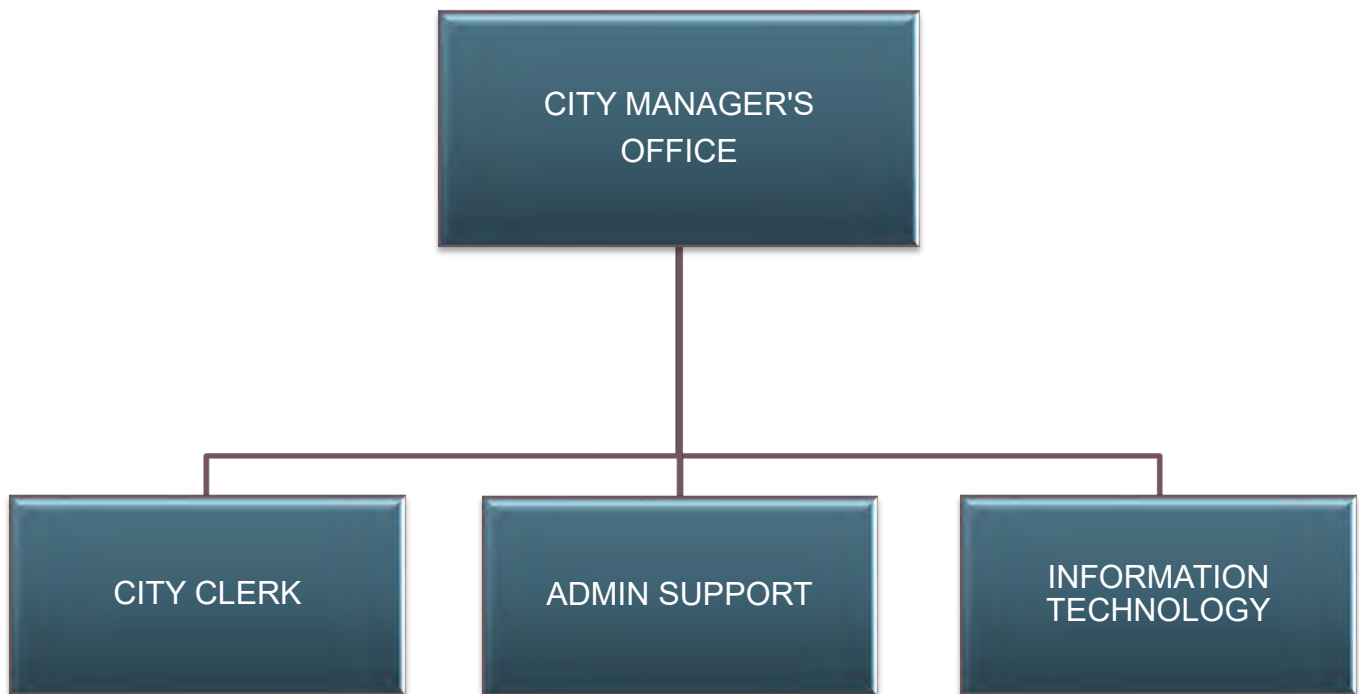

<u>Project</u>	<u>Budget</u>
Cesar Chavez Soccer Field	\$ 250,000
Sidewalk & Drainage Repairs	2,000,000
Street Preventative Maint.	6,000,000
Northgate Dog Park	75,000
Facilities ADA Improvements	20,000
Alisal Vibrancy Plan	1,040,000
Total	<u>\$ 9,385,000</u>

The number of positions funded by Measure G during FY 24 is summarized as follows:

	<u>FY 24</u>
Police - Sworn	12.0
Police - Non-Sworn Support	17.0
Fire - Sworn	7.6
Fire - Non-Sworn Support	1.0
Community Development	10.0
Public Works	36.3
Recreation	16.0
Information Technology	2.0
Finance	2.0
Human Resources	1.0
Administration	<u>2.0</u>
Total Positions	<u>106.9</u>

CITY ATTORNEY DEPARTMENT

Organizational Chart by Division

CITY ATTORNEY DEPARTMENT Organizational Chart by Position

CITY ATTORNEY DEPARTMENT

Summary

Purpose

As provided in the City Charter, the City Attorney's Office provides legal representation and guidance to the City Council, its committees, boards and commissions, the City Manager and City Departments.

Division Operations

1. Economic Development
2. Housing/Affordable Housing
3. Infrastructure and Environmental Sustainability
4. Public Safety
5. Youth and Seniors
6. Effective and Culturally Responsive Government

City Council Goals, Strategies, and Objectives for FY 2023-24

1. Support Efforts to Generate Revenue Sources to Invest in Existing Facilities and Infrastructure. *(Strategic Goal: Infrastructure and Environmental Sustainability)*
 - a. Advise on transactional support and fee/finance issues related to additional investment in existing facilities and infrastructure.
 - b. Advise on procurement and contracting for American Rescue Plan Act (ARPA) funded projects.
2. Support Efforts on Housing/Affordable Housing. *(Strategic Goal: Housing/Affordable Housing)*
 - a. Advise on and support efforts to update the City's Inclusionary Housing Program.
 - b. Advice on efforts to implement a Rent Stabilization Program.
3. Municipal Code Update. *(Strategic Goal: Effective and Culturally Responsive Government; Infrastructure and Environmental Sustainability)*
 - a. Complete update of the Municipal Code to identify and to update self-imposed regulations that hinder operational efficiencies.
 - b. Update purchasing policies and purchasing manual, to include an environmentally friendly purchasing requirement.
 - c. Support efforts to establish a Youth Commission. *(Youth and Seniors)*
4. Cost-Recovery Program. *(Strategic Goal: Effective and Culturally Responsive Government)*
 - a. Continue to implement and manage a cost-recovery program so the City can recover its costs and can recover for damaged property.
5. Employment/Human Resources. *(Strategic Goal: Effective and Culturally Responsive Government)*
 - a. Continue to review and to update personnel policies, as needed. Continue to participate in and advise on employee issues during continued negotiations with the remaining bargaining groups.
6. Civil Litigation. *(Strategic Goal: Effective and Culturally Responsive Government)*
 - a. Continue to manage the bulk of civil litigation in-house, with less reliance on outside counsel, except for some unique and particularly specialized cases.
 - b. Work to resolve North of Boronda Future Growth Area-related litigation to facilitate development of new housing. *(Housing/Affordable Housing)*

CITY ATTORNEY DEPARTMENT

Summary

7. Prosecution of Municipal Code Violations. *(Strategic Goal: Public Safety)*
 - a. Continue to prosecute misdemeanor violations of the Salinas Municipal Code.
8. Update and Implement City Policies. *(Strategic Goal: Effective and Culturally Responsive Government)*
 - a. Advise on and support efforts to update the City's General Plan.
 - b. Work with City Council and City Administration to update and develop policies for Council norms and procedures, including Rules of Decorum.
 - c. Support effective governance for City Commissions and Committees; provide training for new Commissioners and Committee members.
 - d. Advise on and support efforts to make City services more accessible and culturally responsive.

Major Budget Changes

A Legal Secretary position remains unfilled. Recruitment will begin again to coincide with continued efforts to recruit for an Assistant City Attorney. This Legal Secretary will provide much-needed support and increase efficiency and effectiveness within the Office.

An Assistant City Attorney position remains unfilled due to ongoing recruitment challenges. The Office will again attempt to recruit for an Assistant City Attorney to fill an existing vacancy. Until the position is filled, the City will need to rely on outside counsel to assist with civil litigation.

CITY COUNCIL DEPARTMENT

1000 City Council Division

City Council Goals, Strategies, and Objectives for FY 2023-24

The City Council strives to implement key strategic goals and strategies identified during their 2022 strategic planning session.

The new City of Salinas Strategic Plan 2022-2025 goals include the following:

- Economic Development - Sustain, encourage, and develop a diverse and thriving economy that benefits all Salinas residents and businesses and that contributes to the community's economic health.
- Housing/Affordable Housing - Pursue housing options for residents of all income levels, including the unsheltered, that is safe and secure.
- Infrastructure & Environmental Sustainability – Invest in and maintain green infrastructure that creates a vibrant City and generates community pride and improved climate resiliency.
- Public Safety – Continue to improve community safety by engaging residents and using a broad range of proactive approaches that emphasize community connection and prevention programs.
- Youth & Seniors – Provide opportunities for healthy development and social connections through recreational facilities, programs, and activities.
- Effective & Culturally Responsive Government – Provide effective and culturally-responsive government programs and services in a professional, customer-oriented manner that ensures equitable solutions to community challenges.

Staff will continue to work incrementally to make progress on strategic goals.

Division Operations

1. Continue to hold City Council meetings as prescribed by the City Charter.
2. Determine and prioritize service levels for all City departments.
3. Participate in appropriate advocacy associations, including the League of California Cities and the National League of Cities.
4. Represent the City's interests in regional and intergovernmental processes.
5. Continue outreach to City residents, neighborhoods, and community groups.

Major Budget Changes

None.

COMMUNITY DEVELOPMENT DEPARTMENT

Summary

Purpose

With ongoing community collaboration, the Community Development Department is committed to creating a safe, healthy, and prosperous Salinas through targeted revitalization and sustainable, well-designed land use and development. Department functions include planning, plan implementation, permitting, management of federal funding, housing facilitation, homeless services, code enforcement, business retention and expansion and small business development. There are seven divisions in the Department: Administration, Advanced Planning & Project Implementation, Current Planning, Permit Services, Code Enforcement, Housing & Community Development, and Economic Development.

The 21/22 fiscal year was extremely busy for the department as staff fielded over 23,000 calls, issued 3,243 permits with a valuation of over \$83.4 million. Last fiscal year, CDD also secured nearly \$45 million in grants, and continued to provide direct rental support, reaching over 1,500 households with \$14 million in assistance. The department made significant progress on the General Plan Update and Climate Action Plan and streamlined the Accessory Dwelling Unit (ADU) process with pre-approved plans.

City Council Goals, Strategies, and Objectives for FY 2023-24

(Economic Development, Housing/Affordable Housing, Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors, Effective and Culturally Responsive Government)

1. Continue to implement the Alisal Vibrancy Plan including greening, litter abatement and public art/district identity improvements and the adoption of commercial corridor guidelines and a district identity plan. *(Strategic Goal: Economic Development)*
2. Build an Economic Development team that focuses on site development and industry attraction, business retention and expansion, and continued support of small businesses and entrepreneurs through business navigation, loans, and connection to small business resources. *(Strategic Goal: Economic Development)*
3. Develop an opportunity site inventory list to promote retail, commercial and industry to maximize their current use, future development and redevelopment for job creation and property and sales tax revenue generation. *(Strategic Goal: Economic Development)*
4. Prepare a Master Plan for the Salinas Intermodal Transportation Center that includes Transit Oriented Development. *(Strategic Goal: Economic Development)*
5. Process the Ferrasci Business Center Specific Plan (FBCSP) application and associated environmental review documents (Target Area K). FBCSP implementation will provide new employment and revenue generating opportunities. *(Strategic Goal: Economic Development)*
6. Evaluate the formation of an Enhanced Infrastructure Financing District (EIFD) to fund infrastructure improvements to facilitate the development of the Salinas Ag Industrial Center. *(Strategic Goal: Economic Development)*
7. Revise the Commercial Cannabis Ordinance to open new opportunities for business and ensure sensible regulation. Complete a Cannabis Equity Assessment to mitigate the harm done to those communities most impacted by criminalization. *(Strategic Goal: Economic Development)*

COMMUNITY DEVELOPMENT DEPARTMENT

Summary

8. Continue to work with the community, food vendors, and nonprofits to expand healthy foods choice and explore entrepreneurship opportunities such as new farmer's markets, food truck pods, development of a community/commercial kitchen, and community gardens. *(Strategic Goal: Economic Development)*
9. Continue to coordinate with the County on the implementation of the Downtown Vibrancy Plan and Alisal Vibrancy Plan Memorandums of Understanding to include undertaking planning activities for a downtown parking facility and city and county properties around the Division Street Opportunity site in the Alisal. *(Strategic Goals: Economic Development and Housing/Affordable Housing)*
10. Complete the entitlement process for a vibrant, multi-phase new mixed-use development at the corner of John Street and Abbott to include a 111-room hotel, 242 dwelling units, nearly 139,000 sq ft of retail and office. *(Strategic Goals: Economic Development and Housing/Affordable Housing)*
11. Complete Housing Element Update by December 15, 2023. *(Strategic Goal: Housing/Affordable Housing)*
12. Launch preparation of the East Area Specific Plan to increase housing opportunities and create healthy, walkable and sustainable neighborhoods. *(Strategic Goal: Housing/Affordable Housing)*
13. Support development of the Future Growth Area (FGA) by coordinating infrastructure investment and processing tentative map applications. *(Strategic Goal: Housing/Affordable Housing)*
14. Using SB2 grant funds complete technical studies and any related zone changes to facilitate housing development opportunities in the downtown, North and East Salinas. *(Strategic Goal: Housing/Affordable Housing)*
15. Continue to promote ADU development through pre-approved ADU plans, streamlining of processes, updating regulations consistent with State law, and connecting applicants to financing. *(Strategic Goal: Housing/Affordable Housing)*
16. Leverage American Rescue Plan Act (ARPA) funding and other housing resources to incentivize and promote the production of low- and moderate-income housing for families, workforce, including farmworkers, and seniors. *(Strategic Goal: Housing/Affordable Housing)*
17. Continue to partner with the County of Monterey to develop an affordable multi-family housing project at 855 E. Laurel Drive. *(Strategic Goal: Housing/Affordable Housing)*
18. Facilitate the continued rehabilitation and full occupancy of 202 units of affordable, permanent supportive housing at awarded HCD Homekey project sites. *(Strategic Goal: Housing/Affordable Housing)*
19. Facilitate acquisition of three homes and completion of ADUs with BACS through the Family Homelessness Challenge Grant. *(Strategic Goal: Housing/Affordable Housing)*
20. Continue to effectively manage the Interim Housing Motel Program to help navigate participants into permanent housing and support Health & Safety Days. *(Strategic Goal: Housing/Affordable Housing)*

COMMUNITY DEVELOPMENT DEPARTMENT

Summary

21. Continue to actively engage the unhoused through the Salinas Outreach and Response Team (SORT) to connect to services and provide case management to provide pathways to housing. *(Strategic Goal: Housing/Affordable Housing)*
22. Implement a rental registration program to promote health and safety, provide tenant/landlord support, and help stabilize Salinas' housing stock. *(Strategic Goals: Public Safety and Housing/Affordable Housing)*
23. Promote safe, habitable housing by coordinating with landlord and tenants to eliminate lead hazards. *(Strategic Goals: Public Safety and Housing/Affordable Housing)*
24. In collaboration with the community and the Police and Fire Departments complete a comprehensive draft of a Public Safety Element as part of the General Plan by Spring 2024. *(Strategic Goals: Public Safety and Effective and Culturally Responsive Government)*
25. Continue to effectively implement awarded Cal ICH Grants using 'Housing First' best practices to provide unhoused residents with viable pathways to housing and to allow for the restoration of former encampments sites to their intended public use. *(Strategic Goal: Public Safety)*
26. Improve code enforcement outcomes by coordinating with Fire Prevention, Police Department, Public Works, Monterey County Environmental Health, and Republic Services to address blighted properties and quality of life issues such as noise complaints and illegal vending. *(Strategic Goal: Public Safety)*
27. Increase inspection warrants and continue to implement administrative and legal remedies in gaining compliance on nuisance properties that may have health and safety dangers. *(Strategic Goal: Public Safety)*
28. Continue to expand community engagement opportunities and education to encourage compliance with City codes. *(Strategic Goal: Public Safety)*
29. Program legal settlement funding to mitigate harm created by opioids targeting substance and prescription drug abuse prevention and treatment programs. *(Strategic Goal: Public Safety)*
30. Continue to coordinate with Library and Community Services and Public Works to implement park and recreational facility improvements including the design and construction of a new Hebborn Family Center, El Gabilan Park multi use court improvements Closter Park public art and signage improvements, and preparation of Cesar Chavez Master Plan and trail project to implement the Alisal Vibrancy Plan. *(Strategic Goal: Youth and Seniors)*
31. Complete the final phase of rehabilitation of the Sherwood Recreation Center project in collaboration with Library and Community Services. *(Strategic Goal: Youth and Seniors)*
32. Produce draft General Plan update and Climate Action Plan by Spring 2024. *(Strategic Goals: Infrastructure and Environmental Sustainability and Effective and Culturally Responsive Government)*
33. Complete implementation of the new paperless permitting system and develop new easy to understand, bilingual educational materials for the Permit Center. *(Strategic Goal: Effective and Culturally Responsive Government)*

COMMUNITY DEVELOPMENT DEPARTMENT

Summary

Major Budget Changes

Although it may seem as if the CDD operational budget has significantly increased, most of the change was created when projects originally categorized as Capital Improvement Projects were shifted into operating. In addition, CDD has been successful in securing millions in grants, which has resulted in the need for additional staffing. Many of these positions are limited term and will ultimately be phased out as funding decreases.

Permit Services has moved to a separate Enterprise Operation fund effective FY 2018.

COMMUNITY DEVELOPMENT DEPARTMENT

3461 Administration Division

Purpose

The Administration Division provides oversight to the department by supervising, monitoring, and controlling the Department's operating budget and activities. The Administration Division is also responsible for integrating the initiatives, goals, and objectives established by the City Council into the overall operations of the Department's Divisions. The Division oversees both internal and external communications for the departments and helps residents navigate department services.

Division Operations

1. Lead the development of department goals, objectives, and actions, in alignment with the City Council strategic plan.
2. Administer the department's budget within authorized amounts.
3. Establish and monitor key performance indicators (KPIs) and customer service satisfaction.
4. Guide departmental messaging and internal and external communications.
5. Manage overall department workload, organization of responsibilities, and staffing levels.
6. Assist in securing additional funding for departmental activities.
7. Provide administrative and technical support to the department divisions in the performance of their duties.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Process Personnel Requisitions within 1 business day	N/A		90%	90%	90%
Process Personnel Action Forms (PAFs) within 2 business days	N/A		90%	90%	90%
Process invoices within 7 days	N/A		80%	80%	80%

Major Budget Changes

A major budget change is the shifting of the Assistant Director and Office Tech positions from 3111 APPI to 3461 Administration, resulting in an increase to the division's salaries and equipment and training expenses. However, a subsequent reduction will occur in the APPI budget.

COMMUNITY DEVELOPMENT DEPARTMENT

1355 Economic Development Division

Purpose

Develop and implement strategies and programs that further the Council's 2022-2025 Economic Development Goals, Strategies and Objectives to enhance the economic well-being of the city and its residents by increasing the number of middle- and upper-income job opportunities and growing the City's revenue base to support the provision of City services. Primary economic development strategies include real estate management and site attraction, business retention, expansion and marketing, and small business and entrepreneur support.

Division Operations

1. Work with other local agencies and private sector businesses to create and maintain a healthy business environment, including business attraction, workforce development, site inventory, and support for the agricultural and AgTech clusters.
2. Manage the City's real estate portfolio, to maximize current use, future development, and redevelopment.
3. Identify and implement finance and development strategies to support existing and future business through the provision of affordable broadband, utility, and circulation infrastructure.
4. Build business and property owner relations through a Business, Retention, and Expansion Program to support existing business to grow and thrive.
5. Market existing attractions and facilities and identify and promote commercial sites and tourism opportunities.
6. Further EDE, DVP, AVP and CRP economic development policies and actions including microloan, outdoor dining and façade improvement programs, and shop local initiatives.
7. Provide small business and entrepreneur support through counseling, permit navigation, and referral to technical and capital resources.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Conduct 20 site visits to build businesses/industry relations				5%	100%
Establish online site inventory to promote business and development opportunity sites such as Target Area K and the Ag Industrial Center				10%	100%
Develop and execute a marketing and attraction campaign and materials to promote tourism				20%	100%
Develop Shop Local tool kit for promoting city commercial shopping districts				25%	100%
Collaborate with training resource network to develop and provide 3 training workshops to support local entrepreneurs and businesses to be competitive in government bidding processes.				25%	100%
Collaborate with SUBA to establish and coordinate the Alisal Ambassador Program for the East Alisal Commercial Corridor. Conduct 8 volunteer based clean ups.				20%	100%
Issue \$150,000 to small businesses in forgivable loans/microgrants to support outdoor dining, facade improvements, and technology and marketing.				5%	100%

COMMUNITY DEVELOPMENT DEPARTMENT

1355 Economic Development Division

Major Budget Changes

The total Economic Division FY 23/24 budget remains neutral despite staffing level changes to create a deeper economic development team. Requested professional services have increased to evaluate the potential development of an Enhanced Infrastructure Financing District (EIFD) to finance the backbone infrastructure necessary to facilitate the development of the Salinas Ag Industrial Center and to develop business and tourism marketing material. Other additions include the creation of a citywide microloan/grant program (\$100,000). The ED division budget also includes an existing partnership obligation with Hartnell College to support workforce development initiatives in the Salinas Valley and costs associated with the management of the City's real estate assets. City sponsorships have shifted from this Division to Administration.

COMMUNITY DEVELOPMENT DEPARTMENT

3111 Adv Planning & Project Implementation Division

Purpose

The Advanced Planning and Project Implementation Division (APPI) provides comprehensive and responsive long-range planning services that address the needs of the community and promote economic and social well-being. Core services include update, implementation and maintenance of the General Plan and other long-range planning documents (e.g., Zoning Code and related ordinances, Climate Action Plan, other special studies), coordination with local, regional, state, and federal agencies on land use, housing, environmental and long-range planning initiatives, and processing complex planning projects and/or initiatives. Community engagement is central to APPI's work and purpose, and the Division works closely with other divisions and departments on outreach training and support. APPI also supports, coordinates and leads implementation of the General Plan, and Salinas Downtown Vibrancy, Alisal Vibrancy, and Chinatown Revitalization Plans' goals, policies and actions.

Division Operations

1. Lead long-range planning efforts (e.g., Climate Action Plan, General Plan Update -Visión Salinas 2040, 2023-2031 Housing Element Update) that are guided by a comprehensive and inclusive community engagement process.
2. Facilitate future development by supporting the processing of specific plans, annexations, zoning code amendments and other plan amendments.
3. Coordinate land use with County, regional public agencies, and school districts.
4. Maintain engaging and relevant website and social media presence to ensure the community is informed about planning initiatives, implementation activities and available services.
5. Continue to lead implementation of Alisal Vibrancy Plan and Chinatown Revitalization Plans.
6. Increase implementation capacity using five VISTA Members awarded through AmeriCorps VISTA program.
7. Prepare and/or assist with implementation of various grants to further community plan initiatives.
8. Continue to support community engagement efforts across City departments.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Release a Public Review Draft General Plan by June 30, 2024					100%
Release a Public Review Draft Climate Action Plan by June 30, 2024					100%
Complete Housing Element Update			80%	80%	100%
Reach 10,000 Salinas residents with communication about the General Plan Update through a variety of channels (emails, social media, radio, TV, canvassing, etc.)	N/A	N/A	80%	80%	20%
Complete environmental and technical studies to support the rezoning of identified opportunity sites in the Downtown, East and North Salinas to mixed-use to increase housing production and sales revenue			100%	80%	20%
Adopt commercial corridor guidelines and district identity plan for the Alisal			80%	20%	80%
Collaborate with Library and Community Services on design and construction of improvements to El Gabilan Play Lot and Closter Park improvement projects			40%	30%	70%
Complete design and commence installation of greening, litter abatement and public art/district identity improvements through the Caltrans Local Clean California Grant.			100%	20%	80%

COMMUNITY DEVELOPMENT DEPARTMENT

3353 Code Enforcement Division

Purpose

The Code Enforcement Division promotes a safe and blight-free community by addressing substandard housing, dangerous buildings, unauthorized land and building uses, zoning violations, unpermitted work, and other health, safety, and welfare concerns. The Division is responsible for ensuring compliance with the Zoning Code, Property Maintenance Code, and other city and state regulations by performing inspections and whenever necessary issuing citations or pursuing other legal remedies. Code Enforcement is an essential tool for crime prevention, housing stabilization, and blight elimination.

Division Operations

1. Increase public awareness of the hazards of substandard housing and dangerous buildings.
2. Use available remedies to address issues of blight, housing code violations and dangerous buildings.
3. Seek options to enhance the resources available to the Code Enforcement Division to strengthen the level of enforcement and reduce substandard and dangerous conditions.
4. Continue to oversee and streamline the Weed Abatement and Vendor Enforcement Programs.
5. Maintain a framework to prioritize and measure code enforcement activities.
6. Continue outreach efforts that foster citizen participation in related code enforcement efforts to stabilize and improve neighborhoods.
7. Evaluate state and local policies and ordinance changes to improve compliance with City Codes.
8. Work collaboratively with other City departments and outside agencies on education and outreach activities to achieve compliance.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Number of cases opened	1344	1510	1250	1000	1250
Number of cases closed	1176	1406	1000	750	1000
Number of active cases	736	1002	250	500	250
Average time to resolve a code enforcement case	4 months	4 months	3 months	3 months	2 months
Number of educational or outreach events held	7	2	6	6	4
Number of inspections completed	3,120	3,425	6,000	3,500	4,500
Number of receivership actions initiated	3	4	4	4	4

Major Budget Changes

After the budget was approved last year, City Council adopted a revised Vendor Ordinance and authorized the addition of a Code Enforcement Officer. During this period, the department re-evaluated staffing needs and upgraded two positions from a Code Enforcement Officer II to a Senior Code Enforcement Officer, and from an Administrative Aide to an Administrative Analyst. These staffing changes require additional expenses related to training, supplies, furniture, and computer hardware/software. In addition, new State requirements related to lead-based complaints will require additional staff training.

COMMUNITY DEVELOPMENT DEPARTMENT

3462 Current Planning Division

Purpose

The Current Planning Division ensures that development projects and proposals conform to the General Plan and Zoning Code regulations or any other applicable regulations and standards. The Division is responsible for diligently and expeditiously processing administrative applications (Site Plan Reviews, Parcel Maps, Lot Line Adjustments, Lot Mergers, Temporary Use of Land Permits, Home Occupation Permits, Master Sign Plans, and Sign Permits), as well as discretionary development applications including, but not limited to, General Plan and Zoning Code Amendments, Specific Plans, Planned Unit Development Permits, Tentative Maps, and Conditional Use Permits in order to facilitate residential and non-residential development. Current Planning prepares and coordinates environmental evaluations (CEQA) for applicable development projects. Current Planning received responsibility for administering the City's Cannabis regulations on December 1, 2018.

Division Operations

1. Review development proposals for consistency with local and state requirements.
2. Process administrative and discretionary development applications.
3. Assist the public with development and subdivision of land.
4. Provide planning guidance to potential development projects at the public counter, over the phone, or to other departments and agencies in order to facilitate economic growth.
5. Swiftly review building permit plans within established timeframes to facilitate development.
6. Support the Planning Commission in its role as a decision-making body on planning entitlements.
7. Support the Historic Resources Board in promoting historic preservation and reviewing work to historic resources.
8. Work in collaboration with the Business Development Committee and other community stakeholders to continually improve the development review process.
9. Administer the City's Cannabis regulations.

Performance Measures

Performance Measure / Goal**	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Number of discretionary and administrative permits processed	506	565	550	461	475
Number of counter customers served	n/a	1,575	1,500	2,114	1,600
Number of building permit reviews conducted	1,359	1,604	1,200	1,984	1,800
Percent of building permit reviews processed within prescribed timeframes	92%	89%	95%	93%	90%
Average # days to Approval from Completeness for Site Plan Reviews	33	n/a	14	30	14
**As expected with the COVID-19/Shelter-In-Place restrictions and staff vacancy, projected revenue and performance metrics were impacted as the public counter was closed during the 2020-2021 fiscal year.					

Major Budget Changes

Over the last few years, the number of planning applications received has significantly increased. It is anticipated that the number of submitted planning applications will continue over the next fiscal year. Because of the sustained level of planning applications and building permit review, the Division will continue to need temporary part-time assistance and outside professional services to help digitize planning records, and help process applications, help with cannabis permitting, and monitor cannabis tax assessments.

COMMUNITY DEVELOPMENT DEPARTMENT

Housing and Community Development

Purpose

The Housing and Community Development Division (Housing Division) enhances the Salinas community by assisting with the provision of safe, decent, and affordable housing to low and moderate-income households. The Division effectively manages housing-related activities, programs, and projects through the City's Inclusionary Housing Program, United States Department of Housing and Urban Development (HUD) Community Development Block Grant (CDBG) Program, HOME Investment Partnerships Program (HOME), Home Investment American Rescue Plan (HOME ARP), Emergency Solutions Grants (ESG) Program and American Rescue Plan Act (ARPA) funds. The Housing Division is also responsible for the administration of the California Department of Housing and Community Development (HCD) ESG Program, HCD California Emergency Solutions and Housing (CESH) Program, HCD Permanent Local Housing Allocation Program (PLHA), competitively awarded Cal ICH Encampment Resolution Fund (ERF) and Family Homeless Challenge (FHC) grants, and United Way Emergency Rental Assistance Funding (ERAP). The Housing Division promotes housing development by implementing policies, regulations, and incentives that help preserve existing affordable housing, funds the development of new affordable housing, and assist individuals and families gain access to permanent housing and other services related to homelessness.

Division Operations

1. Provide grants and loans to help facilitate housing, economic development and capital improvement projects through HUD CDBG, HUD HOME, HOME ARP and HCD PLHA programs.
2. Provide direct public services and award grants through HUD CDBG, HUD ESG, HCD ESG, HCD CESH, Cal ICH ERF, Cal ICH FHC and UW ERAP programs to facilitate a variety of activities including homeless related programs and rental assistance that will benefit residents within Monterey and San Benito counties.
3. Prepare HUD required documents such as the Consolidated Plan (Con Plan), Alisal Neighborhood Revitalization Strategy Area (ANRSA), Citizen Participation Plan (CPP), Annual Action Plan (AAP) and Consolidated Annual Performance and Evaluation Report (CAPER).
4. Conduct annual monitoring compliance, loan servicing and technical assistance functions for the City's grant, loan and deed restricted property portfolio (900+ units).
5. Implement the City's Inclusionary Housing Program.
6. Continue to partner and collaborate with various departments and agencies including the County of Monterey and the local Continuum of Care (CoC) to address homelessness through the implementation of best practices and the adopted strategies of a regional Lead Me Home Plan.
7. Assist in the coordination of City efforts and initiatives, and direct engagement with unhoused residents to establish effective linkages to services through the Salinas Outreach and Response Team (SORT).

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Number of grant applications processed through annual RFP process	43	37	10	24	20
Number of payments and reports processed for grantees	495	457	240	397	200
Number of affordable housing funding agreements processed	6	2	4	5	8
Number of new affordable housing units developed with City funding	96	101	100	140	111

COMMUNITY DEVELOPMENT DEPARTMENT

Housing and Community Development

Major Budget Changes

The Housing Division will experience significant budget changes in FY 23/24. Although sustained levels of funding are expected in CDBG, HOME and ESG entitlement programs and the HCD ESG program, there will also be significant funding reductions related to the expiration of one-time HUD ESG-COVID and HCD-COVID funds. New funding from HUD HOME ARP and awarded Cal ICH grants award will partially offset this funding loss and will enhance the Division's current homeless services component. Using HUD grant funds, the Division will continue to offset \$144,000 of General Fund salaries and benefits for other Department divisions. Other significant budget changes for FY 23/24 include a request of \$120,000 from the General Fund for an additional Administrative Analyst position to support an expansion of the City's Fair Housing program and the implementation of a Rental Registration program. Ultimately, this position may be funded through revenues collected through the registration program, but it will take time to ramp up the program over next fiscal year.

COMMUNITY DEVELOPMENT DEPARTMENT

3181 Downtown Streets Team

Purpose

On March 7, 2023, City Council authorized the City Manager to direct the transfer of appropriations for operating activities currently in the City's CIP budget to the appropriate operating budgets and designate unspent appropriations for the activities at fiscal year-end as assigned fund balance.

This activity will provide street outreach, case management, and employment referral services for the homeless population. In addition, DST will provide clean up services at homeless encampments. Activities will focus on clean-up efforts in City parks, neighborhoods and along waterways

COMMUNITY DEVELOPMENT DEPARTMENT

3279 Homeless Service Coordination

Purpose

On March 7, 2023, City Council authorized the City Manager to direct the transfer of appropriations for operating activities currently in the City's CIP budget to the appropriate operating budgets and designate unspent appropriations for the activities at fiscal year-end as assigned fund balance.

This activity will assist with inter-departmental coordination of City Health and Safety Days. Funding would be used to assist with homeless engagement efforts such as temporary shelter and hotel vouchers, pet assistance, food assistance, hygiene kits, temporary storage unit rental, laundry services, minor repairs to get vehicles on the road, and transportation such as taxis, Uber or Lyft for related appointments. Funds would also support purchase of tools for clean-up events, and sanitation stations at various homeless encampments.

COMMUNITY DEVELOPMENT DEPARTMENT

3328 East Area Specific Plan (EASP)

Purpose

On March 7, 2023, City Council authorized the City Manager to direct the transfer of appropriations for operating activities currently in the City's CIP budget to the appropriate operating budgets and designate unspent appropriations for the activities at fiscal year-end as assigned fund balance.

This activity entails the preparation of a city-driven specific plan for the East FGA. A specific plan establishes the City's vision for future development and streamlines the entitlement process for developers. Specific Plan preparation will be incorporated into General Plan Update process in order to streamline the entitlement process for future development to include a variety of housing types and commercial/retail, and public/semi-public uses in the East FGA. At this time the General Fund is identified as the only funding source. In the future, planning grants, developer fees, and the General Plan/Zoning maintenance fee may be used to offset costs and to reimburse the General Fund.

3701 General Plan

Purpose

On March 7, 2023, City Council authorized the City Manager to direct the transfer of appropriations for operating activities currently in the City's CIP budget to the appropriate operating budgets and designate unspent appropriations for the activities at fiscal year-end as assigned fund balance.

This activity is for the update and maintenance of the City's General Plan to be in compliance with State Code. From January 2021 to early 2024, the City will undertake community engagement, prepare technical studies and analysis to prepare an updated General Plan, its first Climate Action Plan, the associated Environmental Impact Report, and Zoning Code Update. This General Plan Update will include a new Environmental Justice Element.

FINANCE DEPARTMENT

Summary

Purpose

The Department of Finance provides the management, control, and administration of all fiscal operations of the City. This includes providing a framework for financial planning and analysis to support the operations of all City Departments. Departmental responsibilities include long-range financial planning, budget management, accounts receivable and payable, payroll processing, retirement administration, general accounting and reporting, debt administration, purchasing, revenue and licensing, , and assessment district administration.

Top Accomplishments for Fiscal Year 2023 Operational Efficiencies

1. Worked collaboratively with departments to balance the fiscal year 2023 budget.
2. Amended the City's financial policies, establishing and funding several new reserves to better position the City able to withstand financial emergencies and to make decisions strategically, rather than financially, and establishing minimum targets for annual infrastructure and facilities maintenance appropriations.
3. Completed the annual audited financial statements and Single Audit of Federally Assisted Grant Programs (Single Audit), receiving unmodified auditor's opinions/reports (i.e., opinions/reports wherein the auditor has concluded that the financial statements are presented fairly, in all material respects, in accordance with the applicable financial reporting framework).
4. Improved the calculation of available fund balances.
5. Supported all bargaining units/labor negotiations with labor costing and budgetary/financial updates.

City Council Goals, Strategies, and Objectives for Fiscal Year 2024

Operational Efficiencies

1. Seek training opportunities for staff, apprising them of Governmental Accounting Standards Board ("GASB") pronouncements the City is required to implement.
2. Complete the annual audited financial statements and Single Audit by December 31st.
3. Continue to receive unmodified opinions on the City's financial statements and compliance for major federal award programs (Single Audit).
4. Develop City's first annual comprehensive financial report ("ACFR") and earn Government Finance Officers Association's Certificate of Achievement for Excellence in Financial Reporting.
5. Continue to implement and improve financial systems.
 - a. Special Assessment Management.
 - b. Deferred Compensation Administration.
 - c. Travel Reimbursements.
 - d. Business Licenses including better online payment services.

FINANCE DEPARTMENT

2030 Finance Administration Division

Purpose

Provide coordination and direction of all fiscal operations of the City. This includes directing, monitoring, and controlling the assets and financial operations of the City, and providing a framework for financial planning and analysis to support the operation and management of all City departments.

Division Operations

1. Support City Manager's Office in determining a strategy to assess the effectiveness and efficiency of the organization given fiscal constraints.
2. Assist City Manager's Office in developing funding strategies to meet existing and future operating program and capital project needs.
3. Submit timely and informative financial reports to the City Council, Finance Committee, Measure E Committee, and Measure G Committee.
4. Publish audited financial statements for the City.
5. Coordinate all bond financings.
6. Coordinate the preparation of the annual operating and capital budgets.

Major Budget Changes

None.

FINANCE DEPARTMENT

2031 Accounting Division

Purpose

Maintain the accuracy and reliability of all City's financial transactions for all funds. These transactions include accounts payable, accounts receivable, general ledger accounting, enterprise accounting, internal service accounting, financial reporting, administration of the employee payroll and management of all grants and debt service. Senior Accounting Technician position is dedicated to retirement administration including trust deed investments and other employee deferred compensation investments. Other services include financial data analysis, accounting control of purchase orders, asset management, payments to vendors, and review of budgeted expenditures.

Division Operations

1. Cash management including cash flow, banking and bond trustee services and investment of funds in accordance with the City's investment policy.
2. Monitor and process bi-weekly payroll and related federal and state reporting requirements.
3. Coordinate year end audits of City financial activities and Single Audit of federal financial assistance grants.
4. Manage the financial aspect of all grants awarded to the city.

Major Budget Changes

None.

FIRE DEPARTMENT

Organizational Chart by Position

FIRE DEPARTMENT

Summary

Purpose

The Salinas Fire Department provides 24-hour prevention, response, mitigation, and recovery efforts for fires, hazardous materials, emergency medical services, traffic collisions and aircraft emergencies, and all other emergency and non-emergency service requests within the City of Salinas corporate limits. 95% of the fire department staff comprises emergency response personnel assigned to fire apparatus. The primary goal of the fire department is the protection of life, property, and the environment for those that live, work, and visit the City of Salinas. All divisions of the fire department; Administration, Suppression and Rescue, Emergency Medical Services, Prevention, Disaster Preparedness, Training, Vehicle Maintenance, and Hazardous Materials work in conjunction to support this goal.

Top Accomplishments for FY 2022-23

1. **Grants – Assistance to Firefighters Grant (AFG) 2022** - The Fire Department applied for and was awarded a grant in the amount of \$29,225.37 to procure 5 QRAE3 gas exposure monitors for all apparatuses. The devices will allow the department to respond to carbon monoxide events in an expedient manner, with the least amount of apparatus needed.

California Water Service Firefighter Award - The Fire Department applied for and was awarded the California Water Firefighter Grant in the amount of 29,921.45, to fund the equipment purchases for the Unmanned Aerial System (UAS) team. Along with an established UAS program, the funds allowed the department to enhance operational intelligence during a wide range of emergencies.

Staffing for Adequate Fire and Emergency Response (SAFER) - In an effort to expand the fire department's workforce, prepare for the expansion of the city's west area, and meet NFPA standards, the Fire department applied for the SAFER grant. If awarded, the department will receive funding for 9 full-time benefited positions.

Bay Area UASI Grant - The Fire Department is currently utilizing granted funds to update the regional Mobile Command and Communications Vehicle. The upgrades will enhance interoperable communications capabilities between the Monterey County Next Generation Emergency Network (NGEN) and the Bay Area Regional Interoperable Communications System (BARICS). The communications vehicle will be fully upgraded by end of 2023.

2. **Recruitment and Hiring** – The Salinas Fire Department successfully completed an academy of 15 Firefighter Recruits, who subsequently went into the field in September of 2022. This has helped the department's staffing offset the effects of turnover and industrial leave injury cases.

Recruitment Taskforce - Salinas Fire has prioritized recruitment and retention efforts by creating a well-structured recruitment taskforce that targets local candidates. The task force is comprised of personnel of all ranks and has begun engaging the community at multiple events including elementary, middle school, high school and college career fairs, community outreach events, mock interviews for students, visiting local EMT and fire science classes and more.

Explorer Program - Salinas Fire opened its doors to interested Firefighter candidates by kicking off the Explorer Program. Explorer Post 202 will instill interest in the profession to local youth that could lead to an increased number of local Firefighter recruits. Currently, there are 15 youth involved in the program learning fire service-related life skills.

Mission Trails ROP - The Salinas Fire Department continues to expand its partnership with Mission Trails Regional Occupational Program (MTROP) to attract and train local youth for a career of service

FIRE DEPARTMENT

Summary

with the City of Salinas Fire Department. This supports the City Council's strategic goal of local recruitment and diversity in the City's workforce.

3. **Emergency Medical Services** – Salinas firefighters responded to an increased number of emergency medical calls and successfully placed in operation 2 Lukas Devices. The devices will aid Salinas increase opportunities for better patient outcomes when performing CPR.
4. **Promotional Exams** –The Fire Department has completed numerous internal promotional testing to fill vacancies in multiple ranks which include Battalion Chief, Fire Captain, Fire Engineer, and Firefighter.
5. **Fire Prevention Division** – The division is currently recruiting to fill vacancies in part-time and full-time positions with the goal of increasing mandated inspection compliance and business safety inspections. Those improvements will help save lives and community resources. The division continues to pursue the Council approved re-classification/re-organization of inspection personnel to further improve the efficiency and accountability of inspections and help with recruitment and retention of staff.
6. **Facilities** – With the appropriation of ARPA funding to the Fire Department, staff has made progress in the plans for much-needed renovation and deferred maintenance items of Fire Stations 1-6. The department expects to begin renovation work at facilities by the beginning of FY 2024. Additionally, the Council approved improvements to the west wing of City Hall are near completion. The improvements to the west wing will combine the fire administration and prevention offices into one space and allow for efficiencies in supervision of staff, efficiencies in customer service, providing a combined workspace for fire department administrative and prevention personnel. It also provides for training facilities that can also serve as the City's Emergency Operations Center (EOC) in times of crisis. Office spaces vacated in the permit center will allow for expansion of community development programs, services, and staffing.
7. **Expansion of Coverage** – The Department is diligently pursuing the purchase of Fire Station 7 land in the Future Growth Area. Collaterally, the department has engaged a professional services firm to provide the scope and design of Fire Station 7. Should funding be procured, the Salinas Fire Department is prepared to move forward with a needs assessment for Fire Station 7.
8. **Wellness/Safety** – The Department has maintained its' training and resource availability in the areas of mental health and critical incident stress reduction. Several members of the department have received specific training in Critical Incident Stress Management (CISM) and Peer Support as part of a broader national initiative to reduce mental health impacts on public safety personnel. The department continues to strategize bringing additional specialized counseling resources to augment and improve existing programs. The Salinas Fire Department's Peer Support Program is recognized as the premier model amongst fire service agencies on the Central Coast.

City Council Goals, Strategies, and Objectives for FY 2023-24

Economic Development:

1. The Salinas Fire Department will continue to actively participate in the planning of development in the Future Growth Area (FGA) with consideration for the needs of an expanding community and diversity of risks. The Fire Department is proactively taking steps toward the purchase of the land for Fire Station 7 and actively pursuing its development.

FIRE DEPARTMENT

Summary

Housing/Affordable Housing:

1. The Salinas Fire Department will remain an ally in the goal of increasing opportunities in this arena. Supporting expeditious plan review and permitting as well as timely inspections of new projects are ways the department contributes to this goal.

Infrastructure and Environmental Sustainability:

1. The Salinas Fire Department will utilize current and future funding appropriations to prioritize and complete a host of repairs and alterations to fire stations throughout the city to ensure continuity of emergency services. Facilities will be upgraded to emerging “green standards” where feasibly and economically viable to do so.
2. The Salinas Fire Department's training division is seeking ways to improve the delivery of mandated firefighter training and develop centralized facilities while decreasing our carbon footprint. Limiting the movement of apparatus helps to reduce fuel consumption and vehicle wear while increasing the number of available unit hours to respond to emergencies. The division is actively planning for the demolition of the current tower with a new tower being built in the same location, with construction and completion planned for 2024.

Public Safety:

1. Engage neighborhoods:
 - a. Neighborhood fire stations will continue to host education events. Fire Prevention Week activities will return with a focus on educating youth and underrepresented population.
2. Invest in prevention and intervention programs:
 - a. It is a continued goal to increase staffing in the fire prevention division to address a long-standing need to expand fire and life-safety inspections to include business and commercial occupancies. This program will help protect critical investments in the community, economic development, housing, and quality of life.
3. Evaluate staffing levels of public safety personnel:
 - a. Assuring adequate staffing of all apparatus, in compliance with the National Fire Protection Association (NFPA) NFPA-1710 standard is a priority for the Salinas Fire Department. By ensuring that a minimum number of firefighters arrive at the scene of a structural fire within 15 minutes or less, as defined by the NFPA standard as an Effective Response Force (ERF), fire and economic loss is drastically reduced for every minute this force is in place.
 - b. Adequately staffing the department's two aerial apparatus aides in compliance with the NFPA 1710 standard and eliminates the need to commit additional apparatus to every fire incident in order to be in compliance. This allows for fire apparatus to remain available for additional calls for service.
 - c. Increases to suppression staffing will also reduce the City's dependence on mutual-aid resources from neighboring jurisdictions. These jurisdictions have expressed concern

FIRE DEPARTMENT

Summary

over their frequent commitment of resources to Salinas to backfill during periods of high call volume.

4. Hire locally for public safety positions:

- a. The fire department fully appreciates the benefits of a locally sourced workforce that is representative of the community we serve. Recruitment efforts extend to local community colleges, high schools, athletics programs, and a social media campaign highlighting opportunities for a diverse population of potential employees.

5. Maintain effective code enforcement practices:

- a. As the community expands and diversifies, so too will the efforts of the fire department in the realm of effective enforcement. The fire prevention division will strive to assure timely inspection of housing units and continue to partner with the City's code enforcement division to protect the safety of tenants from unsafe housing conditions.
- b. The Salinas Fire Department has expanded the pool of qualified unmanned aerial vehicle (UAV) pilots that will contribute in the augmented Illegal fireworks enforcement efforts in partnership with the Salinas Police Department. Inventive methods of combating the problem of illegal fireworks will continue to be developed with the goal of making the use of illegal fireworks socially unacceptable and subject to stringent consequences for violators.

Youth and Seniors:

1. It is the department's desire to strengthen the path for local youth to learn about the fire service through the Regional Occupational Program. The training division will continue to engage and accessible opportunities for youth to participate in the Fire Department's Explorer Program. With the department's participation in the South Bay Regional Training Academy and new Paramedic training program, Salinas youth could be given the opportunity for scholarships and/or sponsorship into the accredited fire academy. These programs create a straight-line pathway to hiring and promoting local youth.

FIRE DEPARTMENT

4505 Fire Administration Division

Purpose

The Administration Division is responsible for integrating the initiatives, goals, and objectives established by the City Council into the support and delivery Divisions of the Fire Department. The Administrative Division provides for the overall management of the Department by the development of new programs, policies and procedures, the promotion of life safety, environmental protection, and the provision of administrative support for Fire Department personnel, while ensuring Federal, State, local laws, Memoranda of Understanding and contractual agreements are in compliance. The Administration Division is also responsible for continuous self-assessment of Fire Department efficiency and the implementation of life safety programs.

Division Operations

1. Utilize National Fire Incident Reporting System (NFIRS) data to assist with administrative and operational changes to improve department efficiencies and operational priorities.
Improve Fire Department staffing within acceptable levels to minimize overtime costs.
2. Provide cost effective fire and emergency medical services to the community.
3. Pursue grant funding to minimize fiscal impacts to the General Fund.
4. Maintain a safe working environment for firefighters with new apparatus and equipment purchases.
5. Track firefighter injuries and trends. Represent the Fire Department and the City on multiple regional committees to collaborate in providing public safety services throughout the county and the region.
6. Spearhead the Emergency Operations Center and coordinate extra resources during inclement weather events and other community-wide emergencies.
7. Implement data-driven measures for the successful operation of all divisions.

FIRE DEPARTMENT

4510 Suppression Division

Purpose

The Suppression and Rescue Division is responsible for protecting life, property, and the environment from the hazards of fire, explosions, and hazardous materials incidents and for providing ALS emergency paramedic services. These services are provided 24-hours a day through one (1) Deputy Fire Chief and three (3) Battalion Chiefs who command three (3) platoons of Captains, Engineers, Firefighters, and Firefighter/Paramedics. These personnel are the initial responders to all incidents for emergency service and comprise the majority of funded positions within the organization. These teams responded to over 17,000 incidents last year with a daily minimum staffing of 24 personnel assigned to six (6) fire engines, two (2) ladder trucks, and a hazardous materials incident response unit. Additional emergency response equipment includes a Command Vehicle, Type III (wildland) Engine, Aircraft Rescue Firefighting (ARFF) engine, and numerous command and staff vehicles.

Division Operations

1. Respond, within response time goals, to all emergency and non-emergency requests for service with the appropriate number of personnel for the incident reported.
2. Eliminate the threats to life, property, and the environment following the arrival of fire companies at an emergency or non-emergency incident.
3. Maximize property saved values from fire threat after the arrival of fire companies.
4. Continually update policies, procedures and staffing as new techniques and technologies become available and funding allows.
5. Develop fire personnel through career track development, education, and training.
6. Administer, update, and maintain emergency communications agreements, equipment, and systems to ensure effective and efficient delivery of emergency services to the City of Salinas.
7. Provide management and operational oversight to all divisions of the department.
8. Ensure the timely maintenance, testing, and repair of facilities, tools, equipment, hoses, and appliances.
9. Provide for fire stations supplies and materials.
10. Maintain communication and coordination with mutual aid and automatic aid agencies to ensure efficient resource availability for efficient emergency response.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal

FIRE DEPARTMENT

4520 Emergency Medical Services Division

Purpose

The EMS Division provides 24-hour Advanced Life Support medical care at the paramedic first responder level through oversight provided by one (1) EMS Officer, and three (3) EMS Platoon Training Coordinators positions and one part-time administrative assistant. Advance Life Support care is provided twenty-seven (27) by crossed trained firefighter/paramedics. The mission is to respond to Emergency Medical (EMS) incidents to begin early potentially lifesaving treatment and care to the ill and injured in collaboration with the contracted ambulance transport provider. The EMS Division is an active participant and leader in the Monterey County Emergency Medical Services System. Fire Department paramedics will continue care of major and critical patients during transport to local hospitals.

Division Operations

1. Respond to all 911 request to provide Advanced Life Support and/or Basic Life Support rendering lifesaving critical care to enhance the community's quality of life.
2. Provide training and continuing education that meets or exceeds State of California and Monterey County policies, procedures, and standards to all Fire Department personnel.
3. Provide and train Tactical Paramedics (Tac-Med) for law enforcement SWAT operations.
4. Provide paramedics for City of Salinas sponsored special events.
5. Administer the Critical Incident Stress Management Program for the department.
6. Primary infectious disease control point for the City of Salinas.
7. Ensure that department and all EMS personnel are compliant with Quality Assurance/Quality Improvement policies.
8. Continue to implement an electronic narcotics storage and distribution system integration of multiple formats
9. Work to improve Emergency Medical Dispatch/Priority system to help enhance efficiency of response models.
10. Actively work with Monterey County on the strategic plan for emergency medical services and the development of the request for proposal for ambulance transportation to maximize the benefit to the residents of Salinas.
11. Initiate cost cutting measures to prioritize community safety, patient outcomes, and prevent firefighter injuries.
12. Successfully support four grant funded internal firefighters to attend Paramedic School.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal

FIRE DEPARTMENT

4530 Prevention Division

Purpose

The Fire Prevention Division is charged with the implementation, administration, and enforcement of the provisions of the California Fire Code (CFC), as authorized by California Code of Regulations, Title 19 and Title 24. The CFC establishes the minimum requirements consistent with nationally recognized practices to safeguard the public health, safety, and general welfare from:

1. The hazard of fire and explosion arising from the storage, handling or use of structures, materials, or devices.
2. Conditions hazardous to life, property, or public welfare in the occupancy of structures or premises.
3. Fire hazards in the structure or on the premises from occupancy or operation.
4. Matters related to the construction, extension, repair, alteration or removal of fire suppression or alarm systems.
5. Matters related to Fire Department access and water supply to State regulated facilities; and
6. Conditions affecting the safety of firefighters and emergency responders during emergency operations.

Division Operations

1. To provide programs and inspections that enhance the safety and welfare of Salinas' residents and businesses.
2. Conduct annual State mandated inspections of multi-family (R-2) dwellings, detention facilities and schools.
3. Conduct annual inspections of high hazard, commercial and assembly occupancies.
4. Conduct inspections for special operational and building permits.
5. Conduct plan review and approval for fire sprinkler systems, fire alarm systems, and other projects requiring permits/approvals from the Agency Having Jurisdiction (AHJ).
6. Conduct joint inspections and follow-up with the Code Enforcement Division and City Attorney's Office in collaborative enforcement efforts related to substandard housing, dangerous and blighted properties.
7. Oversee water purveyors' repair/replacement of damaged fire hydrants.
8. Administer the "safe-n-sane" fireworks lottery process and coordinate illegal fireworks enforcement efforts.
9. Coordinate investigations of major fire incidents.
10. Collaborate with the Monterey County Office of Emergency Services to update local and regional emergency plans.

FIRE DEPARTMENT

4540 Training Division

Purpose

The Training Division's mission is to provide fire department personnel with the highest standard of professionalism, safety, and expertise by providing organizational planning, self-development, conduct required training, special operations and promotion of safe practices. The division is administered by one (1) Battalion Chief and three fire captain/platoon training coordinators, one assigned to each platoon at Fire Station 3.

Division Operations

1. Provide the training required to meet National Fire Protection Association (NFPA) standards, Federal & State Fire Training mandates, Insurance Services Office (ISO), and local requirements.
2. Ensure firefighter safety through the provision of structured training programs, physical, and mental health, and wellness.
3. Provide all firefighters a minimum of 120 training hours per year under the supervision of qualified trainers in a controlled environment.
4. Acquire and maintain training props and equipment for the safe administration of training programs.
5. Provide tractor drawn (tiller) training to 100% of fire suppression personnel.
6. Coordinate training with mutual aid and automatic aid agencies in accordance with state, regional, and local agreements, and contracts.
7. Manage the Peer Fitness Program to include initial and ongoing evaluation of personnel and the maintenance and replacement of physical fitness equipment.
8. Provide oversight of the department's firefighter recruit academy.
9. Provide oversight and accountability of the probationary firefighters after graduation from the academy.
10. Manage the Department Critical Incident Stress Management (CISM) and Peer Support program to include continuing education for peer support personnel, awareness level classes for all personnel and manage critical incident stress defusing and debriefing.

FIRE DEPARTMENT

4560 Vehicle Maintenance Division

Purpose

The Vehicle Maintenance Division repairs and maintains all Fire Department vehicle and firefighting apparatus in accordance with National, State, DMV, NFPA and OSHA mandates. This is accomplished through scheduled preventive maintenance and on-demand repairs utilizing cross-trained firefighter mechanics. Repairs beyond the scope of fire mechanics are contracted out to qualified repair facilities. The division is administered by a battalion chief, a senior fire captain/mechanic, and five (5) fire personnel who are cross trained as mechanics.

Division Operations

1. Maintain and support an efficient and safe fleet of emergency response vehicles minimizing on-duty crew down time.
2. Maintain safe and functional auxiliary fire equipment.
3. Maintain fully functional reserve fire apparatus for use as frontline apparatus.
4. Track In-Service time of reserve and front-line apparatus.
5. Ensure all aerial and ground ladders are tested annually per manufacturer's specifications and NFPA standards.

4570 Hazardous Material Control Division

Purpose

The Hazardous Material Response Division is responsible for the effective control and initial mitigation of hazardous material emergencies in order to protect life, the environment and property. Eighteen (18) fire suppression personnel are cross-trained and equipped as Hazardous Materials Specialists. The Haz Mat Team also provides technical support, advice and training to Salinas businesses that utilize potentially hazardous materials in processing or manufacturing. Under the Monterey County Hazardous Materials Response Plan, the City's Haz Mat Team provides emergency responses to the Salinas community and the County of Monterey through a contractual partnership consisting of the City of Salinas, City of Seaside and County of Monterey Department of Environmental Health. New developments for this Division include the necessary response to Chemical, Biological, Nuclear, Radiological and Explosive (CBRNE) and Weapons of Mass Destruction (WMD) training, equipment and capabilities. The division also now provides emergency response and training to San Benito County. The division is supervised by one (1) battalion chief (special operations) and six (6) HazMat Team leaders, deployed two per platoon.

Division Operations

1. Ensure the safety of Hazardous Materials Team members through scheduled training.
2. Respond to hazardous material emergencies and minimize impacts to the community.
3. Process Certified Unified Program Agency (CUPA) reimbursements.
4. Provide quarterly training for Hazardous Material Team members.
5. Provide annual mandated training in hazardous material first responder operations (FRO) level.
6. Ensure Hazardous Materials team members receive annual medical assessments.
7. Prepare and submit quarterly CUPA reimbursement reports.
8. Maintain State of California OES standards for Type I emergency operations response.

LIBRARY AND COMMUNITY SERVICES DEPARTMENT

Organizational Chart by Position

LIBRARY AND COMMUNITY SERVICES DEPARTMENT

Summary

Purpose

The Library and Community Services Department provides a wealth of resources and opportunities to enrich the lives of those who live, work, play, and learn in our community. The Department consists of three Divisions: Recreation & Park Services, Community Outreach & Engagement and Library Services with the following goals: 1) To transform lives and contribute to the health and wellness of our community by providing a comprehensive array of recreational, cultural, educational, and neighborhood services for youth, families and seniors; and 2) To improve the quality of life in Salinas through collaborative problem-solving and the provision of information and resources that are relevant, accessible and responsive to the community's needs.

City Council Goals, Strategies and Objectives for FY 2023-24

1. Continue to develop and maintain reopening/ongoing operating standards for our libraries and recreation centers that mitigate the risk posed by the ongoing COVID-19 pandemic. (*Strategic Goal: Youth and Seniors*)
2. Continue to identify opportunities that support implementation of the Parks, Recreation & Libraries Master Plan. (*Strategic Goals: Youth and Seniors, Public Safety, Effective and Culturally Responsive Government, Infrastructure and Environmental Sustainability*)
3. Apply for and leverage multiple funding sources and partnerships to offer better programs and services with improved organizational outcomes. (*Strategic Goals: Youth and Seniors, Public Safety, Effective and Culturally Responsive Government, Infrastructure and Environmental Sustainability*)
4. Identify new collaborations with school districts to increase access to facilities through Joint Use Agreements and student support systems like on-site after school programs. (*Strategic Goal: Youth and Seniors*)
5. Continue to increase city-wide volunteer efforts to beautify and uplift AMOR Salinas Principals. (*Strategic Goal: Youth and Seniors*)
6. Continue to provide popular hybrid recreation and library programs, including take-home kits and virtual program options, while fully re-establishing in-person programs. (*Strategic Goal: Youth and Seniors*)
7. Implement the Community Alliance for Safety and Peace Strategic Plan on Violence Reduction for 2022-2025 and present to the City Council. (*Strategic Goal: Public Safety*)
8. Assess and prioritize maintenance of Department facilities to ensure a safe and welcoming environment that meets the needs of the community. (*Strategic Goals: Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors*)
9. Continue to support prevention and intervention programs and services for at-risk youth and member of other vulnerable populations through grant writing and grant fund management. (*Strategic Goals: Public Safety, Youth and Seniors, Effective and Culturally Responsive Government*)

LIBRARY AND COMMUNITY SERVICES DEPARTMENT

Summary

10. Utilize Crime Prevention Through Environmental Design (CPTED) principles to improve safety in parks and around facilities. *(Strategic Goals: Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors)*
11. Develop a Park Maintenance Standard Manual that will identify standards of work to support a higher standard for upkeep and maintenance of the park system. *(Strategic Goals: Infrastructure and Environmental Sustainability, Effective and Culturally Responsive Government)*
12. Continue to support the Public Arts Commission, implementation of the Public Arts Ordinance and coordination of variety of stakeholders and funders to implement the Public Art Master Plan. *(Strategic Goals: Economic Development, Effective and Culturally Responsive Government)*
13. Leverage existing programs and efforts to develop a mural program to combat graffiti. *(Strategic Goal: Economic Development)*
14. Establish a Race Equity Plan. *(Strategic Goals: Effective and Culturally Responsive Government)*
15. Provide Diversity, Equity and Inclusion (DEI) training for policy-makers and staff. *(Strategic Goal: Effective and Culturally Responsive Government)*
16. Continue to manage the Hebbbron Family Center Revitalization Project. *(Strategic Goals: Economic Development, Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors)*
17. Continue to manage the Closter Park Renovation Project. *(Strategic Goals: Economic Development, Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors)*
18. Continue to manage the El Gabilan Tot-Lot Improvement Project. *(Strategic Goals: Economic Development, Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors)*
19. Develop a Cesar Chavez Park master Plan and continue to manage the improvements and expansion of the trail system at Cesar Chavez Park. *(Strategic Goals: Economic Development, Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors)*
20. Implement recommendations out of the Park System Irrigation Assessment. *(Strategic Goals: Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors)*
21. Continue to assess and upgrade playground structures, benches, and grills. *(Strategic Goals: Infrastructure and Environmental Sustainability, Public Safety, Youth and Seniors)*
22. Review the library structure and finalize recommendations for a re-organization to identify a clear structure that improves service delivery. *(Strategic Goal: Effective and Culturally Responsive Government)*
23. Seek and implement new technologies and digital resources to increase the efficiency, convenience, and level of service to the community. *(Strategic Goal: Effective and Culturally Responsive Government)*
24. Identify funding sources or alternative means to continue the hotspot lending program and expand the Library's device lending program to reduce digital divide in the community. *(Strategic Goal: Effective and Culturally Responsive Government)*
25. Continue to provide Adult and Family Literacy services, including English language and basic computer literacy, citizenship exam, and high school equivalency preparation classes. *(Strategic Goal: Youth and Seniors)*
26. Identify funding sources or alternative means to continue providing Read Grow Play playgroup programs. *(Strategic Goals: Youth and Seniors, Effective and Culturally Responsive Government)*

LIBRARY AND COMMUNITY SERVICES DEPARTMENT

Summary

27. Continue to work with various school districts in Salinas to provide Kindermobile service for Salinas' kindergarteners and continue to provide seasonal reading challenges for Salinas youth to encourage love of reading. (*Strategic Goal: Youth and Seniors*)
28. Continue to offer and expand the SMART card program for all school districts in Salinas. (*Strategic Goal: Youth and Seniors*)
29. Fully launch makerspace for public access at El Gabilan Library and improve technology access at all libraries. (*Strategic Goal: Effective and Culturally Responsive Government*)
30. Evaluate and expand the library's digital collection and resources to increase relevancy and diversity of offerings. (*Strategic Goal: Effective and Culturally Responsive Government*)
31. Expand library programs and partnerships for adults and young adults in health and wellness, financial literacy, local history and genealogy, and workforce and business development. (*Strategic Goals: Youth and Seniors, Economic Development*)
32. Identify opportunities to improve library staff training, engagement, and wellness to better retain and grow talents locally. (*Strategic Goal: Effective and Culturally Responsive Government*)
33. Identify funding resources and implement building improvement efforts for John Steinbeck and Cesar Chavez Library. (*Strategic Goal: Effective and Culturally Responsive Government*)
34. Update the special event permit process to improve efficiencies, mitigate risk and create a positive customer service experience for the event organizer. (*Strategic Goals: Effective and Culturally Responsive Government, Economic Development*)

RECREATION AND COMMUNITY SERVICES

5238 Parks and Community Services Division

Purpose

Provide quality maintenance service to preserve safety, aesthetics, health, and utility for Salinas' inventory of parks, open spaces, planters, and facility landscapes. The City's parks encompass over 380 acres in 45 sites.

Division Operations

1. Provide services focused on health and safety to City parks.
2. Maintain public landscapes at a level commensurate with available funding.
3. Ensure playgrounds and other park amenities are safe and available for use by the public.
4. Provide support to community-based organizations, neighborhoods, and volunteer groups through a series of volunteer efforts to beautify and maintain City parks.

Performance Measures

RECREATION AND COMMUNITY SERVICES

6232 Neighborhood Services Division

Purpose

Encourage and support volunteerism and neighborhood engagement activities, coordinate the implementation of solutions to neighborhood issues, and assist with the work of the violence prevention collaborative.

Division Operations

1. Support community engagement efforts by providing council district meetings, budget information meetings, town hall meetings and connect residents to City resources.
2. Coordinate a city-wide volunteer services program in collaboration with city departments and community-based organizations by providing a structure for recruiting and training volunteers, recognizing their work and compiling statistics and reports regarding the contributions of volunteers.
3. Support neighborhood efforts by assisting with clean-ups, block parties, and with information on community resources and beautification.
4. Administer the City's Neighborhood Beautification Grant program.
5. Plan and implement the Youth and Government Institute (YAGI).
6. Provide excellent customer service.
7. Collaborate with the Salinas Police Department to build Neighborhood Watch capacity throughout Salinas.

LIBRARY

6005 Library Administration Division

Purpose

Provide leadership, management and organization of the John Steinbeck, Cesar Chavez and El Gabilan libraries as well as the Divisions mobile services and community programs. Focus on organizational effectiveness through scheduling of staff, programs, grants and projects. Manage resources effectively and efficiently to optimize services to the public on reading, education for all ages, youth mentoring and leadership programs. Establish partnerships and opportunities in the community and region in order to build capacity and support.

Division Operations

1. Increase usage of services, programs and collections through the use of effective marketing and community engagement methods and processes.
2. Provide leadership and direction through the implementation of strategic planning tools and methods.
3. Work effectively and strategically with City Manager, City departments, the Library and Community Services Commission, Friends of the Salinas Public Library, professional networks, and community groups.
4. Recruit and develop staff with the capacity to communicate and collaborate with populations from diverse cultural and linguistic backgrounds, who are technological savvy and who deliver excellent customer services. Re-align staff duties as needed to maximize effectiveness.
5. Seek out and manage grants for community programs, education and youth development.
6. Increase funding support and advocacy for the Library System.
7. Practice excellent customer service.
8. Provide effective budget, project and program management.

LIBRARY

6009 Technical Services Division

Purpose

To connect people to information and community resources by providing access to innovative technologies, tools and community spaces.

Division Operations

1. Support new programs for youth that effectively incorporate technology to increase knowledge of and proficiency in the STEAM disciplines.
2. Advise staff on most relevant technology applications that support Library work and customer needs.
3. Maintain and update hardware and software in public computing spaces for efficient operations and to allow for intuitive and easy use by library customers.
4. Utilize social media platforms for communications with the public to increase awareness of services, programs and collections.
5. Implement self-service technology to increase the efficiency of operations and to allow staff to provide a higher level of engagement and service to library customers.
6. Maintain a library digital presence that functions as the Library's "virtual branch," providing collections and learning services that can be easily accessed by library customers from outside the library.
7. Select, acquire and process materials in a variety of formats for new and existing library collections.
8. Maintain and update Koha, the integrated library system catalog to allow library staff and customers convenient access to library materials.
9. Expand e-book and other e-resources in order to increase equity of access to library services.
10. Analyze collection usage and expenditures to ensure investment in the library's collection is performed in an effective manner.

Performance Measures

LIBRARY

6011 Steinbeck Library Division

Purpose

Provide enriching cultural, educational and literary experiences, opportunities for self-directed education and assistance with research and information-finding in a safe and accessible location in downtown Salinas.

Division Operations

1. Maintain an up-to-date and relevant collection of materials that responds to the needs of the community.
2. Provide a variety of classes, workshops and seminars for all ages that inform, educate and entertain.
3. Serve the surrounding business community by promoting small business development and workforce readiness.
4. Provide access to public computing, printing and a wireless access network.
5. Meet the needs of Salinas' families by educating parents on early literacy skills and ways to support their child's education.
6. Continue to build a collection of local history that tells the story of Salinas.
7. Provide Digital Arts programming that builds the creative potential of children and adults.
8. Collaborate with school districts to provide services to students at library sites.
9. Identify and support new exhibits in the public area.
10. Provide excellent customer service.

Performance Measures

LIBRARY

6015 Community Education Division

Purpose

Provide an array of educational opportunities and enriching experiences that meet the needs of the Salinas community, focusing especially on programming that builds early literacy skills, ensures that students have the resources to succeed in school and improves workforce readiness and outcomes for adults.

Division Operations

1. Provide opportunities for parents to understand and practice the skills that build literacy in young children.
2. Provide classes and experiences that focus on the enjoyment of reading and writing
3. Offer experiences for youth that improve their knowledge of and proficiency in the STEAM disciplines.
4. Provide classes and services to adults seeking employment by building technology skills as well as soft skills.
5. Enlarge GED and ESL programs through the use of technology, partnerships with other education providers and recruitment of volunteers to expand capacity.
6. Provide cultural programs and experiences that celebrate the diversity and history of Salinas.
7. Seek new grant funding and monitor and report on existing grants.
8. Maintain partnerships with schools to ensure that programming for students is relevant to curriculum goals.
9. Explore and expand partnerships with other education providers, nonprofit organizations and cultural institutions to increase the quality and quantity of programs offered.
10. Continually evaluate the effectiveness of programming and implement methods of improvement.
11. Provide excellent customer service.

NON-DEPARTMENTAL

Organizational Chart by Division

NON-DEPARTMENTAL Summary

Purpose

The Non-Departmental budget supports community programs; the City's repayment of outstanding bond issues; the cost of elections; the cost of operating the 65 West Alisal Street facility; and various operating costs that are not directly charged to a specific departmental operating budget.

Top Accomplishments for FY 2022-23

Effective and Culturally Responsive Government

1. Successfully made all debt service payments during the year.
2. Tracked all severance and retirement incentives.

City Council Goals, Strategies, and Objectives for FY 2023-24

Effective and Culturally Responsive Government

1. Continue to make timely debt service payments.
2. Track severance and retirement incentives.
3. Continue to track all non-departmental activity.

Major Budget Changes

None.

NON-DEPARTMENTAL

8010 Intermodal Transportation Center Division

Purpose

The Intermodal Transportation Center (“ITC”) was owned and operated by the former redevelopment agency. The City retained the property in 2012, and the operational expenses have been born by the general fund parking lease revenue. The City has a plan to maintain the ITC as a cost center, using the lease revenues to off-set the cost of operations.

Lease payments will be received from Greyhound and Amtrak. The City also leases the parking lot to the County for juror parking, in exchange for security services.

Division Operations

1. Provide centralized site for Intermodal Transportation in the City.

Major Budget Changes

None.

POLICE DEPARTMENT

Summary

Purpose

The Police Department provides public safety and law enforcement services 24-hours a day to everyone within the city limits of Salinas. Our goal is to help build and maintain a safe, peaceful, and prosperous community. Our strategies include participating in various collaborative programs including, the administration of Federal and State grants, the Police Activities League program, Operation Ceasefire, community outreach programs, violence suppression, crime prevention, traffic enforcement, and appropriate response to community crime and violence issues.

City Council Goals, Strategies, and Objectives for FY 2023-24

1. Continue to secure new grants and supplemental funding to support police operations and expand services to the community. *(Strategic Goal: Public Safety & Effective and Culturally Responsive Government)*
2. As recommended in the workload analysis, implement new patrol beat boundaries to greater balance workload. *(Strategic Goal: Public Safety)*
3. Effective utilization of resources and staffing to efficiently provide services to the community. *(Strategic Goal: Public Safety & Effective and Culturally Responsive Government)*
4. Maintain staffing to address quality of life issues such as abandoned vehicles and community engagement. *(Strategic Goal: Public Safety & Effective and Culturally Responsive Government)*
5. Work collaboratively with Code Enforcement and the City Attorney's Office to address quality of life issues. *(Strategic Goal: Public Safety)*
6. Increase community engagement throughout all levels of the department. *(Strategic Goal: Public Safety & Effective and Culturally Responsive Government)*
7. Continue to work on evaluating and implementing the remaining Department of Justice's Collaborative Reform Initiative recommendations, as appropriate. *(Strategic Goal: Public Safety & Effective and Culturally Responsive Government)*
8. Continued to implement and expand the community policing concept to maintain and increase communication and transparency with the community. *(Strategic Goal: Public Safety)*

Major Budget Changes

Multiple positions remain frozen and/or vacant and Sworn staffing at the lowest levels seen in years. The Department continues to focus on effective utilization of technology, resources and staffing to ensure services to the community are maintained.

POLICE DEPARTMENT

4110 Police Administration

Purpose

Police Administration provides direction, coordination, and support for all Police Department Divisions to reach identified objectives. This effort includes matching community needs with available Department resources.

Division Operations

1. Provide information and referrals as requested by internal and external customers to ensure adequate communication and furtherance of the community-oriented policing philosophy. These efforts support building a safe and peaceful community.
2. Manage administrative and finance functions of the Department, including State and Federal Grants.

POLICE DEPARTMENT

4112 Personnel & Training

Purpose

Ensure the best qualified individuals are recruited and selected for all positions, both sworn and civilian, in the Department. Provide continuing training to employees consistent with service to the community, individual professional growth, and POST guidelines/requirements.

Division Operations

1. Work in partnership with the Commission on Peace Officer Standards and Training (POST) and the South Bay Regional Public Safety Training Consortium to enhance the quality of the Advanced Officer Training program while minimizing costs.
2. Continue to develop innovative, relevant quarterly firearms qualification courses for Department personnel.
3. Continue and enhance recruitment efforts to achieve and maintain full staffing with an emphasis on recruiting from the local population.
4. Emphasize Community Oriented Policing concepts in all aspects of recruitment, hiring and training.
5. Provide specialized assistance with the Public Information Office.

POLICE DEPARTMENT

4116 Special Operations

Purpose

To work with Salinas residents to address neighborhood crime issues, promote community safety programs to reduce crime, and to increase community engagement. Coordinate all special events in the City, working closely with other City Departments and outside agencies to ensure public safety needs are met. Coordinate deployment of supplemental police personnel for private entities and events as requested. Enforce City and State codes regarding parking laws for the orderly control of public parking areas. Identify and remove abandoned vehicles to enhance neighborhood livability. Enforce City code and other laws relative to long term parking violations and other nuisance complaints.

Division Operations

1. Make recommendations and appropriately staff public events to ensure public order and safety needs, as well as traffic issues are mitigated.
2. Work closely with City Departments on the Special Event Committee to provide excellent communication and customer service to those planning special events.
3. Review and approve, with appropriate recommendations, one-day alcohol licenses and staff supplemental police deployments as requested and approved.
4. Review, evaluate and comment on Conditional Use Permits and Modification Permits for City of Salinas Engineering Department.
5. Remove abandoned vehicles in public areas when appropriate.
6. Provide education to the public and respond to complaints regarding abandoned vehicles, commercial or recreational vehicle parking and long-term parking complaints.
7. Present crime prevention programs through Neighborhood Watch and public presentations/community events.
8. Through the PAL and Explorer program, support, coordinate, and facilitate youth activities and programs.
9. Strengthen communication with Salinas's residents through a variety of traditional and non-traditional public outreach initiatives, including conducting community academies.
10. Continue the COPS philosophy within the organization and community through programs such as the Police Activities League, Police Explorers, and other programs providing linkages between the Department and community.
11. Continue to support the Police Community Advisory Committee in their efforts to build a safe and peaceful community.
12. VIPS Program Management, administration of police volunteers
13. Review first level citation appeals issued by Salinas Police Department staff and adjudicate as necessary.

4134 Records

Purpose

Maintain a current and efficient information storage/retrieval system of arrest and incident reports to provide accurate Public Records Act services to the public and other governmental agencies. Provide information to the Investigation Division and Field Operations to accomplish their law enforcement missions.

Division Operations

1. Provide twenty-four-hour immediate response to field officer requests.
2. Prepare court prosecution packets daily.
3. Enter critical information related to missing persons, warrants, stolen vehicles, property, firearms, stolen license plates and criminal protective orders into related databases.
4. Provide excellent customer service to the public, Department personnel, and other agencies.
5. Maintain an efficient information storage/retrieval system by processing police reports and scanning them, and other information, daily onto an optical storage system.
6. Receive and process records subpoenas as received
7. Purge selected police records on an on-going basis.
8. Continually improve and streamline the efficiency and effectiveness of the Records Unit.

POLICE DEPARTMENT

4170 Animal Control Services

Purpose

Provide effective animal control, licensing, lost/found and adoption programs for all stray and unwanted animals within the city. Since 2018 services have been provided in partnership with the County of Monterey. Effective July 1, 2023, the City of Salinas and County of Monterey will receive services via the Hitchcock Road Animal Services Agency which was created as the result of a Joint Exercise of Powers Agreement, with the County of Monterey serving as the lead agency.

Division Operations

1. Effective July 1, 2023, services will be provided via the Hitchcock Road Animal Services Agency, a JPA entity. The County of Monterey is the lead agency and the City of Salinas will no longer oversee the operations of Animal Services. Hitchcock Road Animal Services Agency will be governed by the Hitchcock Road Animal Services Agency Board of which the City is a member.

4221 Traffic

Purpose

Enforce state and city traffic laws and codes to improve highway/roadway safety and to promote compliance through the use of specialized training and enforcement. Investigate traffic accidents for causative factors; relieve patrol personnel for other public safety duties; provide accident analyses to determine means for reducing accident rates.

Division Operations

1. Maintain specialized traffic enforcement in areas of school zones, increasing safety potential for children
2. Reduce the number of injury accidents through an aggressive enforcement program.
3. Provide expertise in the investigation of injury and fatal traffic collisions.
4. Increase public awareness related to traffic safety through demonstrations, public education, and community involvement.
5. Increase school children pedestrian safety through education and parent involvement.
6. Regulate and monitor tow services utilized by the Department.
7. Assist Public Works in identifying traffic and pedestrian safety issues.
8. Provide specialized assistance with the Red-Light Camera Project.

4340 Investigations

Purpose

Conduct investigations in order to identify and apprehend suspects for prosecution purposes. This includes the identification of crime trends through crime analysis for proactive and focused investigation attention. In addition to providing investigative personnel for criminal investigations, the Investigation Division will work closely with the Field Operations and Administration Division to promote strategies which build a safe and peaceful community.

Division Operations

1. Aggressively investigate criminal activity.
2. Maintain the Investigation Division efforts to proactively target criminals that commit gang-related, violent and property crimes, such as murder, assault with a deadly weapon, robbery, burglary, and other thefts.
3. Maintain efforts related to cold case investigations, including utilization of alternate methods of evidence analysis such as retesting evidence for DNA analysis.
4. Continue to provide a timely on-call response on a 24-hour basis for major criminal investigations or other crimes that require in-depth investigative support.
5. Increase efforts to provide informal and formal training to investigators.
6. Continue to assign personnel to monitor and arrest sex registrants who have been found to violate any provisions of Section 290 of the Penal Code in the City of Salinas.
7. Continue to work closely with other agencies to develop and promote collaborative, positive relationships.

POLICE DEPARTMENT

4343 Violence Suppression Task Force

Purpose

Collect information on gangs gang members, drug traffickers, and investigate gang/drug-related crimes. Provide gang/drug-related training and other criminal intelligence to law enforcement and members of the community. Identify and suppress gang/drug criminal activity. Conduct short- and long-term gang/drug focused investigations.

Division Operations

1. Continue to expand and improve a comprehensive criminal gang and gang member certification process under the California Penal Code.
2. Continue to aggressively identify violent gang members, drug traffickers and other violent criminals for the arrest and prosecution of a variety of crimes.
3. Continue to work with the Monterey County District Attorney's Office and other allied agencies (local, state, and federal) to ensure vertical prosecution of gang members and drug traffickers for their crimes.
4. Improve our efforts to work closely with parents or other community members for the purpose of providing them with gang/drug intervention.
5. Conduct short- and long-term, complex investigations of criminal gang groups utilizing all available local, state, and federal resources.
6. Coordinate with community partners to provide intervention services for gang members, potential gang members, and drug abusers.

POLICE DEPARTMENT

4380 Asset Seizure

Purpose

Provides for the identification of assets (visible and hidden) held by local criminal enterprises. Asset seizure provides for lawful forfeiture, utilizing State and Federal Asset Seizure programs to enhance local enforcement efforts.

Division Operations

1. Continue to identify and seize assets used to facilitate illegal drug transactions.
2. Identify and seize assets deemed "proceeds" from illegal drug transactions.
3. Enhance our efforts to detect and suppress criminal enterprises utilizing civil law in conjunction with criminal law.
4. Use assets to supplement local law enforcement's efforts toward illegal drug related enforcement.

PUBLIC WORKS DEPARTMENT

Organizational Chart by Division

PUBLIC WORKS DEPARTMENT

Organizational Chart by Position

PUBLIC WORKS DEPARTMENT

Summary

Purpose

The Public Works Department consists of the Engineering; Engineering Administration; Development Engineering; Traffic/Transportation; Water, Waste and Energy; Geographical Information Systems; Environmental and Maintenance Services Divisions and the Airport.

The Engineering and Traffic/Transportation Divisions provide management of the City's public infrastructure; plan and implement public capital improvements; examine private development plans and proposals with associated CEQA documents to ensure responsible growth as it relates to traffic issues and public infrastructure; administer programs and enforce governmental regulations.

The GIS Division provides data analysis planning support and develops asset management apps for all City departments.

The Engineering Administration Division manages the City's Labor Compliance Program the federal and state grants, and the annual assessments associated with Landscape Maintenance Districts.

Water, Waste and Energy oversees the City's Solid Waste and Recycling and provides engineering support for Industrial Waste, Sanitary Sewer and Stormwater infrastructure. WWE is also responsible for Greenhouse Gas Emissions, Urban Forestry and Greening, Neighborhood Vibrancy, Solar Energy and Efficiency and special projects with a strong environmental component while protecting the City's interests on a regional level. The Environmental and Maintenance Services Division protects the health of Salinas by providing maintenance services for all City infrastructure, vehicles, and equipment, and ensures NPDES compliance in the field.

Top Accomplishments for FY 2022-23

Investment Strategies/Risk Management

1. Downtown Vibrancy Plan Implementation
 - a. Complete construction of Main Street for 100, 200 and 300 block.
 - b. Complete construction of Downtown Complete streets, on West Alisal from Front Street to Blanco Road.
2. Support development of Salinas Travel Center project, Airport Lease Project, Unikool (John Street) Project, Sywest Project, and the Sobel Project.
3. Complete the Mitigated Negative Declaration for Boronda Road Congestion Relief Project (future growth area).
4. Complete 75% design for Boronda Road and McKinnon roundabout.
5. Submit 90% plans of Williams Road to PG&E for the kickoff of the Utility Undergrounding design project.
6. Technical Support for the West Area and Central Area Specific Plans approval process.
7. Provide engineering and street maintenance support for various City special events.
8. Completed 90% Design for the Williams Road Improvements.
9. Continuing work to develop sustainable parking enterprises which help support the city's economic sectors.
10. Project closeout for the Sanborn/Elvee/HWY 101.
11. Completed the fiberoptic backbone for the Downtown Fiber Optic Network plan.
12. Complete Installation of new metal roof at Fire Station no. 1.
13. Support regional plan to extend commuter rail service to Salinas that will provide access to jobs in the Bay Area and Silicon Valley.

PUBLIC WORKS DEPARTMENT

Summary

14. Development complete streets, multi-modal corridors, and a sustainable transportation to support responsible future growth area and mitigate vehicle miles travelled (VMT).
15. Supported the Airport Lease Project MND and began coordination with Caltrans as part of mitigation program to improve Airport Blvd/US 101 Ramps.
16. Support the Salinas Ag Industrial Center Development Project and continue coordinating with Caltrans and TAMC to improve US 101 access in South Salinas.
17. Completed plans and awarded a bid for the Pedestrian Crossing Enhancements Project.
18. Completed new Franchise Agreement for Solid Waste Services after over a year of negotiations.
19. Completed new agreement with Salinas Valley Solid Waste Authority which requires the relocation of the Sun Street Transfer Station outside the City.
20. Completed Agreement with California Water Board to accept \$8.8M in grant funds for the Industrial Wastewater Treatment Facility.
21. Continued planning and development of the Salinas Municipal Airport Master Plan and Airport Sustainability Plan.

Public Safety

1. Continuing work with Monterey County Health Department, TAMC, and Blue Zones to develop Traffic Safety education programs.
2. Continued homeless encampment cleanups.
3. Begin construction of East Laurel Drive Pedestrian Improvements and Street Lighting.
4. Completed construction of Old Muni Pool phase 1, 2 and 3.
5. Begin construction of the Bardin Road Safe Routes to School Improvements.
6. Completed construction of the Alvin Drive Safe Routes to School Project.
7. Completed construction of three new traffic signals (Alvin Drive/Linwood and the Alvin Drive/El Dorado Intersections; and at North Main/Street/Navajo Drive in support of the El Gabilan Library Extension.
8. Completed Council approved Traffic Calming Projects at Geil Street.
9. Completed sidewalk repairs at District 3, District 4 and District 2 in the amount of \$900K through the Job Order Contract (JOC) Sidewalk Improvement Program.
10. Continued developing the Salinas Safe Routes to School Plan with Ecology Action and TAMC.
11. Completed new sidewalks and eliminated the “missing” pedestrian link on Maryal Drive serving Sherwood Park, Tatum’s Garden, the Rodeo Grounds and Boys and Girls Club.
12. Commenced design for a new vehicle and pedestrian access control system at the Salinas Municipal Airport.

Operational Efficiencies

1. Developing Sustainable Citywide Parking Management Program
 - a. Continued to manage the Parking Enterprise Programs
 - b. Demonstrated successful implementation of Parking Enforcement Enterprise; improving services while continuing to cover costs at the same time supporting the City’s economic and safety objectives. Expanded parking enforcement services to weekends and early evenings.
 - c. Indexed the rates in the Downtown Parking District to reduce dependence of the enterprise on the City General Fund.
 - d. Transitioned to a new parking citation management vendor
 - e. Prepared a facility condition assessment report for both Downtown garages to identify deferred maintenance and probable costs to repair

PUBLIC WORKS DEPARTMENT

Summary

2. Utilized Geographic Information Systems (GIS) for spatial analysis. Spatial analysis lets staff evaluate suitability and capability, estimate, predict, interpret, and understand data. This capability is delivered to all City Departments to provide new perspectives to data driven decision-making.
3. Implemented innovative and emerging technology solutions to increase efficiency and effectiveness of City services.
4. Plan of EV stations transformer for the ITC center.
5. Embarked upon the development of a Community-Based Public/Private Partnership (P3) process to potentially fund green infrastructure projects throughout the City.
6. Developing Proposition 26 fees to fund the costs of NPDES inspection and plan review activities.
7. Continuing Implementation of the City Traffic Fee Ordinance.
8. Completed draft final plans for the Sherwood/Front St Adaptive Traffic Signal System Project.
9. Implemented measures to more closely track revenue and manage the City's Franchise Agreement for Solid Waste Services.

Excellent Infrastructure

1. Completed Mitigated Negative Declaration for Boronda Road Improvements which provides increased capacity to four lanes and 5 new roundabouts at key intersections.
2. Begin construction of 2021 Chip Seal project City Wide.
3. Complete 80% design of San Juan Grade Road rehabilitation.
4. Continuing Development of City's Active Transportation Plan.
5. Continue identifying funding for improvements for implementation of the East Alisal Corridor Plan.
6. Secured grant funding to stretch transportation dollars.
7. Hired consultant to update City Standard Plans and Specifications.
8. Updated Pavement Management System for future road maintenance.
9. Applied for HSIP Grants to fund a part of Williams Road Improvements.
10. Refreshed over 17,000 linear feet of crosswalks.
11. Complete Design of 2021 Slurry Seal Project City Wide.
12. Complete Design of Montebella Subdivision Slurry Seal project.
11. Complete Construction of East Alvin Drive Safe Routes to School Project.
12. Complete construction for North Main/Navajo traffic signal project.
13. Complete Construction of Downtown Complete Street Project.
14. Awarded the bid for the traffic signal at Alisal Street and Murphy Street.
15. Adopted the Vision Zero Plan to reduce severe injuries and fatalities on city streets.
16. Completed sludge removal project at the Industrial Wastewater Treatment Facility.
17. Design pavement rehabilitation for the southside hangars at the Salinas Municipal Airport.

Investment Strategies/Risk Management

1. Traffic Calming Improvements at Geil Street neighborhood.
2. Complete design of restroom remodel at Natividad Creek Park.
3. Complete design of tennis court improvements at Central Park.
4. Begin construction of Tennis courts improvements at Claremont Park.

City Council Goals, Strategies, and Objectives for FY 2023-24

Investment Strategies / Risk Management

1. Develop and implement downtown parking strategy.

PUBLIC WORKS DEPARTMENT

Summary

2. Work with PG&E to design and build the Williams Road Utility Underground District.
3. Support Extension of Caltrain Rail Service to Salinas to help mitigate vehicle miles travelled and support future growth.
4. Pursue control of East Market Street corridor (State Route) to support downtown revitalization.
5. Implementing ADA Transition Plan and Street Sign Management Plan.
6. Continue to develop the City's reforestation program.
7. Complete construction on Bardin Road Safe Routes to School Project to improve safe travel to school.
8. Complete Design for East Salinas Area Street Light installation.
9. Complete Sanitary Sewer priority CCTV survey.
10. Complete Design and begin construction for priority Sanitary Sewer Pipe and Manhole Repairs.
11. Complete construction of East Laurel Drive Pedestrian Improvement Project.
12. Spend \$6.3 M is street maintenance and rehabilitation City Wide.
13. Complete construction of Traffic Signal at Alisal and Murphy Street.
14. Complete West Wing Tenant Improvements for the Fire Department at City Hall.
15. Complete \$600,000 of Sidewalk improvements in Districts 3, 5 and 6.
16. Adopt the ADA transition plan. Complete Boronda Road Congestion Relief project to stimulate development in City future growth areas.
17. Support the General Plan Update EIR, CAP and Circulation Element.
18. Begin construction on the Constitution and Las Casitas Traffic Signal.
19. Begin construction on the Pedestrian Crossing Enhancements Project
20. Complete design on the Sherwood/Front St Adaptive Traffic Control System.
21. Alisal Vibrancy Plan – Develop and adopt East Alisal Street Master Plan.
22. Begin Bus Rapid Transit and Transit Oriented Design Corridor Study with MST.
23. Issue RFP and begin design and construction of new solar PV system for the Public Safety Center.
24. Complete long term source water agreement with Monterey One Water and the Monterey County Water Resources Agency.
25. Complete Airport Master Plan and Airport Sustainability Plan.

New Revenue

1. Traffic Improvement Program and Fee Update.
2. Secure funding to complete the City's Active Transportation Plan (and Multi-modal Plan).
3. Continue work on developing a Sustainable Citywide Parking Management Program.
4. Initiate a Prop 218 process in order to attain sustainable maintenance service levels in the Harden Ranch Maintenance District and North East Area Maintenance District.
5. Pursue HSIP and other grant funds to support road safety improvements.
6. Secure Federal and State grants for Airport Pavement Rehabilitation (Design and Construction) for the southside hangars.

Operational Efficiencies

1. Develop and implement downtown parking strategy.
2. Implement recommendations from the City-wide GIS Needs Assessment, Maintain the Open Data Portal, and develop a Performance Management Portal.
3. Utilize Geographic Information Systems (GIS) for spatial analysis. Spatial analysis lets staff evaluate suitability and capability, estimate, predict, interpret, and understand data. This capability is delivered to all City Departments to provide new perspectives to data driven decision-making.

PUBLIC WORKS DEPARTMENT

Summary

4. Continue to Implement innovative and emerging technology solutions to increase efficiency and effectiveness of City services.
5. Use of Salinas Connect as a tool for better response to public inquires and prioritization of maintenance work.
6. Recommend efficiencies to be born in the delivery of maintenance and repairs following the recommendation of an organizational study.

