My name is dale compton I own dales custom machining on bridge st. If you make bridge st no parking it will be a hardship for me. I am handicapped and there is no immediate parking. This would cause me to have to park a long way from my shop and leave me as prey to all the local skum bags that are down there. Perhaps you could make a handicapped parking in front of my shop. I work from midnight to eight in the morning. I have discussed this with commader craybill