Public Safety

1. Begin Construction on Boronda/McKinnon roundabout.
2. Complete construction of the Chip Seal project for arterial and collector streets; and Slurry seal for the residential streets.
3. Embark on the most extensive Street repair effort in the City's history with more than \$35 million bonded and budgeted.
4. Implement short term goals on the East Alisal Corridor Plan.
5. Complete and adopt the City Vision Zero Action Plan.
6. Develop the City Complete Streets Policy with Blue Zones Initiative.
7. Continue Development of City Safe Routes to School Plan.
8. Begin construction of San Juan Grade Road and Work Street rehabilitation.
9. Complete construction of Natividad Creek Restroom.
10. Installation of Hebborn Heights and Closter Park Playground equipment.
11. Support smart growth vision for Future Growth Areas infrastructure.
12. Support Blue Zone Policies.
13. Fund and Complete City's Active Transportation Plan and Multi-modal Plan
14. Implement reduced speed limits in school zones.
15. Certify E&TS for valid speed limits for all City Streets.
16. Update signal timing plans for improved safety and operations.
17. Adopt the City-wide Safe Routes to School Plan.
18. Continue coordination with the South of Salinas Interchange Project and frontage road system connecting to south Salinas.
19. Continue to support Salinas PD traffic enforcement efforts.
20. Support Fire Department emergency response through signal pre-emption and computer aided dispatch.
21. Install new airport access control system.

Major Budget Changes

Associate Engineer Position and Engineering Aide in Traffic and Transportation. There is an unmet demand for residential parking programs and a sustainable downtown parking district which has grown into a FTE parking programs manager position, currently provided in limited capacity by the Traffic and Transportation Division.

Pavement Management Program and keeping up with essential traffic control pavement markings.

Associate Engineer in Water Waste and Energy Division dedicated to grant and expansion efforts for Industrial Wastewater Treatment Facility.

Design, permitting, and investigation costs associated with expansion of Industrial Wastewater Treatment Facility.

ENGINEERING AND TRANSPORTATION

Organizational Chart by Division

ENGINEERING AND TRANSPORTATION

5110 Engineering Administration Division

Purpose

Provide administrative support to the Department of Public Works, supervise and control the Department's operating and project budgets, implement and manage the Capital Improvements Program, administrative oversight of all Landscape Maintenance Assessment Districts , administrative oversight of all Public Works Grants, acquire property as needed for projects, administer programs dealing with energy efficiency, environmental, Labor Compliance Program monitoring and enforcement on Public Works projects, and respond to resident complaints and inquiries.

Division Operations

1. Supervise and manage Department services and resources in an efficient manner.
2. Represent the City in developing major development proposals (Vibrancy plans, Carr Lake).
3. Administer the department's budget within approved authorized amounts.
4. Provide administrative and technical support to the department in the performance of its duties.
5. Maintain records pertaining to City facilities such as deeds, easements abandonments, right-of-ways and the preservation of City owned historical buildings.
6. Manage the annual assessments of the Landscape and Maintenance Districts.
7. Manage all departmental grant application and reporting.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal

ENGINEERING AND TRANSPORTATION

5115 Development Engineering Division

Purpose

Perform plan review and inspections to verify that site work, grading and drainage and stormwater mitigation facilities are built in compliance with applicable codes and laws, including, but not limited to city municipal code, city standards and FEMA; rendering them safe upon completion of construction. This includes coordination with the City Engineer and other City Departments/Divisions and governmental agencies. Verify that public improvements, part of private development, are constructed in compliance with City standards and are safe to use upon completion of construction. Issue encroachment permits and vendor permits for activities in the public right of way. Coordinate with applicants, other city department and agencies to assign site addressing. Provide development-related implementation and enforcement of NPDES stormwater permit requirements.

Division Operations

1. Review of planning site development applications and building permit applications for development related engineering and Public Works requirements.
2. Plan review and inspection of private development projects for compliance with NPDES stormwater permit.
3. Plan review and inspection of private development projects for compliance with FEMA requirements.
4. Review and inspection of private improvements within the City right of way.
5. Provide technical support to planning applications in accordance with the Subdivision Map Act.
6. Calculate development impact fees for development applicants.
7. Coordinate City Street Vendor Program.
8. Provide assistance to City Engineer in implementing floodplain management and CRS program compliance.
9. Manage city addressing of public and private buildings, sidewalk schedule and street naming.

ENGINEERING AND TRANSPORTATION

5120 Engineering Services Division

Purpose

To implement the City's Capital Improvement Projects, to provide engineering services for other city departments and the public, and to ensure the compliance of engineering standards necessary for the protection of public health and safety.

Division Operations

1. Expedient design and construction of programmed Capital Improvement Projects (CIPs), within budget.
 - Traffic signals, Striping and Signing
 - Pavement Treatment/Rehabilitation/Reconstruction
 - Storm Water and Sanitary Sewer Rehabilitation/new construction
 - Sidewalk, Curb/gutter, Driveway, Tree Removal, and replanting trees
 - Manage and Coordinate City owned Building Project Remodels/Maintenance
 - Culvert and Detention Basin Rehabilitation and silt removal
 - Inspect new Development projects
2. Assess new infrastructure needs associated with city growth and plan to meet these needs with project planning and revision of the Development Impact Fee.
3. Complete the ADA transition plan; Continue upgrades to city infrastructure to meet the requirements of the Americans with Disabilities Act (ADA).
4. Plan for and develop a funding plan for the Bridge Maintenance Program.
5. Update the current City of Salinas Standard Plans and Specifications.
6. Update the Pavement Management System and prioritize streets for road maintenance.
7. Provide Customer Support through the Engineer of the Month and Q-Alert. Create Partnerships with other agencies to assist with funding CIP projects and programs.
8. Support City Engineer/ADA Coordinator on ADA transition plan and grievance and policy coordination.

Performance Measures

ENGINEERING AND TRANSPORTATION

5122 Development, Traffic & Transportation Division

Purpose

Oversee and manage the City's transportation system. Support development plans and transportation projects to ensure responsible well-planned growth within the City; Oversee the City's Transportation Impact Fee Program; prepare regular and significant program updates as required by the General Plan Update processes, provide engineering services for the safe and efficient movement of commerce and people; plan for future traffic needs; and promote the use of alternative transportation modes to reduce traffic demand and congestion; Oversee operations of the City's traffic signals and intelligent transportation systems. Help implement transportation policies in the General Plan; implement the City's Capital Improvement Projects and provide traffic engineering services for other city departments; Respond to traffic requests including neighborhood traffic calming, school safety issues, and parking.

Division Operations

1. Manage the design and construction of transportation capital improvement projects
2. Oversee the Traffic Monitoring Program and maintain traffic data.
3. Respond to traffic inquiries and concerns from the public, other departments, and other agencies.
4. Provide responsible review of development plans to ensure commensurate growth in transportation network capacity.
5. Oversee operations and maintenance of traffic signals and improve efficiency. Provide signal modernization and communications in an effort to improve traffic efficiency and reduce maintenance costs.
6. Support Complete Streets principles and Green Streets in the City.
7. Secure funding for transportation related projects.
8. Oversee the City's Transportation Impact Fee Program and coordinate with other agencies to fund future transportation infrastructure needs.
9. Work with TAMC, Caltrans and other agencies to obtain funding for extending rail service from the San Francisco Bay Area and Silicon Valley to Salinas.
10. Work with TAMC, Caltrans, and other agencies to improve capacity on US 101 through Salinas.
11. Coordinate with Monterey-Salinas Transit to plan and operate transit routes.
12. Review and update traffic signal timing systems to improve circulation.
13. Provide the Engineering and Traffic Surveys necessary to establish speed zones and enforce speed limit laws.
14. Develop City's Parking Programs.
15. Manage and annually update the residential parking permit program.
16. Manage and support the City's parking enforcement program.
17. Manage the City's Downtown Parking District.
18. Implement City's Traffic Calming Program.
19. Work with schools on traffic safety issues and implement safe route to school projects.
20. Develop and review traffic control plans for road closures and special event traffic control plans.
21. Provide regular reports to the Traffic and Transportation Commission.
22. Support the Police and Fire Departments on their specific needs related to traffic and transportation.
23. Implement the City's Vision Zero Policy and improve traffic safety to reduce fatalities and severe injuries resulting from traffic collisions.
24. Maintain traffic control devices including signs, signals, flashing beacons, crosswalk, and lane lines.
25. Issue transportation permits for oversee vehicles.

ENGINEERING AND TRANSPORTATION

5122 Development, Traffic & Transportation Division

- 26. Respond to traffic requests including neighborhood traffic calming, school safety issues, and parking analysis.
- 27. Implement Capital Improvement Projects.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Transportation Permits issued (annually)	259	203	150	119	150
Grant applications submitted, Dollars secured (\$ million)	\$1.3M/\$0	\$0	\$4M/\$2M	\$10M	\$2M
Salinas Connect Requests addressed (annually)	191		150		150
Projects Completed (NEW)	5	5	4	5	4
Traffic Commission Reports (NEW)	33	41	50	36	40

Major Budget Changes

The division has had an unfilled associate engineer position for the entirety of 22-23 Fiscal Year. The division also now has an unfilled engineering aide position.

The traffic division operations expand beyond CIP projects and must depend on Gas Tax or General Fund for non-CIP services, including speed limits, traffic monitoring program, signal operations, public requests, traffic analysis, and minor roadway improvements. Gas tax is the closest thing to a road user fee but funds are highly sought after between departments.

The General Plan Updated, currently underway is a major undertaking and a diversion of staff time.

ENGINEERING AND TRANSPORTATION

5125 Energy, Water & Solid Waste Division

Purpose

Manage and protect the City's interests in the areas of Water, Solid Waste and Energy (WWE) both regionally and locally. This also broadly comprises environmental compliance and issues such as Greenhouse Gas Emissions, Urban Forestry and Greening, Neighborhood Vibrancy, Electric Vehicle Charging and Stream Maintenance. The Division is responsible for special projects that have a strong environmental component, which are ongoing or intermediate to long term in duration and are complex in nature requiring specialized expertise.

Division Operations

1. Manage and provide technical support for water projects. Work in collaboration with City partners such as Monterey One Water (M1W), Salinas Valley Basin Groundwater Sustainability Agency, and Monterey County Water Resources Agency towards regional solutions such as water use funding for critical infrastructure, water security, increased capture and reuse of stormwater and mitigation of seawater intrusion. Exercise care that local water and related financial interests are considered for City residents and industries.
2. Manage and provide technical support for the City's Solid Waste and Recycling programs to provide effective and economical service. Oversee contracted waste hauler activities and monitor compliance with City Franchise Agreement. Coordinate with Salinas Valley Solid Waste Authority on a variety of issues including State mandated organics recycling measures resulting from recent legislation. Promote collaboration with SVSWA, Monterey Regional Waste Management District and the County to share resources and improve regional efficiencies.
3. Track Solar Photovoltaic systems' performance and savings while managing their operations and maintenance. Monitor the City energy efficiency projects' cost savings and performance. Seek and assess new energy related opportunities. Act as a focal point for policy concerning implementation of Electric Vehicle charging. Assist other departments and divisions in energy related activities. Maintain awareness and understand implications of regional energy issues for the City through ongoing relationships with Association of Bay Area Governments and Central Coast Community Energy.
4. Manage the City's streams and stormwater conveyance assets to assure flood protection and the ecological health of riparian zones.
5. Management and oversight of certain City sustainability goals and programs including Urban Forestry and Greening Programs.

ENGINEERING AND TRANSPORTATION

5125 Energy, Water & Solid Waste Division

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected
Fiscally strengthen water programs through increased revenue generation and negotiation of agreements	* Awarded \$6.6M in State grants for infrastructure to increase reuse of stormwater and improve City Industrial Waste Facilities * Completed agreements for right of entry to operate and maintain grant funded infrastructure and operation and maintenance cost recovery of recycled industrial wastewater and stormwater with M1W	* Initiated design of infrastructure improvements at Industrial Wastewater Facilities * Continued dialogue with M1W and MCWRA to better manage recycled industrial wastewater quality	* Complete design and begin grant infrastructure construction at Industrial Wastewater Facilities * Finalize long term agreement for recycling of industrial wastewater and stormwater with M1W and MCWRA	* 90% completion of design for infrastructure improvements at Industrial Wastewater Facilities * Initiate design of grant funded infrastructure * Finalize long term agreement for recycling of industrial wastewater and stormwater with M1W and MCWRA
Track avoided costs and generation from solar and energy retrofit projects	* 17,000 MWh generated from PV * \$3.0M avoided energy cost	* 23,070 MWh generated from PV * \$3.8M avoided energy cost	* 24,000 MWh generated from PV * \$4.2M avoided energy cost	* 26,800 MWh generated from PV * 4.5M avoided energy cost
Seek Energy related opportunities and partnerships	* Engaged with entities and continued to explore opportunities for funding and partnerships for EV charging infrastructure	* Initiated partnerships for EV charging infrastructure	* Secure funding and partnerships for EV charging infrastructure	* Initiated partnerships for EV charging infrastructure
Increase City's responsibility and effectiveness of the Solid Waste program	* Implemented measures to address deficiencies outlined in Republic Services performance review * Explored constructive collaboration with SVSWA, MRWMD and the County to share resources and develop operational efficiencies * Resolved larger long-term issues with SVSWA in continued negotiations	* Complete Franchise Agreement with Republic Services * Completed new agreement with SVSWA * Initiated rollout of SB 1383 Organics recycling through partnerships with SVSWA and Republic Services * Initiated improvements to address deficiencies outlined in Republic Services performance review and add financial monitoring component	* Complete rollout of SB1383 Organics recycling and continue education and outreach in collaboration with SVSWA and Republic Services * Continue to refine and improve measures to monitor and manage Republic Services' performance and financial reporting * Rekindle collaboration with SVSWA, MRWMD and the County on how best to share resources and improve regional efficiencies	* Complete rollout of SB 1383 Organics recycling and continue education and outreach in collaboration with SVSWA and Republic Services * Refined and improve measures to monitor and manage Republic Services' performance and financial reporting
Develop comprehensive plan to significantly increase tree canopy percentage within the City	* Obtained \$250k in CAL Fire grant funding to develop an Urban Forestry Management Plan	* Initiated grant funded Urban Forestry Management	* Complete Urban Forestry Management Plan	* Complete Urban Forestry Management Plan

Major Budget Changes

WWE continues to expand its pipeline of Capital Improvement Projects which include \$40M of Industrial Wastewater Treatment Facility improvements and over \$150M in sanitary sewer projects alone. The hiring of approved staff will help alleviate challenges implementing these CIPs and with the continued and changing regional water and solid waste issues.

The Division was formed in FY 2015-16 with a minimal budget until needs were better determined.

GEOGRAPHIC INFORMATION SYSTEMS (GIS)

Organizational Chart by Division

GEOGRAPHIC INFORMATION SYSTEMS (GIS)

5128 GIS Division

Purpose

The Geographic Information System (GIS) Division's primary function is to provide mapping and data analytical support to city departments. The GIS Division's goal is to make information easily accessible and assist other city departments make informed decisions on city operational, asset management and planning activities.

Secondary goals of the Division are to offer GIS services to other public and private entities at a reasonable cost, provide a platform for Open Data to the public and implement innovative and emerging technologies that will enhance city services.

Division Operations

1. Create, Manage, update, and enhance database layers of geographically located features and associated information.
2. Provide data analytics and create data dashboards for staff, council and the public.
3. Develop internal and public interface for GIS information.
4. Work with Departments in developing data capture processes for relevant information.
5. Assist City departments in the analysis of spatial data to arrive at desired results.
6. Migrate and update existing GIS servers and system.

GIS staff are participating in the Asset Management Implementation, Open Data, Innovation Team, and Smart City Initiatives. Additionally, GIS staff are providing support to the Alisal Vibrancy Plan, China Town Revitalization, Trash Cleanup app development, Pavement Management Plan, Airport GIS, Residential Fee and Billing and PD Property Info mobile apps. GIS is also supporting the QAlert System, Trakit database maintenance, and maintenance of the address and parcel databases. The main task for the fiscal year is to continue to support Salinas Source 2.0, development of public facing apps, Tree Maintenance App upgrade, the creation and maintenance of data dashboards and story maps. for staff, the council and community members.

Performance Measures

GEOGRAPHIC INFORMATION SYSTEMS (GIS)

5128 GIS Division

Major Budget Changes

In FY 2023-24, no major budget changes requested. Staff is still requesting to fill the open GIS Analyst I positions to replace the Technician II positions. Key Performance Indicator Goals have been adjusted to reflect the staffing shortage.

ENVIRONMENTAL AND MAINTENANCE SERVICES

Organizational Chart by Division

ENVIRONMENTAL AND MAINTENANCE SERVICES

5230 Maintenance Administration Division

Purpose

The mission of Maintenance Services Administration is to provide administrative direction and support services to the diverse maintenance functions, their operating budgets, and Capital Improvement Projects.

Division Operations

1. To provide administrative and clerical support to the Environmental & Maintenance Services Divisions.
2. To provide effective supervision and control of maintenance services and resources.
3. To provide overall budget, project, and program management.
4. To provide central administrative management to maximize economies of scale and efficiency.
5. To provide excellent customer service.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Number of purchase orders issued	694	694	600	600	650
Process Biweekly Payroll Personnel Actions	112	112	100	100	125

Major Budget Changes

To attain effective coverage and workflow, the Maintenance Administration Division would require two additional full-time positions. Firstly, we would need an additional FT Office Technician, giving us a total of two. In most circumstances (except for emergencies), this will allow for our front office to always remain open and our dispatching services to continue. Since the current FT Office Technician handles extra administrative duties while working out-of-class, the workload is sometimes placed upon the two PT Office Technician who only work 3 days a week. By eliminating both PT Office Technicians, we can financially cover the requested second FT Office Technician. Secondly, we would need a FT PW Compliance Officer I. The employee in this new position would assist in planning, organizing, and coordinating analytical, statistical, and financial duties in support of contract monitoring, regulatory compliance and/or program management. We currently rely heavily on other staff in the Environmental & Maintenance Services Division to assist with completion of the necessary tasks for executing contracts and monitoring labor compliance. We also seek advice and assistance from employees within and outside of our department.

ENVIRONMENTAL AND MAINTENANCE SERVICES

5231 Graffiti Abatement Division

Purpose

The mission of the Graffiti Abatement is to beautify our City by providing a graffiti free environment by removing or covering all graffiti on public property within the City of Salinas.

Division Operations

1. To remove graffiti from public properties and streets within 48 hours.
2. Support the removal of graffiti from private property as resources are available.
3. To provide excellent customer service.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Square Feet of Graffiti Removed Annually	198,962	198,962	200,000	225,000	185,000
Sites Addressed	1,340	1,340	2,500	3,000	3,200

Major Budget Changes

None.

ENVIRONMENTAL AND MAINTENANCE SERVICES

5232 Facilities Maintenance Division

Purpose

The Facilities Maintenance Division is responsible for preserving 80 City owned Buildings, and Facilities through preventive maintenance and repairs to ensure clean, safe, sanitary, and well operating facilities for the public.

Division Operations

1. To provide planning and implementation of a maintenance management program for all City buildings and facilities.
2. To provide effective periodic preventive maintenance and inspections to reduce the incidence of unanticipated repair.
3. To provide central facility management to maximize economies of scale and efficiency.
4. To provide excellent customer service.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Square feet of buildings to maintain per employee	216,000	216,000	92,000	400,000	375,000
Electrical and Plumbing Repairs Performed Annually	750	750	1,200	1,500	950
Painting and Carpentry Maintenance Requests	800	800	1,200	950	1,000

Major Budget Changes

Many of the City's buildings have been subjected to deferred maintenance over the past several years, resulting in costly repairs. Leasing to third parties, then not following through on the tenant's ability to maintain City facilities has also been detrimental. The division is requesting one FT office Technician to cover administrative functions. The position would maintain CityWorks and help with data entry and scheduling of QAlerts. This will relieve the maintenance staff from data entry and free up more time to address the numerous issues that arise with city facilities. With the addition of the requested position, there will be an increase in the operational budget.

ENVIRONMENTAL AND MAINTENANCE SERVICES

5232 Facilities Maintenance Division

Expenditures by Category	FY 21 Actual	FY 22 Actual	FY 23 Amended	FY 24 Proposed

ENVIRONMENTAL AND MAINTENANCE SERVICES

5234 Street Maintenance Division

Purpose

Salinas's 270 miles of streets provide an intricate mechanism for moving people and products smoothly through our City. This mechanism requires continues upkeep to stay in top-notch working order.

The mission of the Street Maintenance Division to maintain the 56 million square feet of asphalt and concrete City street infrastructure and assure they are safe within the City by providing periodic inspection, maintenance, and repair on streets, sidewalks, signs, and traffic control.

Division Operations

1. Assist engineering in establishing work priorities.
2. Maintain sidewalks, curbs and gutters by repair or replacement as resources allow.
3. Devote resources to support the City's 50/50 Sidewalk Repair Program
4. Maintain traffic signs and pavement markings in good repair.
5. Maintain streets through deep plug asphalt patching, crack sealing and pothole patching.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Tons of Asphalt Applied Annually	15,511	8,291	14000	6,196	12000
Yards of Concrete Poured	245.5	172.9	250	358.4	250
Street Sign Installation/Repair/Replacement	1201	1166	850	1535	1400
Work Alternative Crew Cleanup -Tons	76	99.5	100	130	130

Major Budget Changes

Last FY, we requested a division for health & safety cleanups that consisted of One Public Service Maintenance Worker III position and three Public Service Maintenance Worker II positions. We were granted all of said positions for a new concrete crew and not for health & safety cleanup division. Four Public Service maintenance Worker II positions are in the process for hire, two in the Street Division, One in the concrete division, and one in the sign division. We have one request this FY for an Underground Marking Utilities Technician or to be able to contract out for Underground Marking Utilities, whichever is deemed most cost efficient for the city.

ENVIRONMENTAL AND MAINTENANCE SERVICES

5235 Street Lights Division

Purpose

Salinas' benefits from over 6,000 streetlights illuminating our streets after dark. Streetlights vary from the 150-watt residential lights, to the 200- watt arterial lamps, and even special period lamps in the Downtown area.

Salinas no longer uses high-pressure sodium lamps and has transitioned to LED lamps on every street and City facility.

Division Operations

1. Maintain all City street lights.

ENVIRONMENTAL AND MAINTENANCE SERVICES

5236 Traffic Signals Division

Purpose

Provide routine maintenance and timely repairs to all traffic signal systems in Salinas.

Division Operations

1. Maintain the traffic signal system in good operational order.
2. Manage Traffic Signal Maintenance Contract.
3. Review and update traffic signal timing systems to improve circulation.
4. Evaluate systems as appropriate to meet traffic needs.
5. Provide signal interconnection in an effort to improve traffic movements and improve intersection operations efficiency.
6. Develop Traffic Operations Center to allow communication and improved signal management functions.

ENVIRONMENTAL AND MAINTENANCE SERVICES

5237 Environmental Compliance Division

Purpose

Inspect and investigate sources of pollution to protect the public and the environment in compliance with the City's National Pollution Discharge Elimination System (NPDES) Permit and ensure conformance with Federal, State, and local regulations.

Division Operations

1. Protect water quality and environmental resources by developing and implementing programs and best management practices identified within the City's Stormwater Management Plan.
2. Develop and implement an NPDES inspection program of high priority commercial and industrial businesses to ensure compliance with water quality objectives for point source discharges.
3. Promote voluntary compliance.
4. Ensure that environmental requirements and best management practices are being implemented effectively.
5. Oversee the City's street sweeping program.

ENVIRONMENTAL AND MAINTENANCE SERVICES

5239 Urban Forestry Division

Purpose

The mission of the Salinas Urban Forestry is to maintain Salinas' urban forests, including street, golf course, greenbelt and median trees, and trees within public facility landscapes, by providing professional quality service, utilizing International Society of Arboriculture tree care practices and standards set forth by the American National Standards Institute (ANSI) and the Tree City USA program.

Division Operations

1. Complete safety pruning operations with in-house staff and contract staff.
2. Provide storm related emergency responses for tree issues.
3. Complete a limited number of full-service pruning operations on City trees through contract services with available resources.
4. Plant replacement trees in streetscapes as resources allow.
5. Perform tree maintenance, planting and removal in city parks and greenbelts.

Performance Measure

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Cost per Salinas resident to support Street Trees	\$6.31	\$6.31	\$9.60	\$9.60	\$9.25
Number of Tree Service Requests	15,000	15,000	10,000	10,000	10,000
Number of Storm and Emergency Call Outs	450	450	200	200	200
Number of Street Trees to maintain EService Requests	7,000	7,000	4,000	4,000	4,000

Major Budget Changes

The Urban Forestry Division has been understaffed for many years. For this reason, we are requesting a total of two Urban Forestry Worker IIs and four Urban Forestry Worker Is. This request will not only assist with providing better service but will also provide a safe and better quality of life for our community and its residents. There will be better response time to all requests. Additional staff will allow the Urban Forestry Division to perform regular preventative maintenance throughout the city, especially the areas that have older more mature tree canopies.

ASSESSMENT AND MAINTENANCE DISTRICTS

Summary

Purpose

Collect, account for, and distribute principal and interest payments to assessment district bondholders and maintain an accurate accounting system for maintenance districts. Utilize maintenance district funds to provide services to residents living within each District for the purpose established thereof.

Top Accomplishments for FY 2022-23

Investment Strategies/Risk Management

1. Responded to citizen inquires and attended property owner meetings.
2. Kept expenses within budget and below the anticipated revenues to insure adequate reserves.

Public Safety

1. Removed overgrowth from creek beds reducing impacts from potential flooding and wildfires.
2. Responded to concerns related to traffic and security as soon as possible.

Operational Efficiencies

1. Managed district budgets with positive fund balances at year-end.
2. Implemented water conservation techniques in compliance with State water reduction mandates.

Excellent Infrastructure

1. Continued street sweeping services for Monte Bella.
2. Painted curbs and replaced signs as needed.

City Council Goals, Strategies, and Objectives for FY 2023-24

Investment Strategies/Risk Management

1. Maintain clear communication channels.
2. Proactively identify service delivery problems.

Public Safety

1. Remove graffiti and respond to vandalism concerns quickly.
2. Continue to implement drought tolerant practices where-ever possible.

Operational Efficiencies

1. Install LED lighting in all districts.
2. Simplify budgeting process with other Departments.
3. Improve Project Management Processes.

Excellent Infrastructure

1. Continue the pro-active infrastructure maintenance plan for each district.

Investment Strategies/Risk Management

1. Work with the members of each district to plan new projects and maintain their budgets.
2. Focus on communication with each community.

Major Budget Changes

None.

ASSESSMENT AND MAINTENANCE DISTRICTS

5562 Airport Business Park Division

Purpose

The purpose of the district is to provide the Airport Business Park Center with limited basic maintenance to include mowing and irrigation. This district is comprised of 64.7 acres, not including acreage owned by governmental agencies. Maintained improvements are all walkways, crosswalks, masonry walls, fences, parkways, embankments, sprinkler systems and landscaping within the right of way of Moffett Street, La Guardia, and Vandenburg Street. Maintenance, servicing and operation is in accordance with NPDES Requirements of the City of Salinas storm water permit.

Division Operations

1. Based on limited resources, to provide mowing services on Moffett Street.

Major Budget Changes

None.

ASSESSMENT AND MAINTENANCE DISTRICTS

5563 North East Division

Purpose

This district encompasses street landscape improvements throughout North East Salinas from Boronda Road to East Laurel Drive and from Gabilan Creek to Williams Road. The purpose of the district is to provide a source of funding for the on-going maintenance of the improvements that were installed for the benefit of the parcels within the District. The improvements include any and all public landscaping and irrigation improvements on landscaped medians islands within the district, including the 30-foot wide park strips of land between the curb and right-of-way, cul-de-sac median landscaping, jogging paths, planter walls, public lighting and associated improvements as allowed under the Salinas Municipal Code and the Lighting and Landscape Act of 1982 (the "Act"). In addition, the District also funds the maintenance of the channel improvements within Gabilan Creek and Natividad Channel in accordance with NPDES requirements of the City of Salinas stormwater permit, as allowed under the Salinas Municipal Code.

Division Operations

1. Provide responsive customer service.
2. Administer and supervise the maintenance contract for cost effective landscape maintenance.

Major Budget Changes

None.

ASSESSMENT AND MAINTENANCE DISTRICTS

5566 Mira Monte Division

Purpose

This district is within the North/East Maintenance District located northwest of Hemingway Drive, and it encompasses the development known as the Cottages of Mira Monte. This development includes approximately 203 medium density family homes, open space, and tot lots within the development. The purpose of the district is to provide maintenance, servicing, and operation of street and open space landscape improvements, tot lot improvements, routine street maintenance, maintenance of the clustered driveways, maintenance of public lighting fixtures on all streets and clustered driveways, and associated appurtenances located within the public rights-of-way and dedicated landscape easements.

Division Operations

1. Provide cost effective and quality landscape maintenance.
2. Provide excellent customer service to the District residents by being available to resolve maintenance issues in a timely manner.
3. Administer and supervise the maintenance contracts for cost effectiveness.

Major Budget Changes

None.

ASSESSMENT AND MAINTENANCE DISTRICTS

5567 Monte Bella Division

Purpose

This district encompasses approximately 200 acres of planned development known as Monte Bella, which at build-out will ultimately include approximately 853 single family homes, open space, a community park and an elementary school site. The purpose of the district is to provide maintenance, servicing, and operation of street landscape improvements, park landscaping improvements, open space and retention basin landscaping improvements, agricultural run-off ditch, and de-silting basins, local street lighting, routine local street maintenance and associated appurtenances located within the public rights-of-way and dedicated landscape easements.

Division Operations

1. Provide cost effective and quality landscape and park maintenance.
2. Provide excellent customer service to the district residents by being available to resolve landscape issues in a timely manner.
3. Administer and supervise the maintenance contracts for cost effectiveness.
4. Provide a street sweeping program.

Major Budget Changes

None.

ENTERPRISE OPERATIONS

Organizational Chart by Division

ENTERPRISE OPERATIONS

Summary

Purpose

The purpose of the Enterprise Program is to provide self-supporting community services such as the operation of the Airport, Fairways Golf Course, and the various Sewer Waste Collection systems.

Top Accomplishments for FY 2022-23

Investment Strategies/Risk Management

1. Provided economic role and benefit of the airport for the Salinas Economic Development Element.
2. Completed Economic Benefit Study for the Salinas Municipal Airport.
3. Provide parking services in support of the Downtown Vibrancy Plan.
4. Provide parking support for other commercial areas in Salinas.
5. Develop parking strategies in support of encouraging housing development in downtown.
6. Secured \$750,000 grant from FAA to update the Airport Master Plan and develop an Airport Sustainability Plan.

Public Safety

1. Commenced design for a new vehicle and pedestrian access control system at the Salinas Municipal Airport.
2. Provide Parking enforcement support for Code enforcement activities.
3. Provide Parking enforcement support for traffic safety at school locations.

Operational Efficiencies

1. Secured \$69,000 in Coronavirus Aid, Relief, and Economic Security Act Emergency Funding.
2. Continued support of the Airport Commission.
3. Continued development of sustainable City Parking programs.
4. Creation of the Parking Enterprise.
5. Successful development of sustainable Parking enforcement program that provide city services and covers cost.
6. Adjusted rates of Downtown Parking enterprise for next 2 fiscal years with the goal for enterprise to self-sustaining.

Excellent Infrastructure

1. Design pavement rehabilitation for the southside hangars at the Salinas Municipal Airport.
2. Completed preventative maintenance inspection on all City owned Aircraft Hangars.

ENTERPRISE OPERATIONS

Summary

City Council Goals, Strategies, and Objectives for FY 2023-24

Investment Strategies/Risk Management

1. Complete Parking Management Plan with recommendations for future downtown parking infrastructure.
2. Host 2023 California International Airshow.
3. Complete Airport Master Plan and Airport Sustainability Plan.

Operational Efficiency

4. Optimize Parking Enforcement to support City parking programs and neighborhood safety
5. Continued support of the Airport Commission.
6. Commence Airport Master Plan Study.

New Revenue

1. Secure Federal and State grants for Airport Pavement Rehabilitation (Design and Construction) for the southside hangars.
2. Update and maintain adequate Airport Rates and Fee Schedule to encourage a sustainable enterprise system.
3. Continue developing sustainable parking programs.

Public Safety

1. Install new airport access control system.

Major Budget Changes

None.

ENTERPRISE OPERATIONS

3350 Permit Services Division

Purpose

The Permit Services Division ensures the safety of buildings and structures by efficiently reviewing construction plans for both residential and commercial projects and verifying compliance with applicable building codes, city ordinances, and state laws through the inspection process. Permit Services also facilitates building access for disabled persons, educates the public on the building permit process and construction requirements, coordinates approval and inspection of building permits with other City Departments/Sections and governmental agencies, provides timely processing of permits to help stimulate economic development, and assists code enforcement with technical construction requirements.

Division Operations

1. Assist customers in a timely and professional manner.
2. Provide administrative support for Permit Center staff.
3. Accurately process all permits, inspection requests, and calculation of fees.
4. Streamline the plan review process utilizing the new paperless permitting system.
5. Continue to research and implement new technology such as virtual inspections.
6. Lead continuous improvement efforts for the Permit Center with input from customer groups.
7. Accomplish plan review and inspection of building projects in a timely and complete manner.
8. Update educational and informational handout material for public use regarding Permit Center processes, building codes, city ordinances, and state laws.
9. Respond to building safety and work without permit complaints.
10. Track and monitor revenues and expenses to ensure that the Building Division is independently financially sustainable.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal

Percent of Simple Permits (City Reports, Electrical, Plumbing, Reroofs) Applied to Issued Date (Goal of 48 Hours)	100% (24 Hours and 2,048 Permits)	100% (48 Hours and 3,243 Permits)	100% (48 Hours)	100% (48 hours)	100 (48 hours)%
Accessory Dwelling Unit (ADU) Approvals through Plan Check	71	137	55	55	75

Major Budget Changes

Over the last few years, permit activity has significantly increased resulting in the addition of new positions. In FY 22/23, three new full-time administrative staff were hired and all vacant inspection positions were filled. As a result, the overall budget expenditure related to salaries and benefits will increase in FY 23/24. Permit Services will also add \$20,000 in temporary salaries to fund continued customer service support at the public counter and \$25,000 in outside services to assist in the development of Permit Center educational materials. All expenditures for Permit Services are paid by the Enterprise Fund through collected permit fees and do not have an impact on the General Fund.

ENTERPRISE OPERATIONS

5126 NPDES Storm Water Division

Purpose

This Division's purpose is to provide technical support in the management and implementation of the City's NPDES Stormwater Permit. This has been identified as a focus area for regulatory compliance that affects many City departments and other outside agencies. The Division is currently comprised of an NPDES Permit Program Manager who reports to the City Engineer, Stormwater Analyst and Stormwater Compliance Inspector (not yet filled).

Division Operations

1. Oversee and manage the City's NPDES stormwater Permit compliance program and its integration with other City activities.
2. Consolidate the City's stormwater Permit compliance efforts:
 - a. Bring the City's stormwater program into compliance with the City's NPDES Stormwater Permit requirements.
 - b. Streamline City Permit compliance efforts to increase efficiency and cut compliance costs through integration of current technologies, especially in data collection/reporting efforts.
 - c. Ensure data collection and reporting capabilities meet Permit information management and reporting requirements via the 2NForm platform.
 - d. Continue technical support and oversight of City programs for compliance with stormwater regulations and provide the internal structure necessary to ensure the new Permit requirements are met while providing for efficient use of City resources.
3. Reduce the number of Permit violations from EPA and Regional Water Board audits of the City's Stormwater Permit compliance efforts to zero.
4. Collaborate with other public agencies to achieve permit program cost savings and compliance.
5. Obtain grant funding for stormwater water capture/reuse, green infrastructure, and green streets projects.
6. Increase the amount of curb miles swept through implementation of city-wide "No Parking During Street Sweeping Hours" signage program.
7. Provide support in City-wide efforts to develop regulatory fees to support NPDES-required activities.
8. Provide support to successfully obtain a stormwater utility to fund implementation of the City's NPDES permit.
9. Update the Stormwater Master Plan
10. Develop a "Green City" Master Plan to outline locations and types of green infrastructure projects feasible within the City limits.
11. Develop an Asset Management Plan for all City stormwater assets.

ENTERPRISE OPERATIONS

5126 NPDES Storm Water Division

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Compliance with NPDES Stormwater Permit			100%	90%	100%
Offer stormwater training and community workshops to increase stormwater awareness			Continuous update and development of cleanwatersalininas.com website; tabling events for Closter Park Green Streets project; 5 tabling events for stormwater awareness	Developed a robust CleanWaterSalinas website; held 3 tabling events for Closter Parks Green Streets Project; 8 tabling events for education & outreach	Continuous update of CleanWaterSalinas website; 5 tabling events for stormwater awareness; community engagement on "Green City" Master Plan and Closter Park Green Streets PS&Es
Develop a stormwater utility/funding source			---	Funding & Financing Strategy developed to determine methods for application of potential sources of money to support the NPDES program until a utility is obtained	Implement Funding & Financing Strategy to obtain resources for the NPDES program.
Reduction in litter throughout the City (running total)			40%	45%	55%
Green streets/P3 projects implemented in the City			Grant obtained for Closter Park Green Street project	CNRA grant not obtained; submitting for other grants; developing a "Green City" Master Plan	Develop list of 5 green infrastructure projects for potential implementation; obtain grants to supplement implementation costs
Pilot projects in place to increase curb miles swept; street sweeping "No Parking" signage program in place			New high and medium priority routes developed; pilot projects to determine sweeping frequency implemented; signage contractor obtained	Contracted with Routesmart to redesign sweeping routes to allow for No Parking on alternate days and sides of the road. Community outreach has begun.	New street sweeping routes developed; No Parking signage of two routes in place
Asset Management Program in place for SW assets					Completion of an Asset Management Plan; complete attribution of 75% of all SW assets; implement work order system for tracking asset maintenance and upgrade

ENTERPRISE OPERATIONS

5126 NPDES Storm Water Division

Major Budget Changes

This Division was formed to allow consolidation of NPDES permit program funding to prepare for obtaining a new stormwater funding utility and operate as an enterprise fund. Due to increased permit requirements, it is recommended that a full-time Stormwater Technician and Stormwater Inspector be added to the NPDES staff. The Stormwater Inspector would support SW inspections for Development Engineering and CIP Engineering.

ENTERPRISE OPERATIONS

5340 Airport Division

Purpose

The Airport serves the City as an element of the national transportation system. It is an economic development asset and serves as an employment center with over 25 businesses providing high-skilled high paying jobs. The Airport Division oversees the safe day-to-day operation of the facility and the long-term capital development.

Division Operations

1. Focus on quality customer service.
2. Provide staff support to the Airport Commission.
3. Ensure the continued economic viability of the Airport Enterprise Fund.
4. Support the California International Air show.
5. Acquire funding to complete plans and projects that provide for appropriate airport development.
6. Complete the Airport Master Plan and Airport Sustainability Plan.

ENTERPRISE OPERATIONS

5441 Industrial Waste Division

Purpose

Provide the Salinas food industry and other industrial water users with an economical and environmentally acceptable means of treatment and disposal of industrial wastewater.

Division Operations

1. Maintain the Industrial Waste Treatment Facility and Industrial Waste Collection System in a manner consistent with the City's Waste Discharge Requirements (WDR) Permit issued by the Central Coast Regional Water Pollution Control Board, and State and Federal laws and regulations.
2. Operate the facility in a manner that protects the interests of the industrial users and the residents of Salinas.

ENTERPRISE OPERATIONS

5442 Sanitary Sewer Division

Purpose

Maintain the sanitary sewer collection system in a safe, reliable, and sanitary condition to satisfy all regulatory and environmental requirements implementing best management practices outlined in the City's waste discharge requirements permit issued by the State Water Board.

Division Operations

1. Maintain the Sanitary Sewer Collection System consistent with the Statewide General WDR (Waste Discharge Requirement) permit for Sanitary Sewer Systems, WQO No. 2006-0003, and the City's Sewer System Management Plan.
2. Clean and repair existing sanitary sewer mains for the health and safety of the residents of Salinas.
3. Minimize Sanitary Sewer overflows to protect the local and regional environment through preventive maintenance.
4. Effectively contain and clean up sewer spills.
5. Replace deteriorated sewer trunk mains.
6. Perform Preventive Maintenance and repairs for ten pump stations.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Miles of Pipeline Cleaned	80	95	125	100	125
Number of Sanitary Sewer Overflows	5	3	<5	<5	<5
Linear Feet of Pipeline Televised (CCTV)	77,579	18,118	100,000	80,000	100,000
(FOG) Fats Oils and Grease Inspections	53	135	100	75	100

Major Budget Changes

We have one request this FY for a Underground Marketing Utilities Technician or to be able to contract out for underground Marking Utilities, whichever is most cost efficient for the city.

ENTERPRISE OPERATIONS

5443 NPDES Storm Drain Sewer Division

Purpose

Maintain the storm drainage system in a safe and sanitary condition by providing regular inspections and periodic maintenance. Comply with local and regional goals through the federally mandated National Pollution Discharge Elimination System (NPDES) requirements and "Best Management Practices" (BMPs) to reduce or eliminate pollution from storm water runoff and illicit discharges from identified sources.

Division Operations

1. Implement the goals and standards outlined in the City's new 5-year NPDES Permit, and the City's Storm Water Management Plan.
2. Inspect, clean and repair the existing storm drain system as required to assure that the City accomplishes water quality objectives as outlined in the City's NPDES Permit and to reduce the risk of localized flooding.
3. Maintain City-owned open drainage channels to provide for free flow of storm runoff throughout the City.
4. Continue to implement the NPDES Water Quality Monitoring Program and Maintenance Program consistent with NPDES requirements established by the Central Coast Regional Water Quality Control Board.
5. Continue the Storm Drain stenciling program consistent with NPDES BMPS.

Performance Measures

ENTERPRISE OPERATIONS

5444 NPDES Street Sweeping Division

Purpose

Maintain a clean City in accordance with best management practices in the City's National Pollution Discharge Elimination System (NPDES) Permit to eliminate pollution from storm water runoff or illicit discharges from identified sources.

Division Operations

1. Maintain clean streets maximizing street sweeping throughout the City consistent with the City's NPDES Stormwater Permit requirements.
2. Sweep all residential streets consistent with NPDES scheduling requirements.
3. Reduce the amount of refuse in the City's storm sewer effluent consistent with NPDES best management practices.

ENTERPRISE OPERATIONS

5445 Hitchcock Road Water Division

Purpose

Provide a clean water source to business and operations located at the Hitchcock facility. These include the City's Animal Shelter, the Industrial Waste Administrative Building, the Monterey County Animal Shelter and the Monterey Regional Water Pollution Control Agency's sanitary sewer lift station.

Division Operations

1. Maintain the fresh water well system in a manner consistent with guidelines established by State and Federal Laws and as determined by the Environmental Health Division of the Monterey County Health Department.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal

ENTERPRISE OPERATIONS

5446 Downtown Parking Division

Purpose

The mission of Downtown Parking Enterprise is to provide, operate and maintain an efficient, effective and sustainable downtown parking management to meet the needs of our residents, visitors and the business community. The enterprise needs to cover costs of services and strategically plan to meet the downtown parking demand today and in the near future. The Downtown Parking District enterprise supports the City's downtown economic and revitalization objectives.

Division Operations

1. To develop a sustainable downtown parking program that is able to meet current downtown needs as well as plan for viable parking solutions in the future.
2. To support the vision of the Downtown Vibrancy Plan and help make downtown a destination.
3. To provide effective management of parking services and resources.
4. To provide centralized parking management to maximize economies of scale and efficiency.
5. To develop a parking program that is fiscally able to be a partner with downtown stakeholders.
6. To provide excellent customer service.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Total Revenue	\$1,215,799	\$492,517	\$1,200,000	\$529,864	
Total Expenses	\$1,417,377	\$1,548,342	\$1,200,000	\$1,705,605	
Net Revenue	-\$201,578	-\$1,055,824	\$0	-\$1,175,741	
Operating Revenue (Pemit Sales/Parking fees)	\$268,207	\$467,475	\$450,000	\$528,934	

Major Budget Changes

Parking fees were approved by City Council for FY 21/22 for the parking garages and parking lots, however the enterprise remains in a deficit position.

Operating costs have decreased slightly due to staff vacancies, however the Monterey Street Garage contract had to be amended which increased outsourced operating costs. Even with increased parking fees, the district will close 22/23 in the red again. The Monterey Street Garage and Salinas Street Garage continue to have deferred maintenance, which are increasing in cost year by year. Surface lots are being sold for re-development which will decrease future revenues. On-street parking remains free, and managed only by a 90 minute time limit. The City and County continue discussing a new parking structure which will only increase future operation and maintenance obligations.

ENTERPRISE OPERATIONS

5447 Preferential Parking Division

Purpose

The mission of the Preferential Parking operations is to provide, operate and maintain an efficient and flexible preferential parking system. Currently, there is only one preferential permit parking area, District 3A, for the area surrounding the Salinas Valley Memorial Hospital. This preferential permit parking program is managed by the Public Works Parking Division is to meet the need of the residents, visitors and businesses located within the boundaries of the Preferential Parking Program.

Division Operations

1. Provide effective control of parking services and resources in a residential parking district.
2. Provide parking management to maximize economies of scale and efficiency.
3. Provide effective communications with residents of the parking zone/areas in a parking district.
4. Sustain parking enforcement in designated streets.
5. Provide excellent customer service.

Performance Measures

Performance Measure/Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Permit Sales	\$15,595.00	\$24,582.00	\$15,000.00	\$24,255.00	\$25,000.00
District Expenses (NEW)				\$ 26,934.83	\$25,000.00

Major Budget Changes

A CIP contains funds to respond to requests for additional residential permit parking areas. The City has received 5 petitions requesting new Residential Permit Parking Programs. Due to staff capacity and existing vacancies, the City is unable to respond to new requests at this time.

ENTERPRISE OPERATIONS

5447 Preferential Parking Division

Expenditures by Category	FY 21 Actual	FY 22 Actual	FY 23 Amended	FY 24 Proposed

Total	7,611	16,881	6,100	22,700

ENTERPRISE OPERATIONS

5448 Parking Enforcement Division

Purpose

The Citywide Parking Enforcement Program supports other programs of the Parking Enterprise. It is also responsive to Salinas' residents' need for parking enforcement and supports safety enforcement at schools. As an enterprise, the program also has the objective to ensure that costs for desired services are covered.

Division Operations

1. Provide parking management to improve program effectiveness.
2. Provide a sustainable parking enforcement program that supports all parking programs.
3. Respond to residents and business request for parking enforcement.
4. Support traffic safety needs at school locations.
5. Pursue expansion of parking enforcement program expansion to cover evenings and weekends.
6. Provide excellent customer service.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Citations Written	434	5,921	25,000	16,911	20,000
Annual Cost	\$955,876	\$993,267	\$1,000,000	\$680,563	\$1,000,000
Revenue	\$876,303	\$990,074	\$1,250,000	\$633,280	\$1,250,000

Major Budget Changes

Parking enforcement demand continues to be high. In December 2020, another service expansion was approved by the City Council. Available revenue was reinvested to expand parking enforcement services with the addition of two parking officers at a cost of \$165,908 annually. The parking enforcement program will continue to absorb costs for citation processing, the court, and DMV. These costs increase with increase in citation activity. Total costs will be covered by revenues developed with the increase in parking enforcement activity. Another revenue source can be established with the implementation of a scofflaw collection program.

INTERNAL SERVICES

Organizational Chart by Division

INTERNAL SERVICES

Summary

Purpose

Internal Services supports the provision of employee benefits to include health and welfare benefits, workers compensation, City-wide safety programs, and employee assistance programs. Comprehensive protection of the City's assets through a liability program of risk avoidance, risk reduction and risk transfer is also accomplished through Internal Services.

City Council Goals, Strategies, and Objectives for FY 2023-2024

Investment Strategies/Risk Management; Operational Efficiencies *(Effective and Culturally Responsive Government)*

1. Reduce General Fund costs in management and administration of general liability and Workers Compensation programs.
2. Implement annual audits of Workers' Compensation Third Party Administrators performance in managing claims and liabilities.
3. Assist with coordination of early Return to Work for Industrial and Non-Industrial Injuries.
4. Maintain financial stability of the state property/casualty insurance fund.
5. Evaluate efficacy of claims management software to reduce reliance upon outside services and promote internal management of claims administration.
6. Continue implementing the cost-recovery and board-up protocols.

Major Budget Changes

None.

INTERNAL SERVICES

1247 Workers' Compensation Insurance Division

Purpose

Set Workers' Compensation rates at a level that will fund the workers' compensation reserve at the recommended levels. Maintain a Third-Party Administrator that will provide excellent customer service to employees.

Division Operations

1. Provide workers' compensation benefits to City employees consistent with requirements of State law while conserving the City's General Fund.
2. Provide a visible and accurate accounting of the self-insured Workers' Compensation.
3. Set workers compensation rates at a level which will fund the workers' compensation reserve at the recommended level.
4. Establish quarterly file reviews to maintain control over the program with the City's Third-Party Administrator and Occupational/Medical Clinic.
5. Provide On-going training to departments and assist with coordination of early return to work.
6. Implement changes in the workers' compensation law.
7. Reduce General Fund costs in the administration and management of Workers Compensation claims.

Major Budget Changes

None.

INTERNAL SERVICES

5233 Vehicle/Equipment Maintenance Division

Purpose

Fleet Maintenance is the internal service division responsible for the inspection, maintenance and repair of the City's vehicle and equipment fleet of over 350 units.

The mission of Fleet Maintenance is to provide safe, dependable, and environmentally sound transportation, related support services, and tools for necessary City purposes. The Division's primary responsibility is to conserve vehicle and equipment value and utility through the inspection, periodic preventive maintenance, and repair of this asset.

Division Operations

1. Develop and staff an effective preventive maintenance program to reduce the incidence of unscheduled repairs.
2. Establish market-driven, competitive fleet services by making periodic assessments of the cost competitiveness of fleet service delivery.
3. Provide for a central fleet management function to maximize economies of scale and efficiency of operation.
4. Establish a fleet policy that identifies all fleet costs, allocates these costs equitable and supports fleet operations as an enterprise activity.

Performance Measures

Performance Measure / Goal	FY 2020-21 Actual	FY 2021-22 Actual	FY 2022-23 Goal	FY 2022-23 Projected	FY 2023-24 Goal
Number of vehicles to maintain per employee	44	44	44	44	48
Preventive Maintenance Inspections on Police Vehicles	489	489	500	500	525
Preventive Maintenance Inspections on Fleet Vehicles	1,131	1,131	1,100	1,100	1,200

Major Budget Changes

A full time Inventory Technician position has been requested. The Division currently has a part-time Public Service Maintenance Aide, which they are requesting to switch to full-time position. The Aide would be responsible for ordering & returning parts, entering parts into a database, and maintaining inventories and stock at levels determined by usage. This will help keep Fleet's cost efficient by minimizing over ordering and returning parts.

BUDGET RESOLUTION

RESOLUTION NO. _____ (N.C.S.)

RESOLUTION NO. _____ (S.A.)

A RESOLUTION ADOPTING THE FISCAL YEAR 2024 ANNUAL OPERATING BUDGET

WHEREAS, on May 23, 2023, the City Manager submitted a preliminary operating budget and preliminary capital improvement budget for fiscal year 2024 and a preliminary capital improvement program for fiscal years 2024-2029 to the City Council; and

WHEREAS, on June 13, 2023, the City Manager submitted the proposed operating budget and proposed capital improvement budget for fiscal year 2024 and the proposed capital improvement program for fiscal years 2024-2029 to the City Council which incorporated adjustments to the preliminary budgets and preliminary capital improvement program as directed by the City Council and the City Manager.

NOW, THEREFORE, BE IT RESOLVED that the operating and capital budgets of the City of Salinas and the Successor Agency of the Salinas Redevelopment Agency for fiscal year 2024, which begins July 1, 2023, with appropriations totaling \$248,437,988 is hereby approved, adopted, and appropriated.

BE IT FURTHER RESOLVED that the amounts by fund outlined in the “Expenditure Total” column of “Exhibit 1” attached hereto and incorporated herein by this reference shall be the maximum expenditures authorized for those funds for fiscal year 2024.

BE IT FURTHER RESOLVED that the City Manager is hereby authorized to make budgetary revisions between budget units within an operating fund after the adoption of the fiscal year 2024 budgets.

BE IT FURTHER RESOLVED that the City Manager is hereby authorized to transfer monies between funds up to the maximum outlined in the “Transfers Out” column in “Exhibit 2” attached hereto and incorporated herein by this reference.

BE IT FURTHER RESOLVED that the estimated financing sources by fund available to meet the authorized expenditures and transfers are approved and adopted as detailed in the Fiscal Year 2024 Proposed Operating Budget and incorporated herein by this reference.

BE IT FURTHER RESOLVED that the City Manager is authorized to adjust amounts of said financing sources subsequent to budget adoption if any appropriation balances carried forward from prior fiscal years had an associated revenue source at the time the appropriation was established.

BUDGET RESOLUTION

BE IT FURTHER RESOLVED that the City-Wide Workforce Summary and Salary Schedule included in the Fiscal Year 2024 Proposed Operating Budget document be adopted.

PASSED AND APPROVED this 13th day of June 2023, by the following vote:

APPROPRIATIONS LIMIT

RESOLUTION No. _____ (N.C.S.)

A RESOLUTION SETTING THE APPROPRIATIONS LIMIT FOR THE CITY OF SALINAS FOR FISCAL YEAR 2024

WHEREAS, Article XIII B of the California Constitution was amended by the passage of Proposition 111 at the June 5, 1990, Primary Election; and,

WHEREAS, each City must now select its change in the cost-of-living annually by a recorded vote of the City Council; and,

WHEREAS, each City must now select its change in population annually by a recorded vote of the City Council;

NOW THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF SALINAS that the Appropriations Limit for the City shall be changed based on:

1. The population within the County limits, and
2. The change in California cost of living.

BE IT FURTHER RESOLVED that the Appropriations Limit for the City of Salinas for Fiscal Year 2024 is hereby adopted at \$310,220,680 pursuant to Article XIII B of the California Constitution as amended by Proposition 111. The portion of the City's budget that is subject to the appropriation limit (the proceeds of taxes) totals \$165,429,500 and is well within the appropriations limit.

PASSED AND ADOPTED this 13th day of June 2023, by the following vote:

AYES: Councilmembers:

NOES: Councilmembers:

ABSENT:

ABSTAINED:

APPROVED:

Kimbley Craig, Mayor

ATTEST:

Patricia Barajas, City Clerk

10-YEAR BUDGET FORECAST

(from The Salinas Plan Refresh)

The budget forecast uses the City's recent budget history and current budget as the foundation for forecasting revenues and expenses over the next ten years. Budget forecasts are provided for the General Fund, Measure E Fund, and Measure G Fund. For purposes of this forecast, all General Government funds (General, Measure E, and Measure G) are presented with together. While tracked separately, Measure E and G revenues are General Fund¹ Revenues. Future years are projected based on the following:

- Known factors such as CalPERS normal cost percentage and unfunded actuarial liabilities;
- Specialized outside consultant forecast (HdL for property and sales tax revenues);
- Expected inflation (CPI) for operations/maintenance and medical costs; and,
- Negotiated pay raises in current labor agreements and expected increases over the next several years.

The budget forecast is a "living" document and does not attempt to predict the future, rather the forecast attempts to provide a range of potential budget outcomes that allows staff and the Council to form sound policy responses to future issues in a timely manner.

Results

The results of the Baseline forecast are shown in the graph on the following page. The Baseline forecast attempts to project the revenues and expenses for the City's Governmental Funds² to continue in a manner similar to recent budget history with no major changes in programs, funding sources, or the economy. Alternative forecasts to the Baseline are used to stress-test the Baseline forecast in its major revenue and expense drivers and to help policy makers understand coming risks to budget sustainability.

¹ Measure E and G revenues were approved by the voters as general-purpose revenues. There are no restrictions in use of these sales and transaction taxes. Together, the General Fund, Measure E Fund, and Measure G Fund are referred to as "General Government" funds.

² The general funds include: The General Fund, Measure E Fund, and Measure G Fund. While the City tracks Measure E and Measure G separately, these revenues were adopted as general fund revenues and, therefore, are not restricted revenues.

10-YEAR BUDGET FORECAST

(from The Salinas Plan Refresh)

Based on the current budget and assumptions for future growth, the City should expect positive net revenue^{3,4} through FY 29. The first three years of this net revenue are small and subject to changing revenue and expense conditions.

The big drop in net revenue in FY 30 is based on the sunset of Measure G. The negative net revenue assumes the loss of the revenue does not change the need for the Measure G-funded investments. If Measure G is not extended, the City will have a significant issue funding operations at current levels.

Revenues

The graph at the end of this section provides an overview of growth rate changes in the Baseline forecast. The graph shows the actual growth in major revenue categories from FY 17 to FY 23 and for the FY 24 to FY 32 forecast. For Measure G, the growth rate is shown for FY 24 through FY 29 (pre-sunset) and FY 24 to FY 32 (assuming Measure G sunsets).

Overall, the forecast assumes the next ten years' revenue growth will slow compared to the last five years. This is due to expected slowing sales tax growth and stabilization of cannabis revenues. If Measure G sunsets, the total revenue growth for the ten-year forecast will be negative.

Areas where revenues show recovery from the pandemic are in transfers and charges for service. Both of these revenue sources were cut back in the last five years but are expected to return to historical growth levels going forward. The baseline budget forecast is based on a set of assumptions that include current revenue trends, expected growth by outside experts (e.g., HdL⁵ for sales and property tax growth), and actual data where known. Most of the City's General Government revenues come from taxes (86%), franchise fees (6%), and charges for service (3%), as shown on the pie chart on the right.

As previously noted, taxes are dominated by sales taxes – including Measures E and G – and subject to volatility. HdL, the City's sales tax consultant, expects a slight reduction in sales

taxes in FY 24 and slow growth thereafter for the next four years. This impacts total revenue growth for the City in the forecast period.

Growth in revenues is shown in the following chart for the six years from FY 17 to FY 23 and for the budget forecast from FY 23 through FY 32. This chart also provides the difference in tax growth from FY 23 through

³ Net Revenue is defined as total revenue less total expenses.

⁴ A major driver of the increasing net revenue is a reduction in General Government transfers to capital improvement projects.

⁵ HdL is a third-party consultant for the City that audits sales and property taxes and provide 5-year forecasts for each of these revenue sources.

10-YEAR BUDGET FORECAST

(from The Salinas Plan Refresh)

FY 29 to include Measure G through its last full year of collection. Based on the current Measure G approval, this sales tax will sunset on April 1, 2030. This will result in the loss of a projected \$38 million in revenue starting in FY 30.

The forecast assumes a slowing in the taxes from 3.3 percent per year compound annual growth rate (CAGR) through FY 23 to a 2.5 percent CAGR through FY 29. If Measure G is not extended, total taxes will drop below current tax levels by nearly \$35 million in FY 30.

Additionally, Cannabis Business License fee and tax revenues began in FY 18. This drove growth through FY 23, but these revenues have evened out and will grow with inflation.

Overall, future revenue growth is expected to be 2.6 percent per year – assuming the extension of Measure G – down from the recent 3.7 percent CAGR of the past six years. The forecast is a realistic assessment of future revenues for the City to make current policy decisions. Under this forecast, increases in revenues can be used to pay for long-term unfunded liabilities, while revenue reductions are not likely to result in major impacts to services that could be extended is a rosier future is assumed.

Expenses

While revenue growth is expected to slow, expense growth is as well. Total Governmental Funds expenses are projected at \$165.5 million in FY 23. The major expense is for personnel costs – salaries, overtime, and benefits – at 64 percent of total General Government costs.

10-YEAR BUDGET FORECAST

(from The Salinas Plan Refresh)

Transfers are the second highest cost category at 19 percent. Transfers are primarily for capital projects, debt repayment, and general liability. Transfers are also used to support the storm drainage system (\$2.6 million) and EMS services (\$1.5 million).

Outside services is the third largest category at 12 percent of total expenses. This category covers several activities, the largest being the 911 system, outside maintenance contracts, and software system contracts.

Combined, these three expense categories comprise 95 percent of the City's General Governmental expenses.

In terms of the model, total expenses are expected to slow to a level that is consistent with long-term inflationary growth. Salaries are expected to grow between 3 to 3.5 percent over the next five years and then fall back to 2.0 percent growth for the last five years of the forecast. Benefits had outsized growth recently due to changes in the CalPERS pension-cost methodology but are moderating as a greater percentage of the workforce is under the PEPR⁶ rules. CalPERS investment losses in the year ending June 2022 will likely increase pension costs by \$1 million per year starting in FY 24.

Outside service increased over the last five years primarily in recreation services, elections, and a variety of other services.

⁶ PEPR^A = Public Employees' Pension Reform Act

10-YEAR BUDGET FORECAST

(from The Salinas Plan Refresh)

Budget Risks

The Baseline forecast is constructed on a moderately conservative set of assumptions – neither optimistic nor pessimistic. It includes recent growth in property and sales taxes; however, it does not assume the same pace of growth as during the pandemic. In any forecast, there are budget risks that cannot be fully captured. The following are among the major areas of identified budget risks still present in the Baseline that could impact the ten-year forecast.

Economically Sensitive Revenues

- The recent pandemic and talk of a “coming recession” have made the economic issues prescient in our day-to-day thinking about the economy. We know that what we have today can change. For the City, the reliance on sales taxes in General Government revenues heightens the City’s exposure to economic changes.

Sunset of Measure G

- The Measure G sales tax measure was approved to be in place for fifteen years and will run through March of 2030. If not extended by the voters, the sunset of the sales tax will have significant impacts on the City’s General Government revenues. Therefore, budget-balancing measures will be necessary to adjust for a loss in this revenue.

Workforce

- Any negotiated wage increases would have a significant impact on the cost of services. Each one-percent increase in wages for all employees would result in additional general fund costs of \$600,000 to \$800,000 per year.
- Healthcare inflation could surpass the projected levels of 5.0 percent cost growth.
- Actual pension investment returns and overall plan experience will impact state mandated required contributions and increase the City’s pension costs beyond the amounts assumed in the Baseline projection.
- Binding arbitration for the Fire union continues to be ultimately controlled by an outside arbitrator rather than the City Council. This makes future cost increases for Fire Department personnel difficult to project. Because this was adopted through an initiative process by the voters of Salinas, binding interest arbitration rights can only be addressed through a new initiative (not initiated by the City).

Other Expenditures

- New service demands and costs could be generated by infrastructure failure and/or unforeseen factors. For example, some City facilities require maintenance and repair, including remediation and safety upgrades.
- Transfers and advances to other proprietary funds (Stormwater, Parking District, and Golf Course Funds) are based on the amount required to balance these funds in the baseline projection. Additional costs to support these efforts will decrease net revenue available for other needs.

10-YEAR BUDGET FORECAST

(from The Salinas Plan Refresh)

Alternative Forecasts

As indicated above, the Baseline forecast is one view of the City's fiscal future based on a set of assumptions. However, there are many things that can impact the City's budget future. The following three forecast alternatives provide different views of the budget forecast based on some key changes in assumptions. These forecasts are provided as samples of how the forecast model can be modified and stressed to prepare for different policy choices or economic changes. (Note: the alternatives show total Government Funds with no differentiation between the general funds.)

Alternative Forecast No. 1

Extend Measure G and Carefully Increase Salaries. This alternative assumes Measure G is extended by the voters prior to its 2030 sunset and a one percent per year increase in salaries and related costs (e.g., pensions)⁷. The result of this adjustment in assumptions shows the General Fund would be slightly negative in FY 25 with increasing positive net revenue thereafter.

Alternative Forecast No. 2

Extend Measure G, Carefully Increase Salaries, and Fund Capital. The second alternative adds to Alternative Forecast No. 1 by increasing City investment in capital projects to 10 percent of total annual revenues. This is calculated by adding the difference between assumed capital funding in the Baseline forecast and the calculated ten percent revenue. Assuming this increase in funding for capital, the City's total General Government expenses would exceed revenues for the next several years. This indicates that while the City appears to have a sustainable budget in the Baseline forecast, it cannot sustain new investment at low levels compared to demonstrated investment needs under Baseline revenue projections.

⁷ Salaries increase includes both wage increases and increases to total staffing.

10-YEAR BUDGET FORECAST

(from The Salinas Plan Refresh)

Alternative Forecast No. 3

Measure G, Salaries, Capital Investment, & Tax Increases. The City's budget – especially revenues – is dynamic and subject to both external and internal factors. If sales and property taxes grow one percent per year beyond the Baseline Forecast, the City will grow the capacity to fund the Forecast Alternatives No. 1 and No. 2 assumptions over the next three to four years.

Conclusion

The City needs to continue monitoring its revenue and expense forecast to guide Council on making sound policy decisions on a year-to-year basis. The forecast should provide perspective on the entire range of needs before the City in the coming years.

AMERICAN RESCUE PLAN ACT

On March 11, 2021, President Biden signed the American Rescue Plan Act, which provided the City with \$51,567,313 in relief funds. The City received the first half of these funds in May 2021 and the second half in June 2022. Per Council approval, staff has allocated the entire funding as shown below:

3911	American Rescue Plan Act (ARPA) Fund	
Public Facilities		
3911.45	Fire	
3911.45.9235	Fire Station Renovations	1,500,000
3911.45.9541	Fire Station Repairs	1,400,000
	Total - Public Works	2,900,000
3911.50	Public Works	
3911.50.8170	Adaptations to City Hall	5,002,313
	Total - Public Works	5,002,313
3911.55	Recreation	
3911.55.9165	Hebbron Family Center	1,500,000
3911.55.9311	Firehouse Rec Center	100,000
3911.55.8171	Playground Structures, Park Benches, Grills	2,000,000
	Total - Recreation	3,600,000
Total - Public Facilities		11,502,313

AMERICAN RESCUE PLAN ACT

Public Infrastructure

3911.50	Public Works	
3911.50.9720	Sidewalk Repairs	6,000,000
3911.50.8180	Street Repair / Traffic Safety	6,000,000
	Total - Public Works	12,000,000

Total - Public Infrastructure	12,000,000
--------------------------------------	-------------------

Water & Sewer

3911.50	Public Works	
3911.50.8190	Sewer System Work	4,620,000
3911.50.9727	Gabilan Creek Silt Removal	500,000
3911.50.9086	Natividad Creek Silt Removal	1,545,000
3911.50.9293	Storm Water Master Plan	800,000
3911.50.8192	Stormwater Green Infrastructure	3,000,000
	Total - Public Works	10,465,000

3911.55	Recreation	
3911.55.8191	Park Irrigation Upgrades	5,000,000

FINANCIAL POLICIES

Adopted by the Salinas City Council on December 10, 1991, Resolution Number 14343 (N.C.S.) and amended on June 21, 1994, Resolution Number 15193 (N.C.S.). The Financial Policies shall be reviewed at least annually and updated as necessary.

The following policies have been established to ensure the City's assets are safeguarded, financial statements are in conformity with generally accepted accounting principles, and finances are managed with responsible stewardship.

I. ACCOUNTING POLICIES

A. Accounting Standards

1. The City's accounting systems and procedures will comply with Generally Accepted Accounting Principles (GAAP) and standards promulgated by the Financial Accounting Standards Board (FASB) and the Governmental Accounting Standards Board (GASB) to the extent necessary to achieve an unqualified audit opinion and adequate internal controls.
2. The City will prepare regular monthly, a mid-year, and an annual financial report to present a summary of financial performance and position.
3. The City will provide full disclosure in the annual financial report and debt representations.
4. The City's budgetary system will be integrated and compatible with the accounting system and the City's budget will be prepared on a basis in conformance with Generally Accepted Accounting Principles (GAAP).
5. For the purposes of measuring the net pension liability and deferred outflows/inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the City of Salinas' California Public employees' Retirement System (CalPERS) plans (Plans) and additions to/deductions from the Plan's fiduciary net position have been determined on the same basis as they are reported by CalPERS. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefits terms. Investments are reported at fair value.

II. RESERVE POLICIES

The purpose of this policy is to ensure the City is able to withstand financial emergencies, such as those which may result from natural disasters, revenue shortfalls, or unanticipated expenditures of a non-recurring nature, and to accumulate funds for large-scale purchases.

The City will endeavor to accumulate and maintain reserves in the categories and at the minimum target levels described below.

For the purposes of this policy, the following definitions shall apply.

- "General funds" in the plural, lower case form shall mean, collectively, the General Fund, Measure E Fund, and Measure G Fund.
- "Operating expenditures and non-capital transfers" shall be defined as all expenditures and transfers to other funds, except those of a capital nature and/or intended to fund those of a capital nature.

- A. **GENERAL FUNDS UNASSIGNED FUND BALANCES:** an amount in each of the general funds equal to twelve percent (12%) of a single year's budgeted operating expenditures and non-capital transfers of the respective funds. The unassigned fund balances of the general funds are determined annually as part of the preparation of the City's financial statements.

FINANCIAL POLICIES

Amounts in excess of the minimum target level may be used to increase or replenish other reserves with priority given to the General Funds Economic Contingency, General Fund Facilities Maintenance, and General Funds Infrastructure Reserves; to set aside resources for specific one-time uses; as a funding source for one-time expenditures included in the annual budget; or for needs that arise subsequent to budget adoption.

- B. **GENERAL FUNDS ECONOMIC CONTINGENCY RESERVES:** an amount in each of the general funds equal to twelve percent (12%) of a single year's budgeted operating expenditures and non-capital transfers of the respective funds. These reserves are intended to be used only in the event of a catastrophic event or significant downturn in the economy that cannot be mitigated with other funding sources. Formal City Council action is required to increase the balances of these reserves or to authorize the use of any portions thereof.
- C. **GENERAL FUND FACILITIES MAINTENANCE RESERVE:** an amount equal to three times the annual amount(s) appropriated in the General Fund for the performance of major maintenance and repairs upon the City's building assets. For the purposes of this policy, "building assets" shall be defined as all permanent or non-permanent structures constructed or installed to provide a workplace for City employees or to house City assets and/or operations. This reserve is to be used for extraordinary emergency maintenance and repair costs that cannot be met with the annual appropriated amount and for which no other funding source is immediately available. Formal City Council action is required to increase the balance of this reserve or to authorize the use of any portion thereof.
- D. **GENERAL FUNDS INFRASTRUCTURE MAINTENANCE RESERVES:** an amount in each of the general funds equal to five times the annual amount(s) appropriated in the respective funds for the performance of major maintenance and repairs upon the City's infrastructure assets. For the purposes of this policy, "infrastructure assets" shall be defined as the basic permanent physical systems of the City necessary for the transportation of people; generation, storage, or transmission of power; or transmission of communications, exclusive of the other assets defined in the Reserve Policies. This reserve is to be used for extraordinary emergency maintenance and repair costs that cannot be met with the annual appropriated amount and for which no other funding source is immediately available. Formal City Council action is required to increase the balances of these reserves or to authorize the use of any portions thereof.
- E. **VEHICLE REPLACEMENT RESERVE:** an amount equal to between the accumulated depreciation and estimated replacement value of the vehicle assets accounted for in the Vehicle Replacement Fund (an internal service fund). For the purposes of this policy, "vehicle" shall be defined as a self-propelled vehicle with propulsion provided by an engine or motor which must be operated by one or more persons to perform the function(s) for which it is designed, or an apparatus specifically designed to be attached to and/or towed by a self-propelled vehicle for transportation.
- F. **WORKERS' COMPENSATION SELF-INSURANCE RESERVE:** assets in the Workers' Compensation Self-Insurance Fund equal to the net present value of estimated outstanding Workers' Compensation Program claim losses at the eighty percent (80%) confidence level of adequacy as calculated by the City's actuary.
- G. **GENERAL LIABILITY SELF-INSURANCE RESERVE:** assets in the General Liability Self-Insurance Fund equal to the net present value of estimated outstanding Liability Program claim losses at the eighty percent (80%) confidence level of adequacy as calculated by the City's actuary.
- H. **IRREVOCABLE SUPPLEMENTAL PENSION TRUST RESERVE:** an amount equal to the total net liability of the City's pension plans. The assets of this reserve shall be held in an irrevocable Section 115 pension trust and may be used only for payment of pension-related costs upon direction of the City Council. The balance of this reserve shall not be subject to the

FINANCIAL POLICIES

“Replenishment of Reserves” guidelines, and formal City Council action is required to increase the balance of this reserve or to authorize the use of any portion thereof.

- I. **OTHER POST-EMPLOYMENT BENEFITS RESERVE:** an amount equal to the total net liability of the City's other post-employment benefits (OPEB) plans. The assets of this reserve may be used only for payment of OPEB-related costs upon direction of the City Council. The balance of this reserve shall not be subject to the “Replenishment of Reserves” guidelines, and formal City Council action is required to increase the balance of this reserve or to authorize the use of any portion thereof.
- J. **DEBT SERVICE RESERVES:** in each fund from which debt service is paid, the greater of an amount equal to the total reserves required by the applicable debt indentures or one year's debt service requirement of all long-term City obligations, excluding inter-fund loans. The balances of these reserves may be augmented by proceeds of debt if permitted by the corresponding debt indentures.
- K. The City will endeavor to maintain reserves in the Enterprise Funds equal to twenty-five percent of the budgets.
 - 1. The City will endeavor to maintain a reserve in the Sewer Enterprise Fund equal to the larger of twenty-five percent of debt service on the 1998 Sewer System Revenue Bonds or twenty-five percent of the sewer operating budget. This reserve will be in addition to the debt service reserve required in the bond documents.
- L. Airport Enterprise Fund Reserves
 - 1. The Airport will endeavor to maintain an Operating Reserve equal to 25% of its operating expenditures.
 - 2. The Airport will endeavor to maintain a Capital Reserve equal to the proceeds from the sale of surplus airport property to a real estate developer, Cabot, Cabot & Forbes (CC&F). It is imperative that the Airport maintains this Working Capital Fund because FAA grants operate on a reimbursement basis. In addition, this fund should only be designated for unbudgeted, unplanned and unforeseen capital improvement related contingencies.
- M. The City will endeavor to maintain reserves in the Maintenance Districts equal to fifty percent of the budgets.
- N. Reserve requirements and balances will be reviewed annually and may be adjusted, as necessary to meet specifically identified future expenditures requiring the accumulation of funds.
- O. Available General Fund, Measure E Fund, and Measure G Fund year-end balances shall be allocated to reserves, as applicable, until all minimum target reserve levels are achieved.

Replenishment of Reserves

If a reserve balance falls below its minimum target level, the City shall strive to restore it to the minimum target level through budgetary or other means. Unless otherwise noted in this policy, the following guidelines will be used to restore a reserve.

- If a reserve is drawn down to 75-99% of its minimum target level, it shall be restored to 100% over a 1- to 3-year period.
- If a reserve is drawn down to 50-74% of its minimum target level, it shall be restored to 100% over a 3- to 5-year period.
- If a reserve is drawn down below 50% of its minimum target level, it shall be restored to 100% over a 5- to 7-year period.

FINANCIAL POLICIES

These guidelines may be suspended, in whole or part, if financial or economic circumstances are determined by the City Manager to prevent meeting any or all of the timelines.

III. ADMINISTRATIVE FEES POLICIES

- A. An administrative fee for the provision of administration and/or policy direction shall be charged by the City to the following activities.
 - 1. Successor Agency
 - 2. All enterprise operations
 - 3. All maintenance districts
 - 4. Community Development Block Grant Program
 - 5. The Six-Year Capital Improvement Program
 - 6. Billings for City Services
- B. The administrative fee charged by the City shall be based on the actual expenditures of the various activities and shall be recorded twice a year (December and June) of each year or during the closeout of each completed Capital Improvement Project.
- C. The administrative fee charged to individual multi-year projects in the Capital Improvement Program shall not exceed \$50,000 annually.
- D. The administrative fee shall be expressed as a percentage. The fee shall be reviewed and adjusted, as appropriate, on an annual basis during the budget approval process.

IV. REVENUE POLICIES

- A. Maintenance of Revenues
 - 1. The City will attempt to maintain a diversified and stable revenue base to shelter it from short-term fluctuations in any one revenue source.
 - 2. The City will promote growth in its revenue base through economic development programs, which maintain and enhance a vigorous local economy.
 - 3. The City will seek to supplement its revenue base, through the identification and application for State and Federal grant funds which will support identified needs.
 - 4. One-time revenues shall be applied to one-time expenditures.
- B. User Fees and Rates
 - 1. The City will recover the costs of services providing a benefit to users through the imposition of user fees and charges.
 - 2. The City will establish all user fees and charges at a level related to the direct and indirect costs of providing services and the degree of public versus private benefit.
 - 3. The City will biennially recalculate the full costs of activities supported by user fees and rates to identify the impact of inflation and other cost increases.
 - 4. The City will set user fees and rates for each enterprise fund (e.g. airport, golf courses, landfill, industrial waste), at a level which fully supports the total direct, indirect, and capital costs of the activity.

FINANCIAL POLICIES

C. Revenue Collection

1. The City will take all cost-effective actions available to collect revenues.
2. The City will grant use fee waivers and/or debt forgiveness only under the following conditions:
 - a. All requests will be approved or disapproved by Council on a case-by-case basis.
 - b. Each request will be individually considered, and Council action will be by resolution.
3. The City will not grant development and permit fee waivers.

D. Interest Earnings

1. The City will assign interest earnings to the General Fund unless specifically prohibited by State or Federal laws or by other regulations, covenants or agreements, with the exception that the City will assign interest earned by enterprise funds to those funds.
1. Investment policies shall be reviewed annually by the City Council.

V. BUDGET POLICIES

A. Budget Format

1. The budget shall provide a complete financial plan of all City funds, agencies and activities for the ensuing fiscal year and shall be in such form as the City Manager deems desirable or that the Council may require.
2. The budget shall begin with a clear general summary of its contents; shall show in detail all estimated revenues of all City funds; all carry-over fund balances and reserves; and all proposed expenditures, including debt service, for the ensuing fiscal year.
3. The total of proposed expenditures shall not exceed the total of estimated revenues plus the unappropriated fund balance, exclusive of reserves, for any fund.
4. The budget will be organized on a program/service level format.
5. The budget development process will include the identification and evaluation of policy options for increasing and decreasing service levels.
6. A two-year budget may be substituted for the required annual budget, in which case the budget shall be prepared and presented in two annual increments.

B. Estimated Revenues

1. The City will annually update its revenue forecast to enhance the budgetary decision-making process.
2. In its budget projections, the City will attempt to match current expense to current revenue. If it becomes apparent that revenue shortfalls will create a deficit, efforts will be made first to reduce the deficiency through budgetary reductions.
3. If appropriate reductions are insufficient, the Council may decide, on an exception basis, to use an appropriate existing reserve, which is in excess of minimum reserve requirements.

C. Appropriations

1. In evaluating the level of appropriations for program enhancements, or reductions, the City will apply the following principles in the priority order given:

FINANCIAL POLICIES

- a. Essential services, which provide for the health and safety of residents, including but not limited to police, fire, street maintenance, and sewer and storm drainage will be funded to maintain current dollar levels.
 - b. An amount or amounts equal to a total of not less than one percent (1%) of General Fund operating revenues will be appropriated in the General Fund annually for the performance of major maintenance and repairs upon the City's building assets, as defined in Section II.C of the Financial Policies. Projects funded by these appropriations will be prioritized using a tiered system with health- and safety-related repairs and/or maintenance assigned the highest priority.
 - c. An amount or amounts equal to a total of not less than one percent (1%) of General Fund, Measure E Fund, and Measure G Fund operating revenues will be appropriated in the General Fund, Measure E Fund, and/or Measure G Fund for the performance of major maintenance and repairs upon the City's infrastructure assets, as defined in Section II.D of these Financial Policies. Projects funded by these appropriations will be prioritized using a tiered system with public health- and safety-related repairs and/or maintenance assigned the highest priority, followed by those determined to be most urgent on the bases of industry indices used, as applicable, for rating the conditions of assets.
 - d. Appropriations for program enhancements or reductions will be evaluated on a case-by-case basis rather than across the board.
 - e. When reductions in personnel are necessary to reduce expenditures, they shall be consistent with the City Council's established service level priorities and, when possible, shall be accomplished through normal attrition.
 - f. Programs, which are self-supported by special revenues or fees, shall be separately evaluated.
2. Prior to the City Council making any supplemental appropriation, the City Manager or Finance Director shall certify that funds in excess of those estimated in the budget are available for appropriation. Any such supplemental appropriations shall be made for the fiscal year by Council action up to the amount of any excess.
3. Appropriations may be reduced any time during the fiscal year by the City Council upon recommendation of the City Manager. When appropriation reductions are recommended, the City Manager shall provide specific recommendations to the Council, indicating the estimated amount of the reduction, any remedial actions taken, and recommendations as to any other steps to be taken.
4. The City Manager may transfer appropriations between departments and Department Directors may transfer appropriations between programs and accounts within their individual departments and divisions, but only the Council by minute-order may appropriate funds from reserves or fund balances.
5. Only the City Manager may authorize the use of departmental salary budget savings.
6. All appropriations, except for Capital Improvement Program appropriations, shall lapse at the end of the fiscal year to the extent that they have not been expended or encumbered. An appropriation in the Capital Improvement Program shall continue in force until expended, revised, or cancelled.
7. The City will endeavor appropriate to a General Fund Non-Departmental operating contingency account an amount equal to one percent (1%) of the total General Fund operating budget to meet changing operational requirements during the fiscal year. The

FINANCIAL POLICIES

City Manager may authorize transfers from the contingency account, subject to purchasing limits.

VI. PURCHASING LIMITS

A. Professional Service Agreements

1. Exempt from competitive bidding.
2. Does not require Council approval if: a) contract cost is budgeted; and b) agreement is routine in nature.
3. Requires Council approval if agreement is over \$50,000 and service is a new initiative (non-routine).
4. Administrative Memo 05-01 delegates authority to Directors to execute professional service agreements under \$50,000 (subject to #2 above).
5. City Manager can execute professional service agreements in any amount (subject to #2 & #3 above).
6. The RFP/RFQ process is recommended if value/qualifications cannot be determined informally.

B. Supplies/Equipment Construction

1. Directors can approve supplies and equipment purchases under \$30,000 and construction projects under \$50,000 if funds are included within the appropriate departmental budget.
2. Equipment purchases over \$30,000 subject to bidding.
3. Construction projects over \$100,000 subject to bidding.
4. Exceptions are emergency equipment purchases using cooperative purchasing with other governmental agencies (i.e. State Bid List).
5. Direct purchases: Council can waive bidding requirements on equipment purchases. Example: equipment is unique, or equipment has been informally researched.

VII. PURCHASING – REQUIREMENTS FOR FEDERAL GRANTS

- A. This section shall apply to the awarding of sub-grants and contracts by the City stemming from federal grants to the City. This section shall have the same application on the awarding of sub-grants and contracts by the City stemming from state, county or other non-federal government entity grants originating as federal grants.
- B. Procurement Standards. (OMB Title 2 CFR, Subtitle A, Part 200, §200.318)
 1. The City shall maintain a contract administration system which ensures contractors perform in accordance with the terms, conditions and specifications of their contracts or purchase orders.
 2. The City shall maintain written standards of conduct covering conflicts of interest and governing the actions of its employees engaged in the selection, award and administration of contracts. No employee, officer or agent of the City shall participate in selection, or in the award or administration of a contract supported by federal funds if a conflict of interest, real or apparent, would be involved. Such a conflict would arise when:
 - a. The employee, officer or agent;

FINANCIAL POLICIES

- b. Any member of his or her immediate family;
 - c. His or her partner; or
 - d. An organization which employs, or is about to employ, any of the above, has a financial or other interest in or a tangible personal benefit from a firm considered for award.
3. The City's officers, employees or agents will neither solicit nor accept gratuities, favors or anything of monetary value from contractors, potential contractors, or parties to sub-agreements. Such a conflict will not arise where the financial interest is not substantial, or the gift is an unsolicited item of nominal intrinsic value. The City's standards of conduct provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the City.
 4. The City shall not enter into a contract with a non-Federal entity has a parent, affiliate, or subsidiary organization that is not a state, local government or Indian tribe, unless the non-Federal entity maintains written standards of conduct covering organizational conflicts of interest. Organizational conflicts of interest mean due to relationships with a parent company, affiliate, or subsidiary organization, the non-Federal entity is unable or appears to be unable to be impartial in conducting a procurement action involving a related organization.
 5. The City shall avoid acquisition of unnecessary or duplicative items. Consideration will be given to consolidating or breaking out procurements to obtain a more economic purchase. Where appropriate, an analysis will be made of lease versus purchase alternatives, and any other appropriate analysis to determine the most economical approach.
 6. The City shall consider entering into state and local intergovernmental agreements or inter-entity agreements where appropriate for procurement or use of common or shared goods and services.
 7. The City shall consider using Federal excess and surplus property in lieu of purchasing new equipment and property whenever such use is feasible and reduces project costs.
 8. The City shall consider using value engineering clauses in contracts for construction projects of sufficient size to offer reasonable opportunities for cost reductions. Value engineering is a systematic and creative analysis of each contract item or task to ensure its essential function is provided at the overall lower cost.
 9. The City shall make awards only to responsible contractors possessing the ability to perform successfully under the terms and conditions of a proposed procurement. Consideration will be given to such matters as contractor integrity, compliance with public policy, record of past performance and financial and technical resources. Check [sam.gov](https://www.sam.gov) for vendor debarment or suspension.
 10. The City shall maintain records sufficient to detail the history of procurement. These records will include but are not necessarily limited to the following: rationale for the method of procurement, selection of contract type, contractor selection or rejection and the basis for the contract price.
 11. The City shall use time and material type contracts only:
 - a. After a determination is made that no other contract is suitable; and
 - b. If the contract includes a ceiling price the contractor exceeds at their own risk.
 12. The City alone shall be responsible, in accordance with good administrative practice and sound business judgment, for the settlement of all contractual and administrative issues arising out of procurements. These issues include, but are not limited to, source evaluation,

FINANCIAL POLICIES

protests, disputes and claims. These standards do not relieve the City of any contractual responsibilities under its contracts.

C. Competition. (OMB Title 2 CFR, Subtitle A, Part 200, §200.319)

1. The City will conduct procurement transactions in a manner providing full and open competition. To ensure objective contractor performance and eliminate unfair competitive advantage, contractors developing or drafting specifications, requirements, statements of work, or invitations for bids or requests for proposals shall be excluded from competing for such procurements.
2. The City shall conduct procurements in a manner prohibiting the use of statutorily or administratively imposed in-state or local geographical preferences in the evaluation of bids or proposals, except in those cases where applicable Federal statutes expressly mandate or encourage geographic preference. When contracting for architectural and engineering (A/E) services, geographic location may be a selection criteria provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.
3. The City shall have written procedures for procurement transactions. These procedures will ensure that all solicitations:
 - a. Incorporate a clear and accurate description of the technical requirements for the material, product or service to be procured. Such description shall not, in competitive procurements, contain features which unduly restrict competition. The description may include a statement of the qualitative nature of the material, product or service to be procured, and when necessary, shall set forth those minimum essential characteristics and standards to which it must conform if it is to satisfy its intended use. Detailed product specifications should be avoided. When it is impractical or uneconomical to make a clear and accurate description of the technical requirements, a brand name or equal description may be used to define the performance or other salient requirements of procurement. The specific features of the named brand which must be met by offerors shall be clearly stated; and
 - b. Identify all requirements which the offerors must fulfill and all other factors to be used in evaluating bids or proposals.
4. The City shall ensure prequalified lists of persons, firms or products that are used in acquiring goods and services are current and include enough qualified sources to ensure maximum open and free competition. The City shall not preclude potential bidders from qualifying during the solicitation period.

D. Methods of Procurement to be Followed. The City shall use one of the following methods of procurement (OMB Title 2 CFR, Subtitle A, Part 200, §200.320):

1. Procurement by Micro-Purchases. Procurement by micro-purchase is the acquisition of supplies or services, the aggregate dollar amount of which does not exceed the micro-purchase threshold as set by the Federal Acquisition Regulation at 48 CFR Subpart 2.1 (Definitions) and adjusted periodically for inflation. As of the date of this ordinance, the micro-purchase threshold is \$3,500.
2. Procurement by Small Purchase Procedures. Small purchase procedures are those relatively simple and informal procurement methods for securing services, supplies or other property that do not cost more than the simplified acquisition threshold as set by the Federal Acquisition Regulation at 48 CFR Subpart 2.1 (Definitions) and in accordance with 41 U.S.C. 1908 and periodically adjusted for inflation. If small purchase procedures are used, price or rate quotations shall be obtained from an adequate number of qualified

FINANCIAL POLICIES

sources. As of the date of this ordinance, the simplified acquisition threshold is \$150,000. For purchases exceeding fifty thousand (\$50,000), City Council approval is required.

3. Procurement by Sealed Bids (Formal Advertising). Bids are publicly solicited and a firm-fixed-price contract (lump sum or unit price) is awarded to the responsible bidder whose bid, conforming to all the material terms and conditions of the invitation for bids, is the lowest in price.
 - a. For sealed bidding to be feasible, the following conditions should be present:
 - (1) A complete, adequate, and realistic specification or purchase description is available;
 - (2) Two or more responsible bidders are willing and able to compete effectively for the business; and
 - (3) The procurement lends itself to a firm-fixed-price contract and the selection of the successful bidder can be made principally based on price.
 - b. If sealed bids are used, the following requirements apply:
 - (1) The invitation for bids will be publicly advertised and bids shall be solicited from an adequate number of known suppliers, providing them sufficient time prior to the date set for opening the bids;
 - (2) The invitation for bids, which will include any specifications and pertinent attachments, shall define the items or services for the bidder to properly respond;
 - (3) All bids will be publicly opened at the time and place prescribed in the invitation for bids;
 - (4) A firm-fixed-price contract award will be made in writing to the lowest responsive and responsible bidder. Where specified in bidding documents, factors such as discounts, transportation cost and life cycle costs shall be considered in determining which bid is lowest. Payment discounts will only be used to determine the low bid when prior experience indicates that such discounts are usually taken advantage of; and
 - (5) If there is a sound documented reason, any or all bids may be rejected.
4. Procurement by Competitive Proposals. The technique of competitive proposals is normally conducted with more than one source submitting an offer, and either a fixed-price or cost-reimbursement type contract is awarded. It is generally used when conditions are not appropriate for the use of sealed bids. If this method is used, the following requirements apply:
 - a. Requests for proposals shall be publicized and identify all evaluation factors including relative importance. Any response to publicized requests for proposals shall be honored to the maximum extent practical;
 - b. Proposals will be solicited from an adequate number of qualified sources;
 - c. The City shall conduct technical evaluations of the proposal received and for selecting awardees;
 - d. Awards will be made to the responsible firm whose proposal is most advantageous to the program, with price and other factors considered; and
 - e. The City may use competitive proposal procedures for qualifications-based procurement of architectural/engineering (A/E) professional services whereby competitors' qualifications are evaluated and the most qualified competitor is selected,

FINANCIAL POLICIES

subject to negotiation of fair and reasonable compensation. The method, where price is not used as a selection factor, can only be used in procurement of A/E professional services. It cannot be used to purchase other types of services though A/E firms are a potential source to perform the proposed effort.

5. Procurement by noncompetitive proposals is procurement through solicitation of a proposal from only one source and may be used only when one or more of the following circumstances applies:
 - a. The item is available only from a single source;
 - b. The public exigency or emergency for the requirement will not permit a delay resulting from competitive solicitation;
 - c. The Federal awarding agency or pass-through entity expressly authorizes noncompetitive proposals in a written request from the City; or
 - d. After solicitation of multiple sources, competition is determined inadequate.
6. Contracting with Small and Minority Businesses, Women's Business Enterprises and Labor Surplus Area Firms. (OMB Title 2 CFR, Subtitle A, Part 200, §200.321)
 - a. The City shall take all necessary affirmative steps to assure that minority businesses, women's business enterprises and labor surplus area firms are used when possible.
 - b. Affirmative steps include:
 - (1) Placing qualified small and minority businesses and women's business enterprises on solicitation lists;
 - (2) Assuring that small and minority businesses and women's business enterprises are solicited whenever they are potential sources;
 - (3) Dividing total requirements, when economically feasible, into smaller tasks or quantities to permit maximum participation by small and minority businesses and women's business enterprises;
 - (4) Establishing delivery schedules, where the requirement permits, which encourage participation by small and minority businesses and women's business enterprises;
 - (5) Using the services and assistance, as appropriate, of such organizations as the Small Business Administration and the Minority Business Development Agency of the Department of Commerce; and
 - (6) Requiring the prime contractor, if subcontracts are to be let, to take the affirmative steps listed in subsections 6.b.(1) through (6) of this section.
7. Contracts Cost and Price. (OMB Title 2 CFR, Subtitle A, Part 200, §200.323)
 - a. The City shall perform a cost or price analysis in every procurement action exceeding the simplified acquisition threshold including contract modifications. The method and degree of analysis will be dependent on the facts surrounding each procurement situation. As a starting point, the City shall make independent estimates before receiving bids or proposals.
 - b. The City shall negotiate profit as a separate element of the price for each contract in which there is no price competition and in all cases where cost analysis is performed. To establish a fair and reasonable profit, consideration shall be given to the complexity of the work to be performed, the risk borne by the contractor, the contractor's investment, the amount of subcontracting, the quality of its record of past performance, and industry profit rates in the surrounding geographical area for similar work.

FINANCIAL POLICIES

- c. Costs or prices based on estimated costs for contracts under the Federal award will be allowable only to the extent that costs incurred or cost estimates included in negotiated prices would be allowable for the City under Subpart E – Cost Principles of Title 2, Subtitle A, Part 200 (Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards).
 - d. The cost plus a percentage of cost and percentage of construction cost methods of contracting shall not be used.
- 8. Federal Awarding Agency or Pass-Through Entity Review. (OMB Title 2 CFR, Subtitle A, Part 200, §200.324)
 - a. The City shall make available, upon request of the Federal awarding agency or pass-through entity, technical specifications on proposed procurements where the Federal awarding agency or pass-through entity believes such review is needed to ensure that the item or service specified is the one being proposed for purchase.
 - b. The City shall make available upon request, for the Federal awarding agency or pass-through entity pre-procurement review, procurement documents, such as requests for proposal or invitations for bids, or independent cost estimates when:
 - (1) The City's procurement procedures or operation fails to comply with the procurement standards of Title 2, Subtitle A, Part 200, Subsection 200.324;
 - (2) The procurement is expected to exceed the simplified acquisition threshold and is to be awarded without competition or only one bid or offer is received in response to a solicitation;
 - (3) The procurement, which is expected to exceed the simplified acquisition threshold, specifies a "brand name" product;
 - (4) The proposed contract is more than the simplified acquisition threshold and is to be awarded to other than the apparent low bidder under a sealed bid procurement; or
 - (5) A proposed modification changes the scope of a contract or increases the contract amount by more than the simplified acquisition threshold.
 - c. The City may be exempted from the pre-procurement review in subsection 8.b. above if the Federal awarding agency or pass-through entity determines that its procurement systems comply with the standards set forth in Title 2, Subtitle A, Part 200, or the City self-certifies compliance with such standards if self-certification is permitted by the Federal awarding agency or pass-through entity.
- 9. Bonding Requirements. (OMB Title 2 CFR, Subtitle A, Part 200, §200.325) For public projects, the City shall require bid guarantees, performance bonds, and payment bonds consistent with Title 2, Part 200, Section 200.325 of the Code of Federal Regulations.
- 10. Contract Provisions. (OMB Title 2 CFR, Subtitle A, Part 200, §200.326) The City's contracts shall contain the provisions in Appendix II to Title 2, Subtitle A, Part 200 – Contract Provisions for non-Federal Entity Contracts Under Federal Awards, as applicable.

VIII. CAPITAL IMPROVEMENT PROGRAM POLICIES

A. Capital Planning Period

- 1. The City will budget all capital improvements in accordance with an adopted Capital Improvement Program.

FINANCIAL POLICIES

2. The City's long-range capital planning period shall be a minimum of six years or longer where appropriate.
 3. The Six-Year Capital Improvement Program will be reviewed and approved annually. It will include balanced budgets for the first year and a listing of all projects for the next five years. Appropriations will be approved annually.
 4. The City's annual Capital Improvement Program will be reviewed and preliminarily approved by Council in advance of reviewing/approving the City's Operating Budget.
 5. The City's Capital Improvement Program will be in conformance with and support the City's major planning documents: the General Plan, Project Specific Plans, and City-wide Master Plans for related infrastructure improvements.
 6. Master plans for major infrastructure and utility improvements will be prepared with a 10- or 20-year planning horizon when appropriate.
- B. Capital Project Priorities
1. The City will evaluate each proposed capital project against the following criteria:
 - a. Linkage with community needs as identified in the City's planning documents.
 - b. A cost/benefit analysis, identifying all economic or financial impacts of the project.
 - c. Identification of available, funding resources.
 2. The City will develop its capital improvement program with funding priorities in the following order:
 - a. Projects which maintain and preserve, existing facilities.
 - b. Projects which replace existing facilities that can no longer be maintained.
 - b. Projects which provide new and expanded services to the community.
- C. Capital Project Management
1. The City will fund and manage its capital projects in a phased approach. The project phases will become a framework for appropriate decision points and reporting. The phasing will consist of:
 - a. Conceptual/schematic proposal
 - b. Preliminary design and cost estimate
 - c. Engineering and final design
 - d. Bid administration
 - e. Acquisition/construction
 - f. Project closeout
 2. Each CIP project will have a project manager who will prepare the project proposal, ensure that required phases are completed on schedule, authorize all project expenditures, ensure that all regulations and laws are observed, periodically report project status and track project expenditures.

FINANCIAL POLICIES

IX. DEBT POLICIES

A. Use

1. This Debt Policy is intended to comply with Government Code Section 8855(i) and (k), effective on January 1, 2017, and shall govern all debt undertaken by the Issuer.

The City hereby recognizes that a fiscally prudent debt policy is required in order to:

- Maintain the Issuer's sound financial position.
- Ensure the Issuer has the flexibility to respond to changes in future service priorities, revenue levels, and operating expenses.
- Protect the City's credit-worthiness.
- Ensure that all debt is structured in order to protect both current and future taxpayers, ratepayers and constituents of the City.
- Ensure that the City's debt is consistent with the Issuer's planning goals and objectives and capital improvement program or budget, as applicable.

2. The issuance of long-term debt will be only for:

(i) Long-Term Debt. Long-term debt may be issued to finance the construction, acquisition, and rehabilitation of capital improvements and facilities, equipment and land to be owned and operated by the Issuer.

(a) Long-term debt financings are appropriate when the following conditions exist:

- When the project to be financed is necessary to provide basic services.
- When the project to be financed will provide benefit to constituents over multiple years.
- When total debt does not constitute an unreasonable burden to the Issuer and its taxpayers and ratepayers.
- When the debt is used to refinance outstanding debt in order to produce debt service savings or to realize the benefits of a debt restructuring.

(b) Long-term debt financings will not generally be considered appropriate for current operating expenses and routine maintenance expenses.

(c) The City may use long-term debt financings subject to the following conditions:

- The project to be financed must be approved by the City Council.
- The weighted average maturity of the debt (or the portion of the debt allocated to the project) will not exceed the average useful life of the project to be financed by more than 20%.
- The City estimates that sufficient revenues will be available to service the debt through its maturity.

FINANCIAL POLICIES

- The City determines that the issuance of the debt will comply with the applicable state and federal law.

(ii) Short-term debt. Short-term debt may be issued to provide financing for the City's operational cash flows in order to maintain a steady and even cash flow balance. Short-term debt may also be used to finance short-lived capital projects; for example, the Issuer may undertake lease-purchase financing for equipment.

(iii) Financings on Behalf of Other Entities. The City may also find it beneficial to issue debt on behalf of other governmental agencies or private third parties in order to further the public purposes of City. In such cases, the City shall take reasonable steps to confirm the financial feasibility of the project to be financed and the financial solvency of any borrower and that the issuance of such debt is consistent with the policies set forth herein.

B. Types of Debt

The following types of debt are allowable under this Debt Policy:

- general obligation bonds
- bond or grant anticipation notes
- lease revenue bonds, certificates of participation and lease-purchase transactions
- other revenue bonds and certificates of participation
- tax and revenue anticipation notes
- land-secured financings, such as special tax revenue bonds issued under the Mello-Roos Community Facilities Act of 1982, as amended, and limited obligation bonds issued under applicable assessment statutes
- tax increment financing to the extent permitted under state law
- conduit financings, such as financings for affordable rental housing and qualified 501c3 organizations

The City may from time to time find that other forms of debt would be beneficial to further its public purposes and may approve such debt without an amendment of this Debt Policy.

Debt shall be issued as fixed rate debt unless the Issuer makes a specific determination as to why a variable rate issue would be beneficial to the Issuer in a specific circumstance

C. Relationship of Debt to Capital Improvement Program and Budget

The City is committed to long-term capital planning. The City intends to issue debt for the purposes stated in this Debt Policy and to implement policy decisions incorporated in the City's capital budget and the capital improvement plan.

The City shall strive to fund the upkeep and maintenance of its infrastructure and facilities due to normal wear and tear through the expenditure of available operating revenues. The City shall seek to avoid the use of debt to fund infrastructure and facilities improvements that are the result of normal wear and tear.

FINANCIAL POLICIES

The City shall integrate its debt issuances with the goals of its capital improvement program by timing the issuance of debt to ensure that projects are available when needed in furtherance of the City's public purposes.

The City shall seek to avoid the use of debt to fund infrastructure and facilities improvements in circumstances when the sole purpose of such debt financing is to reduce annual budgetary expenditures.

The City shall seek to issue debt in a timely manner to avoid having to make unplanned expenditures for capital improvements or equipment from its general fund.

D. Policy Goals Related to Planning Goals and Objectives

The City is committed to long-term financial planning, maintaining appropriate reserves levels and employing prudent practices in governance, management and budget administration. The City intends to issue debt for the purposes stated in this Policy and to implement policy decisions incorporated in the Issuer's annual operations budget.

It is a policy goal of the City to protect taxpayers, ratepayers and constituents by utilizing conservative financing methods and techniques so as to obtain the highest practical credit ratings (if applicable) and the lowest practical borrowing costs.

The City will comply with applicable state and federal law as it pertains to the maximum term of debt and the procedures for levying and imposing any related taxes, assessments, rates and charges.

When refinancing debt, it shall be the policy goal of the City to realize, whenever possible, and subject to any overriding non-financial policy considerations, (i) minimum net present value debt service savings equal to or greater than 3.0% of the refunded principal amount, and (ii) present value debt service savings equal to or greater than 100% of any escrow fund negative arbitrage.

E. Internal Control Procedures

When issuing debt, in addition to complying with the terms of this Debt Policy, the City shall comply with any other applicable policies regarding initial bond disclosure, continuing disclosure, post-issuance compliance, and investment of bond proceeds.

The City will periodically review the requirements of and will remain in compliance with the following:

- any continuing disclosure undertakings under SEC Rule 15c2-12,
- any federal tax compliance requirements, including without limitation arbitrage and rebate compliance, related to any prior bond issues, and
- the City's investment policies as they relate to the investment of bond proceeds.

Whenever reasonably possible, proceeds of debt will be held by a third-party trustee and the City will submit written requisitions for such proceeds. The City will submit a requisition only after obtaining the signature of the City's Finance Director. In those cases where it is not reasonably possible for the proceeds of debt to be held by a third-party trustee, the City's Finance Director shall retain records of all expenditures of proceeds through the final payment date for the debt.

FINANCIAL POLICIES

F. Continuing Disclosure Procedures

In connection with the issuance of publicly sold debt, the City is required to enter into agreements (Continuing Disclosure Agreements) to provide certain information to investors under SEC Rule 15c2-12.

First, the City's Continuing Disclosure Agreements call for the City to provide annual reports that include: (i) updated financial and operating data relating to each debt obligation; and (ii) audited financial statements of the City. The City will work with bond counsel and/or disclosure counsel before the execution of each Continuing Disclosure Agreement to ensure that the annual reporting obligations that are being imposed upon the City in each Continuing Disclosure Agreement can be met by the City in a timely and complete manner.

Second, the Continuing Disclosure Agreements call for the City to provide notice of certain events relating to the debt, as specified in the Continuing Disclosure Agreements.

The City must comply with the specific requirements of each Continuing Disclosure Agreement. The City's policy is to strive to make Continuing Disclosure Agreements for each type of debt as uniform as possible.

The Continuing Disclosure Agreements generally require that the annual reports be filed by each April 1, and event notices are generally required to be filed within 10 business days of their occurrence. Such filings are to be made through the Municipal Securities Rulemaking Board's Electronic Municipal Market Access System, which is accessible on the Internet at <https://emma.msrb.org/> (EMMA).

The Finance Director of the City shall be responsible for making continuing disclosure filings. In addition, the Finance Director may determine to retain third-party consultants with experience assisting public agencies in making continuing disclosure filings in order to ensure timely and complete filings.

Certain notice events require special attention. For instance, the City's Continuing Disclosure Agreements call for the City to notify investors of changes in the ratings on its debt within 10 business days, although the credit rating agencies may not notify the City of changes in such ratings in all cases. The City will undertake to confirm the ratings on its debt on a regular basis.

In addition, the City's Continuing Disclosure Agreements entered into after February 27, 2019 call for the City to notify investors of the incurrence of any "financial obligation," if material, and the City will be obligated to disclose defaults on, acceleration of and certain other information with respect to any "financial obligation" regardless of when the financial obligation was incurred.

Rule 15c2-12 provides a general definition of a "financial obligation." While the impetus for the obligation to disclose information about financial obligations was a perception by the SEC and others that municipal issuers were increasingly entering into bank or other private placement debt, Rule 15c2-12 defines "financial obligation" more broadly to include "a debt obligation, derivative instrumentor a guarantee of either a debt obligation or a derivative instrument."

To date, the SEC has provided limited guidance on the specific application of the definition of "financial obligation." The SEC has suggested that a key concept is that a "financial obligation"

FINANCIAL POLICIES

involves the borrowing of money. In public comments, representatives of the SEC have declined to provide a definition of a “guarantee,” but they did indicate that the SEC will not look to state law definitions of a “guarantee” or “debt.”

As described in detail below, the City will need to monitor agreements or other obligations entered into by the City, the Salinas Facilities Financing Authority or other affiliated City entity (such as community facilities districts), and any modifications to such agreements or other obligations, to determine whether they constitute “financial obligations” under Rule 15c2-12 and, if material, need to be disclosed on to investors.

In addition, if the City, the Salinas Facilities Financing Authority or other affiliated City entity receives a notice of default or an event of default or of an acceleration, termination event, modifications of or other similar event on any agreement or other obligation, the City will need to determine whether such obligation constitutes a “financial obligation” (regardless of when originally incurred) and whether such default or other event reflects financial difficulty (i.e., reduction in overall liquidity, creditworthiness or debt owner’s rights).

Types of agreement or other obligations which are likely to be “financial obligations” under Rule 15c2-12 include:

1. Bank loans or other obligations which are privately placed;
2. Letters of credit, including letters of credit which are provided to third parties to secure the City’s, the Salinas Facilities Financing Authority’s or other affiliated City entity’s obligation to pay or perform;
3. Capital leases for property, facilities or equipment; and
4. Agreements which guarantee the payment or performance obligations of a third party (regardless of whether the agreements constitute guarantees under California law).

Types of agreements which could be a “financial obligation” under Rule 15c2-12 include:

1. Payment agreements which obligate the City, the Salinas Facilities Financing Authority or other affiliated City entity to pay a share of another public agency’s debt service (for example, an agreement with a joint powers agency whereby the City, the Salinas Facilities Financing Authority or other affiliated City entity agrees to pay a share of the joint powers agency’s bonds, notes or other obligations);
2. Service contracts with a public agency or a private party pursuant to which the City, the Salinas Facilities Financing Authority or other affiliated City entity are obligated to pay a share of such public agency’s or private party’s debt service obligation (for example, certain types of public-private partnership arrangements);
3. Agreements pursuant to which the City, the Salinas Facilities Financing Authority or other affiliated City entity is obligated to pay amounts expressly tied to another party’s debt service obligations, regardless of whether service is provided or not;
4. Agreements which include a rate component that expressly passes through debt service or capital obligation of the other party; and

FINANCIAL POLICIES

5. Agreements the payments under which are not characterized as an operation and maintenance expenses for accounting purposes if such agreements could be characterized as the borrowing of money.

The City Attorney and/or Finance Director will notify the City's bond counsel and/or disclosure counsel of the receipt by the City, the Salinas Facilities Financing Authority or other affiliated City entity of any default, event of acceleration, termination event, modification of terms (only if material or reflecting financial difficulties), or other similar events (collectively, Potentially Reportable Events) under any agreement or obligation to which the City, the Salinas Facilities Financing Authority or other affiliated City entity is a party and which may be a "financial obligation" as discussed above. Such notice should be provided by the City Attorney or the Finance Director as soon as the City Attorney or Finance Director receives notice from City staff, consultants or external parties of such event or receives direct written notice of such event so that the City can determine, with the assistance of bond counsel and/or disclosure counsel, whether notice of such Potentially Reportable Event is required to be filed on EMMA pursuant to Rule 15c2-12. If filing on EMMA is required, the filing is due within 10 business days of such Potentially Reportable Event to comply with the applicable Continuing Disclosure Agreement.

The Finance Director will catalog the execution by the City, the Salinas Facilities Financing Authority or other affiliated City entity of any agreement or other obligation which might constitute a "financial obligation" for purposes of Rule 15c2-12 and which is entered into after February 27, 2019. Amendments to existing agreements or financial obligations which relate to covenants, events of default, remedies, priority rights, or other similar terms should be reported to the City's bond counsel and/or disclosure counsel as soon as notice of amendment requests is received by City staff, consultants, or external parties of such event. Such notice is necessary so that the City can determine, with the assistance of bond counsel and/or disclosure counsel, whether such agreement or other obligation constitutes a material "financial obligation" for purposes of Rule 15c2-12. If such agreement or other obligation is determined to be a material "financial obligation" or a material amendment to a "financial obligation" described above, notice thereof would be required to be filed on EMMA within 10 business days of execution or incurrence.

X. ASSESSMENT AND MELLO-ROOS COMMUNITY FACILITIES DISTRICT FINANCING POLICIES

A. Formation

1. Assessment districts (AD's) or Mello-Roos Community Facilities districts (CFD's) financing may be made available by the City for those public improvements within a development or project area that either create extraordinary public benefit, and/or require public improvements that cannot be funded without substantial financial hardship to the property owner.
 - a. The City shall make the determination as to whether a proposed district shall proceed under the provisions of the Mello-Roos Community Facilities Act or other appropriate assessment district laws, and whether the district will be a construction or acquisition district.
2. New development projects must be consistent with the City's General Plan and have secured appropriate land use approvals from the City and all other agencies having jurisdiction to allow all proposed development of the project area.

FINANCIAL POLICIES

3. Unless waived by the City Council, the City will require, for each new development project, a study conducted by an independent, recognized expert in real estate to appraise the property proposed to be included in the assessment district. The appraisal shall take into account the public improvements, which will be financed by the assessment district. The appraisal methodology shall be subject to the approval of the City. This study shall be paid for by the developer but shall be commissioned by the City and shall be done for the City.
4. An absorption study of new development projects may be required for public financing. The absorption study shall be used as a basis for verification that sufficient revenues can be produced to service the debt and to determine whether public financing is appropriate given the timing of development.
5. Where the City provides AD or CFD financing for new development projects, and the City deems it appropriate, the City may enter into a development or similar agreement with the owners of the project.
6. The City Council shall select the assessment engineer, appraiser, bond counsel, underwriter, financial advisor, special tax consultant and other professionals and consultants as it deems appropriate. The City Council's policy is for the developer to pay all of the City's costs associated with the formation and administration of assessment districts.
 - a. An advance deposit is required, in those instances, where a proposed district is initiated by a party or parties other than the City.
7. Any development agreement associated with the use of public financing shall be approved by the City Council prior to the issuance of debt. Any modifications to the development agreement proposed subsequent to the issuance of debt will be considered only if the modification would benefit the City and not impair the outstanding debt obligations. Approval of any modifications requested by the developer shall be at the sole discretion of the City Council.
8. The City allows for the formation of acquisition districts. The City shall make the final determination as to which public improvements and to what extent such improvements are eligible for financing through acquisition. An acquisition agreement between the City and applicant/developer shall be required and approved by the City Council prior to the sale of bonds.

B. Financing

1. The amount of AD or CFD bonds issued for any project shall not be greater than one-third of the appraised value of the improved property as determined by the independent real estate valuation expert, except when credit enhancements are provided and/or when the improvements are of extraordinary public benefit.
2. Unless specifically exempted by the City Council, residential projects using assessment district financing shall be required to pay off the outstanding assessments as part of the first sale escrow of each completed (ready-for occupancy) residential property to the first purchaser of such property.
3. The resolution of intention to form an AD or CFD shall contain a statement that the City will not obligate itself to advance available funds from the City treasury to cure any deficiency which may occur in the bond redemption fund.
4. Each bond issue shall be structured to adequately protect bond-owners and to protect the bonding capacity and credit rating of the City. The structure shall include a foreclosure covenant that permits the City to foreclose any deficiency. The structure may also include some combination of credit enhancement, special reserve funds or deposits.

FINANCIAL POLICIES

5. Unless waived by the City Council the term of the bonds shall not exceed twenty-five (25) years.
 6. The AD or CFD lien shall be fully disclosed in compliance with applicable statutory requirements. For developer-constructed facilities, the developer will prepare and obtain approval from the City of a statement and report notifying any prospective property owners of existing or proposed special assessments or taxes on the property. This disclosure statement shall be issued to and signed by the prospective buyer prior to any commitment by the buyer to purchase the property. The City, in its sole discretion, may require additional property owner notification if the City deems that such notification will help make subsequent property owners aware of future liens.
 7. All statements and materials related to the sale of AD or CFD bonds shall emphasize and state that none of the faith, credit, and taxing power of the City is pledged to the repayment of the bonds. The City is not obligated to replenish the reserve fund from revenue sources other than annual assessments or special taxes, or proceeds from foreclosure proceedings.
 8. A reserve fund will be required in each AD or CFD bond issue. The reserve fund shall be of a size sufficient to provide adequate security against default and in a size that is deemed vital to bond marketing and of such a size as not to violate applicable federal tax law requirements.
 9. The calculation of assessment prepayments and reserve fund credits shall be as follows:
 - a. Each assessment prepayment will be computed and collected by the City of Salinas using part 11.1 of Division 10 (Sections 8766 and following) of the Streets and Highways Code. The computation will include principal outstanding, interest to date of bond call and costs including bond premium, legal, public noticing, administration and paying agent less a credit for the original reserve collected.
 - b. Prepayments must be received at least ninety days prior to applicable bond call dates (July 2, September 2, January 2 or March 2) to be included in the bond call. The current fiscal year assessment, which has been posted to the property tax roll must be paid to the Monterey County Tax Collector.
 - c. Upon receipt of the pay off, the City will cancel future assessment levies and shall cause to be recorded under Section 8687 of the Streets and Highways Code an appropriate amendment or addendum to any recorded notice of Assessment as evidence of the pay off.
 - d. The calculation of prepayments and reserve fund credits for CFD bonds will be made in accordance with the Mello-Roos Community Facilities Act of 1982.
- C. Special Tax Formula
1. Where the district to be formed is a Mello-Roos district, the maximum special tax shall adhere the following:
 - a. The special tax shall include the annual administrative cost of the City to administer the district.
 - b. The City shall retain a special tax consultant to prepare a report, which recommends and evaluates a special tax, which adequately funds identified public improvements, administrative costs and other related expenditures.
 - c. The projected special assessment and/or special tax, when added to the ad valorem property tax and other direct and overlapping debt of the proposed district (including other projected benefit assessments, special taxes levied for authorized but un-issued

FINANCIAL POLICIES

debt, and any other anticipated special assessments, taxes or charges which may be included on a property owner's annual property tax bill), shall not exceed two percent (2.0%) of the projected assessed value of each improved parcel within the district. As it pertains to commercial, industrial, or other parcels within the district, the City reserves the right to exceed the two-percent (2.0%) limit if, in the City's sole discretion, it is fiscally prudent. A backup special tax shall be required to protect against changes in land use that may result in insufficient annual special tax revenues.

D. Administration and Fees

1. The City's administrative costs, before, during, and after the debt is issued, shall be recovered. Costs chargeable to the district may be included in the debt issue. All City administrative costs not chargeable to the district shall be paid by the developer.
2. The City Council hereby affirms that the fees, established for AD's and CFD's is a three percent issuance fee levied on total bonds issued through the assessment district, a two percent construction administration fee and a two percent contract engineering review fee levied on total construction costs of the project. In-house engineering, legal and project inspection shall be charged directly to the project.
3. The City shall require a developer requesting AD or CFD financing to advance the costs for engineering work associated with the district improvements. The City retains the right of being the engineer of work for all improvements financed by AD's or CFD's.
4. The City Council will honor all existing agreements, for projects utilizing public financing that will continue in effect subsequent to the adoption of the policies contained herein. However, any modifications to these existing agreements subsequent to the adoption of these policies will be subject to review in accordance with the adopted policies.

E. Continuing Disclosure

1. The developer will comply with federal requirements concerning secondary market disclosure, as those requirements, are interpreted by the City and its counsel.

F. Refunding

1. AD or CFD bond refunding may be initiated by the City or at the request of property owners. Refunding Bonds shall be issued pursuant to California State law as deemed appropriate by the City.
2. All applicable provisions of these AD and CFD Policies shall apply to refunding except for the City's issuance fee which shall be one and one-half percent of the principal amount of the Refunding Bonds for issues that are exclusively refunding.

XI. LANDSCAPE AND LIGHTING MAINTENANCE DISTRICT POLICIES

The City of Salinas seeks to enhance the quality of residential, commercial and business developments by requiring new developments to form Landscape and Lighting Districts ("Districts") to maintain landscaping improvements required as a condition of development.

A. Formation

1. New development project must install improvements consistent with the City's General Plan.
2. The City Council's policy is that new development pay all of the City's costs associated with the formation and administration of Districts.
 - a. An advance deposit is required, in those instances, where a proposed district is

FINANCIAL POLICIES

initiated by a party or parties other than the City.

3. The initial maintenance costs and reserves will be funded by the developer based on the Engineer's Report in an amount sufficient to maintain the improvements until the first assessment apportionment is received from the County.
4. The City Council shall select the assessment engineer and other professionals and consultants as it deems appropriate.

B. Budget

1. Operating Budget – Ongoing annual operating expenses include, but are not limited to, the direct costs for landscape maintenance, water, electricity, street lighting, graffiti removal, open spaces, appurtenant facilities, tree trimming and pruning and street slurry sealing and overlay.
2. Administrative Expenses – Ongoing annual administrative expenses shall include charges for accounting, printing, publication of legal notices, consultant expense, city and county fees for collecting assessments, Public Works overhead and other City staff general and administrative expenses.
3. Reserves – Reserves may be collected for two primary purposes – cash flow and capital replacement.
 - a. Cash Flow Reserves shall be established at 25% of the annual budget as set forth in the initial engineer's report and adjusted each fiscal year thereafter. These reserves may be drawn down, as needed; during the first half of each fiscal year until the first installment of property tax assessment is collect to replenish the reserves.
 - b. Capital Replacement Reserves shall be established to protect against damage to landscaping and lighting improvements or provide funding for facilities that may not be conveniently raised in one year. Capital Replacement Reserves may be collected over an extended period of time, from five to thirty years. When the Capital Replacement Reserve is established, the City Council shall approve by resolution the improvements, estimated cost, and the number of years they will be collected.
4. Interest Earnings – Interest income for each District shall accrue at the City's interest rate and shall be shown in the budget.
5. Surpluses – Surplus funds within a District on June 30th shall be noted in the budget. Surplus funds are those funds above and beyond those required to cover annual expenses and reserves. Any surplus funds shall be applied as a reduction of future fiscal year's assessment.
6. Deficits – Deficits within a District on June 30th shall be noted in the budget. Deficits shall be considered funding shortfalls required to cover annual expenses. Any deficit balance will be recovered with assessment revenue from future levies.
7. General Fund or other appropriate fund contributions – Contributions from the General Fund or other appropriate fund will be made to cover the Costs determined as general public benefit in the engineer's report. Such contributions may include direct deposits to the District accounts or credits that effectively reduce the assessments.

C. Method of Apportionment

1. The formula used for calculating assessments will reflect the composition of the parcels, and the improvements and services provided, to fairly apportion the costs based on estimated benefit to each parcel.
2. Pursuant to the Constitution Article XIID Section 4 a parcel's assessment may not exceed

FINANCIAL POLICIES

the reasonable cost of the proportional special benefit conferred on the parcel and only special benefits may be assessed.

3. The method of apportionment will also include an assessment range formula and inflationary adjustments. The purpose of establishing an assessment range formula is to provide for reasonable increases and inflationary adjustment to annual assessments without requiring costly noticing and mailing procedures, which could add to the District costs and assessments.

XII. CAPITAL ASSET POLICIES

A. Overview – The Finance department will maintain a capital asset management system that will meet external financial reporting requirements and the needs of the departments in line with these policies. Governmental Accounting Standards Board Statement No. 34 (GASB 34) changed GAAP for capital assets reporting for governmental funds. Beginning in fiscal year ending June 30, 2003, pursuant to GASB 34, the General Fixed Asset Account Group will be eliminated and the City will report these assets by function and activity on the government-wide financial statements. Enterprise Funds capital assets will continue to be recorded within their own fund.

1. Capital assets are recorded as expenditures in governmental funds at the time the assets are received and the liability is incurred. These assets will be capitalized at cost on the government wide financial statements. Enterprise fixed assets are recorded as assets within the fund when purchased and a liability is incurred.
 - i. GASB 34 defines Capital Assets as land, improvements to land, easements, buildings, building improvements, vehicles, machinery, equipment, works of art and historical treasures, infrastructure, and all other tangible or intangible assets that are used in operations and that have initial useful lives extending beyond a single reporting period.
 - ii. GASB 34 defines Infrastructure Assets as long-lived capital assets that normally are stationary in nature and normally can be preserved for a significantly greater number of years than most capital assets. Examples include roads, bridges, tunnels, drainage systems, water and sewer systems, dams and lighting systems. Buildings that are an ancillary part of a network of infrastructure assets are included.

The City uses the most current edition of GOVERNMENTAL ACCOUNTING, AUDITING, AND FINANCIAL REPORTING (GAAFR) published by the Government Finance Officers Association (GFOA) as its authoritative guide in setting policy and establishing accounting procedures regarding capital assets.

B. Capitalization – Generally all capital assets with an original cost of \$10,000 or more will be capitalized (recorded as an asset on the balance sheet versus expensing the item). Infrastructure Assets with an original cost of \$150,000 or more will be capitalized. This capitalization policy addresses financial reporting, not control. The City follows the GFOA recommended practices for establishing capitalization thresholds. Specific capitalization requirements are described as follows:

1. The asset must cost \$10,000 or more.
2. The asset must have a useful life of five (5) or more years.
3. The capitalization threshold is applied to individual units of capital assets rather than groups. For example, ten desks purchased for \$1,500 each will not be capitalized even though the total (\$15,000) exceeds the threshold of \$10,000.
4. For purposes of capitalization, the threshold will generally not be applied to components of

FINANCIAL POLICIES

capital assets. For example a keyboard, monitor and central processing unit purchased as components of a computer system will not be evaluated individually against the capitalization threshold. The entire computer system will be treated as a single asset. The capitalization threshold will be applied to a network if all component parts are required to make the asset functional.

5. Repairs to existing capital assets will generally not be subject to capitalization unless the repair extends the useful life of the asset. In this case the repair represents an improvement and is subject to the requirements described number 6 below.
6. Improvements to existing capital assets will be presumed by definition to extend the useful life of the related capital asset and therefore will be subject to capitalization if the cost exceeds \$10,000.
7. Work of arts, animals (i.e. police dogs) and historical treasures are not capitalized, but will be recorded as tracked property.

As a result of the above capitalization policies the following infrastructure items will not be capitalized:

- Handheld radios
 - Personal computers
 - Software
 - Street trees
 - Street signs
 - Weapons
8. Capital projects will be capitalized as “construction in progress” until completed.

C. Leased Assets

1. Operating leased assets are usually short term and cancelable at anytime. The recording of an operating lease as a fixed asset is not required because the item is not purchased.
2. Capital leases will be capitalized if one or more of the following criteria are met and the chance of cancellation is low:
 - a. Ownership is transferred by the end of the lease term
 - b. The lease contains a bargain purchase option
 - c. The lease term is greater than or equal to 75 percent of the asset's service life
 - d. The present value of the minimum lease payment is greater than or equal to ninety percent (90%) of the fair market value of the asset at the inception of the lease.

Capital lease items are capitalized at the beginning of the lease period, regardless of when the title transfers. Capital leases are recorded at net present value of lease payments.

- D. Capital Asset Recording - It is the responsibility of the Finance Department to record, monitor and inventory all fixed assets. Each department will assign appropriate staff members to respond to verification, inventories, and filling out the necessary forms for recording transfers, dispositions, donations or retired fixed assets.
- E. Acquisition of Capital Assets - Fixed assets may be acquired through direct purchase, lease-purchase or capital lease, construction, eminent domain, tax foreclosures, donations, and gifts.

FINANCIAL POLICIES

When a capital asset is acquired the funding source will be identified as either a governmental fund, proprietary fund or component unit. Additionally the fund type will be identified as well as the specific fund.

If funds are provided by a specific funding source, a record will be made of that specific source such as:

Bond Proceeds

Federal Grants

State Grants

Local Grants

- F. Measuring the Cost and/or Value - Capital assets are recorded at their "historical cost", which is the original cost of the assets. Donations accepted by the City will be valued at the fair market value at the time of donation. Costs include purchase price (less discounts) and any other reasonable and necessary costs incurred to place the asset in its intended location and prepare it for service. Costs could include the following:

Sales Tax

Freight charges

Legal and title fees

Closing costs

Appraisal and negotiation fees

Surveying fees

Land-preparation costs

Demolition costs

Relocation costs

Architect and accounting fees

Insurance premiums and interest costs during construction

- G. Establishing Cost in the Absence of Historical Records - According to the GASB 34, an estimate of the original cost is allowable. Standard costing is one method of estimating historical cost using a known average installed cost for a like unit at the estimated date of acquisition. Another recognized method is normal costing wherein an estimate of historical cost is based on current cost of reproduction new indexed by a reciprocal factor of the price increase of a specific item or classification from the appraisal date to the estimated date acquired. When necessary, the City will use whichever method gives the most reasonable amount based on available information.
- H. Recording Costs Incurred After Acquisition - Expenditures/expenses for replacing a component part of an asset are not capitalized. However, expenditures/expenses that either enhance a capital asset's functionality (effectiveness or efficiency), or that extend a capital asset's expected useful life are capitalized. For example, periodically slurry sealing a street would be treated as a repair (the cost would not be capitalized), while an overlay or reconstruction would be capitalized. Adding a new lane constitutes an addition and would therefore also be capitalized.
- I. Disposition or Retirement of Fixed Assets - It is the City's policy that departments wishing to dispose of surplus, damaged or inoperative equipment must notify the Finance Department.

FINANCIAL POLICIES

The City will conduct public auctions, as necessary, for the purpose of disposing of surplus property. Auction's will be conducted by the Finance Department through its Purchasing Division. All proceeds from the sale of surplus property will be allocated to the City's General Fund unless the property was originally purchased with monies from a Proprietary or a Grant Fund, in which case, the proceeds will be returned to any of those specific funds. The original cost less depreciation will then be removed from the City's capital asset management system.

Disposition of assets acquired using grant funds should follow the asset disposition guidelines established by the grantor.

- J. Transfer of Assets – The transfer of fixed assets between departments requires notification to the Finance Department.
- K. Depreciation – It has long been the City's policy to record depreciation for Enterprise funds. In accordance with GASB Statement No. 34, effective with the fiscal year ending June 30, 2003 the City will record depreciation expense on all capital assets, except for inexhaustible assets.

The City will use straight-line depreciation method. Depreciation will be calculated starting the month following the date the asset was placed in service. Depreciation will be applied over the estimated useful life of the asset.

- L. Recommended Lives - The City follows GFOA Recommended Practices when establishing recommended lives for assets to be capitalized. In accordance with GASB 34 the City will rely on "general guidelines obtained from professional or industry organizations." In particular, the City will rely on estimated useful lives published by GFOA. If the life of a particular asset is estimated to be different than these guidelines, it may be changed. Following is a summary of the estimated useful lives:

<u>Asset Class</u>	<u>Useful Life</u>
Buildings and Improvements	240 to 600 months
Improvements Other Than Buildings	180 to 540 months
Infrastructure	240 to 600 months
Machinery and Equipment	60 to 120 months

- M. Control of Assets – In accordance with GFOA Recommended Practice the City will exercise control over the non-capitalized tangible capital-type items by establishing and maintaining adequate control procedures at the department level. The City's capitalization threshold of \$10,000 meets financial reporting needs and is not designed for nor particularly suited to maintain control over lower cost capital assets. It is the responsibility of each department to maintain inventories of lower-cost capital assets to ensure adequate control and safekeeping of these assets.
- N. Maintenance Schedules - The City shall develop and implement maintenance and replacement schedules with a goal of maximizing the useful life of all assets. The schedules shall include estimates of annual maintenance and/or replacement funding required for each asset.
- O. Maintenance Funding - The City shall identify specific sources of funds for the annual maintenance or replacement of each asset. Whenever possible, the maintenance or replacement funding shall be identified from a source other than the City General Fund. The City shall maximize the use of maintenance assessment districts and dedicated special revenue (e.g. gas tax). The City shall endeavor to set aside, on an annual basis, one and one-half percent (1½%) of its General Fund Operating Budget to provide for on-going maintenance and required replacement of assets that cannot be reasonably funded from other sources.

FINANCIAL POLICIES

P. Works of Art and Historical Treasures – GASB 34 encourages but does not require the capitalization of art collections that meet all of the following conditions:

- Held for public exhibition, education, or research in furtherance of public service, rather than financial gain
- Protected, kept unencumbered, cared for, and preserved
- Subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections

It is the City's Policy that proceeds from the sale of art collections be used to acquire other works of art. That being the case the City's works of art and historical treasures will not be capitalized.

Q. Intangibles – Intangible assets are now included in the GASB 34 definition of capital assets. Prior to GASB 34 the City did not capitalize intangibles. GFOA recommends that governmental entities follow the guidance of AICPA Statement of Position 98-1 Accounting for Costs of Computer Software Developed or Obtained for Internal Use.

R. Inventory – A physical inventory of capitalized assets will be performed annually. Capitalized assets are maintained in the City's fixed asset system that include the acquisition date, a description of the property, a serial number or other identification number, the source of funding, the cost of the asset, percentage of Federal participation for the Federal award under which the property was acquired and the location of the capitalized asset.

S. Disposition – City Council declares City assets surplus and authorize the disposal in accordance to Chapter 12, Article 2, Section 12-15 of the Municipal Code regarding Disposition of Property. Disposition of capitalized asset acquired under a Federal award shall follow the disposition instructions from the grant awarding agency.

XIII. RISK MANAGEMENT POLICIES

- A. The City shall maintain a risk management program for liability, workers' compensation, health insurance, and loss of property exposures which emphasizes avoidance of risk, whenever possible, funding for losses which cannot be avoided, and transfer or risk to third parties whenever appropriate.
- B. The risk management process will include the systematic and continuous identification of loss perils and exposures, the analysis of these perils and exposures in terms of frequency and severity probabilities, the application of sound risk control procedures and the financing of risk consistent with the City's financial resources.
- C. If the loss potential in dollars for a particular risk is substantial and cannot be absorbed within the City's annual operating budget and reserves, the City will develop and maintain a program of purchased insurance or funded self-insurance.
- D. The City will endeavor to promptly settle justified claims but will vigorously defend claims which are doubtful, frivolous, or unsupported.
- E. The City will maintain separate self-insurance funds to identify and segregate the financial resources necessary to cover insurance premiums and self-insurance retentions

FINANCIAL POLICIES

1. Revenues into the insurance funds will be generated by charges to operating departments and programs.
2. Resources will be established at the end of each year to fully fund liability for open claims, incurred but not reported (IBNR) claims, and a catastrophic loss reserve as periodically recommended by the City's Risk Management Advisor.
3. The City will endeavor to maintain reserves equal to three-times the self-insured retention for both the liability and worker's compensation self-insurance internal service funds.

XIV. INTERFUND LOANS

- A. Purpose - This policy documents requirements and responsibilities to be followed regarding interfund borrowing between funds of the City of Salinas.
- B. Scope - Often local governments will loan resources from one fund to another fund that is experiencing a temporary cash shortage. Under generally accepted accounting principles (GAAP), funds that account for reserved or dedicated monies may make temporary loans to other funds. This policy addressed the approval, terms and accounting requirements for interfund loans.
- C. Definition - Interfund loans are amounts provide between funds with a requirement for repayment. Interfund loans will be reported according to GAAP, as interfund receivables in lender funds and interfund payables in borrower funds. If repayment is not expected within a reasonable time, the interfund balances should be reduced and the amount that is not expected to be repaid should be reported as a transfer from the fund that made the loan to the fund that received the loan.
- D. Policy
 1. Interfund loans-Types:
 - a. Internal loans that are necessary part of normal business operations:
 - To maintain cash flow and provide working capital, in anticipation of future tax receipts or other revenue, the General Fund may require cash advances from other funds during the course of a fiscal year. Other funds eligible to make cash advances include: Measure V; Measure G, Special Revenue, Capital Projects, and Internal Services. Cash advances shall be treated as short-term loans. Interest shall be paid on these loans at a rate determined according to the procedure established in section B.2 of this policy.
 - Cash advances to provide working capital to the General Fund or other funds must be approved by the City Manager. Such approval must be in writing and should specify maximum allowable amounts.
 - b. Internal loans that provide for advance spending for a capital project prior to securing project financing. Such loans must be approved by the City Council with the adoption of the annual Capital Improvement Project budget or by separate action by the City Council. Approval is not required for advance spending from the \$2 million Capital Projects Revolving Fund established by prior City Council action.
 2. Interfund Loans-Terms:
 - a. Repayment of an interfund loan shall be with the same fiscal year. Exceptions to this rule require approval by the City Council.

FINANCIAL POLICIES

- b. When required by the lending fund's restrictions or regulations, interest will be paid by the borrowing fund to the lending fund, during the time the loan is outstanding, at the State Local Agency Investment Fund (LAIF) rate. The LAIF rate is approximately what the City earns on its investments.
- c. Upon receipt of the anticipated revenue, the borrowing fund shall repay the lending fund with 30 calendar days.
- d. Interfund loans shall not hinder the accomplishment of any function or project for which the lending fund was established.

XV. LONG-TERM FISCAL AND SUSTAINABILITY IMPACT

- A. Purpose - This policy documents requirements and responsibilities for considering the long-term impact of current decisions.
- B. Annual Budgets - As part of the annual budget, the document will include a minimum five-year budget forecast that shows how the current budget being considered by the City Council for approval helps maintain fiscal sustainability over a longer-term horizon.
- C. Staff Reports - On each staff report to City Council, the report should include a section on fiscal and sustainability impact. For impacts greater than \$100,000 for one fiscal year and that continue for more than 3 years, a table showing the impact over a 10-year period should be added to the staff report in the fiscal impact and sustainability section of the staff report.

XVI. SPECIAL EVENTS FUNDING AND OPERATIONS POLICY

- A. Purpose - This policy documents requirements for funding/sponsoring and controlling costs associated with special events through In-Kind Matching contributions such as the Rodeo and the California Air Show.
- B. Scope – The City Council may sponsor community events by providing in-kind services.
- C. Policy
 - 1. The City Council will fund community events through the annual budget process.
 - 2. The funding amount will be in the form of an in-kind contribution of services for the day of the event, such as Fire, Police, Public Works, or other City services.
 - 3. The organization coordinating the event must apply for the event through the normal special events process.
 - 4. An estimate of the City services will be itemized by each department during the special events planning process and each department will make every effort to control costs or minimize the level of service needed.
 - 5. A copy of the estimate should be routed to the Department Head and the Finance Director or their designee for review and approval.
 - 6. The coordinating agency of the even should provide a total budget for the event.
 - 7. They City's contribution value of in-kind contribution should not be more than 10% of the total cost of the event.
 - 8. An estimate of the economic benefit to the City should be calculated, such as the TOT revenue.
 - 9. The City Council will fund community events through the annual budget process.

FINANCIAL POLICIES

10. The funding amount will be in the form of an in-kind contribution of services for the day of the event, such as Fire, Police, Public Works, or other City services.
11. The organization coordinating the event must apply for the event through the normal special events process.
12. An estimate of the City services will be itemized by each department during the special events planning process and each department will make every effort to control costs or minimize the level of service needed.
13. A copy of the estimate should be routed to the Department Head and the Finance Director or their designee for review and approval.
14. The coordinating agency of the even should provide a total budget for the event.
15. They City's contribution value of in-kind contribution should not be more than 10% of the total cost of the event.
16. An estimate of the economic benefit to the City should be calculated, such as the TOT revenue.
17. At the conclusion of the special event, each department will calculate and document the detail of all costs incurred, including staff hours through the payroll time keeping process and other costs, and summarize and total those itemized costs and send the itemized costs list to the Finance Department accounts receivable staff to compile one consolidated invoice for the special event. This information should be submitted during the one-week period immediately following the event.
18. The invoice for the special event will itemize the costs for each department, include a sub-total for each department, include a credit for the in-kind contributions, and the amount due.
19. The Finance billing staff should prepare and mail out the invoice to the coordinating event agency within 30 days following the event.
20. The invoice should be paid within 30 days of receipt by the coordinating agency
21. If the coordinating agency fails to pay the balance due, the City will not sponsor the event the next time the event is held but may choose to sponsor the event again the next time if the estimated cost of the services are paid in-advance of the event or within 5 days following the even if there is a cash flow issue.

SUBJECT: Recommended Capital Improvement Budget (Fiscal Year 2024) & Capital Improvement Program (Fiscal Years 2025-29)

I am pleased to present this year's recommended Capital Improvement Budget for fiscal year 2024 and Capital Improvement Program (CIP) for fiscal years 2025-29 for the City of Salinas. The program details the capital investments required by the community to maintain and enhance our residents' quality of life. Given the significant costs associated with capital investments, the CIP is a multi-year document, updated annually. Comprehensive revisions to the CIP were made this year for fiscal years 2024 through 2029 and include significant investment in the community. The total investment planned for fiscal year 2024 is \$31.4 million. Some of the larger investments include streets and sidewalks totaling \$12.5 million, \$1.0 million for the Alisal Vibrancy Plan, and \$930,000 for the permanent homeless shelter. Funding of \$5.0 million to replace aging fleet is also planned.

Guided by the City Council Strategic Plan with Goals and Objectives for 2022-2025, community outreach, and General Plan, this CIP continues targeted investments to maintain, rehabilitate, and rejuvenate a wide array of public infrastructure to improve system reliability, enhance recreational experiences, advance public safety, and, in general, ensure Salinas remains well positioned for economic growth and opportunity.

The City of Salinas defines a capital asset as having: 1) a capital asset with a desired minimum dollar amount of \$10,000; and 2) an estimated useful life of five years or more. Capital assets include land, buildings, land and building improvements, equipment, and infrastructure assets (e.g., streets, sidewalks, traffic signals, and similar items). The proposed CIP includes equipment leases, building leases, and costs associated with the maintenance of capital assets that extends the useful life of those assets. Although staff attempts to adhere to the definition of a capital asset, some items do not meet the definition but have been included, due to their uniqueness, such as special funding, timing, and multi-year nature.

The proposed CIP budget addresses many immediate needs during fiscal year 2024 by using \$9.4 million of resources from Measure G, the City's voter-approved transactions and use tax, and \$15.6 million for the remaining planned five years. In order to meet the City's needs, it is imperative the City continue to develop strategies to allocate limited financial resources for capital projects. The Capital Improvement Program should not be confused with the Capital Improvement Budget. The Capital Improvement Budget represents the first year of the CIP and is adopted annually by the City Council to authorize and appropriate funding for specific projects. Projects and financing

sources listed in the CIP for years 2-6 (commonly called the “out years”) are not authorized until the annual budget for those years is adopted by the City Council. The “out years” serve only as a guide for future planning and are subject to further review and modification in subsequent years by the Council.

Annually, the City council adopts a six-year CIP to provide a standard by which to:

- prioritize the needs of the City based on the Strategic Plan;
- match, as appropriate, available funding to various needs;
- plan to meet the City’s capital needs over an extended period, as funding becomes available; and
- establish a strategy to secure funding for priority projects.

The CIP is organized by departments / operating divisions and includes the following:

- Letter of Transmittal;
- CIP Summary by Category;
- CIP Summary by Department;
- CIP Summary by Fund;
- CIP Sections by category, including a detailed budget for each capital project; and
- CIP Index.

Potential investments totaling \$119.2 million are identified for the six-year period from July 1, 2023 to June 30, 2029. These investments range from deferred maintenance needs of existing roads and sidewalks (to be funded with SB 1 and Measure X bonds) to implementation of the Alisal Vibrancy Plan. Each of the six years in the CIP reflects critical investments. The fiscal year 2024 proposed Capital Improvement Budget is balanced to forecasted revenues, ensuring adequate funding for the projects.

City Council Goals and Objectives

The City Council Strategic Plan with Goals and Objectives for 2022-25 were considered when determining which CIPs to propose and fund, and all projects in the CIP fulfill one or more of the strategic goals. The CIP includes projects that specifically address certain objectives, including funding and planning for the Alisal Vibrancy Plan, Annual Street Preventative Maintenance Program, projects addressing homelessness, sidewalk repairs, traffic signal installation and improvements, and park and library improvements.

Fiscal Year 2024

Funding Sources	FY 24	FY 25	FY 26	FY 27	FY 28	FY 29	Total
General Fund	\$ 5,430,000	\$ 2,870,200	\$ 2,575,200	\$ 2,575,200	\$ 2,575,200	\$ 2,575,200	\$ 18,601,000
Measure G	9,385,000	2,760,000	3,010,000	3,260,000	3,260,000	3,260,000	24,935,000
Other Funds	16,602,810	16,769,460	15,440,260	9,757,900	9,677,000	7,450,000	75,697,430
Total	\$ 31,417,810	\$ 22,399,660	\$ 21,025,460	\$ 15,593,100	\$ 15,512,200	\$ 13,285,200	\$ 119,233,430

The proposed fiscal year 2024 capital improvement budget is \$31.4 million. The General Fund portion of the budget total is \$5.4 million and includes funding for homeless coordination, Chinatown revitalization, fire station and recreation center improvements, sidewalk/drainage repairs, and library facility roofs.

Measure G funding continues to allow the City to make considerable investments in capital improvement projects. Proposed fiscal year 2024 Measure G Fund projects total \$9.4 million. The six projects include the Alisal Vibrancy Plan, soccer field at Cesar Chavez Park, facility ADA improvements, Northgate Dog Park, and street/sidewalks improvements. The balance of the budget (\$16.6 million) is funded by assessment districts, development fees, gas taxes, Measure X Transportation Safety and Investment (Measure X), SB 1 Road Maintenance and Rehabilitation (SB 1), special aviation funds, and City enterprise funds, all of which require those revenues to be used for the specific purposes listed in the recommended CIP. For instance, the \$3.6 million in the SB 1 Road Maintenance & Rehabilitation projects may only be used for maintaining local roads and streets, and the \$2.0 million in Gas Tax projects may only be used for street-related projects.

Future Investments Needs

Fiscal year 2025 through 2029 General Fund projects total \$13.2 million, and Measure G projects total \$15.6 million. Given the current economic and fiscal condition, it will be necessary to limit any General Fund budget savings (carry over) for capital projects that cannot be deferred. Measure G funding also addresses many community needs.

Restricted Funds

A combination of various resources are included in the recommended fiscal year 2024 capital projects budget for the rehabilitation and development of infrastructure and street systems repair and improvements. Restricted funds for which uses are limited include those allocated or collected for/from enterprise operations, assessment and maintenance districts, Community Development Block Grants, development impact fees, local gasoline excise taxes, Measure X, SB 1, and Federal Aviation Administration grants. Examples of programs and projects funded, in whole or in part, from restricted funds include airport improvements, Boronda Road congestion relief, various assessment district improvements, permit system and technology upgrades, school safety enhancements, and silt removal/storm channel repairs.

In November 2016, County taxpayers approved Measure X, a transactions and use tax of three-eighths of one percent ($3/8\%$), for a period of thirty years, which is to be used to improve safety on local roads and highways; repair potholes; maintain streets and roads; reduce traffic congestion; improve transportation for seniors, young people, and people with disabilities; and making walking and biking safer. Tax revenues will be allocated with sixty percent (60%) of funds dedicated to local road maintenance, pothole repairs and safety projects, and forty percent (40%) of funds dedicated to regional safety and mobility projects. The Transportation Agency for Monterey County (TAMC) and a Citizen Oversight Committee were established in addition to requiring annual independent audits. The proposed Capital Improvement Budget includes \$1.9 million (from Measure X) in qualified projects which include, among others, priority traffic signals, sidewalk and drainage repairs, bridge maintenance, and Americans with Disabilities Act pedestrian ramp installations. The CIP reflects \$30.9 million of Measure X projects over the six-year budget plan.

On March 29, 2017, Governor Jerry Brown announced a transportation funding agreement, known as SB 1 Road Maintenance and Rehabilitation. This ambitious plan will provide \$5.2 billion annually for California's transportation infrastructure. The plan will be funded by several tax increases which include a twelve-cent-per-gallon increase to the gasoline excise tax, twenty-cent-per-gallon increase to the diesel excise tax, an additional vehicle registration tax called the "Transportation Improvement Fee" with rates based on the value of the motor vehicle, and \$100-dollar vehicle registration fee on zero-emission vehicles for models 2020 and later. The City estimates it will receive approximately \$4.0 million during fiscal year 2024 from this tax. The proposed CIP budget includes three projects qualified to be funded by SB 1 funds and are Williams Road improvements, striping and signing improvements, and street preventative maintenance.

Gas tax revenues represent a major funding source of capital improvement projects and are slightly lower than in previous years. Allocations had been somewhat stable but are now declining with fuel efficiency and the increasing use of alternative transportation fuels. Projects funded by gas tax funds in the proposed CIP budget total \$2.0 million.

Conclusion

The six-year Capital Improvement Program provides a snapshot of community needs. The CIP does not provide a guarantee all projects will be accomplished, however, as funding for capital projects are subject to economic conditions affecting General Fund, Measure E, and Measure G resources, developer resources, grant availability, and State budget actions.

The long-term service and economic development needs of the Salinas community are assessed from the perspective of required capital investments. The multi-year CIP provides an opportunity to do so and will continue to be a priority.

Sincerely,

A handwritten signature in blue ink, appearing to read "S. Carrigan", with a stylized, flowing script.

Steven S. Carrigan

Project # 9103

Project Name Geographic Information Systems

Start Date 07/01/12

Council District City-Wide

Completion Date 06/30/27

Total Project Cost: \$425,776

Description

This project provides supporting technology, data and analytical services for the City's transportation safety, construction and maintenance programs. This includes aerial imagery acquisition for the entire City.

Justification

Replacement of supporting equipment, software and applications are required for staff support and to provide information and services to the public.

Project # 9354

Project Name Southside Taxilane Rehabilitation

Start Date 07/01/23

Council District City-Wide

Completion Date 06/30/25

Total Project Cost: \$5,080,000

Description

The work and project (Design) are fundamentally a pavement rehabilitation project to remediate and maintain taxiway and taxilane pavement on the south side of the airport. The areas are specifically the taxilanes between City owned hangars – K, L, Q, O, R, S, and T. The project scope includes crack seal, slurry seal, full-depth reconstruction, milling, filling, and the re-marking of taxiways and taxilanes.

The work and project (Construction) are fundamentally a pavement rehabilitation project to remediate and maintain taxiway and taxilane pavement on the south side of the airport. The areas are specifically the taxilanes between City owned hangars – K, L, Q, O, R, S, and T. The project scope includes crack seal, slurry seal, full-depth reconstruction, milling, filling, and the re-marking of taxiways and taxilanes.

Justification

The project will be funded by FAA Grant 3-06-0206-36 (or another FAA-assigned number). The grant funds 90% of the project, with the Airport Enterprise Fund contributing up to a 10% match. If CalTrans State match grant funds are available, the Airport Enterprise matching formula will be reduced by 5%, with CalTrans matching 5% of the Federal Grant amount.

Project # 9001

Project Name Permanent Homeless Shelter

Start Date 07/01/18

Council District 1

Completion Date On Going

Total Project Cost: \$7,500,000

Description

Operations of the Salinas Housing Advancement, Resources & Education (SHARE) Center, site improvements for installation and maintenance of the SHARE Center and RV trailers.

Justification

City and County of Monterey entered into an MOU in FY 18-19 in which the City has agreed to share in the cost for construction and operation of the permanent homeless shelter and permanent homeless supportive/transitional housing.

Project # 9070

Project Name Chinatown Revitalization Plan & Implementation

Start Date 01/07/15

Council District 4

Completion Date 06/30/32

Total Project Cost: \$3,175,825

Description

Implementation of the Chinatown Revitalization Plan including community-driven improvement projects with visual impact. Developing a streetscape and infrastructure master plan, security measures, acquisition of properties, building improvement and remediation of newly acquired parcels for mixed-use development and affordable housing production, street and neighborhood maintenance, and supporting culturally relevant public art and the creation of cultural spaces as economic drivers.

Justification

Implementing policies and actions in the Economic Development Element and Chinatown Revitalization Plan emerging opportunities. Funding would be leveraged with other grant funds including CDBG and would also support implementation of community-driven improvement projects that address critical needs, including sanitation, beautification, and neighborhood stabilization.

Project # 9087

Project Name 65 W. Alisal Improvements

Start Date 07/01/20

Council District 3

Completion Date On Going

Total Project Cost: \$780,000

Description

This project seeks to fund capital improvements to address increased staffing, deferred maintenance, and improve environment for customers. Funding will be used for reconfiguration and creation of additional workspace for staff, integration of safety measures for customers and employees, and facility improvements including elevator repair and restroom remodeling. Funding would allow for a cleaner and safer environment for customers and staff.

Justification

This project is proposed to be implemented as it necessitates interior alterations to accommodate customers and staff with increased safety and cleanliness.

Project # 9136

Project Name ED Element Implementation

Start Date 07/01/14

Council District City-Wide

Completion Date 06/30/28

Total Project Cost: \$477,790

Description

Funding to leverage the implementation of the goals, policies, and actions outlined in the ED Element with focus on technical, planning, environmental study and analysis for future development in and annexation of EDE Target Area K. Funding would also support small business recovery including expanding the Grow Salinas Fund (GSF) to provide micro grants for marketing, outdoor dining, and façade improvements.

Justification

Implementation of the Economic Development Element as part of the City's General Plan. Funding would be leveraged with other grant funds including CDBG.

Project # 9063

Project Name Downtown Parking Management Plan

Start Date 03/01/13

Council District 3

Completion Date On Going

Total Project Cost: \$75,000

Description

Project provides for a Downtown Parking Management Plan.

Justification

Implementation of the Downtown Vibrancy Plan and part of the City Council's Strategic Plan objectives.

Project # 9064

Project Name Monterey St Garage Security System Improvements

Start Date 07/01/19

Council District 3

Completion Date 06/30/25

Total Project Cost: \$137,524

Description

Budget provides for the replacement of security camera system digital video recorder at Monterey Street Garage, removal and replacing existing storefront door with reinforced structure, repainting of interior of the garage structure.

Justification

Existing security camera system digital video recorder is inoperative and cannot be repaired due to its age. Several cameras have failed and must be replaced. Interior walls and surfaces have not been painted since 2005.

Project Name Williams Rd UD/Street/Streetscape & Median Island

Start Date 07/01/17

Council District 2

Completion Date 06/30/26

Total Project Cost: \$10,009,281

Description

With the utility undergrounding of Williams Road (Bardin to Alisal) the roadway will need to be reconstructed to include underground and road improvements. TFO (#48) will fund median island improvements which will occur in two phases. The Williams Rd improvement construction is anticipated to start Summer 2023.

Justification

The TFO has identified the need for a median island on Williams Road to increase traffic capacity and improve vehicle and pedestrian safety. HSIP Funding is expected to be available for construction.

Project # 9163

Project Name Traffic Calming Improvements

Start Date 07/01/06

Council District City-Wide

Completion Date On Going

Total Project Cost: \$2,485,072

Description

This project implements the City-wide traffic calming policy for residential streets.

Justification

Implements the City's Traffic Calming Policy approved in 2009 to address concerns with speed and volume of traffic in residential areas. Project aligned with the City's Vision Zero policy.

Project # 9216

Project Name ADA Pedestrian Ramp Installation

Start Date 07/01/17

Council District City-Wide

Completion Date On Going

Total Project Cost: \$856,968

Description

Furnish and install ADA pedestrian ramps at all curb returns and crosswalks at mid-block throughout the City. The priority will be based on the recommendation by staff and committee and approval by City Council.

Justification

The Americans Disability Act obligates Local Agencies to budget and schedule deficient ADA infrastructure in City right-of-way.

Project # 9391

Project Name School Safety Enhancements

Start Date 07/01/18

Council District City-Wide

Completion Date On Going

Total Project Cost: \$288,941

Description

This project provides for the annual replacement of traffic signs, in-pavement signs, markings and other minor improvements near school sites throughout the City.

Justification

Enables the City to respond to school traffic safety concerns during the year. School Traffic Safety concerns is one category of traffic operations for which the City receives many requests each year. Most concerns are related to traffic congestion during drop off and pick-up hours due to the volume of cars during 2-3 short periods in a day. However, at times staff identifies improvements that will improve safety at schools. These improvements include new signing, flashing beacons, striping and other tools that is funded by this program.

School Safety Projects are aligned with the City's Vision Zero Policy.

Project Name Congestion Mgmt Agency City %

Start Date 05/01/91

Council District City-Wide

Completion Date 06/30/29

Total Project Cost: \$606,995

Description

This project provides for the City's proportionate share of the cost for the Congestion Management Program which is being conducted by the Transportation Agency for Monterey County (TAMC).

Justification

Cost of membership in the Congestion Management Agency is a Gas Tax eligible expenditure and the City's 18% share is based in proportion to Gas Tax Funds received by member agencies.

Project # 9626

Project Name Fire Station 7

Start Date 07/01/22

Council District 1,6

Completion Date 06/30/24

Total Project Cost: \$1,900,000

Description

On November 1st, 2022, the City Council approved the purchase of land for the construction of Fire Station 7. Funding is needed to begin scoping out the project and its requirements. A new Fire Station is required for the development of the West Area.

Justification

FY 22/23 will see the Fire Station 7 project start with civil engineering and the commencement of station design. FY 23/24 is the anticipated year of land acquisition and entitlements. FY 23/24 is the anticipated commencement of the competitive bid process for construction and permitting with targeted completion in FY 24/25.

Project # 9984

Project Name Fire Training Tower Maint & Temp Training Area

Start Date 07/01/16

Council District 3

Completion Date 06/30/24

Total Project Cost: \$1,100,000

Description

SFD lost its training facility when SPD received a new building. Until a new facility could be built, SFD needs to make arrangements for a temporary training facility for staff and academy trainings. SFD plans to take the existing tower down to create space for a temporary training facility. The project will provide for the temporary creation and maintenance/upgrade of training facilities to meet the all-risk training demands of the fire department.

Justification

Enhanced and changing demands on the fire department bring new and enhanced training requirements. Adequate space, free from hazards, to adequately train new and existing employees is crucial. Adding some temporary modulars and maintenance of the tower will help to facilitate opportunities to host classes that generate revenue in future years.

Project # 9270

Project Name Parks Vehicles Replacement

Start Date 07/01/17

Council District City-Wide

Completion Date On Going

Total Project Cost: \$353,900

Description

The Parks Division has 2 Ford Rangers that are 2007/08 models and have reached the age of replacement. Cost to replace is about \$160,000.

Justification

These vehicles are used daily to help maintain the city parks. These vehicles have roughly 80K miles, but accumulate a lot of low speed driving and idle time. One hour of idle time is equal to 25-30 miles.

Project # 9540

Project Name Fire Vehicle Apparatus Replacement

Start Date 07/01/19

Council District City-Wide

Completion Date On Going

Total Project Cost: \$8,520,185

Description

Project anticipates future vehicle apparatus replacement based on estimated useful life and replacement cycle. Future needs include one pumper and one aerial apparatus in FY 23-24, one pumper apparatus in FY 24-25, one aerial apparatus in FY 27-28 and one pumper apparatus in FY 28-29. We expect to replace 1-2 more pumper apparatus by FY 2032. SFD's maintenance programs has recognized that aging frontline apparatus are spending more out-of-service time proportionately than in-service time. Additionally, unexpected and costly repairs routinely exceed the operating budget because of the original plan to replace first line engines at 10 years and surplus them after reserve status at 20 years. Lease-purchase (as with previous acquisitions) is the recommended option to minimize large impacts to the budget.

Current lease obligations are identified in the 65.1030 and 65.2030 accounts.

Justification

As outlined in the 2018 "Salinas Plan" prepared by the National Resource Network (NRN) and the National Fire Protection Association (NFPA), a fleet replacement plan is the cornerstone for maintaining a reliable and sustainable emergency vehicle fleet. It is recommended that first line engines in Salinas be replaced every 8 years, placed in reserve service for another 10 years, and surplus after 18 years due to heavy use, increased unreliability of complex emission control and chassis systems and increased overall wear from street conditions.

Expenditures	2024	2025	2026	2027	2028	2029	Total

Project # 9579

Project Name Police Vehicle Replacement

Start Date 07/01/06

Council District City-Wide

Completion Date On Going

Total Project Cost: \$5,163,139

Description

Project provides for replacement of police vehicles and associated equipment through purchase and/or lease. Annual appropriation funds the replacement of patrol vehicle and unmarked vehicles.

Justification

Project also provides for replacement of mobile computer terminals and safety equipment as required.

Start Date 07/01/14

Council District City-Wide

Completion Date 06/30/24

Total Project Cost: \$236,371

Description

Ongoing expenses related to cost sharing for engineering and other services related to the Industrial Wastewater Collection and Conveyance System. Scope includes seeking new grant funding to augment efforts to capture runoff from South Salinas, conveyance to TP-1 and pumping to Monterey One Water for farming and other recycled water uses.

Justification

Professional services are necessary to provide grant writing, permitting and other efforts. This project supports a cooperative effort between the City and M1W which is funded by a \$10M Prop 1 grant while seeking an equal amount in the next round of funding.

Completion Date On Going

Total Project Cost: \$165,000

Description

Support efforts of the Salinas River Channel Stream Maintenance Program's River Management Unit Association, Inc. The City will become a landowner member of the Association and pay annual dues including a payment in arrears to cover 2017.

Justification

According to the September 4, 2018 MOU, the City agreed to support the Salinas River Channel Stream Maintenance Program as a landowner member affirming the common interest of the sustainable management of riverine lands in the Salinas Valley Groundwater Basin.

Project # 9346

Project Name Natividad Creek Community Park

Start Date 02/01/17

Council District 1

Completion Date 06/30/27

Total Project Cost: \$982,246

Description

The first major phase of the project has been completed. The next few minor projects include rehab existing restroom and add new restroom near Skate Park/Tennis Ctr. Completion of habitat restoration within the lower Natividad Creek area between Las Casitas and Laurel Drive, including the N/E detention basin habitat restoration. Dog park and lighting improvements.

Justification

Annual allocation of Park Development fees will help augment other resources, such as community volunteer programs, to continue park development. Increased maintenance costs will be minimal relating to anticipated improvements.

Project # 9093

Project Name Permit Center Technology Upgrade

Start Date 07/01/16

Council District City-Wide

Completion Date On Going

Total Project Cost: \$3,374,852

Description

A combination of Projects 9093, 9158 and 9357, this program creates the ability to capitalize on current technologies and the upgrading of outdated hardware and software (i.e., QLess, Project Dox and virtual inspections) to provide a higher level of customer service. Allows for acquiring of new software and hardware in order to better facilitate management of building permits. Includes other professional services and 25% regular pay for the Permit Center Coordinator dedicated to Trakit9, staff training, and web page management.

Justification

Improvements to the TRAKIT system, Qless, Project Docs and virtual inspections are essential for improved customer service and staff efficiencies. This is an appropriate use of the 5% technology fee collected for each building permit.

Project # 9743

Project Name Repairs to Lift Stations

Start Date 07/01/95

Council District City-Wide

Completion Date 06/30/24

Total Project Cost: \$502,000

Description

This provides for replacements or upgrades to sanitary sewer lift stations including pump motors, motor controllers, alarm dialers, variable speed drives, electrical panels, buildings or enclosures, install permanent lift station bypasses and other appurtenances to include SCADA, MH monitors and flow meters.

Justification

This project is necessary to add resiliency to existing infrastructure and to reduce potential sewer overflows. Additionally, it is funded entirely by the Sewer Fund.

Project # 9086

Project Name Natividad Creek Silt Removal

Start Date 07/01/16

Council District 1

Completion Date 06/30/24

Total Project Cost: \$150,000

Description

Remove silt from sections of Natividad Creek between Boronda Road to East Laurel Drive. Make repairs to banks and the water channel as required; and make repairs to any outfalls that tie in the creek. Project may include stream restoration components with grant funding.

Justification

Repairs and periodic maintenance of this stream is necessary for flood control.

Project # 9175

Project Name Santa Rita Storm Channel

Start Date 05/01/19

Council District 5

Completion Date 06/30/24

Total Project Cost: \$100,000

Description

This project provides for the initial planning, design and permitting required for the repair of the storm water channel at Santa Rita Park. The storm water channel has been damaged by erosion due to multiple storm events in recent years. The repair will include the widening of the concrete portion of the channel and a paved access driveway for maintenance vehicles as well as a re-grading of the channel slopes to include hydro seeding. The total reconstruction will include approximately 1,300 linear feet of the channel. Project may include stream restoration components with grant funding.

Justification

Repairs and periodic maintenance of this stream is necessary for flood control. Initial design and permitting fees are to come from 2301 Development Fees Sewer and Storm. While project implementation funding will likely come from grants and/or FEMA reimbursement.

Project # 9081

Project Name Striping and Signing Improvements at City Streets

Start Date 07/01/18

Council District City-Wide

Completion Date On Going

Total Project Cost: \$2,965,065

Description

The striping of City streets has fallen behind as street repair scheduled have been delayed. As a result, street center lines, crosswalks and other pavement markings that help contribute to street safety is in need of updating. In addition, complete streets concepts provide opportunities to encourage safety on city streets using striping.

Justification

Provides funding to update street paving and signs at critical locations. This striping project is for those streets that need safety striping but are not part of pavement improvements.

Striping and signing updates occur within streets right of way. These improvements will not significantly impact the City maintenance budget but may reduce city claims cost.

Updating striping and signing supports the City Vision Zero Policy.

Project # 9720

Project Name Sidewalk & Drainage Repairs

Start Date 07/01/95

Council District City-Wide

Completion Date On Going

Total Project Cost: \$10,239,380

Description

Repair of damaged curbs, gutters, sidewalks, and driveway approaches throughout the City damaged by City trees within the street right-of-way. The work will be performed through the On-Call Contractor list and by in-house City Personnel (Four Street Maintenance Workers).

Justification

The allocation of \$150,000 of gas tax in supplies and material is for the purchase of concrete, sand, and other pertinent supplies relating to the repair sidewalks, etc.

The City is addressing the 15 year waiting list for sidewalk repair.

Project # 9094

Project Name Priority Traffic Signals

Start Date 07/01/18

Council District City-Wide

Completion Date On Going

Total Project Cost: \$4,409,233

Description

The Priority Traffic Signals Program provides a rational basis for prioritizing traffic signal installations at intersections. With a finite amount of available funding, there is a need to provide a rational basis for prioritizing traffic signals. The program has been expanded to include the consideration of alternative intersection designs in addition to traffic signals. The active priorities include Boronda Road at Sanborn Road, Williams at Garner Avenue, Constitution Boulevard at Las Casitas Drive, Harden Parkway at McKinnon Street, and Freedom Parkway at Rider Avenue.

Justification

These locations are part of the City Council's Prioritized Locations for traffic control. Selection is based on safety, traffic, pedestrians, other environmental factors.

Project # 9253

Project Name ADA Traffic Signal Upgrades

Start Date 07/01/17

Council District City-Wide

Completion Date 06/30/27

Total Project Cost: \$195,715

Description

Upgrade traffic signals to meet ADA standards with pushbuttons, audible signals, and various ADA upgrades. Design and construct in alternating years.

Justification

The Americans Disability Act obligates Local Agencies to budget and schedule deficient ADA infrastructure in City right-of-way.

Project # 9654

Project Name Traffic Signal Installations and Upgrades

Start Date 07/01/00

Council District City-Wide

Completion Date On Going

Total Project Cost: \$6,162,793

Description

This CIP is for the routine upgrades to traffic signals and RRFBs, including controllers, cabinets, opticom, APS, iCCUs, video detection, leading pedestrian phases, LED beacons, and communication upgrades.

Justification

Traffic signal technology changes to improve safety and efficiency. This CIP allows necessary upgrades to existing signal system. This CIP includes the installation of new pedestrian countdowns, improved detection, battery back-up units, new cabinets to allow additional safety features at signalized intersections.

BUDGET RESOLUTION

RESOLUTION NO. _____ (N.C.S.)

RESOLUTION NO. _____ (S.A.)

A RESOLUTION ADOPTING THE FISCAL YEAR 2024 ANNUAL OPERATING BUDGET

WHEREAS, on May 23, 2023, the City Manager submitted a preliminary operating budget and preliminary capital improvement budget for fiscal year 2024 and a preliminary capital improvement program for fiscal years 2024-2029 to the City Council; and

WHEREAS, on June 13, 2023, the City Manager submitted the proposed operating budget and proposed capital improvement budget for fiscal year 2024 and the proposed capital improvement program for fiscal years 2024-2029 to the City Council which incorporated adjustments to the preliminary budgets and preliminary capital improvement program as directed by the City Council and the City Manager.

NOW, THEREFORE, BE IT RESOLVED that the operating and capital budgets of the City of Salinas and the Successor Agency of the Salinas Redevelopment Agency for fiscal year 2024, which begins July 1, 2023, with appropriations totaling \$248,437,988 is hereby approved, adopted, and appropriated.

BE IT FURTHER RESOLVED that the amounts by fund outlined in the “Expenditure Total” column of “Exhibit 1” attached hereto and incorporated herein by this reference shall be the maximum expenditures authorized for those funds for fiscal year 2024.

BE IT FURTHER RESOLVED that the City Manager is hereby authorized to make budgetary revisions between budget units within an operating fund after the adoption of the fiscal year 2024 budgets.

BE IT FURTHER RESOLVED that the City Manager is hereby authorized to transfer monies between funds up to the maximum outlined in the “Transfers Out” column in “Exhibit 2” attached hereto and incorporated herein by this reference.

BE IT FURTHER RESOLVED that the estimated financing sources by fund available to meet the authorized expenditures and transfers are approved and adopted as detailed in the Fiscal Year 2024 Proposed Operating Budget and incorporated herein by this reference.

BE IT FURTHER RESOLVED that the City Manager is authorized to adjust amounts of said financing sources subsequent to budget adoption if any appropriation balances carried forward from prior fiscal years had an associated revenue source at the time the appropriation was established.

BUDGET RESOLUTION

BE IT FURTHER RESOLVED that the City-Wide Workforce Summary and Salary Schedule included in the Fiscal Year 2024 Proposed Operating Budget document be adopted.

PASSED AND APPROVED this 13th day of June 2023, by the following vote:

APPROPRIATIONS LIMIT

RESOLUTION No. _____ (N.C.S.)

A RESOLUTION SETTING THE APPROPRIATIONS LIMIT FOR THE CITY OF SALINAS FOR FISCAL YEAR 2024

WHEREAS, Article XIII B of the California Constitution was amended by the passage of Proposition 111 at the June 5, 1990, Primary Election; and,

WHEREAS, each City must now select its change in the cost-of-living annually by a recorded vote of the City Council; and,

WHEREAS, each City must now select its change in population annually by a recorded vote of the City Council;

NOW THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF SALINAS that the Appropriations Limit for the City shall be changed based on:

1. The population within the County limits, and
2. The change in California cost of living.

BE IT FURTHER RESOLVED that the Appropriations Limit for the City of Salinas for Fiscal Year 2024 is hereby adopted at \$310,220,680 pursuant to Article XIII B of the California Constitution as amended by Proposition 111. The portion of the City's budget that is subject to the appropriation limit (the proceeds of taxes) totals \$165,429,500 and is well within the appropriations limit.

PASSED AND ADOPTED this 13th day of June 2023, by the following vote:

AYES: Councilmembers:

NOES: Councilmembers:

Measure E Oversight Committee

Committee member comments regarding FY 2023- 24 Operating and Capital Improvements Budgets

April 20, 2023

Committee member Barajas requested to potentially fund 1-2 positions in Public Works solely dedicated to pothole repairs, while also developing a master plan for facilities and sidewalks. Committee member Barajas also requested to reduce the 12% reserve fund by 1-2%.

Committee member Kennedy requested departments seek federal funding allocations and apply for those grants. Committee member Kennedy requested for ADA projects to be sought via federal funding opportunities.

Committee member Mora requested funding be allocated towards sidewalks and street repair based on the feedback received from the community at the public safety workshops.

Committee member Lara emphasized that public safety is more than policing, it is adding lighting, fixing streets, sidewalks, and deferred maintenance investment for future funding. Committee member Lara emphasized he would like for the funding from this revenue source to return to supporting the Public Works Department.

Chair Huerta was absent at the meeting but submitted his comments regarding funding allocations:

Chair Huerta proposes reducing the Economic Contingency Reserves from 12% to 10% and using those funds to recruit (incentive pay) the best possible candidates for the Salinas Police Department. This is an on-going cost supported by on-going revenues. A larger SPD staff will reduce employee overtime costs and can benefit all residents. Chair Huerta proposed using those funds for data-proven crime prevention programs. This is an on-going cost supported by on-going revenues. These programs can help residents make choices that benefit our neighborhoods and community.

Chair Huerta recommended using available one-time funds for a state-of-the-art fire station in District 5. The funds can be used for acquisition of land, design and construction, and operation of the building. The new fire station will reduce traffic issues near N. Main Street and W. Laurel Drive.

Chair Huerta recommended using available one-time funds for street and sidewalk repairs, traffic calming, and safety crosswalks on an equitable basis. Funds should be distributed via a master plan based on need, not an equal amount per district.

Measure G Oversight Committee
Committee member comments regarding FY 2023- 24 Operating and Capital
Improvements Budgets
April 20, 2023

Committee member Swensen requested cost effective methods of funding street and sidewalk repairs.

Committee member Swensen requested for Measure G funded projects to be highlighted and showcased to the public.

Measure G Committee members requested that in developing budget priorities for fiscal year 2023-2024, the Council establish as a priority an immediate plan to allocate funding for Streets and Sidewalks that will ensure progress is made for their repair for the remaining years of Measure G, as well as Recreational Programs for Youth and Seniors.

2023 Storm Sinkhole Emergency Repairs

Approve a Resolution authorizing procurement of emergency services pursuant to Salinas Municipal Code Section 12-24 for the 2023 Storm Sinkhole Emergency Repairs and authorize the City Manager to execute a contract and amendment with Granite Rock Company for an amount not to exceed \$300,000.00.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023
DEPARTMENT: PUBLIC WORKS
FROM: DAVID JACOBS, PE, PLS, DIRECTOR
BY: ADRIANA ROBLES, PE, CFM, CITY ENGINEER
TITLE: 2023 EMERGENCY SINKHOLE REPAIR

RECOMMENDED MOTION:

A motion to approve a Resolution authorizing procurement of emergency repair services pursuant to Salinas Municipal Code Section 12-24 for the 2023 Storm Sinkhole Emergency Repairs and authorizing the City Manager to execute a construction contract and amendment with Granite Rock Company in an amount not to exceed of \$300,000.00.

BACKGROUND:

This year's storms have created unprecedented emergencies with city facilities. Since January, two local emergency proclamations have been made due to extreme weather. Since January 10, 2023, a total of nine sinkholes have been reported to the Public Works Department. The first at the Salinas Fairways Golf Course was repaired under a different contract.

Following the February 7, 2023 Council meeting during which Council denied appropriation of funds for emergency repair of sinkholes, staff conducted an informal solicitation of services with three local construction firms. Granite Rock Company was selected to provide emergency repair services of the sinkholes on a time and material basis. Pursuant to Salinas Municipal Code Section 12-24, on March 1, 2023 the City Manager authorized an emergency agreement with Granite Rock Company for repair of sinkholes at various locations for \$100,000.00.

When the repair began in April on the Sanborn Rd/E Alisal St sinkhole, staff observed that the damage at that intersection was more extensive than the Salinas Fairways sinkhole. Repair of this sinkhole would entail installation of a new storm drain line, removal and replacement of damaged pavement and extensive traffic control. Staff estimated the effort to exceed the \$100,000 authorized by the City Manager.

On April 19, 2023, the City Manager authorized an amendment to the contract that increased the terms of the agreement to \$300,000. By then staff had been notified of two additional sinkholes (W Market St and E Blanco Rd) that had been formed. To date, Granite Rock has completed repair of two of the sinkholes (Sanborn Rd/E Alisal St and E Blanco Rd) for a total of \$184,021.45. Invoices will be paid following approval from Council.

The table below summarized the status of all known sinkholes.

SINKHOLE LOCATION	DATE REPORTED	REPAIR COMPLETED	CONTRACTOR	COST

Veteran's Park	6/2/2023	Pending	TBD	TBD

CEQA CONSIDERATION:

The City of Salinas has determined that the proposed action is categorically exempt from environmental review under the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15301).

STRATEGIC PLAN INITIATIVE:

This project addresses the current City Council's Goals of Operational Efficiency and Public Safety.

DEPARTMENTAL COORDINATION:

The Public Works Department collaborated with Legal, Administration and Finance Departments during this emergency procurement process.

FISCAL AND SUSTAINABILITY IMPACT:

The project is funded through 3911.50.8180 – Street Repair/Traffic Safety. Sufficient funds exist in the ARPA account to make the needed repairs.

ATTACHMENTS:

Resolution

¹ Sinkhole repair paid through a different agreement.

² Repair pending Caltrans encroachment permit.

³ Sinkhole related with work by others. Repair costs paid by contractor.

⁴ Sinkhole related with work in the area by others. Repair costs paid by utility company.

RESOLUTION NO. _____(N.C.S.)

A RESOLUTION AUTHORIZING EMERGENCY SINK HOLE REPAIRS

WHEREAS, Salinas experienced unprecedented weather events during the winter and spring months of 2023; and

WHEREAS, the Salinas City Council declared a local emergency twice during those months due to weather; and

WHEREAS, since January 10, 2023, a total of nine sinkholes have been reported to the Public Works Department; and

WHEREAS, repair of the sinkholes was deemed an emergency to protect public safety; and

WHEREAS, repair of the sinkholes was prioritized based on size of the sinkhole and impact to the general public; and

WHEREAS, City solicited emergency repair services from three local construction contractors; and

WHEREAS, City staff selected Granite Rock Company to provide emergency repair services for the sinkholes; and

WHEREAS, City Code Section 12-24, allows procurement on an emergency basis by the City Manager prior to approval by the City Council.

NOW, THEREFORE, BE IT RESOLVED that the Salinas City Council authorizes procurement of emergency repair services pursuant to Salinas Municipal Code 12-24 for the 2023 Storm Sinkhole Repair; and

BE IT FURTHER RESOLVED that the City Manager is hereby authorized and directed on behalf of the City of Salinas to execute a contract and amendment with Granite Rock Company for an amount not to exceed \$300,000.00.

Amendment No. 2 to Agreement for Services with Benitez Security Services, Inc.

Approve a Resolution authorizing the City Manager or designee to execute Amendment No. 2 to Agreement for Services #22ARPA04 with Benitez Security, Inc. to increase the compensation amount by \$420,000 to total amount not to exceed \$906,000 and extend the term to March 31, 2024.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: COMMUNITY DEVELOPMENT DEPARTMENT

FROM: LISA BRINTON, DIRECTOR

THROUGH: ROD POWELL, ASSISTANT DIRECTOR – ACTING

BY: FRANCISCO BRAMBILA, MANAGEMENT ANALYST
MARIA CAMBRON, COMMUNITY DEVELOPMENT ANALYST

TITLE: AMENDMENT No.2 TO AGREEMENT FOR SERVICES
#22ARPA04 WITH BENITEZ SECURITY SERVICES, INC.

RECOMMENDED MOTION:

A motion to approve a Resolution authorizing the City Manager or designee to execute Amendment No. 2 to Agreement for Services #22ARPA04 with Benitez Security, Inc. to increase the compensation amount by \$420,000 to a total amount not to exceed \$906,000 and extend the term to March 31, 2024.

EXECUTIVE SUMMARY:

Prior to April 2023, the City had been operating an Emergency Motel Program (EMP) providing emergency shelter and housing navigation services at the County Inn in the City of Marina with supportive 24-hour security services provided by Benitez Security, Inc. (BSI). On April 1, 2023, the City relocated its EMP services, providers and supports, including security services, to its new location at the Steinbeck Lodge with an initial operating timeline through to March 31, 2024. The proposed amendment will increase the compensation amount by \$420,000 to a total amount not to exceed \$906,000 and extend the term to March 31, 2024.

BACKGROUND:

The City has been operating a successful EMP focused on the provision of emergency shelter and navigation to permanent housing since October 2021 with partial supportive funding from the County of Monterey (County). Initially, due to a lack of site options resulting from the City's competitive H2A housing environment, the program operated out of the City of Marina. On March 21, 2023, Council authorized the execution of a one-year Room Rental Agreement with JS Inc. dba Steinbeck Lodge to transition the EMP program from its former Marina location to the Steinbeck Lodge at 109 John Street. Since the program's inception, BSI has provided on-site security services. Initially through one of the EMP's subrecipient service providers and later, in October 2022, through the original Agreement for Services executed in December 2022. In recognition of the acceptance of additional County funds, in December 2022, Council approved

Amendment No.1 to Agreement for Services #22ARPA04 to extend the term through to June 30, 2023.

Shortly thereafter, in March 2023, Council authorized the execution of a one-year Room Rental Agreement with JS Inc. to allow the EMP to move to its current location at the Steinbeck Lodge. In recognition of the program's relocation, new operational term, and the availability of additional County funding, staff are now seeking to further amend Agreement for Services #22ARPA04 to incorporate additional funds and extend the term.

DISCUSSION:

In recognition of the EMPs recent move to its current Salinas site and a new annual operating cycle beginning April 1st, there is need to add an additional \$420,000 in previously appropriated Project Roomkey Motel Program (County ARPA), Encampment Resolution Fund (ERF) and General Fund Homeless Services Coordination funding to support the program's continued security model through to March 31, 2024. Amendment No. 2 increases the total not to exceed compensation amount to \$906,00 and extends the term of the Agreement to March 31, 2024.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

The proposed agreements will advance the City of Salinas Strategic Plan 2022-2025 Goals and *Housing/Affordable Housing* through continued provision of immediate housing opportunities supported by robust housing navigation leading to permanent housing placements.

DEPARTMENTAL COORDINATION:

This agenda item was prepared by and is solely administered by the Community Development Department Housing & Community Development Division with contributions from both the City Attorney and Finance Department.

FISCAL AND SUSTAINABILITY IMPACT:

Amendment No. 2 to Agreement for Services #22ARPA04 with BSI will be funded by available appropriations including \$70,000 of Project Roomkey Motel Program (County ARPA), \$280,000 of Encampment Resolution Fund (ERF), and \$70,000 of General Fund Homeless Services Coordination funds.

ATTACHMENTS:

Resolution

Amendment No. 2 to Agreement for Services #22ARPA04 – Draft

Amendment No. 1 to Agreement for Services #22ARPA04

Agreement for Services #22ARPA04

RESOLUTION NO. _____ (N.C.S.)

A RESOLUTION AUTHORIZING THE EXECUTION OF AMENDMENT No. 2 TO AGREEMENT FOR SERVICES #22ARPA04 WITH BENITEZ SECURITY SERVICES, INC.

WHEREAS, the City of Salinas (City) currently serves as the administrative entity for an Emergency Motel Program (EMP) jointly funded by the City and County of Monterey (County) to provide immediate housing to unhoused individuals; and

WHEREAS, On March 21, 2023, Council authorized the execution of a Room Rental Agreement with JS Inc. dba Steinbeck Lodge for the purpose of providing emergency shelter to unhoused City residents through March 31, 2024; and

WHEREAS, the City and Benitez Security Services Inc. first entered into an Agreement for the Services #22ARPA04 to support the Salinas Motel Program effective January 1, 2023 with a total amount of compensation not to exceed \$486,000 and term ending June 30, 2023; and

WHEREAS, on April 6, 2023, the City and Benitez Security Services Inc. entered into Amendment No. 1 to Agreement for Services #22ARPA04 to extend the term through August 31, 2023.

WHEREAS, the City and Benitez Security Services, Inc. desire to further amend Agreement for Services #22ARPA04 to increase the compensation amount by \$420,000 to a total not to exceed \$906,000 and further extend the term through March 31, 2024.

WHEREAS, the proposed Amendment No. 2 to Agreement for Services #22ARPA04 with Benitez Security Services, Inc. will be funded by appropriations of City American Rescue Plan Act (ARPA), Project Room Key Motel Program (County ARPA), Encampment Resolution Fund (ERF) and General Fund for Homeless Services Coordination funds; and

WHEREAS, the City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

NOW, THEREFORE, BE IT RESOLVED by the City Council of the City of Salinas that it hereby authorizes the City Manager or designee, for and on behalf of the City of Salinas, to execute Amendment No. 2 to Agreement for Services #22ARPA04 with Benitez Security, Inc. to increase the compensation amount by \$420,000 to a total amount not to exceed \$906,000 and extend the term to March 31, 2024.

AMENDMENT No. 2
AGREEMENT FOR SERVICES BETWEEN THE CITY OF SALINAS
ANDBENITEZ SECURITY SERVICES, INC.
FOR
SECURITY SERVICES FOR THE SALINAS MOTEL PROGRAM
(FORMALLY KNOWN AS THE ARPA/PRK MOTEL PROGRAM)

Agreement No. 22ARPA04

This Amendment No. 2 is entered on May 16, 2023, between **BENITEZ SECURITY SERVICES, INC.** a California corporation (Hereinafter Contractor) and the **CITY OF SALINAS**, a **California** charter city and municipal corporation (City).

WITNESSETH

WHEREAS, the City and Benitez Security Services Inc. first entered into an Agreement for the Security Services for the Salinas Motel Program formally known as the ARPA/PRK Motel Program (Agreement) effective January 1, 2023, pursuant to which Benitez Security Inc. agreed to act as and provide certain services for compensation; and

WHEREAS, the City and Benitez Security Services Inc. entered into Amendment No. 1 to the Agreement to extend funding term through August 31, 2023.

WHEREAS, the City and Benitez Security Services Inc. desire to amend the Agreement to extend funding term through March 31, 2024, and increase the agreement by \$420,000 for a total maximum compensation to \$906,000.

NOW, THEREFORE, in mutual consideration of the terms and conditions set forth below, the Parties agree as follows:

1. Section 3 entitled "Term" is revised to read as follows:

The work under this Agreement shall commence on January 1st, 2023, and shall be completed by March 31st, 2024, unless City grants a written extension of time as set forth in Section 2 above. This Agreement may be extended only upon mutual written consent of the parties on a month-to-month basis and may be terminated only pursuant to the terms of this Agreement.

2. First sentence of Section 4 entitled "Payment" is revised to read as follows:

City hereby agrees to pay and Contractor agrees to accept as full and fair consideration for the performance of this Agreement, a total amount of compensation not to exceed nine hundred and six thousand dollars (\$906,000.00).

3. All terms, covenants and conditions stated in the Original Funding Agreement, and Amendment No. 1, which are not herein amended, remain in full force and effect.

IN WITNESS HEREOF, the parties have executed this Amendment No. 2 effective as

of the date shown above.

FISCAL YEAR 2022-23
AGREEMENT FOR SERVICES BETWEEN
THE CITY OF SALINAS AND
BENITIEZ SECURITY SERVICES INC.

This is an official document.
Do not make any changes to this document EXCEPT to modify your signature block on the last page as needed.

**FISCAL YEAR 2022-23
AGREEMENT FOR SERVICES BETWEEN
THE CITY OF SALINAS
AND
BENITEZ SECURITY SERVICES, INC.
FOR
SECURITY SERVICES FOR THE ARPA/PRK MOTEL PROGRAM**

Agreement Number: 22ARPA04

THIS AGREEMENT is executed this 1st day of December 2022, (“Agreement” or “Contract”) between the City of Salinas, a California Charter city and municipal corporation (hereinafter “City”) and Benitez Security Services, Inc., a California corporation (Hereinafter “Contractor”).

IT IS HEREBY MUTUALLY AGREED AS FOLLOWS:

1. **Scope.** Contractor hereby agrees to provide the City, security services for the ARPA/PRK Motel Program under this Agreement, as more fully described in Attachment B – Scope of Work, attached hereto and incorporated herein by reference.
2. **Timeliness.** Contractor shall perform all tasks in a timely fashion, as set forth more specifically in Section 3 below. Failure to so perform is hereby deemed a material breach of this Agreement, and City may terminate this Agreement with no further liability hereunder, or the city may agree in writing with Contractor to an extension of time.
3. **Term.** The work under this Agreement shall commence on January 1st, 2023, and shall be completed by June 30th, 2023, unless City grants a written extension of time as set forth in Section 2 above. This Agreement may be extended only upon mutual written consent of the parties on a month-to-month basis and may be terminated only pursuant to the terms of this Agreement.
4. **Payment.** City hereby agrees to pay and Contractor agrees to accept as full and fair consideration for the performance of this Agreement, a total amount of compensation not to exceed **four hundred eighty-six thousand dollars (\$486,000.00)**. Contractor has no right of reimbursement for expenses under this Agreement. Compensation shall become due and payable 30 days after City’s approval of Contractor’s submission of monthly written invoices to the City. The payment of any compensation shall be contingent upon performance of the terms and conditions of this Agreement to the satisfaction of the City. If City determines that the work set forth in the written invoice has not been performed in accordance with the terms of this Agreement, City shall not be responsible for payment until such time as the work has been satisfactorily performed.
5. **Meet & Confer.** Contractor agrees to meet and confer with City or its agents or employees with regard to services as set forth herein as may be required by City to insure timely and adequate performance of this Agreement.
6. **Insurance.** Contractor shall procure and maintain for the duration of this Agreement insurance meeting the requirements specified in Attachment A hereto.
7. **Indemnification.** Contractor shall hold harmless, defend at its own expense, and indemnify City and its officers, officials, employees, agents, and volunteers from and against all

liability, claims, damages, losses, and/or expenses including reasonable City attorney fees arising from all acts or omissions of Contractor or its officers, agents, or employees arising out of the performance of the work under this Contract, caused in whole or in part by any negligent act or omission of the Contractor, any subcontractor, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, except where caused by the sole negligence or willful misconduct of the City.

8. **Licensing.** Contractor warrants that it is properly licensed to perform the work specified under this Agreement, including but not limited to possession of a current City business license.

9. **Termination.** City may terminate this Agreement upon ten days' written notice. The amount of damages, if any, as a result of such termination may be decided by negotiations between the parties or before a court of competent jurisdiction.

10. **Agency.** In performing the services specified under this Agreement, Contractor is hereby deemed to be an independent contractor and not an agent or employee of City.

11. **Non-Assignability.** The rights and obligations of Contractor hereunder are not assignable and cannot be delegated without written consent of City.

12. **Entire Agreement.** This Agreement constitutes the entire Agreement between the parties hereto and supersedes any and all prior agreements, whether oral or written, relating to the subject matter thereof. Any modification of the Agreement will be effective only if it is in writing signed by both parties hereto.

13. **Validity.** If any provision in this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions will continue in full force without being impaired or invalidated in any way.

14. **Counterparts.** This Agreement may be executed in multiple originals, each of which is deemed to be an original, and may be signed in counterparts.

15. **Laws.** Contractor agrees that in the performance of this Agreement it will comply with all applicable State, Federal and local laws and regulations. This Agreement shall be governed by and construed in accordance with the laws of the State of California, County of Monterey, and City of Salinas.

IN WITNESS WHEREOF, this Agreement is entered into by the parties hereto on the day and year first written above.

Attachment A **Insurance Requirements**

Contractor shall procure and maintain for the duration of the contract, and for three years thereafter, insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the work hereunder by the Contractor, his/her/its officers, agents, representatives, employees, and/or subcontractors.

MINIMUM SCOPE AND LIMIT OF INSURANCE

Coverage shall be at least as broad as:

1. **Commercial General Liability** (“CGL”): Insurance Services Office (“ISO”) Form CG 00 01 covering CGL on an occurrence basis, including products and completed operations, property damage, bodily injury and personal & advertising injury with limits no less than **\$2,000,000** per occurrence. If a general aggregate limit applies, either the general aggregate limit shall apply separately to this project/location (ISO Form CG 25 03 or 25 04) or the general aggregate limit shall be twice the required occurrence limit.
2. **Automobile Liability**: ISO Form CA 0001 covering Code 1 (any auto), with limits no less than **\$1,000,000** per accident for bodily injury and property damage.
3. **Workers’ Compensation**: as required by the State of California, with Statutory Limits, and Employers’ Liability insurance with a limit of no less than \$1,000,000 per accident for bodily injury or disease.
4. **Contractors’ Pollution Legal Liability and/or Asbestos Legal Liability and/or Errors and Omissions** (if project involves environmental hazards): with limits no less than \$1,000,000 per occurrence or claim, and \$2,000,000 policy aggregate, on an annual basis.

If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Contractor requires and shall be entitled to the broader coverage and/or higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

Self-Insured Retentions

Self-insured retentions must be declared to and approved by the City. At the option of the City, either: the Contractor shall cause the insurer to reduce or eliminate such self-insured retentions as respects the City, its officers, officials, employees, and volunteers; or the Contractor shall provide a financial guarantee satisfactory to the City guaranteeing payment of losses and related investigations, claim administration, and defense expenses. The policy language shall provide, or be endorsed to provide, that the self-insured retention may be satisfied by either the named insured or City.

Other Insurance Provisions

The insurance policies are to contain, or be endorsed to contain, the following provisions:

1. **The City, its officers, officials, employees, and volunteers are to be covered as additional insureds** on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts, or equipment furnished in connection with such work or operations and automobiles owned, leased, hired, or borrowed by or on behalf of the Contractor. General liability coverage can be provided in the form of an endorsement to the

Contractor's insurance (at least as broad as ISO Form CG 20 10, CG 11 85 or **both** CG 20 10, CG 20 26, CG 20 33, or CG 20 38; **and** CG 20 37 forms if later revisions used).

2. For any claims related to this project, the **Contractor's insurance coverage shall be primary** insurance coverage at least as broad as ISO CG 20 01 04 13 as respects the City, its officers, officials, employees, and volunteers. Any insurance or self-insurance maintained by the City, its officers, officials, employees, or volunteers shall be excess of the Contractor's insurance and shall not contribute with it.

3. Each insurance policy required by this clause shall provide that coverage shall not be canceled, except with notice to the City.

4. A copy of the claims reporting requirements must be submitted by Contractor to the City.

5. If the services involve lead-based paint or asbestos identification/remediation, the Contractor's Pollution Liability policy shall not contain lead-based paint or asbestos exclusions. If the services involve mold identification/remediation, the Contractor's Pollution Liability policy shall not contain a mold exclusion, and the definition of Pollution shall include microbial matter, including mold.

Acceptability of Insurers

Insurance is to be placed with insurers authorized to conduct business in the state with a current A.M. Best rating of no less than A: VII, unless otherwise acceptable to the City.

Waiver of Subrogation

Contractor hereby agrees to waive rights of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss. Contractor agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the City for all work performed by the Contractor, its employees, agents and subcontractors.

Verification of Coverage

Contractor shall furnish the City with original Certificates of Insurance including an additional insured endorsement and all required amendatory endorsements (or copies of the applicable policy language effecting coverage required by this clause) and a copy of the Declarations and Endorsement Page of the CGL policy listing all policy endorsements to City before work begins. However, failure to obtain the required documents prior to the work beginning shall not waive the Contractor's obligation to provide them. The City reserves the right to require complete, certified copies of all required insurance policies, including endorsements, required by these specifications, at any time.

Subcontractors

Contractor shall require and verify that all subcontractors maintain insurance meeting all the requirements stated herein, and Contractor shall ensure that City is an additional insured on insurance required from subcontractors. For CGL coverage subcontractors shall provide coverage with a form at least as broad as CG 20 38 04 13.

Maintenance of Insurance

Maintenance of insurance by Contractor as specified shall in no way be interpreted as relieving Contractor of its indemnification obligations or any responsibility whatsoever and the Contractor

may carry, at its own expense, such additional insurance as it deems necessary.

Special Risks or Circumstances

City reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

Attachment B
Scope of Work

Schedule of Charges for Security Services and Equipment

NUMBER OF SECURITY GUARDS: Three (3) (UNARMED)

HOURS OF GUARD SERVICE PER WEEK:

1) Security Officer 1: 168 hours

2) Security Officer 2: 168 hours

3) Security Officer 3: 168 hours

Total Hours: 504 a week

START DATE: Continued from Center for Independent Living Contract January 1, 2023

WEEKLY SCHEDULE:

1) Security Officer 1: Monday-Sunday

2) Security Officer 2: Monday-Sunday

3) Security Officer 3: Monday-Sunday

BILLING RATE(S):

- \$36.00 Per hour: Unarmed Security Officer
- On Call Consultation services (Included at a discounted rate)
- (2) Silvertrac Monthly reporting software licenses
- (2) Cellphone reporting devices (Included at no additional cost)
- Radios, signs, and limited security equipment
(Monthly equipment fee will be applied to invoice)

OVERTIME RATE POLICY:

The Overtime rate is for each hour of service rendered by each Security Officer in excess of eight (8) hours on any single shift within a twenty-four (24) hour period or in excess of forty (40) hours in any single week. For each security officer who is required to appear in court or at a deposition as a witness as a result of an occurrence at City's facility, Company shall bill City at the overtime rate for the number of hours the Security Officer is required to be present in court, plus parking charges and travel time to court. Overtime shall be calculated at 1.5 times the regular billed hourly rate after the 8th hour and up to the 12th hour of any single shift. Overtime work completed by a guard on any single shift after the 12th hour shall be calculated at twice the hourly billed rate.

HOLIDAY RATE POLICY:

The holiday rate is for any services by each security guard on any of the following holidays: New Year's Day, Labor Day, Presidents Day, Veterans Day, Memorial Day, Thanksgiving Day, Independence Day, and Christmas Day. Holiday rate shall be calculated at 1.5 times the regular billed hourly rate.

POST ORDERS: Will be added below and agreed upon by company and City.

Salinas City Center Improvement Association 2022 Annual Report

Approve a Resolution accepting and approving the Salinas City Center Improvement Association (SCCIA)
2022 Annual Report

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: COMMUNITY DEVELOPMENT

FROM: LISA BRINTON, DIRECTOR

BY: MICHAEL GOMEZ, ECONOMIC DEVELOPMENT ANALYST

ITILE: SALINAS CITY CENTER IMPROVEMENT ASSOCIATION 2022 ANNUAL REPORT

RECOMMENDED MOTION:

A motion to approve a Resolution accepting and approving the Salinas City Center Improvement Association (SCCIA) 2022 Annual Report.

EXECUTIVE SUMMARY:

The 2022 Annual Report is provided as Attachment 2 to this staff report. The approval of this report is at the discretion of the Council. With Council approval, the SCCIA Annual Report will also provide direction for SCCIA activities and use of assessment district funds in the fiscal year.

BACKGROUND:

In 2015, the City Council and the Board of Supervisors accepted the Salinas Downtown Vibrancy Plan as a strategic planning document to guide the revitalization of downtown Salinas including the government center. That same year, the City Council formed the Salinas Downtown Community Benefit District (CBD) and entered into a Management and Disbursement Agreement with the Salinas City Center Improvement Association (SCCIA) to implement the Management District Plan. SCCIA is to create an annual District budget and policies to comply with the District Plan; prepare and file quarterly and annual reports with the City reflecting compliance with the District Plan; and oversee the day-to-day implementation of District Plan Improvements.

As a CBD, parcels within the District boundary derive special benefit from programs and activities funded by assessments levied against the identified properties. The benefits, identified in the Management District Plan, are special and unique to the parcels within the District because programs and services (i.e. sidewalk operations/beautification; district identity; program management; and contingency/reserve) are provided directly and solely for the benefit of the

identified parcels. The objective of providing these special benefits is to keep the District area clean, safe, orderly, attractive, well marketed with special events and programs, and to increase commerce within the CBD boundaries.

The annual levy of assessment in each of the fiscal years referred to in the District Plan are conditioned on the approval, by resolution, of an annual report pursuant Section 36650 of the Property and Business Improvement District (PBID) Law. A summary of SCCIA's 2022 Annual Report and FY 2022-2023 annual budget follows.

DISCUSSION:

2022 Annual Report

The 2022 Annual Report covers the period from December 1, 2021, to November 30, 2022. The financial statement for this time-period is part of the Annual Report (Attachment 2). During this period, \$458,273.63 was collected in assessments and \$7,866.76 in grants was received. Total expenditures in FY 2021-2022 were \$424,674.58 resulting in a remaining net income of \$41,465.58 and a carry forward balance of \$288,782.88. Table 1 below provides a breakdown of expenditures by program area for the reporting period.

Table 1

PROGRAM OR ACTIVITY FUNDED BY THE DOWNTOWN	PERCENTAGE OF ANNUAL BUDGET	2022 EXPENDITURES
Sidewalk Operations, Beautification and Order	31%	\$ 206,230.87
District Identity and Streetscape Improvement	26%	\$ 108,206.40
Administration/Corporate Operations	34%	\$ 110,237.31
Contingency/City and County Fees/Reserves/Special projects	0%	\$ 0.00
<i>TOTAL</i>	<i>91%</i>	<i>\$ 424,674.58</i>

SCCIA 2022 program accomplishments and 2023 goals are outlined in the Annual Report (Attachment 2). Goals and accomplishments are organized by committee/program area. A summary of highlights is provided below. The entire list of accomplishments and goals by committee is provided in the attached Annual Report.

2022 Accomplishments Highlights

Sidewalk Operations, Beautification and Order

- Provided additional cleaning and debris removal during the Main Street Streetscape Improvement Project
- Provided maintenance and flower replacement for the Main Street Project; pots on the 400 block and various planters and hanging baskets

District Identity/Sidewalk Improvements

- Hired a district coordinator and a grant writer and successfully earned multiple grants to benefit the DISI efforts
- Worked as liaison with City for events in Downtown Salinas
- Added colored lighting to the Salinas Arch
- Continued to coordinate with various stakeholders to promote downtown

Land Use

- Advocated for and assisted individual business with proposed signage.
- Initiated a coalition to review City of Salinas permit process performance
- Worked in a coalition to review and comment on the City of Salinas process for permits for outdoor dining and retail.
- Held a board strategic Planning retreat for the first formal goal-setting meeting.

2023 Goals Highlights

Sidewalk Operations, Beautification and Order

- Continue to provide maintenance, beautification and security in a manner that is in line with budget.
- Seal the new sidewalks along Main Street to prevent staining.
- Perform semi-annual sidewalk pressure washing.

District Identity/Sidewalk Improvements

- Implement downtown banner program for local business, nonprofits, and events and study whether it could be profitable.
- Produce "Welcome to Salinas City Center" bags to new merchants including swag and relevant information.
- Add speakers for streaming music on light poles throughout Downtown.
- Monthly newsletter and biannual "What's Happening in SCC" with Mayor and SCCIA board members.

Land Use

- Review drafts and submit comment, guide decision making that conforms with Downtown Vibrancy Plan (DVP) outcomes
- Complete an Historic Sign Ordinance

2022-2023 Operating Budget

The SCCIA Board approved the 2022-2023 Operating Budget provided on page 15 of the Annual Report (Attachment 2). Total Assessment for 2022-2023 is estimated to be \$457,000 plus \$228,229 in 2021-2022 Carry Over funds, minus collection loss of \$9,140 for a total 2022-2023 Operating Budget of \$676,089. The projected expenses are estimated at \$545,600 for FY2022-2023 leaving the projected ending balance to be \$130,239. Operating expenditures are broken down by program/activity area in Table 2 below.

Table 2

PROGRAM OR ACTIVITY FUNDED BY THE DOWNTOWN	PERCENTAGE OF ANNUAL BUDGET	PROPOSED 2023 EXPENDITURES
Sidewalk Operations, Beautification and Order	60%	\$ 315,000.00
District Identity and Streetscape Improvement	22%	\$ 118,000.00
Administration/Corporate Operations	14%	\$ 107,850.00
Contingency/City and County Fees/Reserves/Special projects	4%	\$ 5,000.00
<i>TOTAL</i>	<i>100%</i>	<i>\$ 545,850.00</i>

2023-2024 Annual Assessment

The 2015 Engineers Report and Management District Plan includes the formula and methodology for calculating annual assessment amounts. The assessment amount is based upon a benefit calculation by linear frontage on all sides of the parcels that receive benefit; lot or parcel square footage; and building square footage. As permitted in the District's Engineer's Report, the SCCIA Board has approved an annual inflationary assessment rate increase of five percent (5%) to the method of assessment for FY 2023-2024. No boundary changes of the CBD Area are proposed. Levy of assessment for 2023-2024 is based on the following calculations.

- Linear frontage - Benefit Zone 1 \$5.2500 per linear foot/year
- Linear frontage - Benefit Zone 2 \$3.6645 per linear foot/year
- Lot size or the footprint of the parcel \$0.070508 per square foot/year
- Building square footage \$0.088749 per square foot/year
- Future residential condos \$0.21 per square foot of parcel unit square footage

The calculated assessment amount by Assessor's Parcel Number (APN) for FY 2023-2024 is included in the Annual Report (Attachment 2). Based on the above calculations, the estimated total assessment amount to be collected in FY 2023-2024 is \$479,266.13.

As stated in the Background section of this report, the annual levy of assessment in each of the fiscal years referred to in the District Plan are conditioned on the approval, by resolution, of an annual report pursuant Section 36650 of the Property and Business Improvement District (PBID) Law. The approval of such report is at the discretion of the Council.

CEQA CONSIDERATION:

The proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines section 15378). Any subsequent discretionary projects resulting from implementation of DVP recommendations will be assessed for CEQA applicability.

STRATEGIC PLAN INITIATIVE:

Downtown Vibrancy Plan implementation, including the operation of SCCIA as a CBD, most closely aligns with the 2022-2025 City Council Goals and Strategic Plan initiatives of Economic Development, Infrastructure and Environmental Sustainability and Public Safety. CBD assessments are used to provide an enhanced level of service to improve the appearance, cleanliness, and safety in the SCCIA district.

DEPARTMENTAL COORDINATION:

Community Development staff coordinated with SCCIA to prepare this report.

FISCAL AND SUSTAINABILITY IMPACT:

There is no fiscal or sustainability impact associated with the receipt and acceptance of this report. The City will pass the assessments collected by the County of Monterey through to SCCIA to be used in accordance with the approved District Management Plan and annual budget.

RESOLUTION NO. _____(N.C.S.)

**RESOLUTION ACCEPTING AND APPROVING THE SALINAS CITY CENTER
IMPROVEMENT ASSOCIATION 2022 ANNUAL REPORT FOR THE
DOWNTOWN SALINAS COMMUNITY BENEFIT DISTRICT AREA**

WHEREAS, on December 16, 2014, the City Council adopted Ordinance No. 2556, the City of Salinas' Community Benefit District Ordinance, authorizing the City to establish a Community Benefit District ("CBD") for up to 20 years to enhance the security, safety, appearance, and economic viability within such districts; and

WHEREAS, the Ordinance authorizes the City to levy and collect assessments on real property within such districts for the purpose of providing improvements and promoting activities that specially benefit real property within such districts; and

WHEREAS, the Ordinance authorizes the City to use the procedures set forth in the Property and Business Improvement District Law of 1994 (Streets & Highways Code sections 36600 *et seq.*, the "PBID Law") as modified by the Ordinance for purposes of forming an assessment district; and

WHEREAS, Articles XIIC and XIID of the California Constitution and Section 53753 of the California Government Code (Proposition 218 Omnibus Implementation Act) also impose certain procedural and substantive requirements relating to the notice, protests and hearing requirements pertaining to new or increased assessments; and

WHEREAS, on May 26, 2015, the City Council adopted a Resolution of Intention (Resolution No. 577) to form the Salinas Downtown Community Benefit District (the "District" or "CBD"). This action included adoption of a District Management Plan and Engineer's Assessment Report and direction to the City Clerk to mail ballot packets and notice of the public hearing to be held on July 21, 2015, to the proposed district property owners; and

WHEREAS, on July 21, 2015, the City Council adopted Resolution No. 20808 certifying the positive results of a duly held election process confirming that the majority of property owners within the District agreed to its formation; and

WHEREAS, on July 11, 2017, the City Council adopted Resolution No. 21226 N.C.S. amending 2015 Engineer's Report to add two properties to the District; and

WHEREAS, the boundaries of the Downtown Salinas CBD are as shown on the map attached, which is incorporated herein by this reference. No boundary changes of the CBD Area are proposed; and

WHEREAS, the 2015 Engineers Report and District Management Plan include the formula and methodology for calculating annual assessment amounts. The assessment amount is based upon a benefit calculation by linear frontage on all sides of the parcels that receive benefit; lot or parcel square footage; and building square footage; and

WHEREAS, as permitted in the District’s Engineer’s Report, the SCCIA Board has approved an annual inflationary assessment rate increase of five percent (5%) to the method of assessment for FY 2023-2024; and

WHEREAS, on June 13, 2023, the Salinas City Council of the City of Salinas considered 2021-2022 Annual Report submitted by Salinas City Center Improvement Association on April 25, 2023, in accordance with the Management and Disbursement Agreement with the City.

NOW, THEREFORE, BE IT RESOLVED BY THE SALINAS CITY COUNCIL:

SECTION 1. That the 2022 SCCIA Annual Report for the Salinas Downtown Community Benefit District and 2022-2023 Operating Budget is confirmed as originally filed.

SECTION 2. The SCCIA Board has approved an annual inflationary assessment rate increase of five percent (5%) to the method of assessment for FY 2023-2024. Assessment calculations provided in the 2022 Annual Report shall constitute the levy of assessments for the Salinas Downtown Community Benefit District for FY 2023-2024.

SECTION 3. The revenue received by levy of an assessment within the Salinas Downtown CBD in FY 2023-2024 shall be used only for purposes specifically permitted by the PBID Law and for no other purposes.

SECTION 4. The name of the business improvement area is “Salinas Downtown Community Benefit District” and its boundaries are as shown on the map attached, which is incorporated herein by this reference.

PASSED AND APPROVED this 13th day of June 2023, by the following vote:

AYES:

NOES:

ABSTAIN:

ABSENT:

About the Salinas City Center Improvement Association

In 2015, downtown property owners voted to form an improvement district and assess their properties. Early in 2016, the property owners formed a 501(c)3 public benefit corporation called Salinas City Center Improvement Association (SCCIA). SCCIA is now up and running, with a district manager and a full slate of volunteer committees working hard to implement the vision for a vibrant downtown.

There are two distinct areas of investment, funded with property owner assessments within the district. They are Sidewalk Operations, Beautification, and Order (SOBO) and District Identity and Streetscape Improvements (DISI). Each area has a full volunteer committee to develop its programs. A third committee, Land Use, works to promote City, County, and Public Agency cooperation for new development and planning.

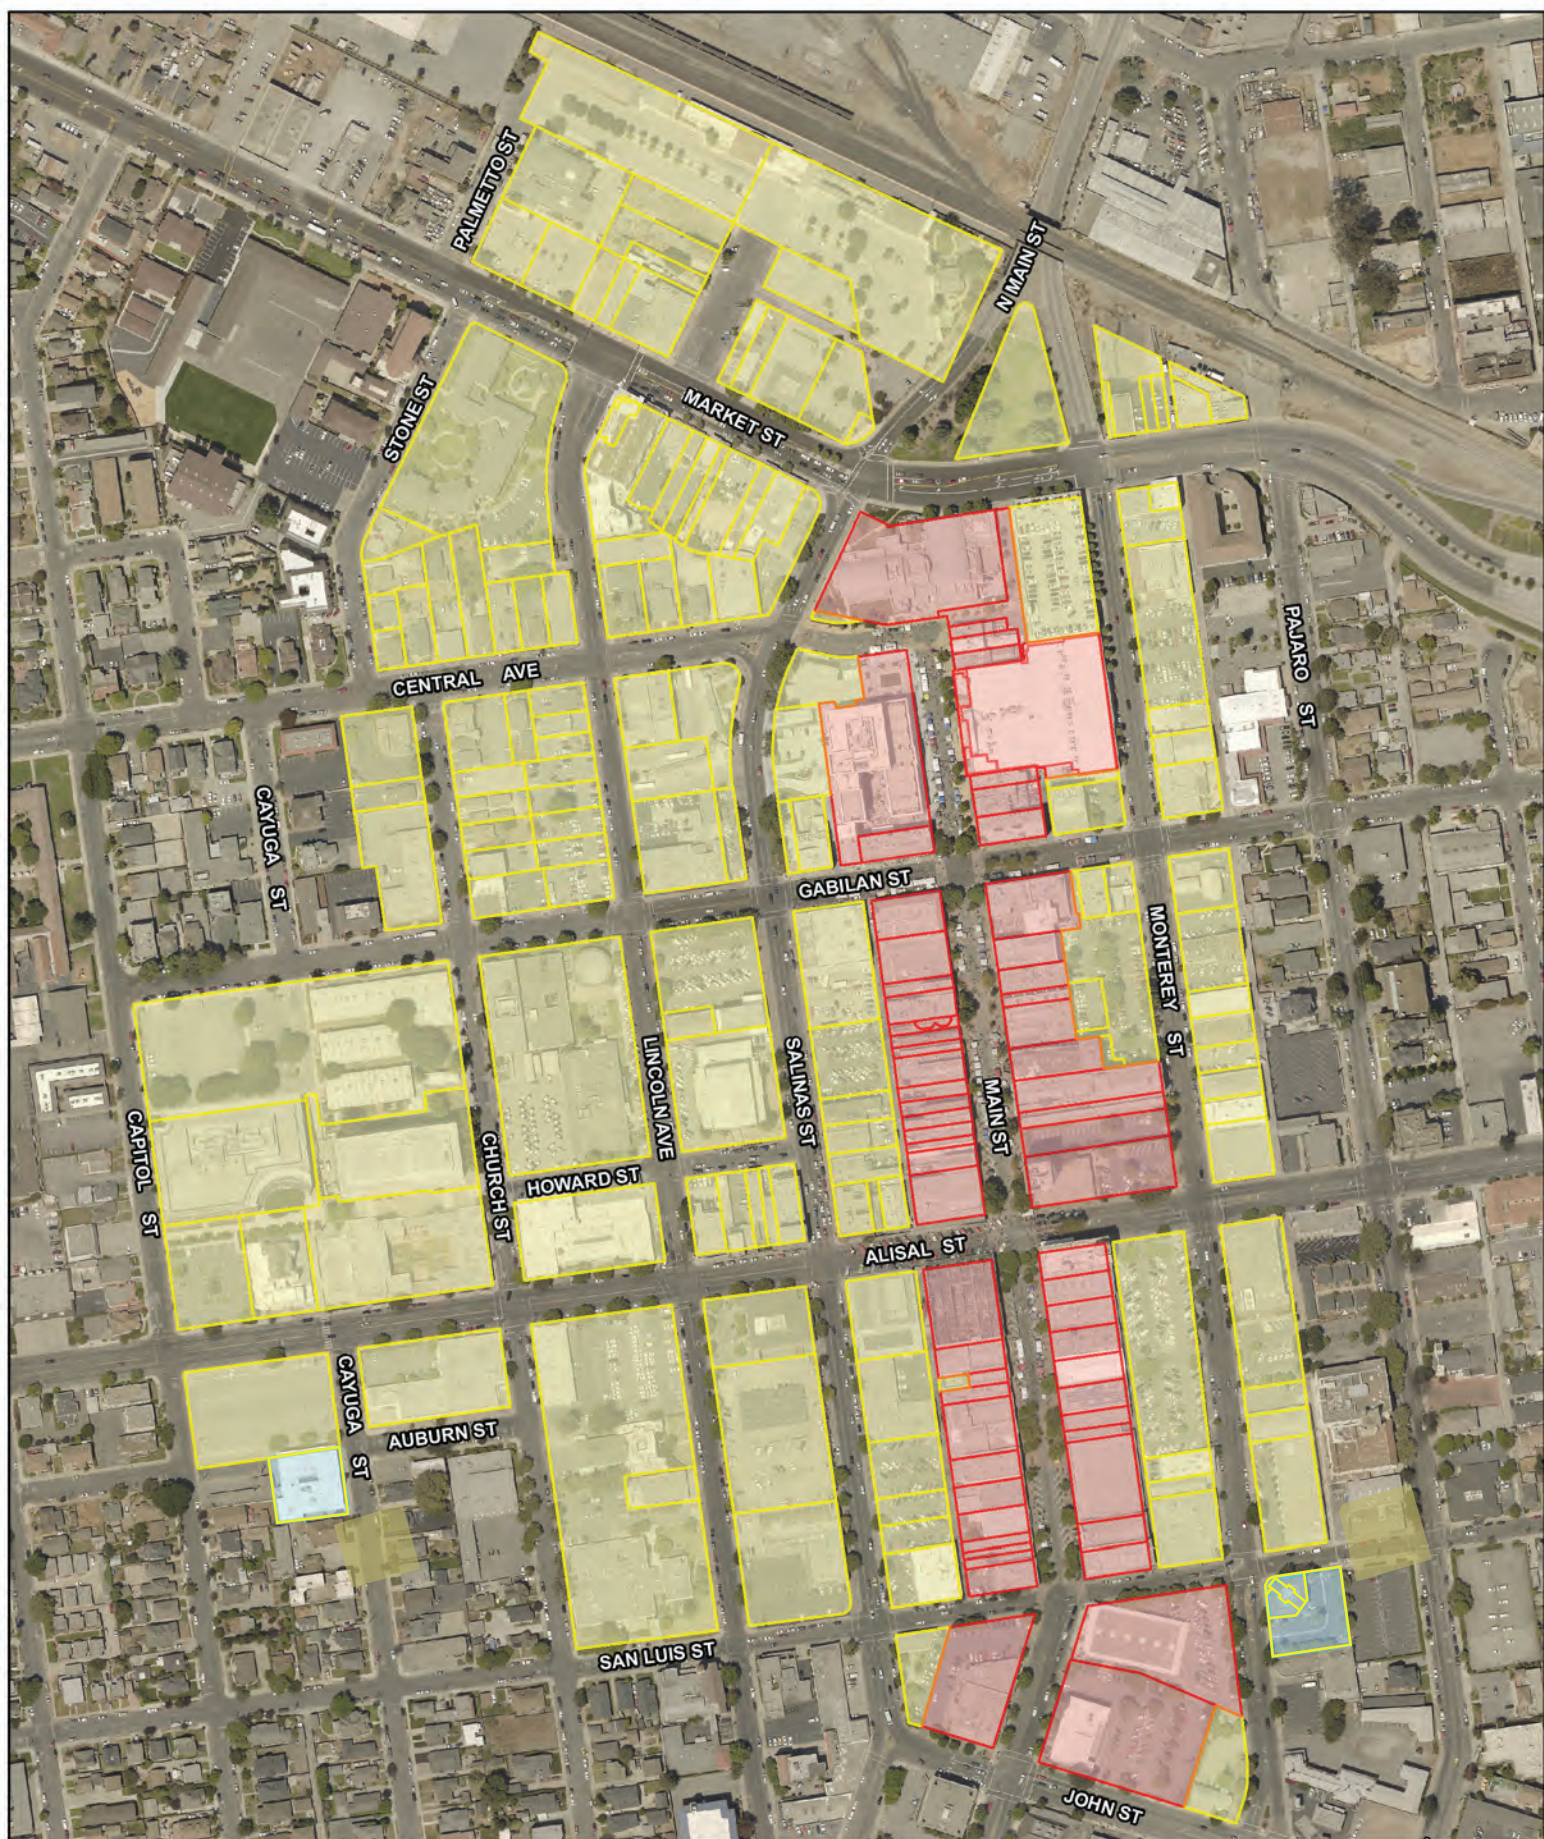

Property owners shape the makeup of downtown Salinas, to positively affect the business climate, and increase foot traffic, engagement, and entertainment. They support development of new residential units, professional businesses, thriving retail, restaurants, cafes, and services. The district is a welcoming and exciting place for young professionals, and a magnet for new businesses and jobs.

This modern, urban environment is achieved through a series of measures, including beautification, safety, attracting quality developers, and development of a strong district identity and marketing campaign. We embrace the rich culture and history of our people and our town.

The SCCIA Board of Directors welcomes and encourages public input and participation in issues that affect our community. For more information on how you can get involved, please contact District Coordinator Greg Hamer.

Fiscal Year 2021-2022

December 1, 2021 to November 30, 2022

ACCOUNTANTS' COMPILATION REPORT

To The Board of Directors
Salinas City Center Improvement Association
Salinas, California

Management is responsible for the accompanying statement of revenues and expenses – actual vs. budget – fiscal year 2021-2022 – cash basis of Salinas City Center Improvement Association (a nonprofit organization) for the twelve months ended November 30, 2022, in accordance with the cash basis of accounting, and for determining that the cash basis of accounting is an acceptable financial reporting framework. We have performed a compilation engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. We did not audit or review the statement of revenues and expenses – actual vs. budget – fiscal year 2021-2022 – cash basis nor were we required to perform any procedures to verify the accuracy or completeness of the information provided by management. Accordingly, we do not express an opinion, a conclusion, nor provide any form of assurance on the statement of revenues and expenses – actual vs. budget – fiscal year 2021-2022 – cash basis.

The financial statement is prepared in accordance with the cash basis of accounting, which is a basis of accounting other than accounting principles generally accepted in the United States of America.

The supplementary budget information contained in the statement of revenues and expenses – actual vs. budget – fiscal year 2021-2022 – cash basis is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information is the responsibility of management. The supplementary budget information was subject to our compilation engagement. We have not audited or reviewed the supplementary budget information and do not express an opinion, a conclusion, nor provide any assurance on such information.

Management has elected to omit substantially all the disclosures ordinarily included in financial statements prepared in accordance with the cash basis of accounting. If the omitted disclosures were included in the financial statement, they might influence the user's conclusions about the Company's revenues and expenses. Accordingly, the financial statement is not designed for those who are not informed about such matters.

We are not independent with respect to Salinas City Center Improvement Association.

Annual Work Plan

Accomplishments and Goals FY 2022/2023

Sidewalk Operations, Beautification, & Order (SOBO) Committee

Committee Members: Greg Piini, Joel Panzer

The Sidewalk Operations, Beautification, and Order Committee (SOBO) is charged with making the Salinas City Center District (District) a safer, more family-friendly place by overseeing private security and coordinating security needs with the City of Salinas Police Department. In addition, the SOBO Committee works on beautification efforts to keep the District well maintained and landscaped for the public, merchants, and property owners' enjoyment.

The SOBO Committee was established in 2016. Over the past six years, SOBO has been run by a volunteer group that addresses security and sidewalk maintenance. Most areas of responsibility are provided under contract and have not varied significantly for several years.

SOBO's services also adapted over the years due to the challenges presented by COVID. This primarily included switching security vendors to Allied Security in 2020 and expanding Smith & Enright's sidewalk maintenance to our entire District after losing Hope Services in 2020.

Committee Accomplishments FY 2021/22

- Continued to contract with Allied Security for security services throughout our District. To improve security, Allied provides foot patrol six days a week; interacts with the local homeless population; responds to calls from local merchants, businesses, and property owners; and coordinates with the police department.
- Continued to contract with Smith & Enright for landscaping and sidewalk maintenance services to the entire District. Smith & Enright's services cover the entire District and include trimming, weeding, sweeping, blowing, and picking up debris twice a week.
- Provided maintenance and additional sidewalk pressure washing/cleaning for the Main Street Project.
- Provided maintenance and flower replacements for the Main Street Project, pots on the 400 Block and various planters and hanging baskets.
- Expanded Smith & Enright's contract to include maintenance of the new planted areas of the Main Street Project.
- Supervised the work efforts of Kevin Hayes in his role staffing the Streetscape Maintenance position. Kevin provides valuable maintenance throughout the District as needed, with positive

feedback from the business community. His electric utility vehicle helps Kevin be more efficient in managing our District.

- Implemented a security camera rebate program throughout the District but dismantled the program early due to lack of interest. One system was installed through this program at the NW corner of Salinas Street and Alisal Street.

Committee Goals FY 2022/2023

- Continue to provide maintenance, beautification, and security to our District in a manner that is in line with our budget.
- Seal the concrete on the sidewalks along Main Street to prevent staining and ease cleaning.
- Add semi-annual pressure washing to the new sidewalks in the 2022/23 FY. Evaluate the effectiveness of the current pressure washing program.
- Transition the day-to-day oversight of SOBO's operations to SCCIA's District Coordinator, including supervising maintenance staff, overseeing payroll, communicating with SCCIA constituents, and purchasing supplies, as needed.
- Work with the City on replanting the leaning trees on Main Street.
- Create additional job position to augment the Maintenance Team.

Budget FY 2022/23

We assume that the SOBO budget will remain the same for the 2022/23 Fiscal Year with an allocation of \$274,200. These fees will be allocated as follows:

Streetscape Maintenance:

Employee payroll: \$49,200

General Maintenance (Smith & Enright): \$95,000

Pressure washing: \$10,000

Total Streetscape Maintenance: \$154,200

Security (Allied): \$120,000

Total: \$274,200

Security

Allied Security raised their rates mid-year to reflect needed cost of living wage increases for security staff. We will continue to contract with Allied Security at a cost of \$119,808 a year (\$2,304.00/week). This contract provides security coverage from Monday through Saturday. We have not had any communication regarding potential cost increases for the upcoming year.

Landscaping and Maintenance – Zones 1 & 2

Smith & Enright currently provides maintenance to the entire District. The cost is scheduled to increase on January 1, 2023 to \$7,875 per month, or approximately \$94,500 per year. This cost is allocated \$4,140 per month to Zone 1 and a portion of Zone 2 (Monterey Street to Salinas Street) and \$3,725 per month for the remainder of Zone 2. We anticipate continuing with Smith and Enright for Zone 1 for FY2022/23 and will explore switching Zone 2 back to Hope Services.

HOPE provided maintenance service to Zone 2 prior to COVID-19 and is gearing up to resume contracting again. SOBO reached out to Hope Services recently and are awaiting current pricing.

Periodic maintenance “add-ons” do come-up throughout the year. For FY2022/23, we anticipate additional costs related to replacing plants as needed, upgrading the hanging baskets, treating aphids and other pests and diseases, and straightening and/or replacing five (5) leaning trees along Main Street. These items will be considered on a case-by-case basis and paid for from the FY2021/22 carryover.

Sidewalk Pressure Washing

Sidewalk pressure washing in FY2021/22 was provided by the Farmer’s Market and by Taylor Farms. SOBO anticipates provided two cleanings in FY 2022/23 of the Main Street sidewalks. The cost is currently \$900 per block (1 side), and this cost is anticipated to continue in FY2022/23. Continued participation with the Farmer’s Market and Taylor Farms will continue to be explored.

Sidewalk Sealing

Sealing the new concrete along Main Street is a priority; however, SOBO does not have any cost information yet on this project. SOBO will be researching options and obtaining bids in the near future and presenting options and costs to the Board. If approved, the sealing cost will likely be paid for from the FY2021/22 carryover.

Conclusion

At this point, SOBO operations have matured and are continuous with little variation. Having a “dialed in” program makes oversight by SOBO volunteers much easier than in prior years.

The proposed SOBO Budget for 2022/23 is estimated at \$272,000. Ideally, SOBO will come back to the SCCIA Board to inform them of costs associated with HOPE Services, but no action will be needed to engage HOPE if costs are in alignment with current costs incurred by Smith and Enright for Zone 2.

SOBO also looks forward to working with the new district coordinator position to provide oversight of the day-to-day management.

District Identity & Streetscape Improvements (DISI) Committee

Committee Members: Audrey Wardwell, Meryl Rasmussen, Jenna Hanson Abramson

Committee Accomplishments FY 2021/22

- Hired a district coordinator.
- Received Salinas Neighborhood Grant and successfully activated Downtown Salinas alleyways with seasonal art.
- Worked with City of Salinas staff to streamline communication and processes.
- Hired a grant writer and successfully earned multiple grants to benefit DISI efforts.
 - Received grants from California Arts Council, Monterey Peninsula Foundation, Harden Foundation, and the Arts Council of Monterey County.
- Working with Hijos del Sol for mural work.
- Worked as a liaison with City for events in Downtown Salinas (SVFW, Relay for Life, Italia Fest, Laguna Seca Indy Car Event, etc.)
- Enhanced the Downtown banner process.
- Added colored lighting to Salinas Arch.
- Hosted Downtown Salinas walking tour and lunch with Blue Zones, city employees and important stakeholders.

- Coordinated with Rotary to promote downtown (Bruhn and 201 tours, and Bruce Taylor presentation of “What’s to Come Downtown”).
- Continued:
 - Coordinating and hosting Tree of Peace lighting event, Salinas official holiday tree.
 - Downtown Salinas holiday décor and wrapped poles with garland and lights.
 - Running advertisements on KSBW promoting downtown.
 - Communicate with merchants on upcoming events and news via email and Facebook group.

Committee Goals FY 2022/2023

- Continue to enhance Downtown banner program and study whether it could be profitable.
- Produce “Welcome to Salinas City Center” bags to new merchants and “Salinas City is my Home” for tenants including swag and relevant information.
- Add speakers for streaming music on light poles throughout Downtown.
- Work with Chamber for “Downtown Beer Passport”.
- Enhance communication and visibility with Downtown merchants by way of new District Coordinator.
 - District Coordinator to work on development of a Downtown merchant group.
 - District Coordinator to contact other similar districts for collaboration meetings.
- Monthly newsletter and biannual “What’s Happening in SCC” with Mayor and SCCIA board members.
- Work with City of Salinas to implement an event criteria checklist and possible coordinating fee.
- Continue:
 - Social media postings, print advertisements with the County Weekly, and KSBW commercials.
 - Holiday décor and festivities including tree lighting.
 - Alley activation installations.
 - Mural program for Downtown Salinas.
 - Partnerships with major Downtown stakeholders: CSUMB @ Salinas City Center, Downtown Rotary, Alvarado on Main, Blue Zones, Taylor Farms, etc.

Land Use Committee (LUC)

Committee Members: Jason Retterer, Catherine Kobrinsky Evans, Steve Ish, Frank Saunders, Larry Bussard, Greg Findley, Brad Slama, Peter Kasavan, Jay DeSerpa, Kevin Dayton

Committee Accomplishments FY 2021/22

Ongoing Support for and Implementation of the Downtown Vibrancy Plan

Within a five-week period, Monterey County news media reported on progress and achievements of the Downtown Vibrancy Plan. Supporting and attracting more residential and retail development of the Downtown:

- New Businesses and Apartments in Formerly Decrepit Buildings Are Bringing Life to Oldtown Salinas - Monterey County Weekly - September 29, 2022
- Best Downtown Revitalization (2022): Oldtown Salinas - Monterey County Weekly - September 29, 2022
- Heart of Salinas Gets a New Life - Monterey Herald - October 15, 2022 (long, comprehensive article in Sunday edition)
- Salinas City Council Finds a Compromise on Inclusionary Housing Requirements in Downtown - Monterey County Weekly - October 19, 2022
- Historic Downtown Salinas Building Now Ready for People to Call Home - KSWB - October 25, 2022
- 301 Main Street in Downtown Salinas Has First Renters Moving in Next Week - Monterey Herald - October 27, 2022
- Applications Pour in for New Main Street Apartments in Downtown Salinas - Salinas Californian - October 28, 2022

Progress towards implementation of Vintage Sign Ordinance.

City of Salinas plans to engage a consultant to draft a Vintage Sign Ordinance for consideration by Salinas City Council in 2023. 3. Advocated for and assisted individual business with proposed signage.

Initiating a coalition of SV Chamber and Alisal reps to resurrect the Salinas Valley Chamber of Commerce's Business Development Committee ("BDC") (an advisory group to the City) for an objective review of City of Salinas permit process performance.

Advocated for and supported the Salinas City Council enactment on June 21, 2022, of the Downtown Outdoor Dining Forgivable Loan Program with \$150,000 in funding.

Worked in a coalition to review and comment on a City of Salinas process for permits for outdoor dining and retail.

Tracked implementation and compliance with the City of Salinas Food Truck/Mobile Vendor Ordinance in Downtown. No problems identified.

Achieved a compromise through the Salinas City Council as various interests made arguments to completely repeal or completely retain the conditional exclusion of Downtown from the city's inclusionary housing ordinance. More expensive adaptive reuse projects will continue to be exempt.

Held a Board Strategic Planning Retreat for the first formal goal-setting meeting since the establishment of the Salinas City Center Improvement Association, Downtown Salinas Community Benefit District, and Downtown Vibrancy Plan in 2015.

Progress toward construction of a parking structure at Church Street & Gabilan Street. Supported City/County adoption of a MOU relating to Downtown, which includes a schedule and timeline for assessing the feasibility of a new structure. Stakeholder meetings occurred to engage the community on possible design alternatives.

Committee Goals FY 2022/2023

Objective: City of Salinas Achieves Reputation Among Regional Developers and Small Businesses as Friendly for Obtaining Permits on Downtown Projects and Activities.

- City/County financing, environmental review, and approval of a parking structure at Gabilan and Church with design standards that contribute to the aesthetic character of downtown.
- Support development of parking district.
- Drafting and adoption of Zoning Code amendments that would:
 - Reform the traffic impact fee structure in the Traffic Fee Program and Ordinance to significantly reduce fees and financial burden on businesses proposing to reuse or repurpose existing buildings.
 - Streamline the permit approval process for certain kinds of vintage signs as an initial first step to an ultimate overhaul of sign ordinance and permit program and the creation of a new Vintage (Historic) Sign Ordinance.

- Participate in coalition of SV Chamber and Alisal reps to resurrect and implement prior permit reform plan that was spearheaded by the Salinas Valley Chamber of Commerce. Participate in the BDC to advocate for this plan and continuing improvements in the City permit process.
- Enactment, implementation, and monitoring of business/user-friendly process for outdoor dining and retail permits.
- Advocate for and support MST Salinas Transit Center Relocation to Intermodal Transportation Center.
- Illumination of Facades of Historic Buildings on Main Street.
- Monitor and report dilapidated vacant buildings for potential City enforcement action.
- Advocate for and support future development of a;
 - Boutique Hotel.
 - Grocery store.
 - Student, workforce, and other housing in Downtown Salinas.
- Advocate and support relocation of Farmer's Market from Main St. to Intermodal Transportation Center or other location.
- Support, engage, advocate, and cross promote with the Heritage Park at the ITC.
- Advocate for removal of diagonal pedestrian crossings.
- Salinas Rotary Arch: Complete 3-way maintenance agreement with SCCIA, Salinas Rotary and City of Salinas.
- Participate in City outreach in their process of updating the General Plan Elements. Assure integration of EDE policies relating to these elements as intended.
- Support and advocate for the continued implementation of the Downtown Vibrancy Plan and request City report on progress annually. (at least)
- Support and advocate for the continued implementation of the award-winning Economic Development Element (EDE) of the General Plan and request City report on progress annually as provided in the EDE.
- Seek grant funds to support the work of the LU Committee.

New businesses and apartments in formerly decrepit buildings are bringing life to Oldtown Salinas.

Celia Jiménez

Sep 29, 2022

The art deco-inspired interior of Alvarado Street Brewery's Salinas location nears completion, with an anticipated opening date in late October.

DANIEL DREIFUSS

A watershed moment is happening in Salinas' downtown. With the remodeling of two iconic buildings underway, a transformation that was already in progress is coming to fruition. The Dick Bruhn building, vacant since a 2016 fire, will be 19 apartments on the second and third floors, with commercial space on the first floor. Just down the block on Main Street, the former craft store Beverly's is being transformed into a second location for Monterey-based Heirloom Pizza, with a concept that includes a live music venue, set to open in 2023. The former Rabobank building will have 50 studio apartments upstairs, and the first floor will become a new, 5,000-square-foot outpost of Alvarado Street Brewery, which on Sept. 26-27 held a job fair in hopes of hiring up to 40 employees.

"I was looking at Oldtown Salinas for years," says JC Hill, co-owner of Alvarado Street Brewery. Recent changes like streetscape modifications that made one-ways into two-way streets, the Salinas arch and more businesses moving in made it the right time to open a new location on Main Street.

Salinas' Downtown Vibrancy Plan, [approved by City Council in 2015](#), has been in the works for over a decade. In the past couple of years the city invested over \$10 million in infrastructure, including sewer and water lines, roads and sidewalks.

Besides infrastructure, city officials wanted to make downtown more enticing for developers. In 2018, they passed an adaptive reuse ordinance, which allows the conversion of non-residential buildings over 50 years old into residential spaces. "We removed a lot of the barriers," says Lisa Brinton, assistant director in the Community Development Department. Those included parking restrictions and open space requirements.

These revitalized buildings are just the beginning. The old Greyhound Bus station building, which – like the Bruhn and Beverly's buildings, is also owned by the Taylor Group behind Taylor Farms – is expected to see a makeover into offices or housing. Taylor Farms built its headquarters downtown in 2015, kickstarting progress.

City staff are working with other developers for city-owned parking lots 1, 8 and 12 for different projects, which are early in negotiations. "We'll see a lot of development in the next three to five years in the downtown," City Manager Steve Carrigan says. He expects those plans to appear on City Council agendas by early November.

The city is also working with the county to build a three-story, 600-space parking structure on Church and Gabilan streets.

Carrigan says the city has seen an uptick of visitors in downtown Salinas in the past couple of years and with more offices, apartments, and businesses coming into downtown traffic is expected to increase.

Salinas also welcomes outdoor dining and will keep encouraging businesses to obtain permanent outdoor-dining permits.

Some improvements listed in the 2015 Vibrancy Plan remain just ideas, like a grocery store.

Best Downtown Revitalization (2022)

Sep 29, 2022

Oldtown Salinas

You know that long-promised urban renewal that was supposed to make Oldtown Salinas cool? It's on. The transformation owes much to a one-man redevelopment agency, Bruce Taylor, who moved his company's (Taylor Farms) headquarters downtown 10 years ago. The results of that investment are tangible and impressive: new restaurants, breweries and retail establishments have sprung up to make Salinas' downtown lively and fun. In May 2021, a new landmark took hold: a 70-foot welcome arch was erected over Main Street. More is on the way. Alvarado Street Brewery is set to open in fall of 2022 on the ground floor of the old Rabobank tower, which will have 49 apartments above it. The burnt-out Dick Bruhn building, another Taylor project, features 19 apartments above street-level restaurants. The old Beverly's Fabrics, a classic building, will soon house Heirloom Pizza Co. and a live music venue, and Taylor also bought the long-deserted Greyhound bus depot that he plans to convert into office space and workforce housing. The future is right now for Salinas.

Heart of Salinas gets a new life

The reinvented Salinas sign that graces the revitalized downtown has become a focal point and favored picture frame for the community. (James Herrera/Monterey Herald)

By **JAMES HERRERA** | jherrera@montereyherald.com | Monterey Herald

PUBLISHED: October 15, 2022 at 6:19 a.m. | UPDATED: December 23, 2022 at 3:05 p.m.

SALINAS – The 100 through 300 blocks of Main Street in Salinas have been referred to as old town, downtown and city center, but whatever it's called, the heart of Salinas is seeing a resurgence.

"Few people recognize this, but downtown Salinas is an outstanding example of the transformation of a struggling downtown into the transit-oriented, density-housing ideal that the state wants to see to address climate change and improve the quality of life for California residents," said Kevin Dayton, Salinas City Center Improvement Association government affairs director.

A shift in how the area is perceived is due in large part to the city's downtown vibrancy plan, said Salinas Mayor Kimbley Craig. The work there is about 90% complete.

Still to come is the possibility of public art and a mural in a key walkway, but those are finishing touches to what appears to be a fully-realized reimagination of a community's downtown, she said.

The revitalization happened over nine years with planning and community outreach starting in 2012.

The Salinas Downtown Vibrancy Plan was approved in 2015 by the Salinas City Council and Monterey County Board of Supervisors after two years of "community input and discussion," said Dayton. "Much of the impetus came from property and business owners in the downtown. It was not a city project. A consultant helped us who had experience with transforming Little Italy in San Diego."

The plan's goal is to preserve Salinas' connection to history while creating a mix of residences, businesses, civic institutions, recreation, and culture in a safe and vibrant environment.

The city's center has been transformed in many ways such as, returning to a two-way traffic pattern with a mix of angled- and parallel-parking spaces, expanded walkways and gathering spaces, festoon and mood lighting along the street and a focal point at its heart in the form of an eye-catching nameplate.

Craig said she believes the new, updated Salinas sign that arches about two stories high and 70 feet across Main Street is the defining feature of the reinvigorated downtown. The structure incorporates the name of the city using the same font from an earlier incarnation that was installed in 1915 but removed long ago, and

Getting to this point in the downtown's revitalization was a result of policy changes in the city a few years ago including the blight accountability ordinance and the adaptive reuse ordinance. Those, along with other provisions in the municipal code, allowed developers to convert some historic buildings into mixed-use projects, said Dayton.

Three major taxpayer-funded construction projects to improve the infrastructure of the downtown — the Main Street Streetscape Project, the West Alisal Downtown Complete Streets Project, and Phase One of the Intermodal Transportation Center/Salinas Rail Extension Kick-Start project — were also key to the downtown Salinas transformation, he said.

The downtown area has a number of buildings that maintain their historic profiles such as the McDougall building, which was built around 1900 on the corner of Main and Gabilan streets. It currently houses businesses including First Awakenings restaurant.

Chris Ulrich, co-owner of First Awakenings, said his business has always been steady "but we've seen more people downtown throughout the week. There's more restaurants and bars and things to do."

Ulrich said parking is a problem since the revitalization change to two-way traffic ate up some spots.

Ulrich and his partner Craig Bell own locations in Monterey and Salinas and have had the downtown restaurant for 30 years. He likes the fact there is more competition on Main Street.

"More business promotes more business," said Ulrich. "It gives people more of a choice."

The downtown area has a parking structure near the Steinbeck Center along with street parking and a number of parking lots, but Dayton said more parking garages are being planned, including one the city and county are working on to accommodate more people living in the downtown area in the future.

The intersection at Main and Gabilan streets is also home to the Glikbarg building built in 1907 to house the Salinas City Bank. It's currently home to Dubber's Oldtown Bar and Grill on the northwest corner.

But new buildings and reinvented spaces also populate old town exemplified by projects from Bruce Taylor, who first constructed the Taylor Farms headquarters in 2015 in the 100 block of Main Street where the Cominos Hotel once stood. Taylor later said in a company newsletter that this was the first step toward his goal of revitalizing the city and that by opening the company headquarters in the center of town, it would create “the living room of Salinas,” and be the catalyst for change in the area.

The much-anticipated renovation of what was last the burned-out shell of the former Dick Bruhn building is nearing completion. When the project at the property, owned by Bruce Taylor's Taylor Fresh Foods, is finished it will add 19 residential units and retail spaces to downtown Salinas. (James Herrera/Monterey Herald)

Another of Taylor's projects is taking the building he bought in 2020 from a burned-out shell and turning it into a mixed-use space of 19 residential units and five retail spots. The building was originally constructed in 1925, at the southwest corner of Main and Alisal streets, as the headquarters of the agribusiness sector in the Salinas Valley, housing the Farmers Mercantile Exchange. It would later become a Montgomery Ward department store, then home to Dick Bruhn, a clothing store, which occupied the space for 57 years until bankruptcy closed it in 2007. A fire broke out in the unoccupied building in February 2016, leaving only the exterior walls intact. Today, the nearly-finished renovated building has design elements that reflect the Taylor headquarters property on the opposite end of Main Street.

Across the street from the Taylor project on the southeast corner of the Main and Alisal intersection, is a classic example of an art deco to moderne building built around 1930. It was last the Rahobank offices and is now a project by Brad Slama

A former bank building constructed in an art deco to moderne style at 301 Main Street is undergoing a renovation to make it a mixed-use structure of studio apartments and a dining and drinking establishment on its first floor. (James Herrera/Monterey Herald)

Yet another Taylor property in downtown is the former Beverly's Fabrics at 344 Main St., an art deco structure that is in the process of becoming Heirloom Pizza's second location aside from its premiere spot in Monterey.

In the 200 block of Main Street, United Way Monterey County acquired a building in June for its Community Impact Center that was built circa 1900. The Salinas Elks Lodge occupied the second floor for many decades.

"It feels like we've moved into a thriving zone. We're able to walk to see our partners at the city and county, and it's great to be able to meet up with folks at some of the amazing restaurants and cafes," said United Way Monterey County President and CEO Katy Castagna. "The city itself is more exciting, walkable, safe and visually appealing than ever before."

Dayton said that soon "We'll have five breweries on Main Street."

With downtown Salinas having a renaissance, the community has come out to experience the new vibe.

Steve McShane, CEO of the Salinas Valley Chamber of Commerce said the improvements to downtown have been "groundbreaking for the city and the region" and reports that a majority of merchants, property owners and customers have responded with positive feedback.

He said that “before the paint was even dry, downtown was host to expanded, existing and new events.”

Families choose from the bounty of produce and vendor goods at the weekly farmers market in downtown Salinas. (James Herrera/Monterey Herald)

From a weekly farmers market, to festivals, celebrations and car shows, the three blocks of Main Street has become a draw.

The Salinas City Center Farmers Market, which operates year-round from 9 a.m. to 2 p.m. each Saturday, fills the 300 block of Main Street between Alisal and San Luis streets with a number of vendors selling produce, specialty food items, arts and crafts, and other goods, to eager crowds rain or shine.

“There are a number of special events occurring in downtown Salinas,” said McShane. “This has been a boon for most businesses. For any merchants that have been inconvenienced, feedback is important as we continue to develop a programming schedule that works best for everyone.”

He added that newcomers to downtown Salinas are thrilled by the improvements and the charm.

“This last weekend I was in two downtown establishments and ran into folks from

At the top of downtown is the National Steinbeck Center in the CSU Monterey Bay at Salinas City Center building.

The university acquired the Steinbeck Center in 2015, purchasing the building and the land from the city while keeping the Steinbeck Center and museum as a tenant in a lease agreement. The facility is a conference, meeting, and event space for the community.

An important asset to the future of downtown Salinas is located nearby at the northwest corner of Market and North Main streets.

The Intermodal Transportation Center has recently seen its own renovation in anticipation of Caltrain connecting Salinas with Gilroy, San Jose and San Francisco.

Once Caltrain rail service between Salinas and points north becomes reality, the draw of Salinas City Center will be tested in its ability to attract visitors to spend time and money downtown.

“We currently estimate that service could begin as early as 2025, once the improvements have been constructed at Salinas and Gilroy,” said Christina Watson, Transportation Agency for Monterey County director of planning. “The project is currently in the final design and property acquisition stage. We expect to go out to bid for construction in early 2024.”

The first phase of the Monterey County Rail Extension project focused on improvements to the existing Salinas train station and was completed in early 2021. It included extending Lincoln Avenue, installing bike lanes and storage, improving pedestrian access and designating loading berths for Monterey-Salinas Transit and intercity buses, while constructing and repaving the parking lots.

Phase two will be the construction of a train layover facility for Caltrain, including a train crew base building and storage shed, fencing and lighting, as well as the construction of a new platform.

Amtrak’s Coast Starlight is expected to continue to stop at the existing Salinas train depot once a day on its round trip between Los Angeles and Seattle, said Watson.

Before the COVID-19 pandemic, the Transportation Agency for Monterey County and its partners had done multiple ridership studies over the years and estimated between 150,000 to 520,000 people would ride the rails annually between Salinas

“We have not done a new ridership study since the pandemic decimated transit ridership across the state, but Caltrans has a new rail ridership model they are using for the forthcoming 2022 State Rail Plan, and we look forward to finding out the results of that analysis,” said Watson.

A hotel could possibly be built at the train station to give visitors a lodging opportunity close to Salinas City Center, said Craig.

The Intermodal Transportation Center recently saw the California Welcome Center and its Heritage Center museum move into the former Southern Pacific Freight Depot No. 1A Station Place. Operated by the Salinas Valley Tourism and Visitors Bureau, the welcome center aims to help people discover the region’s attractions. The idea is to expand the heritage center display space, eventually making it part of a heritage park at the train station site. It would include the first mayor’s house already at the property and the Monterey and Salinas Valley Railroad Group, as part of the transportation center.

Sam Farr, a former Central Coast congressman who represented the region for more than two decades, was at an event recently held at the Heritage Center and was impressed.

“We have the opportunity,” Farr said, “to develop the Salinas Valley into one of the most exciting rural tourism places in the world.”

https://www.montereycountyweekly.com/opinion/mcnow_intro/salinas-city-council-finds-a-compromise-on-inclusionary-housing-requirements-in-downtown/article_d1c3a852-500d-11ed-9c8e-33a984e133bf.html

Salinas City Council finds a compromise on inclusionary housing requirements in downtown.

Celia Jiménez

Oct 19, 2022

Dozens of residents celebrate outside of Salinas City Hall on Oct. 18, following the council's decision to modify an inclusionary housing exemption in downtown Salinas. Celia Jiménez

Celia Jiménez here, thinking about how compromise is a great baseline to start a dialogue between opposing parties.

Yesterday, Oct. 18, Salinas City Council decided to keep an inclusionary housing exemption in place for adaptive-reuse building projects only and remove it for new construction. This decision was a compromise that the council hopes will continue to incentivize developers who want to remodel buildings in downtown, and also create more opportunity for lower-income residents to live in the area.

“I know what it's like to live in affordable housing and to be discussed in a way that makes you disposable,” said an emotional City Councilmember Anthony Rocha. (Rocha was the one who pushed for reviewing this exemption, five years after it was first introduced.) “We are not dispensable. We should be treated as a priority because this is our community.”

The plan as approved is a compromise: No requirement for existing buildings (which are more costly for developers) and reinstate the requirement of inclusionary units in new construction.

When Rocha’s motion passed, residents inside council chambers responded with cheers and applause, then moved outside to celebrate this win. Over 100 people showed up. Many wore green and held Center for Community Advocacy flags. People spoke in English, Mixteco and Spanish. Most supported removing the inclusionary housing exception in its entirety. Jesus Estrada, an organizer with CCA, says if inclusionary housing was constructed downtown, he would apply to live there.

For over two hours—half of yesterday’s council meeting—city staff, councilmembers and residents shared their thoughts about the inclusionary housing ordinance exemption in downtown Salinas (which, by the way, extends beyond Main Street; It’s called Central City Overlay).

“This ordinance is for the whole city, not just where it's convenient,” said Chris Barrera, Salinas 2055 LULAC president. “Oldtown belongs to all of us—the entire city, the residents of Salinas. And we all deserve an opportunity.” Barrera emphasizes that all people should have the opportunity to live in different parts of the city.

Frank Saunders, a downtown property owner, and Kevin Dayton, of the Salinas City Center Improvement Association and the Salinas Valley Chamber of Commerce, highlighted the revitalization currently underway in downtown Salinas. Saunders noted that

since the city put the exception in place, only two residential projects—the Bruhn and Rabobank buildings—were remodeled in the area. (Units at the Bruhn Building are renting for \$2,500-\$3,500/month; in the Rabobank Building, studios are going for \$1,500/month.)

Natalie Herendeen, executive director of CCA, passionately asked for creative solutions. “If they’re building houses, we have housing and we have jobs. Find ways to incentivize them, not at the cost of community members and not at the cost of well-being.”

Developers have shared that without an exemption to the city’s ordinance, they wouldn’t be remodeling buildings and contributing to the Oldtown revitalization. And there’s the rub:

“If housing isn’t built, there is no inclusionary housing,” noted Megan Hunter, the city’s director of community development.

Salinas’ downtown area has the highest number of affordable units in the city, and five years ago—after over two years of negotiations—developers and housing advocates came out with a plan to bring more housing to downtown: To exempt housing projects from the city’s inclusionary housing requirement, requiring that 12 to 20 percent of units are set aside for affordability criteria established by HUD.

“This is aimed at getting the market rate developers to do their fair share,” says Matt Huerta, a Salinas resident and housing advocate about the council’s decision. He thinks there is a commitment from the city to provide more affordable housing. “I think it was a very good day for all of us.” He adds that showing up to council meetings can make a difference: “Without that pressure from the community, they would not have made that decision today,” Huerta says.

Ultimately the council voted 6-1 (Steve McShane dissenting) for the compromise plan. It marks a partial win for both developers and affordable housing advocates. The city’s inclusionary housing ordinance—including the Oldtown exemption—will be reviewed again in June.

Historic downtown Salinas building now ready for people to call home

Updated: 3:07 PM PDT Oct 25, 2022

Infinite Scroll Enabled ☐

Ariana Jaso
Anchor/Reporter

SALINAS, Calif. — A project in downtown Salinas that has been years in the making is now finished and ready for tenants.

The six-story Salinas National Bank building at 301 South Main St. has been transformed into a residential tower with commercial space on the bottom floor. Alvarado Street Brewery will be the building's first commercial tenant.

Advertisement

First look inside the Alvarado Street Brewery's newest location

For the past four years, the apartment building has been under construction by local developer Brad Slama. The project is now complete and ready for people to call home.

“The developer is really recognizing the historical elements and preserving them all along the way. You see that downstairs in the lobby where you get to see the beautiful art deco murals all throughout, which just add to the richness and moodiness of art," said Audrey Wardwell, property manager at 36 North Properties. "We have 50 studios and the developer was able to maximize the square footage of this building to able the most housing possible."

It's the first time the building will be anything other than a financial institution since it was built in 1930.

Salinas old bank building looks towards redevelopment

“There's a lot of excitement around this and I think what we're going to see is even more vibrancy and even more attention to an already exciting downtown Salinas,” said Steve McShane, president of the Salinas Chamber of Commerce.

The project is expected to bring more housing, a quality of life and a positive economic impact to the downtown area.

“You have the restaurant down on the bottom floor, so you've got more jobs. You also have people up here shopping, having an element of an economic benefit to downtown, all just by living in it,” Wardwell said.

The apartments are already signing tenants up for [leases](#) with move-in dates beginning Nov. 1. Alvarado Street Brewery is set to open its new brewpub on Nov. 18.

301 Main Street in downtown Salinas has first renters moving in next week

301 Main Street, the new residential living space of 50 studio apartments in downtown Salinas is ready for the first tenants to move in on Nov. 1, 2022. (James Herrera/Monterey Herald)

By **JAMES HERRERA** | jherrera@montereyherald.com | Monterey Herald

PUBLISHED: October 27, 2022 at 2:48 p.m. | UPDATED: October 27, 2022 at 2:48 p.m.

SALINAS — An impressive-looking art deco building in downtown Salinas once housed bank operations, but now the 90-year-old structure's renovation is complete, bringing large-scale residential apartment housing to the city's center and more life to the 100 to 300 blocks of Old Town.

Brad Slama bought the historic six-story building at 301 Main St. six years ago for \$4.5 million and has since poured his energy into the idea of providing living space on the upper floors while creating room for a gathering place in the form of a restaurant/bar on the first floor.

"I believe more people living in downtown will help the vibrancy project move forward," said Slama, referring to the plan approved by the Salinas City Council and Monterey County Board of Supervisors in 2015, which has a stated goal to preserve Salinas' connection to history, while creating a mix of residences, businesses, civic institutions, recreation and culture in a safe and vibrant environment.

"Leasing has been going great, ... people will start moving in Nov. 1," said Audrey Wardwell, broker and owner of 36 North Properties. "We have six leased so far and 20 applications in ... and great feedback from the showings."

There are five floors of living space that were created after demolishing and gutting for the residential units. Each of the 50 luxury studio apartments has a clean, modern design and offers different floor plans, ranging in size from 350 square feet to 550 square feet. Units have multiple windows capitalizing on views of the city, and most with either the Gabilan or Santa Lucia mountains in sight from the high-ceiling rooms. Bathrooms are outfitted with custom walk-in showers using tile and Moen shower systems, and LED-illuminated vanity mirrors. Kitchens include stainless steel smart appliances, quartz countertops, and hardwood flooring covers each space.

There are laundry rooms on each floor that use a phone app to operate the washers and dryers, elevators, on-site management, private, 24-hour locked entrances with secure entry for tenants and guests, and parking. Storage units in the basement are available for an additional cost.

Units are priced from \$1,650 to \$2,200, with utilities — power, water, trash — included.

Slama held onto the art deco design elements that give the building character from the exterior facade and entrance for residents along the side and back and into

"I told Alvarado (Street Brewery) I wanted them here," said Slama. "I knew they had a cult following."

The brewery restaurant will have its formal opening on Nov. 18, he said.

Walking into the front entrance at 301 Main St. into the dining establishment, one passes through gold doorways topped with soaring eagles. The place is the offshoot of Alvarado Street Brewery in Monterey. Alvarado on Main incorporates original design elements from almost a century ago into its interior including existing wall treatments and reliefs, to replicating the chandeliers found in a small foyer and incorporating them into the grand lighting scheme for the brewery restaurant. The space has high ceilings, a huge bar, booths and lounge areas. A mezzanine offers more space for events or additional seating, and the restaurant kitchen has re-purposed the old bank vault into working and storage space.

Brad Slama stands inside one of the studio apartment units with views of the Santa Lucia Mountains and downtown Salinas. (James Herrera/Monterey Herald)

Slama said he learned a lot from his father when as a student at Salinas High School, he would join him on the job. His first taste of converting space into residential units came when he helped to create 10 apartment units on the third floor above the former Penny Farthing when he was 18. Out of high school, he worked for an

“The opportunity presented itself,” said Slama about his foray into buying the bank building and converting it into apartments. He believes in taking existing structures and infill to provide housing instead of taking farmland to build new homes.

“Most want to build traditional developments but the market I deal in is very niche” and takes a certain amount of faith to accomplish, said Slama. “You have to have trust and faith in the city councils and planning commissions to make the right decisions.”

He said the 301 Main St. project was for him “more a labor of love than a labor for profit.”

Now that his downtown Salinas project has reached this stage, Slama says he will next focus on his developments on Garden Road in Monterey.

“I have three at the moment and am looking at two more,” said Slama who added that the current projects could produce 405 new living units for Monterey.

The Californian

apartments in downtown Salinas

Jocelyn Ortega Salinas Californian

Published 9:56 a.m. PT Oct. 28, 2022

The smell of fresh paint, sunshine spilling through a window, and the sounds of a bustling downtown Salinas will soon be a reality for residents of a new studio apartment complex.

The 50-unit complex, located at 301 Main Street, is five years in the making. City leaders and housing advocates call it "a step in the right direction," while others are questioning whether the units are affordable for residents.

The development was made possible through an adaptive reuse ordinance passed by Salinas City Council in 2018, which made it easier for developers to convert vacant underused commercial buildings into residential buildings. The complex was formerly the Rabobank building.

Property manager and 36 North Properties broker Audrey Wardwell says it has been a busy few weeks taking calls and multiple applications as they approach some of the first move-ins in November.

"We had some units that were reserved prior to finalizing all of the permits," Wardwell said. "We hope to add more people soon and just breathe life into this beautiful product."

Wardwell is hopeful all of the units will be filled by the end of the year.

The units include high ceilings, hardwood floors, craftsman style cabinetry, stainless steel appliances and are priced between \$1,550 - \$2,200, depending on the floor plan.

Residents will have laundry room on every floor with appliances operated through an smartphone application, and 29 storage rooms in the basement to rent.

Restaurants and shops are just a few steps away. The apartments also sits above a new restaurant and bar created by the owners of Alvarado Street Brewery.

"We haven't had anything like this in downtown," Wardwell said. "This building was built back in the 1930s and has always been a financial institution. Now, this building gets to give back to the community by bringing people to live in it, to walk around and shop at local businesses, and adds jobs with the new downtown restaurant."

The Californian

"The city is motivated to do more in order to bring additional parking, housing and commercial office space investment to downtown Salinas," McShane said.

Across the street at 300 N. Main St., is another building that will soon provide additional housing units to the downtown area. The ground floor of the former Dick Bruhn building is currently under renovations to be used for commercial space while the second floor is set to have 19 rental units.

Advertisement for these units will be made sometime in the next month, according to city officials.

While all the new rental units get closer to opening, Council member Anthony Rocha questions if they will be affordable for some community members, particularly families and young professionals.

"We need to work harder to ensure nobody is left out when it comes to the revitalization of our Downtown," Rocha said. "We need more housing, but we also need to prioritize affordable housing that meets the needs of our farmworkers, teachers, hospitality workers, and all other essential workers who tirelessly serve our community."

McShane says the city will continue efforts to provide for and address the affordable housing need.

"We want equality housing for types across the city," McShane said. "Sometimes you see a concentration of low and very low in one part of the city, and market rate in another part of the city. We're doing what we can so that the entire city includes housing for all categories of income."

Wardwell says she is hopeful these new housing units are just the start of more growth to come.

"I pray projects like this let other developers know that the city of Salinas wants to be revitalized and we have plenty of other buildings waiting for them," she said.

With just days away from welcoming the first new tenants, Wardwell says she is excited and encourages more people to apply and call this building their new home.

Salinas is Leading in Policy & Outcomes!

Dear Friends,

Please join me in celebrating the growing vibrancy of Downtown Salinas.

In late October, Michael DeLapa and I toured the newly opened 301 Main Street mixed-use apartment building in Salinas. The ground floor of the art moderne building—previously Rabobank—is the newest location for Alvarado Street Brewery; above are five floors of beautiful studio apartments. Many of the 49 units are affordable by design to moderate income residents of Salinas. Across the street is 300 Main Street—the revitalized Bruhn Building—consisting of ground floor commercial space with 19 renovated apartments above. Original construction for the buildings was in 1925 and 1930 respectively.

Not only is the 300 Main block a shining example of mixed-use redevelopment with attractive ground-floor retail—it is a harbinger for things to come as the City of Salinas fulfills the promise of its Downtown Vibrancy Plan, adopted by the City Council in 2015 and lauded by LandWatch in a letter to then-mayor Joe Gunter:

development with an emphasis on apartments as well as creating a pedestrian and bicycle-friendly downtown.”

Sound familiar? It should, because LandWatch’s position in 2015 is consistent with the [Housing Element Policy Principles](#) we developed in 2022 and which guide LandWatch’s advocacy now.

The Downtown Salinas Vibrancy Plan wouldn’t have been possible without a coordinated effort by the City Council, the County of Monterey (which has several properties downtown), and staff who crafted and reviewed the ordinances at the core of the Plan. Downtown

property owners, merchants, and community members also volunteered their time and expertise in crafting it.

Salinas set forth the vision in 2015 with the Vibrancy Plan and followed up in 2018 with an Adaptive Reuse Ordinance in 2018 permitting residential redevelopment of buildings older than 50 years in Downtown Salinas. In 2019, a blight prohibition ordinance passed the City Council, specifically targeting the blocks downtown where 301 Main is located and compelling further redevelopment.

Streamlining provisions in the form of expedited permit processing and reduced impact fees came as a direct result of consultation with builders and developers in creating the Vibrancy Plan. The authors call this “investment thinking”—an approach that holds promise for jurisdictions across the county—especially those on the Peninsula with similar potential for intensification of mixed use infill development in their upcoming Housing Element updates.

In recent correspondence with LandWatch, Brad Slama—the developer behind the 301 Main project—shared this with us:

[Subscribe](#)[Past Issues](#)[Translate ▼](#)

been pivotal.”

Please join LandWatch in advocating for more “investment thinking” as Monterey County communities update their Housing Elements during 2023. When we know the times and dates for policy input opportunities, you’ll be the first to know.

Sincerely,

Gabriel Sanders
Deputy Director

What is in a Housing Element?

General Plans are the blueprint for a how a community grows and where. There are nine required elements of a General Plan including: land use, circulation, housing, conservation, open space, noise, safety, environmental justice, and air quality. State law requires local governments update their housing elements every five to eight years. Typically, the Housing Element contains an assessment of needs, lists constraints on housing, provides an opportunities analysis and site assessment, a review of past plans and performance, plus new housing element goals.

An Intro to CEQA

Did you know that the California Environmental Quality Act (CEQA)—pronounced “see-quah”—requires three main steps? First, projects must be reviewed to determine the extent of impacts and where feasible, those impacts must be reduced through mitigation measures. Second, those impacts must be disclosed to the public and decision makers prior to project approval. And, third, the public is guaranteed the right to participate in the environmental review process prior to project approval during public comment periods and public hearings. [Learn more online.](#)

A Day Trip to Salinas Offers a Variety of Stellar New Dining Options

By **Mark C. Anderson**

February 28, 2023

The former Rabobank that is now Alvarado on Main retains select vault doors as decor.
PHOTO: Mark C. Anderson

Oldtown Salinas' latest foodie addition will feature some of the best deep-dish pizza in the tri-county area, which is good to hear.

To learn it will also include a concert venue, banquet hall and—be still, mini-umbrella lovers—a tiki bar gets toward crazy good.

So it goes with **Heirloom Pizza 2.0**, coming to historic Main Street in late spring or early summer.

Co-owner **Michael Foley**, who once worked at **Felton Pantry** and played in a Santa Cruz-based band, knows the plans for their 12,000 square feet sound ambitious but emerge from simple passions.

“It has all our favorite things: tiki bar, live music, pizza,” he says. “It’s going to be a

jewel of Salinas’ downtown revitalization.”

Co-owner **Kristen Wood** adds that the drinks and foodstuffs will thrive on fresh produce and homemade dressings that make Heirloom Monterey a community go-to.

“We’re fully excited to bring all the fresh ingredients we currently use,” she says, “while expanding on what we already do.”

But the craziest thing about Heirloom is that it’s only the latest savory element coming amid the ongoing resurrection of Oldtown.

Over a half dozen spots have settled into spaces within recent months, which inspired *Good Times* to take a field trip to the **Salad Bowl of the World**. Here appear a few to prioritize in alphabetical order:

Alvarado on Main: The latest installment from the award-winning **Alvarado Street Brewery** team occupies a former bank with soaring ceilings. It opened in November and hosts a packed house every time I stop by. The cinematic ambiance draws visitors, the casual-contemporary fare (think lobster rolls and Valley flatbreads), craft cocktails, a raw bar and —yes—outstanding beer.

Altura Lounge & Bistro/Cali Glizzy Hot Dogs: Altura debuted full-service in an indoor-outdoor venue just off Main Street last week. The menu stars rustic Italian finds like Nonna’s lasagna, Little Sicily calzones, linguini and clams and oven-baked fennel-sausage sandwiches. Sister spot **Cali Glizzy** came a week or so before on the opposite side of Main with loaded

hot dogs like the “So Salinas,” with nacho cheese, grilled onions, jalapeños and crushed Hot Cheetos on a Hawaiian roll.

Brew-N-Krew Ale House: Salinas natives **Marlene Garcia** and **Steven Corona** launched their atypical Latinx-leaning beer spot—resplendent with pink feathered walls and a working brewery—last spring. House beers take on names like La Chika Freza, Lokura and Ponte Las Piñas, and the resulting vibe gets social fast.

Last Call Bar and Grill: This joint came online in summer with caloric abandon, throwing down six types of chicken strips, seven takes on wings, and loaded baked potatoes, Philly cheese steaks, flap steaks and smoked rib tips to boot. Full bar and a youthful vibe too.

Mangia Eat and Drink on Main: The thoroughly family-run and homespun spot arrived amid Covid and immediately earned honors as one of the year’s best new restaurants. The formula—beyond dad in the kitchen, mom at the counter and kids everywhere else: from-scratch Italian items with attention to detail. The truffle-infused gnocchi in gorgonzola cream is a keeper.

In other words, throwing a head of lettuce around Oldtown is hard without hitting a new spot, a forthcoming debut or a storefront with potential. Among them is a massive mixed-use project at **300 Main**, which could host four restaurants and/or retail spots on its bottom floor.

One irony that brings up: Salinas is a place that’s both famous internationally and

under-appreciated locally—which now
merits an update.

https://www.montereycountyweekly.com/news/cover_collections/how-urban-planning-transformed-downtown-salinas-into-monterey-county-s-most-walkable-streetscape/article_f6f70a18-bdec-11ed-a799-83eb3312f9ff.html

How urban planning transformed downtown Salinas into Monterey County's most walkable streetscape.

Rey Mashayekhi

Mar 9, 2023

Kevin Dayton of the Salinas City Center Improvement Association helped shepherd the transformation of Main Street in Salinas by bringing together public officials and private landlords.

DANIEL DREIFUSS

IT'S TAKEN YEARS OF PLANNING, tens of millions of dollars and a pandemic's worth of disruption, but Salinas is now home to one of the newest and more notable urban core revitalizations in California. Monterey County's largest city has seen its center spruced up through a coordinated effort involving public agencies and private investors – with the result of a beautified downtown that promises to draw more foot traffic, lure more residents and generate more economic activity.

The heart of the ongoing transformation is Main Street. Since Salinas City Council approved its Downtown Vibrancy Plan in 2015, the three blocks stretching north from San Luis Street up to the National Steinbeck Center have seen improvements including more than 50,000 square feet of newly paved concrete and sidewalks; 56 newly planted trees; new electrical, lighting and traffic signal systems; and updated landscaping equipped with an automatic irrigation system. There's also the 70-foot-long, 17,000-pound steel arch now spanning Main Street, emblazoned with its city's name in bold white letters, that has helped establish a sense of place.

Mixed-use redevelopments like 301 Main St., where the popular Alvarado Street Brewery has taken the street retail space beneath 50 luxury studio apartments, have attracted residents and brought the activity needed for any bustling city center. While it's still a work in progress – one not aided by a pandemic that has exacerbated street retail vacancies in urban cores across the country – Main Street [teems with bars, restaurants, coffee shops and other retail offerings](#), all within a short stroll.

"I think it's one of the crown jewels of urban redevelopment in the entire state," says Kevin Dayton, government affairs director for the Salinas City Center Improvement Association (SCCIA), which formed to promote the area's redevelopment. The group advocated for public measures like the Adaptive Reuse Ordinance, passed by Salinas City Council in 2018. The ordinance [removed zoning barriers prohibiting the residential conversion](#) of older properties like 301 Main St. and the former Bruhn Building, located across the street at 300 Main St.

In addition to strong public-private partnerships, Dayton credits the investment made by companies like Taylor Farms, the Salinas-based vegetable processing giant that has snapped up downtown properties on the way to becoming one of the city's most influential landlords – while "not expecting the kind of return on investment that a typical, out-of-town developer would.

"We've been fortunate that we've gotten some property owners who really care about downtown Salinas and are willing to accept a lower investment return to make the city vibrant," he notes. "Downtown redevelopment is a risk, and you can lose money on it."

Moving forward, stakeholders like the SCCIA hope to spur more redevelopment by converting downtown's wealth of surface parking lots into new mixed-use projects. While some residents and business owners have complained that the reconfigured downtown has already made it harder to find convenient parking, a less car-friendly environment is very much by design.

"You have to slow down traffic, you have to make it friendly to pedestrians and you have to make it interesting to be there," says Greg Hamer, a local realtor who serves as district coordinator for the SCCIA. "The more welcoming it is, then the more businesses are going to gravitate to that, because it's going to enable foot traffic."

Wood-Fired Fare from Maligne; Alvarado Street Brewing Opens a New Spot in Salinas; and Sea Harvest Celebrates Four Decades

BY BRETT WILBUR

Photo: Kelli Uddall

Chef Klaus Georis cooks on a custom hearth in his restaurant, Maligne, which opened this June. He's excited to bring his experience with live-fire cooking, which he learned in Belgium, to his new venture on Broadway in Seaside.

GOURMET DELIGHTS ARE PREPARED VIA HEARTH AT MALIGNE

■ Chef Klaus Georis opened Maligne last June but started a conversation about running the restaurant seven years ago with his father, well-known local restaurateur Walter Georis. The concept of cooking everything in a custom hearth was generated by Klaus' experience with live-fire cooking in a tiny but celebrated restaurant in Belgium.

"It was very raw, and there were so many variables to figure out," he says. "It was very intense, but a great learning experience. I fell in love with that style of cooking."

In Belgium, Georis was up at 4AM each

morning foraging for local ingredients and was given permission to experiment and make dishes up on the spot, a far cry from his much more formal training at Michelin-starred restaurants.

"That restaurant changed my outlook and philosophy on cooking," he says.

With Maligne, Georis has created a space he describes as not pretentious, but where people can enjoy themselves and listen to great music while trying ultra-fresh food prepared on an open fire.

"Having it smoked changes the flavor," Georis says. "We are happy and proud that every ingredient comes in daily."

Menu items include tuna au poivre, burgers from rare beef suppliers, oysters, and

Salinas City Center Improvement Association
10b Midtown Ln, Salinas CA 93901

even Brussels style waffles and fruit cooked in the hearth.

"There is a comforting element to it," he says.

Maligne is located at 600 Broadway Avenue in Seaside. For more information, visit www.explorestock.com/malignerestaurant or call 831/601-1302.

A NEW ALVARADO STREET BREWERY LOCATION OPENS IN SALINAS

■ According to Wendy Walker, director of restaurants for Alvarado Street Brewery, the company is excited to be opening a new restaurant in downtown Salinas, with an Art Deco style and "the elegant feel of the 1930s in the center of beautiful Oldtown Salinas."

A key aspect of each of the restaurants,

Alvarado Street Brewing has opened their newest establishment on Main Street in Oldtown Salinas, transforming an Art Deco bank into a jewel of a restaurant.

Photo: Brock Bill

Photo: Kelli Udall

David Deyerle and his brothers David and Richard started their Monterey business 40 years ago. Locations now include restaurants and fish markets in The Crossroads Carmel, on Foam in Monterey and on Highway One in Moss Landing.

which include a downtown Monterey location, one in Carmel Plaza and a tasting room in Salinas, is commonality.

"We try to bring the same culture and mentality of community to each location," Walker says. The friendly atmosphere and the core items on each menu along with staples and rotating fresh and seasonal beers, wines and cocktails ensures customer loyalty. Pizzas, calamari, wings and the Alvarado burger are some popular items, while each chef provides unique menus that rotate seasonally depending on fresh local produce.

"The beauty of our restaurant culture is that our target market is everybody," Walker explains. "We are kid friendly and have kid food, we also cater to the bar scene, and we provide an elevated and upscale gastropub fare atmosphere for the older crowd. Our goal is to cater to everyone. If you try a couple of things, you will find something you like."

Walker also points out that the restaurant is happy to be part of the revitalization of downtown Salinas, the city where much of the company's beer is produced.

"We are excited to be part of the revamp and to give back to the community that has given to us for so long," she says.

Alvarado Street Brewery & Grill is located at 426 Alvarado Street in Monterey. Alvarado Street Brewery & Bistro is in the Carmel Plaza in Carmel. Alvarado on Main is located at 301 Main Street in Salinas. Alvarado Production Facility & Tasting Room is located at 1315 Dayton Street in Salinas. For more information, visit www.asb.beer.

SEA HARVEST CELEBRATES 40 YEARS OF FRESH SEAFOOD

■ David Deyerle and wife Tina run the Carmel location of Sea Harvest, which has been open for 38 years. Deyerle and brothers Richard and Daniel started the business 40 years ago with a location in Monterey.

"We started fishing when we were very young," David explains. "We saw a niche that needed to be filled in our community for fresh fish."

The Carmel restaurant offers a sit-down dining experience as well as product to go, while Monterey and a location in Moss Landing provide counter service.

"It's the largest full-service fish market," David says. "Everything is sustainable and we source product from all over the world as well as still fishing and buying from local fisherman whatever is in season."

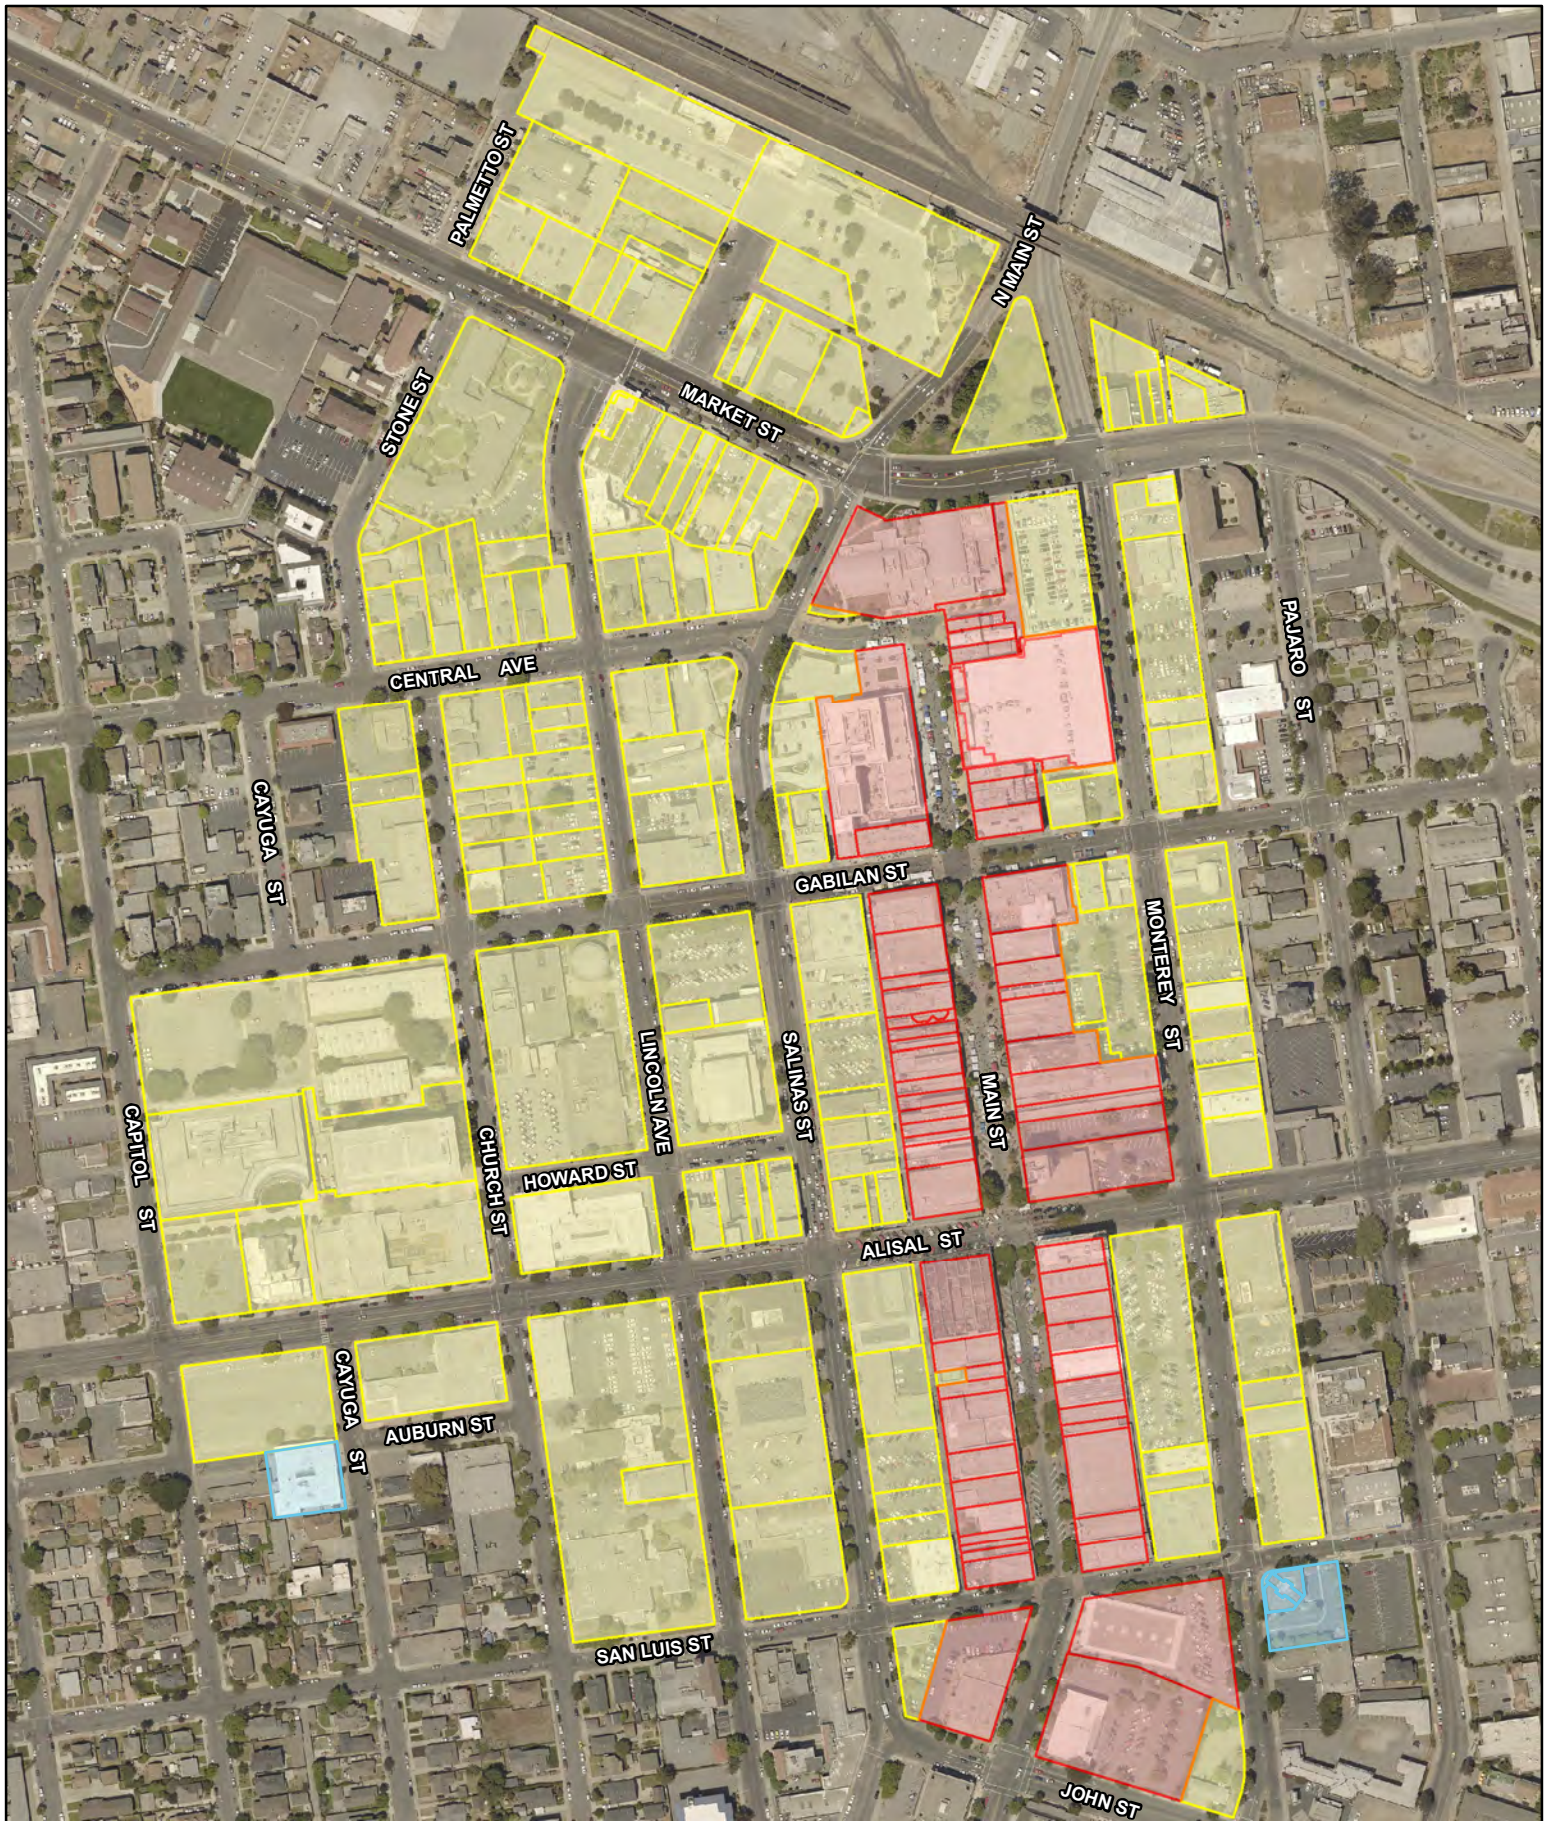

Seafood includes black cod, snapper, rock cod, sea bass, sand dabs, snapper, swordfish, Maine lobster, Alaskan salmon, and crab from Oregon. Scallops come from the East Coast and prawns are shipped from Mexico. Barbecue oysters and oysters on the half shell are popular.

"We make jalapeno coleslaw, fresh homemade tartar and cocktail sauces, fresh clam chowder, our own crabcakes, and smoke our own lox and kippered salmon," David says.

The Deyerles hope to keep the business running through the next generation.

"Richard's kids are all fishing now," David says. "We hope to continue on in the family."

Sea Harvest Fish Market & Restaurant is in The Crossroads Carmel. For more information, visit www.seaharvestfishmarketandrestaurant.com. The Monterey restaurant is located at 598 Foam Street and the Moss Landing restaurant is located at 2420 Highway One.

Cityworks Software License Renewal

Approve a Resolution authorizing the purchase of a license renewal for Cityworks Software not to exceed \$71,000.00.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: ADMINISTRATION

FROM: JIM PIA, ASSISTANT CITY MANAGER

BY: ERIC SANDOVAL, GIS ADMINISTRATOR

TITLE: CITYWORKS SOFTWARE RENEWAL

RECOMMENDED MOTION:

A motion to approve a resolution to purchase the renewal of Cityworks Asset Management software license from Azteca Systems LLC., in an amount not to exceed \$71,000.

EXECUTIVE SUMMARY:

The City of Salinas maintains various assets on City owned properties, buildings, and facilities. In 2022, the City Council approved the purchase of Cityworks Asset Management software to assist staff with tracking information and creating work orders to maintain City infrastructure, parts and equipment at City parks, buildings, and leased properties.

BACKGROUND:

The City of Salinas presently owns 283 parcels of land, upon which are located 179 buildings and an unknown number of other improvements, such as landscaping, pathways, recreational equipment, utility connections, artwork, and other features and characteristics. There are approximately 82 active leases and licenses which provide third parties the right to temporarily possess or use portions of these properties. In addition, the City leases or subleases several properties from outside entities for its own use.

Responsibility for different aspects of properties fall under the purview of different departments. This results in an array of complexity with regards to property operation and maintenance. For example, vegetation management on City-owned properties is handled by at least six different City Divisions utilizing multiple contracts. Facilities maintenance is handled either through Library and Community Services or through Public Works. Utility bills are received and paid directly by Finance. Property Tax payments and lease monitoring are currently handled through

Administration, while insurance is handled by the Legal Department. Many properties are maintained by Departments that exclusively use the facility (such as pump stations). Maintenance of properties that are leased are sometimes the responsibility of the Tenant, and sometimes not, depending on the terms of the lease. For many years staff has tried to manage the City's properties and facilities without a centralized management system.

In 2022, the City Council approved the purchase of Cityworks Asset Management software to assist staff with tracking information and creating work orders to maintain City infrastructure, parts and equipment at City parks, buildings, leased properties. The management software also allows staff to generate improved reporting for short and long-term budget planning.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

This request supports City Council's Strategic Goals and Strategies of Effective and Culturally Responsive Government, by ensuring that the information systems can support City programs, projects, and City services for the community.

DEPARTMENTAL COORDINATION:

In addition to the Community Development (Economic Development), Library and Community Services, and Public Works (Facilities) Departments, a high degree of cooperation and coordination between the Finance (Information Technology) and Public Works (GIS) Departments is needed. Consultation with other City Departments and Divisions that would be affected by the software may be required.

FISCAL AND SUSTAINABILITY IMPACT:

Funding for this purchase has been submitted to City Council as part of the FY 2023-24 Annual Budget. There is no recommended action for new appropriations.

ATTACHMENTS:

1. Resolution
2. Cityworks Quote

RESOLUTION NO. _____ (N.C.S.)

**A RESOLUTION OF THE CITY COUNCIL OF SALINAS TO APPROVE THE
RENEWAL OF CITYWORKS SOFTWARE LICENSE**

WHEREAS, the City desires to renew and maintain its Cityworks licensing; and

WHEREAS, Azteca Systems LLC., will provide Cityworks software licensing for the City of Salinas

NOW, THEREFORE, BE IT RESOLVED that pursuant to Salinas Municipal Code section 12-27 the Salinas City Council hereby authorizes the City Manager and the Purchasing Agent to complete the purchase and renewal of Cityworks license from Azteca Systems LLC., in an amount not to exceed \$71,000.

PASSED AND APPROVED this 13th day of June, 2023, by the following vote:

Agreement for Professional Services with Kosmont & Associates, Inc for Economic Consulting Services

Approve a Resolution authorizing the City Manager or his designee to execute an Agreement for Professional Services (Agreement) between the City of Salinas and Kosmont & Associates Inc, ("Kosmont") in the amount of \$40,000 annually with a total not to exceed amount of \$120,000.00 over a three-year period for general consulting services in economic development, real estate, and financial analysis.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: COMMUNITY DEVELOPMENT

FROM: LISA BRINTON, DIRECTOR

BY: MICHAEL GOMEZ, ECONOMIC DEVELOPMENT ANALYST

TITLE: AGREEMENT FOR PROFESSIONAL SERVICES BETWEEN THE CITY OF SALINAS AND KOSMONT & ASSOCIATES, INC FOR ECONOMIC CONSULTING SERVICES

RECOMMENDED MOTION:

A motion to approve a Resolution authorizing the City Manager or his designee to execute an Agreement for Professional Services (Agreement) between the City of Salinas and Kosmont & Associates Inc, ("Kosmont") for the amount of \$40,000 annually with a total not to exceed amount of \$120,000.00 over a three-year period for general consulting services in economic development, real estate, and financial analysis.

EXECUTIVE SUMMARY:

The City has contracted with Kosmont to provide economic analysis services on a yearly basis on various economic development projects dating back to 2017. Staff wishes to continue consulting services with Kosmont that require feasibility studies and analysis for development amongst other real estate consulting services. The City has historically entered into yearly Agreements for Professional Services that have required renewals each year. Staff requests renewal for an extended term of three years at a yearly rate of Forty Thousand Dollars (\$40,000) to a not to exceed amount One Hundred and Twenty Thousand Dollars (\$120,000) during the term of the Agreement. Staff recommends this Agreement to avoid the potential disruption of service that may occur during the renewal process. Under this Agreement Kosmont will continue to provide support to City staff on a yearly basis for up to three years, through June 30, 2026.

BACKGROUND:

Kosmont, is a qualified expert in the field of public finance and economic development, Kosmont is a certified Minority Business Enterprise ("MBE") and Small Business Enterprise ("SBE"), with an award-winning track record of working with cities, counties, and other public agencies on economic development plans, infrastructure funding strategies, land use market analyses, business/industry attraction, and real estate projects and public finance transactions exceeding \$12 billion. Kosmont is also on the Community Development's on Call list for Current and Long-Term Planning Services to

provide long-range planning in economic/financial analysis. The City has contracted with Kosmont for economic study and analysis since 2017. Examples of services provided include a study of local and regional market conditions, financial feasibility assessment of proposed developments, and analysis of public/private transactions. The current Agreement with Kosmont expires June 30, 2023.

DISCUSSION:

Staff has identified the need to continue contracting with Kosmont. Over the next three years, staff anticipates multiple large-scale projects that will require a consultant with the expertise the Kosmont holds such as a Parking Facility cost analysis, and an Enhanced Infrastructure Finance District (EIFD) formation support to finance infrastructure to support the development of the Salinas Ag Industrial Center, and other projects that come through the pipeline based on Council approved strategic plans. The City will be billed on a time and materials basis for a total compensation amount of Forty Thousand Dollars (\$40,000) annually with a maximum compensation amount of One Hundred and Twenty Thousand Dollars (\$120,000) over the three-year term of the Agreement (July, 1, 2023 to June 30, 2026).

CEQA CONSIDERATION:

The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378). Because the matter does not cause a direct or foreseeable indirect physical change on or in the environment, this matter is not a project. Any subsequent discretionary projects resulting from this action will be assessed for CEQA applicability.

STRATEGIC PLAN INITIATIVE:

The proposed agreement furthers the City of Salinas Strategic Plan 2022-2025 goal of Economic Development by supporting the implementation of the Economic Development Element policies and action items such as facilitating development of the Salinas Ag Industrial Center and the feasibility of a joint downtown parking facility with the County of Monterey.

DEPARTMENTAL COORDINATION:

Community Development staff coordinated with Legal Department to finalize the Agreement for Professional Services.

FISCAL AND SUSTAINABILITY IMPACT:

This Agreement, for a total of three years at a yearly rate of Forty Thousand Dollars (\$40,000) to a not to exceed amount One Hundred and Twenty Thousand Dollars (\$120,000). The first year, July 1, 2023, to June 30, 2024, is fully funded through the General Fund in the Economic Development Division's FY 2023-2024 Budget for Professional Services (1000.30.1355-63.5900).

ATTACHMENTS:

1. Resolution for Professional Services between the City of Salinas and Kosmont & Associates Inc.
 - a) Exhibit A: Agreement for Professional Service with Kosmont & Associates Inc.

RESOLUTION NO. _____ (N.C.S.)

**A RESOLUTION AUTHORIZING EXECUTION OF AGREEMENT FOR
PROFESSIONAL SERVICES BETWEEN THE CITY OF SALINAS AND KOSMONT &
ASSOCIATES INC. FOR ECONOMIC CONSULTING SERVICES**

WHEREAS, the City has contracted with Kosmont for consultant services on various development projects since 2017 such as study of local and regional market conditions, review of the economics for proposed developments, and analysis of public/private transactions; and

WHEREAS, the City of Salinas wishes to enter into an Agreement for Professional Services with Kosmont & Associates Inc. for a term of three years for consulting services in economic development, real estate, and financial analysis; and

WHEREAS, Kosmont, is a qualified expert in the field of public finance and economic development, with an award-winning track record of working with cities, counties, and other public agencies on economic development plans, infrastructure funding strategies, land use market analyses, business/industry attraction, and real estate projects and public finance transactions; and

WHEREAS, the City of Salinas determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378); and

NOW, THEREFORE, BE IT RESOLVED that the Salinas City Council hereby approves a Resolution authorizing the City Manager or designee to execute an Agreement for Professional Services between the City of Salinas and Kosmont & Associates, Inc. for economic consulting services for a three-year term (July 1, 2023 to June 30, 2026) for an amount not to exceed Forty Thousand Dollars per year and a total compensation amount not to exceed One Hundred and Twenty Thousand dollars (\$120,000).

**AGREEMENT FOR PROFESSIONAL SERVICES BETWEEN
THE CITY OF SALINAS AND KOSMONT & ASSOCIATES INC.**

This Agreement for Professional Services (the “Agreement” and/or “Contract”) is made and entered into this 13th day of June, 2023, between the **City of Salinas**, a California Charter city and municipal corporation (hereinafter “City”), and **Kosmont & Associates, Inc.**, a California corporation (hereinafter “Consultant”).

RECITALS

WHEREAS, Consultant represents that he, she, or it is specially trained, experienced, and competent to perform the special services which will be required by this Agreement; and

WHEREAS, Consultant is willing to render such professional services, as hereinafter defined, on the following terms and conditions.

NOW, THEREFORE, City and Consultant agree as follows:

TERMS

1. **Scope of Service.** The project contemplated and the scope of Consultant’s services are described in **Exhibit B**, attached hereto and incorporated herein by reference.
2. **Term; Completion Schedule.** This Agreement shall commence on July 1, 2023, and shall terminate on June 30, 2026, unless extended in writing by either party upon (30) days written notice. This Agreement may be extended only upon mutual written consent of the parties and may be terminated only pursuant to the terms of this Agreement.
3. **Compensation.** City hereby agrees to pay Consultant for services rendered the City pursuant to this Agreement on a time and materials basis according to the rates of compensation as set forth in **Exhibit B**. Beginning one year from the effective date of this agreement, and on each subsequent anniversary of this agreement, the hourly rate may be increased. Consultant will provide the City with an updated fee schedule reflecting the new hourly rate at least 30 days prior to the effective date of the new hourly rate. The max amount of compensation to be paid per fiscal year is **forty thousand dollars (\$40,000)** and shall not exceed **one hundred and twenty thousand dollars (\$120,000)** during the term of this Agreement.
4. **Billing.** Consultant shall submit to City an itemized invoice, prepared in a form satisfactory to City, describing its services and costs for the period covered by the invoice. Except as specifically authorized by City, Consultant shall not bill City for duplicate services performed by more than one person. Consultant’s bills shall include the following information to which such services cost or pertain:

- (A) A brief description of services performed;
- (B) The date the services were performed;

- (C) The number of hours spent and by whom;
- (D) A brief description of any costs incurred; and
- (E) The Consultant's signature.

Any such invoices shall be in full accord with any and all applicable provisions of this Agreement.

City shall make payment on each such invoice within thirty (30) days of receipt; provided, however, that if Consultant submits an invoice which is incorrect, incomplete, or not in accord with the provisions of this Agreement, City shall not be obligated to process any payment to Consultant until thirty (30) days after a correct and complying invoice has been submitted by Consultant. The City shall process undisputed portion immediately.

5. Meet & Confer. Consultant agrees to meet and confer with City or its agents or employees with regard to services as set forth herein as may be required by the City to ensure timely and adequate performance of the Agreement.

6. Additional Copies. If City requires additional copies of reports, or any other material which Consultant is required to furnish as part of the services under this Agreement, Consultant shall provide such additional copies as are requested, and City shall compensate Consultant for the actual costs related to the production of such copies by Consultant.

7. Responsibility of Consultant. By executing this Agreement, Consultant agrees that the services to be provided and work to be performed under this Agreement shall be performed in a fully competent manner. By executing this Agreement, Consultant further agrees and represents to City that the Consultant possesses, or shall arrange to secure from others, all of the necessary professional capabilities, experience, resources, and facilities necessary to provide the City the services contemplated under this Agreement and that City relies upon the professional skills of Consultant to do and perform Consultant's work. Consultant further agrees and represents that Consultant shall follow the current, generally accepted practices in this area to the profession to make findings, render opinions, prepare factual presentations, and provide professional advice and recommendations regarding the projects for which the services are rendered under this Agreement.

8. Responsibility of City. To the extent appropriate to the projects to be completed by Consultant pursuant to this Agreement, City shall:

(A) Assist Consultant by placing at its disposal all available information pertinent to the projects, including but not limited to, previous reports and any other data relative to the projects. Nothing contained herein shall obligate City to incur any expense in connection with completion of studies or acquisition of information not otherwise in the possession of City.

(B) Examine all studies, reports, sketches, drawings, specifications, proposals, and other documents presented by Consultant, and render verbally or in writing as may be

appropriate, decisions pertaining thereto within a reasonable time so as not to delay the services of Consultant.

(C) Steve Carrigan, City Manager, or his designee, shall act as City's representative with respect to the work to be performed under this Agreement. Such person shall have the complete authority to transmit instructions, receive information, interpret and define City's policies and decisions with respect to materials, equipment, elements, and systems pertinent to Consultant's services. City may unilaterally change its representative upon notice to the Consultant.

(D) Give prompt written notice to Consultant whenever City observes or otherwise becomes aware of any defect in a project.

9. **Acceptance of Work Not a Release.** Acceptance by the City of the work to be performed under this Agreement does not operate as a release of Consultant from professional responsibility for the work performed.

10. **Indemnification and Hold Harmless.**

Consultant shall defend, indemnify, and hold harmless the City and its officers, officials, employees, volunteers, and agents from and against any and all liability, loss, damage, expense, costs (including without limitation costs and fees of litigation) of every nature arising out of or in connection with Consultant's performance of work hereunder, including the performance of work of any of Consultant's subcontractors or agents, or Consultant's failure to comply with any of its obligations contained in the agreement, except such loss or damage which was caused by the sole negligence or willful misconduct of the City.

11. **Insurance.** Consultant shall procure and maintain for the duration of this Agreement insurance meeting the requirements specified in **Exhibit A** hereto.

12. **Access to Records.** Consultant shall maintain all preparatory books, records, documents, accounting ledgers, and similar materials including but not limited to calculation and survey notes relating to work performed for the City under this Agreement on file for at least three (3) years following the date of final payment to Consultant by City. Any duly authorized representative(s) of City shall have access to such records for the purpose of inspection, audit, and copying at reasonable times during Consultant's usual and customary business hours. Consultant shall provide proper facilities to City's representative(s) for such access and inspection.

13. **Non-Assignability.** It is recognized by the parties hereto that a substantial inducement to City for entering into this Agreement was, and is, the professional reputation and competence of Consultant. This Agreement is personal to Consultant and shall not be assigned by it without express written approval of the City.

14. **Changes to Scope of Work.** City may at any time, and upon a minimum of ten (10) days written notice, seek to modify the scope of services to be provided for any project to be

completed under this Agreement. Consultant shall, upon receipt of said notice, determine the impact on both time and compensation of such change in scope and notify City in writing. Upon agreement between City and Consultant as to the extent of said impacts to time and compensation, an amendment to this Agreement shall be prepared describing such changes. Execution of the amendment by City and Consultant shall constitute the Consultant's notice to proceed with the changed scope.

15. Ownership of Documents. Title to all final documents, including drawings, specifications, data, reports, summaries, correspondence, photographs, computer software (if purchased on the City's behalf), video and audio tapes, software output, and any other materials with respect to work performed under this Agreement shall vest with City at such time as City has compensated Consultant, as provided herein, for the services rendered by Consultant in connection with which they were prepared. City agrees to hold harmless and indemnify the Consultant against all damages, claims, lawsuits, and losses of any kind including defense costs arising out of any use of said documents, drawings, and/or specifications on any other project without written authorization of the Consultant.

16. Termination.

(A) City shall have the authority to terminate this Agreement, upon ten days written notice to Consultant, as follows:

(1) If in the City's opinion the conduct of the Consultant is such that the interest of the City may be impaired or prejudiced, or

(2) For any reason whatsoever.

(B) Upon termination, Consultant shall be entitled to payment of such amount as fairly compensates Consultant for all work satisfactorily performed up to the date of termination based upon the Consultant's rates shown in **Exhibit B** and/or Section 3 of this Agreement, except that:

(1) In the event of termination by the City for Consultant's default, City shall deduct from the amount due Consultant the total amount of additional expenses incurred by City as a result of such default. Such deduction from amounts due Consultant are made to compensate City for its actual additional costs incurred in securing satisfactory performance of the terms of this Agreement, including but not limited to, costs of engaging another consultant(s) for such purposes. In the event that such additional expenses shall exceed amounts otherwise due and payable to Consultant hereunder, Consultant shall pay City the full amount of such expense.

(C) In the event that this Agreement is terminated by City for any reason, Consultant shall:

(1) Upon receipt of written notice of such termination promptly cease all services on this project, unless otherwise directed by City; and

(2) Deliver to City all documents, data, reports, summaries, correspondence, photographs, computer software output, video and audio tapes, and any other materials provided to Consultant or prepared by or for Consultant or the City in connection with this Agreement. Such material is to be delivered to City in completed form; however, notwithstanding the provisions of Section 15 herein, City may condition payment for services rendered to the date of termination upon Consultant's delivery to the City of such material.

(D) In the event that this Agreement is terminated by City for any reason, City is hereby expressly permitted to assume the projects and complete them by any means, including but not limited to, an agreement with another party.

(E) The rights and remedy of the City and Consultant provided under this Section are not exclusive and are in addition to any other rights and remedies provided by law or appearing in any other section of this Agreement.

17. Compliance with Laws, Rules, and Regulations. Services performed by Consultant pursuant to this Agreement shall be performed in accordance and full compliance with all applicable federal, state, and City laws and any rules or regulations promulgated thereunder.

18. Exhibits Incorporated. All exhibits referred to in this Agreement and attached to it are hereby incorporated in it by this reference. In the event there is a conflict between any of the terms of this Agreement and any of the terms of any exhibit to the Agreement, the terms of the Agreement shall control the respective duties and liabilities of the parties.

19. Independent Contractor. It is expressly understood and agreed by both parties that Consultant, while engaged in carrying out and complying with any of the terms and conditions of this Agreement, is an independent contractor and not an employee of the City. Consultant expressly warrants not to represent, at any time or in any manner, that Consultant is an employee or servant of the City.

20. Integration and Entire Agreement. This Agreement represents the entire understanding of City and Consultant as to those matters contained herein. No prior oral or written understanding shall be of any force or effect with respect to those matters contained herein. This Agreement may not be modified or altered except by amendment in writing signed by both parties.

21. Jurisdiction and Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of California, County of Monterey, and City of Salinas. Jurisdiction of litigation arising from this Agreement shall be in the State of California, in the County of Monterey or in the appropriate federal court with jurisdiction over the matter.

22. Severability. If any part of this Agreement is found to be in conflict with applicable laws, such part shall be inoperative, null and void insofar as it is in conflict with said laws, but the remainder of the Agreement shall continue to be in full force and effect.

23. Notices.

(A) Written notices to the City hereunder shall, until further notice by City, be addressed to:

City Manager
City of Salinas
200 Lincoln Avenue
Salinas, California 93901

With a copy to:

City Attorney
City of Salinas
200 Lincoln Avenue
Salinas, California 93901

(B) Written notices to the Consultant shall, until further notice by the Consultant, be addressed to:

Ken Hira
Kosmont & Associates
1601 North Sepulveda Boulevard, Suite 382
Manhattan Beach, CA 90266

(C) The execution of any such notices by the City Manager shall be effective as to Consultant as if it were by resolution or order of the City Council, and Consultant shall not question the authority of the City Manager to execute any such notice.

(D) All such notices shall either be delivered personally to the other party's designee named above, or shall be deposited in the United States Mail, properly addressed as aforesaid, postage fully prepaid, and shall be effective the day following such deposit in the mail.

24. Nondiscrimination. During the performance of this Agreement, Consultant shall not discriminate against any employee or applicant for employment because of race, color, religion, ancestry, creed, sex, national origin, familial status, sexual orientation, age (over 40 years) or disability. Consultant shall take affirmative action to ensure that applicants are employed, and that employees are treated during employment without regard to their race, color, religion, ancestry, creed, sex, national origin, familial status, sexual orientation, age (over 40 years) or disability.

25. **Conflict of Interest.** Consultant warrants and declares that it presently has no interest, and shall not acquire any interest, direct or indirect, financial or otherwise, in any manner or degree which will render the services required under the provisions of this Agreement a violation of any applicable local, state or federal law. Consultant further declares that, in the performance of this Agreement, no subcontractor or person having such an interest shall be employed. In the event that any conflict of interest should nevertheless hereinafter arise, Consultant shall promptly notify City of the existence of such conflict of interest so that City may determine whether to terminate this Agreement. Consultant further warrants its compliance with the Political Reform Act (Government Code section 81000 et seq.) and Salinas City Code Chapter 2A that apply to Consultant as the result of Consultant's performance of the work or services pursuant to the terms of this Agreement.

26. **Headings.** The section headings appearing herein shall not be deemed to govern, limit, modify, or in any manner affect the scope, meaning or intent of the provisions of this Agreement.

27. **Attorneys' Fees.** In case suit shall be brought to interpret or to enforce this Agreement, or because of the breach of any other covenant or provision herein contained, the prevailing party in such action shall be entitled to recover their reasonable attorneys' fees in addition to such costs as may be allowed by the Court. City's attorneys' fees, if awarded, shall be calculated at the market rate.

28. **Non-Exclusive Agreement.** This Agreement is non-exclusive and both City and Consultant expressly reserves the right to contract with other entities for the same or similar services.

29. **Rights and Obligations Under Agreement.** By entering into this Agreement, the parties do not intend to create any obligations express or implied other than those set out herein; further, this Agreement shall not create any rights in any party not a signatory hereto.

30. **Licenses.** If a license of any kind, which term is intended to include evidence of registration, is required of Consultant, its representatives, agents or subcontractors by federal, state or local law, Consultant warrants that such license has been obtained, is valid and in good standing, and that any applicable bond posted in accordance with applicable laws and regulations.

31. **Counterparts.** This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute a single agreement.

32. **Legal Representation.** Each party affirms that it has been represented, if it so chose, by legal counsel of its own choosing regarding the preparation and the negotiation of this Agreement and the matters and claims set forth herein, and that each of them has read this Agreement and is fully aware of its contents and its legal effect. Neither party is relying on any statement of the other party outside the terms set forth in this Agreement as an inducement to enter into this Agreement.

33. Joint Representation. The language of all parts of this Agreement shall in all cases be construed as a whole, according to its fair meaning, and not strictly for or against any party. No presumptions or rules of interpretation based upon the identity of the party preparing or drafting the Agreement, or any part thereof, shall be applicable or invoked.

34. Warranty of Authority. Each party represents and warrants that it has the right, power, and authority to enter into this Agreement. Each party further represents and warrants that it has given any and all notices, and obtained any and all consents, powers, and authorities, necessary to permit it, and the persons entering into this Agreement for it, to enter into this Agreement.

35. No Waiver of Rights. Waiver of a breach or default under this Agreement shall not constitute a continuing waiver or a waiver of a subsequent breach of the same or any other provision of this Agreement. The failure to provide notice of any breach of this Agreement or failure to comply with any of the terms of this Agreement shall not constitute a waiver thereof. Failure on the part of either party to enforce any provision of this Agreement shall not be construed as a waiver of the right to compel enforcement of such provision or any other provision. A waiver by the City of any one or more of the conditions of performance under this Agreement shall not be construed as waiver(s) of any other condition of performance under this Agreement.

IN WITNESS WHEREOF, the parties hereto have made and executed this Agreement on the date first written above.

Exhibit A- Insurance Requirements

Insurance Requirements

Consultant shall procure and maintain for the duration of the Agreement insurance against claims for injuries to persons or damage to property which may arise from or in connection with the performance of the work hereunder and the results of that work by the Consultant, his agents, representatives, employees, or subcontractors. With respect to General Liability and Professional Liability, coverage should be maintained for a minimum of five (5) years after Agreement completion.

MINIMUM SCOPE AND LIMIT OF INSURANCE

Coverage shall be at least as broad as:

- (A) **Commercial General Liability** (“CGL”): Insurance Services Office Form (“ISO”) CG 00 01 covering CGL on an occurrence basis, including products and completed operations, property damage, bodily injury, and personal & advertising injury with limits no less than **\$1,000,000** per occurrence. If a general aggregate limit applies, either the general aggregate limit shall apply separately to this project/location (ISO CG 25 03 or 25 04) or the general aggregate limit shall be twice the required occurrence limit.
- (B) **Automobile Liability**: ISO Form CA 0001 covering any auto, or if Consultant has no owned autos, hired and non-owned, with limits no less than **\$1,000,000** per accident for bodily injury and property damage.
- (C) **Workers’ Compensation** insurance as required by the State of California, with Statutory Limits, and Employer’s Liability Insurance with a limit of no less than **\$1,000,000** per accident for bodily injury or disease.
- (D) **Professional Liability** (also known as Errors and Omissions) insurance appropriate to the work being performed, with limits no less than **\$1,000,000** per occurrence or claim, **\$2,000,000** aggregate per policy period of one year.

If the Consultant maintains broader coverage and/or higher limits than the minimums shown above, the City of Salinas requires and shall be entitled to the broader coverage and/or higher limits maintained by the Consultant. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

OTHER INSURANCE PROVISIONS

The insurance policies are to contain, or be endorsed to contain, the following provisions:

Additional Insured Status

The City of Salinas, its officers, officials, employees, and volunteers are to be covered as additional insureds on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Consultant including materials, parts, or equipment furnished in connection with such work or operations. General liability coverage can be provided in the form of an endorsement to the Consultant’s insurance (at least as broad as ISO Form CG 20 10, CG 11 85, or **both** CG 20 10, CG 20 26, CG 20 33, or CG 20 38; **and** CG 20 37 forms if later revisions used).

Primary Coverage

For any claims related to this Agreement or the project described within this Agreement, the **Consultant's insurance coverage shall be primary coverage** at least as broad as ISO Form CG 20 01 04 13 as respects the City, its officers, officials, employees, and volunteers. Any insurance or self-insurance maintained by the City, its officers, officials, employees, or volunteers shall be excess of the Consultant's insurance and shall not contribute with it.

Notice of Cancellation

Each insurance policy required above shall provide that coverage shall not be canceled, except with notice to the City.

Waiver of Subrogation

Consultant hereby grants to City a waiver of any right to subrogation which any insurer of said Consultant may acquire against the City by virtue of the payment of any loss under such insurance. Consultant agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation, but this provision applies regardless of whether or not the City has received a waiver of subrogation endorsement from the insurer.

The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the City of Salinas for all work performed by the Consultant, its employees, agents, and subcontractors.

Self-Insured Retentions

Self-insured retentions must be declared by Consultant to and approved by the City. At the option of the City, Consultant shall provide coverage to reduce or eliminate such self-insured retentions as respects the City, its officers, officials, employees, and volunteers; or the consultant shall provide evidence satisfactory to the City guaranteeing payment of losses and related investigations, claim administrations, and defense expenses. The policy language shall provide, or be endorsed to provide, that the self-insured retention may be satisfied by either the named insured or City.

Acceptability of Insurers

Insurance is to be placed with insurers with a current A.M. Best's rating of no less than A:VII, unless otherwise acceptable to the City.

Claims Made Policies

If any of the required policies provide coverage on a claims-made basis:

1. The Retroactive Date must be shown and must be before the date of this Agreement or the beginning of Agreement work.
2. Insurance must be maintained and evidence of insurance must be provided ***for at least five (5) years after completion of the Agreement of work.***
3. If coverage is canceled or non-renewed, and not ***replaced with another claims-made policy form with a Retroactive Date*** prior to the Agreement effective date, the Consultant must purchase "extended reporting" coverage for a minimum of ***five (5) years*** after completion of Agreement work.
4. A copy of the claims reporting requirements must be submitted to the City for review.

Verification of Coverage

Consultant shall furnish the City with original certificates and amendatory endorsements or copies of the applicable insurance language effecting coverage required by this Agreement. All certificates and endorsements are to be received and approved by the City before work commences. However, failure to obtain the required documents prior to the work beginning shall not waive the Consultant's obligation to provide them. The City reserves the right to require complete, certified copies of all required insurance policies, including endorsements required by these specifications, at any time.

Subcontractors

Consultant shall require and verify that all sub-consultants and/or subcontractors maintain insurance meeting all the requirements stated herein, and Consultant shall ensure that Entity is an additional insured on insurance required from such sub-consultants and/or subcontractors.

Special Risks or Circumstances

City reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

Maintenance of Insurance

Maintenance of insurance by Consultant as specified shall in no way be interpreted as relieving Consultant of its indemnification obligations or any responsibility whatsoever and the Consultant may carry, at its own expense, such additional insurance as it deems necessary.

City Yard Security Gate Upgrade

Approve a Resolution authorizing an agreement with American Door & Gates to upgrade the City Yard Security Gate System at 426 Work Street for a cost not to exceed \$63,500.00.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS

FROM: DAVID JACOBS, DIRECTOR

BY: SEAN SCHMIDT, FACILITIES MAINT. CREW SUP/MANAGER

TITLE: CITY YARD SECURITY GATE UPGRADE

RECOMMENDED MOTION:

A motion to approve entering into an agreement with American Door & Gates to upgrade the City Yard Security Gate System at 426 Work Street for a cost not to exceed \$65,000 with a 15% contingency.

EXECUTIVE SUMMARY:

Staff is requesting approval from the City Council to enter into an agreement to upgrade the City Yard Security Gate System. Approval would benefit the city by creating additional barriers for individuals trying to break into the City Yard storage areas and vehicles. This additional security will save the city money long-term by not having to replace stolen or damaged items.

BACKGROUND:

The City continue to have problems with break-ins at the City Yard located at 426 Work Street. Over the past year, the Facilities Maintenance Division has reached out to vendors requesting a quote to upgrade the security gates. Only one vendor responded back with a quote.

During the lag time of response from vendors, staff was able to receive and approve Bandit Security System to help prevent break ins that have been occurring more frequently at the City Yard. Since installation in March of 2023, Bandit Security System has caught 6 individuals trespassing and looking into vehicles and storage areas.

Due to the continued unauthorized individuals at the City Yard, we are requesting approval for an upgrade to our current City Yard Security gate system from American Door & Gates (the one vendor who responded to the request for a quote). Our current security gate system consists of 2 vehicle entry/exit gates, one manual open and one automatic slide, and one walk-through gate. Upgrade being requested will make both vehicle gates automatic open and close using both a remote system and keypad entry. Additional upgrade will add a photo eye to gates for extra security including walk-through gate. Upgraded system that includes removal and haul away of old security

gates and installation of new security gates will cost \$65,000. We are requesting a 15% contingency to cover any increase that might occur between council approval and completed installation.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378). In addition, CEQA Guidelines Section 15061 includes the general rule that CEQA applies only to activities which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. Because the proposed action and this matter have no potential to cause any effect on the environment, or because it falls within a category of activities excluded as projects pursuant to CEQA Guidelines section 15378, this matter is not a project. Because the matter does not cause a direct or foreseeable indirect physical change on or in the environment, this matter is not a project. Any subsequent discretionary projects resulting from this action will be assessed for CEQA applicability.

STRATEGIC PLAN INITIATIVE:

The proposed agreement will advance the City of Salinas Strategic Plan 2022-2025 Goals and Strategies of Infrastructure and Environmental Sustainability.

DEPARTMENTAL COORDINATION:

The Facilities Maintenance department has discussed and agreed with Maintenance Admin, Urban Forestry, Industrial Waste and Streets departments located at the City yard to approve and bring to council the planned upgrade at the City Yard. Planned upgrade will help alleviate unnecessary expenses to replace items that were stolen at the City yard.

FISCAL AND SUSTAINABILITY IMPACT:

The fiscal responsibility for the upgrade at the City yard is currently budgeted through the Public Works Facilities Maintenance Division's operational budget (1000.50.5232). Based on the current budget, sufficient funds are available to cover the cost of the Security Gate upgrade agreement if approved. No additional appropriation is needed.

Agreement

RESOLUTION NO. _____ (N.C.S.)

**A RESOLUTION AUTHORIZING THE UPGRADE OF SALINAS CITY YARD
SECURITY GATE SYSTEM**

WHEREAS, the City Yard at 426 Work Street is in need of security gate system upgrades

WHEREAS, Funds are available in the Public Works Facilities Maintenance operational budget; and

WHEREAS, Facilities Maintenance requested quotes from several vendors to upgrade the yard security gates; and

WHEREAS, American Door & Gates was the only vendor to respond with a quote, and

WHEREAS, City Yard departments have met and agreed on American Door & Gates as a vendor to upgrade the yard security gates; and

WHEREAS, Replacing and upgrading the security gates advances the City of Salinas Strategic Plan of Infrastructure and Environmental Sustainability; and

WHEREAS, City Council has authority to approve the security gate upgrade by entering into an agreement with American Door & Gates.

NOW, THEREFORE, BE IT RESOLVED that the Salinas City Council approves the agreement with American Door & Gates for an amount not to exceed \$65,000 with a 15% contingency.

PASSED AND APPROVED this 13th day of June 2023, by the following vote:

**AGREEMENT FOR SERVICES BETWEEN
THE CITY OF SALINAS AND AMERICAN DOOR & GATES**

City Yard Security Gate Upgrade

THIS AGREEMENT is executed this 13th day of June 2023, (“Agreement” or “Contract”) between the City of Salinas, a California Charter city and municipal corporation (hereinafter “City”) and American Door & Gates, an **Individual/Sole Proprietor or Single-Member LLC** (Hereinafter “Contractor”).

IT IS HEREBY MUTUALLY AGREED AS FOLLOWS:

1. **Scope.** Contractor hereby agrees to provide to the City, as the scope of services under this Agreement, the following services: Removal and hauling of old gates and installation of new gates. Scope of work is further discussed in Contractor’s Proposal and Contractor’s fee schedule dated 5/15/2023 Attachment B.
2. **Timeliness.** Contractor shall perform all tasks in a timely fashion, as set forth more specifically in Section 3 below. Failure to so perform is hereby deemed a material breach of this Agreement, and City may terminate this Agreement with no further liability hereunder, or the city may agree in writing with Contractor to an extension of time.
3. **Term.** The work under this Agreement shall commence upon approval and shall be completed by December 2023 unless City grants a written extension of time as set forth in Section 2 above.
4. **Payment.** City agrees to pay, and Contractor agrees to accept as full and fair consideration for the performance of this Agreement, not to exceed Sixty-Five Thousand Dollars (\$65,000), as more fully described in title of Contractors fee schedule, Attachment B. Contractor has no right of reimbursement for expenses under this Agreement. Compensation shall become due and payable 30 days after City’s approval of Contractor’s submission of monthly written invoices to the City. The payment of any compensation shall be contingent upon performance of the terms and conditions of this Agreement to the satisfaction of the City. If City determines that the work set forth in the written invoice has not been performed in accordance with the terms of this Agreement, City shall not be responsible for payment until such time as the work has been satisfactorily performed.
5. **Meet & Confer.** Contractor agrees to meet and confer with City or its agents or employees with regard to services as set forth herein as may be required by City to insure timely and adequate performance of this Agreement.
6. **Insurance.** Contractor shall procure and maintain for the duration of this Agreement insurance meeting the requirements specified in Attachment A hereto.
7. **Indemnification.** Contractor shall hold harmless, defend at its own expense, and indemnify City and its officers, officials, employees, agents, and volunteers from and against all

liability, claims, damages, losses, and/or expenses including reasonable City attorney fees arising from all acts or omissions of Contractor or its officers, agents, or employees arising

out of the performance of the work under this Contract, caused in whole or in part by any negligent act or omission of the Contractor, any subcontractor, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, except where caused by the sole negligence or willful misconduct of the City.

8. **Licensing.** Contractor warrants that it is properly licensed to perform the work specified under this Agreement, including but not limited to possession of a current City business license.

9. **Termination.** City may terminate this Agreement upon ten days' written notice. The amount of damages, if any, as a result of such termination may be decided by negotiations between the parties or before a court of competent jurisdiction.

10. **Agency.** In performing the services specified under this Agreement, Contractor is hereby deemed to be an independent contractor and not an agent or employee of City.

11. **Non-Assignability.** The rights and obligations of Contractor hereunder are not assignable and cannot be delegated without written consent of City.

12. **Entire Agreement.** This Agreement constitutes the entire Agreement between the parties hereto and supersedes any and all prior agreements, whether oral or written, relating to the subject matter thereof. Any modification of the Agreement will be effective only if it is in writing signed by both parties hereto.

13. **Validity.** If any provision in this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions will continue in full force without being impaired or invalidated in any way.

14. **Counterparts.** This Agreement may be executed in multiple originals, each of which is deemed to be an original, and may be signed in counterparts.

15. **Laws.** Contractor agrees that in the performance of this Agreement it will comply with all applicable State, Federal and local laws and regulations outlined in Attachment C. This Agreement shall be governed by and construed in accordance with the laws of the State of California, County of Monterey, and City of Salinas.

IN WITNESS WHEREOF, this Agreement is entered into by the parties hereto on the day and year first written above.

CITY OF SALINAS

Rhonda Combs, Assistant City Attorney

CONTRACTOR

By (Printed Name): _____

Its (Title): _____

Insurance Requirements

Contractor shall procure and maintain for the duration of the contract, and for three years thereafter, insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the work hereunder by the Contractor, his/her/its officers, agents, representatives, employees, and/or subcontractors.

MINIMUM SCOPE AND LIMIT OF INSURANCE

Coverage shall be at least as broad as:

1. **Commercial General Liability** (“CGL”): Insurance Services Office (“ISO”) Form CG 00 01 covering CGL on an occurrence basis, including products and completed operations, property damage, bodily injury and personal & advertising injury with limits no less than **\$2,000,000** per occurrence. If a general aggregate limit applies, either the general aggregate limit shall apply separately to this project/location (ISO Form CG 25 03 or 25 04) or the general aggregate limit shall be twice the required occurrence limit.
2. **Automobile Liability**: ISO Form CA 0001 covering Code 1 (any auto), with limits no less than **\$1,000,000** per accident for bodily injury and property damage.
3. **Workers’ Compensation**: as required by the State of California, with Statutory Limits, and Employers’ Liability insurance with a limit of no less than \$1,000,000 per accident for bodily injury or disease.
4. **Contractors’ Pollution Legal Liability and/or Asbestos Legal Liability and/or Errors and Omissions** (if project involves environmental hazards): with limits no less than \$1,000,000 per occurrence or claim, and \$2,000,000 policy aggregate, on an annual basis.

If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Contractor requires and shall be entitled to the broader coverage and/or higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

Self-Insured Retentions

Self-insured retentions must be declared to and approved by the City. At the option of the City, either: the Contractor shall cause the insurer shall to reduce or eliminate such self-insured retentions as respects the City, its officers, officials, employees, and volunteers; or the Contractor shall provide a financial guarantee satisfactory to the City guaranteeing payment of losses and related investigations, claim administration, and defense expenses. The policy language shall provide, or be endorsed to provide, that the self-insured retention may be satisfied by either the named insured or City.

Other Insurance Provisions

The insurance policies are to contain, or be endorsed to contain, the following provisions:

1. **The City, its officers, officials, employees, and volunteers are to be covered as additional insureds** on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts, or equipment furnished in connection with such work or operations and automobiles owned, leased, hired, or borrowed by

or on behalf of the Contractor. General liability coverage can be provided in the form of an endorsement to the Contractor's insurance (at least as broad as ISO Form CG 20 10, CG 11 85 or **both** CG 20 10, CG 20 26, CG 20 33, or CG 20 38; **and** CG 20 37 forms if later revisions used).

2. For any claims related to this project, the **Contractor's insurance coverage shall be primary** insurance coverage at least as broad as ISO CG 20 01 04 13 as respects the City, its officers, officials, employees, and volunteers. Any insurance or self-insurance maintained by the City, its officers, officials, employees, or volunteers shall be excess of the Contractor's insurance and shall not contribute with it.

3. Each insurance policy required by this clause shall provide that coverage shall not be canceled, except with notice to the City.

4. A copy of the claims reporting requirements must be submitted by Contractor to the City.

5. If the services involve lead-based paint or asbestos identification/remediation, the Contractor's Pollution Liability policy shall not contain lead-based paint or asbestos exclusions. If the services involve mold identification/remediation, the Contractor's Pollution Liability policy shall not contain a mold exclusion, and the definition of Pollution shall include microbial matter, including mold.

Acceptability of Insurers

Insurance is to be placed with insurers authorized to conduct business in the state with a current A.M. Best rating of no less than A: VII, unless otherwise acceptable to the City.

Waiver of Subrogation

Contractor hereby agrees to waive rights of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss. Contractor agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the City for all work performed by the Contractor, its employees, agents and subcontractors.

Verification of Coverage

Contractor shall furnish the City with original Certificates of Insurance including an additional insured endorsement and all required amendatory endorsements (or copies of the applicable policy language effecting coverage required by this clause) and a copy of the Declarations and Endorsement Page of the CGL policy listing all policy endorsements to City before work begins. However, failure to obtain the required documents prior to the work beginning shall not waive the Contractor's obligation to provide them. The City reserves the right to require complete, certified copies of all required insurance policies, including endorsements, required by these specifications, at any time.

Subcontractors

Contractor shall require and verify that all subcontractors maintain insurance meeting all the requirements stated herein, and Contractor shall ensure that City is an additional insured on insurance required from subcontractors. For CGL coverage subcontractors shall provide coverage with a form at least as broad as CG 20 38 04 13.

Maintenance of Insurance

Maintenance of insurance by Contractor as specified shall in no way be interpreted as relieving

Contractor of its indemnification obligations or any responsibility whatsoever and the Contractor may carry, at its own expense, such additional insurance as it deems necessary.

Special Risks or Circumstances

City reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

Surety Bonds

Contractor shall provide the following Surety Bonds:

1. Payment bond
2. Performance bond
3. Maintenance bond

The Payment Bond and the Performance Bond shall be in a sum equal to the contract price. If the Performance Bond provides for a one-year warranty, a separate Maintenance Bond is not necessary. If the warranty period specified in the contract is for longer than one year a Maintenance Bond equal to 10% of the contract price is required. Bonds shall be duly executed by a responsible corporate surety, authorized to issue such bonds in the State of California and secured through an authorized agent with an office in California.

Re: Gate Quote

Cost to remove and haul front main entry gate and walk gate, furnish and install new slide gate and walk gate, replace motor unit with Liftmaster LM-CSL24UI unit with safety edges and photo eye, replace (2) goose neck stands and keypads and replace loop controls.

Second gate remove and haul old gates, furnish and install a new 16 x 8 Cantilever slide gate with Liftmaster LM-HDSL24UL slide gate motor unit, safety loop and exit loop, safety edges on gate, inside keypad and outside keypad, hard wired Knox key switch, will need to trench across driveway to get power and control to outside keypad. Power to unit by others. This bid is Prevailing Wage. All gates are powder coated.

Total cost is \$65,000.00. Cost per remote \$30.00.

Parts: \$55,000

Labor: \$10,000

Regards,

Tim Scarpa

Attachment C

DEPARTMENT OF INDUSTRIAL RELATIONS' STATE LABOR CODE
Labor Law Requirements
(CCR Title 8, Section 16421)

This public works project is subject to compliance monitoring and enforcement by the California Department of Industrial Relations ("DIR"). All work shall be in accordance with wage scales and applicable determinations made by the Director of the DIR, as provided by Article 2, Chapter 1, Division 2, Part 7 of the Labor Code of the State of California, commencing with §1771.

Penalties for violations may be applied by the DIR pursuant to the Labor Code §1813 and §1815. The Contractor shall indemnify, hold harmless, and defend the City (with counsel reasonably approved by the City) against any claim for damages, compensation, fines, penalties, or other amounts arising out of the failure or alleged failure of any person or entity (including Contractor and its subcontractors) to pay prevailing wages as determined pursuant to Labor Code §1720, and hereby agrees to, §§1771-1774; to employ apprentices pursuant to Labor Code §1777.5 et seq., and/or to comply with the other applicable provisions of Labor Code §1720 et seq., §§1771-1774, §1777.5 et seq., and the implementing regulations of the DIR in connection with the scope of work. This indemnification section shall survive the expiration of the Term.

The Federal and State Labor Law requirements applicable to the Agreement are composed of, but not limited, to the following items:

1. **Payment of Prevailing Wage Rates:** All contractors, including subcontractors, shall pay no less than the prevailing rate of wages (Labor Code §1775), including the rates for holidays and overtime work (Labor Code §§1813 and 1815), to all workers employed in the execution of the contract (Labor Code §1774), pursuant to Labor Code §§1720-1784. The prevailing rates are those issued as wage determinations by the DIR, for each craft, classification and type of work. The current wage rate information can be found at the DIR's website at: <https://www.dir.ca.gov/oprl/DPreWageDetermination.htm>.
Copies of the prevailing rate of per diem wages are on file at City's Public Works Department (principal place of office). Contractor shall post a copy of the determination of the Director of DIR of the prevailing rate of per diem wages at each job site.
2. **Apprentices:** Contractor and subcontractors shall employ registered apprentices on this public works Agreement pursuant to Labor Code §1777.5. All contractors on this project (prime and subcontractors) are required to submit the Division of Apprenticeship Standards' ("DAS") Public Works Contract Award Information (DAS 140) form to all applicable apprenticeship committees no later than 10 days before commencing work. Additionally, all contractors are required to request registered apprentices (DAS 142 form).
Penalties for failure to pay prevailing wages (for non-exempt projects) and failure to employ apprentices include forfeitures and debarment under Labor Code §§1775 and 1777.7.
3. **Certified Payroll Records:** All contractors, including subcontractors, must maintain and file certified payroll records ("CPRs") pursuant to Labor Code §1776. Additionally, all contractors and subcontractors must furnish **certified payroll records into the DIR's Electronic Certified Payroll Reporting ("eCPRs") database**

<https://efiling.dir.ca.gov/eCPR/pages/eCPROnlineForm.jsp>). **Penalties apply to Contractor and any Subcontractors for failure to do so** under Labor Code §1777.

4. **Subcontracting:** Contractors are required to list all subcontractors hired to perform work on this public works agreement.
5. **Proper Licensing/Registration:** All contractors and subcontractors are required to be properly licensed, in accordance with the Provisions of Chapter 9 of Division 3 of the Business and Professions Code and subject to the requirements of §4104 of the Public Contract Code. In addition, all contractors including subcontractors must submit proof of current registration to perform public work, pursuant to Labor Code §1771.1. Contractors are required to be properly licensed and to require all subcontractors to be properly licensed. Penalties for employing workers while unlicensed under Labor Code §1021 and under the California Contractors License Law, found at Business and Professions Code §7000 et. seq.
6. **Job Site Notices:** Contractors are required to post all required notices (posters) on the job site in an area accessible to all workers, including subcontractors. Posters must be readable and placed in visible areas allowing workers to access the posters before, during, and after work shifts. Jobsites with multiple locations must include a portable poster board to ensure continued access to the information. Posters placed in foreman, supervisor, or employee vehicles, in an offsite job trailer, or inside a temporary restroom do not meet the posting requirement. Posters may be printed from the DIR's website at: <http://www.dir.ca.gov/wpnodb.html>.
7. **Nondiscrimination in Employment – Equal Employment Opportunity (“EEO”):** Employment discrimination is prohibited, pursuant to Labor Code §1777.6, the Government Code, and Title VII of the Civil Rights Act of 1964.
8. **Kickbacks Prohibited:** Contractors and subcontractors are prohibited from recapturing wages illegally by accepting or extracting “kickbacks” from employee wages pursuant to Labor Code §1778.
9. **Acceptance of Fees Prohibited:** Contractors and subcontractors are prohibited from accepting fees for registering any person for public work or for filling work orders on public works contracts, pursuant to Labor Code §§1779 and 1780.
10. **Unfair Competition Prohibited:** Contractors and subcontractors are prohibited from engaging in unfair competition as specified under Business and Professions Code §§17200 - 17208.
11. **Workers’ Compensation:** Contractors and subcontractors must be properly insured for Workers’ Compensation under Labor Code §1861. Contractor hereby represents that Contractor is aware of the provisions of Section 3700 of the Labor Code, which require every employee to be insured against liability for Workers’ Compensation or to undertake self-insurance in accordance with the provisions of that Code, and Contractor will comply with such provisions before commencing the performance of the work of this agreement.
12. **OSHA:** Contractors and subcontractors must abide by the Occupational, Safety, and Health Laws and regulations that apply.

Award of Contract for the Cesar Chavez Park DG Path

Approve a Resolution awarding a contract for the Cesar Chavez Park DG Path improvements to NR Development, Inc for the sum of \$602,500.00; authorizing the establishment of Capital Improvement Project (CIP) 9361, "Cesar Chavez Trail," with appropriation(s) totaling \$559,000; approving the transfer of \$559,000 from AVP CIP 9246 to CIP 9361.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS (PW)
LIBRARY AND COMMUNITY SERVICES (LCS)

FROM: DAVID JACOBS, PW DIRECTOR
KRISTAN LUNDQUIST, LCS DIRECTOR

TITLE: AWARD A CONTRACT FOR THE CESAR CHAVEZ PARK DG PATH

RECOMMENDED MOTION:

A motion to

- 1) Approve establishment of Capital Improvement Project (CIP) 9361, “Cesar Chavez Trail,” with appropriation(s) totaling \$559,000;
- 2) Approve the transfer of \$559,000 from AVP CIP 9246 to CIP 9361; and
- 3) Approve a resolution awarding a contract for the Cesar Chavez Park DG Path improvements to NR Development, Inc for the sum of \$602,500.00

EXECUTIVE SUMMARY:

On March 24, 2023, a Request for Proposals (“RFP”) for the Cesar Chavez Park DG Path Improvements was published via PlanetBids, an online bidding tool. On April 3, 2023, a non-mandatory Bid walk for the project was conducted. On April 27th one (1) contractor submitted a proposal for evaluation. An evaluation committee was formed to review the proposal for the improvement project. The selection Committee has reviewed the proposal from NR Development, Inc. and found that it met all the requirements and is a responsive proposer of the RFP. The Committee met with NR Development to discuss a better price for the work. NR Development reviewed its bid and lowered its proposal from \$618,500 to \$602,500.

BACKGROUND:

In 2019 the Library Community Services Department concluded a Parks, Recreation and Libraries Master Planning (PRLMP) effort which included a full assessment of our park, recreation, and library facilities. Following this assessment and the community engagement process which included over two thousand community engagement touch points, our consultants proceeded to

develop plan content, key project recommendations, implementation strategies and a capital investment plan. Based on this extensive community engagement all our assets requiring capital improvements were ranked. Cesar Chavez is a top ranked park with a high overall priority score. The priority score includes community need, significance, funding leverage, safety/security, usage/benefits, and location/demographics.

This non-competitive grant made possible by the passage of the Proposition 68 - Per Capita Program has awarded the City of Salinas \$177,952. The intent of the Prop 68 funded Per Capita Program is to create opportunities for high quality outdoor recreation and connect residents to parks in critically underserved communities across California. The Cesar Chavez Trail Park project consists of renovating the existing decomposed granite trail and adding to the trail to connect to Circle Drive. Bench and exercise pads will also be installed along the trail. The Trail is designed to provide a loop for walking or running in addition to a possible future connection with a proposed regional trail outside the park. Also provided along the trail will be Mile Marker posts that will inform the length in segments so that those exercising can be aware of the how far they go and based on their time, can calculate how fast or slow they went for a given segment.

The project also leverages Alisal Vibrancy Plan (AVP) implementation funds designated for park and open space improvements. AVP funds would be used to augment the project to include construction of the trail, with trash and recycling receptacles, and exercise stations. Adding more trash and recycling receptacles for cleanliness, and the addition of exercise stations to promote healthy activity were identified as priorities in the resident led AVP and implementation plan. This collaboration allows the City to maximize both the use of the per capita grant funds and the AVP implementation funds to increase community benefit and achieve the priorities of both the PRLMP and the AVP.

Cesar Chavez Park is a top priority because of its critical condition and heavy use by the community. The park hosts hundreds of people daily on the basketball courts, playground, and jogging or walking around the park. This grant application is part of our goal to finding a solution to develop this important park central to a thriving and densely populated community.

CEQA CONSIDERATION:

Categorically exempt. The City of Salinas has determined that the project is exempt from the California Environmental Quality Act (CEQA) Guidelines (Section 15301(c), Class 1), because the project proposes to maintain an existing pedestrian trail.

Furthermore, the project does not qualify for any of the exemptions to the categorical exemptions found at CEQA Guidelines Sections 15300.2, because section does not apply, and we are not reconstructing or replacing any structures or facilities.

STRATEGIC PLAN INITIATIVE:

This item relates to the City Council's Strategic Plan of Infrastructure and Environmental Sustainability as well as Youth and Seniors.

DEPARTMENTAL COORDINATION:

The Public Works Department, Library & Community Services and Community Development Departments worked together to develop the RFQ, rate and rank the statement of qualifications.

FISCAL AND SUSTAINABILITY IMPACT:

This project will be funded by Proposition 68 Per Capita grant funds (CIP 9361) and Alisal Vibrancy Plan Implementation Funds (CIP 9246).

To award the base bid, staff is requesting transferring \$559,000 from AVP CIP 9246 to CIP 9361. The City was awarded \$177,952 in Proposition 68 per capita funds for the project.

ANTICIPATED PROJECT COSTS	
Expenditure Description	Anticipated Expenditure
Base Bids	\$602,500.00
Contingency (10%)	\$60,250.00

APPROVED:

Kimbley Craig, Mayor

ATTEST:

Patricia M. Barajas, City Clerk

AGREEMENT

(To be completed and submitted for project award)

THIS AGREEMENT, made and entered into this _____ day of _____, 20____, by and between CITY OF SALINAS, a municipal corporation of the State of California, hereinafter called "City", and NR Development, Inc., hereinafter called "Contractor",

WITNESSETH

FIRST: Contractor hereby covenants and agrees to furnish and provide all labor, materials, tools, appliances, equipment, plant and transportation, and all other things required or necessary to be furnished, provide or done, and build, erect, construct and complete the work at the time and in the manner provided, and in strict accordance with, the Request for Proposal, for

**SECOND: CESAR CHAVEZ PARK DG PATH
PROJECT NO. 9361**

adopted by the Council of the City of Salinas on June 13, 2023 and identified by the signature of Contractor and the signature of the Mayor of the City of Salinas.

THIRD: It is expressly understood and agreed that this Contract consists of the following documents, all of which are incorporated into this agreement and made a part hereof as fully and completely as if set forth herein verbatim, to wit:

- a. Request for Proposals;
- b. Signed and executed Bid and Proposal of Contractor, and if any signed Addendum, as accepted by City;
- c. Bidder's Statement of Financial Responsibility, Technical Ability and Experience;
- d. Bidder's Statement of Subcontractors – Part I;
- e. Bidder's Statement of Subcontractors – Part II;
- f. Insurance Certification;
- g. Completely executed and signed all required City of Salinas forms;
- h. Instructions to Successful Bidder and General conditions;
- i. Bond of Faithful Performance;
- j. Payment Bond (Labor and Materials Bond);
- k. Certificate of Insurance;
- l. The aforesaid Plans and Specifications;
- m. Current California Building Standard Code;
- n. Design Standards and Standard Specifications and Standard Plans, 2008 Edition, or as amended, or otherwise indicated in the specifications; and
- o. This Agreement.

FOURTH: That said Contractor agrees to receive and accept the following prices as full compensation for furnishing all materials and for doing all the work embraced and contemplated in this Agreement and as set forth in the Proposal adopted by the City of Salinas, a true copy thereof hereto attached; also, for all

loss or damage arising out of the nature of said work or from the action of the elements or from any unforeseen difficulties or obstructions which may arise or be encountered in the prosecution of the work until the acceptance thereof by the City of Salinas and for all risk connected with the work, and for well and faithfully completing the work, and the whole thereof, in the manner and according to the said Plans and Specifications and the provisions of this agreement, and the requirements of the City Engineer under them, to wit: The prices as set forth in the Proposal of said Contractor for the work to be constructed and completed under this Agreement, which prices shall be considered as though repeated herein.

The Contractor and City hereby agree that the Contractor shall perform the work, and be paid the amount of bid items No.1 through 8 specified in the Proposal of the Contractor, for the as total price of six hundred two thousand five hundred dollars (\$602,500).

The undersigned Contractor further agrees to so plan the work and to prosecute it with such diligence that said work, and all of it, shall be completed on or before the expiration of the time specified in the Proposal after execution of the Contract on behalf of the City of Salinas and the receipt from the City of Salinas of a notice to proceed with the work.

FIFTH: The City of Salinas hereby promise and agrees with said Contractor to employ, and does hereby employ, said Contractor to provide the materials and to do the work according to the terms and conditions herein contained and referred to, for the price aforesaid, and hereby Contracts to pay the same at the time, in the manner and upon the conditions set forth in the Specifications and the said parties, for themselves, their heirs, executors, administrators, successors, and assigns, do hereby agree to the full performance of the covenants herein contained.

SIXTH: No interest in this agreement shall be transferred by the Contractor to any other party, and any such transfer shall cause the annulment of this Contract, so far as the City of Salinas is concerned. All rights of action, however, for any breach of this Contract are reserved to City.

SEVENTH: The Contractor shall keep harmless and indemnify the City of Salinas, its officers and employees and agents, from all loss, damage, cost or expense that arises or is set up for infringement of patent rights of anyone for use by the City of Salinas, its officers, employees or agents, or articles supplied by the Contractor under this Contract of which he/she is not entitled to use or sell. Contractor agrees to, at his/her own cost and expense, defend in court the City, its officers, agents and employees, in any action which may be commenced or maintained against them or any of the, on account of any claimed infringement of patent rights, arising out of this agreement.

Contractor shall indemnify and save the City of Salinas and its officers, agents, and employees harmless against all claims for damages to person or property arising out of Contractor's execution of the work, or otherwise by the conduct of the Contractor or its employees, agents, Subcontractors, or others (including the active and passive negligence of the City, its officers, agents, and employees) in connection with the execution of the work covered by this Contract and any and all costs, expenses, attorney's fees and liability incurred by the City, its officers, agents, and employees) in connection with the execution of the work covered by this Contract and any and all costs, expenses, attorneys' fees and liability incurred by the City, its officers, agents, or employees in defending against such claims, whether the same proceed to judgment or not, except only those claims arising from the sole negligence or willful conduct of the City, its officers,

agents, or employees. Further, Contractor at its own expense shall, upon written request by the City, defend any such suit or action brought against the City, its officers, agents, or employees.

Contractor shall reimburse the City of Salinas for all costs and expense (including but not limited to fees and charge of architects, engineers, attorneys, and other professional and court costs) incurred by the City in enforcing the provisions of this Section.

EIGHTH: The Contractor agrees to immediately repair and replace all defective material and workmanship discovered within 1 year after acceptance of final payment by Contractor and to indemnify said City of Salinas against all loss and damage occasioned by any such defect, discovered within said 1 year, even though the damage or loss may not be ascertained until after the expiration thereof. Provided, however, that if such failure of the Contractor to perform should not, by reasonable diligence, be discoverable or discovered within said 1 year, then the obligation of the Contractor to repair and replace said defective material or workmanship shall continue until one year after the actual discovery thereof.

NINTH: The Contractor agrees at all times during the progress of the work to carry with insurance carriers approved by the City of Salinas full coverage workmen's compensation and public liability insurance in the form and to the extent called for in Section 7-1.12 of both the Standard Specifications, State of California, May 2006, and the Design Standards and Standard Specifications, Public Works Department, City of Salinas, 2008 Edition. Certificates of Insurance must specify whether coverage is on a "claims occurrence" or "claims made" form. If the policy is "claims made", Contractor will be required to obtain a bond which must remain in effect until 12 months following work completions.

Contractor shall also advise the insurance carrier to inform the city of the unpaid limits of the policy. Such insurance policy shall contain an endorsement that the same shall not be canceled nor the amount of coverage be reduced until at least 30 days after receipt by the City of Salinas by certified or registered mail of a written notice of such cancellation or reduction in coverage.

It is acknowledged by the parties to this agreement that insurance coverage required to be provided by the Contractor or any other party in favor of the City/additional insured is intended to apply first on a primary and non-contributing basis in relation to any other insurance of self-insurance (primary or excess) available to the City and any employee of the City. The Contractor agrees to have its policies endorsed accordingly. In addition, Contractor also accepts to provide commercial general liability (CGL) endorsement form *CG 20 10 11 85*. An acceptable alternative would be the use of two ISO forms together: the *CG 20 10 07 04* ("ongoing operations") and the *CG 20 37 10 01* ("completed operations"). The City may also accept any other comparable endorsement, which does not further limit coverage and which may be approved and accepted by the City's Risk Management staff.

TENTH: Contractor agrees to comply with all applicable federal, state and municipal laws and regulations, including but not limited to California Labor Code Division 2, Part 7, and Chapter 1.

Apprenticeship utilization: The contractor agrees to comply with the Department of Apprenticeship Standards of the California Labor Code Section 1777.5, and the following:

Prior to commencing work on the awarded contract, the Contractor shall submit contract award information (form DAS 140) to all applicable apprenticeship program(s) that can

supply apprentices to the site of the public work. **A copy of this information shall also be provided to the City of Salinas.**

The ratio of work performed by apprentices to journeyman employed in a particular craft or trade on the public work shall be no less than one hour of apprentice work for every five hours of journeyman work.

At the end of each month of work on the contract, the Contractor and Subcontractors shall submit a record of utilization of apprentices for the previous months work.

Within 75 days after concluding work on the contract, each contractor and subcontractor shall submit to the City of Salinas and to the apprenticeship program a verified statement of the journeyman and apprentice hours performed on the contract.

IN WITNESS WHEREOF, City has caused this instrument to be executed and its corporate name and seal to be hereunto attached by its Mayor, pursuant to resolution theretofore duly adopted by the Council of the City of Salinas, and Contractor has caused this instrument to be executed, the day and year first hereinabove written.

RE: Cesar Chavez DG Path Request for Proposals ("RFP")

Dear Ms. Ambriz

As a condition to submitting a proposal for the above referenced project NR submits this statement confirming our understanding of the scope of work and deliverables to ensure a successful completion if we are awarded the project. The questionnaire mentions this in detail; however, we would like to reiterate that we are a self-performing general contractor with a staff of thirty-five full time employees skilled in various trades. We own 20+ pieces of heavy equipment ranging from backhoes, wheel loaders, and excavators including our own dump trucks and trailers. NR possesses the required licensure and skill to self-perform the work in question and therefore did not list any subcontractors.

Sincerely,

Narek Nadzharyan
President

ATTACHMENT D – PRICING PROPOSAL FORM

CESAR CHAVEZ PARK DG PATH

The work shall involve the furnishing of all labor, material, equipment, and incidentals to perform the construction of a decomposed granite path in Cesar Chavez Park in accordance with the Plan, Specifications and Special Provisions..

ADDITIVE ALTERNATIVE BID TOTAL \$97,416.00

The low bid will be on the base bid total only.

ATTACHMENT D-1 – QUESTIONNAIRE

In addition to the written proposal that demonstrates the Contractor's understanding of the RFP, each Proposal shall also include responses to the questions below.

Brochures and advertisements will not be accepted as a direct response to the questionnaire. A qualifying proposal must address all items. Incomplete questionnaires may be rejected.

1) What sets your company apart from the rest? Why should City of Salinas utilize the services from your organization? NR Development, Inc. is a self-performing general contractor. The only trades we do not self-perform are asphalt paving. This gives us the ability to control the schedule, provide adequate manpower to the product, control the ordering of materials without relying on potentially unreliable subcontractors. This has set us apart from other contractors in the industry.

2) Describe your firm's qualifications to provide the service specified in this RFP. Provide the firm's vision and mission statements, and key services offered.
NR has self-performed several projects that involve the installation of decomposed granite trails, and site furnishings for various entities and parks in Southern California. We have A, B, C13, C27, and C36 classifications.

3) What are some of your firm's professional affiliations and accreditations?
NR Development, Inc. is a certified small business by the State of California. As mentioned above we are a self-performing general contractor and possess A, B, C13, C27, and C36 classifications from the CSLB.

4) Is your company, either presently or in the past, been involved in any litigation, bankruptcy, or reorganization for any reason? If so, please provide dates and resolution.
Please see attached for further details.

5) Has your organization ever failed to complete any work awarded to it? No.

6) What will be the mode of communication between onsite staff, shift leads, management and City of Salinas staff? NR always prefers in person meetings at the job site for all entities involved to see the conditions. This gives NR the ability to resolve any matters in the field, and if needed issue a confirming RFI to memorialize the field discussions. Depending on the client's preference NR will accommodate virtual meetings, regardless NR will be on site daily.

7) What will be the corrective action procedure to ensure that problems are solved quickly and not repeated?
As stated above NR prefers in person communication to discuss field matters. It has been NR's practice on past projects to request punch lists months ahead of closing a project to confirm if a client is unhappy with anything, and it is immediately rectified.

8) Describe your firm's established "proactive" Quality Control program that you will be providing to the City to ensure a high level of performance is maintained on a consistent basis. Include any examples of forms currently being utilized and their particular function/use.
NR's workers document the project by taking daily photographs. The President of the company sees these photographs daily and will provide critique and his approval on the work installed. If it isn't up to the President's standard NR will work to provide a satisfactory product to the Owner.

9) Provide details on how your firm will meet the requirements of California Labor Code 1060-1065 Displaced Janitor Opportunity Act. How many employees do you plan to hire or retain to provide the services specified in this RFP? NR will endeavor to hire local residents to meet this requirement.

10) Will there be a dedicated site/account supervisor and what will be the duties and responsibility of this position? Will that person be responsible for other accounts/contracts? Yes, NR will assign an individual to the project and their sole responsibility will be managing that particular venture start to finish with no interruption of other ventures.

11) How will your organization handle shortages in staffing levels as a result of vacations, illness, terminations, etc.? No. NR has 35 full time skilled workers employed at all times.

12) Include a summary of your firm's training and injury/illness prevention and safety programs. NR provides forklift training, drivers training for heavy equipment, and vehicles, and we have IIPP and HIIPP OSHA plans in place.

13) Is your firm planning to subcontract portions of the work? Yes ☒ No
If yes, indicate the name of the subcontractor(s) and the portion of the work that will be subcontracted in each case.

14) Please provide a detailed list of the equipment that will be used to complete the requirements of this contract. Will there be equipment stored on site to perform the day-to-day duties? Please see attached. Any equipment that will be used on site will be stored.

15) What chemicals will be used in the course of cleaning? Please provide a detailed list of the product and their purpose. Do any of these chemicals conform to green cleaning methods as described in Green Seal Standards and the U.S. Green Building Council? NR doesn't anticipate using any harsh chemicals to service machines, equipment or other tools. If a herbicide is to be used it will be plant and animal safe.

ATTACHMENT D-2 – DISQUALIFICATION QUESTIONNAIRE

The Contractor shall complete the following questionnaire and submit with Proposal:

Has the Contractor, any officer of the Contractor, or any employee of the Contractor who has proprietary interest in the Contractor, ever been disqualified, removed, or otherwise prevented from bidding on, or completing a federal, state, or local government project because of a violation of law or safety regulation?

_____ Yes

_____ X _____ No

If the answer is yes, explain the circumstances in the following space.

Newly established business (doing business within the city of Salinas less than one year): is the newly established business owned by an individual(s) formerly employed by a local business enterprise? ☐ Yes ☒ No If Yes, for what years? _____

Any person claiming to be a local business enterprise as defined in Article III-A of Chapter 12 of the Salinas Municipal Code shall so certify in writing under penalty of perjury that they meet all the criteria listed in Salinas Municipal Code section 12-28.020, subsection (d). A local business enterprise shall be required to submit such declaration on an annual basis and shall immediately notify the City's Purchasing Officer if there is any change in circumstances which would disqualify it from application of the preference. The City shall not be responsible or required to verify the accuracy of any such certifications and shall have sole discretion to determine if a person meets the definition of "local business enterprise."

CERTIFICATION

I declare that I am 18 years of age or older and the information contained in the foregoing application is true and correct to the best of my knowledge. Under penalties of perjury, I certify that all the information provided herein is correct and that the business enterprise I am representing meets all of the criteria set forth in Salinas Municipal Code section 12-28.020, subsection (d) for a "local business enterprise." I declare that I am authorized to submit this Declaration for and on behalf of myself and the organization described above.

NON-COLLUSION DECLARATION OF CONTRACTOR

(This form must be completed and submitted with this Bid)

State of California, }
County of Los Angeles, }SS

Narek Nadzharyan

, being first duly sworn, deposes and says that:

I am the (owner, partner, officer, representative, or agent) President of NR Development, Inc.,
the party making the foregoing Bid:

The Bid is not made in the interest of or on behalf of any undisclosed person, partnership, company, association, organization, or corporation. The Bid is genuine and not collusive or sham. The Bidder has not, directly or indirectly, induced or solicited any other bidder to put in a false or sham Bid. The Bidder has not, directly or indirectly, colluded, conspired, connived, or agreed with any bidder or anyone else to put in a sham Bid or to refrain from bidding. The Bidder has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the bid price of the Bidder or any other bidder, or to fix any overhead, profit, or cost element of the bid price or of that of any other bidder. All statements contained in the Bid are true. The Bidder has not, directly or indirectly, submitted his or her Bid price or any breakdown thereof or the contents thereof or divulged information or data relative thereto, to any corporation, partnership, company, association, organization, bid depository, or to any member or agent thereof, to effectuate a collusive or sham Bid, and has not paid, and will not pay, any person or entity for such purpose.

Any person executing this declaration on behalf of a Bidder that is a corporation, partnership, joint venture, limited liability company, limited liability partnership, or any other entity, hereby represents that he or she has full power to execute, and does execute, this declaration on behalf of the Bidder.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on 4/26/2023 [date], at Downey [city], CA. [state].

**RESOLUTION OF BOARD OF DIRECTORS
DATED 4/26/2023**

Whereas, at a duly executed meeting of the Board of Directors of NR Development, Inc. existing under the laws of the State of California, did adopt the following as amendments to the previous discussions held on April 25, 2023:

IT WAS RESOLVED THAT: Narek Nadzharyan shall be duly authorized to endorse checks, drafts, or other evidences of indebtedness made payable to the corporation, but only for the purpose of deposit, and all checks, drafts, and other instruments obligating the corporation to pay money, including instruments payable to officers or other persons authorized to sign them, shall be signed on the corporation's behalf by the president or the chief financial officer.

Executing Corporate Contracts, construction bids, request for proposals, and all other pertinent documents as it pertains to the corporation. Except as otherwise provided in the articles or in these bylaws, the board of directors by this resolution authorizes Narek Nadzharyan to enter into any contract or to execute any instrument in the name of and on behalf of the corporation. This authority may be general or it may be confined to one or more specific matters. No officer, agent, employee, or other person purporting to act on behalf of the corporation shall have any power or authority to bind the corporation in any way, to pledge the corporation's credit, or to render the corporation liable for any purpose or in any amount, unless that person was acting with authority duly granted by the board of directors as provided in the bylaws, or unless an unauthorized act was later ratified by the corporation.

Cesar Chavez Park DG Path, City of Salinas. The board of directors by this resolution authorizes Narek Nadzharyan to enter into any contract or to execute any instrument in the name of and on behalf of the corporation for the above-mentioned entity.

The directors have authorized the above resolution dated this **26** day of **April 2023** in the State of California.

250 N. Madeira Ave, Salinas, CA 93905

The Contractor and Surety are bound to the Owner in the amount set forth above, for the payment of which the Contractor and Surety bind themselves, their heirs, executors, administrators, successors and assigns, jointly and severally, as provided herein. The conditions of this Bond are such that if the Owner accepts the bid of the Contractor within the time specified in the bid documents, or within such time period as may be agreed to by the Owner and Contractor, and the Contractor either (1) enters into a contract with the Owner in accordance with the terms of such bid, and gives such bond or bonds as may be specified in the bidding or Contract Documents, with a surety admitted in the jurisdiction of the Project and otherwise acceptable to the Owner, for the faithful performance of such Contract and for the prompt payment of labor and material furnished in the prosecution thereof; or (2) pays to the Owner the difference, not to exceed the amount of this Bond, between the amount specified in said bid and such larger amount for which the Owner may in good faith contract with another party to perform the work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect. The Surety hereby waives any notice of an agreement between the Owner and Contractor to extend the time in which the Owner may accept the bid. Waiver of notice by the Surety shall not apply to any extension exceeding sixty (60) days in the aggregate beyond the time for acceptance of bids specified in the bid documents, and the Owner and Contractor shall obtain the Surety's consent for an extension beyond sixty (60) days.

If this Bond is issued in connection with a subcontractor's bid to a Contractor, the term Contractor in this Bond shall be deemed to be Subcontractor and the term Owner shall be deemed to be Contractor.

When this Bond has been furnished to comply with a statutory or other legal requirement in the location of the Project, any provision in this Bond conflicting with said statutory or legal requirement shall be deemed deleted herefrom and provisions conforming to such statutory or other legal requirement shall be deemed incorporated herein. When so furnished, the intent is that this Bond shall be construed as a statutory bond and not as a common law bond.

Signed and sealed this 19th day of April, 2023

POWER OF ATTORNEY FOR
COREPOINTE INSURANCE COMPANY
DEVELOPERS SURETY AND INDEMNITY COMPANY
59 Maiden Lane, 43rd Floor, New York, NY 10038
(212) 220-7120

KNOW ALL BY THESE PRESENTS that, except as expressly limited herein, COREPOINTE INSURANCE COMPANY and DEVELOPERS SURETY AND INDEMNITY COMPANY, do hereby make, constitute and appoint:

William Syrkin, Richard Adiar, and Rebecca Haas-Bates

, of Irvine, CA

as its true and lawful Attorney-in-Fact, to make, execute, deliver and acknowledge, for and on behalf of said companies, as sureties, bonds, undertakings and contracts of suretyship giving and granting unto said Attorney-in-Fact full power and authority to do and to perform every act necessary, requisite or proper to be done in connection therewith as each of said company could do, but reserving to each of said company full power of substitution and revocation, and all of the acts of said Attorney-in-Fact, pursuant to these presents, are hereby ratified and confirmed. This Power of Attorney is effective April 19, 2023 and shall expire on December 31, 2025

This Power of Attorney is granted and is signed under and by authority of the following resolutions adopted by the Board of Directors of COREPOINTE INSURANCE COMPANY and DEVELOPERS SURETY AND INDEMNITY COMPANY (collectively, "Company") on February 10, 2023.

RESOLVED, that Sam Zaza, President, Surety Underwriting, James Bell, Vice President, Surety Underwriting, and Craig Dawson, Executive Underwriter, Surety, each an employee of AmTrust North America, Inc., an affiliate of the Company (the "Authorized Signers"), are hereby authorized to execute a Power of Attorney, qualifying attorney(s)-in-fact named in the Power of Attorney to execute, on behalf of the Company, bonds, undertakings and contracts of suretyship, or other suretyship obligations; and that the Secretary or any Assistant Secretary of the Company be, and each of them hereby is, authorized to attest the execution of any such Power of Attorney.

RESOLVED, that the signature of any one of the Authorized Signers and the Secretary or any Assistant Secretary of the Company, and the seal of the Company must be affixed to any such Power of Attorney, and any such signature or seal may be affixed by facsimile, and such Power of Attorney shall be valid and binding upon the Company when so affixed and in the future with respect to any bond, undertaking or contract of suretyship to which it is attached.

IN WITNESS WHEREOF, COREPOINTE INSURANCE COMPANY and DEVELOPERS SURETY AND INDEMNITY COMPANY have caused these presents to be signed by the Authorized Signer and attested by their Secretary or Assistant Secretary this March 27, 2023.

PO Box 39632, Downey, CA. 90239

1. Hanford High School Pool Shade Structure

Owner: Hanford Joint Union High School District
823 W. Lacey Blvd.
Hanford, CA. 93230
Contact: Justo Padron (559) 448-8051

Scope: Installation of premanufactured tensile fabric structure by USA Shade Structures.

Start Date: 3/21/2022

Completion Date: 6/8/2022

Original Contract Amt.: \$239,500.00

Final Contract Amt.: \$254,494.68

2. Whittier Narrows Equestrian Center Refurbishment Project

Owner: County of Los Angeles
900 S. Fremont Street, Alhambra, CA.
Contact: Hanna Kang (626) 300-2337

Scope: Renovation of an existing county lease-operated equestrian center located on army corps of engineer's land within the flood basin of the Whittier Narrows Dam. The horse boarding facilities to be constructed include barns, lockers, wash racks, arenas, turnouts, round pens, storage sheds, pre-fabricated restroom, picnic areas, access road with defined parking areas. Project total of 200 horse boarding stalls. All barns and other structures will be relocated out of the flood zone. Storm water filtration basins will be constructed to capture site run-off. Includes the construction of facilities to support new trail riding experience, including housing for up to 20 horses, designated arena, ADA accessible restroom, parking, office and picnic area for day-use recreation.

Start Date: 5/4/2020

Completion Date: 11/28/2021

Original Contract Amt.: \$8,558,400.00

Final Contract Amt.: \$9,456,891.00

PO Box 39632, Downey, CA. 90239

added to the columns by NR, installation of light standards, asphalt paving, landscape and irrigation, new rubber surfacing at playground, new trash enclosure for electrical.

Start Date: 8/11/2019

Completion Date: 10/31/2020

Original Contract Amt.: \$5,726,094.00

Final Contract Amt.: \$5,985,576

6. Capital Improvement Project No. 15-21C/D Wilderness Park Pond Restoration Multi-Prime Project, demolition, grading, and concrete, ponds and electrical

Project Owner: City of Downey
11111 Brookshire Ave., Downey, CA.
Contact: Walt Eden (949) 874-9170

Scope: Demolition of existing hardscape, rough and finish grading, drainage, utilities, pond grading to 90% compaction, grading of north and south streams, bridge installation, replace hardscape and other miscellaneous work. Restoration of 2/5 acres of wetlands habitat at two existing ponds at Wilderness Park. Ponds construction includes pond demolition, pond liner, pump system, pump station enclosure, stream features, and pedestrian bridge.

Start Date: 5/19/2020

Completion Date: 12/31/2020

Original Contract Amt.: \$2,900,000

Final Contract Amt.: \$3,100,565.00

7. Urban Orchard Project PRK-539

Project Owner: City of South Gate
8620 California Ave.
South Gate, CA. 90280
Cody Roth (951) 768-2614

Scope: New community park and construction of new wetlands habitat, construction of new concrete reservoir to filter and distribute water to wetlands, installation of custom fabricated shade structures by NR, installation of premanufactured fitness equipment, site furnishings, play equipment, excavation and grading, soil export, fencing, asphalt paving, construction and installation of DG walking trails, concrete flatwork and sidewalks, installation of premanufactured restroom building and community building.

LITIGATION DETAILS

1. *NR Development, Inc. v. City of South*

Gate Case Number: 22NWCV01501

Status: Ongoing, case Filed on 12/7/2022

******Case to be mediated within the next 30 days***

On September 2, 2022, NR submitted a PCC 9204 claim to the City of South Gate for various change order claims for unpaid change order work. All matters are still outstanding, and we anticipate resolving these change orders globally with the Owner. The total amount of the claim is \$1,792,163.62. In addition, NR has filed a Government Code Claim since the Owner has not responded to the matter. NR provides a brief description of the matters herewith:

- Price Increase for Shade Shelters, Site Furnishings, and Play Structures Grounds-Price increases due to Covid 19, shortage of raw materials, supply chain interruption beyond contractor's control.
- Mulch Export not identified in the bid documents.
- Topo Elevation Difference-Additional work to rework soil due to void created by the unforeseen mulch.
- Additional soil export-tonnage exported exceeded amounts described per bid documents, the owner directed NR to continue exporting on a time and material basis, owner has not paid per agreement.

2. *NR Development, Inc. v. Jensen Enterprises, Inc.*

Case Number: 23NWCV00940

Status: Pending

Breach of contract for failure to manufacture and deliver precast concrete products.

HEAT ILLNESS & INJURY PREVENTION PLAN

The Injury & Illness Prevention Program (IIP Program) administrator, Narek Nadzharyan, has the authority and responsibility for implementing the provisions of the following program for NR Development, Inc. ("NR"). All managers and supervisors are responsible for implementing the IIP Program in their work areas and for answering all questions related to the IIP Program. A copy of this IIP Program is readily available from each manager and supervisor upon request.

COMPLIANCE & EXECUTION

Our management team is fully responsible for the assurance that all safety and health procedures are clearly communicated and understood by all of NR's employees, which is inclusive; however, not necessarily limited to using safe work practices, following all directives, policies, and procedures, and for the maintenance of a safe work environment. Our supervising staff ensures that all workers comply with our established rules.

WATER PROVISION

- **Designated Individual:**
 - Narek Nadzharyan or the designated site foreman will be responsible for bringing **(1) 5 gallon** drinking container to the site.
- **Provision of Disposable Cups:**
 - Narek Nadzharyan or the designated site foreman will be responsible for providing no less than (2) bags of cone rims or disposable cups with the necessary dispensers to ensure that enough cups are made available for each worker and kept in clean, safe condition prior to use.
- **Water Replenishment Procedures:**
 - Narek Nadzharyan or the designated site foreman will be responsible for checking the water levels of all containers every 30 minutes, and will ensure that the containers are checked more frequently when the temperature exceeds 90 degrees F. If the water level of the container should drop below 50%, such containers will be refilled with cool water.

In an effort to accomplish this task Todd Hawk will have on hand, (1) additional (5) gallon bottles to immediately replace water as needed.

- When the temperature exceeds 90 degrees, the project superintendent or site foreman, will carry ice in separate containers, so that when necessary, it will be added to the drinking water to keep it cool.
- The Superintendent, or site supervisor will check the work site and place the water as close as possible to the workers, no more than 50' from the workers. If the site terrain prevents the water from being placed as close as possible to the workers, the project superintendent will bring bottled water or individual containers in addition to disposable cups and water containers so that the drinking water is readily accessible.
- The Superintendent or site supervisor will be responsible for the relocation of the water container in the event the crew should move to different locations within the jobsite.
- The Superintendent or site supervisor will be responsible for the cleaning of the water containers to ensure that such containers are in constant safe and sanitary conditions.
- **Reimbursement for Provision of Water/Disposable cups:** NR will reimburse all supervisors for any costs incurred to fill up their water containers on a daily basis, and for all costs associated with the purchasing of disposable cups and or cleaning supplies for the containers in the event the supervisor should be required to pay for such items out of pocket. NR's supervisors are provided with a company credit card for the purchase of small tools, meals, and company expenses such as costs related to food and or beverage provision at the jobsites.
- The Project Superintendent, or site supervisor will be responsible for announcing the location of the water container on site so that all employees are aware of the presence of water if needed and will advocate the importance of frequent consumption.
- When temperatures are expected to soar the Project Manager, or site Superintendent will hold "tailgate" meetings to conduct a briefing of the importance of water consumption while working in such conditions, the number

and schedule of water and rest breaks, and the signs and symptoms of heat illness.

- The Project Manager or Site Superintendent will use audible devices such as a handheld transceiver, and or a whistle as a reminder for all employees to take a water break. When the temperature exceeds 95 degrees F, or during the presence of a heat wave, the number of water breaks will be increased by the Superintendent, and will continue to remind workers throughout the shift. The importance of drinking water will be heavily advocated during the employee's training.

SHADE PROVISION

- The Project Manager or Site Superintendent will be responsible for determining the shade resources prior to commencing with work at the jobsite since some sites have very little or no access to shade. In the event that no shade is provided the Superintendent will be responsible for providing at least (2) tarp canopy structures at the site to accommodate the required 25% of employees employed on that specific shift. In addition chairs, benches, and or towels will be provided so that the employee is not in contact with the bare ground.
- The shades will be placed as close as possible to the workers in the event that temperatures should reach or exceed 85 degrees F. If the temperature should be below 85 degrees F, the shades shall still be provided at the site; however, at a distance pursuant to the employees' requests.
- The location of the shade will be pointed out daily to the workers by the Superintendent. Each employee will be encouraged to take (5) minute rest periods in the event the heat should become bothersome so as to protect themselves from overheating.
- The shade structure will follow the crew as they work to ensure that proper shade is as close as possible and access is provided at all times.
- In the event a project site is located near vegetation such as orchards, the designated person, the Superintendent, shall investigate such vegetation to determine if adequate shade is provided as the day progresses and the sun's ray's shift.
- In the event of winds of more than 40mph, shade shall not be provided; however, the Superintendent shall document as to how this determination was made and

what steps will be taken to ensure that shade is provided upon request and or alternative cooling measures offering equivalent protection.

WEATHER MONITORING

- The Superintendent, and or Employer shall visit the internet (www.nws.noaa.gov) or call the National Weather Service Numbers (805-988-6610 (#1) two weeks in advance to check projected weather conditions prior to the work schedule. This ensures safe planning of all safety measures and precautions followed in the event of a heat wave.
- Prior to each workday, the Superintendent, will review the forecasted temperature and humidity and compare that to the National Weather Heat Index to evaluate the risk level for heat illness. These requirements must be met in order to ensure that the workers are not exposed to temperatures or humidity considered "extreme caution" or "extreme danger" putting them at risk for illnesses associated with extreme heat exposure such as heat stroke.
- Before the workday, the Project Manager or the Site Superintendent will be responsible for monitoring the weather at the jobsite using the previously mentioned avenues, or a simple thermometer. If potential risks are discovered through this observation the work schedule may be modified such as early work stoppage, starting at an earlier am hour, rescheduling the job, working night shifts, or if none of these can be met water and rest breaks will be increased.
- The Project Manager or the Site Superintendent will be responsible for checking the weather via thermometer every 60 minutes to monitor increases in temperature. Once the temperature exceeds 85 degrees F, the shades will immediately be opened and readily accessible to the workers. Once the temperature exceeds 95 degrees F, NR will implement the High Heat Procedures associated with this plan.

HEAT WAVE MONITORING

- During a heat wave or heat spike, the workday may be cut short to 12pm and rescheduled to resume later that day, or canceled all together.
- If schedule modifications cannot be accommodated the Project Manager or Site Superintendent will hold an emergency tailgate meeting and will discuss the implementation of heat illness prevention program and the importance of frequent water and fluid consumption throughout the day. Additional breaks will be stressed

and increased to 2x per hour. This is not the maximum requirement. Employees may take as many breaks as deemed necessary. The Site Superintendent will ensure that each employee takes at least 2 breaks per hour for water consumption.

- During a heat wave or heat spike the Superintendent will hold a tailgate meeting to review the company's heat illness prevention procedures, the weather forecast, and the emergency response associated with any heat illnesses.
- The "buddy" system will be assigned and enforced on the project. Each duo is required to be on the lookout for any signs and symptoms associated with heat illness and ensure that emergency procedures and breaks are initiated when an individual is showing possible signs and symptoms of heat illness.

HIGH HEAT PROCEDURES

- The Project Manager or Site Superintendent will ensure that effective communication by voice, observation, or electronic means is maintained so that employees at the worksite can contact a supervisor when necessary. If for instance he is unable to be near that particular crew to observe their actions the employees may use their company cell phones to communicate effectively.
- The Project Manager or Site Superintendent will continually observe the employees for alertness and signs and or symptoms of heat illness.
- The Superintendent will remind employees throughout the work shift to consume plenty of water.
- The Site Superintendent will closely supervise new employees, or assign a "buddy" with more seniority to monitor the situation.

ACCLIMATIZATION PROCEDURES

Overview:

The ability of the human body to adapt and adjust to any sudden, and or extreme changes in the event of environmentally induced heat.

NR will take any and all measures necessary to monitor the weather and in particular try to be aware of sudden heat waves, or increases in temperatures to which employees haven't been exposed to.

- Work schedule modifications may be permitted to either one of the following:

- Work stoppage by 12pm.
 - Rescheduling of work.
 - Change in shift from am work to night work.
- During the hot summer months work shifts shall start 1 hour earlier at 6am, and will be shut down 1 hour earlier, 2pm.
 - Steps will be taken to ensure the safety of new employees during hot periods of the day. This is inclusive to heavier work to be performed early am, or saved for night shifts, with less intense work to be performed during the hotter periods of the day. This will be monitored and coordinated by The Superintendent.
 - The Project Manager or Site Superintendent will be more alert with regard to new employees and the presence of heat related symptoms.
 - The Project Manager or Site Superintendent will assign an individual with more seniority to serve as a "buddy" to watch for any discomfort or heat illness related symptoms.
 - During a heat wave, The Superintendent will observe all employees closely and be on the lookout for possible symptoms of heat illness.
 - NR's training for employees and supervisors will stress the importance of acclimatization, how it is developed, and how company procedures address it.

EMERGENCY RESPONSE PROCEDURES

- The Superintendent will provide workers with a map along with clear and precise directions of the site to avoid a delay of emergency medical services.
- Prior to assigning a crew at a jobsite, Narek Nadzharyan will ensure that a qualified, and appropriately trained and equipped person will be available to administer first aid procedures if necessary.
- Given there is a language barrier situation, The Project Manager, Site Superintendent and Narek Nadzharyan will ensure that there is a person present who is proficient in that specific language to ensure that emergency medical services are provided in the event of such emergency.
- All foreman and supervisors are required to carry company cell phones or other means of communication to ensure that emergency medical services can be called and verify that such devices are functional prior to the start of the work shift.

- When an employee is displaying symptoms of heat illness, The Project Manager, or Site Superintendent, will take immediate steps to keep the employee cool and comfortable once emergency service responders have been called.
- If for any reason the jobsite is located in rural region, a designated employee shall be responsible to go to the nearest road where emergency responders such as the fire department or ambulance where they can be seen and direct the responders to the scene. The employees are required to wear bright colored vests with reflective striping; however, if these vests should prove to be unsatisfactory in terms of visual awareness, they shall be equipped with reflective flashlights.
- During a heat wave, the superintendent, or The Site Superintendent shall remind the employees to report any discomforts experienced in light of the heat spikes.
- NR's training for employees and supervisors will include every detail of these written emergency procedures.

PROCEDURES FOR HANDLING A SICK EMPLOYEE

- When an employee is experiencing heat illness or showing signs of its presence a trained first aid worker or supervisor will check the sick employee and determine if measures such as resting in the shade and drinking cool water will be sufficient or if emergency service providers are necessary.
- Emergency service providers will be called in the event that no trained first aid worker or supervisor is on site.
- Emergency providers will be called if an employee displays signs or symptoms of heat illness and procedures such as resting in the shade, and drinking cool water. First aid procedures such as removing excess clothing, and the placement of an ice pack in the victim's armpit area and fanning will be implemented until the proper authorities arrive at the scene.
- An air ambulance will be requested in the event the jobsite is located more than 20 min. away from a hospital.

Employee & Supervisory Training

- NR will ensure that all supervisors are trained prior to being assigned the supervisory position of all workers. Such training is inclusive to the company's written procedures and what steps supervisors are to follow in the event of such emergency.

- NR will ensure that all employees and superintendents are properly trained prior to working outside. These written procedures will be included.
- The Project Manager, Site Superintendent, and Narek Nadzharyan will be responsible for the training associated with contacting emergency medical services, including how they are to proceed when there are non-English speaking workers, how clear and precise directions to the site will be provided, as well as the requirement to make visual contact with emergency responders at the nearest road or landmark guiding them to the scene of injury.
- If the temperature should exceed 75 degrees F, The Project Manager, or Site Superintendent will hold brief tailgate meetings to discuss the weather report, the enforcement of heat illness prevention, and provide reminders to drink water frequently throughout the day, the implementation of the buddy system, and the provision of shade upon request.
- All new employees will be provided with a senior "buddy" for the enforcement and training of proper procedures.

Miscellaneous Requirements & Additional Notes

- All employees shall immediately notify the on-site representative for NR of any discomfort with regard to the heat such as headache, nausea, profuse sweating, dizziness and fatigue, etc.
- Rest periods shall be granted to any and all employees experiencing such discomfort until employee feels they are in an appropriate and otherwise healthy state to work.
- Rest periods shall be taken in places subject to shade either by natural means (trees, building overhangs) or if no shade is provided by either access mentioned then NR will provide adequate means of shade via tarps or canopies.
- Potable drinking water is provided daily to all employees working.
- Clothing colors may be modified depending on soaring temperatures in an effort to reflect heat. Employee may also use their own discretion as well considering company uniforms are not required.
- On-site supervisor or foreman shall encourage employees to drink about two cups every 15 minutes to promote hydration even if they claim they are not thirsty.

INJURY & ILLNESS PREVENTION PLAN

RESPONSIBILITY

The Injury & Illness Prevention Program administrator, **Narek Nadzharyan, Danielle Bogdanovich, and all project personnel**, have the authority and responsibility for implementing the provisions of the following program for NR Development, Inc. ("NR"). All managers and supervisors are responsible for implementing and maintaining the IIP Program in their work areas and for answering worker questions about the IIP Program. A copy of this IIP Program is readily available from each manager and supervisor upon request.

Responsible Persons:

1. Narek Nadzharyan, President

COMPLIANCE

The abovementioned gentlemen are fully responsible for the assurance that all safety and health procedures are clearly communicated and understood by all employees. This is inclusive; however, not necessarily limited to the proper utilization of safe work practices, following all directives, policies, and procedures and for the maintenance of a safe work environment. Our supervising staff ensures that all workers are in compliance with the established rules of the workplace and observe the following pertinent areas:

1. Ensuring that all workers know and understand the provisions of our IIP Program.
2. Conduct periodic evaluations of each employee's safety practices.
3. Recognition of employees that do follow safe practices.
4. Re-training of employees not utilizing safe work practices.
5. A strict disciplinary system for employees who continually fail to convey safe work practices as they impose a danger not only to themselves but to other individuals around them.

COMMUNICATION

Constant communication between management and staff is the key to our success in the attempt to maintain safe work conditions on both shop and site premises. AWI upholds the following provisions:

1. Orientation requirement for new workers as well as a thorough review of our IIP Program. Translation options are available for the individual proficient in a specific language.
2. Periodic review of our own program and the suggestion of new implementations.
3. Safety & Health training programs.
4. Conducting weekly tool box safety meetings. Examples of topics discussed are inclusive; however, not limited to the following:
 - a. Any accidents incurred involving employees not following proper safety protocol and any suggestions for maintaining a safe workplace and ways to avoid future accidents.
 - b. A review of any hazardous conditions located on both shop and site premises such as materials control of items involving welding gases, steel primers.
5. Posted Safety Information.
6. A system where workers can anonymously inform the responsible individuals regarding workplace hazards or workers inflicting such hazards therein.
7. A meeting of three responsible individuals to discuss any all issues occurred. This includes a review of the foreman's logs, and the discussion of how to prevent injuries, and promote safety within the workplace.

HAZARD ASSESSMENT

Narek Nadzharyan and all on site personnel employed by Narek Nadzharyan, Inc. shall perform periodic safety inspections within the facility and the jobsites, and are performed on the following basis:

1. When new equipment is introduced into the workplace. The weekly tool box safety meetings will go over proper use and storage of the equipment.
2. When occupational injuries or illnesses have occurred such as someone falling off a material lift or a truck when loading the materials, if a steel beam should fall on an individual's foot, when metal or any other substance gets into

someone's eye when they are welding. These are all examples of how we assess an injury when it is present and devise ways to avoid these types of injuries in the future.

3. When we are presented with newly identified hazards such as new primers, thinners, welding machines, etc.
4. When we establish our IIP Program.
5. When we hire or reassign workers to processes, certain operations such as layout and or welding, for which a hazard evaluation has not been conducted.
6. Whenever the workplace warrants an inspection. This is inclusive to a review of the actions of the employees and as to whether they are implementing safe practices in the workplace.

ACCIDENT/EXPOSURE INVESTIGATIONS

The following procedures are implemented for the purposes of investigating an area where there has been an accident or exposure to some hazardous condition:

1. Scheduling an immediate visit of the scene of the accident.
2. Interviewing the injured worker/s and any witnesses to the incident.
3. Conducting a site walk to assess the variables associated with the accident, and determining its cause.
4. Taking immediate corrective action of the exposure, and implementing preventative measures for future accidents.
5. Recording the findings and actions taken to mitigate the situation.

HAZARD CORRECTION

NR takes any and all unsafe, unhealthy, or hazardous work practices very seriously. In the event of such incidents the hazard shall be corrected and the employee reprimanded immediately. This tends to take place at the following times:

1. Upon discovery of the incident.
2. Upon the reporting from another individual of an incident.

When a hazard is present that cannot be immediately abated without endangering the lives or health of the employees, all exposed workers will be removed from the site of the hazard with the exception of those skilled to cure the hazardous conditions. All employees in the event will

be provided with protective wear and equipment. All actions taken for hazard correction will be documented per company records accordingly.

TRAINING & INSTRUCTION

All employees shall receive training on job specific safety and health practices on the following premises:

- a. When the IIP Program is first established.
- b. To all new workers.
- c. To existing workers provided with new job assignments.
- d. Whenever a new substance, material, process or procedure is introduced in the workplace.
- e. When the employer is made aware of a new or unrecognized hazard.
- f. To all supervisory staff to communicate to the workers under their direction at the jobsites.
- g. To all employees presented with a specific hazard related to their job scope.

Workplace safety and health practices:

1. NR will provide an explanation of the IIP Program, emergency action plan, escape plan in the event of a fire, the reporting of unsafe conditions and or work practices.
2. Proper use of clothing inclusive to gloves, footwear, and protective eyewear.
3. Information regarding chemical hazards for which employees could be exposed.
4. Restroom and drinking water facilities.
5. First-aid kit for medical services.

If specific safety instructions were not covered per previous job training we ensure that such subjects are covered with additional training.

RECORD KEEPING

NR falls under Category 1 in terms of our record keeping policy for hazard assessments and have taken the following steps to ensure the implementation and maintenance of our IIP Program:

1. Keeping of records concerning hazard assessments. The names of the individuals conducting such inspection are noted on the records. Unsafe conditions are noted, and the corrective measures taken and recorded on a hazard assessment correction form.
2. Documentation of safety and health training for each worker. Such records include the workers name, training date, type of training received. In the event an outside service approved by Cal-OSHA is hired the records are presented in the same manner or in accordance to the requirements of the outside service.
3. Inspection records are maintained for (1) calendar year, with the exception of workers who have been hired for less than (1) calendar year. Such records are provided to the worker upon termination from the company.

NR's LIST OF TRAINING SUBJECTS

1. Employer's Code of Safe Practices
2. Safe Access to working Areas
3. Fall Protection
4. To refrain from electrical hazards such as high voltage power lines.
5. Materials Handling
6. Power Tool Operation
7. Fall Protection from Elevated areas.
8. Slips, falls, and back injuries.
9. Proper lifting techniques.
10. Hazardous Chemical Exposures.
11. Use of Material Lifts, Scissor Lifts, Crane Operation.
12. Machine, Machine parts.

SB 1 Road Repair and Accountability Act - FY 2023/24 Projects

Approve a Resolution adopting a list of projects for Fiscal Year 2023-24 funded by SB 1: The Road Repair and Accountability Act of 2017.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS

FROM: DAVID JACOBS P.E., L.S., PUBLIC WORKS DIRECTOR

BY: ELISE RAMIREZ, P.E., SENIOR CIVIL ENGINEER
PATRICK FUNG, ASSISTANT ENGINEER

TITLE: SB 1 ROAD REPAIR AND ACCOUNTABILITY ACT – FY 2023/24
PROJECTS

RECOMMENDED MOTION:

A motion to approve a resolution adopting a list of projects for Fiscal Year 2023-24 to be funded by SB 1: The Road Repair and Accountability Act of 2017.

BACKGROUND:

SB 1, the Road Repair and Accountability Act of 2017 was passed by the California Legislature and signed into law by the Governor in April 2017 to address the significant multi-modal transportation funding shortfalls statewide. Annually, approximately \$800 million will go to cities statewide, allocated on a per capita basis. The revenues for cities will come out of the Road Maintenance and Rehabilitation Account (RMRA) where cities are expected to prioritize fixing their existing infrastructure first before having some additional flexibility for those funds for other transportation needs. SB 1 will provide Salinas an estimated \$4 Million in RMRA funding in FY 2023-24.

In the current fiscal year, the City's SB 1 funds are allocated amongst the Citywide Striping and Signing Projects (CIP 9081), Annual Pavement and Sidewalk Maintenance (CIP 9438), Street Preventive Maintenance Program (CIP 9981), and Williams Road Streetscape Project (CIP 9071).

To continue receiving SB 1 funds in the next fiscal year, the City must submit a Council-approved resolution with the City's road maintenance and rehabilitation project list to the California Transportation Commission (CTC) by July 1, 2023. The proposed list (below) reflects the City's current transportation infrastructure priorities in FY 2023-24.

Project Title	Description	Location	Estimated Useful Life	Estimated Schedule
2023-24 Striping and Signing Improvements	Striping and Signing maintenance at critical locations not scheduled for pavement improvements.	E. Market St. (Front St. to Sherwood Dr.); Maple St. (S. Main St. to Pajaro St.); Schilling Pl. (Hansen St. to Eden St.); E. Alisal St. (Griffin St. to Work St.); Williams Rd. (Old Stage Rd. to E. Boronda Rd.); Riker St. at Clay St.; Terven Ave. (Sanborn Pl. to Airport Blvd.); Harkins Rd. (Hansen St. to City Limits); W. Rossi St. (N. Davis Rd. to N. Main St.); Independence Blvd. (E. Boronda Rd. to Nantucket Blvd.); El Dorado Dr. (Harden Pkwy. To E. Alvin Dr.); Rider Ave. (Mimbrera Way to Del Monte Ave.); N. Main St. (Boronda Rd. to Russel Rd.); Towt St. (E. Alisal St. to E. Market St.);	2 years for crosswalks and 4 years for all other striping on pavement	Start Construction July 2023 Completion June 2024
Boronda Road Congestion Relief Project – Phase 1	Construction of a roundabout at East Boronda Road and McKinnon Street. Includes pedestrian and bicyclist improvements, median islands, pavement rehabilitation, landscaping, storm and sanitary sewer improvements, striping, and signing.	East Boronda Road from Dartmouth Way to 1200 feet East of McKinnon Street	20-25 years	Start Construction April 2024 Completion December 2025

The following previously proposed and adopted projects may also utilize Fiscal Year 2023-24 Road Maintenance and Rehabilitation Account revenues in their delivery

Project Title	Description	Location	Estimated Useful Life	Estimated Schedule
Williams Road Undergrounding, Streetscape, & Median Island	Streetscape improvements, utility improvements, road reconstruction, median island, and ADA improvements.	Williams Road from Bardin Road to East Alisal Street.	20-25 years	Preconstruction Design Start January 2024 Preconstruction Completion June 2025

The City may elect to reprioritize its project list at any time. Formal notification to the CTC of any changes to the list is not required. However, the Project Expenditure Report submitted to the CTC each year in December will provide an opportunity for the City to communicate such changes to the CTC as part of the regular reporting process and transparency.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

The staff recommendation supports the Council's Goal of Infrastructure and Environmental Sustainability as it provides funding to the City's capital projects for improvements to existing facilities and infrastructure.

DEPARTMENTAL COORDINATION

The Public Works and Finance Departments work very closely in tracking SB 1 allocations, budgeting the funds appropriately, and adhering to the reporting requirements of the CTC.

FISCAL AND SUSTAINABILITY IMPACT:

The City is expected to receive approximately \$4 Million in Fiscal Year 2023-24, and annually in years thereafter to help fund the City's transportation infrastructure and safety projects.

ATTACHMENTS:

Resolution

RESOLUTION NO. _____ (N.C.S.)

**A RESOLUTION ADOPTING A LIST OF PROJECTS FOR FY 2023-24 FUNDED BY
SB1: THE ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017**

WHEREAS, Senate Bill 1 (SB 1), the Road Repair and Accountability Act of 2017 (Chapter 5, Statutes of 2017) was passed by the Legislature and Signed into law by the Governor in April 2017 to address the significant multi-modal transportation funding shortfalls like those described in the City and statewide; and

WHEREAS, SB 1 includes accountability and transparency provisions that will ensure the residents of our City are aware of the projects proposed for funding in our community and which projects have been completed each fiscal year; and

WHEREAS, the City must adopt by resolution a list of projects proposed to receive fiscal year funding from the Road Maintenance and Rehabilitation Account (RMRA), created by SB 1, which must include a description and the location of each proposed project, a proposed schedule for the project's completion, and the estimated useful life of the improvement; and

WHEREAS, the City will receive an estimated \$4 million in RMRA funding in Fiscal Year 2023-24 from SB 1; and

WHEREAS, this is the seventh year in which the City is receiving SB 1 funding and will enable the City to continue essential road maintenance and rehabilitation projects, safety improvements, repairing and replacing aging bridges, and increasing access and mobility options for the traveling public that would not have otherwise been possible without SB 1; and

WHEREAS, the City has established its community's transportation priorities (i.e., the project list herein) through a combination of Pavement Maintenance System (PMS) findings, direct community feedback to City Council members and staff; and transportation infrastructure assessments by City engineering and maintenance staff; and

WHEREAS, the City uses a Pavement Management System to assist in development of the SB 1 project list, to ensure revenues are being used on the highest priority and cost-effective projects and incorporating equity in each City District that also meet the community's priorities for transportation investment; and

WHEREAS, the funding from SB 1 will help the City maintain and rehabilitate streets and roads and add active transportation infrastructure throughout the City this year and continue to perform preventive maintenance on roads into the near future; and

WHEREAS, the 2020 California Statewide Local Streets and Roads Needs Assessment estimated that the City's streets and roads are in a "at higher risk" condition and this revenue will help us increase the overall quality of our road system and over the next decade our goal is to bring our streets and roads into a "good-excellent" condition; and

WHEREAS, the SB 1 project list and overall investment in our local streets and roads infrastructure with a focus on basic maintenance and safety, investing in complete streets infrastructure, and using cutting edge technology, materials and practices, will have signification positive co-benefits statewide; and

WHEREAS, without revenue from SB 1, the City, would have otherwise had to make difficult decisions about deferring maintenance on a greater portion of its vast transportation infrastructure assets and risk increased wear and tear of exponential proportions; and

WHEREAS, if the Legislature and Governor failed to act, City streets would have continued to deteriorate at a higher rate, having many and varied negative impacts on our community; and

WHEREAS, modernizing the local streets and roads system provides well-paying construction jobs and boosts local economies; and

WHEREAS, the local streets and roads system is also critical for Salinas' farm to market needs, interconnectivity, multimodal needs, and commerce; and

WHEREAS, police, fire, and emergency medical services all need safe reliable roads to react quickly to emergency calls and a few minutes of delay can be a matter of life and death; and

WHEREAS, maintaining and preserving the local streets and roads system in good condition will reduce drive times and traffic congestion, improve bicycle safety, and make the pedestrian experience safer and more appealing, which lead to reducing vehicle emissions and helping the State achieve its air quality and greenhouse gas emissions reductions goals; and

WHEREAS, restoring roads before they fail also reduces construction time which results in less air pollution from heavy equipment and less water pollution from site run-off; and

WHEREAS, the City has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

NOW, THEREFORE, BE IT HEREBY RESOLVED, ORDERED AND FOUND by the Salinas City Council, State of California, as follows:

1. The foregoing recitals are true and correct.
2. The following list of newly proposed project will be funded in-part or solely with Fiscal Year 2023-24 Road Maintenance and Rehabilitation Account revenues:

Project Title	Description	Location	Estimated Useful Life	Estimated Schedule
2023-24 Striping and Signing Improvements	Striping and Signing maintenance at critical locations not scheduled for pavement improvements.	E. Market St. (Front St. to Sherwood Dr.); Maple St. (S. Main St. to Pajaro St.); Schilling Pl. (Hansen St. to Eden St.); E. Alisal St. (Griffin St. to Work St.); Williams Rd. (Old Stage Rd. to E. Boronda Rd.); Riker St. at Clay St.; Terven Ave. (Sanborn Pl. to Airport Blvd.); Harkins Rd. (Hansen St. to City Limits); W. Rossi St. (N. Davis Rd. to N. Main St.); Independence Blvd. (E. Boronda Rd. to Nantucket Blvd.); El Dorado Dr. (Harden Pkwy. To E. Alvin Dr.); Rider Ave. (Mimbrera Way to Del Monte Ave.); N. Main St. (Boronda Rd. to Russel Rd.); Towt St. (E. Alisal St. to E. Market St.);	2 years for crosswalks and 4 years for all other striping on pavement	Start Construction July 2023 Completion June 2024
Boronda Road Congestion Relief Project – Phase 1	Construction of a roundabout at East Boronda Road and McKinnon Street. Includes pedestrian and bicyclist improvements, median islands, pavement rehabilitation, landscaping, storm and sanitary sewer improvements, striping, and signing.	East Boronda Road from Dartmouth Way to 1200 feet East of McKinnon Street	20-25 years	Start Construction April 2024 Completion December 2025

3. The following previously proposed and adopted projects may also utilize Fiscal Year 2023-24 Road Maintenance and Rehabilitation Account revenues in their delivery. With the relisting of these projects in the adopted fiscal year resolution, the City is reaffirming to the public and the State our intent to fund these projects with Road Maintenance and Rehabilitation Account revenues:

Project Title	Description	Location	Estimated Useful Life	Estimated Schedule
Williams Road Undergrounding, Streetscape, & Median Island	Design and utility coordination for Streetscape improvements, utility improvements, road reconstruction, median island, and ADA improvements.	Williams Road from Bardin Road to East Alisal Street.	20-25 years	Preconstruction Design Start January 2024 Preconstruction Completion June 2025

Senate Bill 567 (Durazo): Homelessness Prevention Act

Consider approving a Resolution in support of Senate Bill 567 (Durazo).

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: June 13, 2023

DEPARTMENT: OFFICE OF THE CITY ATTORNEY

FROM: CHRISTOPHER A. CALLIHAN, CITY ATTORNEY

TITLE: SENATE BILL 567; LETTER OF SUPPORT FROM SALINAS CITY COUNCIL

RECOMMENDATION MOTION:

A motion approving a Resolution authorizing submittal of a letter on behalf of the Salinas City Council in support of Senate Bill 567.

EXECUTIVE SUMMARY:

Council members González and Rocha have requested the City Council consider submitting a letter in support of SB 567 (Durazo). SB 567, now through the Senate and ordered to the Assembly, would make a series of revisions to existing statewide protections against eviction without just cause and provides enforcement mechanisms for the violation of statewide restrictions on residential rent increases and statewide protections against specified no fault evictions. A copy of SB 567 is attached to this Report for reference.

DISCUSSION:

The Tenant Protection Act of 2019 (Act) established limitations on the amount that residential landlords can raise the rent each year and times to stop landlords from evicting tenants unless they have a specified legal justification. A main goal of the Act was to shield tenants against sudden, large rent increases and to provide responsible tenants with assurance that they would not ordinarily be uprooted from their homes. According to the legislative analysis, SB 567, if approved by the legislature and signed by the Governor, would ensure that the no fault grounds for eviction established in the Act cannot be easily ignored or abused. SB 567 is intended to close loopholes in the provisions for evictions based on owner move-ins, demolishing or substantially remodeling a unit, or removal of the unit from the rental market. This bill is also intended to provide mechanisms for redress of violations of these eviction provisions and violations of the Act's rent increase limitation provisions.

In specific, SB 567 would accomplish the following:

1. Requires, with respect to the no-fault just cause eviction based on an intent to occupy the residential real property, among other things, that the owner or the owner's spouse, domestic partner, children, grandchildren, parents, or grandparents occupy the residential real property for a minimum of 12 continuous months as the person's primary residence, as provided. If the intended occupant fails to occupy the rental unit, as specified, then the owner must offer the unit to the tenant who vacated it at the same rent and lease terms, as specified. This right to return to the unit is not the exclusive remedy available to the tenant in this instance. The bill also allows the tenant to pursue a private right of action pursuant to the new enforcement mechanisms.
2. Requires, with respect to the no-fault just cause related to withdrawal of the residential real property from the rental market, among other things, that all of the rental units at the rental property be withdrawn from the rental market, as prescribed. Requires an owner, before withdrawing all of the rental units at a residential real property, to record a notice with the county recorder that describes the real property, the dates applicable to the constraints, and the name of the owner of record of the real property. Requires the notice to be recorded in the grantor-grantee index.
3. Requires an owner who displaces a tenant in order to substantially remodel a unit to, among other things, provide the tenant with written notice that includes specified information, including a description of the repairs to be completed, the expected duration of the repairs, and a copy of permits necessary to undertake the repairs. Provides that a tenant is not required to vacate the unit on any days where a tenant could continue living in the unit without violating health, safety, and habitability codes and laws. Provides that a tenant has a right to move back into the rental unit, as specified, if repairs are not completed. This move-in right is not the exclusive remedy available to a tenant in this instance. The bill also allows the tenant to pursue a private right of action pursuant to the new enforcement mechanisms.
4. Prescribes new enforcement mechanisms with respect to the provisions described in the bill, including by making an owner who attempts to recover possession of a rental unit in material violation of the provisions of the bill liable to the tenant in a civil action for damages of up to three times the actual damages, including punitive damages. Also authorizes the state and the local government, within whose jurisdiction the rental unit is located, to bring actions for injunctive relief against the landlord, as specified.
5. Provides that a landlord who demands, accepts, receives, or retains any payment of rent in excess of the maximum rent allowed by the Act's rent increase provisions shall be liable in a civil action to the tenant from whom those payments are demanded, accepted, received, or retained for all of the following: reasonable attorney's fees and costs; injunctive relief; damages in the amount by which any payment demanded, accepted, received, or retained exceeds the maximum allowable rent; and upon a showing that the landlord has acted willfully or with oppression, fraud, or malice, a civil penalty of treble the amount by which any payment demanded, accepted, received, or retained exceeds the maximum allowable rent.

6. Provides that a local government within whose jurisdiction the residential real property is located shall have the authority to enforce the Act's rent increase provisions and bring actions for injunctive relief on behalf of the city or county or on behalf of tenants seeking compliance by landlords with the rent increase provisions.

This bill originally sought to decrease the state's maximum annual rent cap increase from ten percent or five percent plus inflation (whichever is lower) to five percent or the simple inflation increase. This provision of the bill was removed during the Senate's review process.

CEQA CONSIDERATION:

The City Council's approval of a Resolution in support of SB 567 is not a project subject to environmental review under the California Environmental Quality Act (CEQA Guidelines section 15061(b)(3)).

STRATEGIC PLAN INITIATIVE:

The City Council's support of SB 567 is consistent with and supports the City Council's Goals of Housing/Affordable Housing and Effective and Culturally Responsive Government (City of Salinas Strategic Plan 2022-2025).

FISCAL AND SUSTAINABILITY IMPACT:

The City Council's approval of a Resolution in support of SB 567 would not have an impact on the City's General Fund.

DEPARTMENTAL COORDINATION

The City Attorney's Office coordinated with the City Clerk and Council members González and Rocha on this Report.

SENATE BILL

No. 567

Introduced by Senator Durazo
(Coauthors: Senators Menjivar and Smallwood-Cuevas)
(Coauthors: Assembly Members Haney, Lee, and McKinnor)

February 15, 2023

An act to amend Sections 1946.2 and 1947.12 of the Civil Code, relating to tenancy.

LEGISLATIVE COUNSEL'S DIGEST

SB 567, as amended, Durazo. Termination of tenancy: no-fault just causes: gross rental rate increases.

Existing law, after a tenant has continuously and lawfully occupied a residential real property for 12 months, prohibits the owner of the residential real property from terminating the tenancy without just cause and requires that just cause to be stated in the written notice to terminate tenancy. Existing law distinguishes between at-fault just cause and no-fault just cause and defines no-fault just cause to mean intent to occupy the residential real property by the owner or the owner's spouse, domestic partner, children, grandchildren, parents, or grandparents, withdrawal of the residential real property from the rental market, the owner complying with specified government orders that necessitate vacating the real property, and intent to demolish or to substantially remodel the residential real property.

This bill would, ~~among other things, delete the condition for the tenancy termination provision described above that a tenant has continuously and lawfully occupied a residential real property for 12 months.~~ *with respect to the no-fault just cause related to an eviction based on an intent to occupy the residential real property, require, among other things, that the owner or the owner's spouse, domestic partner, children, grandchildren, parents, or grandparents occupy the residential real property for a minimum of 12 continuous months as the person's primary residence, as provided.* The bill would ~~also limit the applicability of each of those at-fault just causes, including by, also,~~ with respect to the no-fault just cause related to withdrawal of the residential real property from the rental market, ~~requiring~~ *require* that all of the rental units at the rental property be withdrawn from the rental market for at least 10 years, ~~market,~~ as prescribed. The bill ~~would, among other things,~~ *would* require an owner, before withdrawing all of the rental units at a residential real property as described above, to record a notice with the county recorder that describes the real property, the dates applicable to the constraints, and the name of the owner of record of the real property. The bill would require that notice to be recorded in the grantor-grantee index. By imposing a higher level of service on counties, the bill would impose a state-mandated local program. *The bill would require an owner who displaces a tenant to substantially remodel a unit to provide the tenant with written notice providing the tenant with specified information, including a description of the repairs to be completed, the expected duration of the repairs, and a copy of permits necessary to undertake the repairs.*

This bill would also prescribe new enforcement mechanisms with respect to the provisions described above, including by making an owner who attempts to recover possession of a rental unit in *material* violation of those provisions liable to the tenant in a civil action for damages ~~of not less than of up to 3 times the actual damages.~~ *damages, in addition to punitive damages.* The bill would authorize the state and the local government, within whose jurisdiction the rental unit is located, to bring actions for injunctive relief against the landlord, as specified.

Existing law, until January 1, 2030, prohibits an owner of residential real property from, over the course of any 12-month period, increasing the gross rental rate for a dwelling or a unit more than 5% plus the percentage change in the cost of living, or 10%, whichever is lower, of the lowest gross rental rate charged for that dwelling or unit at any time

during the 12 months before the effective date of the increase, subject to specified conditions.

This bill would make a landlord who demands, accepts, receives, or retains any payment of rent in excess of the maximum rent increase ~~allowed on or after March 1, 2023,~~ *allowed*, as prescribed, liable in a civil action to the tenant from whom those payments are demanded, accepted, received, or retained for certain relief, including, upon a showing that the landlord has acted willfully or with oppression, fraud, or malice, a civil penalty of treble the amount by which any payment demanded, accepted, received, or retained exceeds the maximum allowable rent. This bill would authorize a local government, within whose jurisdiction the residential property is located, to enforce the bill's provisions and bring an action for injunctive relief, as specified.

This bill would also make a technical, nonsubstantive change to those provisions.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: yes.

The people of the State of California do enact as follows:

1 SECTION 1. Section 1946.2 of the Civil Code is amended to
2 read:
3 1946.2. (a) Notwithstanding any other law, *after a tenant has*
4 *continuously and lawfully occupied a residential real property for*
5 *12 months*, the owner of residential real property shall not terminate
6 a tenancy without just cause, which shall be stated in the written
7 notice to terminate tenancy. *If any additional adult tenants are*
8 *added to the lease before an existing tenant has continuously and*
9 *lawfully occupied the residential real property for 24 months, then*
10 *this subdivision shall only apply if either of the following are*
11 *satisfied:*
12 (1) *All of the tenants have continuously and lawfully occupied*
13 *the residential real property for 12 months or more.*
14 (2) *One or more tenants have continuously and lawfully*
15 *occupied the residential real property for 24 months or more.*

(b) For purposes of this section, “just cause” means either of the following:

(1) At-fault just cause, which means any of the following:

(A) Default in the payment of rent.

(B) A breach of a material term of the lease, as described in paragraph (3) of Section 1161 of the Code of Civil Procedure, including, but not limited to, violation of a provision of the lease after being issued a written notice to correct the violation.

(C) Maintaining, committing, or permitting the maintenance or commission of a nuisance as described in paragraph (4) of Section 1161 of the Code of Civil Procedure.

(D) Committing waste as described in paragraph (4) of Section 1161 of the Code of Civil Procedure.

(E) The tenant had a written lease that terminated on or after January 1, 2020, or January 1, 2022, if the lease is for a tenancy in a mobilehome, and after a written request or demand from the owner, the tenant has refused to execute a written extension or renewal of the lease for an additional term of similar duration with similar provisions, provided that those terms do not violate this section or any other provision of law.

(F) Criminal activity by the tenant on the residential real property, including any common areas, or any criminal activity or criminal threat, as defined in subdivision (a) of Section 422 of the Penal Code, on or off the residential real property, that is directed at any owner or agent of the owner of the residential real property.

(G) Assigning or subletting the premises in violation of the tenant’s lease, as described in paragraph (4) of Section 1161 of the Code of Civil Procedure.

(H) The tenant’s refusal to allow the owner to enter the residential real property as authorized by Sections 1101.5 and 1954 of this code, and Sections 13113.7 and 17926.1 of the Health and Safety Code.

(I) Using the premises for an unlawful purpose as described in paragraph (4) of Section 1161 of the Code of Civil Procedure.

(J) The employee, agent, or licensee’s failure to vacate after their termination as an employee, agent, or a licensee as described in paragraph (1) of Section 1161 of the Code of Civil Procedure.

(K) When the tenant fails to deliver possession of the residential real property after providing the owner written notice as provided in Section 1946 of the tenant’s intention to terminate the hiring of

1 the real property, or makes a written offer to surrender that is
2 accepted in writing by the landlord, but fails to deliver possession
3 at the time specified in that written notice as described in paragraph
4 (5) of Section 1161 of the Code of Civil Procedure.

5 (2) No-fault just cause, which means any of the following:

6 (A) (i) Intent to occupy the residential real property by the
7 owner or the owner's spouse, domestic partner, children,
8 grandchildren, parents, or grandparents for a minimum of ~~36~~ 12
9 continuous months as that person's primary residence.

10 (ii) For leases entered into on or after July 1, 2020, or July 1,
11 2022, if the lease is for a tenancy in a mobilehome, clause (i) shall
12 apply only if the tenant agrees, in writing, to the termination, or if
13 a provision of the lease allows the owner to terminate the lease if
14 the owner, or the owner's spouse, domestic partner, children,
15 grandchildren, parents, or grandparents, unilaterally decides to
16 occupy the residential real property. Addition of a provision
17 allowing the owner to terminate the lease as described in this clause
18 to a new or renewed rental agreement or fixed-term lease
19 constitutes a similar provision for the purposes of subparagraph
20 (E) of paragraph (1).

21 (iii) ~~(I) Subject to subclause (II), this~~ This subparagraph does
22 not apply if the intended occupant occupies a rental unit on the
23 property or if a vacancy of a similar unit already exists at the
24 property.

25 ~~(II) This clause does not apply if the intended occupant is~~
26 ~~disabled, and a different unit is necessary to accommodate the~~
27 ~~intended occupant's disability.~~

28 (iv) The written notice terminating a tenancy for a just cause
29 pursuant to this subparagraph shall contain the ~~name, address of~~
30 ~~primary residence, name or names~~ and relationship to the owner
31 of the intended occupant.

32 (v) Clause (i) applies only if the intended occupant moves into
33 the rental unit within 90 days after the tenant vacates and occupies
34 the rental unit as a primary residence for at least ~~36~~ 12 consecutive
35 months.

36 (vi) If the intended occupant fails to occupy the rental unit within
37 90 days after the tenant vacates or fails to occupy the rental unit
38 as their primary residence for at least ~~36~~ 12 consecutive months,
39 the owner shall offer the unit to the tenant who vacated it at the
40 same rent and lease terms in effect at the time the tenant vacated

1 and shall reimburse the tenant for reasonable moving expenses
2 incurred in excess of any relocation assistance that was paid to the
3 tenant in connection with the written notice.

4 (vii) For a new tenancy commenced during the time periods
5 described in clause (v), the accommodations shall be offered and
6 rented or leased at the lawful rent in effect at the time any notice
7 of termination of tenancy is served.

8 ~~(viii) (I) Subject to subclause (II), clause (i) does not apply if~~
9 ~~the tenant is at least 60 years of age, disabled, or certified as being~~
10 ~~terminally ill by the tenant's treating physician.~~

11 ~~(II) This clause does not apply if the intended occupant is~~
12 ~~disabled and no other units are available at the property.~~

13 ~~(ix)~~

14 ~~(viii) As used in this subparagraph:~~

15 (I) "Intended occupant" means the owner of the residential real
16 property or the owner's spouse, domestic partner, child, grandchild,
17 parent, or grandparent, as described in clause (i).

18 (II) "Owner" means an owner who is a natural person that has
19 at least a 51-percent recorded ownership interest in the property.

20 (B) Withdrawal of all of the rental units at the residential real
21 property from the rental market for at least 10 years: *market*.

22 (i) ~~If a rental unit withdrawn from the rental market pursuant~~
23 ~~to this subparagraph is offered again for rent or lease for residential~~
24 ~~purposes within five years of the date the rental unit was withdrawn~~
25 ~~from rent or lease, all of the following shall apply:~~

26 ~~(I) The owner of the rental unit shall be liable to any tenant or~~
27 ~~lessee who was displaced from the property by that action for any~~
28 ~~damages.~~

29 ~~(II) An owner who offers the rental unit again for rent or lease~~
30 ~~shall first offer the unit for rent or lease to the tenant or lessee~~
31 ~~displaced from that unit pursuant to this subparagraph on the same~~
32 ~~terms as the tenant's previous lease and at the same rental rate plus~~
33 ~~any allowable increases available under Section 1947.12 if the~~
34 ~~tenant has advised the owner in writing, within 30 days of the~~
35 ~~displacement, of the tenant's desire to consider an offer to renew~~
36 ~~the tenancy and has furnished the owner with current contact~~
37 ~~information to which that offer is to be directed. The displaced~~
38 ~~tenant shall have 30 days to accept the offer and communicate~~
39 ~~acceptance to the landlord.~~

1 ~~(III) For any tenancy commenced during the time periods~~
2 ~~described in this clause, the accommodations shall be offered and~~
3 ~~rented or leased at the lawful rent in effect at the time the notice~~
4 ~~of termination of tenancy was served plus annual adjustments~~
5 ~~available under Section 1947.12.~~

6 ~~(ii) Notwithstanding paragraph (4) of subdivision (d) of Section~~
7 ~~1947.12, if a rental unit withdrawn from the rental market for the~~
8 ~~just cause authorized pursuant to this subparagraph is demolished,~~
9 ~~and a new rental unit is constructed on the same property and~~
10 ~~offered for rent or lease within five years of the date the rental unit~~
11 ~~was withdrawn from rent or lease, the newly constructed rental~~
12 ~~unit shall be subject to Section 1947.12.~~

13 ~~(iii)~~

14 ~~(i) This subparagraph shall apply to any successor in interest of~~
15 ~~an owner who has withdrawn rental units from rent or lease~~
16 ~~pursuant to this subparagraph.~~

17 ~~(iv)~~

18 ~~(ii) (I) Before withdrawing all of the rental units at a residential~~
19 ~~real property pursuant to this subparagraph, an owner shall record~~
20 ~~a notice with the county recorder that describes the real property,~~
21 ~~the dates applicable to the constraints, and the name of the owner~~
22 ~~of record of the real property.~~

23 ~~(II) The notice required by this clause shall be indexed in the~~
24 ~~grantor-grantee index.~~

25 ~~(III) A person who acquires, as a bona fide purchaser for value,~~
26 ~~title to real property subsequent to the date upon which all rental~~
27 ~~units thereon have been withdrawn from rent or lease shall not be~~
28 ~~a successor in interest for the purposes of this chapter if the notice~~
29 ~~prescribed by this clause has not been recorded with the county~~
30 ~~recorder at least one day before the transfer of title.~~

31 ~~(v) (I) Except as provided in subclause (II), the~~

32 ~~(iii) The date on which the rental unit is withdrawn from rent~~
33 ~~or lease pursuant to this subparagraph, as well as the date of~~
34 ~~termination of tenancy, shall be deemed to be 120 days from the~~
35 ~~delivery of the written notice to terminate the tenancy.~~

36 ~~(II) If the tenant or lessee is at least 62 years of age or disabled,~~
37 ~~as defined in Section 12955.3 of the Government Code, and has~~
38 ~~lived in the rental unit or unit within the rental unit for at least one~~
39 ~~year before the date of delivery of the notice required by clause~~
40 ~~(iv), the date of withdrawal of the rental unit of that tenant or lessee~~

1 shall be extended to one year after the date of delivery of that
2 notice to the tenant if the tenant gives written notice of the tenant's
3 entitlement to an extension to the owner within 60 days of the date
4 of delivery of the notice of intent to withdraw.

5 (C) (i) The owner complying with any of the following:

6 (I) An order issued by a government agency or court relating
7 to habitability that necessitates permanently vacating the residential
8 real property.

9 (II) An order issued by a government agency or court to
10 permanently vacate the residential real property.

11 (III) A local ordinance that necessitates permanently vacating
12 the residential real property.

13 (ii) If it is determined by any government agency or court that
14 the tenant is at fault for the condition or conditions triggering the
15 order or need to vacate under clause (i), the tenant shall not be
16 entitled to relocation assistance as outlined in paragraph (3) of
17 subdivision (d).

18 (D) (i) ~~Temporary relocation—Intent~~ to demolish or to
19 substantially remodel the residential real property.

20 (ii) For purposes of this subparagraph, “substantially remodel”
21 means the replacement or substantial modification of any structural,
22 electrical, plumbing, or mechanical system that requires a permit
23 from a governmental agency, or the abatement of hazardous
24 materials, including lead-based paint, mold, or asbestos, in
25 accordance with applicable federal, state, and local laws, that
26 cannot be reasonably accomplished in a safe manner ~~with that~~
27 ~~allows the tenant to remain living in place, the place and~~ that
28 requires the tenant to vacate the residential real property for at
29 least 60 days, ~~that is required to bring the property into compliance~~
30 ~~with applicable codes and laws affecting the health and safety of~~
31 ~~the tenants, and for which all necessary permits have been obtained~~
32 ~~by the owner as of the date that the termination notice is served.~~
33 *30 consecutive days. A tenant is not required to vacate the*
34 *residential real property on any days where a tenant could continue*
35 *living in the residential real property without violating health,*
36 *safety, and habitability codes and laws. Cosmetic improvements*
37 *alone, including painting, decorating, and minor repairs, or other*
38 *work that can be performed safely without having the residential*
39 *real property vacated, do not qualify as substantial rehabilitation.*

1 (iii) A written notice terminating a tenancy for a just cause
2 pursuant to this subparagraph shall include all of the following
3 information:

4 (I) A statement informing tenants of ~~their right to temporary~~
5 ~~relocation expenses~~; *the intent to demolish or substantially remodel*
6 *the rental unit.*

7 (II) The following statement:

8
9 “When

10 “If the needed repairs are *not* completed on your unit, the owner
11 must offer you the opportunity to return to your unit with a rental
12 agreement containing the same terms as your original rental
13 agreement at the same rental rate.”

14
15 (III) A description of the repairs to be ~~completed and~~ *completed*,
16 the approximate expected duration of the ~~repairs~~; *repairs, and a*
17 *copy of permits necessary to undertake the repairs.*

18 (IV) A notification that if the tenant is interested in reoccupying
19 the rental unit following repairs, the tenant shall *inform the owner*
20 *of the tenant’s interest in reoccupying the rental unit following*
21 *repairs and* provide to the owner the tenant’s temporary address,
22 telephone number, and email address.

23 ~~(V) A notification of the tenant’s right to elect permanent~~
24 ~~relocation pursuant to clause (vi), the exact amount of the~~
25 ~~permanent relocation payment to which the tenant would be~~
26 ~~entitled, and instructions for claiming permanent relocation.~~

27 ~~(iv) Notwithstanding subdivision (d), an owner issuing a written~~
28 ~~notice terminating a tenancy for a just cause pursuant to this~~
29 ~~subparagraph shall provide any tenant subject to the termination~~
30 ~~with comparable alternate housing in the same city as the rental~~
31 ~~unit or pay all actual expenses associated with temporary relocation~~
32 ~~for the duration of the relocation.~~

33 ~~(v) (I) If the owner recovers possession pursuant to this~~
34 ~~subparagraph, whether or not pursuant to an unlawful detainer~~
35 ~~judgment, the tenant shall be given the right of first refusal to~~
36 ~~reoccupy the unit at the same rental terms.~~

37 ~~(II) An owner shall notify a tenant in writing that the unit is~~
38 ~~ready to reoccupy.~~

39 ~~(vi) (I) A tenant who receives a written notice terminating a~~
40 ~~tenancy for a just cause pursuant to this subparagraph may elect~~

1 ~~for permanent relocation instead of reoccupying the unit by~~
2 ~~notifying the owner of the tenant's intent to permanently relocate~~
3 ~~in writing within 30 days of service of the termination notice.~~

4 (H) ~~If the tenant elects for permanent relocation pursuant to this~~
5 ~~clause, notwithstanding any other law, the owner shall pay to the~~
6 ~~tenant a permanent relocation payment of six times the current fair~~
7 ~~market rent, calculated pursuant to Section 888.113 of Title 24 of~~
8 ~~the Code of Federal Regulations, for the jurisdiction in which the~~
9 ~~rental unit is located, corresponding to the size of the rental unit.~~

10 (c) Before an owner of residential real property issues a notice
11 to terminate a tenancy for just cause that is a curable lease
12 violation, the owner shall first give notice of the violation to the
13 tenant with an opportunity to cure the violation pursuant to
14 paragraph (3) of Section 1161 of the Code of Civil Procedure. If
15 the violation is not cured within the time period set forth in the
16 notice, a three-day notice to quit without an opportunity to cure
17 may thereafter be served to terminate the tenancy.

18 (d) (1) For a tenancy for which just cause is required to
19 terminate the tenancy under subdivision (a), if an owner of
20 residential real property issues a termination notice based on a
21 no-fault just cause described in paragraph (2) of subdivision (b),
22 the owner shall, regardless of the tenant's income, at the owner's
23 option, do one of the following:

24 (A) Assist the tenant to relocate by providing a direct payment
25 to the tenant as described in paragraph (3).

26 (B) Waive in writing the payment of rent for the final month of
27 the tenancy, prior to the rent becoming due.

28 (2) If an owner issues a notice to terminate a tenancy for no-fault
29 just cause, the owner shall notify the tenant in the written
30 termination notice of the tenant's right to relocation assistance or
31 rent waiver pursuant to this section. If the owner elects to waive
32 the rent for the final month of the tenancy as provided in
33 subparagraph (B) of paragraph (1), the notice shall state the amount
34 of rent waived and that no rent is due for the final month of the
35 tenancy.

36 (3) (A) The amount of relocation assistance or rent waiver shall
37 be equal to one month of the tenant's rent that was in effect when
38 the owner issued the notice to terminate the tenancy. Any relocation
39 assistance shall be provided within 15 calendar days of service of
40 the notice.

1 (B) If a tenant fails to vacate after the expiration of the notice
2 to terminate the tenancy, the actual amount of any relocation
3 assistance or rent waiver provided pursuant to this subdivision
4 shall be recoverable as damages in an action to recover possession.

5 (C) The relocation assistance or rent waiver required by this
6 subdivision shall be credited against any other relocation assistance
7 required by any other law.

8 (4) An owner's failure to strictly comply with this subdivision
9 shall render the notice of termination void.

10 (e) This section shall not apply to the following types of
11 residential real properties or residential circumstances:

12 (1) Transient and tourist hotel occupancy as defined in
13 subdivision (b) of Section 1940.

14 (2) Housing accommodations in a nonprofit hospital, religious
15 facility, extended care facility, licensed residential care facility for
16 the elderly, as defined in Section 1569.2 of the Health and Safety
17 Code, or an adult residential facility, as defined in Chapter 6 of
18 Division 6 of Title 22 of the Manual of Policies and Procedures
19 published by the State Department of Social Services.

20 (3) Dormitories owned and operated by an institution of higher
21 education or a kindergarten and grades 1 to 12, inclusive, school.

22 (4) Housing accommodations in which the tenant shares
23 bathroom or kitchen facilities with the owner who maintains their
24 principal residence at the residential real property.

25 (5) Single-family owner-occupied residences, including both
26 of the following:

27 (A) A residence in which the owner-occupant rents or leases
28 no more than two units or bedrooms, including, but not limited to,
29 an accessory dwelling unit or a junior accessory dwelling unit.

30 (B) A mobilehome.

31 (6) A property containing two separate dwelling units within a
32 single structure in which the owner occupied one of the units as
33 the owner's principal place of residence at the beginning of the
34 tenancy, so long as the owner continues in occupancy, and neither
35 unit is an accessory dwelling unit or a junior accessory dwelling
36 unit.

37 (7) Housing that has been issued a certificate of occupancy
38 within the previous 15 years, unless the housing is a mobilehome.

39 (8) Housing restricted by deed, regulatory restriction contained
40 in an agreement with a government agency, or other recorded

1 document as affordable housing for persons and families of very
2 low, low, or moderate income, as defined in Section 50093 of the
3 Health and Safety Code, or subject to an agreement that provides
4 housing subsidies for affordable housing for persons and families
5 of very low, low, or moderate income, as defined in Section 50093
6 of the Health and Safety Code or comparable federal statutes.

7 (9) Residential real property, including a mobilehome, that is
8 alienable separate from the title to any other dwelling unit, provided
9 that both of the following apply:

10 (A) The owner is not any of the following:

11 (i) A real estate investment trust, as defined in Section 856 of
12 the Internal Revenue Code.

13 (ii) A corporation.

14 (iii) A limited liability company in which at least one member
15 is a corporation.

16 (iv) Management of a mobilehome park, as defined in Section
17 798.2.

18 (B) (i) The tenants have been provided written notice that the
19 residential property is exempt from this section using the following
20 statement:

21 “This property is not subject to the rent limits imposed by Section
22 1947.12 of the Civil Code and is not subject to the just cause
23 requirements of Section 1946.2 of the Civil Code. This property
24 meets the requirements of Sections 1947.12 (d)(5) and 1946.2
25 (e)(8) of the Civil Code and the owner is not any of the following:
26 (1) a real estate investment trust, as defined by Section 856 of the
27 Internal Revenue Code; (2) a corporation; or (3) a limited liability
28 company in which at least one member is a corporation.”

29 (ii) (I) Except as provided in subclause (II), for a tenancy
30 existing before July 1, 2020, the notice required under clause (i)
31 may, but is not required to, be provided in the rental agreement.

32 (II) For a tenancy in a mobilehome existing before July 1, 2022,
33 the notice required under clause (i) may, but is not required to, be
34 provided in the rental agreement.

35 (iii) (I) Except as provided in subclause (II), for any tenancy
36 commenced or renewed on or after July 1, 2020, the notice required
37 under clause (i) must be provided in the rental agreement.

38 (II) For any tenancy in a mobilehome commenced or renewed
39 on or after July 1, 2022, the notice required under clause (i) shall
40 be provided in the rental agreement.

1 (iv) Addition of a provision containing the notice required under
2 clause (i) to any new or renewed rental agreement or fixed-term
3 lease constitutes a similar provision for the purposes of
4 subparagraph (E) of paragraph (1) of subdivision (b).

5 (f) An owner of residential real property subject to this section
6 shall provide notice to the tenant as follows:

7 (1) (A) Except as provided in subparagraph (B), for any tenancy
8 commenced or renewed on or after July 1, 2020, as an addendum
9 to the lease or rental agreement, or as a written notice signed by
10 the tenant, with a copy provided to the tenant.

11 (B) For a tenancy in a mobilehome commenced or renewed on
12 or after July 1, 2022, as an addendum to the lease or rental
13 agreement, or as a written notice signed by the tenant, with a copy
14 provided to the tenant.

15 (2) (A) Except as provided in subparagraph (B), for a tenancy
16 existing prior to July 1, 2020, by written notice to the tenant no
17 later than August 1, 2020, or as an addendum to the lease or rental
18 agreement.

19 (B) For a tenancy in a mobilehome existing prior to July 1,
20 2022, by written notice to the tenant no later than August 1, 2022,
21 or as an addendum to the lease or rental agreement.

22 (3) The notification or lease provision shall be in no less than
23 12-point type, and shall include the following:

24
25 “California law limits the amount your rent can be increased. See
26 Section 1947.12 of the Civil Code for more information. California
27 law also provides that after all of the tenants have continuously
28 and lawfully occupied the property for 12 months or more or at
29 least one of the tenants has continuously and lawfully occupied
30 the property for 24 months or more, a landlord must provide a
31 statement of cause in any notice to terminate a tenancy. See Section
32 1946.2 of the Civil Code for more information.”

33
34 The notification or lease provision shall be subject to Section 1632.

35 ~~(g) An owner terminating a tenancy pursuant to this section~~
36 ~~shall allege and prove that the recovery of possession is proceeding~~
37 ~~in good faith and honest intent, and there is not an ulterior motive~~
38 ~~for the reason stated in the written termination notice.~~

39 ~~(h)~~

(g) An owner's failure to comply with any provision of this section shall render the written termination notice void.

(i)

(h) (1) An attempt to recover possession of a rental unit in material violation of this section shall render the owner liable to the tenant in a civil action for damages of ~~not less than~~ *up to* three times the actual damages. *An award may also be entered for punitive damages for the benefit of the tenant against the owner.*

(2) The state and the local government in which the rental unit is located shall have the authority to ~~do both of the following:~~ *bring actions for injunctive relief on behalf of the state, city, or county, or on behalf of tenants seeking compliance by landlords with this section. Nothing in this paragraph is intended to limit the remedies that a state or local government has under existing law.*

~~(A) Enforce the provisions of this section.~~

~~(B) Bring actions for injunctive relief on behalf of the state, city, or county, or on behalf of tenants seeking compliance by landlords with this section.~~

~~(C) With respect to a local government, enact additional consequences for no-fault evictions which are carried out in violation of this section.~~

(3) A prevailing party in an action brought pursuant to this subdivision that is not an unlawful detainer action shall recover costs, any damages allowable by law, and reasonable attorney's fees.

(j)

(i) (1) This section does not apply to the following residential real property:

(A) Residential real property subject to a local ordinance requiring just cause for termination of a residential tenancy adopted on or before September 1, 2019, in which case the local ordinance shall apply.

(B) Residential real property subject to a local ordinance requiring just cause for termination of a residential tenancy adopted or amended after September 1, 2019, that is more protective than this section, in which case the local ordinance shall apply. For purposes of this subparagraph, an ordinance is "more protective" if it meets all of the following criteria:

1 (i) The just cause for termination of a residential tenancy under
2 the local ordinance is consistent with this section.

3 (ii) The ordinance further limits the reasons for termination of
4 a residential tenancy, provides for higher relocation assistance
5 amounts, or provides additional tenant protections that are not
6 prohibited by any other provision of law.

7 (iii) The local government has made a binding finding within
8 their local ordinance that the ordinance is more protective than the
9 provisions of this section.

10 (2) A residential real property shall not be subject to both a local
11 ordinance requiring just cause for termination of a residential
12 tenancy and this section.

13 (3) A local ordinance adopted after September 1, 2019, that is
14 less protective than this section shall not be enforced unless this
15 section is repealed.

16 ~~(k)~~

17 (j) Any waiver of the rights under this section shall be void as
18 contrary to public policy.

19 ~~(h)~~

20 (k) For the purposes of this section, the following definitions
21 shall apply:

22 (1) “Owner” includes any person, acting as principal or through
23 an agent, having the right to offer residential real property for rent,
24 and includes a predecessor in interest to the owner.

25 (2) “Residential real property” means any dwelling or unit that
26 is intended for human habitation, including any dwelling or unit
27 in a mobilehome park.

28 (3) “Tenancy” means the lawful occupation of residential real
29 property and includes a lease or sublease.

30 ~~(m)~~

31 (l) This section shall not apply to a homeowner of a mobilehome,
32 as defined in Section 798.9.

33 ~~(n)~~

34 (m) This section shall remain in effect only until January 1,
35 2030, and as of that date is repealed.

36 SEC. 2. Section 1947.12 of the Civil Code is amended to read:

37 1947.12. (a) (1) Subject to subdivision (b), an owner of
38 residential real property shall not, over the course of any 12-month
39 period, increase the gross rental rate for a dwelling or a unit more
40 than 5 percent plus the percentage change in the cost of living, or

1 10 percent, whichever is lower, of the lowest gross rental rate
2 charged for that dwelling or unit at any time during the 12 months
3 prior to the effective date of the increase. In determining the lowest
4 gross rental amount pursuant to this section, any rent discounts,
5 incentives, concessions, or credits offered by the owner of such
6 unit of residential real property and accepted by the tenant shall
7 be excluded. The gross per-month rental rate and any owner-offered
8 discounts, incentives, concessions, or credits shall be separately
9 listed and identified in the lease or rental agreement or any
10 amendments to an existing lease or rental agreement.

11 (2) If the same tenant remains in occupancy of a unit of
12 residential real property over any 12-month period, the gross rental
13 rate for the unit of residential real property shall not be increased
14 in more than two increments over that 12-month period, subject
15 to the other restrictions of this subdivision governing gross rental
16 rate increase.

17 (b) For a new tenancy in which no tenant from the prior tenancy
18 remains in lawful possession of the residential real property, the
19 owner may establish the initial rental rate not subject to subdivision
20 (a). Subdivision (a) is only applicable to subsequent increases after
21 that initial rental rate has been established.

22 (c) A tenant of residential real property subject to this section
23 shall not enter into a sublease that results in a total rent for the
24 premises that exceeds the allowable rental rate authorized by
25 subdivision (a). Nothing in this subdivision authorizes a tenant to
26 sublet or assign the tenant's interest where otherwise prohibited.

27 (d) This section shall not apply to the following residential real
28 properties:

29 (1) Housing restricted by deed, regulatory restriction contained
30 in an agreement with a government agency, or other recorded
31 document as affordable housing for persons and families of very
32 low, low, or moderate income, as defined in Section 50093 of the
33 Health and Safety Code, or subject to an agreement that provides
34 housing subsidies for affordable housing for persons and families
35 of very low, low, or moderate income, as defined in Section 50093
36 of the Health and Safety Code or comparable federal statutes.

37 (2) Dormitories owned and operated by an institution of higher
38 education or a kindergarten and grades 1 to 12, inclusive, school.

39 (3) Housing subject to rent or price control through a public
40 entity's valid exercise of its police power consistent with Chapter

2.7 (commencing with Section 1954.50) that restricts annual increases in the rental rate to an amount less than that provided in subdivision (a).

(4) Housing that has been issued a certificate of occupancy within the previous 15 years, unless the housing is a mobilehome.

(5) A property containing two separate dwelling units within a single structure in which the owner occupied one of the units as the owner's principal place of residence at the beginning of the tenancy, so long as the owner continues in occupancy, and neither unit is an accessory dwelling unit or a junior accessory dwelling unit.

(6) Residential real property that is alienable separate from the title to any other dwelling unit, including a mobilehome, provided that both of the following apply:

(A) The owner is not any of the following:

(i) A real estate investment trust, as defined in Section 856 of the Internal Revenue Code.

(ii) A corporation.

(iii) A limited liability company in which at least one member is a corporation.

(iv) Management of a mobilehome park, as defined in Section 798.2.

(B) (i) The tenants have been provided written notice that the residential real property is exempt from this section using the following statement:

"This property is not subject to the rent limits imposed by Section 1947.12 of the Civil Code and is not subject to the just cause requirements of Section 1946.2 of the Civil Code. This property meets the requirements of Sections 1947.12 (d)(5) and 1946.2 (e)(8) of the Civil Code and the owner is not any of the following: (1) a real estate investment trust, as defined by Section 856 of the Internal Revenue Code; (2) a corporation; or (3) a limited liability company in which at least one member is a corporation."

(ii) For a tenancy existing before July 1, 2020, or July 1, 2022, if the lease is for a tenancy in a mobilehome, the notice required under clause (i) may, but is not required to, be provided in the rental agreement.

(iii) For a tenancy commenced or renewed on or after July 1, 2020, or July 1, 2022, if the lease is for a tenancy in a mobilehome,

1 the notice required under clause (i) must be provided in the rental
2 agreement.

3 (iv) Addition of a provision containing the notice required under
4 clause (i) to any new or renewed rental agreement or fixed-term
5 lease constitutes a similar provision for the purposes of
6 subparagraph (E) of paragraph (1) of subdivision (b) of Section
7 1946.2.

8 (e) An owner shall provide notice of any increase in the rental
9 rate, pursuant to subdivision (a), to each tenant in accordance with
10 Section 827.

11 (f) (1) On or before January 1, 2030, the Legislative Analyst's
12 Office shall report to the Legislature regarding the effectiveness
13 of this section and Section 1947.13. The report shall include, but
14 not be limited to, the impact of the rental rate cap pursuant to
15 subdivision (a) on the housing market within the state.

16 (2) The report required by paragraph (1) shall be submitted in
17 compliance with Section 9795 of the Government Code.

18 (g) For the purposes of this section, the following definitions
19 shall apply:

20 (1) "Consumer Price Index for All Urban Consumers for All
21 Items" means the following:

22 (A) The Consumer Price Index for All Urban Consumers for
23 All Items (CPI-U) for the metropolitan area in which the property
24 is located, as published by the United States Bureau of Labor
25 Statistics, which are as follows:

26 (i) The CPI-U for the Los Angeles-Long Beach-Anaheim
27 metropolitan area covering the Counties of Los Angeles and
28 Orange.

29 (ii) The CPI-U for the Riverside-San Bernardino-Ontario
30 metropolitan area covering the Counties of Riverside and San
31 Bernardino.

32 (iii) The CPI-U for the San Diego-Carlsbad metropolitan area
33 covering the County of San Diego.

34 (iv) The CPI-U for the San Francisco-Oakland-Hayward
35 metropolitan area covering the Counties of Alameda, Contra Costa,
36 Marin, San Francisco, and San Mateo.

37 (v) Any successor metropolitan area index to any of the indexes
38 listed in clauses (i) to (iv), inclusive.

39 (B) If the United States Bureau of Labor Statistics does not
40 publish a CPI-U for the metropolitan area in which the property

1 is located, the California Consumer Price Index for All Urban
2 Consumers for All Items as published by the Department of
3 Industrial Relations.

4 (C) On or after January 1, 2021, if the United States Bureau of
5 Labor Statistics publishes a CPI-U index for one or more
6 metropolitan areas not listed in subparagraph (A), that CPI-U index
7 shall apply in those areas with respect to rent increases that take
8 effect on or after August 1 of the calendar year in which the
9 12-month change in that CPI-U, as described in subparagraph (B)
10 of paragraph (3), is first published.

11 (2) “Owner” includes any person, acting as principal or through
12 an agent, having the right to offer residential real property for rent,
13 and includes a predecessor in interest to the owner.

14 (3) (A) “Percentage change in the cost of living” means the
15 percentage change, computed pursuant to subparagraph (B), in the
16 applicable, as determined pursuant to paragraph (1), Consumer
17 Price Index for All Urban Consumers for All Items.

18 (B) (i) For rent increases that take effect before August 1 of
19 any calendar year, the following shall apply:

20 (I) The percentage change shall be the percentage change in the
21 amount published for April of the immediately preceding calendar
22 year and April of the year before that.

23 (II) If there is not an amount published in April for the applicable
24 geographic area, the percentage change shall be the percentage
25 change in the amount published for March of the immediately
26 preceding calendar year and March of the year before that.

27 (ii) For rent increases that take effect on or after August 1 of
28 any calendar year, the following shall apply:

29 (I) The percentage change shall be the percentage change in the
30 amount published for April of that calendar year and April of the
31 immediately preceding calendar year.

32 (II) If there is not an amount published in April for the applicable
33 geographic area, the percentage change shall be the percentage
34 change in the amount published for March of that calendar year
35 and March of the immediately preceding calendar year.

36 (iii) The percentage change shall be rounded to the nearest
37 one-tenth of 1 percent.

38 (4) “Residential real property” means any dwelling or unit that
39 is intended for human habitation, including any dwelling or unit
40 in a mobilehome park.

1 (5) “Tenancy” means the lawful occupation of residential real
2 property and includes a lease or sublease.

3 (h) (1) This section shall apply to all rent increases subject to
4 subdivision (a) occurring on or after March 15, 2019, except as
5 provided in subdivision (i).

6 (2) In the event that an owner has increased the rent by more
7 than the amount permissible under subdivision (a) between March
8 15, 2019, and January 1, 2020, both of the following shall apply:

9 (A) The applicable rent on January 1, 2020, shall be the rent as
10 of March 15, 2019, plus the maximum permissible increase under
11 subdivision (a).

12 (B) An owner shall not be liable to the tenant for any
13 corresponding rent overpayment.

14 (3) An owner of residential real property subject to subdivision
15 (a) who increased the rental rate on that residential real property
16 on or after March 15, 2019, but prior to January 1, 2020, by an
17 amount less than the rental rate increase permitted by subdivision
18 (a) shall be allowed to increase the rental rate twice, as provided
19 in paragraph (2) of subdivision (a), within 12 months of March
20 15, 2019, but in no event shall that rental rate increase exceed the
21 maximum rental rate increase permitted by subdivision (a).

22 (i) (1) Notwithstanding subdivision (h), this section shall apply
23 only to rent increases for a tenancy in a mobilehome subject to
24 subdivision (a) occurring on or after February 18, 2021.

25 (2) In the event that an owner has increased the rent for a
26 tenancy in a mobilehome by more than the amount permissible
27 under subdivision (a) between February 18, 2021, and January 1,
28 2022, both of the following shall apply:

29 (A) The applicable rent on January 1, 2022, shall be the rent as
30 of February 18, 2021, plus the maximum permissible increase
31 under subdivision (a).

32 (B) An owner shall not be liable to the tenant for any
33 corresponding rent overpayment.

34 (3) An owner of residential real property subject to subdivision
35 (a) who increased the rental rate on that residential real property
36 on or after February 18, 2021, but prior to January 1, 2022, by an
37 amount less than the rental rate increase permitted by subdivision
38 (a) shall be allowed to increase the rental rate twice, as provided
39 in paragraph (2) of subdivision (a), within 12 months of February

1 18, 2021, but in no event shall that rental rate increase exceed the
2 maximum rental rate increase permitted by subdivision (a).

3 (j) This section shall not apply to a homeowner of a mobilehome,
4 as defined in Section 798.9.

5 ~~(k) (1) The amendments to this section made by the act adding
6 this subdivision shall apply to all rent increases subject to
7 subdivision (a) occurring on or after March 1, 2023.~~

8 ~~(2) In the event that an owner has increased the rent by more
9 than the amount permissible under subdivision (a), as amended by
10 the act adding this subdivision, between March 1, 2023, and
11 January 1, 2024, both of the following shall apply:~~

12 ~~(A) The applicable rent on January 1, 2024, shall be the rent as
13 of March 1, 2023, plus the maximum permissible increase under
14 subdivision (a), as amended by the act adding this subdivision.~~

15 ~~(B) An owner shall not be liable to the tenant for any
16 corresponding rent overpayment.~~

17 ~~(3) An owner of residential real property subject to subdivision
18 (a) who increased the rental rate on that residential real property
19 on or after March 1, 2023, but before January 1, 2024, by an
20 amount less than the rental rate increase permitted by subdivision
21 (a), as amended by the act adding this subdivision, shall be allowed
22 to increase the rental rate twice, as provided in paragraph (2) of
23 subdivision (a), before March 1, 2024, but that rental rate increase
24 shall not exceed the maximum rental rate increase permitted by
25 subdivision (a), as amended by the act adding this subdivision.~~

26 ~~(4)~~

27 (k) (1) A landlord who demands, accepts, receives, or retains
28 any payment of rent in excess of the maximum rent allowed by
29 this section shall be liable in a civil action to the tenant from whom
30 those payments are demanded, accepted, received, or retained for
31 all of the following:

32 (A) Reasonable attorney's fees and costs.

33 (B) Injunctive relief.

34 (C) Damages in the amount by which any payment demanded,
35 accepted, received, or retained exceeds the maximum allowable
36 rent.

37 (D) Upon a showing that the landlord has acted willfully or with
38 oppression, fraud, or malice, a civil penalty of treble the amount
39 by which any payment demanded, accepted, received, or retained
40 exceeds the maximum allowable rent.

(2) A local government within whose jurisdiction the residential real property is located shall have the authority to do both of the following:

(A) Enforce the provisions of this section.

(B) Bring actions for injunctive relief on behalf of the city or county or on behalf of tenants seeking compliance by landlords with this section.

(3) In an action pursuant to this subdivision for injunctive relief, it shall be presumed that a tenant suffers irreparable harm through violation of this section.

(4) An action pursuant to this subdivision shall not be brought after the date that is three years from the date on which the cause of action accrued.

~~(m)~~

(l) Any waiver of the rights under this section shall be void as contrary to public policy.

~~(n)~~

(m) This section shall remain in effect until January 1, 2030, and as of that date is repealed.

~~(o)~~

(n) (1) The Legislature finds and declares that the unique circumstances of the current housing crisis require a statewide response to address rent gouging by establishing statewide limitations on gross rental rate increases.

(2) It is the intent of the Legislature that this section should apply only for the limited time needed to address the current statewide housing crisis, as described in paragraph (1). This section is not intended to expand or limit the authority of local governments to establish local policies regulating rents consistent with Chapter 2.7 (commencing with Section 1954.50), nor is it a statement regarding the appropriate, allowable rental rate increase when a local government adopts a policy regulating rent that is otherwise consistent with Chapter 2.7 (commencing with Section 1954.50).

(3) Nothing in this section authorizes a local government to establish limitations on any rental rate increases not otherwise permissible under Chapter 2.7 (commencing with Section 1954.50), or affects the existing authority of a local government to adopt or maintain rent controls or price controls consistent with that chapter.

1 SEC. 3. No reimbursement is required by this act pursuant to
2 Section 6 of Article XIII B of the California Constitution because
3 a local agency or school district has the authority to levy service
4 charges, fees, or assessments sufficient to pay for the program or
5 level of service mandated by this act, within the meaning of Section
6 17556 of the Government Code.

2023-2024 Prioritization of Traffic Calming Projects

Approve a Resolution approving the proposed neighborhood traffic calming project prioritization list for fiscal year 2023-2024.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS DEPARTMENT

FROM: DAVID JACOBS P.E., L.S., PUBLIC WORKS DIRECTOR

BY: ANDREW EASTERLING, TRAFFIC ENGINEER

TITLE: 2023-2024 PRIORITIZATION OF TRAFFIC CALMING PROJECTS

RECOMMENDED MOTION:

A motion to approve the proposed neighborhood traffic calming project prioritization list for fiscal year 2023-2024.

EXECUTIVE SUMMARY:

Numerous requests for traffic calming projects have exceeded City's budgeted resources to respond to and provide traffic calming solutions for all the neighborhoods currently petitioning for projects. City staff evaluated and ranked traffic calming request using the Council approved prioritization criteria. The Traffic and Transportation Commission reviewed the draft prioritization ranking and modified the traffic calming project prioritization list for fiscal year 2023-2024. It is recommended City Council approve the proposed neighborhood traffic calming project prioritization list for fiscal year 2023-2024.

BACKGROUND:

The City receives numerous complaints and requests from residents regarding neighborhood traffic related issues. Many residential concerns relate to driver behavior in the form of speeding or cut-through traffic on residential streets.

In 2009, the City of Salinas adopted the Neighborhood Traffic Management Programs to respond to residents' requests to reduce the speed of vehicles and discourage cut-through traffic on residential streets. With the success and community support for the first complete traffic calming projects on Rosarita Drive and Little River Drive, requests for traffic calming projects began rapidly increasing. City staff evaluate requests as they are received but traffic calming projects are now backlogged due to limited time and budgetary resources. In 2017, staff recommended the adoption of a priority rating system based on fair and impartial methodologies to deliver projects based on identified needs and benefits. The recommended prioritization criteria was approved by City Council with Traffic and Transportation Commission support.

Staff estimates the average cost of a neighborhood traffic calming project typically ranges \$70,000 to \$150,000 depending on the size and complexity of the project. The project can take several months of community meetings with additional time for a voting period before advancing to implementation. The 2022-2023 budget for traffic calming projects was \$435,000, which is being distributed to four neighborhood traffic calming projects which include West Acacia Street, Paseo Grande, Iverson Street, and Victor Street. If there are remaining funds the City will work with the next neighborhood from the 2022-2023 prioritized traffic calming project list. Staff will continue working on the next highest priority until funds are depleted.

As of December 31, 2022, the backlog of traffic calming projects included 25 neighborhoods. Petitions for traffic calming projects received after December 31, 2022, will be included in the 2024-2025 prioritization report once traffic data is available. Staff prioritized the traffic calming projects based on the prioritization scoring from the approved criteria and presented it to the Traffic and Transportation Commission. The Commission adjusted the Coventry Street neighborhood to third highest priority despite receiving a lower prioritization score. Staff is recommending traffic calming improvement projects to be considered in the order shown in Table 1 for fiscal year 2023-2024 and continued on Attachment 1. Depending on the budget that the City Council allocates for traffic calming for the FY 23-24, City staff will work on the projects in the order listed in the table below until the budget is depleted. With an anticipated annual CIP budget for traffic calming of \$200,000, the staff expects to be able to complete three (3) projects for FY 23-24. Once the budget gets depleted, the backlogged traffic calming petitions will be held until resources become available or until the next re-prioritization list is developed.

Table 1: Traffic Calming Prioritization

Rank	Neighborhood	Score
1	Rainier Drive	61
2	Nogal Drive	52
3	Coventry Street	48
4	Rochex Avenue	51
5	Chardonnay Drive	50
6	Swaner Avenue	44
7	Ranchero Drive	39
8	Calaveras Drive	39
9	Alamo Way	36
10	Santa Teresa Way	31
11	Pueblo Drive	30
12	Alameda Avenue	27
13	Paloma Avenue	24
14	Pescadero Drive	23
15	Fairview Avenue	21
16	Mimbrera Way	20

**Streets with equal scores rank the highest collision history first*

For all other neighborhoods requesting traffic calming projects, which scored less than 20 out of 100, staff recommends closing out the request. The traffic studies found that these neighborhoods have relatively low speeds, volumes and collision history when compared to other neighborhoods. Given the abundance of traffic calming requests in the City it is reasonably foreseeable that these neighborhoods will not be prioritized for traffic calming in the foreseeable future. Therefore, staff recommends that requests for traffic calming projects that do not meet the threshold be closed and the petitioners notified.

The City developed the Neighborhood Traffic Management Program, which establishes a process for a community led effort to develop the design of a traffic calming plan that is supported by the residents themselves who will be most impacted by the project once it is completed. There are several countermeasures available to help mitigate traffic issues, however, the predominate request from the community are rubberized speed cushions. Staff notes that there are other countermeasures available which can be more effective, and may have additional benefits beyond traffic calming, such as curb extensions and raised pedestrian crosswalks. However, the planning and design of traffic calming projects is a community led effort which tends to result in more rubberized speed cushions.

TRAFFIC AND TRANSPORTATION COMMISSION:

The 2023-24 Prioritization of Traffic Calming Projects was presented to the Traffic and Transportation Commission at its May 11, 2023 meeting. The Commission voted (6-0) to approve a motion to approve a modification of staff's proposed neighborhood traffic calming project prioritization list for fiscal year 2023-2024, whereas the top three priorities include the Rainer Drive, Nogal Drive and Coventry Street neighborhoods. Furthermore, the Commission recommended that the City continue to keep all traffic calming petitions active and continue to collect data for neighborhoods with low traffic volumes and speeds which received a low priority score. However, continuing to monitor neighborhoods which are unlikely to rank high requires additional resources and funds to carry on. These operating costs will limit available traffic calming funds and consequently staff estimates the City may only be able to deliver two projects if all neighborhoods carry forward next fiscal year. Staff recommends that neighborhoods with scores less than 20 be closed so that operating funds can be allocated towards delivering projects.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378). In addition, CEQA Guidelines Section 15061 includes the general rule that CEQA applies only to activities which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. Because the proposed action and this matter have no potential to cause any effect on the environment, or because it falls within a category of activities excluded as projects pursuant to CEQA Guidelines section 15378, this matter is not a project. Because the matter does not cause a direct or foreseeable indirect physical change on or in the environment, this matter is not a project. Any subsequent discretionary projects resulting from this action will be assessed for CEQA applicability.

STRATEGIC PLAN INITIATIVE:

The 2023-2024 Prioritization of Traffic Calming Projects supports the Council goal of “Effective and Culturally Responsive Government”.

The City developed the Neighborhood Traffic Management Program to respond to residents’ concerns regarding traffic safety. Through before and after studies, the City has determined that the neighborhood traffic calming projects have some effect to lower traffic speeds and volumes. However, the City also completed a comprehensive 10-year collision analysis, the Vision Zero Action Plan, which reveals that very few traffic collisions occur on residential streets. The Neighborhood Traffic Management Program may help respond to residential requests, but the program has little effect to support the City Council’s goal of “Public Safety”.

FISCAL AND SUSTAINABILITY IMPACT:

There will be no additional impact to the General Fund. Based on the FY 2023-2024 CIP budget for Traffic Calming, staff will work on the neighborhoods from the above table until the budget is depleted. Once the allotted budget has been depleted, the backlogged traffic calming petitions will be held until resources become available or until the next re-prioritization recommendation.

RESOLUTION No. _____ (N.C.S.)

A RESOLUTION TO APPROVE THE PROPOSED NEIGHBORHOOD TRAFFIC CALMING PROJECT PRIORITIZATION LIST FOR FISCAL YEAR 2023-2024

WHEREAS, numerous requests for traffic calming projects have exceeded City's budgeted resources to respond to and provide traffic calming solutions for all the neighborhoods currently petitioning for projects; and

WHEREAS, City staff evaluated and ranked traffic calming request using the Council approved prioritization criteria; and

WHEREAS, the Traffic and Transportation Commission reviewed the draft prioritization ranking and modified the traffic calming project prioritization list for fiscal year 2023-2024; and

WHEREAS, the Council may choose to recommend changes to the neighborhood traffic calming project prioritization list for fiscal year 2023-2024; and

WHEREAS, the City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

NOW, THEREFORE, BE IT RESOLVED BY THE SALINAS CITY COUNCIL approves the neighborhood traffic calming project prioritization list for fiscal year 2023-2024.

PASSED AND APPROVED this 13th day of June 2023 by the following vote:

AYES:

NOES:

24	Jean Avenue	4
25	Harryette Drive	1

**Streets with equal scores rank the highest collision history first*

Note: The Coventry Street neighborhood was recommended as the third highest priority by the Traffic and Transportation Commission, despite receiving a lower prioritization score, and subsequent scores were adjusted accordingly.

STREET:			RAINIER DRIVE
FROM	SHIRES WAY	TO	NATIVIDAD ROAD
STAFF			
DATE	APRIL 4-6, 2023		

CATEGORY	POINTS
-----------------	---------------

1 **Traffic Volumes (20 Points)**

Measure weekday average daily traffic volumes on the residential roadway. Counts should be collected over a 3-day duration and averaged. Seasonal considerations should be considered and volumes should be measured during the regular school calendars. A typical two-lane undivided residential street has a maximum capacity of 2,000 average daily trips. For typical residential streets, the traffic calming score for volume shall be determined as 1 point for every 50 vehicles per day exceeding 1,500 with a maximum possible score of 20 points. Special consideration is given to a local collector facility. A Local Collector (Residential Type II) roadways are designed with a larger cross-section and may serve as a bus route, and typically has a capacity of 5,000 average trips per day. For typical collector facilities, the traffic calming score for volume shall be determined as 1 point for every 100 vehicles per day exceeding 2,500 with a maximum possible score of 20 points.

Facility	Residential street	
AWDT	2,308	ADT
		16

2 **Speed (20 Points)**

Measure the speed at which 85 percent of traffic travels that speed or below. Collected speeds should only be measured under conditions of free flow and should omit data observed from following vehicles or interrupted flow. A typical two-lane undivided residential street has a posted speed limit of 25 miles per hour. The traffic calming score for speed shall be determined as 2 point for mile per hour measured from the 85th percentile speed over the posted (25mph) speed limit with a maximum possible score of 20 points.

85th Percentile	32	MPH	14
------------------------	----	-----	----

3 **Crash History (20 Points)**

Review accident data for the three most recent years for which data is available. The traffic calming score for speed shall be calculated as 3 point for every accident. Adjustment factors of 3 and 2 are used respectively, to weight crash history for fatal and pedestrian/bicyclist collisions. A maximum possible score of 20 points.

Collisions	4	Each	12
Fatal	0	Each	
Pedestrian/Bike	0	Each	

4 **Land Use (20 Points)**

Proximity to designated schools and pedestrian generators (e.g. parks, libraries, and other public facilities) within 500 feet of the roadway section. The traffic calming score should add 10 points for every school and 5 points for every additional pedestrian generator with in vicinity of the study area with a maximum possible score of 20 points.

Designated School	1	Each	15
Pedestrian Generator	1	Each	

5 **Geometrics and Engineering Considerations (20 Points)**

CATEGORY

POINTS

1 Traffic Volumes (20 Points)

Measure weekday average daily traffic volumes on the residential roadway. Counts should be collected over a 3-day duration and averaged. Seasonal considerations should be considered and volumes should be measured during the regular school calendars. A typical two-lane undivided residential street has a maximum capacity of 2,000 average daily trips. For typical residential streets, the traffic calming score for volume shall be determined as 1 point for every 50 vehicles per day exceeding 1,500 with a maximum possible score of 20 points. Special consideration is given to a local collector facility. A Local Collector (Residential Type II) roadways are designed with a larger cross-section and may serve as a bus route, and typically has a capacity of 5,000 average trips per day. For typical collector facilities, the traffic calming score for volume shall be determined as 1 point for every 100 vehicles per day exceeding 2,500 with a maximum possible score of 20 points.

Facility

Collector Facility

AWDT ADT

2 Speed (20 Points)

Measure the speed at which 85 percent of traffic travels that speed or below. Collected speeds should only be measured under conditions of free flow and should omit data observed from following vehicles or interrupted flow. A typical two-lane undivided residential street has a posted speed limit of 25 miles per hour. The traffic calming score for speed shall be determined as 2 point for mile per hour measured from the 85th percentile speed over the posted (25mph) speed limit with a maximum possible score of 20 points.

85th Percentile MPH

3 Crash History (20 Points)

Review accident data for the three most recent years for which data is available. The traffic calming score for speed shall be calculated as 3 point for every accident. Adjustment factors of 3 and 2 are used respectively, to weight crash history for fatal and pedestrian/bicyclist collisions. A maximum possible score of 20 points.

Collisions Each

Fatal Each

Pedestrian/Bike Each

4 Land Use (20 Points)

Proximity to designated schools and pedestrian generators (e.g. parks, libraries, and other public facilities) within 500 feet of the roadway section. The traffic calming score should add 10 points for every school and 5 points for every additional pedestrian generator with in vicinity of the study area with a maximum possible score of 20 points.

Designated School Each

Pedestrian Generator Each

5 Geometrics and Engineering Considerations (20 Points)

Presence of sight distance issues, changes in vertical or horizontal curvature, corner sight considerations, presence of sidewalks, uncontrolled crosswalks and other unusual conditions or characteristics not aforementioned.

2 **Speed (20 Points)**

Measure the speed at which 85 percent of traffic travels that speed or below. Collected speeds should only be measured under conditions of free flow and should omit data observed from following vehicles or interrupted flow. A typical two-lane undivided residential street has a posted speed limit of 25 miles per hour. The traffic calming score for speed shall be determined as 2 point for mile per hour measured from the 85th percentile speed over the posted (25mph) speed limit with a maximum possible score of 20 points.

85th Percentile	31	MPH	12
------------------------	-----------	------------	-----------

3 **Crash History (20 Points)**

Review accident data for the three most recent years for which data is available. The traffic calming score for speed shall be calculated as 3 point for every accident. Adjustment factors of 3 and 2 are used respectively, to weight crash history for fatal and pedestrian/bicyclist collisions. A maximum possible score of 20 points.

Collisions	0	Each	0
Fatal	0	Each	
Pedestrian/Bike	0	Each	

4 **Land Use (20 Points)**

Proximity to designated schools and pedestrian generators (e.g. parks, libraries, and other public facilities) within 500 feet of the roadway section. The traffic calming score should add 10 points for every school and 5 points for every additional pedestrian generator with in vicinity of the study area with a maximum possible score of 20 points.

Designated School	0	Each	0
Pedestrian Generator	0	Each	

5 **Geometrics and Engineering Considerations (20 Points)**

Presence of sight distance issues, changes in vertical or horizontal curvature, corner sight considerations, presence of sidewalks, uncontrolled crosswalks and other unusual conditions or characteristics not aforementioned.

1 **Traffic Volumes (20 Points)**

Measure weekday average daily traffic volumes on the residential roadway. Counts should be collected over a 3-day duration and averaged. Seasonal considerations should be considered and volumes should be measured during the regular school calendars. A typical two-lane undivided residential street has a maximum capacity of 2,000 average daily trips. For typical residential streets, the traffic calming score for volume shall be determined as 1 point for every 50 vehicles per day exceeding 1,500 with a maximum possible score of 20 points. Special consideration is given to a local collector facility. A Local Collector (Residential Type II) roadways are designed with a larger cross-section and may serve as a bus route, and typically has a capacity of 5,000 average trips per day. For typical collector facilities, the traffic calming score for volume shall be determined as 1 point for every 100 vehicles per day exceeding 2,500 with a maximum possible score of 20 points.

-----------------	---------------

1 **Traffic Volumes (20 Points)**

Measure weekday average daily traffic volumes on the residential roadway. Counts should be collected over a 3-day duration and averaged. Seasonal considerations should be considered and volumes should be measured during the regular school calendars. A typical two-lane undivided residential street has a maximum capacity of 2,000 average daily trips. For typical residential streets, the traffic calming score for volume shall be determined as 1 point for every 50 vehicles per day exceeding 1,500 with a maximum possible score of 20 points. Special consideration is given to a local collector facility. A Local Collector (Residential Type II) roadways are designed with a larger cross-section and may serve as a bus route, and typically has a capacity of 5,000 average trips per day. For typical collector facilities, the traffic calming score for volume shall be determined as 1 point for every 100 vehicles per day exceeding 2,500 with a maximum possible score of 20 points.

Facility	Residential street	
AWDT	135 ADT	0

2 **Speed (20 Points)**

Measure the speed at which 85 percent of traffic travels that speed or below. Collected speeds should only be measured under conditions of free flow and should omit data observed from following vehicles or interrupted flow. A typical two-lane undivided residential street has a posted speed limit of 25 miles per hour. The traffic calming score for speed shall be determined as 2 point for mile per hour measured from the 85th percentile speed over the posted (25mph) speed limit with a maximum possible score of 20 points.

Robert Russell, P.E. City Deputy/Engineer City Manager, City of Salinas

James Serrano, Transportation Planner, Development and Engineering Services Department, City of Salinas

1. INTRODUCTION

PURPOSE

Growth in traffic volumes in Salinas and the broader region has increased the frequency and severity of traffic-related issues on neighborhood streets. Numerous agencies across the nation have confronted these problems using a proven process and tools to address both safety and quality-of-life concerns. The process is known as a Neighborhood Traffic Management Program (NTMP), which uses traffic calming tools and techniques.

The purpose of this document is to define a NTMP that is customized to the needs and unique characteristics of Salinas residential streets.

OVERVIEW

As defined in an *ITE Journal* article, “[t]raffic calming is the combination of mainly physical measures that reduce the negative effects of motor vehicle use, alter driver behavior and improve conditions for non-motorized street users.”¹ This definition suggests that the negative effects of vehicle speeds and/or excessive traffic volumes on neighborhood streets can diminish the residential quality of life. While residential life “quality” is subjective, vehicle speeds and traffic volumes can be quantified and compared against adopted community or industry standards. Experiences reinforce this notion as some community residents embrace traffic calming, while others are not so willing to accept the inconveniences of “managed traffic” in lieu of a perceived improvement in residential quality of life.

With this in mind, the Development and Engineering Services (DES) Department has requested assistance with preparation of a comprehensive program that includes a systematic approach to handling neighborhood traffic requests, and applying the most appropriate traffic calming measures for the situation at hand. The NTMP will also engage community residents during the development of individual neighborhood traffic calming plans and determine local support for the plan through neighborhood participation.

The process defined herein is intended solely for use on public streets and is not applicable to non-City maintained roadways (i.e., private roads, or county roadways). However, use of this manual as a guideline for non-City roadways, will require oversight by the Fire Department on the planning, design, and implementation of such features. Eligible City maintained roadways (i.e., public roads) include two-lane local, collector, and some minor arterials located within the City limits.

The terms “local” and “collector” streets refer to the functional classification that denotes a specific level in the transportation network hierarchy and specifies the design according to City of Salinas standards. While the streets may have been designed for a particular purpose, they may function differently in the field than intended. Therefore, it may be difficult to differentiate between the two classifications. Following is a narrative description of each roadway classification:

- Local Streets provide direct access to residential properties and facilitate short neighborhood trips. Typical local street features include:
 - Two-lane 24- to 34-foot travel way width (curb face to curb face)

¹ Lockwood, I.M., “ITE Traffic Calming Definition.” *ITE Journal*, Vol. 67, July 1997, pp. 22-24.

- Serves fewer than 75 residential units on a through cul-de-sac or street
- Collector Streets are secondary roads that connect motorists from surrounding local streets to arterial roadways and freeways and facilitate intermediate trip lengths. Typical collector street features include:
 - 34- to 40-foot travel way
 - Connects local streets to arterials
 - May or may not include front-on housing

The underpinnings of the NTMP are based on a combination of parallel strategies, known collectively as the “Three E’s”:

- Education – Providing information and raising awareness; targeting drivers, pedestrians, and cyclists about the safest and best ways to share the road.
- Engineering – Physical measures constructed to lower speeds, improve safety, or otherwise reduce the impacts of automobiles, on residents and other transportation modes.
- Enforcement – Targeted enforcement by the City of Salinas Police Department to reinforce the emphasis on education and engineering aspects of the program.

This document focuses on the engineering aspects of neighborhood traffic calming, though education and enforcement play an important role in any engineering strategy. This document and informational flyers provide education, while the City of Salinas Police Department, Monterey County Sheriff Department, and California Highway Patrol conduct targeted speed enforcement. Although targeted speed enforcement provides a positive influence on neighborhood streets, the demand for this service can easily outstrip the resources of any enforcement agency. Therefore, neighborhood traffic calming is a viable alternative that is typically self-enforcing and minimizes operating costs.

This program also considers the roadway network and design of new developments. Developers, with guidance from DES staff, can reduce the need for future traffic calming by designing new streets that discourage speeding and cut-through traffic. To supplement these design principles, developers can incorporate traffic calming concepts and measures as part of the initial development.

NTMP DEVELOPMENT

This manual was adapted to meet the needs of the City of Salinas. An advisory committee composed of representatives from City of Salinas Planning, Engineering, and Traffic Divisions; Salinas Fire Districts, Salinas Police Department; Monterey Salinas Transit; City Council Districts, and local agencies and interested parties convened to review material and provide input on specific aspects of the NTMP process framework and toolbox.

The material presented to the TAC was based on a 2004 national survey conducted of 21 leading jurisdictions’ traffic calming practices. The survey provided insight into the evolution of the traffic calming field since the last in-depth report² almost a decade ago. The various approaches, policies, and uses of traffic

² Ewing, R. *Traffic Calming State-of-the-Practice*. Washington, D.C., USA: Institute of Transportation Engineers /Federal Highway Administration, 1999.

calming devices reported in this survey provided a menu of alternatives to develop a Neighborhood Traffic Management Program unique to the City of Salinas.

FUNDING

Funding for the Salinas NTMP will likely come from the City's limited street funding, which will compete annually for funding amongst other programs. Funding will go towards staff time (operating cost) and construction costs (capital cost) of standard devices. As DES identifies needs in the next fiscal budget, City staff and decision-makers may recognize that other funding sources may be necessary to maintain the program or meet the anticipated demand. To offset the public demand and stretch the funding, residents will be required to contribute 75 percent of the costs for speed humps (or other vertical devices). Additional cost sharing may be necessary depending on annual funding and level of public demand. The need and proportional share to residents will be determined annually.

In the absence of funding or to expedite treatment, residents may elect to fund a local traffic calming plan. The neighborhood must prove the financial ability to fund 100 percent of the anticipated costs, which include plan development, engineering drawings, and construction. Upon proof of financial ability, DES can elect to authorize the neighborhood's request to develop a traffic calming plan. Regardless of resident contributions, physical measures will be implemented only if warranted through an engineering study or as part of another City sponsored project (e.g., a streetscape plan).

In addition, residents could voluntarily elect to fund aesthetic upgrades to the standard devices. Such aesthetic upgrades could include landscaping or use of decorative materials.

HOW TO USE THIS DOCUMENT

This document provides guidelines, not rigid requirements. These guidelines are primarily intended for DES staff and residents to help develop an appropriate NTMP, and for builders and staff to create and review new subdivision plans.

This manual will likely evolve as staff and community members work through the program; and identify more efficient or different methods of implementing the program and better ways of disseminating information. DES staff may also revise the design guidelines and cost estimates to ensure updated material is presented.

WHO TO CONTACT

To find out more information about the Neighborhood Traffic Management Program or whether your street is eligible for traffic calming, please contact:

- The Traffic and Transportation Division of the Development and Engineering Services Department at (831) 758-7241 or deveng@ci.salinas.ca.us.

HOW TO USE THIS DOCUMENT

If you are a Resident, you should focus on the following chapters:

Chapter 2, Process Framework, to find out how to request traffic calming on your street and the steps necessary to implement a traffic calming plan.

Chapter 3, Toolbox, to discover what particular traffic calming devices are available and the advantages and disadvantages of each.

If you are an Engineer/Planner involved in the development of a new subdivision, you should focus on the following chapters:

Chapters 3 and 4, Toolbox and Toolbox Guidelines, to discover what devices you can incorporate into your development.

Chapter 5, New Development Guidelines, for techniques to minimize the potential for future speeding and traffic-related concerns.

DES staff members should focus on the above Chapters as well as the following appendices:

Appendix A – Design Guidelines provides recommended design features to minimize design issues once implemented.

Appendix B – Standard Traffic Calming Templates provides standard designs templates that can be easily modified to fit specific roadways.

2. PROCESS FRAMEWORK

The Neighborhood Traffic Management Program is a partnership between the City and its residents. Participation begins with the initial petition filing, continues with the development of a neighborhood traffic calming plan, then moves to the final step of determining neighborhood support. The process framework identifies the steps by which the Development and Engineering Services (DES) staff and community members interact and participate in the NTMP. Figure 1 on the following page graphically illustrates the NTMP process framework. The accompanying text below provides greater detail.

The process framework is comprised of four key elements that focus on specific tasks and conclude with the implementation of a traffic calming plan.

- Plan Initiation – Is my street eligible for traffic calming consideration?
- Plan Development – Who develops the traffic calming plan?
- Plan Support – What are the requirements for neighborhood support?
- Plan Implementation – How are the supported traffic calming measures installed?

Each step of the Process Framework is numbered and corresponds with Figure 1.

This chapter also includes a “Process for Removal”. This process presents the framework for removal of neighborhood calming devices in the event residents wish to have certain aspects of the implemented plan removed.

PLAN INITIATION

This component describes how to initiate the NTMP and determine eligibility.

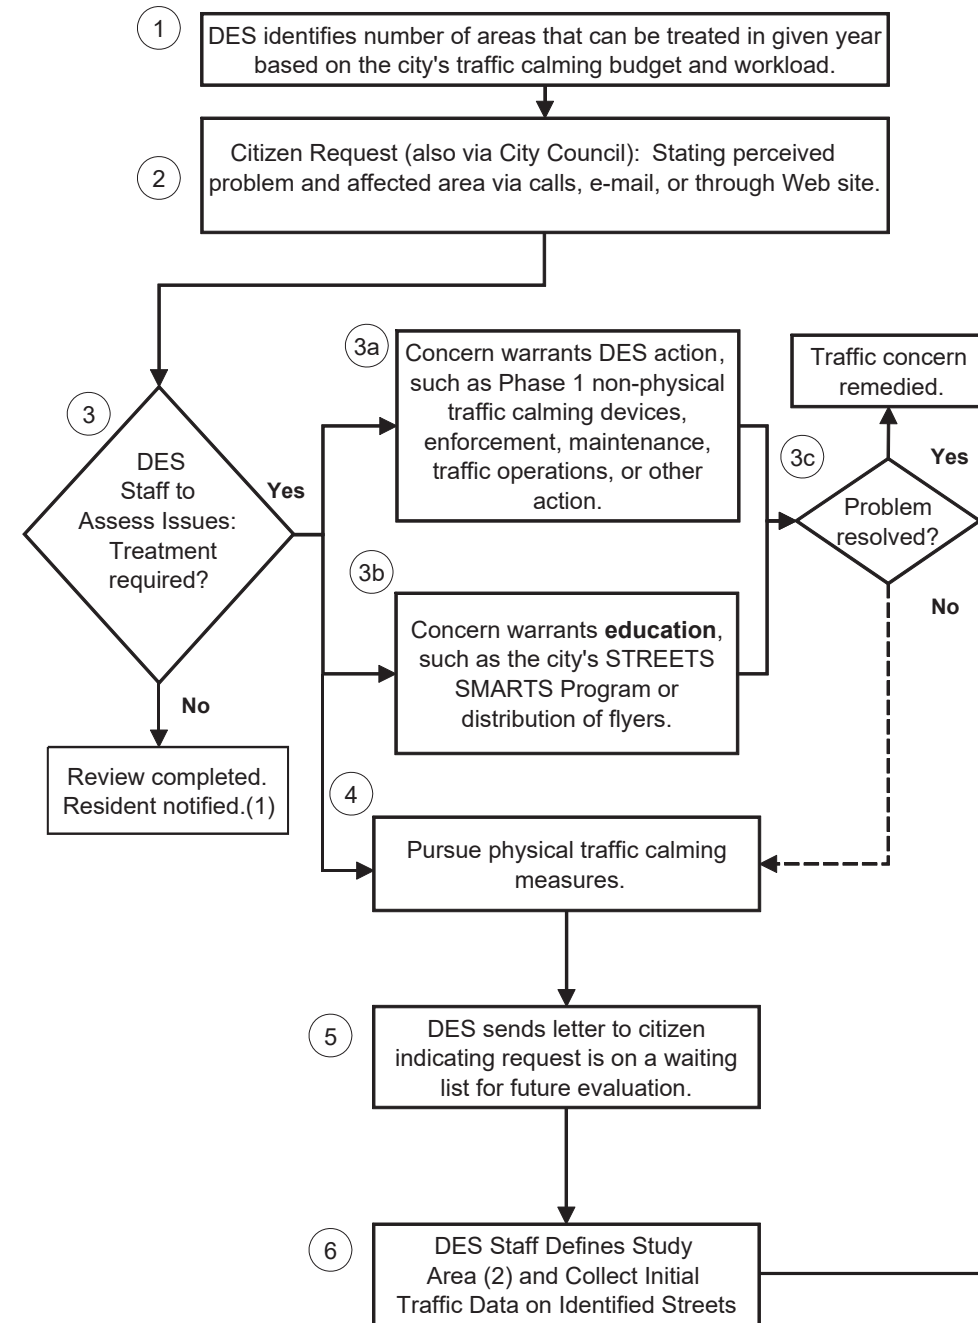

1 –Assess DES Workload and Determine Number of Areas to be Treated

Before initiating a local traffic calming plan, staff will review the number of areas that can be treated in given year based on the city’s traffic calming budget and workload. This assessment is important to balance the resources of the department due to the close oversight and required level of staff involvement.

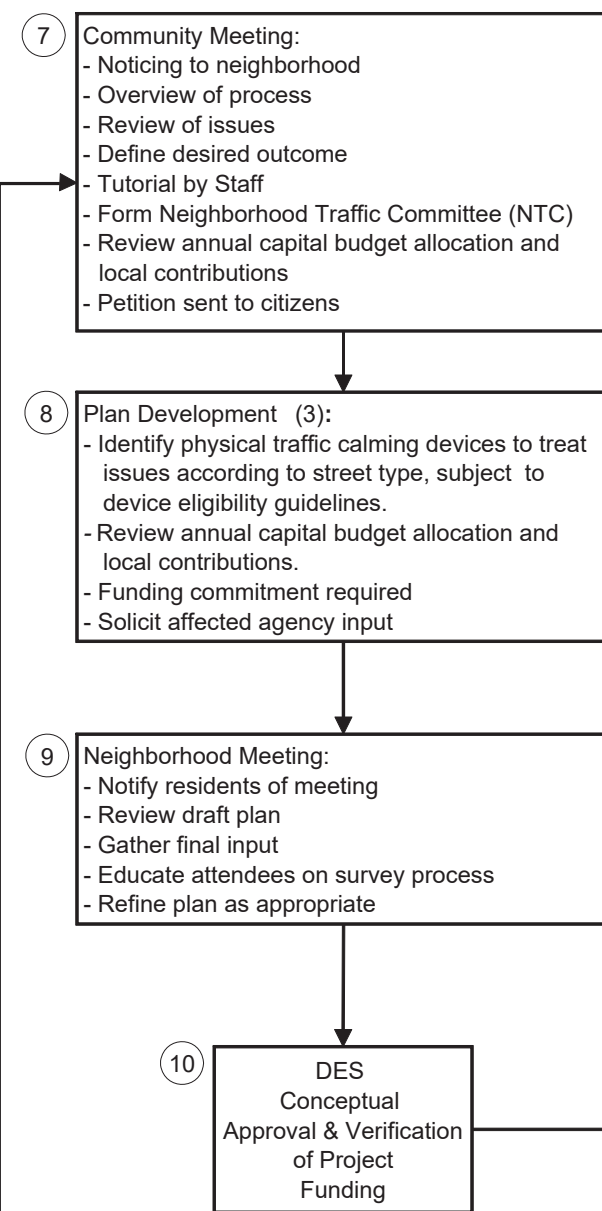

2 – Citizen Request

The process is initiated when a resident(s) submits a request to DES staff to investigate speeding, traffic volumes, or traffic-related safety concerns within their neighborhood. Requests for City-maintained streets should provide sufficient detail for staff to understand the traffic-related concern and magnitude. The action initiates the dialogue between the resident(s) and DES staff. Requests can be submitted via letter or e-mail. Requests in writing from City Council will also initiate the process.

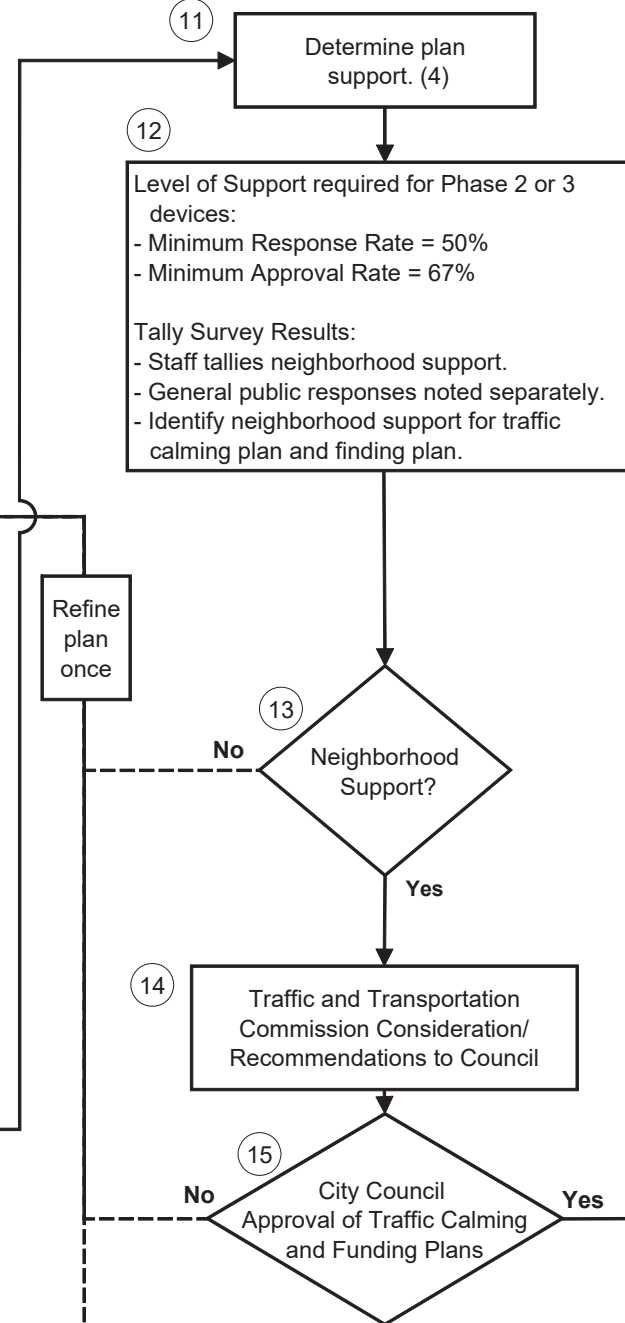

1. Plan Initiation

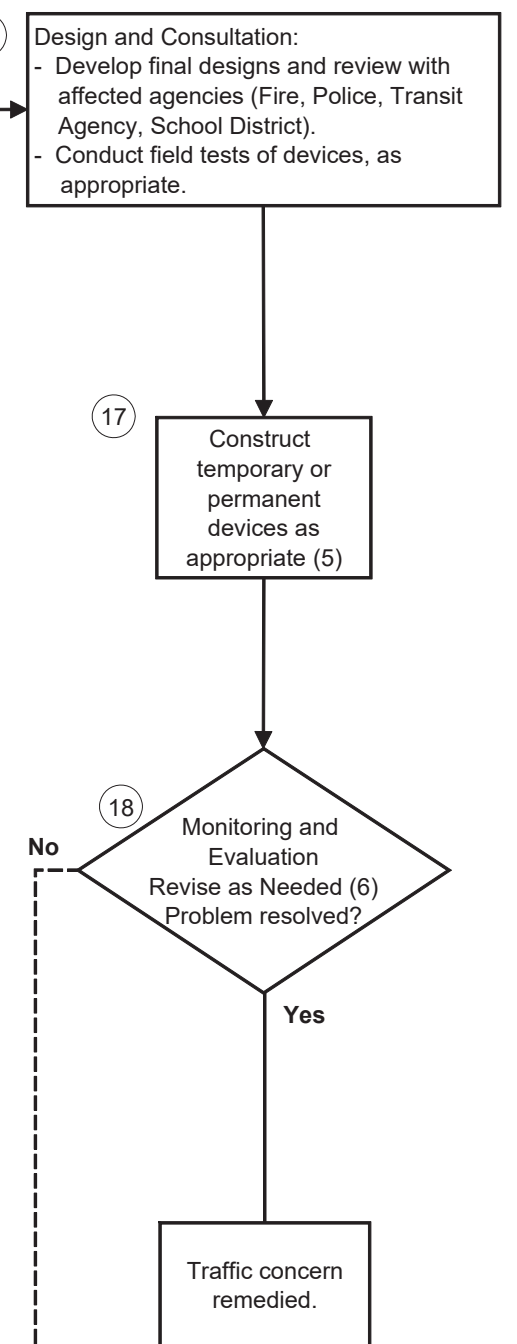

2. Plan Development

3. Plan Support

4. Plan Implementation

- (1) A response is sent to every citizen who made a request informing them of the course of action.
- (2) Study area to include all streets that may experience a significant change in traffic due to treatment and will generally be bounded by arterials, freeways, rivers, etc.
- (3) First round of plan development will focus on speed control devices, if Development and Engineering Services (DES) implementation of non-physical measures in Step 3a/3b.
- (4) Surveys distributed within study area. Multi Unit Dwellings' responses do not count toward the minimum response rate. Survey includes three questions: (a) Do you support the proposed plan? (b) Would you oppose a traffic calming device adjacent to your property? (c) Would you contribute to neighborhood funding of the proposed traffic calming measures?
- (5) Temporary devices are constructed at staff discretion based on previous experience. Temporary devices can be converted to permanent devices after 6 months of acceptable performance.
- (6) If non-physical and speed control devices are found to be ineffective, DES may initiate volume control plan.

3 – Assess Traffic

DES staff will review the petition and determine the appropriate course of action. Certain traffic concerns may be remedied through methods other than physical traffic calming devices **(3a)**. For instance, staff may initially install non-physical traffic calming devices (see Chapter 3) that utilize signs and roadway striping, conduct landscaping maintenance (e.g., trees blocking a stop sign), request targeted speed enforcement by the Salinas Police Department, or provide other engineering related improvements. Additionally, DES staff may distribute or assist residents with distribution of educational flyers reminding local residents of the rules of the road and safe neighborhood driving habits **(3b)**. Following these actions, staff will determine whether the treatments remedied the cited concern based on technical documentation **(3c)**.

The City will send a response letter to the individual who submitted the original request, indicating the initial action City staff intends to undertake. If the non-physical traffic calming measures or other actions do not eliminate the concern, staff may recommend physical traffic calming treatments.

4 – Traffic Calming Issue

Upon receipt of the request or determination that previous non-physical traffic calming actions did not address the cited concerns, DES staff may elect to pursue a traffic calming plan with local residents.

5 – Citizen Notified of Course of Action

Staff will send a letter to those residents indicating that their request is on a waiting list for future evaluation pending available City resources. If the number of requests exceeds staff resources, staff will select requests first on a safety priority basis (i.e., locations with a higher than expected number of collisions, higher pedestrian/bicycle concentration locations such as schools, community centers, or libraries) and second on a first-come-first-served basis. The remaining locations will be placed on a waiting list.

To provide residents with another avenue for treatment, neighborhoods can elect to fund the analysis and construction of traffic calming devices to consider expedited neighborhood treatment. The neighborhood must prove the financial ability to fund 100 percent of the anticipated costs, which include field analysis, plan development, engineering drawings, and construction. Upon proof of financial ability, the City can elect to authorize the neighborhood's request to develop a traffic calming plan.

6 – DES Defines Study Area and Collect Initial Traffic Data

Upon notification to proceed, DES staff will initially define the study area, which may be a specific street or much larger area such as a neighborhood. The size of the study area depends on the extent of the traffic-related concerns and should include any streets that could serve as an alternative route to the treated street. The study area may also include streets that have their only access to the treated street (e.g., cul-de-sac). Boundary lines can also follow geographic features such as a creek, hillside, open space, or an arterial roadway. The study area may later be refined with resident input.

**City of Salinas
Neighborhood Traffic Calming Petition Form**

Name of Person Submitting Petition form: _____

Date: _____

Phone Number: _____

Address: _____

Your street or neighborhood is being considered for participation in the City of Salinas Neighborhood Traffic Management Program (NTMP). This program addresses neighborhood speeding and traffic volume concerns through the use of traffic calming devices. Individual neighborhood plans will partially or completely be funded by the City of Salinas Development and Engineering Services (DES) Division; however, a percentage of the costs may be borne by the neighborhood.

Initial Description of Problem: _____

To verify local support, please provide the names, signatures, and contact information of at least 10 residents and/or property owners 18 years and older (from separate households) who support requesting that this neighborhood be considered for selection in the next NTMP cycle.

If the necessary signatures are attained, the City of Salinas Development and Engineering Services (DES) Division will initiate a neighborhood meeting to discuss neighborhood traffic issues and begin development of a traffic calming plan.

Based on the study area, DES staff will collect traffic data on streets identified as a concern. Traffic data collection will include the following:

- Street width and length
- Traffic speeds
- Traffic volumes
- Collision history

Traffic speeds and volumes should be collected for a minimum of 48 hours using a mechanical traffic counter or other appropriate device. Staff may elect to conduct a radar speed surveys to verify traffic speeds or conduct a time specific speed survey. Surveys should be collected on all potentially affected streets to insure a comprehensive set of base data for comparison purposes.

PLAN DEVELOPMENT

The plan development component is a collaborative effort between DES staff and a Neighborhood Traffic Calming Committee (NTC). They will work together to develop a traffic calming plan by completing the following steps:

7 – Neighborhood Kick-off Meeting

For those requests selected by DES staff, they will send a petition to the individual who initially requested the investigation. The petition requires a minimum of 10 signatures in support of pursuing a traffic calming plan. The signatures must be from individuals 18 years and older and from separate households. If the requesting individual cannot attain the minimum required 10 signatures, the request will be terminated. For streets or street segments with fewer than 10 residential units, the City may elect to accept the signatures from a majority of household residents.

Staff will notify study area residents, property owners, and business owners of a neighborhood meeting to learn more about the selection of their neighborhood area to participate in the NTMP. DES staff will host a neighborhood meeting to provide an overview of the NTMP and the process to develop, approve, and implement a neighborhood traffic calming plan. At this meeting, staff will accomplish the following:

- Review traffic-related issues – Discuss the type of issue(s), location(s), and time of occurrences. Collect any additional information regarding traffic-related issues.
- Refine Study area (if necessary) – Staff will refine the study area based on street(s) affected by the traffic-related issues or that may be potentially affected by development of a neighborhood traffic management plan.
- Review traffic data – Review the initial data collected and determine whether additional data collection is necessary.
- Neighborhood traffic management tutorial – Present an overview of available neighborhood traffic calming devices.
- Discuss Funding – The DES will identify the available funding sources and the anticipated amount of funding to be borne by the neighborhood for the construction of traffic calming devices. In addition, residents will be informed of the opportunity to fund enhanced aesthetic features, such as landscaping.

DES staff will provide interested residents the opportunity to volunteer and participate on the NTC. The NTC will meet with DES staff to review and develop a plan for their neighborhood. Although all residents have the opportunity to provide input and receive updates as the plan develops, the NTC is more actively involved, committing the time and effort necessary to develop a comprehensive plan.

8 – Plan Development

The NTC and DES staff will develop a short list of traffic calming devices to most appropriately treat the traffic concerns. Staff will provide guidance on the selection and placement of the devices. The Toolbox Guideline Tables 1-3 (see Chapter 4) can help to determine the most appropriate devices. The NTC will ultimately present the proposed plan to residents of the study area for public review and comment.

Following implementation on non-physical devices in the initial phase (step 3), Staff will use the following types of physical traffic calming measures to treat the traffic related concerns (see Toolbox chapter for more information):

- Vertical Devices – Speed humps, speed lumps, speed tables, etc.
- Narrowing Devices – Bulbouts, chokers, center island narrowings, etc.
- Horizontal Devices – Traffic circles, chicanes, lateral shifts, etc.

Because volume control measures (e.g., partial closures or forced turn islands) intentionally divert traffic to another street, new issues are likely to occur as a result. The City strongly promotes connectivity in and between neighborhoods to distribute traffic and minimize all modes of travel. For these reasons, volume control devices should be reserved until all other options have proven ineffective at reducing the traffic-related impacts.

Once DES staff and NTC have developed a plan that will adequately address the neighborhood concerns and finalized the committed funding sources, staff will solicit feedback from local service providers that may be affected by the plan. The intent is to identify concerns and develop viable alternatives to strike a balance between goals of the NTMP and the needs of other agencies. The following service providers should be included as appropriate when coordinating the plan review.

- City of Salinas Fire District
- City of Salinas Police Department
- Ambulance Service Providers
- Monterey Salinas Transit
- Local School District / Bus Service
- Solid waste collection companies

9 – Proposed Plan Neighborhood Meeting

DES staff will notify the study area residents of a neighborhood meeting to review the Proposed Plan. Residents will have the opportunity to review and provide input on the proposed plan. At this meeting, the NTC will present a map of the proposed plan, describe the types and locations of devices proposed, and discuss the estimated construction costs. If applicable, the NTC will also discuss the aesthetic improvements to gauge resident support. Changes to the proposed plan can be made as necessary.

The DES will also inform residents of the approval process and ballots they will receive once the proposed plan is refined.

10 – DES Conceptual Approval and Verification of Project Funding

Prior to determining neighborhood support, DES staff will conceptually approve the plan and verify placement of all proposed traffic calming devices. Staff will also verify the residents' financial responsibility for the proposed plan. The residents' financial responsibility may include a portion of the construction costs and any costs for aesthetic upgrades.

NEIGHBORHOOD SUPPORT

The neighborhood support component assesses the amount of local neighborhood support for the proposed plan in the form of mail-in ballots. DES staff will mail the ballots to the study area residents, property owners, and applicable business owners.

11 – Determine Plan Support

Before distributing ballots, staff will inform residents in the study area regarding the pending vote with an informational brochure. The combination of this step and the neighborhood meeting (Step 9) will help to ensure that residents of the study area are properly informed.

Ballots will be distributed to study area residents, property owners, apartment units, and businesses owners (if applicable). The ballots will include a description and map of the proposed plan indicating the type and location of devices being proposed. The ballot will also include a mail-back postcard with three questions for residents to respond to:

- Do you support the proposed plan?
- Would you oppose traffic calming devices along your property frontage?
- Would you contribute to neighborhood funding for the construction of the proposed traffic calming measures?

The mail-back postcard will also provide a space for residents to write comments regarding the proposed plan.

In addition to determining the local neighborhood support, staff will provide the opportunity for residents living outside of the immediate study area to voice their opinions, such as posting a neighborhood sign with city contact information or accepting comments through e-mail or a Web site. The magnitude of support by the general public will also be considered in the plan approval, but safety issues should govern the final decision for implementation.

12 – Minimum Neighborhood Support

A minimum response rate and approval rate must be obtained before staff can construct the proposed plan. At least 50 percent of all ballots must be returned with at least 67 percent of returned ballots in favor. For example, if 100 ballots are mailed out, at least 50 must be returned with 34 in favor of the proposed plan.

Apartments present a unique situation because residents may be less likely to respond. For this reason, ballots from apartment units are not counted toward the minimum response rate, but will be counted in favor or against the proposed plan.

DES staff will count all received ballots and determine whether the minimum response rate and approval rate are satisfied. Staff will also tally the general public input.

13 – Neighborhood Support

If the minimum response rate and approval rate is satisfied, the DES will approve the proposed plan and submit the project for funding consideration.

If staff does not receive the minimum number of ballots, staff can assist the NTC in reminding neighborhood residents to submit their mail-back postcards in order to meet the minimum response rate. NTC members are encouraged to solicit input from their neighbors.

If the minimum response rate is met but the approval rate is not satisfied, the NTC has one opportunity to revise the plan. The DES staff and NTC will identify the aspects of the plan not favored by the neighborhood residents. Modifying the plan may also require soliciting a second review by the local service providers, holding a public meeting to present the revised plan, and redistributing ballots to the affected area. Before supplemental work, the DES will need to assess the department's workload and financial needs to revise the plan.

If the minimum response rate and approval rate are satisfied, then the plan continues to the final component of the process.

14 – TTC Consideration/Recommendation to City Council

DES staff will present to the Traffic and Transportation Commission (TTC) a map of the community approved plan, describe the types and locations of devices proposed, and summarize the estimated construction costs. If applicable, DES staff will also discuss the aesthetic improvements provided by selected measures. The TTC will make its recommendation to the City Council based on this presentation.

15 – City Council Approval of Traffic Calming and Funding Plans

Similar to the TTC public meeting, DES staff will present a map of the community approved plan, describe the types and locations of devices proposed, summarize the estimated construction costs, and discuss the recommendation from the TTC. The City Council will either approve the traffic calming and funding plans to initiate construction, or recommend additional improvements and modifications to the plan – requiring a return to step 8.

PLAN IMPLEMENTATION

The final component consists of preparing the design plans, constructing, and monitoring the approved traffic calming devices.

16 – Design and Consultation

Upon approval of the proposed plan, DES staff will prepare the necessary design plans for each traffic calming device and consult with local service providers if necessary. The DES may conduct field tests to verify that local service providers' vehicles can navigate through or around the proposed designs. DES will make modifications to the approved devices as necessary.

17 – Construction

Before constructing the traffic calming devices, the DES will inform the public and local service providers of the pending traffic calming devices. The DES will also provide education materials to inform local residents how to negotiate unfamiliar devices, as necessary.

The DES or a City contractor will construct the approved traffic calming devices. The staff may decide to construct temporary devices based on previous experience. DES staff will incorporate aesthetics into the design and construction of temporary devices where possible, but these devices may not be visually appealing due to cost limitations. Aesthetics will be a higher priority for permanent devices.

18 – Monitoring and Evaluation

The DES will monitor the effectiveness and neighborhood perception of the constructed devices for three to six months. Following the monitoring period, the DES will collect traffic speed and volume data for the treated streets and quantitatively determine the effects of the plan.

After constructing the approved plan, the DES will rely on the NTC and community members for feedback on the constructed devices. Based on the NTC and/or community members' feedback, the DES will determine the next steps. For example, the approved plan may have produced reasonable and satisfactory results, and, therefore, no further action is required.

If the approved plan has not produced reasonable and satisfactory results, the DES can recommend one of the following:

- Collect additional traffic data as deemed appropriate
- Modify constructed devices as deemed appropriate
- Construct additional speed control devices as deemed appropriate

If the DES determines that additional speed control devices will not adequately address the traffic-related concern, the DES can recommend the use of alternative measures or programs.

Before supplemental work begins, the DES will assess the department's workload and financial needs to revise the plan.

PROCESS FOR REMOVAL

The DES recognizes that after devices are approved and implemented, residents may wish to remove these devices. Historically, once installed, most traffic calming devices remain due to local support. This section provides guidelines for a systematic removal process.

Similar to the process for implementing neighborhood traffic calming devices, the removal process is resident-driven. The process requires that the same affected area be involved in the decision process for the removal of devices. As detailed below, greater neighborhood support is also required to verify that the neighborhood truly wants the devices removed. *Residents must bear the costs for removal.*

The removal process is described below, and the flowchart in Figure 2 outlines the removal process. Each step below is numbered and corresponds to the flowchart on Figure 2.

1 – Citizen Petition for Removal of Device(s)

To initiate the removal process, a resident living in the neighborhood where the device removal is being considered must submit a petition. The petition cannot be submitted within the first year of operation. The petition must be submitted with a minimum of 10 signatures from separate households. The petition must also state the location(s) of device(s) and reason for removal.

Once DES staff receives the petition, they will organize and distribute ballots for the removal process.

2 – Distribute Ballots

Ballots will be distributed to those residents, property owners, and business owners from the original study area. Although tenants or property owners may have changed, the same addresses will be provided the opportunity to participate in the approval process. The ballots will contain descriptions and maps of devices and locations proposed for removal. The ballot will also include a mail-back postcard that residents can use to indicate their support for or against the proposed removal. The ballot will also provide a space for residents to write comments regarding the removal.

3 – Required Neighborhood Support

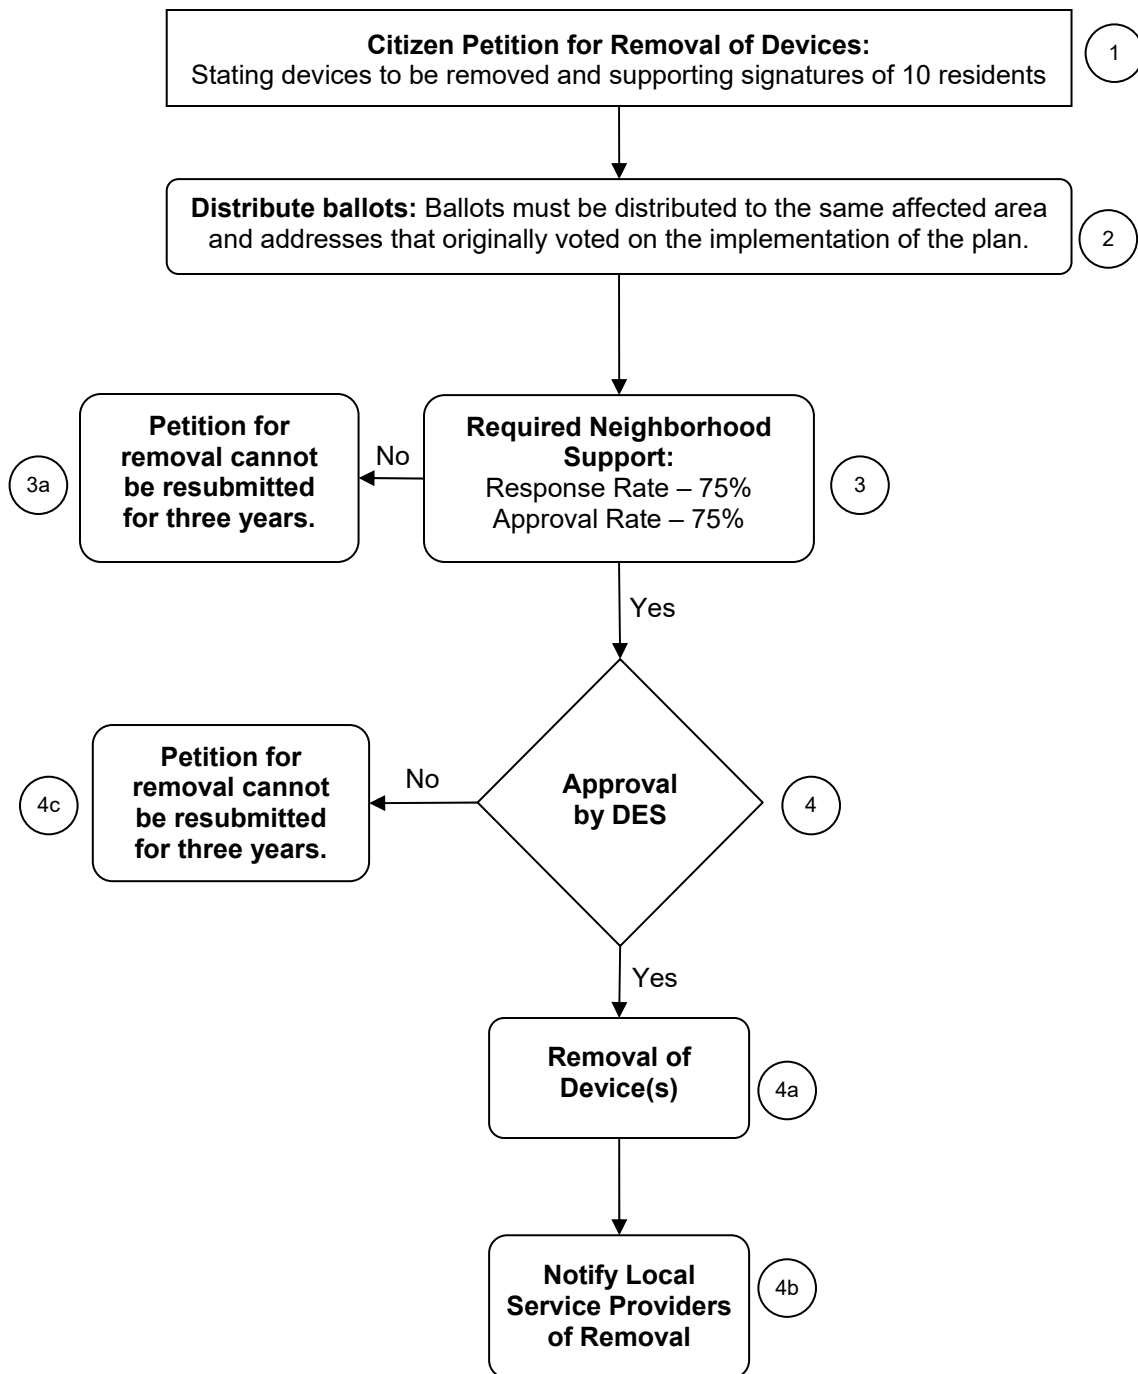

A higher minimum response rate and approval rate must be met by those households on the treated street. A minimum of 75 percent of all ballots must be returned with at least 75 percent of all ballots received in favor of removal.

Similar to the installation process, apartment units do not count toward the minimum response rate. If the minimum response or approval rates are not met, residents must wait three years before refiling the petition **(3a)**.

4 – Approval by DES

If the neighborhood support meets the minimum response and approval rates, the DES will calculate the estimated removal cost. The neighborhood must prove the ability to fund 100 percent of the anticipated costs. Upon proof of financial ability, the DES can elect to authorize the removal of the specified devices **(4a)**. A letter will be sent to all local service providers (e.g., Fire Department) indicating the location of device(s) to be removed **(4b)**. If the full cost of removal is not provided, residents must wait three years before refiling the petition **(4c)**.

Figure 2 NTMP Process For Removal

3. TOOLBOX

This chapter of the NTMP summarizes the “toolbox” of devices that are available to the City of Salinas and community members when developing neighborhood traffic calming plans. The “toolbox” contains 31 different devices that address neighborhood traffic related concerns such as speeding vehicles, high traffic volumes, cut-through traffic, or collisions at neighborhood intersections. The devices vary in their ability to treat various traffic related concerns. For this reason, Chapter 4, “Toolbox Guidelines,” provides guidance on selecting the most appropriate devices given the type of specific traffic-related concern and street being treated.

The “toolbox” of neighborhood traffic management devices can be grouped into three categories:

- Non-Physical devices
- Speed Control
 - Narrowing devices
 - Horizontal devices
 - Vertical devices
- Volume Control devices

For each device in the “toolbox,” the following information relating to each device is provided:

- Description of the measure
- Photograph and/or schematic
- List of advantages and disadvantages
- Data sheet indicating speed, volume, or collision reduction potential
- Estimated costs

Cost approximations are based on 2006 costs and are provided for information purposes only. Actual costs depend on many factors, including dimensions of device, construction materials, and actual construction costs.

NON-PHYSICAL DEVICES

Description

Non-physical devices include any measures that do not require physical changes to the pavement section or curbs. Non-physical devices are intended to increase drivers' awareness of surroundings and influence driver behavior without physical obstructions. DES staff will initially implement non-physical devices to treat traffic related concerns. However, these devices are not self enforcing and may have limited effectiveness as stand-alone devices. This category includes the following devices:

- Targeted Speed Enforcement
- Speed Radar Trailers
- Speed Feedback Sign
- Centerline/Edgeline Lane Striping
- Optical Speed Bars
- Signage
- Speed Legend
- Centerline/Edgeline Reflectors
- High Visibility Crosswalks
- Angled Parking

Targeted Speed Enforcement

City Staff or NTC members can identify locations for temporary targeted enforcement, based on personal observations and survey comments. A request can be submitted to the Salinas Police Department (SPD) for the desired enforcement. Because of limited SPD resources, the duration of the targeted enforcement may be limited.

Targeted enforcement may also be used in conjunction with new neighborhood traffic management devices to help drivers become aware of the new restrictions.

Advantages

- Inexpensive if used temporarily
- Does not physically slow emergency vehicles or buses
- Quick implementation

Disadvantages

- Expensive to maintain an increased level of enforcement
- Effectiveness may be temporary

Approximate Cost: No additional cost.

Speed Radar Trailers

A radar trailer is a device that measures each approaching vehicle's speed and displays it next to the legal speed limit in clear view of the driver. They can be easily placed on a street for a limited amount of time then relocated to another street, allowing a single device to be effective in many locations.

Advantages

- Portable
- Does not physically slow emergency vehicles or buses
- Quick implementation

Disadvantages

- Effectiveness may be temporary
- Drivers may divert to alternate streets due to uncertainty of device implications
- Subject to vandalism

Approximate Cost: No direct cost. (Purchase \$6,000 - \$12,000)

Speed Feedback Signs

Speed feedback signs perform the same functions as radar trailers but are permanent. Real-time speeds are relayed to drivers and flash when speeds exceed the limit. Speed feedback signs are typically mounted on or near speed limit signs.

Approximate Cost: \$7,500 - \$10,000

Advantages

- Real-time speed feedback
- Does not physically slow emergency vehicles or buses
- Permanent installation

Disadvantages

- May require power source
- Only effective for one direction of travel
- Long-term effectiveness uncertain
- Subject to vandalism

Centerline/Edgeline Lane Striping

Lane striping can be used to create formal travel lanes, bicycle lanes, parking lanes, or edge lines. As a neighborhood traffic management measure, they are used to narrow the travel lanes for vehicles, thereby inducing drivers to lower their speeds. The past evidence on speed reductions is, however, inconclusive.

Approximate Cost: \$2.00 per linear foot

Advantages

- Inexpensive
- Can be used to create bicycle lanes or delineate on-street parking
- Does not slow emergency vehicles

Disadvantages

- Has not been shown to significantly reduce travel speeds
- Requires regular maintenance

Optical Speed Bars

Optical speed bars are a series of pavement markings spaced at decreasing distances. They have typically been used in construction areas to provide drivers with the impression of increased speed. They do not provide long-term speed reduction benefits.

Advantages

- Inexpensive
- Does not physically slow emergency vehicles or buses

Disadvantages

- Long-term effects in residential area unknown
- Increases regular maintenance

Approximate Cost: \$1.00 per linear foot

Signage

Various signs may also be useful in alerting driver of certain conditions. Examples include:

- "Cross Traffic Does Not Stop" Signs
- Truck Restriction Signs

Advantages

- Inexpensive
- Truck restrictions can reduce through truck traffic
- Does not slow emergency vehicles or buses

Disadvantages

- Requires regular maintenance
- Speed limit signs are not applicable because they do not necessarily change driver behavior
- If speed limits are set unreasonably low, drivers are more likely to exceed it

Approximate Cost: \$150 - \$500 per sign

Speed Legend

Speed legends are numerals painted on the roadway indicating the current speed limit in miles per hour. They are usually placed near speed limit signposts. Speed legends can be useful in reinforcing a reduction in speed limit between one segment of a roadway and another segment. They may also be placed at major entry points into a residential area.

Approximate Cost: \$75 per location

Centerline/Edgeline Reflectors

Reflectors (also known as Botts dots or “raised pavement markers”) are small bumps lining the centerline or edgeline of a roadway. They are often used on curves where vehicles have a tendency to deviate outside of the proper lane, risking collision. Raised reflectors improve the nighttime visibility of the roadway edges and provide a low impact physical reminder to drivers if driven over.

Approximate Cost: \$4.50 per marker

Advantages

- Inexpensive
- Helps reinforce a change in speed limit
- Does not slow emergency vehicles

Disadvantages

- Has not been shown to significantly reduce travel speeds
- Requires regular maintenance

Advantages

- Inexpensive
- Does not physically slow emergency vehicles or buses
- Can help keep drivers in the appropriate travel lane on curves and under low-visibility conditions

Disadvantages

- Noise caused by tire impact
- Requires regular maintenance
- Has not been shown to significantly reduce travel speeds

High Visibility Crosswalks

High-visibility crosswalks use special marking patterns and raised reflectors to increase the visibility of a crosswalk. A “triple-four” marking pattern is created by painting two rows of four-foot wide rectangles, separated by four feet of unpainted space across the roadway. Raised reflectors are placed at the approach edges of these rectangles. The unpainted space along the center of the crosswalk provides an untreated path for wheelchair users and foot traffic, as markings may become slippery in rainy/wet conditions. See Appendix C for the City of Salinas

Pedestrian Safety Enhancement Devices Policy, which describes the City accepted standards of high visibility crosswalks in school zones.

Advantages

- Increased visibility of crosswalk
- Focus crossing pedestrians at a single location

Disadvantages

- May give pedestrians a false sense of security, causing them to pay less attention to traffic
- Requires more maintenance than normal crosswalks

Approximate Cost: \$1,600 per location

Angled Parking

Angled parking reorients on-street parking spaces to a 45-degree angle, increasing the number of parking spaces and reducing the width of the roadway available for travel lanes. Angled parking is also easier for vehicles to maneuver into and out of than parallel parking.

Consequently, it works well in areas with high parking demand and turnover rates, and where street widths are wider than normal 50 foot or greater cross-sections.

Advantages

- Reduces speeds by narrowing the travel lanes
- Increases the number of parking spaces
- Provides for easier parking maneuvers that take less time than parallel parking
- Favored by businesses and multi-family residences

Disadvantages

- Precludes the use of bike lanes (unless roadway is wider than 58 feet)
- Ineffective on streets with frequent driveways
- Potential for collisions when backing out

Approximate Cost: Dependent on amount of parking

SPEED CONTROL – NARROWING DEVICES

Description

Narrowing devices use raised islands and curb extensions to physically narrow the travel lane for motorists. The narrowing devices in the toolbox include:

- Neckdown/Bulbout
- Center Island Narrowing/Pedestrian Refuge
- Two-Lane Choker
- One-Lane Choker

Each narrowing device is illustrated and described on the following pages.

Neckdown/Bulbout

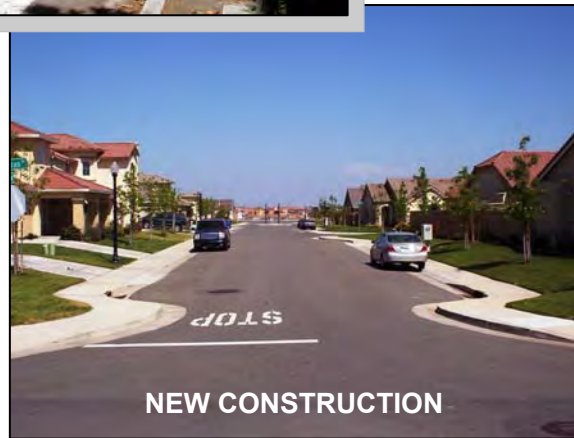

Neckdowns/bulbouts are raised curb extensions that narrow the travel lane at intersections or midblock locations. Neckdowns/bulbouts “pedestrianize” intersections by shortening the crossing distance and decreasing the curb radii, thus reducing turning vehicle speeds. Both of these effects increase pedestrian comfort and safety at the intersection.

The magnitude of speed reduction is dependent on the spacing of neckdowns between points that require drivers to slow (see page 56). On average, neckdowns achieve a 7 percent reduction in speeds.

Approximate Cost: \$6,000 – \$12,000 per corner

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-7%
Volume Reduction	Reduction in Vehicles per Day	-10%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Reduces pedestrian crossing distance and exposure to vehicles
- Through and left-turn movements are easily negotiable by large vehicles
- Creates protected on-street parking bays
- Reduces speeds (especially right-turning vehicles) and traffic volumes

Disadvantages

- Effectiveness is limited by the absence of vertical or horizontal deflection
- May slow right-turning emergency vehicles
- Potential loss of on-street parking
- May require bicyclists to briefly merge with vehicular traffic

Center Island Narrowing/Pedestrian Refuge

Center island narrowings are raised islands located along the centerline of a street that narrow the travel lanes at that location. Placed at the entrance to a neighborhood, and often combined with textured pavement, they are often called "gateways." Fitted with a gap to allow pedestrians to walk through at a crosswalk, they are often called "pedestrian refuges." They can also be landscaped to increase visual aesthetics.

The magnitude of speed reduction is dependent on the spacing of center island narrowings between points that require drivers to slow (see page 56). On average, center island narrowings achieve a 7 percent reduction in speed.

Approximate Cost: \$10,000 - \$15,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-7%
Volume Reduction	Reduction in Vehicles per Day	-10%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect. Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Can increase pedestrian safety
- Aesthetic upgrades can have positive aesthetic value
- Reduces traffic volumes if alternative routes are available

Disadvantages

- Effect on vehicle speeds is limited by the absence of any vertical or horizontal deflection
- Potential loss of on-street parking

Two-Lane Choker

Chokers are curb extensions at midblock that narrow a street. Chokers leave the street cross section with two lanes that are narrower than the normal cross section.

The magnitude of speed reduction is dependent on the spacing of two-lane chokers between points that require drivers to slow (see page 56). On average two-lane chokers achieve a 7 percent reduction in speed.

Approximate Cost: \$7,000 - \$8,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-7%
Volume Reduction	Reduction in Vehicles per Day	-10%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Easily negotiable by emergency vehicles and buses
- Can have positive aesthetic value
- Reduces both speeds and volumes

Disadvantages

- Effect on vehicle speeds is limited by the absence of any vertical or horizontal deflection
- May require bicyclists to briefly merge with vehicular traffic
- Loss of on-street parking
- Build-up of debris in gutter

One-Lane Choker

One-lane chokers narrow the roadway width such that there is only enough width to allow travel in one direction at a time. They operate similarly to one-lane bridges, where cars approaching on one side must wait until all traffic in the other direction has cleared before proceeding.

The magnitude of speed reduction is dependent on the spacing of one-lane chokers between points that require drivers to slow (see page 56). On average, one-lane chokers achieve a 14 percent reduction in speed.

Approximate Cost: \$8,000 - \$9,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-14%
Volume Reduction	Reduction in Vehicles per Day	-20%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Maintains two-way vehicle access, except at choker
- Very effective in reducing speeds and traffic volumes

Disadvantages

- Perceived as unsafe because opposing traffic is vying for space in a single lane
- Can be used only on low-volume, low speed roads
- Loss of on-street parking

SPEED CONTROL – HORIZONTAL DEVICES

Description

Horizontal deflection devices use raised islands and curb extensions to physically eliminate straight-line paths along roadways and through intersections. The horizontal deflection devices in the toolbox include:

- Traffic Circle
- Roundabout (Single-Lane)
- Chicane
- Lateral Shift
- Realigned Intersection

Traffic Circle

Traffic circles are raised islands, placed in intersections, around which traffic circulates. Stop signs or yield signs can be used as traffic controls at the approaches of the traffic circle. Circles prevent drivers from speeding through intersections by impeding the straight-through movement and forcing drivers to slow down to yield. Depending upon the size of the intersection and circle, trucks may be permitted to turn left in front of the circle.

The magnitude of speed reduction is dependent on the spacing of traffic circles between points that require drivers to slow (see page 56). On average, traffic circles achieve an 11 percent reduction in speeds and a dramatic 71 percent decrease in collisions.

Approximate Cost: \$10,000 - \$25,000 per location

Measured Effectiveness		
Speed Impacts	Reduction in 85th Percentile Speeds between Slow Points	-11%
Volume Impacts	Reduction in Vehicles per Day	-5%
Safety Impacts	Reduction in Average Annual Number of Collisions	-71%
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Very effective in moderating speeds and improving safety
- Can have positive aesthetic value

Disadvantages

- If not designed properly, difficult for emergency vehicles or large trucks to travel around
- Must be designed so that the circulating traffic does not encroach on crosswalks
- Potential loss of on-street parking

Roundabout (Single-Lane)

Like traffic circles, roundabouts require traffic to circulate counterclockwise around a center island. But unlike circles, roundabouts are used on higher volume streets to allocate right-of-way among competing movements. They are found primarily on collector streets, often substituting for traffic signals. They are larger than neighborhood traffic circles, have raised splitter islands to channel approaching traffic to the right, and do not have stop signs. Due to large amount of required right-of-way and construction costs, roundabouts may be most appropriate for new developments.

Roundabouts have an insignificant effect in reducing traffic speeds, but serve to allocate right-of-way at an intersection similar to a traffic signal. On average, roundabouts can reduce the average number of accidents up to 33 percent when compared to a signalized intersection.

Approximate Cost: Varies by intersection and whether new construction or a retrofit.

Measured Effectiveness		
Speed Impacts	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Impacts	Reduction in Vehicles per Day	I/D
Safety Impacts	Reduction in Average Annual Number of Collisions	-15% to -33%
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Roundabouts: An Informational Guide, 2000.		

Advantages

- Enhanced vehicle safety compared to a traffic signal or stop sign
- Minimizes queuing at approaches to the intersection
- Less expensive to operate than traffic signals
- Can have positive aesthetic value
- Shorter pedestrian crossing distance

Disadvantages

- May require major reconstruction of an existing intersection
- Loss of on-street parking
- Continuous flow of traffic limits opportunity for pedestrians to cross (compared to signal)

Chicane

Chicanes are curb extensions that alternate from one side of the street to the other, forming S-shaped curves. Chicanes can also be created by alternating on-street parking between one side of the road and the other. Each parking bay can be created either by restriping the roadway or by installing raised center islands at each end, creating a protected parking area. Chicanes have limited effectiveness in reducing traffic speeds and volumes as compared to other devices. Little data has been collected to predict the reduction in speed, traffic volumes, or collisions, and use of this device may not result in significant decreases. Resources permitting, DES staff can collect before and after data to determine the effectiveness of chicanes.

Approximate Cost: \$8,000 - \$14,000 per location

Measured Effectiveness		
Speed Impacts	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Impacts	Reduction in Vehicles per Day	I/D
Safety Impacts	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient data to predict reduction effect.		

Advantages

- Discourages high speeds by forcing horizontal deflection
- Easily negotiable by emergency vehicles and buses

Disadvantages

- Must be designed carefully to discourage drivers from deviating out of the appropriate lane
- Curb realignment and landscaping can be costly, especially if there are drainage issues
- Loss of on-street parking

Lateral Shift

Lateral shifts are curb extensions on otherwise straight streets that cause a shift in the travel. Lateral shifts, with just the right degree of deflection, can be effective. However, lateral shifts have had limited use in the United States, and, consequently, insufficient data prevents accurate prediction of speed reduction and traffic volumes.

Approximate Cost: Dependent on size of offset and length of transition

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Reduction	Reduction in Vehicles per Day	I/D
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		

Advantages

- Can accommodate higher traffic volumes than many other neighborhood traffic management measures
- Easily negotiable by large emergency vehicles and buses

Disadvantages

- Potential for loss of on-street parking
- Must be designed carefully to discourage drivers from deviating out of the appropriate lane

Realigned Intersection

Realigned intersections provide deflection on an otherwise straight approach of a T-intersection. By providing deflection in the form of a curb extension or realignment, drivers are required to slow through the intersection or come to a stop before turning. Little data has been collected to predict the reduction in speed, traffic volumes, or collisions, and use of this device may not result in significant decreases. Resources permitting, DES staff can collect before and after data to determine the effectiveness of realigned intersections.

Approximate Cost: \$15,000 - \$30,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Reduction	Reduction in Vehicles per Day	I/D
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		

Advantages

- Can be effective at reducing speeds at T-intersections
- Can be effective in increasing safety at T-intersections

Disadvantages

- Modifying curbs or drainage can be costly
- Acquiring additional right-of-way can be costly

SPEED CONTROL – VERTICAL DEVICES

Description

Vertical deflection devices use variations in pavement height and alternative paving materials to physically reduce travel speeds. The design speeds for these devices are approximately 15 to 20 mph depending on the device. The vertical deflection devices in the toolbox include:

- Speed Hump
- Speed Lump
- Speed Cushion
- Speed Table
- Raised Crosswalk
- Raised Intersection
- Textured/Colored Pavement
- Rumble Strip

Speed Hump

Speed humps are rounded raised areas placed across the road. They are generally 12 feet long (in the direction of travel), 3 to 3 ½ inches high, parabolic in shape, and have a design speed of 15 to 20 mph. They are usually constructed with a taper on each side to allow unimpeded drainage between the hump and curb. When placed on a street with rolled curbs or no curbs, bollards are placed at the ends of the speed hump to discourage vehicles from veering outside of the travel lane to avoid the device.

The magnitude of reduction in speed is dependent on the spacing of speed humps between points that require drivers to slow (see page 56). On average, speed humps achieve a 22 percent reduction in speeds.

Approximate Cost: \$2,000 - \$3,000 per location

Measured Effectiveness		
Speed Impacts	Reduction in 85th Percentile Speeds between Slow Points	-22%
Volume Impacts	Reduction in Average Daily Traffic	-18%
Safety Impacts	Reduction in Average Annual Number of Collisions	-13%
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Relatively inexpensive
- Relatively easy for bicyclists to cross
- Very effective in slowing travel speeds

Disadvantages

- Causes a "rough ride" for drivers, and can discomfort people with certain skeletal disabilities
- Slows emergency vehicles and buses
- Aesthetics
- Signs may be unwelcome by adjacent residents
- Increased noise for nearby residents

Speed Lump

The speed lump is a variation on the speed hump, adding two wheel cut-outs designed to allow large vehicles, such as emergency vehicles and buses, to pass with minimal impedance. The design limits passenger cars and most SUVs from fully passing through the cut-outs, but allows one set of wheels to pass through the cut-out while the other set is required to travel over the lump.

The magnitude of speed reduction is dependent on the spacing of speed lumps between points that require drivers to slow (see page 56). Speed lumps have a similar reduction in speeds when compared to speed humps.

Approximate Cost: \$2,000 - \$3,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D, but comparable to speed humps
Volume Reduction	Reduction in Average Daily Traffic	
Safety Reduction	Reduction in Average Annual Number of Collisions	
Note: I/D = Insufficient Data to predict reduction effect.		

Advantages

- Effective in reducing speeds
- Maintains rapid emergency response times
- Relatively easy for bicyclists to cross

Disadvantages

- Passenger vehicles with wide wheel base can pass through the lump using the wheel cut-outs
- Aesthetics
- Signs may be unwelcome by adjacent residents
- Increased noise for nearby residents

Speed Cushion

Speed cushions are constructed from durable recycled rubber and are a variation of the speed lump. These prefabricated devices consistently have a more uniform shape than asphalt humps. Speed cushions provide wheel gaps for emergency vehicles and buses, and can be arranged to fit any street width. They can also be easily relocated if needed.

The magnitude of speed reduction is dependent on the spacing of speed cushions between points that require drivers to slow (see page 56). On average, speed cushions achieve a 14 percent reduction in speeds.

Approximate Cost: \$4,500 - \$6,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-14%
Volume Reduction	Reduction in Average Daily Traffic	Comparable to Speed Lumps
Safety Reduction	Reduction in Average Annual Number of Collisions	
Source: City of Portland, Rubber Speed Bump Research, 1995.		

Advantages

- Provides a more consistent ride than asphalt humps
- Can be used as a temporary device during a testing phase
- Reduces impacts to emergency vehicles due to cut-outs
- Easily accommodates street resurfacing

Disadvantages

- Aesthetics
- Signs may be unwelcome by adjacent residents
- Increased noise for nearby residents

Speed Table

Speed tables are flat-topped speed humps approximately 22 feet long. They are typically long enough for the entire wheelbase of a passenger car to rest on top. Their long, flat fields, plus ramps that are more gently sloped than speed humps, give speed tables higher design speeds than humps, and, thus, may be more appropriate for streets with higher ambient speeds. Brick or other textured materials improve the appearance of speed tables, draw attention to them, and may enhance safety and speed reduction.

The magnitude of speed reduction is dependent on the spacing of speed tables between points that require drivers to slow (see page 56). On average, speed tables achieve an 18 percent reduction in speeds.

Approximate Cost: \$4,000 for basic treatment

Measured Effectiveness		
Speed Impacts	Reduction in 85th Percentile Speeds between Slow Points	-18%
Volume Impacts	Reduction in Vehicles per Day	-12%
Safety Impacts	Reduction in Average Annual Number of Collisions	-45%
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Smoother on large vehicles (such as fire trucks) than speed humps
- Effective in reducing speeds, though not to the extent of speed humps

Disadvantages

- Aesthetics
- Textured materials, if used, can be expensive
- Signs may be unwelcome by adjacent residents
- Increased noise for nearby residents

Raised Crosswalk

Raised crosswalks are speed tables striped with crosswalk markings and signage to channelize pedestrian crossings, providing pedestrians with a level street crossing. Also, by raising the level of the crossing, pedestrians are more visible to approaching motorists.

The magnitude of speed reduction is dependent on the spacing of raised crosswalks between points that require drivers to slow (see page 56). On average, raised crosswalks achieve an 18 percent reduction in speeds.

Approximate Cost: \$5,000 for basic treatment

Measured Effectiveness		
Speed Impacts	Reduction in 85th Percentile Speeds between Slow Points	-18%
Volume Impacts	Reduction in Vehicles per Day	-12%
Safety Impacts	Reduction in Average Annual Number of Collisions	-45%
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Improve safety for both vehicles and pedestrians
- Aesthetic upgrades can have positive aesthetic value
- Effective in reducing speeds, though not to the extent of speed humps

Disadvantages

- Textured materials, if used, can be expensive
- Impact to drainage needs to be considered
- Textured pavement can increase noise to adjacent residents
- Signs may be unwelcome by adjacent residents

Raised Intersection

Raised intersections are flat raised areas covering entire intersections, with ramps on all approaches. They usually rise to sidewalk level, or slightly below, to provide a “lip” for the visually impaired. By modifying the level of the intersection, the crosswalks are more readily perceived by motorists to be a pedestrian area. They are particularly useful where loss of on-street parking due to other traffic calming devices is considered unacceptable. Raised intersections are ineffective at reducing traffic speeds or volumes.

Approximate Cost: Varies based on size of intersection

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-1%
Volume Reduction	Reduction in Average Daily Traffic	I/D
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Can improve safety for pedestrians and motorists
- Aesthetic upgrades can have positive aesthetic value
- Can treat two streets at once

Disadvantages

- Less effective in reducing vehicle speeds than speed humps and speed tables
- Expensive, particularly as a retrofit
- Textured pavement can increase noise to adjacent residents

Textured/Colored Pavement

Textured colored pavement includes the use of stamped pavement (asphalt) or alternate paving materials to create an uneven surface for vehicles to traverse. Textured pavement may have limited effectiveness as a standalone device and should be used to supplement other devices such as raised crosswalks or center median islands. Little data has been collected to predict the reduction in speed, traffic volumes, or collisions, and use of this device may not result in significant decreases. Resources permitting, DES staff can collect before and after data to determine the effectiveness of textured pavement.

Approximate Cost: \$8.00 per square foot

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Reduction	Reduction in Average Daily Traffic	I/D
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		

Advantages

- Can reduce vehicle speeds
- Aesthetic upgrades can have positive value
- Placed at an intersection, it can slow two streets at once

Disadvantages

- Expensive, varying by materials used
- Can be uncomfortable for bicyclists or handicapped.
- Textured pavement can increase noise to adjacent properties

Rumble Strip

Rumble strips are closely spaced raised pavement markers at regular intervals on the roadway that create noise and vibration to the vehicle. Rumble strips can be used to warn drivers of a change in speed limit, leading up to a residential or school area, and upcoming stop sign or intersection. Rumble strips should be used only in areas where the noise impact would be minimal. Little data has been collected to predict the reduction in speed, traffic volumes, or collisions, and use of this device may not result in significant decreases. Resources permitting, DES staff can collect before and after data to determine the effectiveness of rumble strips.

Approximate Cost: \$500 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Reduction	Reduction in Average Daily Traffic	I/D
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		

Advantages

- Relatively inexpensive
- Can be effective in slowing travel speeds in specific locations

Disadvantages

- Raised pavement markers can be slippery when wet
- Increased noise in vicinity of rumble strips
- Maintenance of raised pavement markers
- Aesthetics
- Uncomfortable for motorcyclists and bicyclists

VOLUME CONTROL – DEVICES

Description

Diversion devices use raised islands and curb extensions to physically preclude particular vehicle movements, such as left-turn or through movements, usually at an intersection. These devices can be considered only after all other devices have been attempted and failed to resolve the traffic problem. The diversion devices in the toolbox include:

- Full Closure
- Partial Closure
- Diagonal Diverter
- Median Barrier
- Forced Turn Island
- Turn-Movement Restriction

Full Closure

Full street closures are barriers placed across a street to close the street completely to through traffic, usually leaving only sidewalks or bicycle paths open. The barriers may consist of landscaped islands, walls, gates, side-by-side bollards, or any other obstructions that leave an opening smaller than the width of a passenger car. Emergency vehicles can be accommodated via removable bollards or similar devices.

Approximate Cost: \$50,000 - \$100,000 per location (dependent on size and treatment)

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Reduction	Reduction in Vehicles per Day	-44%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Very effective in reducing cut-through traffic volumes
- Able to maintain pedestrian and bicycle connectivity

Disadvantages

- Requires statutory actions for public street closures
- Causes circuitous routes for local residents
- Diverts traffic to another street
- Delays for emergency services unless through access is provided
- May limit access to businesses
- Cost

Partial Closure

Half street closures are barriers that block travel in one direction for a short distance on otherwise two-way streets. Half closures are the most common volume control measure after full street closures. Half closures are often used in sets to make travel through neighborhoods with a grid street pattern circuitous rather than direct.

Approximate Cost: \$5,000 - \$7,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-19%
Volume Reduction	Reduction in Vehicles per Day	-42%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Able to maintain two-way bicycle access
- Effective in reducing traffic volumes

Disadvantages

- Causes circuitous routes for local residents
- May limit access to businesses
- Drivers can bypass the barrier

Diagonal Diverter

Diagonal diverters are barriers placed diagonally across an intersection, blocking through movement. Like half closures, diagonal diverters are usually staggered to create circuitous routes through neighborhoods.

Approximate Cost: \$20,000 - \$25,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	-4%
Volume Reduction	Reduction in Vehicles per Day	-35%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Able to maintain full pedestrian and bicycle access
- Reduces traffic volumes

Disadvantages

- Causes circuitous routes for local residents
- Delays for emergency services
- May be expensive
- May require reconstruction of corner curbs

Median Barrier

Median barriers are raised islands that are located along the centerline of a street and continue through an intersection so as to block through (and left-turn) movement at a cross street.

Approximate Cost: \$15,000 - \$20,000 per 100 feet (dependent on length and width)

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D%
Volume Reduction	Reduction in Vehicles per Day	-31%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Can improve safety at an intersection of a local street and a major street by prohibiting critical through or left-turn movements
- Can reduce traffic volumes on a cut-through route that crosses a major street

Disadvantages

- Requires available street width on the major street
- Limits turns to and from the side streets and driveways for local residents and emergency services

Forced-Turn Island

Forced turn islands are raised islands that prohibit certain movements on approaches to an intersection.

Approximate Cost: \$3,000 - \$5,000 per location

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D%
Volume Reduction	Reduction in Vehicles per Day	-31%
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		
Source: Traffic Calming: State of the Practice, 2000.		

Advantages

- Can improve safety at an intersection by prohibiting critical turning movements
- Reduces traffic volumes

Disadvantages

- If designed improperly, drivers can maneuver around the island to make an illegal movement
- May divert a traffic problem to a different street

Turn-Movement Restrictions

Turn movement restrictions involve the use of signs to prevent undesired turning movements without the use of physical devices. The restrictions may generally apply to turning movements in or out of a residential street to a larger street. The turn movement restrictions may be permanent or only during peak commute hours.

Measured Effectiveness		
Speed Reduction	Reduction in 85th Percentile Speeds between Slow Points	I/D
Volume Reduction	Reduction in Vehicles per Day	I/D
Safety Reduction	Reduction in Average Annual Number of Collisions	I/D
Note: I/D = Insufficient Data to predict reduction effect.		

Approximate Cost: \$150 per sign (enforcement may be necessary to be effective)

Advantages

- Can reduce cut-through traffic at specific times of day
- Can increase safety at an intersection by prohibiting certain turning movements
- Low cost

Disadvantages

- Restrictions apply to resident and non-residents
- Requires enforcement during time of restriction to be effective
- May divert a traffic problem to another street

4. TOOLBOX GUIDELINES

This section provides guidance on selecting the most appropriate neighborhood traffic management measure for a specific problem. This involves narrowing the toolbox of neighborhood traffic management measures to those that will most closely target the key traffic issue; are appropriate for the existing street characteristics; and are compatible with the traffic volumes, geometrics, and adjacent land uses near the given location. When the list has been narrowed, devices should be considered that are likely supported by affected residents. Finally, the selected devices need to be placed in a manner that will produce the desired results.

GUIDELINES

Step 1 – Identify Traffic Related Concern

The first task when selecting the most appropriate traffic calming device is to narrow the field of devices to those that address the primary traffic concern. The most common traffic related concerns are:

- Speeding – motor vehicle speeds are too high
- Traffic Volumes – motor vehicle usage levels (all trips or non-local trips only) are too high
- Safety – locations with higher occurrences of collisions, higher concentrations of bicyclists and pedestrians, or potential hazards (e.g., sight distance limitations)

Each device in the toolbox is appropriate to a different subset of the above traffic-related concerns. Table 1 summarizes the appropriateness of each device.

Non-Physical Measures

The first solutions to consider should be non-physical measures, such as signs and markings, since these can devices increase driver awareness, are relatively inexpensive, and are the least intrusive to residents.

Speed Control Measures

Speed control measures can address any of the major problem types:

- **Narrowing Measures** – Narrowing devices, such as neckdowns, center island narrowings, or chokers, are less obtrusive than other devices and can be more aesthetically pleasing if residents opt to fund upgraded landscaping and assume the maintenance cost and responsibilities.
- **Horizontal Measures** – Horizontal deflection devices, such as chicanes and traffic circles, are more intrusive but also more effective than narrowings because they force vehicles to navigate horizontally around physical objects. Residents can also elect to fund upgraded landscaping.
- **Vertical Measures** – Vertical deflection devices provide the greatest speed reduction, and consequently have the greatest potential to slow emergency response vehicles, buses, and trucks. Therefore, the placement of these devices should be carefully considered, especially to limit any potential impact on emergency vehicles or transit access.

Volume Control Measures

If speed-control measures fail to produce desired results, then diversion measures, such as street closures or forced turns may be considered. These devices redirect traffic to an adjacent street, and, therefore, should be considered after all other measures fail to produce the desired results. Volume control measures limit through traffic or turning movements at specific locations for both residents and non-residents. The full effect of the traffic diversion should be investigated before device implementation.

Step 2 – Identify Location Type

The appropriate device for a given problem is a function of the location (midblock or at an intersection). Special consideration will be given to streets used by the City of Salinas Fire Department or ambulance services as primary emergency response routes. Appendix D presents the City of Salinas Primary Fire Response routes with functional roadway classifications. Generally, traffic calming of emergency response routes is limited to non-physical treatments on major arterials; however, there are certain conditions for which traffic calming measures may be appropriate on emergency response routes classified as minor arterials and collectors.

Table 2 indicates the location(s) where each type of traffic calming measure is applicable.

Step 3 – Consider Street Classification, Location, and Other Constraints

The third step in determining the most appropriate device is to consider how each device is compatible with the street classification, traffic volumes, posted speeds, and special roadway users. Table 3 illustrates where each device is appropriate with certain constraints.

EFFECTIVENESS COMPARISON

When more than one traffic calming device is available, decision-makers should understand the levels of effectiveness for each device to better determine which device will have the greatest effect in meeting the specified objective(s). Table 4 summarizes the effectiveness data (including excluded devices) that have been compiled for each of the neighborhood traffic management measures in the toolbox. These data are averages and the actual effectiveness will vary based on site-specific circumstances, such as proximity to major roads and the availability of alternate routes.

PLACING THE NEIGHBORHOOD TRAFFIC MANAGEMENT MEASURES

Strategies for the specific placement of devices differ depending on whether the concern is speed-control, volume-control, or safety related. The placement of devices is described below.

Placing Speed-Control Measures

Where feasible, neighborhood traffic management measures should be spaced in such a way to achieve the following two design speeds:

- **Slow-Point 85th Percentile Design Speed:** the speed that 85 percent of vehicles are traveling less than, when they are crossing a neighborhood traffic management device; the target slow-point speed is defined as 5 mph below the posted speed limit.
- **Midpoint 85th Percentile Design Speed:** the speed that 85 percent of vehicles are traveling less than, when they are halfway between a traffic calming device or other roadway feature that requires

significant slowing (e.g., stop sign or curve). The target midpoint speed is defined as 5 mph above the posted speed limit.

Figure 3 illustrates how to estimate the midpoint speed.

Figure 3 Estimating Midpoint Speed

In mathematical terms, the following exponential function gives the relationship between midpoint speed and spacing of slow points:

$$85^{\text{th}}_{\text{midpoint (mph)}} = 85^{\text{th}}_{\text{slow point (mph)}} + (85^{\text{th}}_{\text{street (mph)}} - 85^{\text{th}}_{\text{slow point (mph)}}) * 0.56 * (1 - e^{-0.004 * \text{spacing (ft.)}})$$

where;

$85^{\text{th}}_{\text{midpoint}}$ = resulting 85th percentile speed at midpoint after treatment;

$85^{\text{th}}_{\text{slow point}}$ = estimated 85th percentile speed at the slow point after treatment;

$85^{\text{th}}_{\text{street}}$ = 85th percentile speed of street before treatment;

spacing = distance in feet between two devices.

When placing speed-control measures, use the above formula to test proposed spacings to determine whether the estimated midpoint speeds would meet the targeted midpoint speed.

Example (speed humps on street with starting speed of 32 mph):

Where spacing is 350 feet:

$$85^{\text{th}}_{\text{midpoint (mph)}} = 15 \text{ mph} + ((32 \text{ mph} - 15 \text{ mph}) * 0.56 * (1 - e^{-0.004 * 350 \text{ feet}}))$$

$$85^{\text{th}}_{\text{midpoint (mph)}} = \underline{22 \text{ mph}}$$

Where spacing is 750 feet:

$$85^{\text{th}}_{\text{midpoint (mph)}} = 15 \text{ mph} + ((32 \text{ mph} - 15 \text{ mph}) * 0.56 * (1 - e^{-0.004 * 750 \text{ feet}}))$$

$$85^{\text{th}}_{\text{midpoint (mph)}} = \underline{24 \text{ mph}}$$

The spacing of neighborhood traffic management measures directly affects the midpoint speeds: the farther apart they are, the higher the midpoint speed. In general, speed control measures placed 350 to 750 feet from another slow-point can result in speed reductions similar to those indicated in Table 4. Measures placed at intervals of less than 350 feet can become a nuisance to drivers, and measures placed greater than 750 feet apart decrease the ability to slow speeds to the target midpoint speed. In addition, vertical measures should be placed a minimum of 250 feet from an adjacent intersection.

Placing Volume-Control Measures

Neighborhood traffic management devices intended to divert traffic can be located either external or internal to the neighborhood.

- Gateway Measures – Volume-control measures placed at entrances or gateways to neighborhoods can be more effective in reducing volumes because drivers encounter these devices upon entering a neighborhood, which may deter future use. However, these measures can also cause local traffic to take more circuitous paths than internal measures would.
- Internal Measures – When placed within a neighborhood, measures have a less direct effect on non-local traffic. First-time attempts to travel through the neighborhood will occur more frequently, and drivers will seek alternative routes within the neighborhood. However, this type of placement can cause less of an inconvenience to local traffic.

Placing Safety Measures

The placement of safety-oriented neighborhood traffic management devices is dependent on the particulars of the traffic-related concern and on the characteristics of the selected neighborhood traffic management device. For example, if the traffic related concern involves pedestrian safety, then the solution – a raised crosswalk, for example – should be placed at a location where it is likely to be heavily used by pedestrians.

5. NEW DEVELOPMENT GUIDELINES

Proposed developments can benefit from neighborhood traffic management strategies. Developers can anticipate and prevent concerns about speeding and traffic volumes by reviewing neighborhood plans and proposing refinements to reduce or avoid future traffic-related concerns. In addition, neighborhood traffic management measures incorporated with project construction often receive greater acceptance than a retrofit approach. Traffic calming measures can be included as off-site mitigation measures for infill or redevelopment projects that are surrounded by existing developments that may be impacted by project traffic.

This information in this chapter is a tool for staff and project designers to identify potential problem areas and suggested remedies. Anticipating future problems and remedies is a subjective activity, not conducive to absolute standards. However, it may be appropriate to incorporate general language into City documents regarding the role of staff in identifying potential neighborhood traffic problems and suggesting remedies.

In most cases, staff and the developer's representatives should be able to identify mutually acceptable neighborhood traffic management features, which are then incorporated into the proposed plans. However, in some cases, staff may need to develop conditions-of-approval that can be discussed, modified, and/or approved by the relevant governing bodies.

SUGGESTED DEVELOPMENT REVIEW PROCESS

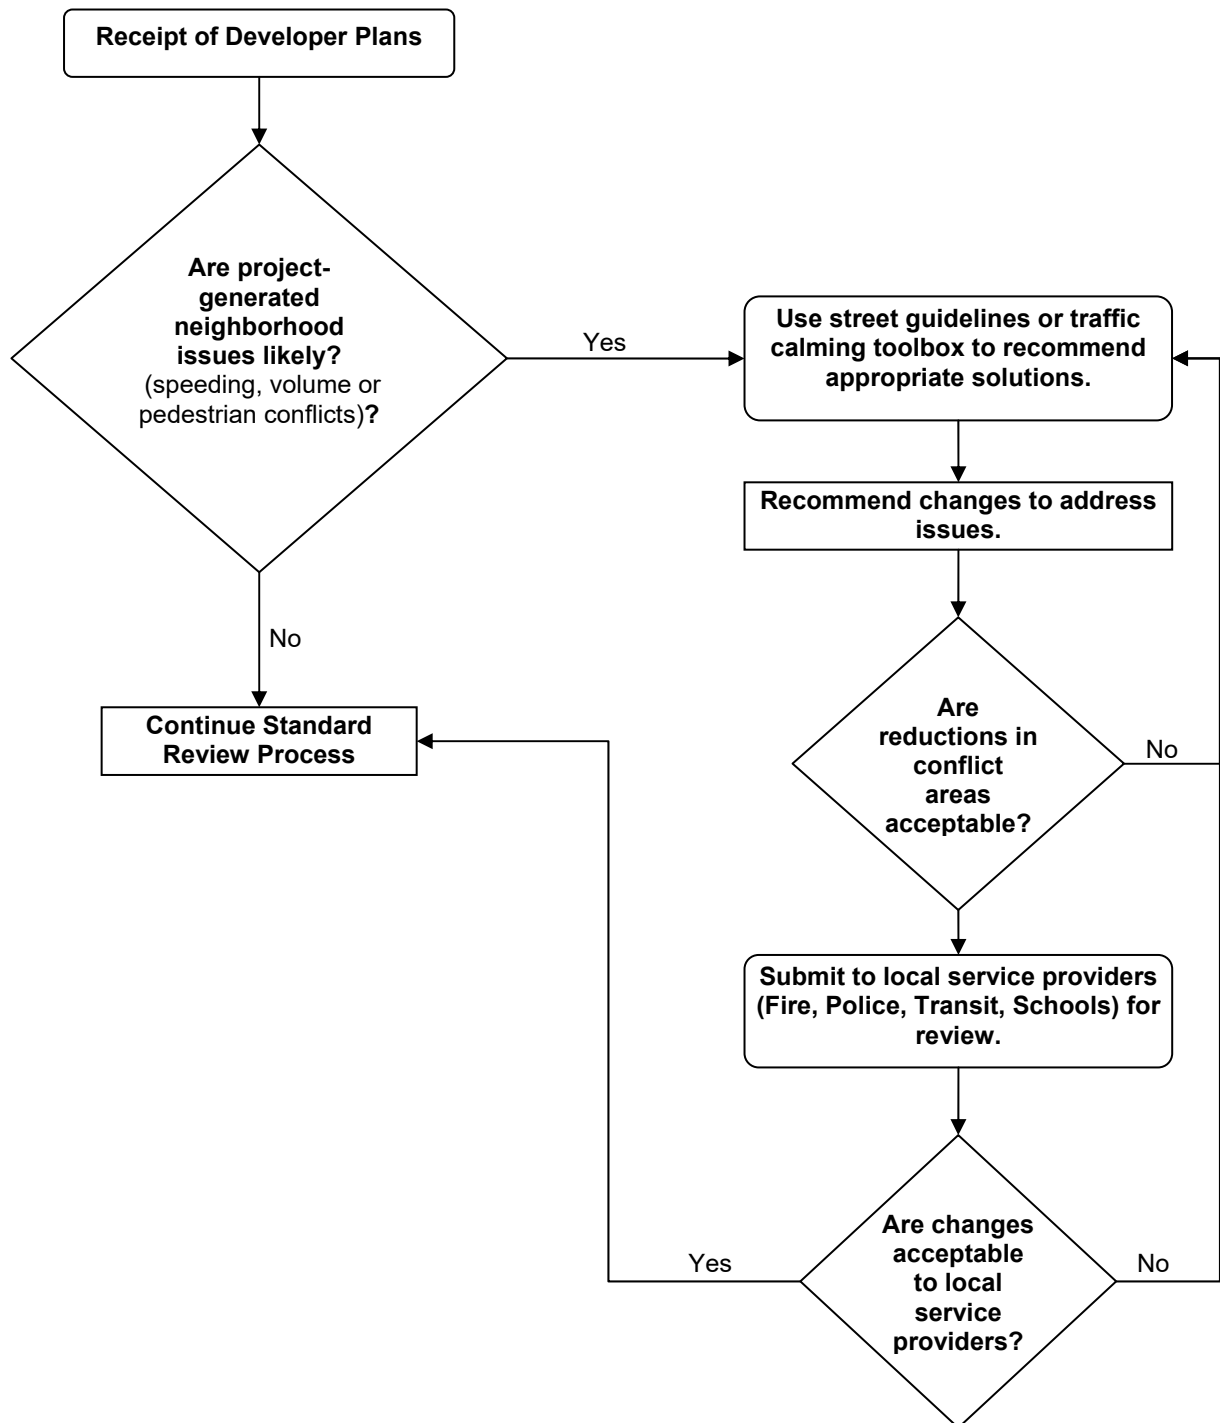

As part of the City of Salinas development review process, City staff may consider the need for neighborhood traffic management measures within the proposed development or off-site. New development and redevelopment projects may be required to design, build, and maintain traffic calming features as part of the development project through the subdivision improvement agreement, development agreement, homeowners' association, and other development-related mechanisms.

The City's process of reviewing new residential subdivisions varies and is dependent on the decision type. Information contained in the development application determines the permit type and subsequent process. Although the processes differ, they all require staff review after the submission of the plans. At this point, City staff may recommend or condition the inclusion of traffic calming measures.

The toolbox and application guidelines contained in other sections of this document should provide staff and developer representatives with both ideas and guidance on selecting the most appropriate treatments for the identified problem.

The following flowchart is a suggested approach for City staff during the development review process.

Figure 4 New Development Review Process

DEVELOPMENT REVIEW PRACTICES

During the development review process, staff should review the street network and intersection traffic controls to determine areas of potential speeding, excessive volume on residential streets, or pedestrian conflict areas. Where appropriate, developers should be required to incorporate traffic calming measures into their development plan. The process for reviewing street and lot plans for new developments and prescribing refinements may include the following, at staff discretion:

- **Traffic Volumes** – Estimate the average daily traffic (ADT) on residential roadways within and surrounding the proposed project.
 - If traffic volumes on residential streets are projected to be less than 1,500 vehicles per day (vpd), then no action is needed, nor will it be taken.
 - If the projected traffic volume on a residential street is 1,500 - 3,000 vpd, then consider traffic calming treatments depending upon the context (such as area history, resident expectations, or magnitude of change).
 - For projected volumes of above 3,000 vpd on a residential street, consider as a priority incorporate traffic calming measures to lessen the impact.
- **Traffic Speeds** – Identify potential speeding concerns on new streets and adjacent existing streets. Potential problem areas may include:
 - Streets with unimpeded block lengths (i.e. slow points) greater than 600 feet between traffic control or traffic calming devices, or as determined by staff.
 - Areas where roadway grades may increase the potential for speeding, as determined by staff.
 - Areas with potential pedestrian/vehicle conflicts, such as schools, parks, or community centers.
 - Areas with design attributes that encourage speeding, such as wide travel lane width, absence of on-street parking lane, absence of a bike lane, and long block lengths.
- **Street Layout** – Staff may request street design and layout modifications if an area is likely to experience cut-through traffic.
- **Adjacent Neighborhoods** – Consider traffic calming measures in new developments where adjacent neighborhoods include traffic calming, as determined by staff.
- **Traffic Calming Plan** – Based on the size and nature of the proposed development, staff will determine if a traffic calming plan is necessary. As described above, a traffic calming plan should be developed when the proposed street layout cannot be modified in such a way that will eliminate foreseeable traffic problems. The applicant's representative should develop the traffic calming plan with DES oversight.

DESIGNING STREET NETWORKS

Neighborhood traffic management measures have traditionally been installed as retrofit measures in existing neighborhoods in response to a particular traffic concern. The guidelines below describe some common street design features and their propensity to lead to neighborhood traffic management concerns such as speeding and cut-through traffic. The guidelines should assist developers in laying out streets in new residential developments and staff in reviewing them pursuant to the process described above. This chapter

is by no means comprehensive on the layout of new residential streets. For detailed information on street design and layout, refer to the following City of Salinas documents:

- City of Salinas General Plan, September 2002
- City of Salinas City Code – Section 31-804.5, November 2006
- Standard Specifications, Design Standards, and Standard Plans – Standard Plan No. 3, 2004

The following documents provide supplemental readings on the subject of designing residential streets. These are guidance documents only:

- *Residential Street Design and Traffic Control*, Homburger, Deakin, Bosselmann, Smith, and Beukers (Institute of Transportation Engineers), 1989
- *Residential Streets*, 3rd Edition, American Society of Civil Engineers, Institute of Transportation Engineers, National Association of Home Builders, and the Urban Land Institute, 2001
- *Traditional Neighborhood Development: Street Design Guidelines*, Institute of Transportation Engineers, 1999

DESIGNING FOR APPROPRIATE SPEEDS

The design of residential streets can often influence vehicles speeds. Residential streets that are wide, long, straight, and have few uninterrupted blocks have been shown to have a positive correlation to higher vehicle speeds. To minimize vehicle speeds, consider the following attributes when designing residential streets:

- **Travel Lane Width** – Current City standards for street width varies depending on the adjacent land use, and presence of on-street parking. Figures C-1 through C-4 of the Salinas General Plan specify standard cross-sections for new and existing streets. Provisions for on-street parking are also provided within these standards. Figure 5 shows a positive correlation between pavement width and increased traffic speeds.³

New streets should not exceed the current City standards. However, if additional width is provided in anticipation of high on-street parking demand, the roadway should be treated with appropriately spaced chokers, center median islands or other neighborhood traffic calming devices.

- **Block Length** – Some street networks leave excessively long blocks with few side street intersections. Drivers who travel distances 600 feet or greater, as illustrated in the chart below, without being required to slow or stop by traffic control or neighborhood traffic management devices, tend to travel at speeds higher than the posted limit. To minimize this effect, the street network can be designed such that street blocks are frequently interrupted by streets of sufficient traffic volumes to warrant a traffic control device (e.g., stop sign) or a traffic calming device. Shorter block lengths also facilitate pedestrian movement throughout the neighborhood. The chart shows the correlation between unimpeded block length and travel speed.

Acceptable block lengths for urban local streets should not exceed 600-800 feet, while urban collector street block lengths should not exceed 1,000 feet.

³ Ballard, Andrew J. and Haldeman, David M. "Low Speed Design Criteria for Residential Streets." *ITE Journal* December 2002: 44-46.

- **Parking Lanes** – In circumstances where adjacent land uses generate low on-street parking demand (such as large-lot subdivisions or collectors without fronting uses) the street can function as if it were wider than intended. If the parking demand can be accommodated elsewhere, the parking lanes should be eliminated or restricted to one side of the street and the street width reduced accordingly.

Figure 5 Correlation Between Pavement Width, Unimpeded Street Length and Speed

DESIGNING FOR LOCAL TRAFFIC

Some residential collector streets can become cut-through routes, or routes used by non-local motorists as a means of bypassing congested or circuitous arterial roads. In these cases, the residential collector should be modified in one of two ways:

- The collector can be designed with a deviating path so that the overall distance by collector is greater than the distance by arterial.
- The residential roadway network can be designed such that traffic-controlled intersections interrupt the parallel collector route sufficiently that the travel time by collector is greater than the travel time by arterial.

PEDESTRIAN/VEHICLE CONFLICT AREAS

Some elements of residential areas, such as schools, parks, community centers, or other high pedestrian generators, have particularly high potential for vehicle and pedestrian conflicts. The major pedestrian routes to school should be identified and traffic controls should be structured so that the number of crossings at uncontrolled cross-streets is minimized and pedestrians are directed to the most appropriate crossing locations. For both schools and parks, entrances tend to focus pedestrian street crossings at particular locations. These entrances can be made safer by combining them with roadway intersections, so that the intersection's traffic control can also allocate right-of-way to pedestrians.

If a pedestrian-oriented land use is located in an area where speeding or high traffic volumes are unavoidable, then select neighborhood traffic management measures that accommodate and provide benefit to pedestrians. For example, at an intersection, bulbouts or center island narrowings should be given some preference over other measures, such as intersection realignment or speed humps. While a realigned intersection or speed hump may slow traffic in the area, a bulbout or center island narrowing assists

pedestrians by creating a shorter crossing distance and physical roadway narrowing, thereby reducing driver speed.

DEVELOPING A NEIGHBORHOOD TRAFFIC MANAGEMENT PLAN

When a proposed street layout cannot be modified in such a way that will eliminate foreseeable potential traffic problems, the City should require preparation of a neighborhood traffic management plan (NTMP). Follow the procedure for developing an NTMP as described in the Toolbox Chapter, with the following exceptions:

- For speed-related problems, existing travel speed data will not be available. Consequently, a response to anticipated speeding problems must rely on roadway geometry. For example, if a block length is greater than 600 feet, then the developer could use neighborhood traffic management measures to divide the block into segments that are each shorter than 600 feet.
- For volume-related problems, traffic volume data will be available only in the form of traffic forecasts, and these will typically be limited to the major roads. The City or developer may need to prepare manual traffic volume estimates using land use quantities and trip generation rates for the proposed development.
- Anticipated safety problems will likely revolve around land uses that generate pedestrian activity, such as schools, parks, and community centers. For these land uses, consider the planned locations of walkways, gates, and building entrances when placing neighborhood traffic management devices (such as raised crosswalks or bulb-outs). Likewise, land use planning should consider existing and future traffic safety features.
- For some neighborhood traffic management measures, particularly those involving modified curbs, the developer can achieve significant cost-savings by constructing them concurrent with roadway construction. Consequently, when selecting a type of neighborhood traffic management measure, additional preference should be given to measures that take advantage of these cost-savings.

APPENDIX A – DESIGN GUIDELINES

This section describes the guiding design principles relating to various physical traffic calming devices. The design guidelines are based on recommended designs published in *Traffic Calming State-of-the Practice*⁴ and *Canadian Guide to Traffic Calming*⁵. Appendix B contains standard engineering design templates for the most common traffic calming devices.

SPEED CONTROL – VERTICAL MEASURES

Ramp Profiles

Ramp profile describes the angle or approach of the vertical measure that a vehicle would traverse. Vertical measures (e.g., speed humps) should use Parabolic profiles on the approach and departure ramps to the device. Parabolic profiles have consistently been used in other programs around the nation and are a recommended design according to Institute of Transportation Engineers: *Guidelines for the Design & Application of Speed Humps* (ITE, 1993). Figure A-1 shows three commonly used profiles, and a description of each follows below:

- Sinusoidal profiles have slightly less reduction effects on speed than circular and parabolic profiles but higher comfort levels for vehicles and bicyclists and are typically more difficult and expensive to construct due to the slope of the profile.
- Circular profiles have moderate reduction effects on speeds (compared to the two other profiles) and comfort levels for vehicles and bicyclists.
- Parabolic profiles have the greatest reduction effects on speeds but have the lowest comfort levels for vehicles and bicyclists due to the greater rise in the slope of the profile.

Figure A-1 Vertical Measure Ramp Profiles

⁴ Ewing, R. (1999). *Traffic Calming: State of the Practice*. Washington, DC: Institute of Transportation Engineers/Federal Highway Administration.

⁵ *Canadian Guide to Neighbourhood Traffic Calming*, (1998) Ottawa, Canada: Transportation Association of Canada.

Edge Tapers

The edge taper refers to the transition area between a vertical measure at its full height and the edge of the device. Edge tapers on vertical measures (e.g., speed humps and excluding raised crosswalks) should extend to the edge of the pavement (i.e., not into the gutter) to prevent blocking the gutter drainage.

On streets without vertical curbs, the edge taper should extend the full length of the pavement width to discourage drivers from straddling or driving around the vertical measure. In addition, an advisory sign (or other barrier) should be placed on either approach of the vertical device to prevent drivers from driving around the device.

Example: Bollards and advisory sign encourage drivers to travel over speed hump.

Edge Tapers – Parking and Bikeways

Vertical devices should extend across any parking or bike lane to prevent drivers from veering into the bike lane. Consequently, bicyclists will traverse the even section (as opposed to the tapered portion) of the device. In addition, vehicles parking on the street will have the option to park on a portion of the device or avoid the device entirely.

Example: Speed lump extends to the edge of pavement across bike lane.

Raised Crosswalk Tapers

Raised crosswalks should always be designed to a height equal to the curb height, but not fully extend to the curb, as this will impede drainage. To bridge the gap between the sidewalk and raised crosswalk, a metal connector plate or other approved device may be used to allow unimpeded flow of the gutter. The design should also include truncated dome plates to indicate the entrance to the crosswalk from the sidewalk. Raised crosswalks may not be appropriate where curbs do not exist.

Example: Unimpeded drainage.

HORIZONTAL DEFLECTION MEASURES

Traffic Circle Center Island Profile

Traffic circles should be designed with both a vertical inner curb and a mountable apron. The vertical inner curb prevents vehicles from driving over the circle. The apron is a shallow-sloped curb extending out from the bottom of a vertical curb; the apron has a low lip at its pavement-side edge. This apron effectively reduces the diameter of the center island for large vehicles, facilitating easier turns. The lip at the apron's edge discourages vehicles from using it unnecessarily.

Example: Vertical inner curb and mountable apron.

Traffic Circle Turn Operations

All vehicles should circulate around the center island on left-turns. However, an exception can be made for large trucks and buses in some cases if geometric constraints require it. If a specific intersection has a high proportion of trucks and/or bus traffic, alternative treatments may provide similar results without impact to trucks or busses. All traffic circles should be designed using the appropriate truck turning templates from Caltrans Highway Design Manual (Caltrans, 2006). Software packages such as AutoCAD or AutoTURN may also be used to identify whether emergency response vehicles and buses can maneuver around the circle.

Example: Truck turning radius using mountable apron.

Traffic Circles at T-Intersections

Traffic circles should have deflection on all approaches if implemented at a T-intersection. This can be implemented in both existing neighborhoods in retrofit situations and in new neighborhood. First, a raised island can be placed at the right side of the un-deflected approach to the traffic circle to artificially introduce deflection, as shown in Figure A-2 (a). In new neighborhoods, the street curbs can be modified to allow the center island to be located at the center of the intersection, as shown in Figure A-2 (b).

Figure A-2 Traffic circles at T-Intersections

NARROWING MEASURES

Drainage

Narrowing measures, such as chokers, should be constructed to minimize or avoid blocking gutter flow, as illustrated in the photo. Modifying the drainage can be cost prohibitive and could require regular maintenance to clear debris from the modified gutter.

Example: Retrofit design with unimpeded drainage.

Neckdowns/Bulbouts

Narrowing measures, such as neckdowns or chokers, should not be constructed wider than the approximate width of a parked vehicle. Extension of these devices any further than the width of a parked vehicle could present potential safety issues to other drivers.

LANDSCAPING

Example: Neckdown at intersection.

The standard treatment for all neighborhood traffic management devices will be hardscape (i.e., grouted cobblestone). Residents may fund aesthetic upgrades to neighborhood traffic calming devices such as landscaping or stamped and colored concrete (i.e., simulated brick work). Aesthetics upgrades not only improve the aesthetic quality of the device but increase the visual presence of the device. Landscaping should be limited to low-lying shrubs and plants. Trees planted on center islands must allow adequate sight distances for motorists.

Example: Standard treatment

Example: Upgraded aesthetics

SIGNAGE AND STRIPING

Signage

Signage should be provided at or near traffic calming devices advising motorists of the device. Signage should be visible to both motorists and bicyclists. The signs should be comprised mostly of symbols and be easily understandable to motorists. Figure A-3 illustrates examples of several common warning signs.

The warning sign for a traffic circle or roundabout shown on Figure A-3 should be the standard used at such intersections. The warning sign is clear and concise, showing drivers the route around and turning options of the upcoming traffic circle or roundabout.

Special signing specific to bicyclists may be used as determined by Public Works staff. Examples of this signing include advising motorists not to pass bicyclists through narrow traffic calming devices or informing bicyclists of proper maneuvering of devices. This signage should be used when the travel rights of bicyclists warrant emphasis.

Striping

Pavement markings assist in warning motorists and bicyclists of traffic calming devices in the roadway. Vertical devices should always include pavement markings on the device and may also include advanced warning legends (see Figure C-6). In certain situations, vertical devices may be unmarked, such as revitalization or beautification plans in a given area. In such cases, the device must be designed to provide a clear contrast with the surrounding environment.

The example image to the right illustrates the preferred striping option for vertical devices, such as speed humps. This marking option is compliant with the Manual on Uniform Traffic Control Devices (FHWA, 2003).

Example: Recommended striping.

COMBINED MEASURES

Some measures from the toolbox can be combined to increase the combined effect on traffic volumes and speeds. For example, a raised crosswalk may be combined with neckdowns, the effect being a crosswalk that is both shortened and raised above the level of the roadway. Motorists must then react to both a vertical deflection and a narrowing. In assessing the suitability of combined measures, the guidelines in Tables 1, 2, and 3 should be applied for both devices.

APPENDIX C – CITY OF SALINAS PEDESTRIAN SAFETY ENHANCEMENT DEVICES POLICY

For reference, this appendix presents the City of Salinas Pedestrian Safety Enhancement Devices Policy near schools.

The City of Salinas Pedestrian Safety Enhancement Devices Policy

Policy adopted on _____. Resolution No. _____

The Manual of Uniform Traffic Control Devices states that “...uniformity means treating similar situations in a similar way. The use of uniform traffic control devices does not, in itself, constitute uniformity. A standard device used where it is not appropriate is as objectionable as a nonstandard device; in fact, this may be worse, because such misuse might result in disrespect at those locations where the device is needed and appropriate.”

To be consistent with appropriate use of traffic control devices and in response to increasing requests for traffic safety enhancements at school locations, the City has approved policy with criteria for when to install Pedestrian Safety Enhancements on City Streets. More specifically, this policy restricts the installation of these enhancements to specific locations at school zones only. The specific safety enhancement installations that are governed by this policy are:

- 1) High visibility crosswalks with an integrated Pedestrian LOOK pavement/sidewalk marking,
- 2) In-Street Pedestrian Crossing Sign

The City of Salinas is committed to the installation of the appropriate and the required traffic control devices on City Streets, including locations along school zones. However, the effectiveness of these and any traffic control device requires an appropriate amount of enforcement for violators of the control devices and appropriate education for users of these devices (motorists, pedestrians and bicyclists). Without appropriate enforcement and education, any installation of traffic control devices will not be as effective.

In response to budget constraints that prevent more frequent enforcement of traffic control devices at school zones, the City will consider the installation of traffic safety enhancements at school zones. This policy will provide the criteria for the use of a High Visibility Crosswalk and an integrated Pedestrian “LOOK” sign at school zones and the In-Street Pedestrian Crossing Sign. These enhancements supports pedestrian crossings at school zones.

- I. **Application.** In order to receive consideration under this policy, an applicant must submit a written request to the **City of Salinas Development and Engineering Services Department, ATTN: Traffic Section, 200 Lincoln Avenue, Salinas, California 93901**. A letter from the School and the School District must accompany the request stating the school’s and the district’s concurrence with the request.

- II. **Consideration.** Effective on the adoption of this policy, requests for High Visibility Crosswalks and the integrated Pedestrian LOOK Sign shall be subject to the following criteria:
1. School Zone Criteria. Said Pedestrian Safety Enhancement Devices will be located at an existing school crosswalk adjacent to the school property, and along the suggested route to school; and
 2. No installations at Controlled Intersections. Said Pedestrian Safety Enhancement Devices shall not be installed at intersections where ALL WAY STOPS or a Traffic Signal is already present; and
 3. Installation only on two lane streets. Said Pedestrian Safety Enhancement Devices shall only be installed on two-lane streets. (Existing studies support installation on two-lane streets but results are mixed on multi-lane streets. It is not clear if these crosswalks increase yielding of motor vehicles to pedestrians on multi-lane streets); and
 4. School Pedestrian Warrant.
 - a) At least 40 school pedestrians are crossing the uncontrolled street during each of any two hours (not necessarily consecutive) of a normal school day; and
 - b) The vehicle volume through the crossing exceeds 500 vehicles per hour during the same hour the students are going to and/or from school during normal school hours; or
 - c) The number of pedestrians that are crossing the uncontrolled street in 4.a multiplied by the vehicle volume through the crossing during the same hour students are going to and/or from school during normal school hours exceeds 32,000.

This Policy provides a technically-based and uniform process for the recommendation of the above Pedestrian Safety Enhancements. However, each location requested for high visibility crosswalk will have its unique characteristics that may not be addressed by these criteria. Other criteria that may have to be considered include unique street configuration, sight visibility requirements, other heavy uses of the street that are not school related, and other equally important considerations.

The decision to use a particular traffic control device at a particular location should be made on the basis of either an engineering study or the application of engineering judgment. Thus while the MUTCD, the California Supplement or this Policy provides standards, guidance or options for design and application of a traffic control device, the MUTCD, California Supplement or this Policy should not be considered a substitute for sound engineering judgment.

At the City Engineer's discretion, traffic studies may be conducted to examine other considerations not part of this Policy's criteria. Results of these studies may become the basis to support or oppose recommendation resulting from previously considered criteria.

- III. **Commission Consideration** City staff will bring its recommendation to the Traffic and Transportation Commission (T&TC). The meeting of the T&TC provides a public forum for the applicant or any impacted party to support or protest City staff's recommendation. The Traffic and Transportation Commission may recommend approval or denial of the applicant's request based on the criteria above for these Pedestrian Safety Enhancement Devices.
- IV. **Council Consideration.** The City Council makes the final decision regarding the request for a school high visibility crosswalk. The meeting of the City Council provides another public forum to appeal decisions of the T&TC made following the application of this policy.

2023-2024 Prioritization of Restriping Projects

Approve a Resolution approving the 2023-2024 Prioritization of Restriping Projects.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS DEPARTMENT

FROM: DAVID JACOBS P.E., L.S., PUBLIC WORKS DIRECTOR

BY: ANDREW EASTERLING, TRAFFIC ENGINEER

TITLE: 2023-2024 PRIORITIZATION OF RESTRIPIING PROJECTS

RECOMMENDED MOTION:

A motion to approve the 2023-2024 Prioritization of Restriping Projects.

EXECUTIVE SUMMARY:

Several service requests to restripe roads have been received from Salinas residents. The number of requests exceed the City's budgeted resources, and there is therefore a need to prioritize restriping requests. Staff has developed a prioritization of the requested streets. The Council is requested to review and provide feedback on the proposed 2023-2024 Prioritization of Restriping Projects. Staff recommends the approval of the 2023-2024 Prioritization of Restriping Projects. The Council may choose to recommend changes to the Prioritization of Restriping Projects.

BACKGROUND:

Most thermoplastic pavement markings have an upper limit life expectancy of (six) 6 to (nine) 9 years depending on weather and traffic conditions. Historically, the City replaced pavement markings whenever a road was resurfaced, which traditionally occurred at a similar frequency. However, the City has not been able to perform pavement maintenance on all of its streets within this time frame and some streets now have faded pavement markings. The City has received several requests to restripe roads and the number of requests exceeds the City's budgeted resources. There is therefore a need to prioritize restriping requests.

The City's street maintenance crews can perform minor restriping work, but for larger projects the City cannot restripe entire streets using its own work forces and must contract the work out. On October 22, 2019, the City awarded an On-Call Services for Traffic Control Devices Contract to Chrisp Company via Resolution No. 21722. Unit prices for restriping work were competitively bid and using this contract the estimated cost to restripe a road can vary between roughly \$6 to \$28 per linear feet (LF) depending on the number of lanes and legends on any given roadway.

As of December 31, 2022, numerous restriping requests have been submitted to the City. Two segments were screened out where pavement work was planned, including East Romie Lane and

Boronda Road, and of the remaining service requests sixteen (16) road segments were requested for restriping and do not have any planned pavement work. Based on the On-Call Services Contract pricing, staff estimates the total costs to restripe all sixteen (16) of these facilities is roughly \$715,000.00. The City's anticipated restriping budget (CIP 9081-66.4000) for FY 23-24 is \$200,000, including soft costs. Staff estimates the City can restripe at least five (5) segments within the anticipated budget depending on the length and complexity of the individual restriping projects. Additionally, staff recommends retaining roughly \$30,000 in the account, which will provide resources to respond to smaller service requests, such as crosswalks, through the end of the fiscal year.

The City has no established prioritization policy for restriping projects and staff is recommending that the 2023-2024 Prioritization of Restriping Projects are based on staffs' opinion of needs and budgetary constraints. On small two-lane, two-way roads centerlines are not always required by the Manual on Uniform Traffic Control Devices (MUTCD), the City's standard for pavement markings. The City previously installed centerlines on Maple Street, Rider Avenue, and Schilling Place, however these roads do not require centerline markings based on the MUTCD. Consequently, with a finite amount of funding and a growing list of roads which need to be restriped, staff is recommending these roads be prioritized last.

Table 1: 2023-2024 Prioritization of Restriping Projects

Recommended Priority Ranking	Segment	Limits	Length (LF)	Total Estimate	Notes
1	Independence Boulevard	E Boronda Road to Nantucket Boulevard	1,875	\$51,243.79	Original request stated in front of school
2	East Market Street	Front Street to Sherwood Drive	2,549	\$30,068.86	3 service requests
3	West Romie Lane	South Main Street to Padre Drive	1,071	\$19,135.55	
4	Terven Avenue	Sanborn Place to Airport Boulevard	2,064	\$10,068.48	
5	Riker Street at Clay Street	Intersection approaches	N/A	\$7,422.00	Original request is about intersection
6	West Rossi Street	South Davis Road to South Main Street	1,071	\$135,670.32	
7	Harkins Road	Hansen Street to Southernly City Limits	7,550	\$96,394.68	
8	El Dorado Drive	Harden Parkway to Mendocino Drive	4,074	\$64,582.62	Original request between Calaveras and Mendocino
9	North Main Street	Boronda Road to Russell Road	4,690	\$155,919.54	
10	Williams Road	Old Stage Road to East Boronda Road	3,117	\$30,484.92	
11	Old Stage Road	Williams Road to 900 Block	7,632	\$40,354.08	
12	East Alisal Street	Griffin Street to Work Street	17,160	\$33,615.42	Original request is about faded bike lane
13	Schilling Place	Harkins Road to Eden Street	2,970	\$10,479.60	Original request is WB approach. The centerline is not warranted per MUTCD
14	Towt Street	East Alisal Street to East Market Street	1,609	\$12,846.36	
15	Rider Avenue	Del Monte Avenue to Mimbrera Way	1,550	\$9,326.64	Centerline is not warranted per MUTCD
16	Maple Street	South Main Street to Pajaro Street	3,156	\$7,698.67	Parking tees and centerline are not warranted per MUTCD
Subtotal (1-5)				\$117,938.68	
Estimated Remaining Balances (Reserves)				\$32,061.32	
Subtotal (6-16)				\$597,372.85	
Total Requests				\$715,311.53

*ADT approximated from peak hour count, and K=0.10

Staff recommends retaining roughly \$30,000 in the CIP account to be able to respond to smaller service requests, such as crosswalks, through the end of the fiscal year. Once the allotted budget has been depleted, the backlogged restriping service requests will be held until resources become available or until the next re-prioritization recommendation.

TRAFFIC AND TRANSPORTATION COMMISSION:

The 2023-24 Prioritization of Restriping Projects was presented to the Traffic and Transportation Commission at its May 11, 2023 meeting. The Commission voted (3-3) on an alternative motion to recommend staff evaluate and measure restriping needs for every City street and provide a full report to the Commission.

There is not a well establish engineering method for measuring restriping needs, however there are several recognized methods for measuring pavement markings' retro-reflectivity. These techniques can be timing consuming and cost prohibitive. The City has nearly 300 centerline miles of roads to maintain, and with a relatively small restriping budget, the estimated cost for surveying City streets would exceed the annual budget and leave no funding available for actual restriping work. Therefore, staff recommends the 2023-24 Prioritization of Restriping Projects based on the service requests received from residents, without a City-wide retro-reflectivity survey. Staff notes that the pavement condition index (PCI) score provides a measurement for the pavement condition and therefor the PCI score may provide some indication of striping conditions.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

The 2023-2024 Prioritization of Restriping Projects supports the Council's goals of "Infrastructure and Environmental Sustainability" and "Public Safety".

DEPARTMENTAL COORDINATION:

The Public Works Department and Finance Department manage the project accounting. The Public Works Department manages construction contract, inspection, and final acceptance of construction projects.

FISCAL AND SUSTAINABILITY IMPACT:

There is no impact to the General Fund. The City's anticipated restriping budget, CIP Account 5800.50.9081-66.4000 is anticipated for \$200,000, leaving approximately \$150,000 for restriping work for fiscal year 2023-2024. The CIP account is funded using SB1 Maintenance and Rehab funds. The 2023-2024 Prioritization of Restriping Projects establishes the priority ranking of projects. Once the first projects are completed and final costs are known, and if remaining resources are available, staff will work on the next highest scoring project until the budget is depleted. If the next highest priority project cannot be completed with remaining funds, but lower priority projects can be completed within the remaining budget, staff recommends treating the lower priority project in order to maximize the use of available funds.

Resolution

Attachment 1: Current Conditions Photos

RESOLUTION No. _____ (N.C.S.)

A RESOLUTION TO APPROVE THE 2023-2024 PRIORITIZATION OF RESTRIPING PROJECTS

WHEREAS, several service requests to restripe roads have been received from Salinas residents; and

WHEREAS, the number of requests exceed the City's budgeted resources, and there is therefore a need to prioritize restriping requests; and

WHEREAS, the Council is requested to review and provide feedback on the proposed 2023-2024 Prioritization of Restriping Projects; and

WHEREAS, the Traffic and Transportation Commission voted (3-3) on an alternative motion to recommend staff evaluate and measure restriping needs for every City street and provide a full report to the Commission; and

WHEREAS, staff recommends the 2023-24 Prioritization of Restriping Projects based on the service requests received from residents, without a City-wide retro-reflectivity survey; and

WHEREAS, the Council may choose to recommend changes to the Prioritization of Restriping Projects; and

WHEREAS, the City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

NOW, THEREFORE, BE IT RESOLVED BY THE SALINAS CITY COUNCIL approves the 2023-2024 Prioritization of Restriping Projects.

City Hall Emergency Roof Repair, Project No. 8170

Approve a Resolution approving Contract Change Order No. 1 to F C & Sons Roofing, Inc. for the City Hall Emergency Roof Repair, Project No. 8170 in the amount of \$412,031.00 plus an additional 20% for construction contingency in the amount of \$129,254.20; authorize the City Manager to execute all necessary documents; and authorize expenditure cost for all professional emergency moving, Information Technology changes and unforeseen moving/transition expenses in an amount not to exceed \$100,000.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: PUBLIC WORKS DEPARTMENT

FROM: DAVID JACOBS, P.E., L.S., PUBLIC WORKS DIRECTOR

BY: ADRIANA ROBLES, PE, CFM, CITY ENGINEER
JONATHAN ESTEBAN, ASSISTANT ENGINEER

TITLE: CITY HALL EMERGENCY ROOF REPAIR, PROJECT NO. 8170

RECOMMENDED MOTION:

A motion to approve a Resolution to:

- 1) Approve Contract Change Order No. 1 to F C & Sons Roofing, Inc. for the City Hall Emergency Roof Repair, Project No. 8170 In the amount of \$412,031.00 and authorize the City Manager to execute all necessary documents related to Contract Change Order No. 1; and
- 2) Authorize 20% of the new contract amount for construction contingencies (\$211,660.40) for the City Hall Emergency Roof Repair, Project No. 8170; and
- 3) Authorize expenditure cost for all professional emergency moving, Information Technology changes and unforeseen moving/transition expenses relating to the Emergency Roof Project in an amount not to exceed \$100,000.

EXECUTIVE SUMMARY:

On April 4, 2023, City Council approved Resolution No. 22627 awarding an emergency construction contract to F C & Sons Roofing, Inc. for the City Hall Emergency Roof Repair, Project No. 8170 in the amount of \$646,271.00. Following the execution of the agreement and during the pre-construction phase, the Contractor discovered that the existing asbestos-containing fireproofing spray below the roof deck was friable and would be disturbed during emergency roof repair activities, creating a potential hazard to staff below the first-floor roof. The Contractor recommended for the asbestos fireproofing located above the first floor of City Hall be abated prior to construction activities. Contract Change Order No. 1 for the abatement of asbestos within City Hall in the amount of \$412,031.00 is above the authorized 15% construction contingency of \$96,941.00 and requires Council approval, per Policy 75-1.

BACKGROUND:

On April 4, 2023, City Council approved Resolution No. 22627 awarding an emergency construction contract to F C & Sons Roofing, Inc. for the City Hall Emergency Roof Repair, Project No. 8170 in the amount of \$646,271.00.

The contract was awarded to resolve the immediate need for repair of roof leaks causing damage to staff and equipment within City Hall. It was intended to move forward prior to abatement and other building improvements. However, following contract execution and during pre-construction project discussions, the Contractor discovered that the existing asbestos-containing fireproofing material below the roof deck was friable and would be disturbed during emergency roof repair activities, creating a potential hazard to staff below the first-floor roof. The Contractor recommended for the asbestos fireproofing material within the first floor of City Hall be abated prior to emergency roof repair work.

Contract Change Order No. 1 (CCO1) directs the Contractor to perform asbestos abatement necessary within the first floor of City Hall to safely perform roof repairs thereafter in the amount of \$412,031.00. The scope of work for Change Order No. 1 includes removal and disposal of approximately 9,890 SF of asbestos fireproofing material, 13,400 SF of carpet, floor tiles, and asbestos containing mastic under full containment and negative pressure. Removal and disposal of all materials shall comply with all applicable codes, ordinances, rules, regulations, orders, and other legal requirements of local, state, and federal agencies such as Federal Occupational Safety and Health Administration (OSHA), California OSHA (Cal/OSHA), the United States Environmental Protection Agency (EPA), and the Monterey Bay Air Resources District (MBARD).

Department Policy 75-1, Item 3, requires City Council approval for issuance of contract change orders of more than \$100,000.00, or when the cumulative total of Contract Change Orders exceeds 10% of the original contract amount. At contract award, 15% of the contract amount was authorized for construction contingencies per Resolution No. 22627 for an amount of \$96,941.00. However, this amount of authorized contingency is insufficient to cover CCO 1 of \$412,031.00.

Staff is seeking Council approval of Contract Change Order No. 1 to address potential hazard from disturbance of existing asbestos materials by the emergency roof repair activities in the amount of \$412,031.00 and approval of an additional 20% construction contingencies of the new contract amount, \$211,660.40 for construction contingencies. If approved, the new contract amount will be \$1,058,302.00 with CCO1 and the new total not to exceed amount for construction will be \$1,269,962.40. The net change in overall authorized amount is \$526,750.75. See Table 1 below for a breakdown.

Table 1 – Construction Cost Request Breakdown

Original Contract Amount:	\$ 646,271.00
Original 15% Contingency Amount:	\$ 96,940.65
Council Resolution 22627 Authorized Amount	\$ 743,211.65
Contract Change Order No. 1	\$ 412,031.00
New Contract Amount With CCO1	\$ 1,058,302.00
New 20% Construction Contingency Request	\$ 211,660.40
Additional Not to Exceed (CCO1 and 20% Contingencies)	\$ 526,750.75
New Total Contract Not to Exceed Amount	\$ 1,269,962.40

Construction of the project has yet to commence, and the additional asbestos abatement scope is the basis for the additional 20% contingency request.

CEQA CONSIDERATION:

The City of Salinas has determined that the proposed action is categorically exempt from environmental review under the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15301).

STRATEGIC PLAN INITIATIVE:

This project addresses the current City Council's Goals of Operational Efficiency and Public Safety.

DEPARTMENTAL COORDINATION:

The Public Works Department is collaborating with Legal, Administration and Finance Departments. Abatement of asbestos materials will require relocation of City Hall staff and this effort is requiring coordination with Human Resources, Administration and Library and Community Services.

FISCAL AND SUSTAINABILITY IMPACT:

There are sufficient funds within the project CIP 8170 to approve Contract Change Order No. 1, \$412,031.00, authorize an additional 20% of the new contract amount, \$211,660.40 for construction contingencies, and authorize expenditure cost for all professional emergency moving, Information Technology changes and unforeseen moving/transition expenses relating to the Emergency Roofing Project in an amount not to exceed \$100,000.

Resolution

RESOLUTION NO. _____ (N.C.S.)

A RESOLUTION AUTHORIZING APPROVAL OF CONTRACT CHANGE ORDER NO. 1 FOR THE CITY HALL EMERGENCY ROOF REPAIR AND AUTHORIZING 20% OF THE NEW CONTRACT AMOUNT FOR CONSTRUCTION CONTINGENCIES AND AN AMOUNT NOT TO EXCEED \$100,000 FOR ALL PROFESSIONAL EMERGENCY MOVING, INFORMATION TECHNOLOGY CHANGES AND UNFORESEEN MOVING/TRANSITION EXPENSES RELATING TO THE EMERGENCY ROOF PROJECT

WHEREAS, On April 4, 2023, City Council pursuant to Resolution No.22627 awarded an emergency construction contract to F C & Sons Roofing, Inc. for the City Hall Emergency Roof Repair, Project No. 8170 in the amount of \$646,271.00; and

WHEREAS, during pre-construction of the project, the Contractor determined that the existing asbestos-containing fireproofing material below the roof deck is friable and would become disturbed during construction creating hazard to staff below; and

WHEREAS, it is recommended to abate the existing asbestos fireproofing material prior the roof repair; and

WHEREAS, Contract Change Order No. 1 in the amount of \$412,031.00 directs the contractor to perform asbestos abatement necessary within the first floor of City Hall to safely perform roof repairs compliant with all applicable codes, ordinances, rules, regulations, orders and other legal requirements of local, state, and federal agencies such as Federal Occupational Safety and Health Administration (OSHA), California OSHA (Cal/OSHA), the United States Environmental Protection Agency (EPA), and the Monterey Bay Air Resources District (MBARD); and

WHEREAS, Department Policy 75-1 (Resolution No. 21528), requires Council approval for all contract change orders above \$100,000 or above 10% of the contract amount; and

WHEREAS, upon approval of Contract Change Order No. 1 the initial 15% construction contingency authorized per Resolution 22627 will be exhausted; and

WHEREAS, staff requests approval of an additional 20% construction contingencies of the new contract amount; and

WHEREAS, staff requests approval for expenditure cost for all professional emergency moving, Information Technology changes and unforeseen moving/transition expenses relating to the Emergency Roof Project in an amount not to exceed \$100,000; and

WHEREAS, the City of Salinas has determined that the proposed action is categorically exempt from environmental review under the California Environmental Quality Act (CEQA Guidelines Section 15301).

NOW, THEREFORE, BE IT RESOLVED that the City Council approves Contract Change Order No. 1 to F C & Sons Roofing, Inc. for the City Hall Emergency Roof Repair, Project No. 8170 in the amount of \$412,031.00 and authorizes the City Manager to execute all necessary documents related to Contract Change Order No. 1; and

BE IT FURTHER RESOLVED that the City Council authorizes an additional 20% of the new contract amount of \$211,660.40 for construction contingencies for the City Hall Emergency Roof Repair, Project No. 8170; and

BE IT FURTHER RESOLVED that the City Council authorizes expenditure cost for all professional emergency moving, Information Technology changes and unforeseen moving/transition expenses relating to the Emergency Roof Project in an amount not to exceed \$100,000.

Microsoft Office 365 and Azure AD License Renewal

Approve a Resolution authorizing the purchase and renewal of Microsoft Office 365 Software and Azure Active Directory from Dell, Inc., in an amount not to exceed \$321,000.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: ADMINISTRATION

FROM: JIM PIA, ASSISTANT CITY MANAGER

BY: ERIC SANDOVAL, GIS ADMINISTRATOR

TITLE: MICROSOFT OFFICE 365 AND AZURE AD LICENSE RENEWAL

RECOMMENDED MOTION:

A motion to approve a resolution to allow the purchase and renewal of Microsoft Office 365 Software and Azure Active Directory renewal from Dell, LP., in an amount not to exceed \$321,000.

EXECUTIVE SUMMARY:

The City of Salinas continues to maintain and support various technology programs and platforms for City Departments. The Microsoft 365 licensing program is for customers, like the City who use Microsoft Windows, Microsoft Office, and other desktop applications. The software licenses provide City staff access to required applications such as Word, Excel, Power Point, Teams, Azure AD and Outlook email via the cloud and/or desktop environments.

BACKGROUND:

The City currently uses Microsoft software and platforms for its day-to-day operations. Software includes Word, Excel, Power Point, Teams, Azure AD and Outlook email via the cloud and/or desktop environments. Each of these applications requires seat licenses that are renewed on an annual basis. Due to the timing of this renewal, the City has requested a 38-month contract, so renewal does not take place during the fiscal year transition period in July. Subsequent annual renewals will be brought to Council for approval during those future years.

Maintaining software licenses is necessary for the maintenance and operations of multiple staff activities, maintain staff collaboration tools, email, and Microsoft authentication tools (Azure AD). The current resolution will authorize the continuation of maintaining core Microsoft applications in cloud and virtual desktop environments.

Funding has been submitted for Council approval as part of the FY 2023-24 Annual Budget.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

This request supports City Council's Strategic Goals and Strategies of Effective and Culturally Responsive Government, by ensuring that the information systems can support City programs, projects, and City services for the community.

DEPARTMENTAL COORDINATION:

The Finance department will continue to work with all affected departments during software upgrades or patch releases.

FISCAL AND SUSTAINABILITY IMPACT:

Funding for this purchase is part of the FY 2023-24 Annual Budget. There is no recommended action for new appropriations.

ATTACHMENTS:

2. Dell Quote

RESOLUTION NO. _____ (N.C.S.)

**A RESOLUTION OF THE CITY COUNCIL OF SALINAS TO APPROVE THE
RENEWAL OF MICROSOFT 365 LICENSES**

WHEREAS, the City desires to renew and maintain its Microsoft 365 and application licensing; and

WHEREAS, Dell LP., will provide Microsoft 365 and application software licensing for the City of Salinas

NOW, THEREFORE, BE IT RESOLVED that pursuant to Salinas Municipal Code section 12-27 the Salinas City Council hereby authorizes the City Manager and the Purchasing Agent to purchase the renewal of Microsoft 365 licenses from Dell LP., in an amount not to exceed \$321,000.

Replacement of Playground Structures at Natividad and Steinbeck Neighborhood Parks

Approve a Resolution authorizing the City Manager to enter into an Agreement with Miracle Playsystems Inc. and Ross Recreation Inc. for the purchase of playground equipment and labor to replace playground structures at Natividad and Steinbeck Neighborhood Parks.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: LIBRARY & COMMUNITY SERVICES

FROM: KRISTAN LUNDQUIST, DIRECTOR

BY: ANA AMBRIZ, REC-PARK SUPERINTENDENT

TITLE: REPLACEMENT OF PLAYGROUND STRUCTURES AT
NATIVIDAD AND STEINBECK NEIGHBORHOOD PARKS

RECOMMENDED MOTION:

A motion to approve a Resolution authorizing the City Manager to enter into an Agreement with Miracle Playsystems Inc. and Ross Recreation Inc. for the purchase of playground equipment and labor to replace playground structures at Natividad and Steinbeck Neighborhood Parks.

DISCUSSION:

On March 11, 2021, President Biden signed the American Rescue Plan Act (ARPA), which provided the City of Salinas with \$51,567,313 in relief funds. In September 2021, the City Council allocated ARPA funds for several government service projects, including \$2 million dollars for playground structures, park benches and BBQ grills, the majority of which was to be spent in the 93905 and 93906 zip codes which were hit hardest by the COVID-19 pandemic. With the allocation, the Council Resolution called for staff to check in with the Finance Committee on these and the Public Works sidewalk/street repair allocations.

The City of Salinas has 35 playgrounds located in parks/facilities across the City. An assessment of the playgrounds was conducted as part of the Parks, Recreation & Libraries Master Planning effort in 2017. The majority of the playgrounds were found to be in fair and/or good condition. The playground at Williams Ranch Neighborhood Park was found to be in poor condition and in need of replacement.

In September 2022 the Council approved a resolution authorizing the City Manager to enter into an Agreement with Miracle Playsystems and Ross Recreation for the purchase of playground equipment and labor to repair playground structures at designated locations throughout the park system, with a focus on ARPA funding direction provided by Council. In addition to the repairs approved in 2022, staff also recommended the full replacement of two (2) additional playground structures, one at Natividad Neighborhood Park and one Steinbeck Neighborhood Park. These two playground locations fall within the 93906 zip code and are in poor condition.

Across the system, we have playground apparatus from four different playground manufacturing companies including Ross Recreation, Miracle Playsystems, Playcraft (Park Planet) and Play World (David Bang Associates, Inc.). The City has Miracle Playsystem playgrounds in twelve (12) parks and Ross Recreation playgrounds in twelve (12) other parks making them the two major manufacturers in our system. For consistency purposes and to maintain standardization of the equipment systemwide, staff recommends utilizing Miracle Playsystems and Ross Recreation for the new playgrounds at Natividad Neighborhood and Steinbeck Neighborhood Parks. Park Maintenance Staff is most familiar with equipment from these two manufacturers, can make minor repairs inhouse and it allows us to purchase larger orders for items that regularly need repair, i.e., swing clevises. Consistent with Purchasing Policies and ordinance (2576) the purchase of equipment in the amount of more than \$30,000 with one vendor requires City Council authorization. The replacement of these two playgrounds will total \$339,706.98.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

The playground repairs are consistent with the City Council Goals of:

- Youth and Seniors
- Infrastructure and Environmental Sustainability
- Public Safety

FISCAL AND SUSTAINABILITY IMPACT:

Funds are appropriated and available in account 3911.55.8171.

ATTACHMENTS:

Resolution

Agreement with Miracle Playsystems

Agreement with Ross Recreation (Landscape Structures)

RESOLUTION NO. _____ (N.C.S.)

A RESOLUTION AUTHORIZING THE CITY MANAGER TO ENTER INTO AN AGREEMENT WITH MIRACLE PLAYSYSTEMS INC. AND ROSS RECREATION INC. FOR THE PURCHASE OF PLAYGROUND EQUIPMENT AND LABOR TO REPLACE PLAYGROUND STRUCTURES AT NATIVIDAD AND STEINBECK NEIGHBORHOOD PARKS

WHEREAS, on March 11, 2021, President Biden signed the American Rescue Plan Act (ARPA) which provided the City of Salinas with \$51,567,313 in relief funds; and;

WHEREAS, on September 1, 2021, the City Council allocated ARPA funds for a number of governmental service projects, including \$2 million dollars for playground structures, park benches and bar-be-que grills, the majority of which was to be spent in the 93905 and 93906 zip codes; and

WHEREAS, on September 20, 2022, staff recommended the full replacement of two (2) playground structures, one at Natividad Neighborhood Park and one Steinbeck Neighborhood Park. These two playground locations fall within the 93906 zip code and are in poor condition; and

WHEREAS, Miracle Playsystems has evaluated the playground at Natividad Neighborhood Park and provided a quote for the replacement totaling \$227,675.41; and

WHEREAS, Ross Recreation, Inc., has evaluated the playground at Steinbeck Neighborhood Park and provided a quote for the replacement totaling \$112,031.57.

NOW THEREFORE, BE IT RESOLVED BY THE SALINAS CITY COUNCIL that pursuant to Salinas Municipal Code Sections 12-27 and 12-28.080 the City Manager of Salinas is authorized to enter into Agreements with Miracle Playsystems and Ross Recreation, Inc., in the amounts of \$227,675.41 and \$112,031.57, respectively, for the purchase of playground equipment and labor to replace playground structures at Natividad and Steinbeck Neighborhood Parks.

**AGREEMENT FOR SERVICES BETWEEN
THE CITY OF SALINAS AND MIRACLE PLAYSYSTEMS**

Natividad Neighborhood Park Playground Replacement

THIS AGREEMENT is executed this ____ day of _____, 20__, (“Agreement” or “Contract”) between the City of Salinas, a California Charter city and municipal corporation (hereinafter “City”) and Miracle Playsystems Inc. a California corporation (hereinafter “Contractor”).

IT IS HEREBY MUTUALLY AGREED AS FOLLOWS:

1. **Scope.** Contractor hereby agrees to provide to the City, as the scope of services under this Agreement, the following services: Replacement for Natividad Neighborhood Park. Scope of work is further discussed in the Contractor’s Proposal dated 3/13/2023, Attachment B.
2. **Timeliness.** Contractor shall perform all tasks in a timely fashion, as set forth more specifically in Section 3 below. Failure to so perform is hereby deemed a material breach of this Agreement, and City may terminate this Agreement with no further liability hereunder, or the city may agree in writing with Contractor to an extension of time.
3. **Term.** The work under this Agreement shall commence [**date of start of work**] and shall be completed by [**date of end of work**] unless City grants a written extension of time as set forth in Section 2 above.
4. **Payment.** City agrees to pay and Contractor agrees to accept as full and fair consideration for the performance of this Agreement, Two Hundred Twenty-Seven Thousand Six Hundred Seventy-Five And Forty-One Hundredths Dollars (\$227,675.41) as more fully described in title of Contractors fee schedule, Attachment B. Contractor has no right of reimbursement for expenses under this Agreement. Compensation shall become due and payable 30 days after City’s approval of Contractor’s submission of monthly written invoices to the City. The payment of any compensation shall be contingent upon performance of the terms and conditions of this Agreement to the satisfaction of the City. If City determines that the work set forth in the written invoice has not been performed in accordance with the terms of this Agreement, City shall not be responsible for payment until such time as the work has been satisfactorily performed.
5. **Meet & Confer.** Contractor agrees to meet and confer with City or its agents or employees with regard to services as set forth herein as may be required by City to insure timely and adequate performance of this Agreement.
6. **Insurance.** Contractor shall procure and maintain for the duration of this Agreement insurance meeting the requirements specified in Attachment A hereto.
7. **Indemnification.** Contractor shall hold harmless, defend at its own expense, and

indemnify City and its officers, officials, employees, agents, and volunteers from and against all liability, claims, damages, losses, and/or expenses including reasonable City attorney fees arising from all acts or omissions of Contractor or its officers, agents, or employees arising out of the performance of the work under this Contract, caused in whole or in part by any negligent act or omission of the Contractor, any subcontractor, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, except where caused by the active negligence, sole negligence or willful misconduct of the City.

8. **Licensing.** Contractor warrants that it is properly licensed to perform the work specified under this Agreement, including but not limited to possession of a current City business license.

9. **Termination.** City may terminate this Agreement upon ten days' written notice. The amount of damages, if any, as a result of such termination may be decided by negotiations between the parties or before a court of competent jurisdiction.

10. **Agency.** In performing the services specified under this Agreement, Contractor is hereby deemed to be an independent contractor and not an agent or employee of City.

11. **Non-Assignability.** The rights and obligations of Contractor hereunder are not assignable and cannot be delegated without written consent of City.

12. **Entire Agreement.** This Agreement constitutes the entire Agreement between the parties hereto and supersedes any and all prior agreements, whether oral or written, relating to the subject matter thereof. Any modification of the Agreement will be effective only if it is in writing signed by both parties hereto.

13. **Validity.** If any provision in this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions will continue in full force without being impaired or invalidated in any way.

14. **Counterparts.** This Agreement may be executed in multiple originals, each of which is deemed to be an original, and may be signed in counterparts.

15. **Laws.** Contractor agrees that in the performance of this Agreement it will comply with all applicable State, Federal and local laws and regulations. This Agreement shall be governed by and construed in accordance with the laws of the State of California, County of Monterey, and City of Salinas.

IN WITNESS WHEREOF, this Agreement is entered into by the parties hereto on the day and year first written above.

CONTRACTOR

By (Printed Name): _____

Its (Title): _____

Insurance Requirements

Contractor shall procure and maintain for the duration of the contract, and for three years thereafter, insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the work hereunder by the Contractor, his/her/its officers, agents, representatives, employees, and/or subcontractors.

MINIMUM SCOPE AND LIMIT OF INSURANCE

Coverage shall be at least as broad as:

1. **Commercial General Liability** (“CGL”): Insurance Services Office (“ISO”) Form CG 00 01 covering CGL on an occurrence basis, including products and completed operations, property damage, bodily injury and personal & advertising injury with limits no less than **\$2,000,000** per occurrence. If a general aggregate limit applies, either the general aggregate limit shall apply separately to this project/location (ISO Form CG 25 03 or 25 04) or the general aggregate limit shall be twice the required occurrence limit.
2. **Automobile Liability**: ISO Form CA 0001 covering Code 1 (any auto), with limits no less than **\$1,000,000** per accident for bodily injury and property damage.
3. **Workers’ Compensation**: as required by the State of California, with Statutory Limits, and Employers’ Liability insurance with a limit of no less than \$1,000,000 per accident for bodily injury or disease.
4. **Contractors’ Pollution Legal Liability and/or Asbestos Legal Liability and/or Errors and Omissions** (if project involves environmental hazards): with limits no less than \$1,000,000 per occurrence or claim, and \$2,000,000 policy aggregate, on an annual basis.

If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Contractor requires and shall be entitled to the broader coverage and/or higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

Self-Insured Retentions

Self-insured retentions must be declared to and approved by the City. At the option of the City, either: the Contractor shall cause the insurer shall to reduce or eliminate such self-insured retentions as respects the City, its officers, officials, employees, and volunteers; or the Contractor shall provide a financial guarantee satisfactory to the City guaranteeing payment of losses and related investigations, claim administration, and defense expenses. The policy language shall provide, or be endorsed to provide, that the self-insured retention may be satisfied by either the named insured or City.

Other Insurance Provisions

The insurance policies are to contain, or be endorsed to contain, the following provisions:

1. **The City, its officers, officials, employees, and volunteers are to be covered as additional insureds** on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts, or equipment furnished in connection with such work or operations and automobiles owned, leased, hired, or borrowed by

or on behalf of the Contractor. General liability coverage can be provided in the form of an endorsement to the Contractor's insurance (at least as broad as ISO Form CG 20 10, CG 11 85 or **both** CG 20 10, CG 20 26, CG 20 33, or CG 20 38; **and** CG 20 37 forms if later revisions used).

2. For any claims related to this project, the **Contractor's insurance coverage shall be primary** insurance coverage at least as broad as ISO CG 20 01 04 13 as respects the City, its officers, officials, employees, and volunteers. Any insurance or self-insurance maintained by the City, its officers, officials, employees, or volunteers shall be excess of the Contractor's insurance and shall not contribute with it.

3. Each insurance policy required by this clause shall provide that coverage shall not be canceled, except with notice to the City.

4. A copy of the claims reporting requirements must be submitted by Contractor to the City.

5. If the services involve lead-based paint or asbestos identification/remediation, the Contractor's Pollution Liability policy shall not contain lead-based paint or asbestos exclusions. If the services involve mold identification/remediation, the Contractor's Pollution Liability policy shall not contain a mold exclusion, and the definition of Pollution shall include microbial matter, including mold.

Acceptability of Insurers

Insurance is to be placed with insurers authorized to conduct business in the state with a current A.M. Best rating of no less than A: VII, unless otherwise acceptable to the City.

Waiver of Subrogation

Contractor hereby agrees to waive rights of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss. Contractor agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the City for all work performed by the Contractor, its employees, agents and subcontractors.

Verification of Coverage

Contractor shall furnish the City with original Certificates of Insurance including an additional insured endorsement and all required amendatory endorsements (or copies of the applicable policy language effecting coverage required by this clause) and a copy of the Declarations and Endorsement Page of the CGL policy listing all policy endorsements to City before work begins. However, failure to obtain the required documents prior to the work beginning shall not waive the Contractor's obligation to provide them. The City reserves the right to require complete, certified copies of all required insurance policies, including endorsements, required by these specifications, at any time.

Subcontractors

Contractor shall require and verify that all subcontractors maintain insurance meeting all the requirements stated herein, and Contractor shall ensure that City is an additional insured on insurance required from subcontractors. For CGL coverage subcontractors shall provide coverage with a form at least as broad as CG 20 38 04 13.

Maintenance of Insurance

Maintenance of insurance by Contractor as specified shall in no way be interpreted as relieving

Contractor of its indemnification obligations or any responsibility whatsoever and the Contractor may carry, at its own expense, such additional insurance as it deems necessary.

Special Risks or Circumstances

City reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

The insurance policies are to contain, or be endorsed to contain, the following provisions:

1. **The City, its officers, officials, employees, and volunteers are to be covered as additional insureds** on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts, or equipment furnished in connection with such work or operations and automobiles owned, leased, hired, or borrowed by

or on behalf of the Contractor. General liability coverage can be provided in the form of an endorsement to the Contractor's insurance (at least as broad as ISO Form CG 20 10, CG 11 85 or **both** CG 20 10, CG 20 26, CG 20 33, or CG 20 38; **and** CG 20 37 forms if later revisions used).

2. For any claims related to this project, the **Contractor's insurance coverage shall be primary** insurance coverage at least as broad as ISO CG 20 01 04 13 as respects the City, its officers, officials, employees, and volunteers. Any insurance or self-insurance maintained by the City, its officers, officials, employees, or volunteers shall be excess of the Contractor's insurance and shall not contribute with it.

3. Each insurance policy required by this clause shall provide that coverage shall not be canceled, except with notice to the City.

4. A copy of the claims reporting requirements must be submitted by Contractor to the City.

5. If the services involve lead-based paint or asbestos identification/remediation, the Contractor's Pollution Liability policy shall not contain lead-based paint or asbestos exclusions. If the services involve mold identification/remediation, the Contractor's Pollution Liability policy shall not contain a mold exclusion, and the definition of Pollution shall include microbial matter, including mold.

Acceptability of Insurers

Insurance is to be placed with insurers authorized to conduct business in the state with a current A.M. Best rating of no less than A: VII, unless otherwise acceptable to the City.

Waiver of Subrogation

Contractor hereby agrees to waive rights of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss. Contractor agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the City for all work performed by the Contractor, its employees, agents and subcontractors.

Verification of Coverage

Contractor shall furnish the City with original Certificates of Insurance including an additional insured endorsement and all required amendatory endorsements (or copies of the applicable policy language effecting coverage required by this clause) and a copy of the Declarations and Endorsement Page of the CGL policy listing all policy endorsements to City before work begins. However, failure to obtain the required documents prior to the work beginning shall not waive the Contractor's obligation to provide them. The City reserves the right to require complete, certified copies of all required insurance policies, including endorsements, required by these specifications, at any time.

Subcontractors

Contractor shall require and verify that all subcontractors maintain insurance meeting all the requirements stated herein, and Contractor shall ensure that City is an additional insured on insurance required from subcontractors. For CGL coverage subcontractors shall provide coverage with a form at least as broad as CG 20 38 04 13.

Maintenance of Insurance

Maintenance of insurance by Contractor as specified shall in no way be interpreted as relieving

Contractor of its indemnification obligations or any responsibility whatsoever and the Contractor may carry, at its own expense, such additional insurance as it deems necessary.

Special Risks or Circumstances

City reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

SpeakWrite Transcription Agreement for Fiscal Year 2023-24

Approve a Resolution authorizing the execution of a Service Agreement for transcription services with SpeakWrite LLC in an amount not to exceed \$100,000 for Fiscal Year 2023-24.

CITY OF SALINAS COUNCIL STAFF REPORT

Jacob1991

DATE: JUNE 13, 2023

DEPARTMENT: SALINAS POLICE DEPARTMENT

FROM: ROBERTO FILICE, CHIEF OF POLICE

BY: TONYA ERICKSON, POLICE SERVICES ADMINISTRATOR

TITLE: SPEAKWRITE TRANSCRIPTION AGREEMENT FOR FY 2023-24

RECOMMENDED MOTION:

A motion to approve a Resolution authorizing the execution of a Service Agreement for transcription services with SpeakWrite LLC in an amount not to exceed \$100,000 for FY 2023-24.

RECOMMENDATION:

Staff recommends City Council approve a Resolution authorizing a Service Agreement for transcription services with SpeakWrite LLC in an amount not to exceed \$100,000 for FY 2023-24.

EXECUTIVE SUMMARY:

The Salinas Police Department has utilized SpeakWrite LLC since 2018 to provide transcription services to support the timely production of police reports. The Department is requesting the execution of a new Agreement with SpeakWrite LLC for FY 2023-24 in an amount not to exceed \$100,000.

BACKGROUND:

The Police Department utilizes professional transcription services for use by Police Officers when completing Police Reports. When preparing reports, Officers have the option to dictate the narrative portion and send to SpeakWrite for transcription. The average turn-around time is just three hours, after which the Officer reviews the content, inserts into the report within the Records Management System, and completes his/her portion of the report. The utilization of professional transcription services has proven to be both efficient and cost effective.

The City has utilized the services of SpeakWrite LLC since 2018 and is needing to establish a new Agreement for Services. The new agreement shall commence July 1, 2023, upon expiration of the current Agreement, and continue through the end of the 2023-24 fiscal year. Payment will be at the rates specified in the Scope of Services, with a total amount not to exceed \$100,000.

POLICE COMMUNITY ADVISORY COMMITTEE:

The Police Chief will present this item to the Police Community Advisory Committee on June 28, 2023. The Committee will have an opportunity to ask questions and provide comments related to this requested action.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

Approving the proposed Resolution will support the City Council's Strategic Plan Goal of Public Safety as well as Effective and Culturally Responsive Government.

DEPARTMENTAL COORDINATION:

The Salinas Police Department has worked closely with the City Attorney's office on the development of the Agreement and will work with the Finance Department on the implementation and payment related to the Agreement.

FISCAL AND SUSTAINABILITY IMPACT:

No additional funds are requested to support this Agreement. Funds are appropriated and available within the Police Department's FY 2023-24 budget, account 1000.40.4130.

RESOLUTION NO. _____ (N.C.S.)

**A RESOLUTION AUTHORIZING THE EXECUTION OF A
SERVICE AGREEMENT WITH SPEAKWRITE LLC FOR FY 2023-24**

WHEREAS, the City of Salinas, through its Police Department, utilizes professional transcription services to support the timely production of police reports; and

WHEREAS, SpeakWrite LLC has provided timely and cost-effective services since 2018;

NOW, THEREFORE, BE IT RESOLVED pursuant to Salinas Municipal Code section 12-27 the City Council authorizes the City Manager to execute an Agreement with SpeakWrite LLC for transcription services in an amount not to exceed \$100,000 for FY 2023-24.

ATTEST:

Patricia M. Barajas, City Clerk

**AGREEMENT FOR SERVICES BETWEEN
THE CITY OF SALINAS AND SPEAKWRITE, LLC**

Transcription Services

THIS AGREEMENT is executed this ____ day of June, 2023, (“Agreement” or “Contract”) between the City of Salinas, a California Charter city and municipal corporation (hereinafter “City”) and SpeakWrite LLC, a Texas Limited Liability Company (hereinafter “Contractor”).

IT IS HEREBY MUTUALLY AGREED AS FOLLOWS:

1. **Scope.** Contractor hereby agrees to provide to the City, as the scope of services under this Agreement, the following services: Transcription services as further discussed in Contractor’s 2023 Scope of Services, Attachment B.
2. **Timeliness.** Contractor shall perform all tasks in a timely fashion, as set forth more specifically in Section 3 below. Failure to so perform is hereby deemed a material breach of this Agreement, and City may terminate this Agreement with no further liability hereunder, or the city may agree in writing with Contractor to an extension of time.
3. **Term.** The work under this Agreement shall commence July 1, 2023 and shall be completed by June 30, 2024 unless City grants a written extension of time as set forth in Section 2 above.
4. **Payment.** City agrees to pay and Contractor agrees to accept as full and fair consideration for the performance of this Agreement according to the rates set forth within the Contractor’s 2023 Scope of Services, Attachment B. The total amount paid under this agreement shall not exceed one hundred thousand dollars (\$100,000). Contractor has no right of reimbursement for expenses under this Agreement. Compensation shall become due and payable 30 days after City’s approval of Contractor’s submission of monthly written invoices to the City. The payment of any compensation shall be contingent upon performance of the terms and conditions of this Agreement to the satisfaction of the City. If City determines that the work set forth in the written invoice has not been performed in accordance with the terms of this Agreement, City shall not be responsible for payment until such time as the work has been satisfactorily performed.
5. **Meet & Confer.** Contractor agrees to meet and confer with City or its agents or employees with regard to services as set forth herein as may be required by City to insure timely and adequate performance of this Agreement.
6. **Insurance.** Contractor shall procure and maintain for the duration of this Agreement insurance meeting the requirements specified in Attachment A hereto.

7. **Indemnification.** Contractor shall hold harmless, defend at its own expense, and indemnify City and its officers, officials, employees, agents, and volunteers from and against all liability, claims, damages, losses, and/or expenses including reasonable City attorney fees arising from all acts or omissions of Contractor or its officers, agents, or employees arising out of the performance of the work under this Contract, caused in whole or in part by any negligent act or omission of the Contractor, any subcontractor, anyone directly or indirectly employed by any of them, or anyone for whose acts any of them may be liable, except where caused by the negligence, sole negligence or willful misconduct of the City.
8. **Licensing.** Contractor warrants that it is properly licensed to perform the work specified under this Agreement, including but not limited to possession of a current City business license.
9. **Termination.** City may terminate this Agreement upon ten days' written notice. The amount of damages, if any, as a result of such termination may be decided by negotiations between the parties or before a court of competent jurisdiction.
10. **Agency.** In performing the services specified under this Agreement, Contractor is hereby deemed to be an independent contractor and not an agent or employee of City.
11. **Non-Assignability.** The rights and obligations of Contractor hereunder are not assignable and cannot be delegated without written consent of City.
12. **Entire Agreement.** This Agreement constitutes the entire Agreement between the parties hereto and supersedes any and all prior agreements, whether oral or written, relating to the subject matter thereof. Any modification of the Agreement will be effective only if it is in writing signed by both parties hereto.
13. **Validity.** If any provision in this Agreement is held by a court of competent jurisdiction to be invalid, void or unenforceable, the remaining provisions will continue in full force without being impaired or invalidated in any way.
14. **Counterparts.** This Agreement may be executed in multiple originals, each of which is deemed to be an original, and may be signed in counterparts.
15. **Laws.** Contractor agrees that in the performance of this Agreement it will comply with all applicable State, Federal and local laws and regulations. This Agreement shall be governed by and construed in accordance with the laws of the State of California, County of Monterey, and City of Salinas.

IN WITNESS WHEREOF, this Agreement is entered into by the parties hereto on the day and year first written above.

CITY OF SALINAS

Steven S. Carrigan
City Manager

APPROVED AS TO FORM:

Christopher A. Callihan, City Attorney

CONTRACTOR

Jen Reid, President
SpeakWrite, LLC

Insurance Requirements

Contractor shall procure and maintain for the duration of the contract, and for three years thereafter, insurance against claims for injuries to persons or damages to property which may arise from or in connection with the performance of the work hereunder by the Contractor, his/her/its officers, agents, representatives, employees, and/or subcontractors.

MINIMUM SCOPE AND LIMIT OF INSURANCE

Coverage shall be at least as broad as:

1. **Commercial General Liability** (“CGL”): Insurance Services Office (“ISO”) Form CG 00 01 covering CGL on an occurrence basis, including products and completed operations, property damage, bodily injury and personal & advertising injury with limits no less than **\$2,000,000** per occurrence. If a general aggregate limit applies, either the general aggregate limit shall apply separately to this project/location (ISO Form CG 25 03 or 25 04) or the general aggregate limit shall be twice the required occurrence limit.
2. **Automobile Liability**: ISO Form CA 0001 covering Code 1 (any auto), with limits no less than **\$1,000,000** per accident for bodily injury and property damage.
3. **Workers’ Compensation**: as required by the State of California, with Statutory Limits, and Employers’ Liability insurance with a limit of no less than \$1,000,000 per accident for bodily injury or disease.
4. **Contractors’ Pollution Legal Liability and/or Asbestos Legal Liability and/or Errors and Omissions** (if project involves environmental hazards): with limits no less than \$1,000,000 per occurrence or claim, and \$2,000,000 policy aggregate, on an annual basis.

If the Contractor maintains broader coverage and/or higher limits than the minimums shown above, the Contractor requires and shall be entitled to the broader coverage and/or higher limits maintained by the Contractor. Any available insurance proceeds in excess of the specified minimum limits of insurance and coverage shall be available to the City.

Self-Insured Retentions

Self-insured retentions must be declared to and approved by the City. At the option of the City, either: the Contractor shall cause the insurer shall to reduce or eliminate such self-insured retentions as respects the City, its officers, officials, employees, and volunteers; or the Contractor shall provide a financial guarantee satisfactory to the City guaranteeing payment of losses and related investigations, claim administration, and defense expenses. The policy language shall provide, or be endorsed to provide, that the self-insured retention may be satisfied by either the named insured or City.

Other Insurance Provisions

The insurance policies are to contain, or be endorsed to contain, the following provisions:

1. **The City, its officers, officials, employees, and volunteers are to be covered as additional insureds** on the CGL policy with respect to liability arising out of work or operations performed by or on behalf of the Contractor including materials, parts, or equipment furnished in connection with such work or operations and automobiles owned, leased, hired, or borrowed by

or on behalf of the Contractor. General liability coverage can be provided in the form of an endorsement to the Contractor's insurance (at least as broad as ISO Form CG 20 10, CG 11 85 or **both** CG 20 10, CG 20 26, CG 20 33, or CG 20 38; **and** CG 20 37 forms if later revisions used).

2. For any claims related to this project, the **Contractor's insurance coverage shall be primary** insurance coverage at least as broad as ISO CG 20 01 04 13 as respects the City, its officers, officials, employees, and volunteers. Any insurance or self-insurance maintained by the City, its officers, officials, employees, or volunteers shall be excess of the Contractor's insurance and shall not contribute with it.

3. Each insurance policy required by this clause shall provide that coverage shall not be canceled, except with notice to the City.

4. A copy of the claims reporting requirements must be submitted by Contractor to the City.

5. If the services involve lead-based paint or asbestos identification/remediation, the Contractor's Pollution Liability policy shall not contain lead-based paint or asbestos exclusions. If the services involve mold identification/remediation, the Contractor's Pollution Liability policy shall not contain a mold exclusion, and the definition of Pollution shall include microbial matter, including mold.

Acceptability of Insurers

Insurance is to be placed with insurers authorized to conduct business in the state with a current A.M. Best rating of no less than A: VII, unless otherwise acceptable to the City.

Waiver of Subrogation

Contractor hereby agrees to waive rights of subrogation which any insurer of Contractor may acquire from Contractor by virtue of the payment of any loss. Contractor agrees to obtain any endorsement that may be necessary to affect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the City for all work performed by the Contractor, its employees, agents and subcontractors.

Verification of Coverage

Contractor shall furnish the City with original Certificates of Insurance including an additional insured endorsement and all required amendatory endorsements (or copies of the applicable policy language effecting coverage required by this clause) and a copy of the Declarations and Endorsement Page of the CGL policy listing all policy endorsements to City before work begins. However, failure to obtain the required documents prior to the work beginning shall not waive the Contractor's obligation to provide them. The City reserves the right to require complete, certified copies of all required insurance policies, including endorsements, required by these specifications, at any time.

Subcontractors

Contractor shall require and verify that all subcontractors maintain insurance meeting all the requirements stated herein, and Contractor shall ensure that City is an additional insured on insurance required from subcontractors. For CGL coverage subcontractors shall provide coverage with a form at least as broad as CG 20 38 04 13.

Maintenance of Insurance

Maintenance of insurance by Contractor as specified shall in no way be interpreted as relieving

Contractor of its indemnification obligations or any responsibility whatsoever and the Contractor may carry, at its own expense, such additional insurance as it deems necessary.

Special Risks or Circumstances

City reserves the right to modify these requirements, including limits, based on the nature of the risk, prior experience, insurer, coverage, or other special circumstances.

SpeakWrite

6300 Bridge Point Parkway,
Building 1 Suite 100
Austin, Texas 78730

Purpose

This document describes and defines the services required to establish transcription service; receive, transcribe and return recorded material in a confidential manner; provide account management and reporting tools; train and support users; and manage billing for the life of the account.

1 Length of Service

As defined by contract, if required by purchaser (SpeakWrite doesn't require a contract).

2 Introduction and Corporate Background

SpeakWrite, a limited liability corporation, produces quality transcriptions for over 60,000 clients nationwide. Since 1997, SpeakWrite has provided transcription solutions to law firms, state and local government, law enforcement agencies and general business practitioners. SpeakWrite users dictate their work directly via free Smartphone Apps for iPhone and Android or by calling a 24-hour toll-free dictation line. They can also upload prerecorded material, such as notes and interviews, directly to a secure website or via email 24/7/365. SpeakWrite's U.S. and Canadian-based typists transcribe the recording, which is then returned through the SpeakWrite system via email or secure link to the requesting user. SpeakWrite never uses voice recognition technology in any part of the process. The recording and transcribed document are accessible 24 hours a day to the user and designated account administrators via the SpeakWrite Individual Account and Group Account Pages.

3 Summary of Services

Key Scope Items	
Turnaround Time	3 hours (Monthly Average, dependent on audio quality and length)
Hours of Operation	24 hours a day, 7 days a week, 365 days a year
Location of Performance	United States and Canada– no offshore work performed
Resources	Human typists – no voice recognition technology used
Capacity	Unlimited
Methods of Submission	Free phone/desktop app, Toll-free dictation line from any phone, direct from computer with free SpeakWrite software, digital dictation device, recorded tapes, scanned documents, mail, secure website upload
Methods of Delivery	Word processing document via Email, URL link (Requires login to access), two factor authenticated, API and support provided for direct integration options
Security/confidentiality	256-bit SSL encryption, hosted on Microsoft Azure Government Cloud, CJIS Certified, separate data recovery site, redundant servers and multiple other safeguards; criminal background checks and confidentiality agreements for all typists; jobs assigned out of state; HIPAA compliant
Training and Support	Online and onsite training options available at no cost; Help Desk staffed 17 hours per day; dedicated Account Manager for the life of the account
Pricing	All-inclusive pricing, priced by the word for English transcription, per audio minute for Spanish translation.

****Figure 1. Key items addressed in the Scope of Services document.**

4 Set Up and Implementation

SpeakWrite provides set up and implementation services including establishing accounts, training users and working with client staff to answer questions throughout the process. As a part of implementation, SpeakWrite will perform the following:

- Provide a dedicated Account Manager as a point of contact during implementation
- Establish the appropriate account structure to enable reporting and customization at each organizational level
- Provide an online, automated account set up feature to enable designated Department personnel to establish User accounts
- Set up User accounts if requested
- Load agency and individual User document preferences, templates, instructions, word lists, reporting features, and billing preferences
- Provide training for client personnel via webinar and/or in person, to be agreed upon with the Department
- Complete set up within 24 hours of authorization to proceed

SpeakWrite

6300 Bridge Point Parkway,
Building 1 Suite 100
Austin, Texas 78730

SpeakWrite will provide the following methods for Department personnel to submit their transcription jobs:

- **Secure Web Portal** – Upload audio via password-protected personal page using 256-bit encryption protocols for added security.
- **Free Phone/Tablet/Computer App** - Record audio from any location and submit for transcription. You may integrate photos into the document if desired. Use the app to record calls and have call audio transcribed.
- **Telephone** – Dictate by telephone directly into the SpeakWrite system by calling a toll-free dictation line from any phone, entering the Account Number and PIN and following the automated prompts.
- **Digital Dictation Device** – Save digital files to a computer and submit by email, web upload.
- **Recorded Tapes and CD's** – Record dictation, then play the recorded tape into the phone using an adapter cable, or mail the recorded tapes to SpeakWrite.
- **Scan and Upload** – Submit scanned PDF documents including handwritten items or hard copies.
- **API** – Developer Interface and support provided for direct submission and delivery options, including document management and reporting systems.

5.2 Turnaround Time

SpeakWrite will maintain a 3-hour average monthly turnaround time across all accounts. Please note, this is an average turnaround time over a monthly period and is not a guarantee. Turnaround time will vary based on length and clarity of audio, as well as current job volume.

5.3 Document Delivery

SpeakWrite will deliver transcripts via email as a Word file attachment to the User's email address associated with each account. As an alternate option, SpeakWrite can deliver jobs via a secure URL link which requires login to gain access to the completed job.

5.4 Document Formats

SpeakWrite provides a wide array of formatting options. SpeakWrite will confer with the Department on the various options and configure the SpeakWrite system with the Department's preferences. Document formatting capabilities include the following:

- **Add User instructions to individual jobs.** For example, a User may include instructions such as, "Transcribe the audio from minute 2:00 to minute 30:56".
- **Create, use and store templates.** Templates are pre-formatted documents and forms uploaded by Users and stored in the system for repeated use. Templates can be created for Individual Users or the Department as a whole. SpeakWrite will restrict access to Department Templates to the typists who are actively working on Department transcripts.
- **Submit a job with a Custom Filename.** Having the flexibility to label transcription jobs helps the Department group and track transcriptions by project name, billing number or other identifying information.
- **Set formatting options.** Users may choose from SpeakWrite's existing array of formatting options (types, fonts, etc.). Should the Department require additional formatting options; the SpeakWrite Account Manager will work with Department representatives to identify the requirements.

5.5 Archive and Retrieval

SpeakWrite will retain transcribed work and the associated audio files for 90 days. Users will be able to download the completed documents and original audio via their Individual Account Page. The Department can customize this timeframe, by either shortening or increasing the length of archive to best meet their needs.

6 Availability of Resources

SpeakWrite will accept, transcribe and return documents 24 hours a day, 7 days a week, 365 days a year. Help Desk personnel will be available 17 hours a day during weekdays and 16 hour per day on weekends, 365 days a year.

7 Quality and Accuracy

SpeakWrite will monitor the quality of Department jobs through internal quality assurance practices. In addition, each completed job contains a customer comment link. SpeakWrite will review and address any concerns that are submitted through the link. If the Department identifies a job that does not meet our quality standards, SpeakWrite will correct the errors immediately upon notification and send the updated and complete document back to the designated User via the standard delivery method.

8 Security and Confidentiality

SpeakWrite will maintain internal security measures throughout the life of the account, which include the following:

Facilities

The SpeakWrite systems are housed in state-of-the-art data centers through Microsoft Azure Government Cloud.

Hardware/Software

SpeakWrite maintains full control and access SpeakWrite systems, which is monitored 24/7/365. Other system security measures include the following:

- **Virus Protection/Spam Blocking/Malware** – SpeakWrite uses modern antivirus and malware detection software to monitor all servers, desktops and laptops.
- **Real Time and Full Disk Virus Scans** – Servers, desktops and laptops are running real-time scans. A full disk scan is run on computers on a regular schedule.
- **Endpoint Security** – Anti-malware, web-threat protection, intrusion defense and data loss prevention safeguard endpoints.
- **Datacenter Security** – Anti-malware, IPS, firewall, file and system integrity monitoring, and application protection ensure security and compliance for physical and virtual servers.
- **Web Security** – Complete website and application protection; content scanning and URL filtering deliver web threat protection at the gateway.
- **Message Security** – Blocks spam, malware, phishing and data leaks at the email gateway and mail server.
- **Vulnerability Management** – Vulnerability management solutions reduce risk; Threat Management Service protects against evasive threats.

SpeakWrite

6300 Bridge Point Parkway,
Building 1 Suite 100
Austin, Texas 78730

- **Firewall / DMZ** – SpeakWrite environments are protected by modern firewalls utilizing strict rules to minimize exposed services.
- **Monitoring Security** – SpeakWrite IT is notified immediately when a virus or malware is detected on any computer. IT contacts the employee and rebuilds the employee's computer. SpeakWrite IT is notified when there is irregular network traffic and researches and responds to each alert.

Encryption and SSL Encryption

SpeakWrite uses encryption when sending and receiving files over the Internet. This includes client uploads of audio, client downloads of completed jobs, clients viewing and updating personal information, and the upload and download of client jobs to typists.

Authentication

Both Users and typists require authentication in the system. Clients are authenticated when they use the toll-free dictation line or login to the web site. Typists are authenticated at multiple steps in the transcription process to increase the level of security.

Authorization

Authorization verifies client access upon logging in and which functionality is available to each particular client. For typists, authorization is used to verify that they have been assigned a job and verifies the authority of a typist to download job information and upload finished documents.

Secure Network of Typists

SpeakWrite conducts a review of each typist's employment history and utilizes a 3rd party entity to perform a 7-year criminal background check, which includes a social security number trace, felony and misdemeanor search, multi-state instant criminal check with verification and a nationwide sex offender registry check on each one. Each typist signs Nondisclosure and Confidentiality Agreements. Typists complete training on handling client material, HIPAA compliance and undergo consistent internal review. U.S. and Canadian-based typists are geographically dispersed through the country. Jobs are assigned at random to ensure that no typist receives multiple jobs about the same case or subject, and a typist's identity is never available to other typists.

Criminal Justice Information Services (CJIS)

SpeakWrite operates under the security and data protection requirements of the FBI's CJIS compliance.

Optional two factor authentication

Clients may elect to employ two factor authentication on their accounts.

9 Volume/Capacity

SpeakWrite will accept and process any volume the Department submits without any prior notification or rate quote. Our network of typists work around the clock to ensure your transcription needs are met.

SpeakWrite

6300 Bridge Point Parkway,
Building 1 Suite 100
Austin, Texas 78730

10 Account Management and Reporting

SpeakWrite will provide online tools to enable agency personnel to monitor account usage and modify account settings.

10.1 Group Account Pages

SpeakWrite's administrative login feature enables designated agency personnel to manage users, view and retrieve jobs, and access billing and usage information in real time. Administrators may request custom reports from SpeakWrite to analyze usage data such as: total usage, usage by employee, usage by area, total dollars spent, dollars by employee, dollars by job, and turnaround time data. The Group Account Pages will provide the following functions:

- Add and remove accounts
- Maintain account information
- Update Word processing preferences
- Manage User and Departmental Templates, Word List, and all User and Group features
- View usage and billing data
- Retrieve completed transcriptions and audio from submitted jobs
- Designate who can submit jobs
- View who submitted jobs and when
- View word count for completed jobs
- View associated costs

SpeakWrite

6300 Bridge Point Parkway,
Building 1 Suite 100
Austin, Texas 78730

10.2 Individual Account Pages

SpeakWrite will provide each account holder with a personal page on the SpeakWrite web site. From this page, the User can view details about jobs and complete functions such as:

- Upload digital audio files for transcription
- Add instructions feature for notes to the typists (names, terminology, start/stop point within audio)
- Download completed transcriptions and/or original audio from submitted jobs
- Manage Templates, Word List, and all other account features
- Send a comment regarding a job
- Update account preferences
- Access training materials and tutorials

10.3 Invoicing and Billing

SpeakWrite will provide the following services related to invoicing and billing:

- Submit monthly invoices in Excel and PDF format with a detailed breakdown of each requirement of this section.
- Provide access to a password-protected site that displays billing and usage data 24 hours a day. Data includes the status of any job, account information, usage reports, and billing information.

10.4 Training and User Support

SpeakWrite offers the following services and support to help Users learn to use the SpeakWrite system effectively:

- **Online Tutorial** – SpeakWrite offers online tutorials to help users become acquainted with the features and capabilities of the service.
- **Webinars** – online, remote training courses, offered live to user groups at no cost to the agency.
- **Onsite Training** – as required, SpeakWrite will conduct onsite training sessions at no cost to the agency.
- **SpeakWrite Website** – the SpeakWrite website contains a plethora of useful instructions, tips and reference materials.
- **Account Management** – Each SpeakWrite user is assigned a dedicated Account Manager who serves as the go-to point of contact for assistance.
- **Customer Support** – Users can also call the toll-free help line or email questions to receive support from 7am-midnight CST Monday thru Friday and 8am-11pm CST Saturday and Sunday. Support is available on Holidays from 9am-6pm CST.

11 Insurance

For contracting purposes when applicable, SpeakWrite will maintain the required insurance allocations.

12 Pricing & Definitions

Use of the SpeakWrite service is completely pay-as-you-go. There are no fixed costs of any kind for using the service or having it available 24 hours a day. The Department is only charged for work transcribed and only at a per word cost. For words transcribed, the cost is:

Type of Work	Rate
General	1 ^{1/2} cents per word
Legal	1 ^{1/2} cents per word
Multi-Speaker	2 ^{1/4} cents per word
Spanish Translation	\$9.00 per audio minute

Figure 2. SpeakWrite charges by the word with a minimum charge of 100 words per submitted audio file. Job total is calculated on final word count x rate per word rounded to the nearest 100th.

Definitions of Categories of Jobs:

General – Work not requiring the use of a trained and experienced legal transcriptionist.

Legal – Work requiring the use of a trained and experienced legal transcriptionist.

Multi-Speaker – Transcription of recorded conversations, interviews, seminars, conference calls or anything which involves more than one person speaking. A User can name up to two speakers per recording.

Spanish – Work requiring the use of a trained and experienced bilingual transcriptionist. Please refer to our Spanish Scope of Service.

Word Count

SpeakWrite will use the word count feature in Microsoft Word to determine final charges. Since rates are per word, there are no price variables such as number of pages, length of the dictation, submission method, or audio quality. Each type of dictation submitted will be charged the same rate every time.

Templates

Words from any client template incorporated into a job are included in the final word count of that job. Text from the header or footer portion of a transcribed document is not included in that word count.

Urgent Pricing

Users have the ability to mark a job as “urgent” placing that job at the top of the queue thereby returning the finished product in a fraction of the time. Jobs that are marked as “urgent” are charged an additional \$24.95 in addition to the per word cost of the job.

Scope of Services 2023

13 Assumptions

- Upon authorization to proceed, designated account administrator will participate in the activities required to begin service including: determining User sign up procedures, establishing the security approach for emails, confirming report formats, and confirming and completing training requirements.
- SpeakWrite's average monthly turnaround time is based on routine dictations employees complete in their everyday work. Should the Purchaser encounter a frequent, ongoing and sustained need for a type of dictation that falls outside the norms of what can reasonably be done within the required timeframes, SpeakWrite will immediately notify the designated account administrator to determine the appropriate resolution.
- SpeakWrite follows the standards for preparing documents found in its Document Preparation Policy as described at www.speakwrite.com.
- All work done for SpeakWrite customers will be transcribed as dictated in the order dictated. SpeakWrite does not guess what a client might have meant, replace or correct formatting, transcribe music lyrics, or recreate forms. All work will be transcribed as dictated and based on the instructions provided within the audio or via the job instruction interface when uploading digital audio and video files. Any inaudible portions of the audio will be marked with four asterisks (****) in the typed document as an indication that the transcriptionist was unable to decipher that portion of the audio file.

Smartphone App

SpeakWrite

6300 Bridge Point Parkway,
Building 1 Suite 100
Austin, Texas 78730

Figure 3. SpeakWrite's Smartphone App for iPhone and Android enables Department users to record and submit dictation and other recorded material from anywhere. App features include the ability to record telephone calls and send for transcription and incorporate pictures into the final document

Direct Purchase of Emergency Equipment for Police Vehicles

Approve a Resolution authorizing the direct purchase of emergency equipment to upfit 10 police vehicles for a total cost not to exceed \$223,884.73.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: SALINAS POLICE DEPARTMENT

FROM: ROBERTO FILICE, CHIEF OF POLICE

BY: TONYA ERICKSON, POLICE SERVICES ADMINISTRATOR

TITLE: DIRECT PURCHASE OF EMERGENCY EQUIPMENT FOR
POLICE VEHICLES

RECOMMENDED MOTION:

A motion to approve a Resolution authorizing the direct purchase of emergency equipment to upfit 10 police vehicles for a total cost not to exceed \$223,884.73.

RECOMMENDATION:

Staff recommends that City Council approve the direct purchase of emergency equipment from Lehr to upfit 10 police vehicles for a total cost not to exceed \$223,884.73.

EXECUTIVE SUMMARY:

On August 9, 2022 and December 13, 2022, City Council approved the direct purchase of ten (10) Ford Police Interceptor Utility vehicles which will be assigned to patrol functions. Staff are now recommending the direct purchase of emergency equipment to upfit these 10 new police vehicles for a total cost not to exceed \$223,884.73.

BACKGROUND:

During FY 2020-21, the Salinas Police Department, in collaboration with the Public Works Fleet Division, developed a comprehensive Police Vehicle Replacement Plan which established target replacement cycles based upon vehicle assignment, usage data and best practices in fleet management. The plan projected necessary replacement through the next two decades, and identified the annual funding needed based upon current costs. The Police Vehicle Replacement Plan is used to guide replacement decisions and is intended to be updated based upon current data and vehicle needs. For vehicles assigned to patrol functions, the target replacement cycle is 6 years and/or 120,000 miles and the plan identified the need to add additional patrol vehicles over the next few years to ensure vehicle usage would support replacement at this frequency.

On August 9, 2022, City Council approved the direct purchase of citywide fleet replacement vehicles, including ten (10) Ford Police Interceptor Utility vehicles which will be assigned to patrol functions. On December 13, 2022, Cit Council approved an amended Resolution with updated pricing for these vehicles. Emergency equipment was not previously requested as we did not want to delay the ordering of vehicles while we continued to evaluate our best options for the purchase and install of necessary emergency equipment.

The Public Works Fleet Division began consistently servicing police vehicles in mid-2020 and since then has expanded the work to include the maintenance and repair of the associated emergency equipment. Over the last two fiscal years, Fleet Division mechanics have performed additional work and attended trainings related to emergency vehicle equipment, and three of the mechanics are now certified Emergency Vehicle Technicians. In 2021, Fleet Division mechanics successfully completed the upfitting of one complete patrol vehicle and have since taken on the installation of emergency equipment on some administrative and specialty vehicles. Given the increased training and experience, as well as the approval of a new Upfitting Mechanic position dedicated to installation of emergency vehicle equipment during the FY 2022-23 budget process, Public Works had planned to assume all upfitting responsibilities. Unfortunately, despite the approval of the Upfitting Mechanic position allocation, the City has not yet completed the development of a job description for this critical position, nor progressed toward hiring this position. For this reason, the Police Department must now rely upon vendors for the installation of the emergency equipment.

Given the delays and challenges with the creation of the new Upfitting Mechanic position, we have requested a quote from Lehr which includes both the purchase and installation of equipment. Installation-related charges increase the cost of each vehicle by \$8,778.51, or a total of \$87,785.10 for these ten (10) patrols vehicles. Should the City make progress on the previously approved Upfitting Mechanic position, we will attempt to build the vehicles in-house which would result in significant cost savings.

The department is requesting approval for the direct purchase and installation of the necessary emergency equipment identified below. We are also requesting approval of a 2.5% contingency as market conditions have led to unexpected price increases and instances of vendors not being able to honor previously quoted prices.

Vendor	Vehicle Function	Price per Unit	# Units	Total Cost
Lehr	General Patrol	21,838.51	10	218,385.10
2.5% Contingency				5,459.63
Not to Exceed Total				223,884.73

There are no local vendors for the purchase of the emergency vehicle equipment indicated above. We have found Lehr to consistently provide the most competitive prices for specialized emergency equipment. The City Council has the authority to approve this direct purchase under Salinas Municipal code Section 12-27 and without application of the local purchasing preference pursuant to Salinas Municipal Code Section 12-28.080.

Police Community Advisory Committee

The Police Chief presented this direct purchase request to the Police Community Advisory Committee on May 24, 2023. The Committee had no questions or concerns regarding this requested action.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

Approving this Resolution will support the City Council's Strategic Plan Goal of Public Safety and Effective and Culturally Responsive Government.

DEPARTMENTAL COORDINATION:

The Police Department has coordinated with the Public Works Fleet Division on the selection and specification of emergency equipment for police vehicles and will coordinate with the Finance Department during the purchasing process.

FISCAL AND SUSTAINABILITY IMPACT:

No additional funds are requested to support this purchase. Funds are appropriated and available within the Police Vehicle Replacement account, 5800.40.9579.

ATTACHMENTS:

Resolution
Lehr Quote

RESOLUTION NO. _____ (N.C.S.)

**RESOLUTION AUTHORIZING THE DIRECT PURCHASE OF
EMERGENCY EQUIPMENT FOR POLICE VEHICLES**

WHEREAS, during FY 2020-21, the Police Department developed a comprehensive Fleet Replacement Plan and corresponding Police Vehicle Replacement funds were approved by City Council as part of subsequent Police Department Budgets; and

WHEREAS, on August 9, 2022 the City Council approved the direct purchase of citywide vehicles, including 10 Ford Interceptor Utility SUVs to support ongoing Police Department Patrol operations; and

WHEREAS, the department must purchase emergency equipment for the 10 new police vehicles; and

WHEREAS, there are no local vendors available for this specialized emergency equipment and Lehr has provided a quote for \$21,838.51 per vehicle for the purchase and installation of emergency equipment; and

WHEREAS, the department is requesting an additional 2.5% contingency, totaling \$5,459.63, given current market conditions which have led to unexpected price increases and instances of vendors not honoring quoted prices; and

WHEREAS, the City Council can approve this purchase pursuant to Salinas Municipal Code Section 12-27 (exception to low-bid based competition) in contracting for equipment, materials, supplies and services and pursuant to Salinas Municipal Code 12-28.080 (local purchasing preference).

NOW, THEREFORE, BE IT RESOLVED that pursuant to Salinas Municipal Code section 12-27 and section 12-28.080 the Salinas City Council authorizes the direct purchase and installation of emergency equipment for ten patrol vehicles from Lehr for a total cost not to exceed \$223,884.73.

Direct Purchase of AB-481 Equipment

Approve a Resolution authorizing the direct purchase of unmanned aerial vehicles and associated equipment, diversionary devices, and ammunition for a total cost not to exceed \$59,994.91.

CITY OF SALINAS COUNCIL STAFF REPORT

DATE: JUNE 13, 2023

DEPARTMENT: SALINAS POLICE DEPARTMENT

FROM: ROBERTO FILICE, CHIEF OF POLICE

BY: TONYA ERICKSON, POLICE SERVICES ADMINISTRATOR

TITLE: DIRECT PURCHASE OF AB-481 EQUIPMENT

RECOMMENDED MOTION:

A motion to approve a Resolution authorizing the direct purchase of unmanned aerial vehicles and associated equipment, diversionary devices, and ammunition for a total cost not to exceed \$59,994.91.

RECOMMENDATION:

Staff recommends that City Council authorize the direct purchase of two DJI Matrice 30T unmanned aerial vehicles and associated equipment for use by our Salinas Police Aerial Support (SPAS) Team, as well as 168 diversionary devices, and 21 cases of ammunition to be used by the department's Special Weapons and Tactics (SWAT) Team. Equipment will be purchased from UVT, LC Action, and San Diego Police Equipment Co. Inc. for a total cost not to exceed \$59,994.91.

EXECUTIVE SUMMARY:

The department's Salinas Police Aerial Support (SPAS) Team has the need for two DJI Matrice 30T unmanned aerial vehicles (drones) with associated equipment and batteries to replace damaged equipment. The department's Special Weapons and Tactics (SWAT) Team have a need for 168 diversionary devices, and 21 cases of specialty ammunition for use during training and operations. Equipment will be purchased from UVT, LC Action, and San Diego Police Equipment Co. Inc. for a total cost not to exceed \$59,994.91. Assembly Bill 481, codified in Government Code sections 7070 through 7075, requires a law enforcement agency (LEA) to obtain approval from the applicable governing body prior to the funding, acquisition, or use of "Military Equipment" as defined by the Bill. As the items being requested are defined as "Military Equipment" per AB 481, we are seeking City Council approval prior to purchasing.

BACKGROUND:

On April 4, 2023, while assisting the Monterey County Sheriff's Office with response to a call of a subject with a rifle. The Salinas Police Aerial Support (SPAS) Team provided assistance with monitoring the incident from the air. While assistant with taking photos and video footage of the scene, the unmanned aerial vehicle (drone) was damaged when it fell approximately 90 feet and crashed into the ground. The drone and installed accessories were valued at approximately \$45,000. The City successfully submitted an insurance claim for this incident and recently received \$42,460 to be used toward replacement equipment. After reviewing options, The SPAS Team is requesting to purchase two DJI Matrice 30T unmanned aerial vehicles (drones) with associated equipment and batteries as a replacement. We have secured a quote from UVT, totaling \$34,492.15, for these replacement items. Remaining insurance funds will be used to purchase maintenance items.

The Salinas Police Department's Special Weapons and Tactics (SWAT) Team has the need to purchase diversionary devices and specialty ammunition for used exclusively by the team during training and operations. The 120 Mini Flashbangs and 48 Flashbangs being requested are diversionary devices used exclusively by the SWAT Team during training and high-risk operations. New SWAT Team members require dedicated training on these items, and existing SWAT Team members undergo regularly scheduled training to maintain specialized skills with this equipment. We have secured a quote from LC Action, totaling \$13,513.79, for these diversionary devices. The SWAT Team also has the need to purchase .308 and .338 ammunition for exclusive use by the specialized SWAT snipers during training and high-risk situations. We are requesting 19 cases of .308 ammunition and two cases of .338 ammunition. We have secured a quote from San Diego Police Equipment Co. Inc., totaling \$11,588.97, for this ammunition.

Assembly Bill 481 – Military Equipment Funding, Acquisition, and Use, requires the Salinas Police Department to obtain approval from the Salinas City Council prior to the funding, acquisition, or use of "Military Equipment" as defined by the Bill. The equipment and supplies within this request meet the criteria of AB 481 Category 1: Unmanned, remotely piloted, powered aerial vehicles, and Category 10: Specialized firearms and ammunition of less than .50 caliber, including assault weapons as defined in Sections 30510 and 30515 of the Penal Code, with the exception of standard issue service weapons, and thus City Council approval is required prior to acquisition. More information about AB 481, including Salinas Police Department's policy and equipment inventory is available at www.salinaspd.org/assembly-bill-481. Salinas Police Department Policy 709 Addendum A provides the applicable equipment inventory, including the purpose of equipment, cost, lifespan, and authorized use.

There are no local vendors that sell this specialized equipment and supplies, and we have selected existing vendors with long and positive history serving law enforcement. The attached quotes total \$59,994.91. Given the absence of local vendors, as well as the information provided, the City Council has the authority to approve this direct purchase under Salinas Municipal code Section 12-27 and without application of the local purchasing preference pursuant to Salinas Municipal Code Section 12-28.080.

Police Community Advisory Committee

The Police Chief presented this direct purchase request to the Police Community Advisory Committee on May 24, 2023. The Committee had no questions or concerns regarding this requested action.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (CEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

Approving the proposed resolution will support the City Council's Strategic Plan Goal of Public Safety.

DEPARTMENTAL COORDINATION:

The Police Service will coordinate with the Finance Department during the purchasing process.

FISCAL AND SUSTAINABILITY IMPACT:

No new funds are requested to support this purchase. Funds for the drone and equipment are available in the Police Vehicle Replacement's Insurance account, 5800.40.9579-66.5540, and funds for the diversionary devices and ammunition are appropriated and available within the Police Department's Patrol Division budget, accounts 1000.40.4220 and 1100.40.4220.

Resolution
AB-481 Equipment Quotes

RESOLUTION NO. _____ (N.C.S.)

RESOLUTION AUTHORIZING THE DIRECT PURCHASE OF AB-481 EQUIPMENT

WHEREAS, the Salinas Police Department's Salinas Police Aerial Support (SPAS) and the Special Weapons and Tactics (SWAT) Teams have a need for two DJI Matrice 30T unmanned aerial vehicles and associated equipment, 168 Flashbang diversionary devices, and 21 cases of specialty ammunition; and

WHEREAS, the equipment and supplies being requested are defined as "Military Equipment" per Assembly Bill 481 (AB 481), thus require City Council approval prior to purchase; and

WHEREAS, there are no local vendors available for this specialized police equipment and supplies, and UVT, LC Action, and San Diego Police Equipment Co. Inc. have provided quotes; and

WHEREAS, the City Council can approve this purchase pursuant to Salinas Municipal Code Section 12-27 (exception to low-bid based competition) in contracting for equipment, materials, supplies and services and pursuant to Salinas Municipal Code 12-28 (local purchasing preference).

NOW, THEREFORE, BE IT RESOLVED that pursuant to Salinas Municipal Code sections 12-27 and 12-28.080 the Salinas City Council authorizes the direct purchase of two DJI Matrice 30T unmanned aerial vehicles and associated equipment from UVT for a total cost of \$34,892.15; the direct purchase of 120 Mini Flashbangs and 48 Flashbangs from LC Action for a total cost of \$13,513.79; and the direct purchase of 19 cases of .308 ammunition and two cases of .338 ammunition from San Diego Police Equipment Co. Inc. for a total cost of \$11,588.97.

Modification to Classification - Salary Schedule

Approve a Resolution to amend the Classification - Salary Schedule to reflect the previously authorized salary adjustment for the Police Managers Association effective in the first full period of July 2023.

**CITY OF SALINAS
COUNCIL STAFF REPORT**

DATE: June 13, 2023

DEPARTMENT: HUMAN RESOURCES

FROM: Marina Horta-Gallegos, Human Resources Director

SUBJECT: MODIFICATION TO CLASSIFICATION – SALARY SCHEDULE

RECOMMENDED MOTION:

It is recommended that the City Council approve a Resolution to amend the Classification – Salary Schedule to reflect the previously authorized salary adjustment for the Police Managers Association effective in the first full period of July 2023.

RECOMMENDATION:

Staff recommends that the City Council approve the attached Resolution modifying the Classification – Salary Schedule to adjust the salary for the Police Managers Association consistent with the Resolution approved August 23, 2022.

BACKGROUND:

On August 23, 2022, the City Council approved the Memorandum of Understanding (MOU) between the City and the Police Managers Association. The MOU provides for a salary adjustment of one and one-half percent (1.5%) in July 2023.

CEQA CONSIDERATION:

Not a Project. The City of Salinas has determined that the proposed action is not a project as defined by the California Environmental Quality Act (CEQA) (SEQA Guidelines Section 15378).

STRATEGIC PLAN INITIATIVE:

The proposed action meets the Effective and Culturally Responsive Government Council goal.

DEPARTMENTAL COORDINATION:

The Human Resources Department coordinated this effort with the Finance Department.

FISCAL AND SUSTAINABILITY IMPACT:

The salary adjustments were factored into the fiscal year 2024 budget.

ATTACHMENTS:

Resolution

Exhibit A – Classification and Salary Schedule

RESOLUTION NO. _____ (N.C.S.)

**RESOLUTION APPROVING MODIFICATION TO
THE CLASSIFICATION AND SALARY SCHEDULE**

BE IT RESOLVED BY THE CITY COUNCIL OF SALINAS that the Classification and Salary Schedule previously adopted by the City Council is hereby amended to include a one and one-half percent (1.5%) salary adjustment due in the first full pay period of July 2023.
